(1.) The Hebrew cosmology is based upon the leading principle that the universe exists, not independently of God, by any necessity or any inherent power, nor yet contemporaneously with God, as being coexistent with him, nor yet in opposition to God, as a hostile element, but dependently upon him, subsequently to him, and in subjection to him. The opening words of Genesis express in broad terms this leading principle; however difficult it may be, as we have already observed, to express this truth adequately in human language, yet there can be no doubt that the subordination of matter to God in every respect is implied in that passage, as well as in other passages, too numerous to quote, which comment upon it. The same great principle runs through the whole history of creation: matter owed all its forms and modifications to the will of God; in itself dull and inert, it received its first vivifying capacities from the influence of the Spirit of God brooding over the deep (Gen. i, 2); the progressive improvements in its condition were the direct and miraculous effects of God's will; no interposition of secondary causes is recognised—"He spake, and it was" (Psa. xxxiii, 9); and the pointed terseness and sharpness with which the writer sums up the whole transaction in the three expressions "God said," "it was so," "God saw that it was good"—the first declaring the divine volition, the second the immediate result, the third the perfectness of the work—harmonizes aptly with the view which he intended to express. Thus the earth became in the eyes of the pious Hebrew the scene on which the divine perfections were displayed: the heavens (Psa. xix, 1), the earth (Psa. xxiv, 1; civ, 24), the sea (Job xxvi, 10; Psa. lxxxix, 9; Jer. v, 22), "mountains and hills, fruitful trees and all cedars, beasts and all cattle, creeping things and flying fowl" (Psa. cxlviii, 9, 10), all displayed one or other of the leading attributes of his character. So also with the ordinary operations of nature—the thunder was his voice (Job xxxvii, 5), the lightnings his arrows (Psa. lxxvii, 17), the wind and storm his messengers (Psa. cxlviii, 8), the earthquake, the eclipse, and the comet the signs of his presence (Joel ii, 10; Matt. xxiv, 29; Luke xxi, 25). See ANTHROPOMORPHISM.

(2.) The earth was regarded in relation to man, and accordingly each act of creation is a preparation of the earth for his abode—light, as the primary condition of all life; the heavens, for purposes already detailed; the dry land, for his home; "grass for the cattle and herb for the service of man" (Psa. civ, 14); the alternations of day and night, the one for his work and the other for his rest (Psa. civ, 23); fish, fowl, and flesh for his food; the beasts of burden, to lighten his toil. The work of each day of creation has its specific application to the requirements and the comforts of man, and is recorded with that special view.

3. Creation was regarded as a progressive work—a gradual development from the inferior to the superior orders of things. Thus it was with the earth's surface, at first a chaotic mass, *waste and empty*, well described in the paronomastic terms *tohu va-bohu*, overspread with waters and enveloped in darkness (Gen. i, 2), and thence gradually brought into a state of order and beauty so conspicuous as to lead the Latins to describe it by the name *Mundus*. Thus also with the different portions of the universe, the earth before the light, the light before the firmament, the firmament before the dry land. Thus also with light itself, at first the elementary principle, separated from the darkness, but without defined boundaries; afterwards the illuminating bodies with their distinct powers and offices—a progression that is well expressed in the Hebrew language by the terms *ôr* and *maôr* (מָאוֹר, אוֹר). Thus also with the orders of living beings; firstly, plants; secondly, fish and birds; thirdly, cattle; and, lastly, man. From "good" in the several parts to "very good" as a whole (Gen. i, 31), such was its progress in the judgment of the Omnipotent workman.

4. Order involves time; a succession of events implies a succession of periods; and, accordingly, Moses assigns the work of creation to six days, each having its specific portion—light to the first, the firmament to the second, the dry land and plants to the third, the heavenly bodies to the fourth, fish and fowl to the fifth, beasts and man to the sixth. The manner in which these acts are described as having been done precludes all idea of time in relation to their performance; it was miraculous and instantaneous: "God said," and then "it was." But the progressiveness, and consequently the individuality of the acts, does involve an idea of time as elapsing between the completion of one and the commencement of another; otherwise the work of creation would have resolved itself into a single continuous act. The period assigned to each individual act is a day—the only period which represents the entire cessation of a work through the interposition of night. That a natural day is represented under the expression "evening was and morning was," admits, we think, of no doubt; the term "day" alone may sometimes refer to an indefinite period contemporaneous with a single event; but when the individual parts of a day, "evening and morning," are specified, and when a series of such days are noticed in their numerical order, no analogy of our language admits of our understanding the term in anything else than its literal sense. The Hebrews had no other means of expressing the civil day of twenty-four hours than as "evening, morning" (עֶרֶב בֹּקֶר, Dan. viii, 14), similar to the Greek *νυχθήμερον*; and, although the alternation of light and darkness lay at the root of the expression, yet the Hebrews in their use of it no more thought of these elements than do we when we use the terms *fortnight* or *se'nnight;* in each case the lapse of a certain time, and not the elements by which that time is calculated, is intended; so that, without the least inconsistency either of language or of reality, the expression may be applied to the days previous to the creation of the sun. The application of the same expressions to the events subsequent to the creation of the sun, as well as the use of the word "day" in the fourth commandment without any indication that it is used in a different sense, or in any other than the literal acceptation of Gen. i, 5 sq., confirm the view above stated. The interpretation that "evening and morning" = *beginning* and *end*, is opposed not only to the order in which the words stand, but to the sense of the words elsewhere.

5. The Hebrews, though regarding creation as the immediate act of God, did not ignore the evident fact that existing materials and intermediate agencies were employed both then and in the subsequent operations of nature. Thus the simple fact, "God created man" (Gen. i, 27), is amplified by the subsequent notice of the material substance of which his body was made (Gen. ii, 7); and so also of the animals (Gen. i, 24; ii,

19). The separation of sea and land, attributed in Gen. i, 6, to the divine fiat, was seen to involve the process of partial elevations of the earth's surface (Psa. civ, 8, "the mountains ascend, the valleys descend;" comp. Prov. viii, 25–28). The formation of clouds and the supply of moisture to the earth, which in Gen. i, 7, was provided by the creation of the firmament, was afterwards attributed to its true cause in the continual return of the waters from the earth's surface (Eccl. i, 7). The existence of the element of light, as distinct from the sun (Gen. i, 3, 14; Job xxxviii, 19), has likewise been explained as the result of a philosophically correct view as to the nature of light; more probably, however, it was founded upon the incorrect view that the light of the moon was independent of the sun.

6. With regard to the earth's body, the Hebrews conceived its surface to be an immense disc, supported like the flat roof of an Eastern house by pillars (Job ix, 6; Psa. lxxv, 3), which rested on solid foundations (Job xxxviii, 4, 6; Psa. civ, 5; Prov. viii, 29); but where those foundations were on which the "sockets" of the pillars rested, none could tell (Job xxxviii, 6). The more philosophical view of the earth being suspended in free space seems to be implied in Job xxvi, 7; nor is there any absolute contradiction between this and the former view, as the pillars of the earth's surface may be conceived to have been founded on the deep bases of the mountains, which bases themselves were unsupported. Other passages (Psa. xxiv, 2; cxxxvi, 6) seem to imply the existence of a vast subterraneous ocean; the words, however, are susceptible of the sense that the earth was elevated above the level of the sea (Hengstenberg, *Comm.* in loc.), and that this is the sense in which they are to be accepted appears from the converse expression "water under the earth" (Exod. xx, 4), which, as contrasted with "heaven above" and "earth beneath," evidently implies the comparative elevation of the three bodies. Beneath the earth's surface was *sheol* (שְׁאוֹל), the *hollow* place, "*hell*" (Num. xvi, 30; Deut. xxxii, 22; Job xi, 8), the "house appointed for the living" Job xxx, 23), a "land of darkness" (Job x, 21), to which were ascribed in poetical language gates (Isa. xxxviii, 10) and bars (Job xvii, 16), and which had its valleys or deep places (Prov. ix, 18). It extended beneath the sea (Job xxvi, 5, 6), and was thus supposed to be conterminous with the upper world.

7. The Mosaic statement of the world's formation (Gen. i) has been variously treated by different writers on the connection between science and the Bible. Skeptics have designated the Mosaic *heptæmeron* as a "myth," or, more mildly, the speculation of an ancient sage. Most Christians speak of it as a "history" or "narrative," or, more vaguely, a "record." Huxtable calls it a "parable" (*Sacred Record of Creation*, Lond. 1861). Others (e. g. Kurtz, Hugh Miller) suggest that it is a "vision;" one styles it a "plan" (Challier, *Creation*, Lond. 1861). But these are evidently mere glosses. The choice still lies between the Chalmerian interpolation of the geological ages before the first creative *day* begins (so Buckland, Pye Smith, Hitchcock, Crofton, Archd. Pratt, Gloag, and others), and the Cuvierian expansion of the six days into geological ages (with Miller, Macdonald, Silliman, Gaussen, Sime, M'Causland, M'Caul, Dana, and others). See DAY. Mr. Rorison (*The Creation Week*, in *Replies to "Essays and Reviews,"* Lond. and N. Y. 1862, p. 285) thinks he has discovered a new solution of the difficulty by terming the first chapter of Genesis "the inspired *Psalm* of creation," and he accordingly sets his ingenuity to work to draw out the demiurgic passage in a parallelized or hemistich form like Hebrew poetry. Yet this is but a modification of the "mythical theory" applied in a less bold form to the sacred text, but as really destructive of the historical verity of the document as the more palpable rationalistic views. There is no middle ground here between *fact* and *fancy*. The language is too detailed to admit the general dismissal of it as a cosmogonical poem. The same writer's comparison of the 104th Psalm, as being "section by section the daughter, the antiphone, the echo" of the Mosaic proem, is utterly preposterous, as the most casual collation of the two will show. But a fatal circumstance to this hypothesis is that the first chapter of Genesis lacks nearly every element of acknowledged Hebrew poetry. In FORM it has neither the lyrical prosody of the Psalms, nor the epic structure of Job; neither the dithyrambic march of the Prophets, nor the idyllic colloquies of the Canticles, nor even the didactic collocations of the Proverbs and Ecclesiastes. There is no *paronomasia* (except the accidental one in the stereotyped phrase תֹּהוּ וָבֹהוּ = pell-mell), no *ellipsis*, no *introversion*, no *pleonasm*, no climactic character; in short, no figurative element whatever to distinguish its phraseology from the veriest prose. There is no proper PARALLELISM (q. v.), based upon intrinsic antithesis and synonyms; no rhythmic measure. (Compare the perfection in all these respects of the earliest real ode on record, Gen. iv, 23, 24.) Again, as to SENTIMENT, it lacks that lofty moral tone, that fine play of the imagination, that abrupt change of subject and field, which—even when other criteria fail—serve to indicate the rhapsodies of the Hebrew bards. The only thing at all resembling poetry in its dress is the strophic return of the clause "evening and morning," which is simply due to the necessary regularity of the hebdomadal periods; and the only feature in its substance allying it to poetry is a certain dignity and advance of thought, which is inherent in the incidents themselves: all that can properly be said of the diction is that it is rhetorical and suited to the subject. Even Mr. Rorison fails to point out in its body the requisite artistic constructiveness, or in its spirit the fire of genius essential to all poetic effusions. Almost any descriptive portion of the Old Testament would be found to exceed it in these respects, if carefully analyzed. The very next chapter of Genesis is fully as poetical, whether in regard to its topics, its style, or its composition; and thus, by the same loose, unscientific process, we might (as many would fain do) reduce the accounts of Adam's specific formation, of a local Eden, and of the origin of human depravity, to poetic legends. Just criticism forbids such a distortion of prose to accommodate speculative preconception. See POETRY. For an able treatise on the bearings of the Hebrew cosmology upon modern astronomy and geology, see Kurtz, *Hist. of the Old Covenant* (Edinb. 1856, vol. i, ch. i; also separately, Phila. 1857); comp. Johannsen, *Die kosmogonischen Ansichten der Hebräer* (Alt. 1833); Browne, *Mosaic Cosmogony* (Lond. 1864). See COSMOGONY; CREATION.

Cosmos. See WORLD.

Cossett, FRANCEWAY RANNA, D.D., a prominent minister of the Cumberland Presbyterian Church. He was born in Claremont, New Hampshire, April 24, 1790. His parents were Episcopalians, his grandfather being the founder and for many years the pastor of the first Episcopal church of Claremont. He studied at Middlebury College, Vermont, and graduated in 1813. From the same institution he received in 1839 the degree of Doctor of Divinity, which degree was also conferred upon him in after years by Cumberland College, Kentucky. Soon after leaving college he engaged in teaching a classical school in Morristown, N. J. After two years he accepted a call as principal of Vine Hill Academy, N. C., where he taught several years, when, his health being poor, he returned to New England, where soon after he was converted. He felt deeply impressed with the duty of preaching

the Gospel, and soon after entered the Episcopal Theological Seminary at New Haven. From the seminary he went to Tennessee, with the commendation and sanction of the bishop as a "lay preacher." Here he became acquainted for the first time with Cumberland Presbyterians, "participated in their extraordinary revivals, attended their delightful camp-meetings." He was especially pleased with their success in winning souls to Christ, and, after a long, prayerful, and hard struggle, he felt it his duty to cast his lot with them. In the year 1822 he was ordained by the Anderson presbytery of this church. He taught very successfully for some time in a classical school in Elkton, Ky. He was the first president of Cumberland College at Princeton, Ky., over which he presided for years with great honor and success. When Cumberland University was started some years later at Lebanon, Tennessee, he accepted a call to the first presidency of that institution. He presided over it until it had arisen to be one of the foremost institutions in the entire South. He was for years, and up to his death, president of the Board of Foreign and Domestic Missions of the C. P. Church. He also started and maintained for several years successfully a weekly religious paper called the "Banner of Peace," which is still (1867) being published at Nashville, Tenn. Dr. Cossett published *The Life and Times of Ewing*, which contains a history of the early years of the C. P. Church. Mr. Cossett was a man of great learning and ability, and in his younger days was a very successful preacher. He was indefatigable in his efforts to promote education among all classes, but especially in the ministry. In all his intercourse with men, either personally, by letter, or as a controvertist, he never deviated from the rules of honorable Christian discussion, or the manners of the Christian gentleman. He died at Lebanon, Tennessee, July 3, 1863.

Costa, Da. See DA COSTA.

Costobărus (Κοστόβαρος). **1.** An Idumæan of honorable connections, married by Herod to his sister Salome, and appointed governor of Idumæa, but afterwards renounced by her on pretext of his favoring the escape of the sons of Babas, the last scions of the Hyrcanian dynasty, and eventually slain by Herod (Josephus, *Ant.* xv, 7, 8–10).

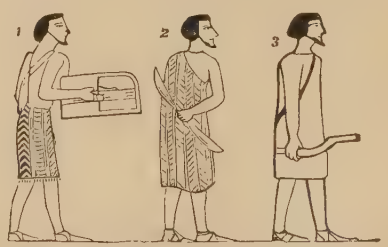
2. A relative of Agrippa, and a ringleader of the Sicarii in their excesses at Jerusalem (Josephus, *War*, xx, 9, 4).

Costume, ORIENTAL. The subject of the style of dress of the ancient Hebrews is involved in much obscurity and doubt. Sculptured monuments and coins afford us all needful information respecting the apparel of the ancient Egyptians, Babylonians, Persians, Greeks, and Romans; and even the garb worn by the barbarous nations is perpetuated in the monuments of their antagonists and conquerors. But the ancient Hebrews have left no monuments, no figures of themselves; and the few figures which have been supposed to represent Jews in the monuments of Egypt and Persia are so uncertain that their authority remains to be established before we can rely upon the information which they convey. There are, however, many allusions to dress in the Scriptures, and these form the only source of our positive information. They are often, indeed, obscure, and of uncertain interpretation, but they are invaluable in so far as they enable us to compare and verify the information derivable from other sources.

1. The range of inquiry into *monumental* costume is very limited. It is a common mistake to talk of "Oriental costume" as if it were a uniform thing, whereas, in fact, the costumes of the Asiatic nations differ far more from one another than do the costumes of the different nations of Europe. That this was also the case anciently is shown by the monuments, in which the costumes of Egyptians, Assyrians, Babylonians, Persians, Medes, Syrians, and Greeks differ as much from one another as do the costumes of the modern Syrians, Egyptians, Arabs, Turks, and Persians. It is therefore nearly useless to examine the monumental costume of any nation, remote from Palestine, for the purpose of ascertaining the costume of the ancient Hebrews. Syria, Arabia, Egypt, and, to some extent, Assyria, Persia, and Babylonia, are the only countries where monuments would be likely to afford any useful information; but Arabia has left no monumental figures, and Syria none of sufficiently ancient date, while those of Assyria, Babylonia, and Persia depict few scenes of social life; and it is left for Egypt to supply nearly all the information likely to be of use. But the Egyptians and the Hebrews were an exceedingly different people; and the climates which they inhabited were also so different as to *necessitate* a greater difference of food and *dress* than might be presupposed of countries so near to each other. It is true that the Jewish nation was cradled in Egypt; and this circumstance may have had some influence on ceremonial dresses and the ornaments of women; but we do not find that nations circumstanced as the Jews were readily adopt the costumes of other nations, especially when their residence in Egypt was always regarded by them as temporary, and when their raiment was of home manufacture—spun and woven by the women from the produce of their flocks (Exod. xxxv, 25). We find also that, immediately after leaving Egypt, the principal article of dress among the Hebrews was some ample woollen garment, fit to sleep in (Exod. xxii, 27), to which nothing similar is to be seen among the costumes of Egypt.

2. With respect to the supposed representation of *Jews* in ancient monuments, if any authentic examples could be found, even of a single figure, in the ancient costume, it would afford much satisfaction, as tending to elucidate many passages of Scripture which cannot at present be with certainty explained. (See also under the article BRICK.)

(*a.*) A painting at Beni Hassan represents the arrival of some foreigners in Egypt, and is supposed to figure the arrival of Joseph's brethren in that country. The accessories of the scene, the physiognomies of the persons, and the time to which the picture relates, are certainly in unison with that event; but other circumstances are against the notion. Sir J. G. Wilkinson speaks hesitatingly on the subject; and, until some greater certainty is obtained, we may admit the possible correctness of the conjecture. The annexed cut

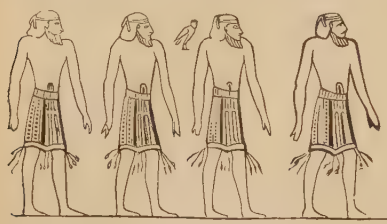


Supposed Representation of Joseph's Brethren on the Egyptian Monuments.

shows the variety of costume which this scene displays. All the men wear sandals. Some of them are clad only in a short tunic or shirt, with close sleeves (fig. 3); others wear over this a kind of sleeveless plaid or mantle, thrown over the left shoulder, and passing under the right arm (fig. 2). It is of a striped and curiously figured pattern, and looks exceedingly like the fine grass woven cloth of the South Sea. Others have, instead of this, a *fringed* skirt of the same material (fig. 1). All the figures are bare-headed, and wear beards, which are circumstances favorable to the identification. The fringed skirt of fig. 1 is certainly a re-

markable circumstance. Moses directed that the people should wear a fringe at the hem of their garments (Num. xv, 38); and the probability is that this command merely perpetuated a more ancient usage.

(*b.*) This fringe reappears, much enlarged, in the other Egyptian sculpture in which Jews are supposed to be represented. These are in a tomb discovered by Belzoni, in the valley of Bab el-Meluk, near Thebes. There are captives of different nations, and among them four figures, supposed to represent Jews. The



Supposed Representation of Jewish Captives on the Egyptian Monuments.

scene is imagined to commemorate the triumphs of Pharaoh-Necho in that war in which the Jews were defeated at Megiddo, and their king Josiah slain (2 Chron. xxxv, xxxvi).

(*c.*) On the face of a rock at Behistun (q. v.), on the Median border of the ancient Assyria, there is a remarkable sculpture representing a number of captives strung together by the neck, brought before the king and conqueror, who seems to be pronouncing sentence upon them. The venerable antiquity of this sculpture is unquestionable; and Sir R. K. Porter was led to fancy that the sculpture commemorates the subjugation and deportation of the *ten* tribes by Shalmaneser, king of Assyria (2 Kings xvii, 6). The reasons which he assigns (*Travels in Persia*, ii, 159 sq.) for this conclusion are of little weight, and not worth examination. But the single fact that the figures are arrayed in a costume similar to the ancient and present garb of the people of Syria and Lebanon inclines us to think that the figures really do represent the costume of nations west of the Euphrates, including, probably, that of the Jews and their near neighbors. The dress here

Supposed Representation of Israelitish Prisoners on the Persian Monuments.

shown is a shirt or tunic confined around the waist by a strap or girdle; while others have a longer and larger robe, furnished with a spacious cape or hood, and, probably, worn over the other.

There is no reason to think that the dress of the Jews was in any important respect different from that of the other inhabitants of the same and immediately bordering countries. It would therefore be satisfactory, and would enable us to judge better of the figures which have been noticed, if we had representations of Canaanites, Phœnicians, Syrians, Moabites, etc., by the Egyptian artists, who were so exact in discriminating, even to caricature, the peculiarities of nations. Under the article ARMOR (p. 423) there is a supposed figure of a Canaanite warrior from this source. The dress, being military, does not afford much room for comparison in the present instance; but we at once recognise in it most of the articles which formed the military dress of the Hebrews. The annexed figures, however, convey more information, as they appear to represent inhabitants of Samaria

Supposed Representation of Natives of Palestine on the Egyptian Monuments.

and Lebanon. The evidence for the last (fig. 2) is as conclusive as can be obtained, for not only is there the name "Lemanon" (*m* being constantly interchanged with *b*), but the persons thus attired are represented as inhabiting a mountainous country, and felling *fir*-trees to impede the chariots of the Egyptian invaders. The dresses are similar to each other, and this similarity strengthens the probability that the dress of the Jews was not very different; and it is also observable that it is similar to the full dress of some of the figures in the sculpture at Behistun: the figures are bearded, and the cap, or head-dress, is bound round with a fillet. The figures are arrayed in a long gown reaching to the ankles, and confined around the waist by a girdle; and the shoulders are covered by a cape, which appears to have been common to several nations of Asia. At first view it would seem that this dress is different from those already figured. But, in all probability, this more spacious robe is merely an outer garment, covering the inner dress which is shown in the figures that seem more scantily arrayed. (See the ingenious papers by a lady on the costumes of the ancient Canaanites in the *Jour. of Sac. Lit.*, Jan. 1853, p. 291 sq., and the cuts in the No. for April, 1854.) See CANAANITE; LEBANON.

3. The information on this subject to be obtained from *tradition* is embodied—(1.) In the dresses of monks and pilgrims, which may be traced to an ancient date, and which are an intended imitation of the dresses supposed to have been worn by the first disciples

Christian Costumes of Oriental Monks and Pilgrims.

and apostles of Christ. (2.) The garb conventionally assigned by painters to scriptural characters, which were equally intended to embody the dress of the apostolical period, and is corrected in some degree by the notions of Oriental costume which were collected during the Crusades.

To judge of the value of these costumes, we must compare them, first, with the scanty materials already produced, and then with the modern costumes of Syria and Arabia. The result of this examination will probably be that these traditional garbs are by no means bad reminiscences of Hebrew costume; and that the dresses which the painters have introduced into scriptural subjects are far more near to correctness than it has latterly been the fashion to suppose. It is per-

Fancy Sketches of Oriental Costume by early Painters.

haps as nearly as possible a just medium between the ecclesiastical tradition and the practical observation. No dress more suitable to the dignity of the subjects could possibly be devised; and, sanctioned as it has been by long use, and rendered venerable by scriptural associations, we should be reluctant to see it exchanged for the existing Oriental costumes, which the French artists have begun to prefer. But this is only with regard to pictorial associations and effects; for, in an inquiry into the costume *actually* worn by the Israelites, modern sources of information must be by no means overlooked.

4. The value of the *modern Oriental* costumes for the purposes of scriptural illustration arises from the fact that the dress, like the usages, of the people is understood to be the same, or nearly the same, as that used in very ancient times. But this must be understood with some limitations. The dress of the Turks is distinctive and peculiar to themselves, and has no connection with the aboriginal costumes of Western Asia. The dress of the Persians has also been changed almost within the memory of man, that of the ruling Tartar tribe having been almost invariably adopted; so that the present costume is altogether different from that which is figured by Sir Thomas Herbert, Chardin, Le Bruyn, Niebuhr, and other travellers of the 17th and 18th centuries. But with the exceptions of the foreign Turkish costume and its modifications, and with certain local exceptions, chiefly in mountainous regions, it may be said that there is one prevailing costume in all the countries of Asia between the Tigris and Mediterranean, and throughout Northern Africa, from the Nile to Morocco and the banks of the Senegal. This costume is essentially Arabian, and owes its extension to the wide conquests under the first caliphs; and it is through the Arabians — the least changed of ancient nations, and almost the only one which has remained as a nation from ancient times — that the antiquity of this costume may be proved. This is undoubtedly the most ancient costume of Western Asia; and while one set of proofs would carry it up to scriptural times, another set of strong probabilities and satisfactory analogies will take it back to the most remote periods of scriptural history, and will suggest that the dress of the Jews themselves was very similar, without being strictly identical.

We may here remark, (1.) That the usages of the Arabians in Syria and Palestine are more in agreement with those of Scripture than those of any other inhabitants of those countries. (2.) That their costume throws more light on the scriptural intimations than any other now existing, while it agrees more than any other with the materials supplied by antiquity and by tradition. (3.) That the dress which the Arabian garbs gradually superseded in Syria and Palestine was not the same as that of scriptural times, excepting, perhaps, among the peasantry, whose dress appears to have then differed little from that of the Arabian conquerors. The Jews had for above five centuries ceased to be inhabitants of Palestine; and it is certain that during the intermediate period the dress of the upper classes—the military and the townspeople—had become assimilated to that of the Greeks of the Eastern empire. Arabia had meanwhile been subjected to no such influences, and the dress which it brought into Syria may be regarded as a restoration of the more ancient costume, rather than (as it was in many countries) the introduction of one previously unknown.

It is to be observed, however, that there are two very different sorts of dresses among the Arabians. One is that of the Bedouin tribes, and the other that of the inhabitants of towns. The distinction between these is seldom clearly understood or correctly stated, but is of the utmost importance for the purpose of the present notice. Instead, therefore, of speaking of the Arabian costume as one thing, we must regard it as two things—the desert costume and the town costume. If, then, our views of Hebrew costume were based on the actual costume of the Arabians, we should be led to conclude that the desert costume represented that which was worn during the patriarchal period, and until the Israelites had been some time settled in Canaan; and the town costume that which was adopted from their neighbors when they became a settled people.

(*a*) The annexed cut represents, in fig. 2, a Bedouin,

Modern Arab Dress of the Desert Tribes.

or desert Arab, in the dress usually worn in Asia; and fig. 1 represents a townsman in a cloak of the same kind, adopted from the Arabs, and worn very extensively as an outermost covering in all the countries from the Oxus (for even the Persians use it) to the Mediterranean. The distinctive head-dress of the Bedouin, and which has not been adopted by any other nation, or even by the Arabian townsmen, is a kerchief (*keffeh*) folded triangularly, and thrown over the head so as to fall down over the neck and shoulders, and bound to the head by a band of twisted wool or camel's hair. The cloak is called an *abba*. It is made of wool and hair, and of various degrees of fineness. It is sometimes entirely black, or entirely white, but is more usually marked with broad stripes, the colors of which (never more than two, one of which is always white) are distinctive of the tribe by which it is worn. The cloak is altogether shapeless, being like a square sack, with an opening in front, and with slits at the sides to let out the arms. The Arab who wears it by day, sleeps in it by night, as does often the peasant by whom it has been adopted; and in all probability this was the garment similarly used by the ancient Hebrews, and which a benevolent law, delivered while Israel was still in the desert, forbade to be kept in pledge beyond the day, that the poor might not be without a covering at night (Exod. xxii, 27). This article of dress appears to have been little known to Biblical illustrators, although it is the principal and

most common outermost garment in Western Asia. This singular neglect has arisen from their information being chiefly derived from Shaw and others, who describe the costume of the Arab tribes or Moors of Northern Africa, where the outer garment is more generally the *bournoos* (fig. 3), a woollen cloak, not unlike the *abba*, but furnished with a hood, and which is sometimes strangely confounded, even by well-informed persons, with a totally different outer garment worn in the same regions, usually called the *hyke*, but which is also, according to its materials, quality, or color, distinguished by various other names; and writers have produced some confusion by not observing that these names refer to an article of raiment which under all these names is essentially the same. Regardless of these minute distinctions, this part of dress may be described as a large woollen blanket, either white or brown, and in summer a cotton sheet (usually blue or white, or both colors together). Putting one corner before over the left shoulder, the wearer brings it behind, and then under the right arm, and so over the body, throwing it behind over the left shoulder, and leaving the right arm free for action. This very picturesque mode of wearing the *hyke* is shown in fig. 2 of the accompanying cut. Another

Various Methods of Wearing the Modern Arab Mantle or *Hyke*.

mode of wearing it is shown in fig. 3. It is sometimes thrown over the head as a protection from the sun or wind (fig. 1), and calls to mind the various passages of Scripture in which persons are described as covering their heads with their mantles (2 Sam. xv, 30; 1 Kings xix, 13; Esther vi, 12). This article of dress, originally borrowed from the nomades, is known in Arabia, and extends westward to the shores of the Atlantic, being most extensively used by all classes of the population. The seat of this dress, and of the abba respectively, is indicated by the direction of their importation into Egypt. The *hykes* are imported from the west (i. e. from North Africa), and the *abbas* from Syria. The close resemblance of the above group of real costume to those in which the traditionary ecclesiastical and traditionary artistical costumes are displayed, must be obvious to the most cursory observer. It may also be noticed that the *hyke* is not without some resemblance, as to the manner in which it was worn, to the outer garment of one of the figures in the Egyptian family, supposed to represent the arrival of Joseph's brethren in Egypt (above).

(*b*) We now turn to the costumes which are seen in the towns and villages of south-western Asia.

In the Scriptures *drawers* are only mentioned in the injunction that the high-priest should wear them (Exod. xxviii, 42), which seems to show that they were not generally in use; nor have we any evidence that they ever became common. Drawers descending to the middle of the thighs were worn by the ancient Egyptians, and workmen often laid aside all the rest of their dress when occupied in their labors. As far as this part of dress was used at all by the Hebrews, it was doubtless either like this, or similar to those which are now worn in Western Asia by all, except some among the poorer peasantry, and by many of the Bedouin Arabs. They are of linen or cotton, of ample breadth, tied around the body by a running string, or band, and always worn next the skin, not over the shirt, as in Europe.

It will be asked, when the poor Israelite had pawned his outer garment "wherein he slept," what dress was left to him? The answer is probably supplied by the annexed engraving, which represents slightly

Modern Oriental Undergarment.

different garments of cotton, or woollen frocks or shirts, which often, in warm weather, form the sole dress of the Bedouin peasants, and the lower class of townspeople. To this the *abba* or *hyke* is the proper outer robe (as in fig. 1, second cut preceding), but is usually, in summer, dispensed with in the daytime, and in the ordinary pursuits and occupations of life. It is sometimes (as in the foregoing cut, fig. 2) worn without, but more usually with a girdle; and it will be seen that the shorter specimens are not unlike the dress of one of the figures (fig. 3) in the earliest of the Egyptian subjects which have been produced. The shirt worn by the superior classes is of the same shape, but of finer materials. This is shown in the accompanying figure, which represents a gentleman as just risen from bed. If we call this a shirt, the Hebrews doubtless had it — the sole dress (excepting the cloak) of the poor, and the inner robe of the rich. Such, probably, were the "sheets" (translated "shirts" in some versions), of which Samson despoiled thirty Philistines to pay the forfeit of his riddle (Judg. xiv, 13, 19). It is shown from the Talmud, indeed, that the Hebrews of later days had a shirt called חֲלוּק, *chaluk'*, which, it would appear, was often of wool (Lightfoot, *Hor. Heb.* on Luke ix, 3), and which is described as the ordinary inner garment, the outer being the cloak or mantle. This shows that the shirt or frock was, as in modern usage, the ordinary dress of the Jews, to which a mantle (*abba*, *hyke*, or *bournoos*) was the outer covering.

Modern Oriental Undress.

The Talmud enumerates eighteen several garments which formed the clothing of the Jews from head to foot (Talm. Hieros. *Sabb.* fol. 15; Talm. Bab. *Sabb.* fol. 120), mentioning, however, two sandals, two buskins, etc. This shows, at least, one thing, that they were not more sparingly clad than the modern Orient-

als. This being the case, we may be sure that although persons of the humbler classes were content with the shirt and the mantle, the wealthier people had other robes between these two, and forming a complete dress without the mantle, which with them was probably confined to out-of-door wear, or ceremonial use. It is, of course, impossible to discriminate these precisely, but in this matter we cannot be far wrong in trusting to the analogy of existing usages.

In all the annexed figures, representing persons of

Modern Oriental Outer Garment.

the superior class, we observe the shirt covered by a striped (sometimes figured) gown or *caftan* of mingled silk and cotton. It descends to the ankles, with long sleeves, extending a few inches beyond the fingers' ends, but divided from a point a little above the wrist, so that the hand is generally exposed, though it may be concealed by the sleeve when necessary; for it is customary to cover the hands in the presence of a person of high rank. It is very common, especially in winter, for persons to sleep without removing this gown, but only unloosing the girdle by which it is bound. It is not unusual within doors to see persons without any article of dress outside this; but it is considered decidedly as an undress, and no respectable person is beheld out of doors, or receives or pays visits, without an outer covering. Hence persons clad in this alone are said to be "naked" in Scripture—that is, not in the usual complete dress; for there can be no manner of doubt that this, or something like this, is the כְּתֹנֶת, *ketho'neth*, of Scripture (Exod. xxviii, 40; Job xxx, 18; Isa. xxii, 21, etc.). A similar robe is worn by the women, as was also the case among the Israelites (2 Sam. xiii, 18, 19; Cant. v, 3). It is in the bosom of this robe that various articles are carried. See Bosom.

The girdle worn over this, around the waist, is usually a colored shawl, or long piece of figured white muslin. The girdle of the poorer classes is of coarse stuff, and often of leather, with clasps. This leathern girdle is also much used by the Arabs, and by persons of condition when equipped for a journey. It is sometimes ornamented with workings in colored worsted, or silk, or with metal studs, shells, beads, etc. Both kinds of girdles were certainly in use among the Hebrews (2 Kings i, 8; Matt. iii, 4; Mark i, 6; comp. Jer. xiii, 1). See Girdle. It seems from 2 Sam. xx, 8 (comp. fig. 1 above), that it was usual to wear a knife or poniard in the girdle. This custom is still general, and denotes not any deadly disposition, but the want of clasp-knives. Men of literary vocations replace it by an ink-horn, as was also the case among the Israelites (Ezek. ix, 2).

Over the gown is worn either the short-sleeved *gibbeh* (fig. 3), which is a long coat of woollen cloth, or the long-sleeved *benish* (fig. 2), which is also of woollen cloth, and may be worn either over or instead of the other. The *benish* is, by reason of its long sleeves (with which the hands may be covered), the robe of ceremony, and is worn in the presence of superiors and persons of rank. Over one or both of these robes may be worn the *abba*, *bournoos*, or *hyke*, in any of the modes already indicated. Aged persons often wrap up the head and shoulders with the latter, in the manner shown in fig. 4.

This same *hyke* or wrapper is usually taken by persons going on a journey, for the purpose of being used in the same manner as a protection from the sun or wind. This is shown in the annexed cut, represent-

Modern Oriental Travelling Dress.

ing a group of persons equipped for travel. The robe is here more succinct and compact, and the firm manner in which the whole dress is girded up about the loins calls to mind the passages of Scripture in which the action of "girding up the loins" for a journey is mentioned.

From this it is also seen that travellers usually wear a sword, and the manner in which it is worn is correctly shown. It would also appear that the Jews had swords for such occasional uses (Matt. xxvi, 51; Luke xxii, 36).

The necessity of baring the arm for any kind of exertion must be evident from the manner in which it is encumbered in all the dresses we have produced. This action is often mentioned in Scripture, which alone proves that the arm was in ordinary circumstances similarly encumbered by the dress. For ordinary purposes a hasty tucking up of the sleeve of the right arm suffices; but for a continued action special contrivances are necessary. These are curious, as will be seen by the cut adjoining. The full sleeves of the

Girded Sleeves of Modern Orientals.

shirt are sometimes drawn up by means of cords, which pass round each shoulder, and cross behind, where they are tied in a knot. This custom is particularly affected by servants and workmen, who have constant

occasion for baring the arm; but others, whose occasions are more incidental, and who are, therefore, unprovided with the necessary cords, draw up the sleeves and tie them together behind between the shoulders (fig. 2).

For the dress of females, see the article WOMAN. Certain parts of dress, also, admit of separate consideration, such as the head-dress or turban (q. v.), and the dress of the feet or sandals (q. v.). See "*The Book of Costume*," ancient and modern, by a Lady, Lond. 1847; Prisse and St. John's *Oriental Album*, London, 1847; *Costumes of Turkey*, London, 1802; Lane, *Arabian Nights*, cuts; Perkins, *Residence in Persia*, plates; Ramboux, *Erinner. an d. Pilgerfahrt nach Jerusalem*, Cöln, 1854). Compare the article DRESS.

COSTUME, SACERDOTAL. See PRIEST.

COSTUME, CLERICAL. See VESTMENTS (OF THE CLERGY).

Cote (only in the plur. אַוְרוֹת, *averoth'*, by transposition for אֲרָוֹת, *racks* for fodder), properly *cribs;* hence *pens*, or enclosures for flocks (2 Chron. xxxii, 28, where, instead of "cotes for flocks," the original has "flocks for [the] cotes"). See SHEEP-COTE; DOVE-COTE.

Cotelerius (*Cotelier*), JEAN BAPTISTE, an eminent French scholar, born at Nismes, 1627. At twelve years of age he could read the Hebrew Bible and the Greek Testament with ease. In 1649 he was elected a member of the Sorbonne. He did not receive the degree of doctor, because he refused to take orders. In 1676 he was made Greek lecturer at Paris, and retained this post, with great reputation, till his death, August 12, 1686. Most of his literary labor was spent upon the Greek fathers; and in 1672 he published the "Apostolic Fathers" (*Patres Aevi Apostolici*, Paris), of which the best edition is *Patrum qui temporibus Apostolicis floruerunt opera*, recensuit J. Clericus (Amst. 1724, 2 vols. fol.). In 1667 he was commissioned by Colbert to revise and catalogue the Greek manuscripts of the Royal Library. He was engaged in this work, conjointly with the celebrated Du Cange, for five years. In 1676 he obtained through Colbert the chair of Greek at the Royal College of Paris. In 1677 he began the publication of his *Ecclesiæ Græcæ Monumenta, e MSS. codicibus*, Gr. and Lat. (3 vols. 4to; the 3d vol. appeared two days before his death). The fourth volume of this work, for which he had collected much material, was published in 1692 by the Maurines.—See Wetzer u. Welte, *Kirchen-Lex.* ii, 905; Dupin, *Nouvelle Bibliothèque*, xviii, 186.

Cottage is employed in our version for three Hebrew words. See BOOTH.

Modern Oriental Booths or Sheds.

1. סֻכָּה, *sukkah'*, signifies a *hut* made of boughs (Isa. i, 8), and is usually elsewhere translated "*booth.*" It was anciently the custom in the East, as it still is, to erect little temporary sheds, covered with leaves, straw, or turf, giving shelter from the heat by day and the cold dews at night to the watchman that kept the garden or vineyard while the fruit was ripening, which otherwise might be stolen, or destroyed by jackals. These erections, being intended only for the occasion, were of the very slightest fabric, and when the fruits were gathered were either taken down, or left to fall to pieces, or were blown down during the winter (Job xxvii, 18). See LODGE.

Modern Oriental Lodge in a Melon-patch.

2. מְלוּנָה, *melunah'* (fem. of מָלוֹן, *an inn*), signifies properly a *lodging-place*, and is associated with the booth ("cottage") in the above passage (Isa. i, 8), where it is translated "*lodge*," being probably a somewhat slighter structure, if possible, as a cucumber patch is more temporary than a vineyard. It also occurs in Isa. xxiv, 20, in the mistranslated expression "and shall be removed [i. e. shaken about] like a *cottage*," where it denotes a hanging-bed or *hammock* suspended from trees, in which travellers, and especially the watchmen in gardens, were accustomed to sleep during summer, so as to be out of the reach of wild animals. The swinging of these aptly corresponds with the staggering of a drunken man. Or it may, perhaps, more appropriately denote here those frail structures of boughs, supported by a few poles, which the Orientals use for the same purpose.

Summer Sleeping-place among the Kurdish Hills.

3. In Zeph. ii, 6, the original term is כָּרֹת, *keroth'* (literally *diggings*), i. e. *pits* for holding water, and, instead of "dwellings [and] cottages for shepherds," it should be rendered "fields full of shepherds' cisterns,"

for watering their flocks; that is, the sites of the cities of Philistia should be occupied for pastoral purposes. This word does not occur elsewhere.

Cotton (from the Arab. name *kutun*), the well-known wool-like substance which envelops the seeds, and is contained within the roundish-pointed capsule or fruit of the cotton-shrub. Every one also knows that cotton has, from the earliest ages, been characteristic of India. Indeed, it has been well remarked that, as from early times sheep's wool has been principally employed for clothing in Palestine and Syria, in Asia Minor, Greece, Italy, and Spain, hemp in the northern countries of Europe, and flax in Egypt, so cotton has always been employed for the same purpose in India, and silk in China. In the present day, cotton, by the aid of machinery, has been manufactured in this country on so extensive a scale, and sold at so cheap a rate, as to drive the manufactures of India almost entirely out of the market. But still, until a very recent period, the calicoes and chintzes of India formed very extensive articles of commerce from that country to Europe. For the investigation of the early history of cotton, we are chiefly indebted to the earliest notices of this commerce; before adducing these, however, we may briefly notice the particular plants and countries from which cotton is obtained. India possesses two very distinct species: 1. *Gossypium herbaceum* of botanists, of which there are several varieties, some of which have spread north, and also into the south of Europe, and into Africa. 2. *Gossypium arboreum*, or cotton-tree, which is little cultivated on account of its small produce, but which yields a fine kind of cotton. This must not be confounded, as it often is, with the silk-cotton tree, or *Bombyx heptaphyllum*, which does not yield a cotton fit for spinning. Cotton from these kinds is now chiefly cultivated in Central India, from whence it is carried to and exported from Broach. It is also largely cultivated in the districts of the Bombay Presidency, as also in that of Madras, but less in Bengal, except for home manufacture, which of course requires a large supply, where so large a population are all clothed in cotton. American cotton is obtained from two entirely distinct species—*Gossypium Barbadense*, of which different varieties yield the Sea Island, Upland, Georgian, and the New Orleans cottons; while *G. Peruvianum* yields the Brazil, Pernambuco, and other South American cottons. These species are original natives of America. The *Gossypium herbaceum*, a figure of which is annexed, is probably

Cotton-plant.

the species known to the ancients. (See *Penny Cyclopædia*, s. v. Gossypium.)

This substance is no doubt denoted by the term כַּרְפַּס, *karpas'* (whence Gr. κάρπασος, Lat. *carbasus*, from Sanscr. *karpas*), of Esth. i, 6, which the A. V. renders "green" (Sept. καρπάσινος, Vulg. *carbasinus*). There is considerable doubt, however, whether under שֵׁשׁ, *shesh*, in the earlier, and בּוּץ, *buts*, in the later books of the O. T. rendered in the A. V. "white linen," "fine linen," etc., cotton may not have been included as well. Both these latter terms are said by Gesenius to be from roots signifying originally mere whiteness; a sense said also to inhere in the word בַּד, *bad*, used sometimes instead of, and sometimes together with *shesh* to mean the fabric. In Ezek. xxvii, 7, 16, *shesh* is mentioned as imported into Tyre from Egypt, and *buts* as from Syria. Each is found in turn coupled with אַרְגָּמָן (*argamon'*), in the sense of "purple and fine linen," i. e. the most showy and costly apparel (comp. Prov. xxi, 22, with Esth. viii, 15). The dress of the Egyptian priests, at any rate in their ministrations, was without doubt of linen (Herod. ii, 37), in spite of Pliny's assertion (xix, 1, 2) that they preferred cotton. Yet cotton garments for the worship of the temples is said to be mentioned on the Rosetta stone (Wilkinson, *Anc. Eg.* iii, 117). The same was the case with the Jewish ephod and other priestly attire, in which we cannot suppose any carelessness to have prevailed. If, however, a Jew happened to have a piece of cotton cloth, he probably would not be deterred by any scruple about the *heterogenea* of Deut. xxii, 11, from wearing that and linen together. There is, however, no word for the cotton *plant* (like פִּשְׁתָּה for flax) in the Hebrew, nor any reason to suppose that there was any early knowledge of the fabric in Palestine. See LINEN.

The Egyptian mummy swathings also, many of which are said to remain as good as when fresh from the loom, are decided, after much controversy and minute analysis, to have been of linen, and not cotton (*Egypt. Antiq.* in the *Lib. of Entertaining Knowl.* ii, 182). The very difficulty of deciding, however, shows how easily even scientific observers may mistake, and, much more, how impossible it would have been for ancient popular writers to avoid confusion. Even Greek naturalists sometimes clearly include "cotton" under λίνον. The same appears to be true of ὀθόνη, ὀθόνιον, and the whole class of words signifying white textile vegetable fabrics. From the proper Oriental name for the article *karpas*, with which either their Alexandrian or Parthian intercourse might familiarize them, the Latins borrowed *carbasus*, completely current in poetical use in the golden and silver period of Latinity, for sails, awnings, etc. Varro knew of tree-wool on the authority of Ctesias contemporary with Herodotus. The Greeks, through the commercial consequences of Alexander's conquests, must have known of cotton cloth, and more or less of the plant. Amasis indeed (about B.C. 540) sent as a present from Egypt a corslet ornamented with gold and "tree-wool" (ἐρίοισι ἀπὸ ξύλου, Herod. iii, 47), which Pliny says was still existing in his time in a temple in Rhodes, and that the minuteness of its fibre had provoked the experiments of the curious. Cotton was manufactured and worn extensively in Egypt, but extant monuments give no proof of its growth, as in the case of flax, in that country (Wilkinson, *ut sup.* p. 116-139, and plate No. 356); indeed, had it been a general product, we could scarcely have missed finding some trace of it in the monumental details of ancient Egyptian arts, trades, etc.; but especially when Pliny (A.D. 115) asserts that cotton was then grown in Egypt, a statement confirmed by Julius Pollux (a century later), we can hardly resist the inference that, at least as a curiosity and as an experiment, some plantations existed there. This is

the more likely, since we find the cotton-*tree* (*Gossypium arboreum*, less usual than, and distinct from, the cotton *plant*, *Gossyp. herbac.*) mentioned still by Pliny as the *only remarkable* tree of the adjacent Ethiopia; and since Arabia, on its other side, appears to have known cotton from time immemorial, to grow it in abundance, and in parts to be highly favorable to that product. In India, however, we have the earliest records of the use of cotton for dress, of which, including the starching of it, some curious traces are found as early as 800 B.C., in the *Institutes of Menu;* also (it is said, on the authority of Prof. Wilson) in the *Rig-Veda*, 105, v. 8. (For these and some other curious antiquities of the subject, see Royle's *Culture and Commerce of Cotton in India*, p. 117–122.)

Cotton is *now* both grown and manufactured in various parts of Syria and Palestine, and, owing probably to its being less conductive of heat, seems preferred for turbans and shirts to linen; but there is no proof that, till they came in contact with Persia, the Hebrews generally knew of it as a distinct fabric from linen, whilst the negative proof of language and the probabilities of fact offer a strong presumption that, if they obtained it at all in commerce, they confounded it with linen under the terms *shesh* or *buts*. The greater cleanliness and durability of linen probably established its superiority over cotton for sepulchral purposes in the N.-T. period, by which time the latter must have been commonly known, and thus there is no reason for assigning cotton as the material of the "linen clothes" (*ὀθόνια*) of which we read. (For the whole subject, see Yates's *Textrinum Antiquorum*, pt. i, chap. vi, and app. D.) See Botany.

Cotton, George Edward Lynch, Anglican bishop of Calcutta and metropolitan of the Anglican dioceses of India and Ceylon, was born at Chester, England, Oct. 29, 1832. After studying at Westminster School and Trinity College, he was appointed to a mastership in Rugby School, and shortly after was elected to a fellowship at Trinity College. About 1841 he succeeded to the mastership of the fifth form, the highest but one. In 1852 he was elected head master of Marlborough College, which under his management rose to a high position among leading public schools. In 1858 he was appointed to the metropolitan see of Calcutta, where he rendered himself generally beloved. In 1863, with the full concurrence of the governor general, he officially sanctioned an innovation in the use of consecrated churches, which had often been desired, but never till then secured. Since the mutiny, several Scotch regiments have been stationed in the barracks of Upper India, and in many stations they have no churches of their own. Bishop Cotton ordered that at a convenient hour on the Sunday the Episcopal churches should be available for their worship, and that the Presbyterian clergyman should have full liberty to officiate after the rules of his own Church, to the great dissatisfaction of the High-Church party in the Church of England. In England strong measures were suggested in order to compel him to retract. But he knew that the measure was right in itself, that the law was on his side, and that his conduct was heartily approved by the Indian government and by all right-thinking men. In the same spirit, when the Marriage Bill was brought before the Legislative Council, to provide increased facilities for the marriage of Presbyterians and Nonconformists, and give to Nonconformist ministers and registrars powers which they do not possess in England itself, he gave the act his cordial approval. He was accidentally drowned while disembarking from a steamer, October 6, 1866.—*Ann. Amer. Cyclopædia for* 1866, p. 261; *Brit. Quart. Review*, Jan. 1867.

Cotton, John, an eminent Congregational minister, was born at Derby, Eng., Dec. 4, 1585. He was a student in Cambridge, became fellow of Emmanuel College, and was chosen successively head lecturer and dean. In 1612 he was settled as minister at Boston, Lincolnshire. After preaching some few years, he was silenced for nonconformity with some ceremonies which he held to be unscriptural, but after a short time he was reinstated. About 1632, to escape examination before the High Commission Court, he secreted himself in London, and thence sailed for New England, arriving in Boston Sept. 3, 1633. On Oct. 10 he was appointed preacher in the First Church. He died Dec. 23, 1652. He published *An Abstract of the Laws of New England* (1641):—*The Church's Resurrection* (1642):—*The Pouring out of the Seven Vials* (1642):—*The Way of Life* (Lond. 1641, 4to):—*Sermons on Mercy and Justice of God* (Lond. 1641, 4to):—*Exposition of the Canticles* (Lond. 1642, 8vo):—*The Covenant of Grace* (Lond. 1662, sm. 8vo):—*A practical Commentary upon the 1st Epistle of John* (Lond. 1656, fol.), with several minor writings.—Sprague, *Annals*, i, 25.

Cotton MSS. See Purpureus, Codex.

Couch (יָצוּעַ, *yatsu'ă*, something *spread*, Gen. xlix, 4; "bed," 1 Chron. v, 1; Job xvii, 13; Psa. lxiii, 6; cxxxii, 3; מִשְׁכָּב, *mishkab'*, something to *lie* upon, Job vii, 13, elsewhere "bed;" עֶרֶשׂ, *e'res*, something *erected*, Psa. vi, 6; Amos iii, 12; vi, 4; "bed," Job vii, 13; Psa. xli, 3; cxxxii, 3; Prov. vii, 16; Cant. i, 16; "bedstead," Deut. iii, 11; *κλινίδιον*, a *little bed*, Luke v, 19, 24; *κράββατος*, a *pallet*, Acts v, 15, elsewhere "bed"). Feather-beds, as among us, are unknown in the East, as indeed generally in southern climates. The poor sleep on mats or wrapped in their overclothes (Exod. xxii, 27; Deut. xxiv, 13; comp. Theocr. xviii, 19; Stobæi *Serm.* 72, p. 404: as to Ruth iii, 9; Ezek. xvi, 8, see Biel in the *Miscell. Lips. Nov.* v, 209 sq.), and, in the open air, sometimes have only a stone for a pillow (Arvieux, iii, 216; comp. Gen. ix, 21, 23; xxviii, 11). The wealthy use bolsters or mattresses (Russel, *Aleppo*, i, 195), stuffed with wool or cotton. These are not laid upon a bedstead, but on a raised portion (*divan*, q. v.) along the side of the room, which by day serves for a seat (Harmar, i, 134; ii, 71; Rosenmüller, *Morgenl.* iii, 211; vi, 14; Lorent, *Wander.* p. 32). Whether the couches of the ancient Hebrews for the sick or sleeping, which are usually termed מִטָּה, *mittah'* (Gen. xlvii, 31; 1 Sam. xix, 13; 2 Sam. iv, 7; 2 Kings i, 4), מִשְׁכָּב, *mishkab'* (Exod. xxi, 18; 2 Sam. xiii, 5; Cant. iii, 1), עֶרֶשׂ, *e'res* (Job vii, 13; Cant. i, 16; Prov. vii, 11; properly a *bedstead*, see Deut. iii, 11), were upon such a platform, is uncertain, as they appear to have been movable (1 Sam. xix, 15), and were probably used in the daytime, like sofas, for sitting down and repose (1 Sam. xxviii, 23; Ezek. xxiii, 41; Amos iii, 12; vi, 4; yet compare 2 Kings iv, 10). Costly carpets graced the houses of

Oriental Garden Bedstead.

the rich (Prov. vii, 16 sq.; Ezek. xxiii, 41; Amos iii, 12); those who lay upon them covered themselves with similar tapestry, and placed a soft fur under their head (1 Sam. xix, 13). A canopy, or bed with a tester, is names in the Apocrypha (Judith xvi, 23), and elsewhere a hanging bed or hammock (מִלּוּנָה, Isa. xxiv, 20), such as watchers in gardens used (Gesenius, *Thes. Heb.* p. 750; comp. Niebuhr, *Beschr.* p. 158). In the Mishna various kinds of beds or couches are referred to; e. g. the דַּרְגָּשׁ, *dargash'* (*Nedar.* vii, 5). The couches (κλίνη, κράββατος) for the sick, named in the N. T. (Matt. ix, 6; Mark ii, 4; vi, 55; Luke v, 18; Acts v, 5, etc.) were movable (Becker, *Charicl.* ii, 72). See BED.

Coulon. See CULON.

Coulter occurs in 1 Sam. xiii, 20, 21, as the translation of אֵת (*eth*), an agricultural instrument, rendered elsewhere "*plough-share*" (Isa. ii, 4; Mic. iv, 3; Joel iii, 10), for which, however, a different word stands in the passage in 1 Sam. The Sept. renders it by the general term σκεῦος, *implement*, in 1 Sam., but *plough-share* in the other passages. The Rabbins understand it to be a *mattock*. It was probably the facing-point or shoe of a plough, analogous to our coulter, as it was of iron, with an edge that required sharpening, and was easily transformed into a sword. Such an appendage to the plough, however, is not now in use in the East [see AGRICULTURE], but would be greatly needed in improved cultivation, considering the frail structure of the plough itself, the point being usually only of wood (see Wilkinson's *Ancient Egyptians*, ii, 14, 17). See PLOUGH.

Council is the rendering given by our translators chiefly to two Greek words.

1. Συμβούλιον (a *meeting of counsellors*) signifies a *consultation* of persons for executing any enterprise (Matt. xii, 14), a sense elsewhere covered by the usual translation "counsel;" also a *council*, or assembly of persons duly convened. In Acts xxv, 12, it is spoken of *counsellors*, i. e. persons who sat in public trials with the governor of a province; called also *conciliarii* (Suetonius, *Tib.* 33) or *assessores* (Lamprid. *Vit. Alex. Sev.* 46), in the regular proconsular "conventus." This last was a stated meeting of the Roman citizens of a province in the chief town, for the purpose of trying causes, from among whom the proconsul selected a number to try the cases in dispute, himself presiding over their action. From the instance in question, something analogous appears to have obtained under the procuratorship of Judæa (see Smith's *Dict. of Class. Ant.* s. v. Conventus). See ASIARCH; PROCURATOR.

2. Συνέδριον (a *sitting together*) signifies a formal assembly or *senate*, and in the N. T. is spoken only of Jewish "*councils*," by which word it is invariably rendered in the common version. These were: (1.) The SANHEDRIM (q. v.), or supreme council of the nation. (2.) In the plural, the smaller *tribunals* in the cities of Palestine subordinate to the Sanhedrim (Matt. x, 17; Mark xiii, 9). See TRIAL. The distinction between these two grades of courts seems clearly alluded to in Matt. v, 22. See JUDGMENT. According to the Rabbins, these lower courts consisted of twenty-three judges, and the two in Jerusalem were held in the rooms over the Shushan and the Beautiful gates; but Josephus expressly says that the number of judges was seven (*Ant.* iv, 8, 14, 38; *War*, ii, 20, 5); and there are notices in the Talmud of arbitration courts of three judges (Jahn's *Archæol.* § 245). Perhaps the former two of these were but different forms of the same court in different places. See COURT, JUDICIAL. They appear to have been originally instituted by Moses (Deut. xvi, 18; 2 Chron. xix, 5), and to have had jurisdiction even over capital offences; although, under the civil supremacy of the Romans, their powers were doubtless much restricted. See PUNISHMENTS. In the times of Christ and his apostles the functions of this court were probably confined chiefly to the penalty of excommunication [see ANATHEMA] (John xvi, 2), although there are not wanting intimations of their inflicting corporal chastisement (2 Cor. xi, 24). See TRIBUNAL.

3. In the Old Testament "council" occurs in Psa. lxviii, 27, as the rendering of רִגְמָה, *rigmah'* (literally a *heap*), a *throng* or company of persons. See COUNSEL.

4. In the Apocrypha, "council," in its ordinary sense, is the rendering of βουλή (1 Esth. ii, 17; 1 Macc. xiv, 22), σύμβουλοι (1 Esth. viii, 55), and βουλεύομαι (2 Macc. ix, 58). See COUNSELLOR.

COUNCIL, APOSTOLICAL, *at Jerusalem* (Acts xv, 6 sq.). See APOSTOLICAL COUNCIL. Many writers, Protestants as well as Romanists, have regarded the assembly of the apostles and elders of Jerusalem, of which we read in Acts xv, as the first ecclesiastical council, and the model on which others were formed, in accordance, as they suppose, with a divine command or apostolic institution. But this view of the matter is unsupported by the testimony of antiquity, and is at variance with the opinions of the earliest writers who refer to the councils of the Church. Tertullian speaks of the ecclesiastical assemblies of the Asiatic and European Greeks as a human institution; and in a letter written by Firmilian, bishop of Cæsarea, to Cyprian, about the middle of the third century, the same custom is referred to merely as a convenient arrangement existing at that time among the churches of Asia Minor for common deliberation on matters of extraordinary importance. Besides this, it will be found, upon examination, that the councils of the Church were assemblages of altogether a different nature from that of the apostles and elders; the only point in which the alleged model was really imitated being, perhaps, the form of preface to the decree, "It hath seemed good to the Holy Ghost and to us" (see the *Studien u. Kritiken*, 1842, i, 102 sq.). See DECREE (OF APOSTLES).

COUNCILS (Lat. *concilium*), assemblies of pastors or bishops for the discussion and regulation of ecclesiastical affairs.

1. The beginning of the system of church councils is traced to the gathering together of the apostles and elders narrated in Acts xv. This is generally considered to be the first council (see above); but it differed from all others in this circumstance, that it was under the special inspiration of the Holy Spirit. Roman Catholic writers speak of four Apostolical Councils, viz., Acts i, 13, for the election of an apostle; Acts vi, to choose deacons; Acts xv, the one above named; Acts xxi, 18 sq. But none of these had a public and general character except that in Acts xv (Schaff, *Hist. of Christian Church*, ii, § 65). Although the Gospel was soon after propagated in many parts of Europe, Asia, and Africa, there does not appear to have been any public meeting of Christians held for the purpose of discussing any contested point until the middle of the second century. From that time councils became frequent; but as they consisted only of those who belonged to particular districts or countries, they are usually termed *diocesan*, *provincial*, *patriarchal*, or *national* councils, in contradistinction to *œcumenical* or *general* councils, i. e. supposed to comprise delegates or commissioners from all the churches in the Christian world, and consequently supposed to represent the Church universal.

2. *Œcumenical Councils.*—The name σύνοδος οἰκουμενική (*concilium universale* or *generale*) occurs first in the 6th canon of Constantinople, A.D. 381 (Schaff, l. c.). No such assembly was held, or could be held, before the establishment of the Christian religion over the ruins of paganism in the Roman Empire. Their title to represent the whole Christian world is not

valid. After the 4th century the lower clergy and the laity were entirely excluded from the councils, and bishops only admitted. The number of bishops gathered at the greatest of the councils constituted but a small portion of the entire episcopate of the world. The œcumenical councils which are generally admitted to bear that title most justly were rather Greek than general councils. In the strict and proper sense of the term, therefore, no œcumenical council has ever been held.

There are seven councils admitted by both the Greek and Latin churches as œcumenical. The Roman Catholics add twelve to the number, making nineteen, named in the following list. For details as to the doings of the councils, see the separate articles under each title in this Cyclopædia.

1. The synod of apostles in Jerusalem (Acts xv). 2. The first Council of Nice, held 325 A.D., to assert the Catholic doctrine respecting the Son of God in opposition to the opinions of Arius. 3. The first Council of Constantinople, convoked under the emperor Theodosius the Great (381 A.D.), to determine the Catholic doctrine regarding the Holy Ghost. 4. The first Council of Ephesus, convened under Theodosius the Younger (431 A.D.), to condemn the Nestorian heresy. 5. The Council of Chalcedon, under the Emperor Marcian (451 A.D.), which asserted the doctrine of the union of the divine with the human nature in Christ, and condemned the heresies of Eutyches and the Monophysites. 6. The second Council of Constantinople, under Justinian (553 A.D.), which condemned the doctrines of Origen, Arius, Macedonius, and others. 7. The third Council of Constantinople, convoked under the emperor Constantine V, Pogonatus (681 A.D.), for the condemnation of the Monothelite heresy. 8. The second Council of Nice, held in the reign of the empress Irene and her son Constantine (787 A.D.), to establish the worship of images. Against this council Charlemagne convened a counter synod at Frankfort (794 A.D.). 9. The fourth Council of Constantinople, under Basilius and Adrian (869 A.D.), the principal business of which was the deposition of Photius, who had intruded himself into the see of Constantinople, and the restoration of Ignatius, who had been its former occupant. 10. The first Lateran Council held in Rome under the emperor Henry V, and convoked by the pope Calixtus II (1123 A.D.), to settle the dispute on investiture (q. v.). 11. The second Lateran Council, under the emperor Conrad III and pope Innocent II (1139 A.D.), condemned the errors of Arnold of Brescia and others. 12. The third Lateran Council, convened by pope Alexander III (1179 A.D.), in the reign of Frederick I of Germany, condemned the "errors and impieties" of the Waldenses and Albigenses. 13. The fourth Lateran Council, held under Innocent III (1215 A.D.), among other matters asserted and confirmed the dogma of transubstantiation and necessity for the reformation of abuses and the extirpation of heresy. 14. The first œcumenical synod of Lyon, held during the pontificate of Innocent IV (1245 A.D.), had for its object the promotion of the Crusades, the restoration of ecclesiastical discipline, etc. 15. The second œcumenical synod of Lyon was held during the pontificate of Gregory X (1274 A.D.); its principal object was the reunion of the Greek and Latin churches. 16. The Synod of Vienne in Gaul, under Clemens V (1311 A.D.), was convoked to suppress the Knights Templars, etc. 17. The Council of Constance was convoked at the request of the emperor Sigismund, 1414 A.D., and sat for four years. It asserted the authority of an œcumenical council over the pope, and condemned the doctrines of John Huss and Jerome of Prague. 18. The Council of Basel was convoked by pope Martin V, 1430 A.D. It sat for nearly ten years, and purposed to introduce a reformation in the discipline, and even the constitution of the Roman Catholic Church. All acts passed in this council, after it had been formally dissolved by the pope, are regarded by the Roman Catholic Church as null and void. 19. The celebrated Council of Trent, held 1545–1563 A.D. It was opened by Paul III, and brought to a close under the pontificate of Paul IV.

The Church of England (*Homily against the Peril of Idolatry*, pt. ii) speaks of "those six councils which were allowed and received of all men," viz., Nice, A.D. 325; Constantinople, A.D. 381; Ephesus, A.D. 431; Chalcedon, A.D. 451; Constantinople, A.D. 553; Constantinople, A.D. 680 (see *Amer. Quart. Church Review*, Oct. 1867, art. iv). The *Articles of Religion* (art. xxi) declare that "general councils may not be gathered together without the commandment and will of princes. And when they be gathered together (forasmuch as they be an assembly of men, whereof all be not governed with the Spirit and Word of God) they may err, and sometimes have erred, even in things pertaining unto God; wherefore things ordained by them as necessary to salvation have neither strength nor authority unless it may be declared that they be taken out of Holy Scripture."

The importance of the so-called œcumenical councils has been often greatly over-estimated, not only by the Greeks and Roman Catholics, but also by many Protestants. Jortin remarks, with his usual sharpness, that "they were a collection of men who were frail and fallible. Some of these councils were not assemblies of pious and learned divines, but cabals, the majority of which were quarrelsome, fanatical, domineering, dishonest prelates, who wanted to compel men to approve all their opinions, of which they themselves had no clear conceptions, and to anathematize and oppress those who would not implicitly submit to their determinations" (*Works*, vol. iii, charge 2).

The value of the decisions of the councils depends, not upon their authority, as drawn together at the call of emperor or pope, not upon the number of the bishops who attended them, but upon the truth of their decisions, and their conformity to the Word of God. The Councils of Nice and Chalcedon rendered great service to the Church and to theology; but their Christological statements of doctrine have been received by the general Church down to the latest times, not *because* they emanated from the councils, but because they satisfy the intellectual and moral needs of the Church, and are held to be true statements, though in more scientific form, of doctrines explicitly or implicitly contained in the Word of God. As to the earlier councils, it "must be remembered that the bishops of that day were elected by the popular voice. So far as that went, they truly represented the Christian people, and were but seldom called to account by the people for their acts. Eusebius felt bound to justify his vote at Nice before his diocese in Cæsarea. Furthermore, the councils, in an age of ecclesiastical despotism, sanctioned the principle of common public deliberation as the best means of arriving at truth and settling controversy. They revived the spectacle of the Roman senate in ecclesiastical form, and were the forerunners of representative government and parliamentary legislation" (Schaff, *History*, ii, § 65; also in *New-Englander*, Oct. 1863, art. iv, and in *Jahrb. für deutsche Theologie*, 1863, ii).

The Romanists hold that the pope alone can convene and conduct œcumenical councils, which are supposed, on their theory, to represent the universal Church under the guidance of the Holy Ghost. In matters of faith, councils profess to be guided by the holy Scriptures and the traditions of the Church, while in lighter matters human reason and expediency are consulted. In matters of faith œcumenical councils are held to be infallible, and hence it is maintained that all such synods have agreed together; but in matters of discipline, etc., the authority of the latest council prevails. The Roman claim is not sustained by history. The emperors called the first seven councils,

and either presided over them in person or by commissioners; and the final ratification of the decisions was also left to the emperor. But the Greek Church agrees with the Latin in ascribing absolute *authority* to the decisions of truly œcumenical councils. Gregory of Nazianzus (who was president for a time of the second œcumenical council) speaks strongly of the evils to which such assemblies are liable: "I am inclined to avoid conventions of bishops; I never knew one that did not come to a bad end, and create more disorders than it attempted to rectify." A remarkable view of the authority of councils was that of Nicolas of Clamengis (q. v.), viz. that they, in his opinion, could claim regard for their resolutions only if the members were really believers, and if they were more concerned for the salvation of souls than for secular interests. His views on general councils were fully set forth in a little work entitled *Disputatio de concilio generali*, which consists of three letters, addressed, in 1415 or 1416, to a professor at the Paris University (printed apparently at Vienna in 1482). He not only places the authority of general councils over the authority of the popes, but the authority of the Bible over the authority of the councils. He doubts whether at all the former œcumenical councils the Holy Spirit really presided, as the Holy Spirit would not assist men pursuing secular aims. He denies that a council composed of such men represents the Church, and asserts that God alone knows who are his people and where the Holy Ghost dwells, and that there may be times when the Church can only be found in one single woman (*in sola potest muliercula per gratiam manere ecclesiam*). After the lapse of over 300 years, the pope in 1867 signified his purpose to summon another œcumenical council. Of course none but Romanist bishops will attend it.

3. *Provincial* councils have been too numerous to be mentioned here in detail. The most important of them are mentioned under the names of the places at which they have been held (e. g. Aix-la-Chapelle, Compiegne). Lists are given in most of the books on Christian antiquities, and in Landon, *Man. of Councils*.

4. The most important collections of the acts of the councils are Binius, *Concilia Generalia* (Cologne, 1606, 4 vols. fol.; 1618, 4 vols. fol; Paris, 1638, 9 vols. fol.); the same, edited by Labbé and Cossart (Paris, 1671 sq., 17 vols., with supplement by Baluze, 1638, 1 vol. fol.); Hardouin, *Collectio Maxima Conciliorum*, etc. (Paris, 1715 sq., 12 vols. fol.); Coleti (Venice, 1728, 23 vols. 4to, with supplement by Mansi, 1748–52, 6 vols. going down to the year 1727); Mansi, *Sacr. Concil. nova et ampliss. Collectio* (Florence, 1759–98, 31 vols. fol.). The abbé Migne proposes a complete collection, in 80 vols. There are special collections of the acts of national and provincial councils; e. g. for France, Sirmond (Paris, 1629), La Lande (Paris, 1666); for Spain, Aguirre (Madrid, 1781); for Germany, Binterim (Mainz, 1335–43, 7 vols.). Of manuals, histories of councils, etc., the following are the most important: Walch, *Kirchenversammlungen* (Leips. 1759); Grier, *Epitome of General Councils* (Dublin, 1828, 8vo); Landon, *Manual of Councils* (Lond. 1846, 12mo); Beveridge, *Synodicon, sive Pandectæ Canonum S. S. Apostolorum et Conciliorum* (Oxon. 1672–82, 2 vols. fol.); Hefele, *Conciliengeschichte* (Freiburg, 1855 sq., 6 vols. 8vo—yet unfinished). See also Gibbon, *Decline and Fall*, chap. xx; Lardner, *Works*, iv, 63; Elliott, *Delineation of Romanism*, bk. iii, ch. iii; Ferraris, *Promta Bibliotheca*, s. v. Concilium; Schaff, *History of the Christian Church*, vol. ii, § 65; James, *Corruptions of Scripture, Fathers, and Councils, by the Church of Rome* (Lond. 1688, 8vo); Comber, *Roman Forgeries in the Councils*, etc. (Lond. 1689, 4to); Browne, *On the Thirty-nine Articles*, Art. XXI; Palmer, *On the Church*, ii, 144; Cramp, *Textbook of Popery*, p. 474; Siegel, *Alterthümer*, iv, 406.

COUNCILS, Ecclesiastical. See Congregationalists.

Counsel (prop. עֵצָה, *etsah'*, *βουλή*). Beside the common signification of this word, as denoting the consultations of men, it is used in Scripture for the decrees of God, the orders of his providence. God frustrates the counsels, the views, the designs of princes; but "the counsels of the Lord stand for ever" (Psa. xxxiii, 11; cvii, 11; Luke vii, 30). See Decree (*of God*).

COUNSELS, Evangelical. See Consilia Evangelica.

Counsellor (usually יוֹעֵץ, *yoëts'*, *σύμβουλος*), an adviser upon any matter (Prov. xi, 14; xv, 22; 2 Chron. xxv, 16; Ezra iv, 5, etc.; Rom. xi, 34), especially the king's state counsellor (2 Sam. xv, 12; Ezra vii, 28; 1 Chron. xxvii, 33, etc.); hence one of the chief men of a government (Job iii, 14; xii, 17; Isa. i, 26; iii, 3, etc.), and once of the Messiah (Isa. ix, 5; Sept. *σύμβουλος*, Vulg. *consiliarius*). The Chaldee equivalent term is יָעַט (*yaët'*, Ezra vii, 14, 15). Other Chaldee terms thus rendered are חַדְבְּרִין (*haddaberin'*), ministers of state or *viziers* (Dan. iii, 24, 27; iv, 36; vi, 7), and דְּתָבַר (*dethabar'*, one skilled in law), a *judge* (Dan. iii, 2, 3). In the Apocrypha, *σύμβουλος*, in the ordinary sense of *adviser*, is thus rendered (Wisd. viii, 9; Ecclus. vi, 6; xxxvii, 7, 8; xlii, 21); also *συμβουλευτής* (1 Esdr. viii, 11). In Mark xv, 43; Luke xxiii, 50, the Greek term *βουλευτής*, which is thus translated, probably designates a member of the Jewish Sanhedrim (q. v.) See Council.

Country. Heaven is called a *country* in the Bible, in allusion to Canaan. And it is a *better country*, as its inhabitants, privileges, and employments are far more excellent than any on earth (Heb. xi, 14, 16). It is a *far* country, very distant from and unknown in our world (Matt. xxi, 37, and xxv, 14; Luke xix, 12). A state of apostasy from God, whether of men in general or of the Gentile world, is called a *far country*; it is distant from that in which we ought to be; in it we are ignorant of God, exposed to danger, and have none to pity or help us (Luke xv, 13). A state or place of gross ignorance and wickedness is called the region and shadow of death (Matt. iv, 16).

Coupling, חֹבֶרֶת, *chobe'reth*, a *junction*, of curtains (Exod. xxvi, 4, 10; xxxvi, 17), i. q. מַחְבֶּרֶת, *machbe'reth* (Exod. xxvi, 4, 5, etc.); but מַחֲבָרוֹת, *mechaberoth'*, means wooden *bracers* (? girders) for fastening a building (2 Chron. xxxiv, 11), or iron *cramps* for holding stones together ("joinings," 1 Chron. xxii, 3).

Courayer, Pierre François le, an eminent and liberal Roman Catholic divine, born at Vernon, in Normandy, in 1681, was a canon and librarian of St. Genevieve, and a professor of theology and philosophy. Having written a *Defence of the Validity of English Ordinations* (Brux. 1723, 2 vols. 8vo), he was so persecuted that he took refuge in England in 1728, where he entered the English Church, obtained a pension, and died in 1776. He translated into French Sarpi's History of the Council of Trent, and Sleidan's History of the Reformation, and wrote several tracts. His *Disputation on English Ordinations* was republished at Oxford, 1844, 8vo. His edition of Sarpi is better than any other (Lond. 1736, 2 vols. fol.).

Courier. See Post.

Course (*ἐφημερία*, *daily order*, Luke i, 5, 8). See Abijah 4.

Court, an open enclosure, applied in the A. V. most commonly to the enclosures of the Tabernacle and the Temple. 1. The Hebrew word invariably used for the former is חָצֵר, *chatser'*, from חָצַר, to surround (Gesenius, *Thes. Heb.* p. 512). (See, e. g., Exod. xxvii, 9 to xl, 33; Lev. vi, 16; Num. iii, 26, etc.) The same word is also most frequently used for the "courts" of the Temple, as 1 Kings vi, 36; vii, 8;

xxiii, 12; 1 Chron. xxxiii, 5; Ps. xcii, 13, etc. See TABERNACLE; TEMPLE. The same word is very often employed for the enclosures of the "villages" of Palestine, and under the form of *Hazer* or *Hazor* (q. v.) frequently occurs in the names of places in the A. V. See VILLAGE. It also designates the court of a prison (Neh. iii, 25; Jer. xxxii, 2, etc.), of a private house (2 Sam. xvii, 18), and of a palace (2 Kings xx, 4; Esth. i, 5, etc.). In Isa. xxxiv, 19, "court for owls," the cognate חָצִיר, *chatsir'*, is found. 2. In 2 Chron. iv, 9, and vi, 13, however, a different word is employed, apparently, for the above sacred places —*oratria*, עֲזָרָה, *azarah'*, from a root of similar meaning. This word also occurs in Ezek. xliii, 14, 17, 20; xlv, 19 (A. V. "settle"), but apparently with reference to the ledge or offset of the altar (q. v.) 3. In Amos vii, 13, where the Hebrew word is בֵּית, *beyth*, a "house," our translators, anxious to use a term applicable specially to a king's residence, have put "court." 4. In the Apocrypha *αὐλή* is rendered "court" with respect to the Temple (1 Esdr. ix, 1; 1 Macc. iv, 38; ix, 54), or the palace (1 Macc. xi, 46), which latter is expressed also (1 Macc. xiii, 40) by a periphrasis (*τὰ περὶ ἡμῶν*). 5. In the N. T. the word *αὐλή* designates such an open court (as it is once rendered, Rev. xi, 2, referring to the temple; elsewhere "hall" or "palace"); and *βασίλεια*, a *palace*, is once (Luke vii, 25) rendered "kings' courts." See PALACE.

The term תָּוֶךְ, *ta'vek* (fully תּוֹךְ חֲבֵרְת, *middle of the house*, 1 Sam. iv, 6), also designates in Hebrew the quadrangular area in Eastern houses, denominated in the New Testament *τὸ μέσον*, the centre or "midst" (Luke v, 19). This court is sometimes paved with marble of various kinds, and in the centre there is usually a fountain, if the situation of the place admits of it. The court is generally surrounded on all sides, but sometimes only on one side, with a cloister or covered walk, called מוּסָךְ, *musak'*, over which, if the house have more than one story, is a gallery of the same dimensions, supported by columns. Large companies were received into the court on particular occasions (Esth. i, 5; Luke v, 19). At such times, a large veil of thick cloth was extended by ropes over the whole of the court, in order to exclude the heat of the sun. This veil or curtain of the area may be that termed in the New Testament *στέγη*, covering, or "roof" (Mark ii, 4; Luke vii, 6). See HOUSE.

Court-yard of an Oriental House.

COURT, JUDICIAL. Among the Jews, besides the Sanhedrim (q. v.), or great "council" (q. v.), there were lesser courts (*συνέδρια*, Matt. x, 17; Mark xiii, 9), of which there were two at Jerusalem, and one in each town of Palestine. The constitution of these courts is a doubtful point. According to Talmudical writers, the number of judges was twenty-three in places where there was a population of 120, and three where the population fell below that number (Mishna, *Sanhedr.* i, 6). Josephus, however, gives a different account; he states (*Ant.* iv, 8, 14) that the court, as constituted by Moses (Deut. xvi, 18), consisted of seven judges, each of whom had two Levites as assessors; accordingly, in the reform which he carried out in Galilee, he appointed seven judges for the trial of minor offences (*War*, ii, 20, 5). The statement of Josephus is generally accepted as correct; but it should be noticed that these courts were not always in existence. They may have been instituted by himself on what he conceived to be the true Mosaic model; a supposition which is rendered probable by his farther institution of a council of Seventy, which served as a court for capital offences, altogether independent of the Sanhedrim at Jerusalem (*Life*, 14; *War*, ii, 20, 5). The existence of local courts, however constituted, is clearly implied in the passages quoted from the N. T.; and perhaps the *judgment* (Matt. v, 21) applies to them. See MARKET. Under the Roman government there was a provincial court (*συμβούλιον*, Acts xxv, 12), a kind of jury or privy council, consisting of a certain number of assessors (*consiliarii*, Sueton. *Tib.* 33, 55), who assisted the procurators in the administration of justice and other public matters. See JUDGE.

COURT, ROYAL. The natives of the East have ever been remarkable for a more reverential estimation of the state and dignity of a king than has usually prevailed among other people, and to this fact the language of Scripture bears ample testimony. Although on some special occasions we read of the Jewish monarchs sitting in the gate with their people (2 Sam. xix, 8; Jer. xxxviii, 7), and the prophets appear to have had easy access to them (1 Kings xx, 13; 2 Chron. xxv, 15), yet it is abundantly evident that regal state was, in general, fully maintained, with only that admixture of occasional intercourse and familiarity which may be noticed by every traveller at the present day in the East. Hence it was accounted the height of human felicity to be admitted into that splendid circle which surrounded the person of the sovereign, and they seem to have considered it a good omen if any one was so fortunate as to behold the face of the king (Prov. xxix, 26); whence the expression of seeing God (Matt. v, 8) is to be understood as the enjoyment of the highest possible happiness, such as his favor and protection, especially in the life to come. In reference to this custom, the angel Gabriel replied to Zacharias that he was Gabriel that stood in the presence of God; thus intimating that he was in a state of high favor and trust (Luke i, 19). Hence to "stand before the king" is a phrase which intended the same as to be occupied in his service, and to perform some duty for him (Gen. xli, 46; 1 Sam. xxii, 6, 7), and imported the most eminent and dignified station at court. This illustrates the statement of Christ respecting children, "In heaven their angels do always behold the face of my Father which is in heaven" (Matt. xviii, 1–10), an allusion to the custom of Oriental courts, where the great men, those who are highest in office and favor, are most frequently in the prince's palace and presence (Esth. i, 14; 1 Kings x, 8; xii, 6; 2 Kings xxv, 19). In like

manner, the contentions among the apostles for the chief position under Christ shows that they mistook the spiritual nature of his kingdom; the request of the mother of James and John, that her sons might sit, the one on his right hand, and the other on his left, in his kingdom (Matt. xx, 20–23), evidently alludes to the custom which then obtained in the courts of princes, where two of the noblest and most dignified personages were respectively seated, one on each side, next the sovereign himself, thus enjoying the most eminent places of dignity (1 Kings ii, 19; Psa. xlv, 9; Heb. i, 3). See KING.

Court, ANTOINE, an eminent French Protestant divine, was born in 1696 at Villeneuve-de-Berg (according to others at La Tour d'Aigues), in Vivarais. After the revocation of the Edict of Nantes in 1685, the French Protestant Church was in danger of self-destruction through fanaticism. Under these circumstances, Court, in the synods of Delphinas in 1716 and of Languedoc in 1717, laid the foundation for an ecclesiastical constitution, based upon the old discipline of the French Church. In so doing he met great opposition, and even encountered personal peril, yet his work went on. To obviate the difficulty of intrusting the functions of the sacred office to persons lacking the proper ordination, he sent one of his colleagues to Zurich to receive it, and the latter imparted it to the others in a synod held in 1718. With the aid of the government of Berne and the archbishop of Canterbury, Court established in 1729 a seminary at Lausanne, where ministers were prepared for the churches "*of the Desert*," as they were called, very appropriately. All the ecclesiastical papers were dated from "the Desert." The duke of Orleans, while regent, was allied with England against Spain, and sought to induce Court to leave France, but the latter remained at his post until his death in 1760. Court wrote *Histoire des troubles des Cévennes*, Geneva, 1760, 3 vols. 12mo; Alais, 1819, 3 vols.; *Le Patriote françois et impartial, ou Réponse à la lettre de M. l'Evêque d'Agen à M. le contrôleur-général contre la tolérance des Huguenots* (Villefr. Genève, 1751, 1753); *Lettre d'un patriote sur la tolérance civile des Prot. de France* (1765), etc. Weiss gives an account of numerous MS. writings of Court (preserved in the Geneva library) in his *Histoire des Refugiés*, ii, 288 (see Camisards). See also Coquerel, *Histoire des l'Eglise du Désert;* Peyrat, *Hist. des Pasteurs, du Desert;* Haag, *La France Prot.* (Paris, 1854); *Bulletin de la Soc. de l'Hist. de Prot. Fr.;* R. Sayons, *Hist. de la Littérature Française á l'E'tranger*, i, 304, 313; Herzog, *Real-Encyklop.* s. v.

Courtesy. Orientals are much more studious of politeness in word and act than Europeans (Niebuhr, *Beschr.* p. 49; Arvieux, iii, 807). So were undoubtedly the ancient Hebrews. Inferiors in an interview with superiors (both on meeting and separating, 2 Sam. xviii, 21) were wont to bow (הִשְׁתַּחֲוָיָה, *προσκυνεῖν*; see Kästner, *De veneratione in S. S.* Lips. 1735) low (Gen. xix, 1; xxiii, 7; 2 Sam. ix, 6; xviii, 21), in proportion to the rank towards the earth (even repeatedly, Gen. xxxiii, 3; 1 Sam. xx, 41). In the presence of princes, high civil officers, etc., persons threw themselves prostrate (at their feet) upon the ground (הִשְׁתַּחֲוָיָה אַפַּיִם אַרְצָה, Gen. xlii, 6; נָפַל עַל פָּנָיו, or אַפָּיו, 1 Sam. xxv, 23; 2 Sam. xiv, 4; 1 Kings xviii, 7; comp. Judith x, 21; נָפַל אַרְצָה, Gen. xliv, 14; l, 18; 2 Sam. i, 2; also simply נָפַל לְפָנִים, 2 Sam. xix, 19; comp. Matt. ii, 11; Herod. i, 134; ii, 80; see Hyde, *Rel. vet. Pers.* p. 6 sq.; Harmer, ii, 39 sq.; Kype, *Observ.* i, 8, 410; Rüppell, *Abyss.* i, 217; ii, 94). They also bent the knee (2 Kings i, 13; comp. Matt. xxvii, 29; Acts x, 25). Of other gestures, which in the modern East are customary (Harmer, ii, 34; Shaw, *Trav.* p. 207; Niebuhr, *Trav.* i, 232), e. g. laying the hand on the breast, there is no trace in the Bible. If an inferior mounted on a beast met a superior, he quickly alighted (Arnob. vii, 13; see Orelli ad loc.), and made the due obeisance (Gen. xxiv, 64; 1 Sam. xxv, 23; see Niebuhr, *Beschr.* p. 44, 50; *Trav.* i, 139). Whether in such cases an individual turned out of the road, like the ancient Egyptians (Herod. ii, 80) and modern Arabians (Niebuhr, *Beschr.* p. 50), is uncertain, but probable. On the greeting by a kiss, which, however, does not appear to have been so usual or varied as among the modern Orientals (see Herod. i, 134; Harmer, ii, 36 sq.; Burckhardt, *Arab.* p. 229), see KISS. Rising from a sitting posture before persons entitled to respect, such as elders, was early universal (Lev. xix, 32; Job xxix, 8; comp. Porphyr. *Abstin.* ii, 61). See ELDER. Forms of salutation on meeting or entrance consisted of a pious expression of well-wishing (Gen. xliii, 29; 1 Sam. xxv, 6; Judg. vi, 12; 2 Sam. xx, 9; Psa. cxxix, 8; see Harmer, iii, 172) and inquiries concerning the health of the family (2 Kings iv, 26; hence שָׁאַל לְשָׁלוֹם = to *greet*, Exod. xviii, 7; Judg. xviii, 15; 1 Sam. x, 4; comp. Gesenius, *Thes. Heb.* p. 1347). One of the simplest formulæ was "Jehovah be with thee;" to which was replied, "The Lord bless thee;" (Ruth ii, 4). Among the later Jews, the phrase יִישַׁר, "May it go well with thee," was general (Lightfoot, p. 502). With the modern Arabs the expression of salutation, *Salam aleykum*, "Peace be upon you," and the reply, *Aleykum es-Salam*, "On you be peace," are customary (Niebuhr, *Beschr.* p. 48 sq.; Welsted, *Trav.* i, 242). The Heb. equivalent, שָׁלוֹם לָךְ, "Peace to thee," does not appear in the O. T. (Judg. xix, 20; 1 Chron. xii, 18) as a constant form of salutation (yet comp. Luke xxiv, 36; John xx, 26; also Tobit v, 12; and comp. on this Purman's *Expositio forn. salut.* "*Pax Vobiscum*," Frcft. a. M. 1799). The Punic greeting was *Avo* (חָוֹ) or *Avo douni* (חָוֹ אֲדֹנִי), according to Plautus (*Pœn.* v, 2, 34, 38; comp. Ἄδωνις, *Anthol. Gr.* iii, 25; epigr. 70). Persons were also sent on their way with a similar formula (Tob. v, 23). But besides such set terms, individuals meeting one another made use of verbose methods of inquiring after each other's circumstances (as appears from the prohibition in 2 Kings iv, 29; Luke x, 4; see Niebuhr, *Beschr.* p. 49; Arvieux, iii, 162; Russel, *Aleppo*, i, 229; Jaubert, p. 170; Rüppell, *Abyssin.* i, 203). See SALUTATION. Whether the well-known custom among the Greeks and Romans (Homer, *Odyss.* xvii, 541; Pliny, xxviii, 5; Petron. 98) of wishing well to one who sneezed (which was regarded as ominous, Eustath. *ad Odyss.* xvii, 545; Cicero, *Divin.* ii, 40; Pliny, ii, 7; Xenoph. *Anab.* iii, 2, 9; Propert. ii, 2, 34; Augustine, *Doctr. Chr.* i, 20; comp. Apulæi *Metam.* 9, p. 209, ed. Bip.; Harduin *ad Plin.* xxviii, 5; see Wernsdorf, *De ritu sternutantibus bene precandi*, Lips. 1741; Rhan, *De more sternutantibus salutem apprecandi*, Tigur. 1742), prevailed also among the Israelites, is uncertain; the later Jews observed it, and the Rabbins maintain that it was an ancient usage (Buxtorf, *Synag.* p. 129).

In conversation (q. v.) the less important person spoke of himself in the third person, and styled himself the other's servant (Gen. xviii, 3; xix, 2; xxxiii, 5; xliii, 28; Judg. xix, 19) and the other master (Gen. xxiv, 18; 1 Sam. xxvi, 18, etc.). Sometimes he applied, by way of further abasement, epithets (e. g. dog) of disparagement to himself (2 Sam. ix, 8; 2 Kings viii, 13; comp. Oedmann, *Samml.* v, 42 sq.). The usual title of respect was אֲדֹנִי, "My lord" (later מָרִי); other respectful terms were also אָבִי, "My father" (especially to prophets, 2 Kings v, 13; vi, 21; xiii, 14; comp. the Romanist title "father" for priest); on the later name, רַבִּי, "My master," see RABBI. The later Jews seem to have utterly excluded, in their bigotry, the heathen from all salutation (Matt. v, 47?), as now,

in Syria and Egypt, Mohammedans and Christians hardly deign to greet each other (Harmer, ii, 35). The public sentiment of those times also released holy persons (saints) from the obligation of returning complimentary salutations (Lightfoot, p. 787), which, however, they eagerly claimed (Mark xii, 38; Luke xi, 43; xx, 46). The *right* side was regarded as the place of honor in standing or sitting by the Hebrews from early times (1 Kings ii, 19; Psa. xlv, 10; Matt. xxv, 33; comp. Sueton. *Ner.* 18, see Dougtæi *Anal.* i, 169 sq.; Wetstein, i, 456, 512; Einigk, *De manu dextra honoratiore*, Lips. 1707). *Public* reverence and homage toward monarchs, generals, etc., consisted in shouts (among others, the cry huzza, יְחִי הַמֶּלֶךְ, "Long live the king!" Barhebr. *Chron.* p. 447) of acclamation (Josephus, *Ant.* xi, 8, 5; *War*, vii, 5, 2; Ammian. Marc. xxi, 10; Philo, ii, 522), with music (2 Sam. xvi, 16; 1 Kings i, 39, 40; 2 Kings ix, 13; Judith iii, 8; comp. Herodian, iv, 8, 19); also in strewing carpets or garments along the road (comp. Æschyl. *Agam.* 909; Plutarch, *Cato min.* c. 12; Talmud, *Chetuboth*, fol. lxvi, 2; as still is practised in Palestine, Robinson, ii, 383), with branches (see Ugolini *Thesaur.* xxx) or flowers (2 Kings ix, 13; Matt. xxi, 8; comp. Curtius, v, 1, 20; ix, 10, 25; Herod. vii, 54; Ælian, *Var. Hist.* ix, 9; Tacitus, *Hist.* ii, 70; Herodian, i, 7, 11; iv, 8, 19; see Dougtæi *Analect.* iii, 39; Paulsen, *Regier. des Morgenl.* p. 229 sq.), and in torchlight entrances at night (2 Macc. iv, 22). Festive escorts in procession (with the priests at the head) were also not unusual (Josephus, *Ant.* xi, 8, 5; xvi, 2, 1; see Schmieder, *De solemnitatt. vett. reges imperatoresq. recipiendi*, Brig. 1823). See also GIFT; VISIT.

Cousin is given (Luke i, 36, 58) by the Auth. Vers. in its vague acceptation as the rendering of συγγενής, a blood-relative, or "*kinsman*," as elsewhere translated. So also in the Apocrypha (1 Esdr. iii, 7; iv, 42; Tob. vi, 10; 2 Macc. xi, 1, 35).

Cousin, VICTOR, an eminent philosopher and writer, was born in Paris November 28, 1792, and was educated at the Lycée Charlemagne, where, at sixteen, he gained the grand prize of honor. Soon after he was admitted into the *École Normale*, where he became *répétiteur*, or private teacher of Greek literature, and afterwards professor of philosophy. "In 1811 he attended the lectures of Laromiguière (q. v.), whose theory was a mixture of Condillac and Descartes, of sensation and spiritualism, and who made it his mission to reconcile the two systems. Cousin was at first fascinated by this theory, and still more by the elegant phraseology and lucid exposition of the lecturer. It was very probably at the same period that his great idea first presented itself to his mind, 'that each system is true, but incomplete, and that by collecting all the systems together a complete philosophy would be obtained.' In 1813 and 1814 he attended the courses of philosophical lectures delivered at the Faculté des Lettres by Royer-Collard, whose earnest mind had long distrusted that school of sensation which Locke and Condillac had established in the 18th century, and who had sought refuge from these doubts in the doctrines of the Scotch system. This doctrine, which insisted that there were notions in the mind totally independent of the senses, was ardently embraced by Cousin, who became lecturer at the Faculté des Lettres, and began his famous course of the History of Philosophy December 7, 1815. Having learned to doubt from Royer-Collard, he resolved to examine in turn all the great philosophers, both ancient and modern, before he formed his opinions. He became a universal inquirer. He professed to judge without prejudice each philosopher, and in each he believed he had found a system, and in each system a fragment of truth. As fast as he proceeded in this inquiry he communicated what he had found to the public, sometimes in lectures, at other times in books. To enable his pupils to judge for themselves, he published the works of Plato, the inedited works of Proclus, and an edition of Descartes, though the whole did not appear till after his dismission. His translation of Plato in 13 vols. would preserve his name had he done nothing else" (*English Cyclopædia*). The government dismissed him from the Faculty of Letters in 1821, and in 1824 he went to Germany as tutor to the young Duke of Montebello. "During his progress the frank opinions he expressed excited the suspicion of the Prussian authorities, who caused him to be arrested and conveyed to Berlin, where he was thrown into prison as an agitator. He remained in close confinement for six months. After his return he published, in 1826, his celebrated *Fragmens Philosophiques*, with a remarkable preface, which is still considered the best summary of his particular doctrine." In 1828 he recommenced lectures on Philosophy at the Faculté des Lettres. His former lectures had consisted principally of the history of ideal truth, as it had been explained by the great thinkers who had preceded him. But this time his own theory was exhibited. The first series was published in 1828, under the title of *Cours d'Histoire de la Philosophie*; the second in 1829, as *Cours de Philosophie*. Soon after, the accession of Louis Philippe introduced his friends Guizot and De Broglie to power. He now became a councillor of state, a member of the Board of Public Education, an officer of the Legion of Honor, and a peer of France, in quick succession. In 1831 he was commissioned by the ministry to proceed to Germany to examine the state of education in that country. The results were given to the world in 1832, *Rapport sur l'état de l'instruction publique dans quelques pays de l'Allemagne* (translated by Mrs. Austin, and published in London in 1834). He succeeded Fourier in the Academy, and delivered his *éloge*, or reception address, May 5, 1831. He seldom spoke in the Chamber of Peers, and when he did it was almost invariably on the subject of National Instruction. On March 1, 1840, Cousin entered the liberal cabinet of Thiers as minister of Public Instruction. He introduced a number of reforms during his administration, which lasted eight months, and of which he published himself a review in the *Revue des deux Mondes* in 1841. In 1848 M. Cousin seemed cordially to accept the introduction of the republic, and when General Cavaignac appealed to the Academy of Moral and Political Sciences to aid the government in the enlightenment of the people, Cousin published, with a republican preface, a popular edition of the *Profession de foi du vicaire savoyard*. He subsequently wrote, under the title of *Justice et Charité*, a pamphlet against the socialistic tendencies. But after 1849 Cousin altogether withdrew from public life. He published, besides the works already mentioned, among others, Procli *Opera*, 6 vols. 8vo, 1820–27; Descartes, *Œuvres Complètes*, 11 vols. 8vo; Abélard, *Sic et non*, 1836; several series of *Fragmens Philosophiques*, 1838–40; *Hist. de la Philosophie* (1st series, 5 vols. 8vo; 2d, 3 vols. 8vo; 3d, 4 vols. 8vo); *Du Vrai, du Beau, du Bien* (1853, 8vo, a republication of his lectures delivered between 1815 and 1821); *Cours de Philosophie Morale*, 5 vols. 1840–41. A collected edition of his principal works (up to 1846) in 22 vols. 18mo, was published in 1846–47. From 1853 to 1864 he published a series of works on celebrated literary women of the 17th century, which are an important contribution to the history of that time, and found a large circulation. The series comprises *Jacqueline Pascal* and *Mad. de Longueville* (1853), *Mad. de Sablé* (1854), *Mad. de Chevreuse et Mad. de Hautfort* (1856); *La Société Française au XVII^e Siècle* (1858, 2 vols.); *La Jeunesse de Mad. de Longueville* (1864, 4th edit.); *la Jeunesse de Mazarin* (1865). In 1863 he published *Histoire Générale de la Philosophie depuis les temps les plus reculés jusqu'au XVIII^e siècle* (1863), being a revised edition of his *Cours de l'histoire de la philosophie*. Cousin was also a

frequent contributor to some of the leading periodicals of France, such as the *Revue des Deux Mondes*, the *Journal des Savants*, and others. A kind of Gallican catechism, published anonymously in 1833, under the title *Livre d'instruction morale et religieuse*, has also been ascribed to Cousin. He died in Jan. 14, 1867.

Cousin undoubtedly rendered great service to modern thought by his advocacy of "spiritualism" (spiritualist philosophy) as opposed to materialistic doctrines. In the preface to *Du Vrai, du Beau, du Bien*, he thus expresses himself (1853): "Our true doctrine, our true standard, is spiritualism; the philosophy, generous and solid at the same time, that commences with Socrates and Plato, that the Gospel spreads over the world, that Descartes forced into the severer forms of the genius of modern times. The name of spiritualism is properly given to this philosophy, for its character is that it subordinates the senses to the spirit, and that, by all means which reason can avow, it perpetually tends to elevate man and make him greater. Spiritualism teaches the immortality of the soul, the freedom and responsibility of human action, the obligation of morality, the virtue of disinterestedness, the dignity of justice, the beauty of charity; and, beyond the limits of this earth, spiritualism points to God, the Creator and the Type of humanity, who, having created man evidently for an excellent end, will not abandon him during the mysterious development of his destiny."

As to *method*, Cousin follows the psychological rather than the *à priori* method, but he avoids carefully the views of Locke and the sensationalists. His psychology is idealistic, his ontology also. What he calls "spontaneous reason" acquaints us with the "true and essential nature of things." In place of "commencing, as the Germans do, with ontology, he affirms the possibility of finding a passage from the world of phenomena to real existence. Since reason receives truth spontaneously, by direct and immediate perception, he considers that we may, by means of this faculty, attain to the knowledge of essential and absolute existence" (Morell, *Hist. of Mod. Philos.* pt. ii, ch. viii). The tendency of this view to pantheism has been shown by many writers, especially by Gioberti (*Considérations sur les doctrines religieuses de M. Victor Cousin*, transl. by Tourneur, Paris, 1847, 8vo). Cousin himself always strenuously repudiated the name of pantheist. It is certain that towards the end of his career he "sought more and more the support of the great Christian masters, and drew daily nearer to Pascal, Descartes, and Leibnitz" (*North British Review*, March, 1867, art. v). Of translations of his works, we have, by Daniel, *The Philosophy of the Beautiful* (N. Y. 1849, 8vo); by Wight, *History of Modern Philosophy* (N. Y. 2 vols. 8vo, 1852); by the same, *Lectures on the True, the Beautiful, and the Good* (N. Y. 1854, 8vo); by Henry, *Psychology, including an Examination of Locke's Philosophy* (N. Y. 4th ed., 1856, 8vo). —*English Cyclopædia*, s. v.; Vapereau, *Dict. des Contemporains*, 1865; Lewes, *History of Philosophy* (Lond. 2 vols. 1867), ii, 645; *Christian Spectator*, vii, 89, *North American Review*, liii, 1; lxxxv, 19; *Edinb. Review*, l, 194 (art. by Sir W. Hamilton); *Brit. Quart. Review*, v, 289; *Westminster Review*, Oct. 1853; Ripley, *Specimens of Foreign Literature*, vol. i; Alaux, *La Philosophie de Cousin* (Paris, 1864).

Cou'tha (Κουθά, Vulg. *Phusa*), named (1 Esdr. v, 32) as one of the heads of the Temple-servants whose "sons" returned from Babylon; but the Hebrew lists (Ezra ii, 53; Neh. vii, 55) contain no corresponding name.

Covel, James, Jr., a Methodist Episcopal minister, was born at Marblehead, Mass., Sept. 4, 1796, became a travelling preacher in 1816, and travelled chiefly in the state of New York. He was the author of a *Dictionary of the Bible* (18mo), and was a man of sound judgment, sincere piety, and steady industry. From 1838 he was appointed principal of the Troy Conference Academy, and filled the post acceptably until 1841. His last station was State Street, Troy, where he died, May 15, 1845.—*Minutes of Conferences*, iii, 600; Sprague, *Annals*, vii, 564.

Covel, John, an English divine, was born at Horningsheath, Suffolk, in 1638, and was educated at Christ's College, Cambridge, of which he became fellow. In 1670 he went to Constantinople as chaplain to the British embassy. In 1687 he was made chancellor of York, and in 1688 master of Christ's College, Cambridge. He died in 1722. As the fruit of his residence in Constantinople, he wrote *Some Account of the present Greek Church, with Reflections on their present Doctrine and Discipline, etc.* (Camb. 1722, fol.).

Covenant, a mutual contract or agreement between two parties, each of which is bound to fulfil certain engagements to the other. In Scripture it is used mostly in an *analogical* sense, to denote certain relations between God and man. (See *Danville Review*, March, 1862.)

I. *Terms.*—In the Old Test. בְּרִית, *berith'* (rendered "league," Josh. ix, 6, 7, 11, 15, 16; Judg. ii, 2; 2 Sam. iii, 12, 13, 21; v, 3; 1 Kings v, 12; xv, 19, twice; 2 Chron. xvi, 3, twice; Job v, 23; Ezek. xxx, 5; "confederacy," Obad. 7; "confederate," Gen. xiv, 13; Psa. lxxxiii, 5), is the word invariably thus translated (Sept. διαθήκη; once, Wisd. i, 16, συνθήκη; Vulg. *fœdus, pactum*, often interchangeably, Gen. ix, xvii; Num. xxv; in the Apocrypha *testamentum*, but *sacramentum*, 2 Esdr. ii, 7; *sponsiones*, Wisd. i, 16; in N. T. *testamentum* [*absque fœdere*, Rom. i, 31; Gr. ἀσυνθέτους]). The Hebrew word is derived by Gesenius (*Thes. Heb.* p. 237, 238; so Fürst, *Hebr. Handw.* p. 217) from the root בָּרָה, i. q. בָּרָא, "he *cut*," and taken to mean primarily "a cutting," with reference to the custom of cutting or dividing animals in two, and passing between the parts in ratifying a covenant (Gen. xv; Jer. xxxiv, 18, 19). Hence the expression "to cut a covenant" (כָּרַת בְּרִית, Gen. xv, 18, or simply כָּרַת, with בְּרִית understood, 1 Sam. xi, 2) is of frequent occurrence. (Comp. ὅρκια τέμνειν, τέμνειν σπονδάς, *icere, ferire, percutere fœdus*. See Slevogt, *De more Ebraeor. dissectione animalium fœdera ineundi*, Jen. 1759.) Professor Lee suggests (*Heb. Lex.* s. v. בְּרִית) that the proper signification of the word is *an eating together*, or *banquet*, from the meaning "to eat," which the root בָּרָה sometimes bears; because among the Orientals to eat together amounts almost to a covenant of friendship. This view is supported by Gen. xxxi, 46, where Jacob and Laban eat together on the heap of stones which they have set up in ratifying the covenant between them. It affords also a satisfactory explanation of the expression "a covenant of salt" (בְּרִית מֶלַח, διαθήκη ἁλός, Num. xviii, 19; 2 Chron. xiii, 5), when the Eastern idea of eating salt together is remembered. If, however, the other derivation of בְּרִית be adopted, this expression may be explained by supposing salt to have been eaten or offered with accompanying sacrifices on occasion of very solemn covenants, or it may be regarded as figurative, denoting, either, from the use of salt in sacrifice (Lev. ii, 13; Mark ix, 49), the sacredness, or, from the preserving qualities of salt, the perpetuity of the covenant. (See below.)

In the New Test. the word διαθήκη is frequently, though by no means uniformly, translated *testament* in the English Auth. Vers., whence the two divisions of the Bible have received their common English names. This translation is perhaps due to the Vulgate, which, having adopted *testamentum* as the equivalent for διαθήκη in the Apocrypha, uses it always as such in the N. T. (see above). There seems, how-

ever, to be no necessity for the introduction of a new word conveying a new idea. The Sept. having rendered בְּרִית (which never means *will* or *testament*, but always *covenant* or *agreement*) by *διαθήκη* consistently throughout the O. T., the N. T. writers, in adopting that word, may naturally be supposed to intend to convey to their readers, most of them familiar with the Greek O. T., the same idea. Moreover, in the majority of cases, the same thing which has been called a "covenant" (בְּרִית) in the O. T. is referred to in the N. T. (e. g. 2 Cor. iii, 14; Heb. vii, ix; Rev. xi, 19); while in the same context the same word and thing in the Greek are in the English sometimes represented by "covenant," and sometimes by "testament" (Heb. vii, 22; viii, 8–13; ix, 15). In the confessedly difficult passage, Heb. ix, 16, 17, the word *διαθήκη* has been thought by many commentators absolutely to require the meaning of *will* or *testament*. On the other side, however, it may be alleged that, in addition to what has just been said as to the usual meaning of the word in the N. T., the word occurs twice in the context, where its meaning must necessarily be the same as the translation of בְּרִית, and in the unquestionable sense of *covenant* (comp. *διαθήκη καινή*, Heb. ix, 15, with the same expression in viii, 8; and *διαθήκη*, ix, 16, 17, with ver. 20, and Exod. xxiv, 8). If this sense of *διαθήκη* be retained, we may either render *ἐπὶ νεκροῖς*, "over, or in the case of, dead sacrifices," and *ὁ διαθέμενος*, "the mediating sacrifice" (Scholefield's *Hints for an improved Translation of the N. T.*), or (with Ebrard and others) restrict the statement of ver. 16 to the O.-T. idea of a covenant *between man and God*, in which man, as guilty, must always be represented by a sacrifice with which he was so completely identified that in its person he (*ὁ διαθέμενος*, the human covenanter) actually died (comp. Matt. xxvi, 28). See TESTAMENT.

II. *Their Application.*—In its Biblical meaning of a compact or agreement between two parties, the word "covenant" is used—1. *Properly, of a covenant between man and man;* i. e. a solemn compact or agreement, either between tribes or nations (1 Sam. xi, 1; Josh. ix, 6, 15), or between individuals (Gen. xxi, 44), by which each party bound himself to fulfil certain conditions, and was assured of receiving certain advantages. In making such a covenant God was solemnly invoked as witness (Gen. xxxi, 50), whence the expression "a covenant of Jehovah" (בְּרִית יְהוָה, 1 Sam. xx, 8; comp. Jer. xxxiv, 18, 19; Ezek. xvii, 19), and an oath was sworn (Gen. xxi, 31); and accordingly a breach of covenant was regarded as a very heinous sin (Ezek. xvii, 12–20). A sign (אוֹת) or witness (עֵד) of the covenant was sometimes framed, such as a gift (Gen. xxi, 30), or a pillar, or heap of stones erected (Gen. xxxi, 52). The marriage compact is called "the covenant of God," Prov. ii, 17 (see Mal. ii, 14). The word covenant came to be applied to a sure ordinance, such as that of the shew-bread (Lev. xxiv, 8); and is used figuratively in such expressions as a covenant with death (Isa. xxviii, 18), or with the wild beasts (Hos. ii, 18). The phrases אַנְשֵׁי, בַּעֲלֵי בְרִית, בְּרִית, "lords or men of one's covenant," are employed to denote confederacy (Gen. xiv, 13, Ob. 7). See CONTRACT.

2. *Improperly, of a covenant between God and man.* Man not being in any way in the position of an independent covenanting party, the phrase is evidently used by way of accommodation. See ANTHROPOMORPHISM. Strictly speaking, such a covenant is quite unconditional, and amounts to a promise (Gal. iii, 15 sq., where *ἐπαγγελία* and *διαθήκη* are used almost as synonyms) or act of mere favor (Psa. lxxxix, 28, where חֶסֶד stands in parallelism with בְּרִית) on God's part. Thus the assurance given by God after the Flood that a like judgment should not be repeated, and that the recurrence of the seasons, and of day and night, should not cease, is called a covenant (Gen. ix; Jer. xxxiii, 20). Generally, however, the form of a covenant is maintained, by the benefits which God engages to bestow being made by him dependent upon the fulfilment of certain conditions which he imposes on man. Thus the covenant with Abraham was conditioned by circumcision (Acts vii, 8), the omission of which was declared tantamount to a breach of the covenant (Gen. xvii); the covenant of the priesthood by zeal for God, his honor and service (Num. xxv, 12, 13; Deut. xxxiii, 9; Neh. xiii, 29; Mal. ii, 4, 5); the covenant of Sinai by the observance of the ten commandments (Exod. xxxiv, 27, 28; Lev. xxvi, 15), which are therefore called "Jehovah's covenant" (Deut. iv, 13), a name which was extended to all the books of Moses, if not to the whole body of Jewish canonical Scriptures (2 Cor. iii, 13, 14). This last-mentioned covenant, which was renewed at different periods of Jewish history (Deut. xxix; Josh. xxiv; 2 Chron. xv, xxiii, xxix, xxxiv; Ezra x; Neh. ix, x), is one of the two principal covenants between God and man. They are distinguished as old and new (Jer. xxxi, 31–34; Heb. viii, 8–13; x, 16), with reference to the order, not of their institution, but of their actual development (Gal. iii, 17); and also as being the instruments respectively of bondage and freedom (Gal. iv, 24). Consistently with this representation of God's dealings with man under the form of a covenant, such covenant is said to be confirmed in conformity with human custom by an oath (Deut. iv, 31; Psa. lxxxix, 3), to be sanctioned by curses to fall upon the unfaithful (Deut. xxix, 21), and to be accompanied by a sign (אוֹת), such as the rainbow (Gen. ix), circumcision (Gen. xvii), or the Sabbath (Exod. xxxi, 16, 17). Hence, in Scripture, the covenant of God is called his "counsel," his "oath," his "promise" (Psa. lxxxix, 3, 4; cv, 8–11; Heb. vi, 13–20; Luke i, 68–75; Gal. iii, 15–18, etc.); and it is described as consisting wholly in the gracious bestowal of blessing on men (Isa. lix, 21; Jer. xxxi, 33, 34). Hence also the application of the term covenant to designate such fixed arrangements or laws of nature as the regular succession of day and night (Jer. xxxiii, 20), and such religious institutions as the Sabbath (Exod. xxxi, 16); circumcision (Gen. xvii, 9, 10); the Levitical institute (Lev. xxvi, 15); and, in general, any precept or ordinance of God (Jer. xxxiv, 13, 14), all such appointments forming part of that system or arrangement in connection with which the blessings of God's grace were to be enjoyed.

COVENANT OF SALT (בְּרִית מֶלַח). This phrase is supposed to denote a *perpetual covenant*, in the sealing or ratification of which salt was used. As salt was added to different kinds of viands, not only to give them a relish, but to preserve them from putrefaction and decay, it became the emblem of *incorruptibility* and *permanence*. Hence a "covenant of salt" signified an *everlasting* covenant (Num. xviii, 19; Lev. ii, 13; 2 Chron. xiii, 5). See SALT.

Covenant, Solemn League and. There were several covenants drawn up in Scotland having regard to the maintenance of the Reformed or Presbyterian religion in that country. The *First Covenant* was subscribed in Edinburgh Dec. 3, 1557, the mass of signers being known as the Congregation, and the nobility and leading subscribers as the Lords of the Congregation (q. v.). They petitioned the government for liberty of worship. Being met with dissimulation and treachery, a *Second Covenant* was signed at Perth, May 31, 1559, wherein the subscribers bound themselves to mutual assistance in defense of their religious rights. The appeal was made to arms, and the aid of queen Elizabeth of England was called in to counteract the French troops invited by the Papal party. On

the death of the queen-mother in 1560, the French troops were withdrawn, and Parliament, being left at liberty, ordained the Presbyterian as the Established Church of Scotland. In 1638 the *National Covenant* was subscribed over all Scotland with great enthusiasm. This was not only a repetition of the former covenants, but contained, moreover, a solemn protest against prelacy.

The Solemn League and Covenant was a compact entered into in 1643 between England and Scotland, binding the united kingdoms to mutual aid in the extirpation of popery and prelacy, and the preservation of true religion and liberty in the realm. It was drawn up by Alexander Henderson, approved by the General Assembly of the Church of Scotland Aug. 17, ratified by the Convention of Estates, and accepted and subscribed Sept. 25 by the English Parliament and the Westminster Assembly (q. v.). In 1645 it was again ratified by the Scottish General Assembly, together with the Directory for Worship framed by the Westminster Assembly. Although Charles I would not approve of it, Charles II engaged by oath to observe it, a promise which he broke upon the first opportunity. The Scottish Parliament of 1661, in the interest of the king, established the royal supremacy, annulled the Solemn League and Covenant, and absolved the lieges from its obligations. The "Covenants" have a place in the volume which comprehends the *Westminster Confession of Faith* (Scottish edition), but for what reason it is difficult to say, for the Church of Scotland does not make adherence to them obligatory on either clerical or lay members. Certain Scottish and Irish dissenters, however, still profess attachment to the covenants, and on particular occasions renew their subscription to them.—Hetherington, *Hist. of Church of Scotland;* McCrie, *Sketches of Ch. Hist.;* Rudloff, *Geschichte der Reformation in Schottland* (Berlin, 1853, 2 vols.). See CAMERONIANS; PRESBYTERIANS, REFORMED; SCOTLAND, CHURCH OF.

Covenants, Theology of. See FEDERAL THEOLOGY.

Covenanters, the name given primarily to that body of Presbyterians in Scotland who objected to the Revolution settlement in Church and State, and desired to see in full force that kind of civil and ecclesiastical polity that prevailed in Scotland from 1638 to 1649. "According to the Solemn League and Covenant, ratified by the Parliaments of England and Scotland, and also by the Assembly of Divines at Westminster in 1643, Presbyterianism was to be maintained in the kingdoms of England, Scotland, and Ireland, and popery, prelacy, superstition, heresy, schism, etc., were to be extirpated. The 'Covenanters' in Scotland contended, as is well known, under much suffering, for this species of Presbyterian supremacy throughout the reigns of Charles II and James VII (II). As a measure of pacification at the Revolution, Presbytery was established in Scotland by act of Parliament, 1690; but it was of a modified kind. Substantially the Church was rendered a creature of the State, more particularly as regards the calling of General Assemblies; and prelacy was not only confirmed in England and Ireland, but there was a general toleration of heresy—i. e. dissent. In sentiment, if not in form, therefore, this party repudiated the government of William III and his successors, and still maintained the perpetually binding obligations of the Covenants. The Covenanters acted under strong convictions, and only desired to carry out to a legitimate issue principles which have always been found in the Presbyterian Church of Scotland; but which, for prudential considerations, had been long practically in abeyance. In short, it is in the standards of the Covenanters that we have to look for a true embodiment of the tenets held by the great body of English and Scotch Presbyterians of 1643. Others gave in to the Revolution settlement, and afterwards found cause to secede. The Covenanters never gave in, and, of course, never seceded. Although thus, in point of fact, an elder sister of the existing Church of Scotland and all its secessions, the Cameronian body did not assume a regular form till after the Revolution; and it was with some difficulty, amidst the general contentment of the nation, that it organized a communion with ordained ministers. The steadfastness of members was put to a severe trial by the defection of their ministers, and for a time the people were as sheep without a shepherd. At length, after their faith and patience had been tried for sixteen years, they were joined by the Rev. John M'Millan, from the Established Church, in 1706. In a short time afterwards the communion was joined by the Rev. John M'Neil, a licentiate of the Established Church. As a means of confirming the faith of members of the body, and of giving a public testimony of their principles, it was resolved to renew the Covenants; and this solemnity took place at Auchensach, near Douglas, in Lanarkshire, in 1712. The subsequent accession of the Rev. Mr. Nairne enabled the Covenanters to constitute a presbytery at Braehead, in the parish of Carnwath, on the 1st of August, 1743, under the appellation of the Reformed Presbytery. Other preachers afterwards attached themselves to the sect, which continued to flourish obscurely in the west of Scotland and north of Ireland. For their history and tenets we refer to the *Testimony of the Reformed Presbyterian Church* (Glasgow, John Keith, 1842). Holding strictly to the Covenants, and in theory rejecting the Revolution settlement, the political position of the Covenanters is very peculiar, as they refuse to recognise any laws or institutions which they conceive to be inimical to those of the kingdom of Christ" (Chambers, *Encyclopædia*, s. v. Cameronians). The Reformed Presbyterians regard themselves as the modern representatives of the Covenanters. See *History of the Covenanters* (2 vols. 18mo, Philad. Presb. Board); also the articles PRESBYTERIAN (REFORMED) CHURCH; CAMERON; SCOTLAND, CHURCH OF.

Coverdale, MILES, one of the earliest English reformers, was born in Yorkshire about 1487, and was educated at Cambridge, where he became a monk of the Augustine order. At an early period he perceived the errors of Popery. In 1514 he was ordained priest. About 1525 he laid aside his monk's habit, and began to preach against papal errors. In 1528 he joined Tyndale at Hamburgh, and in 1535 his own translation of the Bible appeared, with a dedication to Henry VIII. It formed a folio, printed at Zurich. "He thus had the honor of editing the first English Bible allowed by royal authority, and the first translation of the whole Bible printed in our language. The Psalms in it are those now used in the Book of Common Prayer. About the end of the year 1538 Coverdale went abroad again on the business of a new edition of the Bible. Grafton, the English printer, had permission from Francis I, at the request of king Henry VIII himself, to print a Bible at Paris, on account of the superior skill of the workmen, and the goodness and cheapness of the paper. But, notwithstanding the royal license, the Inquisition interposed by an instrument dated December 17, 1538. The French printers, their English employers, and Coverdale, who was the corrector of the press, were summoned before the inquisitors, and the impression, consisting of 2500 copies, was seized and condemned to the flames. The avarice of the officer who superintended the burning of the copies, however, induced him to sell several chests of them to a haberdasher for the purpose of wrapping his wares, by which means a few copies were preserved. The English proprietors, who had fled at the alarm, returned to Paris when it subsided, and not only recovered some of the copies which had escaped the fire, but brought with them to London the presses, types, and printers. This importation enabled Grafton and Whitchurch to print, in 1539, what is called Cranmer's, or 'The Great Bible,'

in which Coverdale compared the translation with the Hebrew, corrected it in many places, and was the chief overseer of the work. Coverdale was almoner, some time afterwards, to queen Catharine Parr, the last wife of Henry VIII, at whose funeral he officiated in the chapel of Sudeley Castle, in Gloucestershire, in 1548. On August 14, 1551, he succeeded Dr. John Harman, otherwise Voysey, in the see of Exeter" (*English Cyclopædia*). On the accession of Queen Mary, he was ejected from his see and thrown into prison. On his release, at the end of two years, Coverdale repaired to Denmark, and afterwards to Wesel, and finally to Geneva, where he joined several other exiles in producing that version of the English Bible which is usually called "The Geneva Translation," part of which, the New Testament, was printed at Geneva in 1557 by Conrad Badius, and again in 1560. On the accession of queen Elizabeth Coverdale returned from exile; but having imbibed the principles of the Geneva reformers, as far as respected the ecclesiastical habits and ceremonies, he was not allowed to resume his bishopric, nor was any preferment offered to him for a considerable time. In 1563 bishop Grindal recommended him to the bishopric of Llandaff; but it is supposed that Coverdale's age and infirmities, and the remains of the plague, from which he had just recovered, made him decline so great a charge. In lieu of it, however, the bishop collated him to the rectory of St. Magnus London Bridge. He resigned this living in 1566. The date of his death has been variously stated. The parish register of St. Bartholomew, behind the Royal Exchange, however, proves that he was buried Feb. 19, 1568. His principal writings have been recently republished in England by the Parker Society, under the titles of "*Writings and Translations of Miles Coverdale*, edited by G. Pearson" (Camb. 1844, 8vo); "*Remains of Miles Coverdale*, edited by G. Pearson" (Cambridge, 1846, 8vo). See Bagster, *Memorials of Coverdale;* Johnson, *English Translations of the Bible;* Hook, *Eccles. Biography*, iv, 209.

Covering OF THE EYES, a phrase of much disputed signification, occurring in the expression כְּסוּת עֵינַיִם הוּא־לָךְ, *he* (or *this*) [shall be] *to thee a covering of the eyes* (Gen. xx, 16; Sept. ταῦτα ἔσται σοι εἰς τιμὴν τοῦ προσώπου σου; Vulg. *hoc erit tibi in velamen oculorum*), which is usually understood to refer to a *veil* that ought to have been worn by Sarah to hide her dangerous beauty, and which either her husband (if הוּא be masc.) or the present (if neuter) would furnish. See ABRAHAM. Against this interpretation, however, there lies this objection, that such a piece of apparel, in modern Oriental usage, covers rather the *face* or person, and leaves the eyes free. See WOMAN. Hence many commentators (but see Rosenmüller, in loc.) explain the phrase as an idiomatic one for a peace-offering (see Gesenius, *Thes. Heb.* p. 700) or propitiatory present (comp. Gen. xxxii, 21; Exod. xxiii, 8; Job ix, 24; in none of which passages, however, does this expression precisely occur); but this does not so well suit the difficult context, "unto all that are with thee," since her companions had no cause of complaint, and a reproof would then have been inapposite. We may therefore recur to the explanation of Kitto (*Pict. Bible*, note in loc.): "It is customary for all the women inhabiting towns to go about closely veiled; while all the women of the different pastoral people who live in tents do not commonly wear veils, or at most only so far as to cover their foreheads and lower parts of the face, leaving the countenance exposed from the eyebrows to below the nose. Abimelech, according to this view, intended to give the very sensible advice, that while Sarah and her women were in or near towns, they had better conform to the customs of towns, and wear the complete veil, instead of that partial covering which left *the eyes* and so much of the face exposed" (see also his *Daily Bible Illustrations*, in loc.). At the same time, there appears to be a refined allusion to the other meaning of the phrase in question, by one of those plays upon words so frequent in these early narratives. Hence the terseness of the whole phraseology. See VEIL.

COVERING THE HEAD IN PRAYER (1 Cor. xi, 4–6). See VEIL. (Buchner, *De ritu caput retegendi*, Viteb. 1703; Zeibich, *De moralitate ritus caput operiendi*, ib. 1704; Bergier, *De ritu capitis operiendi*, ib. 1703; Mallincrott, *id.* Lips. 1734). See PRAYER.

Covert, prop. some form of the verb סָתַר, *sathar'*, to *hide:* namely, סֵתֶר, *se'ther*, a *shelter* (1 Sam. xxv, 20; Job xl, 21; Psa. lxi, 4; Isa. xvi, 4; xx, 2; elsewhere usually "secret place"); מִסְתּוֹר, *mistor'*, *protection* (Isa. iv, 6); elsewhere some form of the verb סָכַךְ, *sakak'*, to *weave:* namely, מוּסָךְ, *musak'* (text מֵיסָךְ, *meysak'*), a covered walk or *portico* (Sept. Σεμέλιον, apparently reading מוּסָד, Vulg. *musæch*); סֹךְ, *sok*, a *lair* (Jer. xxv, 8; "den," Psa. x, 9; elsewhere a *hut*, "pavilion," Psa. xxvii, 5; "tabernacle," Psa. lxxvi, 2); סֻכָּה, *sukkah'* (Job xxxviii, 40), a *booth* (as elsewhere usually rendered). This term is generally applied to a *thicket* for wild beasts, but in 2 Kings xvi, 18, we read that Ahaz, when spoiling the Temple, "took down the *covert* (מוּסָךְ, *musak'*) for the Sabbath that they had built in the house;" which bishop Patrick imagines was "a covered place, where the king sat, in the porch of the Temple, or at the entrance of it, upon the Sabbath, or other great solemnities. Ahaz took this away, intending, probably, not to trouble himself with coming to the Temple any more, but to sacrifice elsewhere." See COURT. It rather designates a cloister, shaded from the heat of the sun for the accommodation of the courtly worshippers (Thenius, in loc.), such as we know ran around the interior of the Temple in later times. See TEMPLE.

Covetousness (בֶּצַע, *be'tsa*, *rapine*, *lucre;* πλεονεξία, a *grasping* temper), in a general sense, means all inordinate desire of worldly possessions, such as undue thirst for honors, gold, etc. In a more restricted sense, it is the desire of increasing one's substance by appropriating that of others. It is a disorder of the heart, and closely allied to selfishness. We here consider it under its more restricted aspect.

1. Covetousness (πλεονεξία, φιλαργυρία) is a strong, sometimes irresistible desire of possessing or of increasing one's possessions. It is evident that under its influence the heart, instead of aspiring to noble, high, and divine goods, will be brought to the almost exclusive contemplation of earthly, material things; and thus, instead of becoming gradually more closely united with God, will become more and more estranged from him. Since where the treasure is there the heart is also, the heart of the covetous cannot be with God, but with Mammon; he is not a servant of God, but of idols. The love of God and the love of Mammon cannot find place in the same heart; the one excludes the other (Matt. vi, 24; Luke xvi, 13; Col. iii, 5, *Mortify therefore your members which are upon the earth: fornication, uncleanness, inordinate affection, evil concupiscence, and covetousness, which is idolatry*). But since to love God is our highest duty, and God alone is to be prayed to, loved, and trusted, the covetous man, as a servant of Mammon, is forever excluded from the kingdom of Christ and of God (1 Cor, vi, 10, *Nor thieves, nor covetous, shall inherit the kingdom of God;* Eph. v, 5, *For this ye know, that no whoremonger, nor unclean person, nor covetous man, who is an idolater, hath any inheritance in the kingdom of Christ and of God*). We are further told that the citizen of the kingdom of God is to lay up riches in heaven (Matt. vi, 20); he must be

content with food and raiment (1 Tim. vi, 7, 8); but the covetous act in opposition to all these commandments (Heb. xiii, 5, *Let your conversation be without covetousness* [ἀφιλάργυρος ὁ τρόπος]; *and be content with such things as ye have: for he hath said, I will never leave thee nor forsake thee*). This state of the heart is very dangerous, for covetousness is the source of all evil, and brings forth all manner of sin (1 Tim. vi, 9, 19, *For the love of money is the root of all evil; which while some coveted after they have erred from the faith, and pierced themselves through with many sorrows*). Here the *folly* of covetousness is also shown, inasmuch as it is said to bring "many sorrows." It is further proved by the fact that earthly goods are perishable, and that their possession renders none happy. But it is *corrupting* as well as unsatisfactory. By attempting to gain the world the soul is wounded, and loses the everlasting life (Matt. vi, 20, *Lay up for yourselves treasures in heaven, where neither moth nor rust doth corrupt, and where thieves do not break through nor steal;* xvi, 25, 26, *For whosoever will save his life shall lose it, and whosoever will lose his life for my sake shall find it; for what is a man profited if he shall gain the whole world and lose his own soul, or what shall a man give in exchange for his soul?*); Luke xii, 15–21, *And he said unto them, Take heed, and beware of covetousness; for a man's life consisteth not in the abundance of the things which he possesseth*).

2. *Avarice* is also a part of covetousness. It consists in amassing either for the sake of possessing or from fear of future want. This phase of covetousness is the surest mark of a cold-heartedness and worldliness, making pure, high, and holy aspirations impossible. It is also a sort of idolatry, for it is the love of mammon (Matt. vi, 19–24). It is essentially uncharitable, and incapable of affection (James ii, 15, 16, *If a brother or sister be naked, and destitute of daily food, and one of you say unto them, Depart in peace, be ye warmed and filled; notwithstanding ye give them not those things which are needful to the body, what doth it profit?*). Covetousness is as painful as it is deceitful in the end; it cripples the natural powers, renders life miserable and death terrible. The pursuits to which it leads are painfully laborious, and the care of the possessions, once secured, is equally so. The labor it entails is sinful, as it does not spring from love, but from selfishness and worldliness. As the wealth amassed by the covetous is applied to the benefit neither of themselves nor of others, they undergo the severest privations in the midst of plenty (Horace, *congestis undique saccis indormis inhians. Nescis quo valeat nummus, quem præbeat usum*). However great the natural power of a man, it is paralyzed by this sin. To the covetous death is horrible, as it deprives them of all to which the worldly heart most clings.

Considering the nature of covetousness, it cannot appear strange that the apostle particularly recommends a *bishop* to avoid that sin. The bishop, or spiritual head of the community, is to be spiritual (πνευματικός), the centre of the Christian life of the community (1 Tim. iii, 2, 3); and covetousness is a mark whereby false teachers may be known (2 Tim. iii, 2).—Krehl, *N. T. Handwörterbuch.*

Cow occurs in the Auth. Vers. (see KINE) as the translation of פָּרָה (*parah'*, Job xxi, 10; Isa. xi, 7; elsewhere usually "kine"), עֶגְלָה (*eglah'*, Isa. vii, 21, "a *young* cow"), a *heifer* (as usually elsewhere), בָּקָר, (*bakar'*, "kine," Deut. xxxii, 14; 2 Sam. xvii, 29; "cow"-dung, Ezek. iv, 15; a young "cow," Isa. vii, 21), any animal of the ox kind (elsewhere "bullock," "herd," etc.), and שׁוֹר (*shor*, Lev. xxii, 28; Num. xviii, 17), any beef animal (usually an "*ox*"). See BULL; CATTLE; OX. The first of the above Heb. words (generally found in the plur. פָּרוֹת, *paroth'*, rendered "kine" in Gen. xli, 2, 3, 4, and "heifer" in Num. xix, 2), properly signifies a heifer or young cow in milk (1 Sam. vi, 7); also as bearing the yoke (Hos. iv, 16). In Amos iv, 1, the phrase "kine or heifers of Bashan" is used metaphorically for the voluptuous females of Samaria. See BASHAN.

By the Mosaic law (Lev. xxii, 28), a cow and her calf were not to be killed on the same day. Similar precepts are found in Exod. xxiii, 19; Deut. xxii, 6, 7. Whether they were designed to prevent inhumanity, or referred to some heathen custom, is uncertain. The cow is esteemed holy by the Hindoos. In the remarkable prophecy (Isa. vii, 21–25), the event foretold is, that the face of the land of Judah should be so completely changed, and the inhabitants so greatly reduced in number, that, with only a single young cow, and two sheep, a family should be supplied with an abundance of milk and butter; and vineyards, which before commanded a high rent, should be overgrown with briers and thorns. It may be observed that dried cow-dung was, in Palestine, commonly used for fuel, as it is at the present day among the Arabs, but it is remarkably slow in burning; on this account the Arabs frequently threaten to burn a person with cow-dung as a lingering death. This fuel forms a striking contrast to the short-lived and noisy violence of thorns and furze, which are speedily consumed with a "crackling" noise (Eccl. vii, 6). Roberts, on Ezek. iv, 15, observes: "In some places, firewood being very scarce, the people gather cow-dung, make it into cakes, and dry it in the sun, after which it is ready for fuel. Those who are accustomed to have their food prepared in this way prefer it to any other; they tell you it is sweeter and more holy, as the fuel comes from their sacred animal." See DUNG.

Coward, WILLIAM, M.D., was born at Winchester, 1657, and became fellow of Wadham College, Oxford. He settled first at Northampton, and afterwards at London, where he died in 1724. In 1702 he published *Second Thoughts concerning the Human Soul, demonstrating that the notion of the human soul, as believed to be a spiritual and immaterial substance united to a human, was an invention of the heathens.* This work gave so much offence, by defending the doctrine of materialism, that the House of Commons ordered it to be burned by the hangman. It was answered by Dr. Nichols, in his *Conference with a Theist;* by Broughton, in his *Psychologia;* and by Turner. Dr. Coward also published, in 1704, *Further Thoughts on Second Thoughts;* and *The Grand Essay, or a Vindication of Reason and Religion against the Impostures of Philosophy.*—Darling, *Cyclopædia Bibliographica*, i, 795.

Cowl (*cucullus*), a sort of hood worn by certain classes of monks. Those worn by the Bernardines and Benedictines are of two kinds: the one white, very large, worn in ceremony, and when they assist at the office; the other black, worn on ordinary occasions and in the streets. Mabillon maintains that the cowl is the same in its origin as the scapular (q. v.). Others distinguish two sorts of cowls; the one a gown, reaching to the feet, having sleeves, and a capuchin, used in ceremonies; the other a kind of hood to work in, called also a scapular, because it covers only the head and shoulders.—Farrar, *Eccl. Dict.* s. v.; Bingham, *Orig. Eccl.* vii, 3, 6.

Cowles, GILES HOOKER, D.D., a Congregational minister, was born in Farmington, Conn., Aug. 26, 1766. He graduated at Yale in 1789, entered the ministry in May, 1791, and was installed pastor of the First Church at Bristol in 1792. He was appointed in 1810, by the Conn. Miss. Soc., to travel through the Northern part of Ohio. He accepted the position of pastor over the churches of Austinburgh and Morgan, Ohio, and was installed in 1811. He died in the former place July 6, 1835. He was made D.D. by Williams College, 1823.—Sprague, *Annals*, ii, 330.

Cowper, William, an eminent Scotch divine, was born at Edinburgh in 1566. He studied at the University of St. Andrews, and in 1585 was appointed minister of Bothkenner, Sterlingshire. In 1593 he removed to Perth, where he continued until 1612, after which he was appointed bishop of Galloway. He died Feb. 15, 1619. His works breathe a spirit of cordial piety, and the simplicity and strength of his style are peculiarly worthy of commendation. Among them we remark *Heaven Opened* (5th ed., Lond. 1619, 4to). A collection of his works was published after his death (Lond. 1629, fol.).—*Fasti. Eccles. Scot.* i, 777; ii, 615, 693.

Cox, Francis Augustus, D.D., LL.D., an eminent English Baptist minister, was born about 1783. He was pastor at Hackney, London, and was one of the leading men in many of the religious societies of the metropolis. Of his works the most important are the *History of the Baptist Missions*, a volume on *Antiquities*, reprinted from the *Encyclopædia Metropolitana; Our Young Men*, a prize essay (1847); and a *Life of Melancthon.* He was a contributor to the first series of the *Journal of Sacred Literature.* His name is worthy of being associated with those of Ryland, Fuller, Carey, Marshman, Ward, Robert Hall, and John Foster, who in recent times have brought honor on the Baptist denomination by their literary as well as their religious labors. He died Sept. 5, 1853.

Cox, Melville Beveridge, a Methodist Episcopal missionary to Africa, was born at Hallowell, Me., Nov. 9, 1799; was converted in 1818; entered the ministry in 1822; on account of failing health was superannuated from 1825 to 1831; and afterwards served some time as agent of the Wesleyan University. In 1831 he was stationed at Raleigh, N. C. Soon afterwards he volunteered to go to Africa as a missionary, and sailed from Norfolk, Va., November 6, 1832, arriving in Liberia March 8, 1833. Here at once he set to work to lay the foundations of the Church in Africa. He labored faithfully, organizing the mission, collecting information, and preaching and teaching incessantly. In a few months he had formed a school of 70 scholars; but the African fever seized him, and on the 21st of July, 1833, after four months' labor, he died in triumph. Mr. Cox was a man of great piety and devoted zeal.—*Meth. Mag. and Quart. Review*, Jan. 1834; *Amer. Miss. Memorial*, p. 431; Cox, G. F., *Life and Remains of M. B. Cox* (N. Y. 18mo); Sprague, *Annals*, vii, 656.

Cox, Richard, bishop of Ely, was born about 1500, at Whaddon, Buckinghamshire, England. He was educated at Eton School and at King's College, where he obtained a fellowship in 1519. He was invited by cardinal Wolsey to Oxford to fill up his new foundation. For speaking his mind too freely of the corruptions of popery, he was deprived of his preferment and thrown into prison. When he had recovered his liberty he left Oxford; some time after he was chosen master of Eton School, which flourished remarkably under him; and by the interest of archbishop Cranmer he obtained several dignities in the Church, viz., the archdeaconry of Ely, a prebend of the same church and of Lincoln, and the deanery of Christ Church. He was appointed tutor to prince Edward, and on that prince's accession to the throne became a great favorite at court. He was made a privy councillor and the king's almoner; was elected chancellor of the University of Oxford in 1547; the next year installed canon of Windsor, and the year following dean of Westminster. About this time he was appointed one of the commissioners to visit the University of Oxford, and is accused by some of abusing his authority by destroying many books out of his zeal against popery. After Mary's accession he was stripped of his preferments and committed to the Marshalsea; but his confinement was not long, and on his release he went to Strasburg, and thence to Frankfort, where he formed a kind of university, and appointed a Greek and a Hebrew lecturer, a divinity professor, and a treasurer for the contributions remitted from England. On the death of Mary he returned, and was the chief champion on the Protestant side in the disputation at Westminster between eight papists and an equal number of the Reformed clergy. His abilities and zeal were rewarded by the bishopric of Ely, over which see he presided above 21 years. He opposed with great zeal the queen's retaining the crucifix and lights in her chapel, and was a strenuous advocate for the marriage of the clergy, against which she had contracted a strange aversion. He was one of the compilers of the Liturgy of the Church of England; and when a new translation of the Bible was made in the reign of Elizabeth, now commonly known by the name of "The Bishop's Bible," the Four Gospels, the Acts of the Apostles, and the Epistle to the Romans were allotted to him for his portion. A number of his tracts on the Romish controversy are to be found in the addenda to Burnet's *History of the Reformation.* Several letters and small pieces of his have been published by Strype in his *Annals of the Reformation.*—Downe, *Life of Bishop Cox;* Collier, *Ecclesiastical History;* Kippis, *Biographia Britannica*, iv, 396 sq.

Coz (Heb. קוֹץ, *Kots*, the same name elsewhere Anglicized Koz [q. v.], Sept. Κωέ), the father of Anub and others of the posterity of Judah (1 Chron. iv, 8, where, however, his own parentage is not stated, unless he be a son or brother of Ashur in ver. 5). B.C. post 1618.

Coz'bi (Heb. כָּזְבִּי, *Kozbi'*, *false;* Sept. Χασβί; Joseph. Χοσβία, *Ant.* iv, 6, 10), the daughter of Zur, a Midianitish prince. Phinehas, in his holy indignation, slew her, while in the act of committing lewdness with Zimri, an Israelitish chief, by thrusting a javelin through the middle of both (Num. xxv, 15, 18). B.C. 1619.

Cozri. See Kozri.

Crackling (קוֹל, *voice*, i. e. noise) of thorns (q. v.) under a pot; a proverbial expression for a roaring but quickly-extinguished fire (Eccles. vii, 6). See Fuel.

Cracknel (only in the plur. נִקֻּדִּים, *nikkuddim'*, literally cakes *marked with points*), probably a kind of biscuit or other cake baked hard and punctured with holes, such as Jeroboam's wife took in disguise

Modern Oriental Pastry-cook.

(they being of a very common description) as a present to the prophet Ahijah (1 Kings xiv, 3, where the Sept. has κολλυρίς, Vulg. *crustula*). See BREAD. The original word (in nearly the same form) occurs in Josh. ix, 5, 12, where it is improperly rendered "mouldy" (q. v.). See CAKE.

Cradock, Samuel, B.D., an eminent Noncomformist, was born in 1620, and was educated at Emmanuel College, Cambridge, of which he became fellow. He was presented to the college living of North Cadbury, but ejected for nonconformity in 1662, and retired to an estate at Wickham Brook which had been left to him. He died in 1706. He was a man of serious and truly catholic spirit, solid judgment, digested thought, clear method, and unaffected style. His works have been greatly commended by archbishop Tillotson and bishop Reynolds. Dr. Doddridge says that no author assisted him more in what relates to the New Testament. His principal works are, *The History of the O. T. methodized* (Lond. 1683, fol.):—*The Harmony of the Four Evangelists* (Lond. 1688, fol.):—*The Apostolical History, with an Analytical Paraphrase* (Lond. 1672, fol.):—*Knowledge and Practice* (4th ed., with eight new chapters, Lond. 1702, fol.).—Darling, *Cyclop. Bibliog.* s. v.

Cradock, Walter, an eminent English divine, was born at Trefala, Monmouthshire. He was educated at the University of Oxford, joined the Puritans, and became curate of St. Mary's, Cardiff. During the civil wars he became pastor of Allhallows the Great, London, and occasionally itinerated through Wales. He died in 1660. He was an Independent in Church government—a man of excellent character and high reputation; in doctrine, he was zealous in preaching justification by imputed righteousness. His principal works are, *Gospel Libertie in the Extensions and Limitations of it* (Lond. 1648, 4to):—*Divine Drops distilled from the Fountain of Holy Scriptures* (Lond. 1650, 4to):—*Gospel Holinesse* (Lond. 1651, 4to). A collection of his works has been published (Chester, 1800, 8vo).—Darling, *Cyclop. Bibliog.* s. v.

Craftsman (חָרַשׁ, *charash'*, Deut. xxvii, 25; 2 Kings xxiv, 16; Hos. xiii, 2; elsewhere "engraver," "workman," etc.; חֶרֶשׁ, *che'resh*, Neh. xi, 35; "cunning," Isa. iii, 3; "secretly," Josh. ii, 1; "Charashim," 1 Chron. iv, 14; both from חָרַשׁ, *charash'*, to *carve* in stone, hence to be an *artificer* in general; τεχνίτης, Acts xix, 24, 38; Rev. xviii, 22; "builder," Heb. xi, 10; an *artisan*), a workman at any mechanical employment requiring skill. See MECHANIC. Persons of this class professionally (for every Jew was required to learn some manual trade, to fall back upon in case of want) seem to have congregated in a special street or bazaar (q. v.) in the environs of Jerusalem (1 Chron. iv, 14, where it is called a valley), or rather in the vicinity of Lod (Neh. xi, 35); regarded by Dr. Robinson (*Phys. Geogr. of Palest.* p. 113) as the plain of *Beit Nuba*, or rather a side valley opening into it. See CHARASHIM.

Modern Oriental Turner.

Craig, JOHN, one of the Scottish Reformers, was born in Scotland about 1512. "Having spent some time as a tutor in England, he returned to Scotland and entered the Dominican order, of which he had not long been a member when he fell under the suspicion of heresy, and was cast into prison. On his release he travelled on the Continent; and after some time was, through cardinal Pole's influence, intrusted with the education of the novices in connection with the Dominican order at Bologna. While here, Calvin's *Institutes* fell in his way, and converted him to Protestant doctrines. Having openly avowed the change in his opinions, he was brought before the Inquisition, and sentenced to be burnt—a fate from which he was saved by the mob, on the death of pope Paul IV, breaking open the prisons in Rome, and setting the prisoners at liberty. Craig escaped to Vienna, and obtained some favor at the court of Maximilian II; but the news of his being there reached Rome, and the pope demanded his surrender as one condemned for heresy. The emperor, however, instead of complying with the request of his holiness, gave Craig a safe-conduct out of Germany. He now returned to Scotland, and was appointed the colleague of John Knox in the parish church of Edinburgh. Thinking the marriage of queen Mary and Bothwell contrary to the Word of God, he, while holding this position, boldly refused to proclaim the banns. In 1572 Craig was sent 'to illuminate the dark places' in Forfarshire and Aberdeenshire, and remained in the North until 1579, when he was appointed minister to king James VI in Edinburgh. He now took a leading part in the affairs of the Church, was the compiler of part of the Second Book of Discipline, and the writer of the National Covenant signed in 1580 by the king and his household. He was a man of great conscientiousness, and was not slow to oppose the proceedings of the court when he deemed them opposed to Scripture, and to speak wholesome but unpleasant truths to his majesty himself. He died December, 1600."

Crakanthorp, RICHARD, D.D., was born at Strickland, in Westmoreland, in 1567. He was admitted to Queen's College, Oxford, in 1583, and became fellow in 1598. He obtained the rectory of Black Notley, Essex, and died in 1624. He had the reputation of being a general scholar, was quite a canonist, perfectly acquainted with ecclesiastical antiquity and scholastic divinity, and was a celebrated preacher. His principal works are, *Defensio Ecclesiæ Anglicanæ contra M. Antonii de Dominis, D. Archiepiscopi Spalatensis, injurias* (new edit. in *The Library of Anglo-Catholic Theology*, Oxf. 1847, 8vo):—*Rome's Seer overseene* (Lond. 1631, fol.):—*The Defence of Constantine, with a Treatise of the Pope's temporal Monarchie* (Lond. 1621, 4to).—Darling, *Cyclopædia Bibliographica*, s. v.

Cramer, JOHANN ANDREAS, a German theologian and poetical writer, was born at Josephstadt, Saxony, Jan. 29, 1723. He studied at Leipsic, was invited to Copenhagen by Frederick V, and, with the exception of three years, resided in Denmark from 1754 to 1788, in which latter year he died. At the time of his death he was chancellor of the University of

Kiel. He translated Bossuet's Universal History, the Homilies of St. Chrysostom, and the Psalms of David into verse (Leips. 1755), and wrote the *Northern Spectator* (Der nordische Aufseher), three vols. (Copenhagen, 1758); *Sermons*, twenty-two vols.; and *Poems*, three vols. (1782). Germany ranks him among her best lyric poets.

Crane occurs in our version as the translation of סוּס (*sus*, literally a *leaper*, from its swiftness, Isa. xxxviii, 14) or סִיס (*sis*, Jer. viii, 7), in connection with another bird, the עָגוּר (*agur'*, the *chatterer*, or, as Gesenius renders it in Isaiah, the *chattering*, as an epithet of the other), which latter is rendered "swallow" in our version. The Rabbins agree with our version in rendering the former of these words (*sus* or *sis*) by "crane;" but Bochart and Gesenius (in accordance with the Sept., Theod., and Vulg.), more correctly, as we think, decide in favor of "swallow;" while Luther, rejecting both, prefers "heron." Where so much diversity of opinion reigns, it will be most safe to search for the true meaning by examining the internal evidence furnished by the texts in question, the two names occurring in no other instance. In Isaiah, allusion is made to the voice of both the species (if distinct), which is described by the verb "to chatter," in accordance, or nearly so, with all critical authorities. See SWALLOW. In Jeremiah, where both names occur in the same order, the birds are represented as "observing the time of their coming." Now, if the "crane" of Europe had been meant by either denomination, the clamorous habits of the species would not have been expressed as "chattering;" and it is most probable that the striking characteristics of that bird, which are so elegantly and forcibly displayed in Hesiod and Aristophanes, would have supplied the lofty diction of prophetical inspiration with associations of a

Crane (*Grus Cinerea*).

character still more exalted. *Sus* or *sis* is the name of a fabulous long-legged bird in Arabian legends, but it also indicates the expressive sound of the swallow's voice, while *agur* is transferred with slight alteration to the stork in several northern tongues. The Teuticon *aiber*, Dutch *oyevaer*, Esthonian *aigr* and *aigro*, therefore support the view that the latter term is a tribal epithet of one of the great wading birds; but neither the Hebrew text nor the Teutonic names point to the crane of Europe (*Ardea grus*, Linn., *Grus cinerea* of later ornithologists), since that species has a loud trumpet voice, and therefore does not "chatter;" but especially because in its migrations it crosses the Mediterranean into Africa, and does not appear in Palestine, unless by accident (driven thither possibly by a western storm of wind); and when a troop of cranes alight under these circumstances, it is only for a moment; they do not give evidence of purposely assembling like the swallow. Thus the few characteristics indicated might seem to point out the stork, which does assemble in Syria in flocks before its departure, and is not a clamorous bird, having little or no voice But as the stork is clearly designated by a different appellation in the original [see STORK], we must search for another species as the representative of the *sus*, or at least of the latter term; and we fortunately find one which completely answers to the conditions required; for, being neither a genuine crane, a stork, nor a heron, having a feeble voice, and striking, but distinct manners, it is remarkable for beauty, numbers, residence, and periodical arrival and departure. The Numidian crane (*Ardea virgo* of Linn., the *Grus virgo* of later writers, and *Anthropoides virgo* of some)

Numidian Crane (*Grus Virgo*).

is the bird, we have every reason to conclude, intended by "agur," though not coming from the north, but from Central Africa, down the Nile (the very circumstance which puzzled Hasselquist), and in the spring arriving in Palestine, while troops of them proceed to Asia Minor, and some as far north as the Caspian. They are frequently found portrayed on Egyptian monuments, and the naturalist just quoted, who saw them on the Nile, afterwards shot one near Smyrna: they visit the swamp above that city, and the lake of Tiberias, and depart in the fall, but do not utter the *clangor* of the crane, nor adopt its flight in two columns, forming an acute angle, the better to cleave the air. This bird is not more than three feet in length; it is of a beautiful bluish gray, with the cheeks, throat, breast, and tips of the long hinder feathers and quills black, and a tuft of delicate white plumes behind each eye. It has a peculiar dancing walk, which gave rise to its French denomination of "demoiselle" (see the *Penny Cyclopædia*, s. v. Herons). See BIRD.

The Hebrew term *sus* occurs frequently elsewhere, but only in the sense of "horse" or *cavalry*.

Crane, JOHN, D.D., a Congregational minister, was born at Norton, Mass., March 26, 1756. He graduated at Harvard in 1780, and was installed pastor at Northbridge, Mass., June 25, 1783, where he remained until his death, Aug. 31, 1836. He published *Eight Discourses on Baptism* (1806) and a few occasional sermons.—Sprague, *Annals*, ii, 214.

Cranmer, THOMAS, archbishop of Canterbury, and one of the greatest of the English reformers, was born at Aslacton, Nottinghamshire, July 2, 1489. He entered Jesus College in 1503, became a fellow in 1510-11, studied Greek, Hebrew, and theology with great diligence, and acquired high repute for scholarship. He forfeited his fellowship by an early marriage, but his wife died within a year, and he was restored. In 1523 he took the degree of D.D. In 1528 he was at Waltham Abbey, the seat of Mr. Cressy, educating that gentleman's children. Here he met Gardiner and Fox, who asked his opinion as to Henry VIII's di-

vorce. His reply was made known to the king, and gave him so much satisfaction that he sent for Cranmer, who reluctantly obeyed the summons, and reduced his opinion to writing. "It asserted that the marriage of Henry with his brother's widow was condemned by the Scriptures, the councils, and the fathers; and that the pope had no power to give a dispensation for that which was contrary to the word of God." Pains were taken to make this judgment known. Cranmer himself disputed upon it at Cambridge, and brought several over to his opinion. He was appointed chaplain to the king, presented to the archdeaconry of Taunton, and joined the embassy to Rome about the close of 1529. The ambassadors, finding all arguments unavailing with pope Clement, quickly returned, leaving Cranmer in Italy. The pope conferred on him the empty title of "Supreme Penitentiary." Wearied with delays, Cranmer left Italy in 1530, and went afterwards, on the same business, to France and Germany—an expedition which, although it produced no decisive public result, led to an event of great consequence to himself. Regardless of the Romish injunction for clerical celibacy, he married (1532) a second time, the object of his choice being the niece of Osiander, the pastor of Nuremberg. This secret act exposed him to many unworthy evasions. He was soon after made archbishop of Canterbury, and when consecrated (March 30, 1533), made a public protestation, "That he did not intend by this oath to restrain himself from anything that he was bound to either by his duty to God, or the king, or the country." "By this," says Burnet (*Hist. Reformation*, vol. i), "if he did not wholly save his integrity, yet it was plain he intended no cheat, but to act fairly and aboveboard." On the 23d of May, 1533, Cranmer declared the king's marriage void. Five days afterwards he publicly married the king to Anne Boleyn, a private marriage having taken place in the January previous. The business of his office and parliamentary duty now occupied his time. With his assistance were passed several statutes, by which the power of the pope in England was materially diminished; the Convocation and universities assented to these statutes, pronouncing that "the bishop of Rome has not any greater jurisdiction conferred on him in this realm of England than any other foreign bishop."

In 1534, with the consent of the Convocation, he set on foot a translation of the Bible, by dividing Tyndale's version of the New Testament into nine or ten parts, which he required the most learned bishops to revise; the translation was completed and ultimately printed at Paris. In 1535 he assisted in the second edition of the "King's Primer," a book containing doctrines bordering upon Protestantism. In 1536 the divorced queen died, and Henry, being now tired of Anne Boleyn, determined to get rid of her, and Cranmer a second time served the bad passions of the king, and, in virtue of his office, pronounced the marriage void (1536). The pope threatened to assemble a synod to censure Henry. Cranmer and others signed a declaration that the king need not obey the decisions of such an assembly. With the assistance of many eminent divines, Cranmer arranged the "*Bishops' Book*," inculcating the doctrines of the Reformers. The king, to whom this book was submitted, himself inserted some corrections, from which the archbishop was bold enough to dissent. The destruction of the greater abbeys was now rapidly proceeding, and the funds which arose from them were lavished by Henry upon unworthy favorites, until Cranmer, who had hoped to apply them to the promotion of religion and education, remonstrated against their improper application. A sum of money was obtained for the foundation of some new bishoprics, but the king's prodigality could be checked no further. From 1538 to 1544 the mind of Henry VIII was against progress in the Reformation. On the 5th of May, 1538, Cranmer and others were appointed commissioners "to inquire" (Le Bas, vol. i, 204) "into the debated doctrines, and to prepare such articles as would pacify the spirit of controversy." At the end of eleven days the labors of the commissioners coming to no result, the duke of Norfolk offered six articles (Burnet, vol. i) for the consideration of the House of Lords. Cranmer's opinion agreed only with one of these articles, but they were passed (see ARTICLES, SIX). Latimer and Shaxton resigned their bishoprics, an example which Cranmer did not think it his duty to follow. In July, 1540, he presided at the Convocation which pronounced the unjustifiable dissolution of the marriage between Henry and Anne of Cleves. The misconduct of Catharine Howard, whom Henry had married, coming to the knowledge of the archbishop, he reported her profligacy to the king (1541). The proofs of her crimes were held to be conclusive; she was condemned and executed. The Reformation now (1542) became the sole occupation of Cranmer, who had transferred to the universities the task of revising a new edition of the Bible published the year before. In a minor degree Cranmer's attention was occupied in reproving the luxury in which some ecclesiastical establishments, as well as the bishops, had indulged.

In May, 1543, appeared the "*King's Book*," which was, in fact, little more than a new edition of the *Institution of a Christian Man*, altered in some points by the papal party; it received its name from the preface, which was written in Henry's name. The clergy being hostile to this book, Cranmer, at a visitation of his diocese, in submission to the king's supremacy, forbade them from preaching against any portions of it, however they or he himself might dissent from them. In 1544 Cranmer carried through Parliament a bill to mitigate the severity of the "Six Articles." He also assisted in compiling an improved English Litany, essentially similar to that which is now in use. Difficulties, however, were increasing around him. The duke of Norfolk and other members of the privy council accused him of spreading heresies through the land, and Henry caused Sir Anthony Denny to carry a message to Cranmer, who rose from his bed to attend upon the king at Whitehall. The council assembled next day, and summoned the primate. Sentence of imprisonment was passed upon him, but, to their confusion, he produced the signet of the king, from whose hands he had received it the night before. The council did not venture to proceed further.

King Henry died 27th January, 1547. Cranmer was named one of the regents of the kingdom. On the accession of Edward, all things indeed betokened a further extension of the Reformation. A visitation was immediately set on foot; twelve homilies, four of which are ascribed to Cranmer, were drawn up, and ordered to be placed in every church, with the translation of Erasmus's paraphrase of the N. T., for the instruction of the people. Gardiner continued to oppose the Reformation, but Cranmer's influence prevailed; and when he produced in convocation an ordinance that the laity as well as the clergy should receive the sacrament in both kinds, the proposition passed unanimously, and soon after obtained the sanction of the Legislature. In 1548 he revived the proposal for substituting a communion office for the mass, and a service was framed in time to be circulated to the clergy for their use at the following Easter. A translation of a catechism, written in German and Latin by Justus Jonas, was published by the archbishop, entitled *Cranmer's Catechism*. In the month of May a commission of twelve divines, with Cranmer at their head, was appointed for the compilation of an English liturgy. See COMMON PRAYER; LITURGY. On the condemnation of Lord Seymour (1549), Cranmer signed the warrant for his execution, notwithstanding the canon law that no churchman should meddle in matters of blood. Bonner, bishop of London, was now

degraded by commissioners, of whom Cranmer was one. An addition was made to the ritual in the shape of a formulary for ordination, and other steps were taken by the primate in order to diffuse a better knowledge of the creed of the Protestants. At Lambeth he received the most eminent foreign divines, Martin Bucer, Fagius, Peter Martyr, and several more. Cranmer was greatly troubled at the discussions respecting the substitution of tables for altars in the churches. In July, 1550, Hooper was made bishop of Gloucester, and soon after Cranmer received from him a refusal to wear the episcopal habits. Cranmer, upon consideration, determined to oppose Hooper, and, in case he persisted, to remove him from his bishopric. Hooper adopted some of the usual habits. The bishop of Chichester would not obey the order respecting the removal of altars, and the primate consequently deprived him of his see. Bishop Gardiner, who had now been in prison nearly two years, was deprived of his bishopric and sent back to the Tower. The conduct of Cranmer in the cases of Bonner and Gardiner was a great exception to his usual moderation. Gardiner, during his imprisonment, occupied himself in answering a treatise published by Cranmer, entitled the *Defence of the True Doctrine of the Sacrament*. This controversy was carried on by the archbishop until the end of his life. A revision of the "Service-book" of 1548 was commenced by Cranmer, with the assistance of Ridley and Cox, Peter Martyr and Bucer. The undertaking was checked in 1551 by the death of Bucer. The bishops being now (1551) for the most part divines favorable to the Reformation, the compilation of articles for the greater uniformity of faith was undertaken by them at the suggestion of the king. This labor so filled the hands of Cranmer, that his time was nearly always occupied by one or other of the great duties that he had imposed upon himself; scarcely could he attend the trial of bishop Tonstal. The bishop was deprived of his see, a sentence which was so contrary to Cranmer's opinion, that, with Lord Stourton, a Roman Catholic, he protested against it. It was not till 1552 that Cranmer gave up all hope of an agreement among all the churches that had withdrawn from the papal supremacy, and for which he had entered into correspondence with Calvin, Melancthon, and other divines of the Continent. The "Service-book" was completed, and the *Book of Common Prayer* adopted by Parliament in the spring of 1552. In May, 1553, Edward issued a mandate that the clergy should subscribe to the Forty-two Articles upon which the divines had agreed, but he died soon afterwards.

A letter was sent to the princess Mary declaring queen Jane (Lady Jane Grey) to be the sovereign. This letter was signed by many persons, and among them by Cranmer, whose zeal for the Protestant cause must have blinded him to the danger of the enterprise. On the 9th of July, 1553, the chief officers of the state swore allegiance to Jane; on the 20th we find many of those who had been zealous in her cause "impatient to send in their submissions to Mary." On the same day an order was sent by Mary to Northumberland to disarm. The hopes of the Protestants were now at an end, as queen Mary's unshaken attachment to the Roman Catholic creed was universally known. Gardiner was released and made chancellor, and a commission was formed to degrade and imprison Protestant prelates and ministers on the charges of treason, heresy, and matrimony. In the beginning of August Cranmer was summoned before the council; and in September, with Latimer and Ridley, was committed to the Tower. In March, 1554, he was removed, with bishops Latimer and Ridley, to prison at Oxford, where was renewed the controversy respecting the Lord's Supper, which, by the queen's desire, was named the subject for discussion. On the 13th and 19th of April the discussion was held; and on the 28th the accused were brought to St. Mary's, where it was declared that, unless they would turn, they were obstinate heretics, and no longer members of the Church. Cranmer then replied, "From this your judgment and sentence I appeal to the just judgment of the Almighty, trusting to be present with him in heaven, for whose presence in the altar I am thus condemned," and he was removed again to prison. It was soon discovered that the tribunal before which Cranmer had been tried was not competent to decide the case. The pope issued a fresh commission, and on the 12th of September, 1555, the primate was examined by Brokes, the bishop of Gloucester, and two civilians, Martin and Story. Before these proceedings, Cranmer was summoned to appear within eighty days before the pope at Rome: this must have been a mere fiction of papal law, as it was impossible for Cranmer to obey. On the 29th of November the eighty days had elapsed, and on the 4th of December he was excommunicated and deprived of his bishopric. A letter from the pope (Paul IV), bearing date the 14th of November, affirming him to be contumacious because "he took no care to appear" at Rome when cited, and declaring him guilty of heresy and other enormities, finally commanded his excommunication. On the 14th of February Cranmer was degraded. In a few days after this his fortitude gave way; he forsook his principles and wrote a recantation. It was of no avail towards the preservation of his life. On the 20th of March, the eve of his execution, he was visited by Dr. Cole, and Cranmer stated that he remained firm in the Catholic faith as he had recently professed it, an answer that has been considered equivocal. On the following day he was led to St. Mary's church, where, after an exhortation by Dr. Cole, Cranmer finished his private devotions, and then solemnly addressed the people, openly professing his faith, and at length declaring, "Now I come to the great thing that troubleth my conscience more than any other thing that I ever said or did in my life, and that is the setting abroad of writings contrary to the truth which I thought in my heart, and writ for fear of death, and to save my life, if it might be; and that is all such bills which I have written or signed with mine own hand since my degradation, wherein I have written many things untrue. And forasmuch as my hand offended in writing contrary to my heart, therefore my hand shall first be punished, for, if I may come to the fire, it shall be first burned. And as for the pope, I refuse him as Christ's enemy and Antichrist, with all his false doctrine." The assembly was astonished; they had supposed that he would have confirmed and not retracted his recantation. He was hurried away to the stake, where he stood motionless, holding up his right hand, and exclaiming, until his utterance was stifled, "This unworthy hand! Lord Jesus, receive my spirit!"

Cranmer's diligence and application were unusual; he was deeply read in theology and canon law, and was familiar with Hebrew, Greek, and Latin, as well as French, German, and Italian. His reservation respecting the oaths which he swore when appointed archbishop, his subserviency to Henry VIII in annulling his marriages, his share in the condemnation of some heretics, his conduct at the disgracing of Bonner and Gardiner, and the want of courage which made him recant after his condemnation, are great blots on his character. But, though his conduct on these occasions was marked by want of firmness, it cannot be denied that Cranmer was sincere, mild, and moderate, and, for the most part, a firm man; nor is it to be forgotten that persecution was the policy of all religious parties at this period. "Cranmer was neither fool, knave, nor demigod. He lived in an age when men had need of all the tact they could muster, and he proved himself prudent and learned. He was one of those useful persons who sometimes acquire influence by the very absence of striking and ardent qualities—

the Melancthon of our English Reformation. The greatest defect of his character, want of firmness, which has ruined many a man of genius and learning, by a peculiar combination of circumstances, secured his advancement and guided him to fortune. His mind possessed great acuteness; he could generally perceive what was best, although, had vigorous action been required of him, he would have failed to do justice to the clearness of his views. Such a mind is common enough. Fortunately for the usefulness of Cranmer, the time required of him little more than to follow his bent and be moderate. He was surrounded by vehement and excited spirits, who required all the restraint of his temperate and quiet character. And these very traits of his have impressed upon the Church which he moulded, and upon the public office which he, as primate, had the chief share in drawing up," a sort of compromising and uncertain character, "which has never been lost. It is through Cranmer's influence that the Church of England at the present day is capable of sheltering at once the High and Low Churchman, the Universalist and the Calvinist." His cruel death was one of the most unpopular measures of Mary's government.—See Strype, *Memorials of Cranmer* (Oxford, 1840, 2 vols. 8vo; also 1853, by Barnes, 2 vols. 12mo, and 1854 [*Eccl. Hist. Soc.*], 4 vols. 8vo); Todd, *Life of Cranmer* (Lond. 1831, 2 vols. 8vo); Le Bas, *Life of Cranmer* (Lond. 1833, 2 vols. 12mo; N. Y. 18mo); Burnet, *Hist. Reformation* (passim); Gilpin, *Life of Cranmer; Eng. Cyclopædia* (which has been freely used in the preparation of this article). Cranmer's writings are still of value for theology as well as for Church history. A full list of them is given by Jenkins, *Remains of Abp. Cranmer, collected and arranged* (Oxf. 1833, 4 vols. 8vo). The "Parker Society" has republished Cranmer's *Writings on the Lord's Supper* (Camb. 1844, imp. 8vo), and his *Miscellaneous Writings and Letters* (Camb. 1846, imp. 8vo).

Crantz. See KRANTZ.

Crassus (Græcized Κράσσος), fully M. LICINIUS CRASSUS, surnamed *Dives* ("the Rich"), one of the members of the first Roman triumvirate, was born about B.C. 105, and after various civil and military engagements, on the triumviral coalition started, B.C. 55, as governor of the consular province of Syria (where he succeeded Gabinius, Josephus, *Ant.* xiv, 6, 4), on a campaign against the Parthians. On his way he stopped at Jerusalem (according to Josephus, *War*, i, 8, 8, although the statement is confirmed by no other historian of the times, and this city lay off his route) and plundered the Temple, as he did likewise that of the goddess Derceto at Hierapolis, in Syria (Strabo xvi, in fin.). Infatuated by this sacrilege (Prideaux, *Connection*, pt. ii), he proceeded on his campaign, which ended in his defeat, capture, and death (Dio Cass. xl, 27). Plutarch wrote a life of Crassus. —Smith, *Dict. of Class. Biog.* s. v.

Cra'tès (Κράτης; Vulg. translates *prælatus est*), governor of the Cyprians (ὁ ἐπὶ τῶν K.), who was left in charge of the "castle" (τῆς ἀκροπόλεως) of Jerusalem (?) during the absence of Sostratus, in the reign of Antiochus Epiphanes (2 Macc. iv, 29).

Crato von Crafftheim (*Krafft*), JOHANNES, a prominent representative of Protestantism in Austria, was born at Breslau Nov. 22, 1519. At the University of Wittenberg, to which he went in 1534, he lived for six years in the house of Luther, and while there collected the material for the *Table-talk of Luther*, which was subsequently published by his friend Aurifaber. He became also intimate with Melancthon, whose theological views he, on the whole, adopted. Upon the advice of Luther, he left the study of theology, on account of his feeble health, for that of medicine. In 1550 he was appointed city physician in his native city, Breslau. His successful practice, especially during the prevalence of the plague in 1553, and a number of able works, procured him a great reputation and an appointment as imperial private physician (1560), which position he retained during the reign of the emperors Ferdinand, Maximilian II, and Rudolph II. He lived at the imperial court of Austria from 1563 to 1581, was made an imperial councillor, and a nobleman under the name of Crato of Crafftheim, and received from the emperor Maximilian II, who was favorable to Protestantism, the privileges of a *Comes Palatinus*, and many other proofs of favor. At the court of Austria he was one of the most zealous and influential representatives of Protestantism, and took a leading part in the regulation of the affairs of the Protestant Church. Being at first a moderate Lutheran of the Melancthonian school, and an earnest opponent of the exclusive system of Flacius, he gradually embraced the views of the "Reformed" Church, with many prominent men of which he was intimately acquainted. After the death of Maximilian (1576), the influence of the Jesuits for a short time occasioned his dismissal from the court, but in 1578 he was recalled. In 1581, tired of court life, he withdrew of his own accord. In 1583 he returned to Breslau, where he exercised a great influence upon the courts of Liegnitz, Brieg, and Ohlau. He died Oct. 19, 1585. See Gillet, *Crato von Crafftheim und seine Freunde* (Frankf. 1860, 2 vols.); Herzog, *Real-Encyklop.* xix, 363.

Cravens, WILLIAM, a celebrated and eccentric Methodist Episcopal minister, was born in Rockingham County, Va., July 31, 1776. Converted in 1794, he began to preach about 1800, and for many years, as a local preacher, he served the Church in his native state. He travelled extensively without fee or reward, everywhere producing great effects by his courageous denunciations of sin. He was a strenuous opponent of slavery, and, having emancipated his own slaves, removed to the West in 1819, chiefly with a view to their advantage. In 1820 he was admitted on trial in the Missouri Conference, which then embraced Illinois, Indiana, and part of Tennessee. He continued to travel and preach on the frontier to the day of his death, which took place at his house, Washington County, Ind., Oct. 10, 1826. He was a man of great physical power, a vast fund of wit and humor, and indomitable energy. Virginia and the West abound in stories of his adventures, which, if collected, would make a biography of romantic interest.—*Minutes of Conferences*, i, 573; Stevens, *History of Methodism*; Wakely, *Heroes of Methodism*.

Crawford, Elijah, a Methodist Episcopal minister, was born in New York in 1812. Trained in a pious household, his youth was virtuous, and at seventeen he united with the Church. His early manhood was spent in trade, but in 1835 he entered the itinerant ministry in the New York Conference. His steadfast piety, manliness or character, and diligence, both in study and labor, in a few years gained him the confidence of the Church, and he filled with great acceptance a number of important pastoral charges. His last station was Hartford, Conn., where he died of dysentery September, 1849.—*Min. of Conferences*, iv, 454.

Crawford, John, a Methodist Episcopal minister, was born in Westchester County, N. Y., in 1761, was converted in 1787, entered the itinerant ministry in the New York Conference in 1789, became superannuated in 1819, and died in 1851, aged over ninety years. He was "a sound and earnest preacher, eminently faithful and punctual, always cheerful, and living the religion he preached."—*Min. of Conferences*, iv, 579.

Creagh, BARTHOLOMEW, a Methodist Episcopal minister, was born in Dublin Aug. 23, 1804, and was converted at sixteen. His studies in Greek and Latin were pursued at Dublin. In 1822 he came to America, and soon, by his admirable qualities of intellect and heart, gained many friends. He entered the itinerant

ministry in the New York Conference in 1827, and for fifteen years was in great repute as an earnest, eloquent, and successful minister. For four years he was presiding elder, and was a delegate to the General Conference in 1848 and 1852. The record in the *Minutes* states that "he was among the very best models of ministerial excellence, a holy man, a faithful pastor, a generous friend." He died at Williamsburgh, Aug. 10, 1852.—*Minutes of Conferences*, v, 211; Sprague, *Annals*, vii, 731.

Creatianism. See CREATIONISM.

Creation. Creation is the absolute bringing into existence of the world by God. It is that act of God by which he, standing before and above all mundane and natural things, made and arranged the universe. It embraces everything which is not God.

I. *The Idea of Creation.*—In order to form a proper conception of what creation is, we must concede the absolute dependence of the world upon God. We err in limiting it to the mere beginning of the world. It is true that it was that divine act by which all objects were brought into being. It therefore stands as the beginning of all divine operation in the world, and of the universal development of the world. But that God created the universe implies not only that he gave a beginning to its existence, but that he continues that existence, and that he is the only fountain of its present being. The world is not self-derived nor self-sustained; it is only from and by God that it now exists. But creation is not a mere accident of the divine character, nor a temporary moment in the divine life, nor an impartation and manifestation of God, nor a blind, passive, and pathological evolution or emanation of the divine essence. Yet it is God's work alone, and was as unconstrained as any other deed performed by divine power. When we say that God created the world, we not only do not affirm, but actually deny that God has imparted himself, and passed into his own work. God is the absolute founder of the world, and he has not passed into its nature, but stands high above all the conditions of created being. Nor, while the world is not God himself, can it be said to partake of any other divine nature. It is simply God's work and manifestation; it is a creation which is from, by, and for God. Thus the full idea of creation implies that God is the absolute, impartial, and personal Spirit who, of his own free will, gave existence to the universe.

In the Mosaic account of the creation, we find that magnificent testimony of the faith which recognises God's creation in the surrounding world (compare Heb. xi, 3, *Through faith we understand that the worlds were framed by the word of God, so that things which are seen were not made of things which do appear*). This testimony possesses a strong religious and canonical worth, apart from our views of the peculiar character of the cosmogony of Moses, whether we shape them according to the opinions of the old Church theologians, who held that the Mosaic account was actual history; or whether we harmonize with the modern allegorists, who claim that it is prophecy reversed, or prophetic vision; or whether we take the low view of attributing to it a mythical character. The most important portion of this, as of other scriptural statements concerning the creation, is contained in the proposition that God, in his eternal, infinite love, is the only highest cause; that he is limited by no principle beyond himself; that he is the independent Founder of the world. By *world* we mean *κόσμος*, *αἰῶνες*, Heb. i, 2, 11, or the *universe*, which is always described in the Old Testament, and usually in the New, as "heaven and earth," "heaven, earth, sea, and all which is therein." It is God alone who has brought all things into being (Heb. iii, 4; Acts xvii, 24; xiv, 15; Rev. iv, 11; Heb. xi, 3; Psa. xxxiii, 6; cii, 26; Isa. xlv, 18; Jer. x, 12). Nothing has had a being without the Logos of God (John i, 3). Everything owes its existence and its life to the word of God. It *is* because God endowed it with entity; because he so willed it; *διὰ τὸ θέλημά σου* (Rev. iv, 11); by his word, *ῥῆμα*, דָּבָר (Heb. xi, 3; Psa. xxxiii, 6); by his speaking (Gen. i, 3; 2 Cor. iv, 6); by his absolute power, *παντοδύναμος χείρ* (Wisd. Sol. xi, 18); and by his personal power (Jer. x, 12), in which he needed no assistance whatever, but by which he was able to create whatever he desired (Psa. cxv, 3; cxxxv, 6). By this power he, in his own supreme majesty, evoked into existence that which was nonexistent (Rom. iv, 17; Psa. xxxiii, 9), and by virtue of the same omnipotence is able to annihilate what he has called into being (Psa. civ, 29; cii, 26, etc.; Isa. li, 6; Luke xxi, 33; Rev. xxi, 1, 4). The Spirit of God, or "the breath of his mouth," which (Psa. xxxiii, 6) stands parallel with the creative word that "moved upon the face of the waters," is nothing less than the active, forming, animating, divine power. The strength by which God creates takes its place beside his wisdom and knowledge (Jer. x, 12; Rom. xi, 33); and the divine wisdom or intelligence appears to have been (Prov. viii, 22, etc.) the first ground and adjusting principle of creation. Instead, however, of reading in John i, 3, of this world-creative "wisdom," we find a description of the same eternal Logos of God who became flesh in Christ. Thus the creative principle is identified with that of redemption; and while the creation is distinguished as an act of love, the highest revelation of that love is to be found in the incarnation of God in the world. In both creation and redemption we perceive the thought that God, without the intervention and aid of any foreign power, gave existence to that which had previously no being; and that he did this by virtue of no blind necessity, but by his own volition alone.

It may be proper here to treat briefly of the meaning of בָּרָא (*bara'*, "*create*"), in Genesis, chap. i. Gesenius and Fürst agree in giving to this word *bara*, in Genesis i, the sense of proper creating, although they seem to give that of *cutting* as the primitive (not usual) idea inherent in the root, comparing as cognate בָּרָה, to *choose*, בַּר, a *son* (which Fürst, on the other hand, derives from בָּנָה), and the Arab. *bara*, etc. Gesenius refers to the Piel form of the Heb. root (בֵּרֵא, to *fashion*), as the most characteristic (?) conjugation. He concludes, however, with the following judicious note (*Thesaur. Heb.* p. 236): "In the trite dispute of interpreters and theologians concerning creation out of nothing, some appeal likewise to the word under consideration, as if it might be gathered from its very etymology and proper signification that the first chap. of Genesis teaches not a creation from nothing, but a conformation of matter eternally existing. On the contrary, from the instances we have given, it will abundantly appear that the actual use of this word in Kal is altogether different from its primary signification, and that it is rather employed with respect to the new production of a thing (see Gen. ii, 3) than to the conformation and elaboration of material. That the opening clause of Genesis sets forth the world as first created out of nothing, and this in a rude and undigested state, while the remainder of the first chapter exhibits the elaboration of the recently created mass, the connection of the whole paragraph renders entirely plain. So also the Rabbins (Aben-Ezra ad Gen. i, 1: 'Most hold שהבריאה להוציא יש מאין, that creation is the production of a thing from nothing') and the N.-T. writers (Heb. xi, 3; Rom. iv, 17; comp. 2 Macc. vii, 28) teach, although the writer of the Book of Wisdom (xi, 17), following the Grecian dogmas, holds matter to be eternal. See on this question Mos. Maimon. in *More Nebochim*, iii, 13; Mosheim, *De creatione mundi ex nihilo*, appended to Cudworth's *Intellectual Sys-*

tem; Beausobre, *Hist. de Manichée et du Manichéisme*, vol. ii, bk. v, chap. iv."

The examples to which Gesenius refers as sustaining this position are (in addition to the equivalent Arab. *bâriyun, creator*, Koran, Sur. ii, 51; *bariyatun, creature*, Abulf. *Ann.* i, 18; Jauhar. *Spec. ed. Schneid.* p. 14; and all the other Shemitic tongues, which have the same usage), the following: "Spoken of the creation of the heaven and earth, Gen. i, 1; Isa. xl, 26; xlv, 18; of the bounds of the earth, Isa. xl, 26; of the wind, Amos iv, 13; of men, Gen. i, 27; v, 1, 2; vi, 7; Deut. iv, 32; Isa. xlv, 12; Psa. lxxxix, 48; Mal. ii, 10; specially, of Israel, Isa. xliii, 1, 15; of beasts, Gen. i, 21; of light and darkness, Isa. xlv, 7, etc. Add these examples: Psa. li, 12 ('*create* in me a clean heart, O God'); Isa. xlv, 7 ('I make peace, and *create* evil'); Jer. xxxi, 22 ('the Lord hath *created* a new thing;' comp. Num. xvi, 30). It is used with a double accusative, Isa. lxv, 18 ('I *create* Jerusalem a rejoicing,' i. e. joyous); iv, 5; xlviii, 7. The participle (בּוֹרְאֵיךָ, the *plur. of majesty*, but according to many MSS. in the sing. בּוֹרְאֲךָ) stands for the *Creator* (Eccl. xii, 1). בָּרָא is joined with the words יָצַר [*yatsar'*, to *form*], in Isa. xliii, 7; xlv, 18; and עָשָׂה [*asah'*, to *make*], in Isa. xli, 20; xlv, 7, 12; generally as synonymous: with the latter it is not seldom interchanged, Gen. i, 26 (comp. ver. 27); ii, 4; but that there is nevertheless a difference at least between these two is evident from Gen. ii, 3 ('which God *created and made*," בָּרָא לַעֲשׂוֹת [where the ל of union is generally regarded as *epexegetical*]). These words, which have perplexed many, even Hebrew interpreters, L. de Dieu (ad loc.) has rightly explained by adducing parallel phrases (חִדַּשׁ לַעֲשׂוֹת, חֵרַשׁ לַעֲשׂוֹת, etc.), as meaning *produced by making*, i. e. made by producing something new; comp. Jer. xxxi, 22, and בְּרִיאָה" (*ib.* p. 235). The word occurs (in the Kal or simple form) likewise in Psa. lxxxix, 12; Isa. xlii, 5; xlv, 8, 18; liv, 16; lvii, 19; lxv, 17 (in the Niphal or passive) Gen. ii, 4; v, 2; Psa. cii, 18; civ, 30; cxlviii, 5; Ezek. xxi, 30; xxviii, 13, 15 ("done"); Exod. xxxiv, 10.

From this examination, it is evident that although the word in question is etymologically connected with roots (like the Engl. *pare*, Lat. *paro*, etc.) that have a less decided import, yet its current and legitimate signification is that of creation in the modern and proper acceptation. As the Hebrews were not given to philosophical disquisition, their language is peculiarly barren in terms expressive of metaphysical or dialectical niceties, and hence they frequently employed this word in less exact applications. Moreover, as the act of creation was in the nature of the case but *once* performed, the term could only be used infrequently with reference to that event, just as "create" with moderns etymologically and even practically refers rather to production in a subordinate sense than to absolute origination. In both words, however, the higher and full sense is never lost sight of, and thus they appear as nearly synonymous in actual usage as any two in different and widely remote languages could well be. The translators of the Auth.Vers. have therefore done well by invariably (except in the single passage above noted) rendering בָּרָא (in Kal and Niphal at least), and no other Heb. term, by *create*.

The N.-T. writers employ in the same sense κτίζω (with the nouns κτίσις, *creation*, κτίσμα, *creature*, and κτιστής, *creator*) as the nearest equivalent in Greek, after the example of the Sept., in most passages (in Gen. it has ποιέω). See Macdonald, *Creation and Fall* (Edinb. 1856), p. 61–4.

That this absolute sense is the true one in Gen. i, 1, at least, is demonstrable from the association there with the term "*beginning*." For if matter had existed eternally, there would have been no proper "beginning" at all of its existence; and to understand the mere arrangement of chaotic elements by the phraseology in question would be to confound something that is said to have taken place "in the beginning" with what is afterwards detailed under successive days. On the other hand, if matter be not eternal, it must at some time have been brought into being, and precisely that act would be the real "beginning" of all material things. This is obviously what the sacred writer intended to state: in opposition to the general belief of antiquity, he affirms that matter was originally the direct product of divine power, and from this event he dates the history of the physical universe.

II. *God's Motive in Creation.*—This motive has been ascribed by doctrinal writers to the free operation of God's love, his *bonitas communicativa*. He was not affected by any compulsion or selfish desire. In the essence and volition of divine love, all the much-discussed antagonism between freedom and necessity is cancelled. To suppose that the creation could have been otherwise than it was is an abstraction of no utility whatever. We only speak *relatively* when we declare that God could not have created otherwise than he did. But if we make the same affirmation *absolutely*, we degrade God's freedom to abstract authority, and creation to accident or a mere experiment. The necessity in which God created the universe is the definiteness of his own will, his self-determination which he possesses by virtue of his own divine character. It is not an external compulsion, but an interior impulse of the divine nature to manifest itself; a necessity of God's love to communicate itself. The question whether God could have created any other world than he has was discussed earnestly by the Scholastics, and later by Leibnitz in his Theodicy. If we imagine that God had a number of world-plans, out of which he selected the one which he consummated, we concede too much to the Optimists. That creation which he brought into being was the only one to which he was moved by the deep inner love of his infinite divine character. The aim which God had in view was not his own glory exclusively; he was not impelled by a purely egotistical power, but by eternal love; he desired the good of his creatures; and it was only as he wished his creation to be pure that he desired to be glorified by that purity. All created beings are not solely means for an end; but they have been created for their own sake, that they might receive the communications of God and be permeated by his goodness; not that they might subsequently be absorbed in him, but rest eternally happy in and with him. Creation reached its aim relatively in personal creatures and absolutely in Christ the God-man. The kingdom of the natural creation attains its perfection in the kingdom of grace and glory; the effulgence of the glory of God appears in, and concurs with, the happiness of his creatures; and the perfection of the Church takes place, not by the overthrow, but by the renewal and illumination of the world in God (2 Pet. iii, 13; Isa. lxv, 17; lxvi, 22; Rev. xxi, 1; comp. Rom. viii, 19, etc.; comp. Twesten, *Vorles. üb. d. Dogmatik*, ii, 89).

III. *Time occupied in Creation.*—La Place's theory of the formation of the whole solar system is that it was originally a mass of vapory or nebulous matter, which, according to the laws of gravitation, assumed the form of an immense sphere. This sphere received from without an impulse which caused it to revolve on its axis from west to east. In consequence of the revolution, the mass became flattened at the poles and swollen in the equatorial region. In consequence of the greatness of the centrifugal force at the equator, and the contemporaneous condensation and contraction of the nebulous mass, a free revolving ring, similar to that of Saturn, detached itself in the region of the equator. This ring, not being of uniform density, and in consequence of contraction, broke in one

or more places; and these fragments, in obedience to the laws of gravitation, became spheres or planets, all revolving from west to east around the parent mass. Another ring was formed in like manner, and another planet came into existence; and so on, until the whole solar system was complete. According to this theory, not only the earth, but all the planets, existed before the sun in its present condition; and thus some of the supposed difficulties of the Mosaic cosmogony are removed (M'Caul, *Aids to Faith*, p. 242, 243), for it is implied in this theory that the earth existed before the sun became the luminary of the system.

In order to arrive at some conclusion harmonious at once with the results of modern science and the account of Moses, we must determine the meaning of the terms "in the beginning" and "day." The Hebrew word for "beginning," רֵאשִׁית (*reshith'*), is in the original without the definite article; so that Moses really says, "In *reshith* (not in *the* reshith) Elohim created the heavens and the earth." The Septuagint, Chaldee, and Syriac versions corroborate the antiquity and correctness of this reading. Thus there is an indefiniteness of the time of creation. It may have been millions of years ago just as easily as thousands, for the Hebrew word is indefinite, and the verse reads in substance thus: "Of old, in former duration, God created the heavens and the earth." Arguing from analogy, many contend that the term "day" does not mean literally twenty-four hours. That word often signifies in the Bible undefined periods of time, as the "day of the Lord," "the day of vengeance," "that day," "the night is far spent, the day is at hand." The first day consisted of an alternation of light and darkness; but how long the night lasted, and how long the darkness until the next dawn, is not stated. The whole time of light in which God's creative work proceeded he called "day," and the whole time of darkness he called "night." It was not a day measured by the presence of the sun's light, nor a night measured by the absence of that light. (Compare M'Caul, *Aids to Faith*, p. 231, 246, 247.) The name "day" is therefore regarded as given, not as a measure of extent—which is a later and a subordinate idea—but as denoting a wondrous phenomenon, marking the first great transition, and calling up the dual contrast which has entered into the corresponding name ever since, "God called the light day, and the darkness he called night." He called it YOM, and from that has come the lesser naming. We now indicate the gradual, developing character of the creation. It was not the work of six ordinary days, measured by twenty-four hours, but a series of supernatural growths extending over vast periods of time. (Comp. Prof. Tayler Lewis, *Meth. Quart. Review*, April, 1865.)

Others maintain that, while it is true that the word "day" (q. v.) is sometimes used (e. g. in relation to the whole cosmogonal period, Gen. ii, 4) in a vague sense for an indefinite period, or for some set occasion without regard to its length, such a signification in the first chapter of Genesis is emphatically forbidden by the following explicit circumstances subjoined in the context itself: (1) The several demiurgic *days* are regularly numbered—"first," "second," etc., till the last—making an exact and obviously literal week. (2) Each is divided, in the usual Hebrew style, into "night" and "morning," constituting undoubtedly a Jewish *νυχθήμερον*, or *night-and-day*, like the modern phrase "twenty-four hours." (3) To prevent all misconception, these alternations of light and darkness are distinctly called in the same connection "night" and "day." (4) The institution of the Sabbath is based upon the correspondence between this and each of the six preceding days in point of length. To these philological and exegetical considerations, requiring the word יוֹם to be here taken in its strictly literal sense as an actual *day*, might be added others derived from scientific investigations. (See Hitchcock's *Elementary Geology*, 3d ed., p. 283 sq., and the article COSMOGONY.)

IV. *Eras of Creation.*—The Mosaic account recognises in creation two great eras of three days each—an *Inorganic* and an *Organic*. Each of these opens with the appearance of light: the first, light diffused; the second, light from the sun for the special uses of the earth. Each era ends in a day of two great works; the two shown to be distinct by being severally pronounced "good." On the third "day"—that closing the Inorganic era—there was, first, the dividing of the land from the waters, and afterwards the creation of vegetation, or the institution of a kingdom of life—a work widely diverse from all preceding it in the era. So, on the sixth day, terminating the Organic era, there was, first, the creation of mammals, and then a second far greater work, totally new in its grandest element—the creation of Man. We have, then, the following arrangement:

I. *The Inorganic Era.*

1st Day.—Light, general.
2d Day.—The earth divided from the fluid around it, or individualized.
3d Day.—{ 1. Outlining of the land and water.
{ 2. Creation of vegetation.

II. *The Organic Era.*

4th Day.—Light, direct.
5th Day.—Creation of the lower orders of animals.
6th Day.—{ 1. Creation of mammals.
{ 2 Creation of Man.

In addition, the last day of each era included one work typical of the era, and another related to it in essential points, but also prophetic. Vegetation, while for physical reasons a part of the creation of the third day, was also prophetic of the future Organic era, in which the progress of life was the grand characteristic. The record of Moses thus accords with the fundamental principle in history, that the characteristic of an age has its beginnings within the age preceding. So, again, man, while like other mammals in structure, even to the homologies of every bone and muscle, was endowed with a spiritual nature, which looked forward to another era—that of spiritual existence. The "*seventh*" "day"—the day of rest from the work of creation—is man's period of preparation for that new existence; and it is to promote this special end that, in strict parallelism, the Sabbath follows man's six days of work.

Some "interpreters contend that the whole account is to be taken together; that the days are to be understood as literal days; but that the whole, however, is to be interpreted as referring to a more remote period than is commonly imagined, and as not intended to describe the *existing* species of plants and animals, but various other species, now extinct, which have been, by *subsequent* convulsions of nature, destroyed, while others have been successively, by fresh acts of creation, introduced in their place."

"Another interpretation, that of Dr. J. Pye Smith in his volume on the *Relations of Scripture to Geology*, etc., is briefly this: the separation of the first verse he adopts as above: this refers to the original universal creation; and in the vast undefined interval an almost unlimited series of changes in the structure and products of the earth may have taken place. After this, at a comparatively recent epoch, a *small portion* of the earth's surface was brought into a state of disorder, ruin, and obscuration, out of which the creation of the existing species of things, with the recall of light, and the restored presence of the heavenly bodies, took place literally, according to the Mosaic narrative, in six natural days."

"Lastly, others have thought that the whole description must be taken literally as it stands; but yet, *if* found contradicted by facts, may, without vio-

lence to its obvious design and construction, be regarded as rather intended for a mythic poetical composition, or religious apologue, than for a matter-of-fact history." (See Kitto's *Jour.* iii, 159; v, 186; *Lit. and Theol. Rev.* iv, 526; *New Englander*, ix, 510; *Meth. Rev.* vi, 292; xii, 497; De Bow's *Rev.* iv, 177; Hitchcock's *Religion and Geology*, § 2; *Biblioth. Sacra*, xii, 83, 323; xiii, 743; *Jour. Sac. Lit.* 1855; *Amer. Bibl. Repos.* vi, 236.) See GEOLOGY.

To sum up, there are three theories of creation: 1. *The old orthodox view.* This has been most recently defended by Keil. It claims that the world was created in six ordinary, literal days. 2. *The Restitution Hypothesis.* According to it, the theosophic declaration of the *Tohu va Bohu* is accepted. The geological epochs which extend from the first earth-formations down to the diluvium form an incalculably long period before the creation of light, and before the other creative acts recorded in Genesis i, 3, etc. Therefore the Mosaic six days' work is but the restitution of a preceding organic creation which had been previously many times disorganized and overwhelmed. Chalmers and Buckland were the first to advocate this hypothesis. They have been followed by Hengstenberg, Kurtz, Andr. Wagner, and partially by Delitzsch. 3. *The view of the Harmonists or Concordists*, such as Cuvier, De Serres, Hugh Miller, Ebrard, and others. They hold that the six days are periods of great indefinite length, and are therefore reconcilable with the creative epochs of geology. Parallel with these days are the long geologic formations. Schultz has just written in advocacy of this theory. His work is one of the most satisfactory and exhaustive of all the writings on this important branch of scientific theology.

See, in addition to the works already cited, Hugh Miller, *Testimony of the Rocks;* Dana, *Manual of Geology;* Richers, *Die Schöpfungsgeschichte* (Leipzig, 1854, 8vo); Keerl, *die Schöpfungsgeschichte u. d. Lehre vom Paradies* (reviewed by Warren, *Bibliotheca Sacra*, Oct. 1863, art. iii); Nath. Böhner, *Naturforschung u. Culturleben*, 2d ed. 1863; Giov. Pianciani, *Cosmogonia nautrale comparata col Genesi* (Roma, 1862); P. Laurent, *Etudes Géologiques sur la Cosmogonie de Moïse* (Paris, 1863); F. H. Reusch, *Bibel und Natur* (Freiburg, 1862); F. Quart. Rev.* April, 1866, art. 2; Tayler Lewis, *Six Days of Creation.* See GENESIS; MAN; SPECIES.

Creationism, or (in the German mode of spelling from a supposed adjective) **Creatianism**, is a technical term (very common among German philosophers and divines, but not yet fully naturalized in English) for one of the three or four theories concerning the origin of the human soul. It derives not only the soul of Adam, but every rational soul, directly from God, though not by way of an *emanation* in a Gnostic or pantheistic sense, but by an act of creation; and supposes that the soul is united to the body at the moment of its generation or afterwards. It differs from *traducianism* or *generationism*, so called, which teaches that the soul is propagated, together with the body, through the process of generation from age to age, and from the theory of *pre-existence*, which assumes that each soul descends from another world, and a previous mode of existence, into the body, to leave it again at the close of its earthly pilgrimage. Creationism is traced back to Aristotle, who made an essential distinction between the animal soul (ψυχή) and the rational principle (νοῦς), and derived the former, together with the body, from generation, the latter from without or above, as a part or reflex of the general reason of God. Plato, on the other hand, taught the theory of pre-existence, which was introduced into Christian theology by Origen. Tertullian was the founder of traducianism. The whole question of the origin of the soul was first seriously discussed during the Pelagian controversy, in connection with the problem of hereditary sin and guilt. (See Schaff, *Church History*, iii, 830 sq.) Pelagius, and several Oriental fathers, held the creation theory, which fell in with his view of the complete innocency of every child that is born. Jerome was also a creationist, although he wrote against Pelagius. "Quotidie," he says, "Deus fabricatur animas, cujus velle fecisse est, et conditor esse non cessat." He appeals for this view to the unceasing creative activity of God, and to such passages as John v, 17; Zech. xii; Psa. xxxiii, 15. Augustine frequently discussed the question, but never arrived at a satisfactory solution. He wavered between creationism and traducianism; but, on the whole, he was inclined to the latter, which best agreed with his doctrine of hereditary sin. "Where the Scripture," he says, "renders no certain testimony, human inquiry must beware of deciding one way or the other. If it were necessary to salvation to know anything concerning it, Scripture would have said more." Among Augustinian divines traducianism has found more acceptance. But creationism has never been without supporters, among whom Leibnitz (in his *Theodicy*) occupies a prominent position. The great argument in favor of creationism is that it guards the dignity and spirituality of the rational soul, which differs in kind from the animal soul, and is the proper seat of the image of God. Traducianism is liable to the objection of materializing the soul. But creationism makes the union of body and soul accidental and mechanical, and does not account for the transmission of sin from generation to generation. It must either confine sin to the sensual sphere, which is not true (for unbelief, pride, profanity, blasphemy, are spiritual sins), or assume that each soul becomes sinful by contact with the naturally generated body; since, from the creative hands of God, it can only proceed free from sin and defect, like the soul of our first parents. These difficulties on both sides point to a theory which combines the truths of creationism and of traducianism, and avoids their errors. Every human being, both as to body and soul, is a child of its parents, and at the same time a creature of Almighty God.

Creature (prop. נֶפֶשׁ, *ne'phesh*, *animated* or *spirit-having* thing; κτίσμα [less distinctively κτίσις; on Rom. viii, 19, see the *Baptist Quarterly*, Apr. 1867, art. 2]; but also שֶׁרֶץ, *she'rets*, "moving creature," elsewhere "creeping thing," i. e. not merely *reptile* [q. v.], but any gliding or short-legged quadruped), a general term in the Scriptures for any animal (q. v.). See also DOLEFUL CREATURE.

In the New Test. this word designates, 1. *The whole creation*, any or all created objects or beings; so Rom. viii, 39, "Nor height, nor depth, nor any other *creature*," etc.; Col. i, 15, "the first-born (Master) of every *creature;*" Rev. iii, 14, "the beginning (source) of the *creation* of God; comp. also Rev. v, 13; Heb. iv, 13. 2. *Humanity*, or the whole human race, in the universal sense; so Mark x, 6, "But from the beginning of the *creation* (κτίσεως) God made them male and female." The word here cannot mean the *creation* in general, since we find αὐτούς to explain the word κτίσις, or to bring the meaning back to it. Mark xvi, 15, "Preach the Gospel to every *creature;*" Col. i, 23, "the Gospel which was preached to every *creature* which is under heaven." That mankind alone is here alluded to is self-evident, and the expression "under heaven" shows that all reasonable beings on earth are to be included in the meaning. Particularly remarkable, though different in sense, is the passage Rom. viii, 19–22, "For the earnest expectation of the *creature* waiteth for the manifestation of the sons of God. For the *creature*

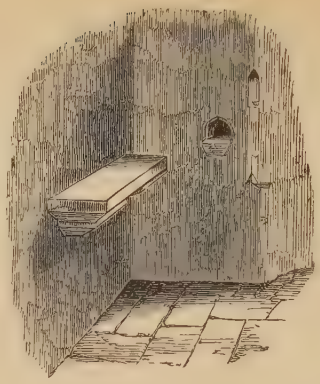
was made subject to vanity, not willingly, but by reason of him who hath subjected the same in hope; because the *creature* itself also shall be delivered from the bondage of corruption, into the glorious liberty of the children of God. For we know that the whole *creation* groaneth, and travaileth in pain together until now," in which also the expression creature is used to designate the totality of mankind. This is first indicated by the γάρ in verse 18, which brings forward in behalf of the λογίζομαι which rests on it, that "all mankind takes part in this aspiration and in the hope of future glorification." In ver. 23, Christians, as *part* of humanity, are set over against the *whole* of it. We cannot here place Christians in contrast with the *inanimate* creation, and overlook entirely the non-Christian part of mankind, to whom a vague longing after the glorious freedom of the children of God could be better attributed than to inanimate nature. Paul nowhere speaks of a "change" or glorification of the earthly abode of men; this δόξα is exclusively reserved for man (1 Cor. xi, 35–50).—Krehl, *N. T. Handwörterbuch;* see also Ellicott, *The Destiny of the Creature*, 2d. ed. 1862; *Journal of Sacred Literature*, Oct. 1862, p. 27.

The LIVING CREATURES spoken of in Ezekiel x, 15, 17, 20 (חַי, *chay, alive;* the ζῶον of Revelations v, vi, sq., improperly "beast"), are imaginary or composite beings, symbolical of the divine attributes and operations, such as were common in the

Ancient Oriental composite Winged Figures: 1. Egyptian; 2. Assyrian.

mythological representations of all antiquity. See CHERUB.

Credence-table, or CREDENCE, a table beside the altar, on which the cup, etc., are placed in the celebration of the mass. Du Cange says that the word *credentiarius* means *prægustator*, one that tastes beforehand, and the reference seems to be to an ancient court-practice, performed by cup-bearers and carvers, who were required to tasfe the wines and meats which they presented (*securitatis gratiâ*), to insure the safety of the monarch. The Italian word *credenziéra* has the same meaning. Hence also the *credentz-teller*, credence-plate, on which cup-bearers *credenced* the wine, and which means generally a plate on which a person offers anything to another; *credenz-tische*, credence-table, a sideboard, a cupboard with a table for the purpose of arranging in order and keeping the drinking-apparatus therein. Credences were common in ancient churches. In the Liturgies under the names of Chrysostom and St. James we meet with the words πρόθεσις and παραπράπεζον. In the *Ordo Romanus* the names *oblationarium* and *prothesis* occur, and one is made the explanation of the other. We meet also with the word *paratorium*, because when the offerings were received, preparation was made out of them for the Lord's Supper. In many instances the place of the credence-table was supplied by a shelf across the piscina: this shelf was either of wood or stone, and is to be found in many old churches. The use of *credence-tables* is one of the restorations of obsolete usages which have marked the so-called Puseyite movement in England.—Farrar, *Eccles. Dict.* s. v.; Coleman, *Ancient Christianity.*



Credence-table.

Creditor (נוֹשֶׁה, *nosheh'*, a *lender*, 2 Kings iv, 1; Isa. l, 1; elsewhere "extortioner," "usurer," etc.; מַשֶּׁה, *mashsheh'*, *debt*, Deut. xv, 2; δανειστής, a *lender*, Luke vii, 41). See DEBT; LOAN.

Credner, KARL AUGUST, was born Jan. 10, 1797, at Waltershausen, near Gotha. He studied at Jena, Breslau, and Göttingen. In 1830 he became professor extraordinary of theology at Jena, and in 1832 obtained the appointment of ordinary professor at Giessen. He died in 1857. Among his numerous writings are, *Der Prophet Joel übersetzt u. erklärt* (Halle, 1831):—*Beiträge z. Einleit. in die biblischen Schr.* i:—*Die Evangelien der Petriner oder Judenchristen* (Halle, 1832, ii):—*Das alttest. Urevangelium* (Halle, 1838):—*Einleit. in das N. T.* (Halle, 1836):—*Zur Gesch. des Kanons* (Halle, 1847; new edition by Volckmar, with additions, Berl. 1860):—*Das N. T. für denkende Leser* (Giess. 1841–43, 2 vols.). Credner was one of the chief representatives of the Rationalistic school in Germany. In many of his works his theological views are but little apparent, and these, especially his *Einleitung*, are generally valued by theologians of all schools for their vast amount of information. In some of his later works, however, he shows himself a very determined Rationalist. Credner took also an active part in the religious controversies of his time, publishing a number of books in defense of the rights of the Rationalistic party to remain in the state church, and to enjoy liberty of preaching and teaching (*Die Berechtigung der protestant. Kirche Deutschlands*, 1845; *Asterisken*, 1847; *Die sittlichen Verirrungen*, etc., 1853). Credner also contributed many articles to German periodicals, and to Kitto's *Cyclopædia of Biblical Literature*.—Herzog, *Real-Encyklop.* xix, 366.

Creed (*credere*, to believe), a form of words in which articles of *belief* are comprehended; not necessarily a complete summary of the faith, but a statement respecting some points which are fundamental, and have been disputed. See CONFESSION. For instance, while the doctrine of the *atonement* must be reckoned a fundamental part of the apostle's doctrine, it is yet not in the Apostles' Creed *as* a doctrine. Hence some infer that it was not *believed*, though the more obvious inference would be that it was not *disputed*.

1. In the early Eastern Church a summary of this sort was called μάθημα, *the lesson*, because the catechumens were required to learn it. Sometimes, from the nature of its contents, or the uses to which it was applied, it was called σύμβολον, *symbolum*, a mark, token, or badge, as a seal-ring—the proof of orthodoxy; sometimes κανών, *regula fidei*, the rule, or the

rule of faith; *πίστις, the faith; ὅρος* or *ἔκδοσις πίστεως, the determination or exposition of the faith.* The word *σύμβολον* (*watchword, token*), "whether borrowed, as some of the fathers assert, from military language, or, as others assert, from the signs of recognition in use among the heathen in their mysteries, denotes a test and a shibboleth whereby each church may know its own, and is circulated through its members as a warning against the snares of enemies or false brethren" (Hinds, *Early Christianity*, pt. iii, ch. vi).

"Many confessions of faith are to be found, nearly corresponding with the creeds which we now possess, in the writings of the earliest fathers. For example, in Justin Martyr, Irenæus, Tertullian, Origen, Cyprian, the Apostolic Constitutions (cited in Wall, on *Infant Baptism*, II, pt. ii, ch. ix, § 10, p. 439, and in Bingham, bk. x, ch. iv). We have also creeds of several different churches preserved to us, agreeing in substance, but slightly varying in form; as, the creeds of Jerusalem, Cæsarea, Alexandria, Antioch, Aquileia, etc. (see them in Bingham, l. c.). But until the time of the Council of Nice there does not appear to have been any one particular creed which prevailed universally, in exactly the same words, and commended by the same universal authority" (Browne, *On the Thirty-nine Articles*, art. viii).

As for the *authority* of creeds, the Protestant doctrine is that the creed may be *norma doctrinæ* (standard of doctrine), but that the Bible alone is *norma fidei* (rule of faith). So Dr. H. B. Smith (*Discourse on Christian Union*), speaking of the Westminster Confession, says, "We receive the Confession, not as a rule of faith and life, for this only the Scriptures can be, but as containing our system of faith, in contrast with Arminianism and Pelagianism, as well as Socinianism and Romanism. We accept it in its legitimate historical sense, as understood and interpreted through the history of our church . . . . and as 'containing the system of doctrine taught in the Holy Scriptures.' My liberty here is not to be judged of another man's conscience. Any other view not only puts, for all practical purposes, the Confession above the Scriptures, but also puts somebody's theological system above the Confession." The experience of the Church has attested the value of creeds as standards of doctrine. Churches without creeds (e. g. the Society of Friends) have been torn by doctrinal dissensions quite as thoroughly as those which have adopted confessions of faith. See CONFESSIONS.

2. The first object of creeds was to distinguish the Church from the world, from Jews and pagans. In this view, the earliest formularies of this kind contained simply the leading doctrines and facts of the Christian religion; and it was only necessary that they should be generally and briefly expressed; the difference lying not in the exposition, but in the *credenda*, the "things to be believed" themselves. The second object was to distinguish between persons professing the Christian faith; between those who retained the apostolic doctrine, and those who, through unauthorized speculations, had departed from it, and fallen into different errors on important points. Creeds of this kind, therefore, contained the fundamental truths, with brief expositions, declaratory of the sense in which they were to be understood, in order to the full reception of the doctrine of Scripture respecting them. The *Apostles' Creed* is of the first class, the *Nicene* and *Athanasian* of the second; the Nicene, especially, having the most solemn sanction of the congregated churches of Christ. Other creeds and confessions have been at later periods adopted by different churches, orthodox in fundamentals, but differing greatly on some questions of comparatively lighter moment. See CONFESSIONS. These were so extended, in consequence, as to embrace not only the principal doctrines of the faith, but the peculiar views of the churches which agreed upon them, on those subjects of controversy by which the age was distinguished. All these are unquestionably tests, and were designed as such, and all were necessary; the first class to secure the renunciation of Judaism and paganism; the second class to exclude those from the Church who had made shipwreck of the faith; the third class to promote peace, by obliging Christians differing considerably in non-essentials to form themselves into distinct religious societies (R. Watson, *Works*, vii, 498). As to the *use* of creeds as confessions of faith in the Christian Church, see Sartorius, *Nothwendigkeit der kirchlichen Glaubensbekenntnisse* (Stuttg. 1845); Miller, *On Creeds* (Presb. Board); Bonar, *Scottish Catechisms* (1866), Preface; CONFESSIONS.

For the three ancient creeds, the Apostles', the Athanasian, and the Nicene, see below; and also Harvey, *History and Theology of the Three Creeds;* Guericke, *Christl. Symbolik*, § 12; Coleman, *Ancient Christianity*, ch. xiv, § 4; Walch, *Biblioth. Symb. Vetus.; New Englander*, July, 1865, art. xi; *Amer. Church Rev.* July, 1866, art. iv; Hare, *Contest with Rome*, p. 318; Burnet, *On the Articles* (Introduction); Shedd, *Hist. of Doctrines*, bk. vii; Bingham, *Orig. Eccles.* bk. x, ch. iii; Vossius, *De Tribus Symbolis, Opera*, t. vi; the authorities cited under each head below; and the article SYMBOLICS.

CREED, APOSTLES', an early summary of the Christian faith, in which all Christian churches, Greek, Roman, and Protestant, agree. Augustine calls it *regula fidei brevis et grandis; brevis numero verborum, grandis pondere sententiarum.* "The antiquity of this compendium of Christian doctrine, and the veneration in which it has been held in the Church of Christ, are circumstances which deservedly entitle it to be publicly pronounced from time to time in our assemblies as containing the great outline of the faith we profess, and to be committed to the memory of our children, for the perpetuation of that faith from age to age" (R. Watson, *Works*, vii, 493). It is as follows, Latin and English:

Symbolum Apostolicum.

Latin.	*English.*
Credo in Deum, Patrem omnipotentem, Creatorem cœli et terræ. Et in Jesum Christum, filium ejus unicum, dominum nostrum; qui conceptus est de Spiritu Sancto; natus ex Maria virgine; passus sub Pontio Pilato; crucifixus, mortuus et sepultus; descendit ad inferna; tertia die resurrexit a mortuis; ascendit ad cælos; sedet ad dexteram Dei Patris omnipotentis; inde venturus est judicare vivos et mortuos. Credo in Spiritum Sanctum; sanctam ecclesiam catholicam, sanctorum communionem; remissionem peccatorum; carnis resurrectionem; et vitam æternam. Amen.	I believe in God the Father Almighty, Maker of heaven and earth, and in Jesus Christ his only Son our Lord, who was conceived by the Holy Ghost; born of the Virgin Mary; suffered under Pontius Pilate, was crucified, dead, and buried; he descended into hell; the third day he rose from the dead; he ascended into heaven, and sitteth on the right hand of God the Father Almighty; from thence he shall come to judge the quick and the dead. I believe in the Holy Ghost; the holy Catholic Church, the communion of saints; the forgiveness of sins; the resurrection of the body; and the life everlasting. Amen.

1. It is held by many writers of the Church of Rome that this creed was composed by the apostles themselves, who, during their stay at Jerusalem soon after our Lord's ascension, under the guidance of the Holy Spirit, agreed upon it as a rule of faith and as a mark of distinction, by which they were to know friends from foes. Rufinus says (about A.D. 400, in his *Exposit. Symboli*): "There was an ancient tradition that the apostles, being about to depart from Jerusalem, first settled a rule for their future preaching, lest, after they were separated from each other, they should expound different doctrines to those whom they invited to the Christian faith. Wherefore, being all assembled together and filled with the Holy Ghost, they composed this short rule of their preaching, each one contributing his sentence, and left it as a rule to be given to all believers" (Harvey, *Eccl. Angl. Vindex*, i, 555; Bingham, *Orig. Eccl.* bk. x, ch. iii).

2. A writer under the name of Augustine pretends to tell us what article was contributed by each apostle. Peter said, "I believe in God, the Father Almighty." John, "Maker of heaven and earth." James, "And in Jesus Christ, his only Son our Lord." Andrew, "Who was conceived by the Holy Ghost, born of the Virgin Mary." Philip, "Suffered under Pontius Pilate; was crucified, dead, and buried." Thomas, "He descended into hell; the third day he rose again from the dead." Bartholomew, "He ascended into heaven, and sitteth at the right hand of God the Father Almighty." Matthew, "From thence he shall come to judge the quick and the dead." James, the son of Alphæus, added, "I believe in the Holy Ghost; the holy Catholic Church." Simon Zelotes, "The communion of saints, the forgiveness of sins." Jude, the brother of James, "The resurrection of the body." Matthias, "The life everlasting." And accordingly the creed was called *Symbolum Apostolicum*, as being made up of sentences jointly contributed after the manner of persons paying each their shot or share of the reckoning. But this derivation obviously confounds the word *σύμβολον* with *συμβολή*.

3. It is now generally admitted that the creed, in its present form at least, is not of later date than the fourth century. *a.* Neither Luke in the Acts of the Apostles, nor any ecclesiastical writer before the fifth century, makes mention of an assembly of the apostles for the purpose of forming a creed. *b.* The fathers of the first three centuries, in disputing against heretics, endeavor to prove that the doctrines contained in this creed were taught by the apostles, but they never pretend that the apostles composed it. *c.* Had the apostles composed it, it would have been the same in all churches and ages. But it is quite otherwise. Many creeds were extant in the fourth century, which differed not only in the terms, but also in the articles; some omitted in one were inserted in others, such as the "descent into hell," the "communion of saints," and "the life everlasting."

4. It is almost impossible now to ascertain the authorship of this creed; its antiquity may, however, be inferred from the fact that the whole, as it now stands, with the exception of "he descended into hell," may be found in the works of Ambrose and Rufinus, the former of whom flourished in the third century and the latter in the fourth.

5. In early ages it was not admitted into the Liturgy, though catechumens were required to subscribe it before they were admitted to baptism. The use of it in public worship was first instituted in the Greek Church at Antioch, and introduced into the Roman Church in the eleventh century, whence it passed into the service of the Church of England at the Reformation. "The Westminster divines subjoined it, along with the Ten Commandments and the Lord's Prayer, to their catechisms, accompanied with this explanatory statement: 'It is here annexed, not as though it were composed by the apostles, or ought to be esteemed as canonical Scriptures, as the Ten Commandments and Lord's Prayer, but because it is a brief sum of the Christian faith, agreeable to the Word of God, and anciently received in the churches of Christ' " (Cunningham, *Historical Theology*, i, chap. iii, 80). It finds its place, with the Decalogue and the Lord's Prayer, in the catechisms of the Methodist Episcopal and Presbyterian churches. It is used in the baptismal confession in the Greek, Roman, English, Reformed, Lutheran, Methodist Episcopal, and Protestant Episcopal churches. The phrase "he descended into hell" is omitted in some forms of the creed used in Protestant churches; in the Protestant Episcopal Church it is optional to use it or "he went into the place of departed spirits." It is to be noted that no other creed than the Apostles' is used in baptism by any Church.

6. Many histories and expositions of the Apostles' Creed have been written; the most valuable are, King, *History of the Apostles' Creed* (Lond. 1702, 8vo); Barrow, *Exposition of the Creed*, Works, vol. ii; Pearson, *Exposition of the Creed* (many editions; the best are Dobson's, Lond. 1840, 8vo, with an appendix containing the principal Greek and Latin creeds; and Burton's, Oxford, 1847, 2 vols. 8vo); Witsius, *De Symbolo Apostolico* (Basil. 1739, 4to; translated by Fraser, Glasgow, 1823, 2 vols. 8vo); Leighton, *Works*, vol. ii. A thorough investigation on the Roman Catholic side may be found in Meyers, *De Symboli Apostolici titulo, origine*, etc. (Trevir. 1849, 8vo). Dr. Nevin furnishes an able discussion in the *Mercersburgh Review*, 1849, three articles; also 1858, p. 395 sq. There is an elaborate article by Proudfit, *Princeton Review*, Ootober, 1852, which opposes not only the Tridentine theory of the origin of the creed, but also the modern mystico-philosophical theory of Möhler and Newman. Apart from these questions, nearly all the churches of Christendom agree in reverence for this ancient formula as a beautiful, true, and comprehensive statement of the great fundamental facts of Christianity; admitting, with Dr. Schaff, that, though it is "not in form the production of the apostles, it is a faithful compend of their doctrines, and comprehends the leading articles of the faith in the triune God and his revelation, from the creation to the life everlasting, in sublime simplicity, in unsurpassable brevity, in the most beautiful order, and with liturgical solemnity; and to this day it is the common bond of Greek, Roman, and evangelical Christendom" (Schaff, *History of the Apostolic Church*, § 142, p. 568). See also Hinds, *Early Christianity*, pt. iii, ch. vi; Procter, *On Common Prayer*, p. 227; Harvey, *The Hist. etc., of the Three Creeds*; Guericke, *Allg. christl. Symbolik*, § 12; Bingham, *Orig. Eccles.* bk. x, ch. iii; Goode, *Divine Rule of Faith and Practice*, ch. iv; Cunningham, *Historical Theology*, ch. iii; Peck, *Divine Rule of Faith and Practice*, 207 sq.; *Princeton Review*, Oct. 1852, art. iv; Shedd, *History of Doctrines*, bk. vii, ch. i, § 2; Martensen, *Dogmatics* (Clark's Library), § 23.

CREED, ATHANASIAN, one of the *three* great creeds. It was at one time supposed to have been drawn up by Athanasius in the fourth century. It is also called, from its opening words, the symbol *Quicunque vult*. It is as follows:

Symbolum Athanasii.

Latin.	*English.*
Quicunque vult salvus esse, ante omnia opus est ut teneat catholicam fidem. Quam nisi quisque integram, inviolatamque servaverit: absque dubio in æternum peribit. Fides autem catholica hæc est, ut unum Deum in Trinitate; et Trinitatem in Unitate veneremur; neque confundentes personas: neque substantiam separantes. Alia est enim persona Patris; alia Filii: alia Spiritus Sancti. Sed Patris, et Filii, et Spiritus Sancti, una est Divinitas; æqualis gloria, coæterna majestas. Qualis Pater, talis Filius, talis Spiritus Sanctus. Increatus Pater, increatus Filius, increatus Spiritus Sanctus. Immensus Pater, immensus Filius, immensus Spiritus Sanctus. Æternus Pater, æternus Filius, æternus Spiritus Sanctus. Et tamen non tres æterni, sed unus æternus. Sicut non tres increati, nec tres immensi, sed unus increatus, et unus immensus. Similiter omnipotens Pater, omnipotens Filius, omnipotens Spiritus Sanctus. Et tamen non tres omnipotentes, sed unus omnipotens. Ita Deus Pater, Deus Filius, Deus Spiritus Sanctus. Et tamen non tres Dii, sed unus est Deus. Ita Dominus Pater, Dominus Filius, Dominus Spiritus Sanctus. Et ta-	Whoever will be saved, before all things it is necessary that he hold the catholic faith. Which faith, except every one do keep whole and undefiled, without doubt he shall perish everlastingly. And the catholic faith is this: that we worship one God in Trinity, and Trinity in Unity; neither confounding the persons, nor dividing the substance. For there is one person of the Father, another of the Son, and another of the Holy Ghost. But the Godhead of the Father, of the Son, and of the Holy Ghost is all one: the glory equal, the majesty coeternal. Such as the Father is, such is the Son, and such is the Holy Ghost. The Father uncreate, the Son uncreate, and the Holy Ghost uncreate. The Father incomprehensible, the Son incomprehensible, and the Holy Ghost incomprehensible. The Father eternal, the Son eternal, and the Holy Ghost eternal. And yet they are not three eternals, but one eternal. As also there are not three incomprehensibles, nor three uncreated, but one uncreated, and one incomprehensible. So likewise the Father is almighty, the Son almighty, and the Holy Ghost almighty. And yet there are not three al-

men non tres Domini, sed unus est Dominus. Quia sicut singillatim unamquamque Personam Deum et Dominum confiteri Christiana veritate compellimur, ita tres Deos aut Dominos dicere, catholica religione prohibemur. Pater a nullo est factus; nec creatus, nec genitus. Filius a Patre solo est; non factus, nec creatus sed genitus. Spiritus Sanctus a Patre et Filio; non factus, nec creatus, nec genitus, sed procedens. Unus ergo Pater, non tres Patres; unus Filius, non tres Filii; unus Spiritus Sanctus, non tres Spiritus Sancti. Et in hac Trinitate nihil prius aut posterius, nihil majus aut minus. Sed totæ tres personæ coæternæ sibi sunt, et coæquales. Ita ut per omnia (sicut jam supra dictum est) et Unitas in Trinitate, et Trinitas in Unitate veneranda sit. Qui vult ergo salvus esse, ita de Trinitate sentiat. Sed necessarium est ad æternam salutem, ut incarnationem quoque Domini nostri Jesu Christi fideliter credat. Est ergo fides recta, ut credamus, et confiteamur, quia Dominus noster Jesus Christus, Dei Filius, Deus et homo est. Deus est ex substantia Patris ante sæcula genitus; et homo est ex substantia matris in sæculo natus. Perfectus Deus, perfectus homo; ex anima rationali et humana carne subsistens. Æqualis Patri secundum Divinitatem, minor Patre secundum humanitatem. Qui licet Deus sit et homo, non duo tamen, sed unus est Christus. Unus autem non conversione Divinitatis in carnem, sed assumptione humanitatis in Deum. Unus omnino, non confusione substantiæ, sed unitate personæ. Nam sicut anima rationalis et caro unus est homo, ita Deus et homo unus est Christus. Qui passus est pro salute nostra, descendit ad inferos, tertia die resurrexit a mortuis. Ascendit ad cœlos, sedet ad dexteram Dei Patris Omnipotentis; inde venturus est judicare vivos et mortuos. Ad cujus adventum omnes homines resurgere habent cum corporibus suis, et reddituri sunt de factis propriis rationem. Et qui bona egerunt ibunt in vitam æternam, qui vero mala in ignem æternum.

Hæc est fides catholica, quam nisi quisque fideliter firmiterque crediderit, salvus esse non poterit. Gloria Patri, et Filio, et Spiritui Sancto. Sicut erat in principio, et nunc, et semper, et in sæcula sæculorum.

mightys, but one almighty. So the Father is God, the Son is God, and the Holy Ghost is God. And yet there are not three Gods, but one God. So likewise the Father is Lord, the Son Lord, and the Holy Ghost Lord. And yet not three Lords, but one Lord. For like as we are compelled by the Christian verity to acknowledge every person by himself to be God and Lord, so are we forbidden by the catholic religion to say there be three Gods and three Lords. The Father is made of none, neither created nor begotten. The Son is of the Father alone; not made, nor created, but begotten. The Holy Ghost is of the Father and of the Son; neither made, nor created, nor begotten, but proceeding. So there is one Father, not three Fathers; one Son, not three Sons; one Holy Ghost, not three Holy Ghosts. And in this Trinity none is afore or after other; none is greater or less than another. But the whole three persons are coeternal together, and coequal. So that in all things, as is aforesaid, the Unity in Trinity and the Trinity in Unity is to be worshipped. He therefore that will be saved must thus think of the Trinity. Furthermore, it is necessary to everlasting salvation that he also believe rightly the incarnation of our Lord Jesus Christ. For the right faith is that we believe and confess that our Lord Jesus Christ, the Son of God, is God and man. God of the substance of the Father, begotten before the worlds; and man of the substance of his mother, born in the world. Perfect God and perfect man, of a reasonable soul and human flesh subsisting. Equal to the Father as touching his Godhead, and inferior to the Father as touching his manhood. Who, although he be God and man, yet he is not two, but one Christ. One, not by conversion of the Godhead into flesh, but by taking of the manhood into God. One altogether, not by confusion of substance, but by unity of person. For as the reasonable soul and flesh is one man, so God and man is one Christ. Who suffered for our salvation, descended into hell, rose again the third day from the dead. He ascended into heaven, he sitteth on the right hand of the Father, God Almighty. From whence he shall come to judge the quick and the dead. At whose coming all men shall rise again with their bodies, and shall give account for their own works. And they that have done good shall go into life everlasting, and they that have done evil into everlasting fire. This is the catholic faith which, except a man believe faithfully, he cannot be saved. Glory be to the Father, and to the Son, and to the Holy Ghost. As it was in the beginning, is now, and ever shall be, world without end. Amen.

1. That this creed was not composed by Athanasius is clear on the following, among other grounds: (*a*) Athanasius himself does not mention it, nor do any of his contemporaries, or of the writers of the following century, ascribe it to him. (*b*) The contents show that it could not have been written by him. The word ὁμοούσιος, *consubstantial*, which, in the time of Athanasius, was the token of distinction between the Catholics and the Arians, does not occur in the creed, an omission which would be inexplicable in any confession composed by this father. It so plainly rejects the errors of the Nestorians, Eutychians, and Monothelites, that it must have been written after the promulgation of those heresies. The doctrine concerning the procession of the Holy Spirit from the Son as well as from the Father, distinctly asserted in this creed, is one which, however scriptural and true, was not held by the Eastern Church in the time of Athanasius. (*c*) The *style* is that of a Latin, not of a Greek writer.

2. Vossius, Quesnel, and others ascribe this creed to Vigilius, bishop of Thapsus, in Africa; others to Vincentius of Lerins (5th century), and again others to Venantius Fortunatus, a French bishop of the 6th century. Waterland ascribes it to Hilary, bishop of Arles, for the following reasons: (1.) Because Honoratus of Marseilles, the writer of his life, tells us that he composed an "Exposition of the Creed," a more proper title for the Athanasian than that of "Creed" simply, which it now bears. (2.) Hilary was a great admirer and follower of Augustine, and the whole composition of this creed is in a manner on Augustine's plan, both with respect to the Trinity and incarnation. (3.) It is agreeable to the style of Hilary, as far as we can judge from the little that is left of his works. The proofs in support of his opinion are far from clear and satisfactory.

3. About A.D. 570 this creed became so famous as to be the subject of comment; but, for several years after, it had not acquired the title of Athanasian, but was simply styled "the Catholic faith." The title of Athanasian probably became attached to it during the Arian controversy in Gaul, as being an exposition of the system of doctrine which was opposed to the Arian system, and which would naturally be called Athanasian from its chief propounder. Many expositors of this creed, and even bishops of the Church of England, while holding the doctrine of the Athanasian Creed and approving its terms, strongly object to the damnatory clauses. Archbishop Tillotson, bishop Taylor, and bishop Tomline, all concur in regret that assertions of so peremptory a nature (referring to the damnatory clauses), unexplained and unqualified, should have been used in any human composition. On the other hand, "Waterland (*Critical History of the Athanasian Creed; Works*, Oxford, 1843, vol. iii) says: 'The use of it will hardly be thought superfluous so long as there are any Arians, Photinians, Sabellians, Macedonians, Apollinarians, Nestorians, or Eutychians in these parts.' (See articles under these heads.) With respect to what are called the 'damnatory clauses' (the clauses, namely, 'Which faith except every one do keep whole and undefiled, without doubt he shall perish everlastingly;' and, 'This is the Catholic faith, which except a man believe faithfully, he cannot be saved'), the churches which adopt the creed do not mean by them to imprecate curses, but to declare, as a logical sequence of a true faith being necessary to salvation, that those who do not hold the true faith are in danger of perishing; as it is said, Mark xvi, 16, 'He that believeth not shall be damned.' These clauses are also held to apply to those who deny the substance of the Christian religion, and not infallibly to every person who may be in error as to any one particular article. A rubric to this effect was drawn up by the commissioners appointed in 1689 for the review of the English Common Prayer-book, but none of their suggestions took effect. Compare also the 18th Article of the Church of England with these clauses" (Chambers, s. v.). The creed is received in the Greek, Roman, and English churches, but is left out of the service of the Protestant Episcopal Church in America. The Convention of 1785 passed an act expunging both the Athanasian and Nicene creeds from the proposed Book of

Common Prayer; but when the book was placed before the English bishops they required the restoration of both creeds before they would consent to consecrate the American bishops. The archbishops of Canterbury and York, in the spring of 1786, wrote to the Church committee to that effect, whereupon another Convention was held in Wilmington, Delaware, October, 1786. Bishop White relates that "the Nicene Creed was restored without debate or difficulty, *but the Convention wholly refused to restore the Athanasian Creed*," and that the members from New England and bishop Seabury yielded their consent to leave it out with great reluctance. Had it been retained, bishop White declared his intention never to read it in his church (*Christian Times*, March, 1866). Many in the Church of England desire its omission from their book; thus the *Church of England Quarterly* (April, 1855, p. 19): "The Athanasian Creed finds few real lovers as a portion of a public service. No one supposes that it was the work of Athanasius; no one is now, at least among us, in any danger from the errors it denounces; no one believes in his heart the damnatory clauses; for no one believes that all the members of the Greek Church are necessarily consigned to everlasting damnation; and thus, every time the creed is read, the officiating minister has solemnly to enunciate what neither he nor any of his hearers believe. It is true that, by distinguishing between the creed itself and the damnatory clauses he may save himself, mentally, from declaring a falsehood; but surely this is reason enough for the removal of the creed from our Liturgy. We have had too much in our Church of mental reservations. So far as the doctrine of the Trinity is concerned, it is abundantly insisted on in the Apostles' and Nicene Creeds."

See, besides the authorities already cited, Bingham, *Orig. Eccles.* bk. x, ch. iv, § 18; Mosheim, *Ch. Hist.* i, 240; Vossius, *Diss. de Symbolo Athanasiano* (Opp. vi, 616); Palmer, *Orig. Liturg.* i, 234; Radcliffe, *Athanasian Creed illustrated* (Lond. 1844, 8vo); Schaff, in *Amer. Presb. Rev.* 1866, 584 sq.; also in his *Hist. of the Christ. Church*, § 132; Fletcher, *Works* (N. Y. ed.), iii, 210; Browne, *On the Thirty-nine Articles*, art. viii, § 4.

CREED, NICENE AND CONSTANTINOPOLITAN, a creed adopted at the Council of Nice A.D. 325, and enlarged at the second Council of Constantinople A.D. 381, by which the faith of the Church with regard to the person of Christ was set forth in opposition to certain errors, especially Arianism. See ARIUS; CHRISTOLOGY; NICE, COUNCIL OF.

1. The *Nicene Creed* "is found, together with the similar Eusebian (Palestinian) confession, in the well-known Epistle of Eusebius of Cæsarea to his diocese (*Epist. ad suæ parochiæ homines*), which is given by Athanasius at the close of his *Epist. de decretis Nicænæ Synodi* (Opera, i, 239, and in Thilo's *Bibl.* i, 84 sq.); also, though with some variations, by Theodoret, *H. E.* i, 12, and Socrates, *H. E.* i, 8. Sozomen omitted it (*H. E.* i, 10) from respect to the *disciplina arcani*. The Symbolum Nicænum is given also, with unessential variations, by Athanasius, in his letter to the emperor Jovian, c. 3, and by Gelasius Cyzic., *Lib. Synod. de Concil. Nicæno*, ii, 35. On the unimportant variations in the text, comp. Walch, *Bibl. Symbol.* p. 75 sq., and A. Hahn, *Bibliothek der Symbole* (1842). Comp. also the parallel creeds of the Nicene age in the Appendix to Pearson's *Exposition of the Creed.*" (Schaff, *Hist. of the Christian Church*, § 129; see also Dorner, *Person of Christ* [Edinb. transl.], ii, 247, 497.)

We give the Nicene Creed, Greek and English, in parallel columns. [The parts omitted at Constantinople are put in brackets in the Greek text.]

Greek.	*English.*
Πιστεύομεν εἰς ἕνα Θεὸν, πατέρα παντοκράτορα, πάντων ὁρατῶν τε καὶ ἀοράτων ποιητην· καὶ εἰς ἕνα κύριον Ἰησοῦν Χριστὸν τὸν υἱὸν τοῦ Θεοῦ, γεννηθέντα ἐκ τοῦ πατρὸς [μονογενῆ, τουτέστιν ἐκ τῆς οὐσίας τοῦ πατρὸς, Θεὸν ἐκ Θεοῦ], φῶς ἐκ φωτὸς, Θεὸν ἀληθινὸν ἐκ Θεοῦ ἀληθινοῦ, γεννηθέντα οὐ ποιηθέντα, ὁμοούσιον τῷ πατρὶ, δι' οὗ τὰ πάντα ἐγένετο [τά τε ἐν τῷ οὐρανῷ καὶ τὰ ἐν τῇ γῇ], τὸν δι' ἡμᾶς τοὺς ἀνθρώπους καὶ διὰ τὴν ἡμετέραν σωτηρίαν κατελθόντα καὶ σαρκωθέντα καὶ ἐνανθρωπήσαντα, παθόντα καὶ ἀναστάντα τῇ τρίτῃ ἡμέρᾳ· ἀνελθόντα εἰς τοὺς οὐρανους, καὶ ἐρχόμενον κρῖναι ζῶντας καὶ νεκρούς. Καὶ εἰς τὸ ἅγιον πνεῦμα. [Τοὺς δὲ λέγοντας, ὅτι ἦν ποτε ὅτε οὐκ ἦν, καὶ πρὶν γενηθῆναι οὐκ ἦν, καὶ ὅτι ἐξ οὐκ ὄντων ἐγένετο, ἢ κτιστὸν ἐξ ἑτέρας ὑποστάσεως ἢ οὐσίας φάσκοντας εἶναι, ἢ τρεπτὸν ἢ ἀλλοιωτὸν τὸν υἱὸν τοῦ Θεοῦ, ἀναθεματίζει ἡ ἁγία καθολικὴ καὶ ἀποστολικὴ ἐκκλησία.] (Athanasius, *Epist. de decret. Syn. Nic.*; Eus. Cæs. *Ep. ad Cæsariens.*; Socrates, *Hist. Eccles.* i, 8.)	We believe in one God the Father Almighty, Maker of all things visible and invisible; and in one Lord Jesus Christ, the Son of God begotten of the Father, Only-begotten, that is of the substance of the Father; God of God; Light of Light; very God of very God; begotten, not made; of the same substance with the Father; by *whom* all things were made, *both* things in heaven and things in earth; who for us men and our salvation descended and became flesh, was made man, suffered, and rose again the third day. He ascended into heaven; he cometh to judge the quick and dead. And in the Holy Ghost. But those that say *there was a time when* he was not; or that he was not before he was begotten; or that he was made from that which had no being; or who affirm the Son of God to be of any other substance or essence, or *created*, or variable, or mutable, such persons doth the Catholic and Apostolic Church anathematize.

It was established by this creed that the Son is of the same essence (ὁμοούσιος) with the Father.

2. *The Nicæno-Constantinopolitan Creed.*—The doctrine of the Person of Christ, as settled at Nice (A.D. 325), was disputed, especially as to the use of the term ὁμοούσιος by the Semi-Arians and Eusebians (see Gieseler, *Ch. History*, i, § 81, 82). Moreover, not only the Semi-Arians, but even many of the Nicenians (followers of the Nicene Creed), held, with the Arians, and especially the Macedonians (q. v.), that the Holy Spirit was created by the Father (Gieseler, l. c.). After ineffectual attempts, at several synods, to agree upon a formula, the Nicene symbol, with certain additions, was adopted at the second Œcumenical Council of Constantinople A.D. 381. The creed thus adopted is given below, in Greek and English (the form in the English Prayer-book differing somewhat from the Greek). The parts added at Constantinople are put in brackets.

Symbolum Nicæno-Constantinopolitanum.

Greek.	*English.*
Πιστεύομεν εἰς ἕνα Θεὸν, πατέρα παντοκράτορα [ποιητην οὐρανοῦ καὶ γῆς], ὁρατῶν τε πάντων καὶ ἀοράτων· καὶ εἰς ἕνα κύριον Ἰησοῦν Χριστὸν, τὸν υἱὸν τοῦ Θεοῦ [τὸν μονογενῆ], τὸν ἐκ τοῦ πατρὸς γεννηθέντα [πρὸ πάντων τῶν αἰώνων], φῶς ἐκ φωτὸς, Θεὸν ἀληθινὸν ἐκ Θεοῦ ἀληθινοῦ, γεννηθέντα οὐ ποιηθέντα ὁμοούσιον τῷ πατρὶ δι' οὗ τὰ πάντα ἐγένετο. Τὸν δι' ἡμᾶς τοὺς ἀνθρώπους καὶ διὰ τὴν ἡμετέραν σωτερίαν κατελθόντα [ἐκ τῶν οὐρανῶν], καὶ σαρκωθέντα [ἐκ πνεύματος ἁγίου καὶ Μαρίας τῆς παρθένου], καὶ ἐνανθρωπήσαντα· [σταυρωθέντα τε ὑπέρ ἡμῶν ἐπὶ Ποντίου Πιλάτου], καὶ παθόντα [καὶ ταφέντα] καὶ ἀναστάντα τῇ τρίτῃ ἡμέρᾳ [κατὰ τὰς γραφάς]· καὶ ἀνελθόντα εἰς τοὺς οὐρανούς· [καὶ καθεζόμενον ἐκ δεξιῶν τοῦ πατρὸς], καὶ πάλιν ἐρχόμενον [μετὰ δόξης] κρῖναι ζῶντας καὶ νεκρούς· [οὗ τῆς βασιλείας οὐκ ἔσται τέλος]. Καὶ εἰς πνεῦμα τὸ ἅγιον [τὸ κύριον, τὸ ζωοποιὸν, τὸ ἐκ τοῦ πατρὸς ἐκπορευόμενον, τὸ σὺν πατρὶ καὶ υἱῷ συμπροσκυνούμενον, καὶ συνδοξαζόμενον, τὸ λαλῆσαν διὰ τῶν προφητῶν. Εἰς μίαν ἁγίαν καθολικὴν καὶ ἀποστολικὴν ἐκκλησίαν· ὁμολογοῦμεν ἓν βάπτισμα εἰς ἄφεσιν ἁμαρτιῶν· προσδοκῶμεν ἀνάστασιν νεκρῶν καὶ ζωὴν τοῦ μέλλοντος αἰῶνος]. Ἀμὴν.	(1) I believe in one God the Father Almighty, Maker [of heaven and earth], and of all things visible and invisible: (2) And in one Lord Jesus Christ, the only-begotten Son of God, begotten of his Father [before all worlds]; (God of God), Light of Light, very God of very God, begotten, not made, being of one substance with the Father; by whom all things were made; (3) Who for us men and for our salvation came down from heaven, and was incarnate [by the Holy Ghost of the Virgin Mary], and was made man, [and was crucified also for us under Pontius Pilate,] he suffered and was buried; and the third day he rose again, according to the Scriptures; and ascended into heaven, [and sitteth on the right hand of the Father]. And he shall come again with glory to judge both the quick and the dead [whose kingdom shall have no end]. And I believe in the Holy Ghost [the Lord and Giver of Life, who proceedeth from the Father (and the Son), who with the Father and the Son together is worshipped and glorified, who spake by the prophets. And I believe one holy catholic and apostolic Church. I acknowledge one baptism for the remission of sins; and I look for the resurrection of the dead, and the life of the world to come. Amen.]

The words "and from the Son" (Lat. "filioque") were not added till the fifth century. The first copies of this creed, in the Council of Constantinople, and the councils of Ephesus and Chalcedon, have only the words "proceeding from the Father," without any mention of the Son. This addition to the creed of the Western Church first appears in the acts of an assembly of bishops at Braga (412)—"procedentem a Patre et Verbo" (Concil. Bracar. i; Mansi, iv, 287)—and in the third Council of Toledo (589), according to some copies (Mansi, ix, 981). Mabillon (*De Lit. Gallic.* i, 3) says of it, "quod a Caroli M. tempore exordium ducit." It was then (circ. 800) of old standing. Very probably it is due to the Spanish Church in the middle of the fifth century (Harvey, *Hist. of the Creeds*, p. 452 sq.; Hardwick, *Middle Age*, p. 61, n. 4; Browne, *Exposition of the Articles*, p. 114 sq.).—Procter, *On Common Prayer*, p. 234. See FILIOQUE.

Among the Syriac MSS. discovered some years ago, now in the British Museum, is a version of the original Nicene Creed, and also the Nicæno-Constantinopolitan, of which Mr. B. Harris Cowper has printed translations. The differences between this Syrian version and the received text of both creeds are very slight.

The Nicene Creed is held to be of authority in the Greek and Roman churches, and is admitted by most Protestant churches. It was adopted, with the Apostles' and Athanasian creeds, by the Protestants after the Reformation, and was introduced into the *Formula Concordiæ* (q. v.) of the Lutherans and into the English Prayer-book. On its value in theology, see Shedd, *History of Doctrines*, bk. iii, ch. iii; Schaff, *History of the Christian Church*, § 127–131; Cunningham, *Historical Theology*, ch. ix; Dorner, *Doctrine of the Person of Christ*, div. i, vol. ii; Neander, *History of Dogmas* (Ryland's transl.), i, 291–294; Stanley, *Eastern Church* (Lect. iv.); Browne, *On the 39 Articles*, 223 sq.; Waterland, *Works*, vol. iii; Bull, *Defensio Fidei Nicenæ* (transl. in Lib. of Anglo-Catholic Theology, Oxford, 1851, 2 vols.). See also Forbes, *Short Explanation of the Nicene Creed* (Lond. 1854); Palmer, *Origines Liturgicæ*, ii, 56; Procter, *On Common Prayer*, p. 234; Harvey, *On the three Creeds;* Harvey, *Eccles. Anglic. Vindex*, i, 553 sq.; Bingham, *Orig. Eccles.* bk. x, ch. iv; *Amer. Quart. Church Review*, April, 1868, art. v.

CREED OF CHALCEDON. See CHALCEDON; CHRISTOLOGY.

CREED OF POPE PIUS IV, a summary of the doctrines of the Roman Church as contained in the canons and decrees of the Council of Trent. It was issued in the form of a bull in December, 1564, by pope Pius IV, and usually bears his name. All bishops, ecclesiastics, and teachers in the Romish Church, as well as all converts from Protestantism, publicly profess assent to it. The original may be found in Richter, *Canones et decreta Concil. Trident.* p. 574, in Cramp, *Text-book of Popery*, p. 542; and in Elliott, *Delin. of Romanism*, ch. i. We subjoin an English version. It will be seen that the former part is the Nicene Creed, slightly altered.

I, A. B., believe and profess with a firm faith all and every one of the things which are contained in the symbol of faith which is used in the holy Roman Church; namely, I believe in one God the Father Almighty, Maker of heaven and earth, and of all things visible and invisible; and in one Lord Jesus Christ, the only-begotten Son of God, born of the Father before all worlds, God of God, Light of Light, true God of true God, begotten, not made, consubstantial to the Father, by whom all things were made; who for us men and for our salvation came down from heaven, and was incarnate by the Holy Ghost of the Virgin Mary, and was made man; was crucified also for us under Pontius Pilate, suffered and was buried, and rose again the third day according to the Scriptures, and ascended into heaven, sits at the right hand of the Father, and will come again with glory to judge the living and the dead, of whose kingdom there will be no end; and in the Holy Ghost, the Lord and Life-giver, who proceeds from the Father and the Son, who, together with the Father and the Son, is adored and glorified, who spake by the holy prophets; and one holy catholic and apostolic Church. I confess one baptism for the remission of sins; and I expect the resurrection of the dead, and the life of the world to come. Amen.

I most firmly admit and embrace apostolical and ecclesiastical traditions, and all other constitutions and observances of the same Church. I also admit the sacred Scriptures according to the sense which the holy mother Church has held and does hold, to whom it belongs to judge of the true sense and interpretation of the Holy Scriptures; nor will I ever take or interpret them otherwise than according to the unanimous consent of the fathers. I profess, also, that there are truly and properly seven sacraments of the new law, instituted by Jesus Christ our Lord, and for the salvation of mankind, though all are not necessary for every one—namely, baptism, confirmation, eucharist, penance, extreme unction, orders, and matrimony, and that they confer grace; and of these, baptism, confirmation, and order cannot be reiterated without sacrilege. I do also receive and admit the ceremonies of the Catholic Church, received and approved in the solemn administration of all the above-said sacraments. I receive and embrace all and every one of the things which have been defined and declared in the holy Council of Trent concerning sin and justification. I profess likewise that in the mass is offered to God a true, proper, and propitiatory sacrifice for the living and the dead; and that in the most holy sacrament of the eucharist there is truly, really, and substantially the body and blood, together with the soul and divinity, of our Lord Jesus Christ; and that there is made a conversion of the whole substance of the bread into the body, and of the whole substance of the wine into the blood, which conversion the Catholic Church calls transubstantiation. I confess, also, that under either kind alone, whole and entire, Christ and a true sacrament is received. I constantly hold that there is a purgatory, and that the souls detained therein are helped by the suffrages of the faithful. Likewise that the saints reigning together with Christ are to be honored and invocated, that they offer prayers to God for us, and that their relics are to be venerated. I most firmly assert that the images of Christ, and of the mother of God ever Virgin, and also of the other saints, are to be had and retained, and that due honor and veneration are to be given to them. I also affirm that the power of indulgences was left by Christ in the Church, and that the use of them is most wholesome to Christian people. I acknowledge the holy catholic and apostolic Roman Church, the mother and mistress of all churches; and I promise and swear true obedience to the Roman bishop, the successor of St. Peter, prince of the apostles and vicar of Jesus Christ. I also profess and undoubtedly receive all other things delivered, defined, and declared by the sacred canons and general councils, and particularly by the holy Council of Trent; and likewise I also condemn, reject, and anathematize all things contrary thereto, and all heresies whatsoever condemned, rejected, and anathematized by the Church. This true catholic faith, out of which none can be saved, which I now freely profess and truly hold, I, A. B., promise, vow, and swear most constantly to hold, and profess the same whole and entire, with God's assistance, to the end of my life; and to procure, as far as lies in my power, that the same shall be held, taught, and preached by all who are under me, or are intrusted to my care, by virtue of my office. So help me God, and these holy Gospels of God. Amen.

This creed is also known under the name of the *Professio Fidei Tridentina*, or *Forma Professionis fidei Catholicæ*. See Cramp, *Text-book of Popery*, p. 436; Buckley, *History of Council of Trent*, p. 519; Elliott, *Delineation of Romanism*, bk. i, ch. i; Streitwolf und Klener, *Lib. Symb. ecclesiæ Cath.* (Gött. 1846, t. ii).

Creek (κόλπος, *bosom*, as elsewhere rendered), a *bay* or inlet from the sea (so Josephus, *Ant.* iii, 1, 5), e. g. St. Paul's Bay, on the island of Malta (q. v.), where the apostle was wrecked (Acts xxvii, 39).

Creeping Thing (שֶׁרֶץ, *she'rets*, any *swarming* creature; or רֶמֶשׂ, *re'mes*, any *low-gliding* animal; ἑρπετόν) is used in Scripture to designate not only *reptiles*, properly so called, but also insects, aquatic creatures, and even the smaller mammalia. See REPTILE.

Creighton, William, D.D., was born in New York, Feb. 22d, 1793. He was educated in Columbia College, graduating in the class of 1812, and received his doctor's degree in 1830. He was ordained deacon in 1815, and soon after was employed in Grace Church, N. Y., as an assistant to the Rev. Dr. Bowen. In 1816 he was called to the rectorship of St. Mark's Church, in the Bowery, of which he remained rector until 1836, when he became rector of Zion Church, Greenburgh, and resigned the same in 1845. In the year 1836 the Parish of Christ Church, Tarrytown, was organized, of which he was chosen rector, and remained so up to the time of his death, a period of twenty-nine years,

without salary. In 1845 he was elected president of the Convention of the Diocese of New York, and was re-elected every succeeding year until the consecration of the Rev. Dr. Wainwright in 1852. At the first election of a provisional bishop of New York he was chosen to that high office, but, from various considerations, declined its acceptance. He was also chosen president of the House of Clerical and Lay Deputies of the General Conventions of 1853, 1856, and 1859 respectively. He had previously served the Church in different stations of trust, as member of the Standing Committee, chairman of the Missionary Committee, etc. In 1849-50 the Church of St. Mary's, Beechwood, was founded by him and his son-in-law, the Rev. Edward N. Mead, D.D.; the principal part of the cost for the erection and ground being contributed by them, and divine service being maintained by them in it, as a free church, to the present time. Dr. Creighton died at Tarrytown, April 23d, 1865.—*Church Review*, July, 1865.

Crell (Crellius), **Johannes**, a Socinian divine, whose works form part of the Bibliotheca Fratrum Polonorum, was born in Franconia in 1590, and studied at Nuremberg and other German universities. Originally a Lutheran, he afterwards adopted the principles of Socinus, and went to Cracow, in Poland, in 1612, where he became a preacher; he then was appointed professor of Greek, and afterwards rector of the university at that place. He died in 1633. His works are collected in *Opera omnia exegetica, didactica, et polemica, magnam partem hactenus inedita* (Irenopoli, 1656, 4 vols. in 3); *Touching one God* (trans. Lond. 1665, 4to).—Darling, *Cyclop. Bibliographica*, i, 812.

Crell (or Krell), **Nicholas**, a distinguished German jurist, was born at Leipsic between the years 1550-53; graduated at Leipsic 1575, and was called to the court of the elector Augustus. Christian I, who succeeded his father in 1586, made him privy councillor and chancellor. Augustus had been zealous in opposing Crypto-Calvinism, but Christian I did not share his partiality for the *Formula Concordiæ*, and Crell, by his order, superintended the preparation of a German Bible, with practical notes, for popular use. Christian dying before its completion (Sept. 25, 1591), the work was discontinued. The electress Sophia, who governed during the minority of her son Christian II, favored the extreme Lutheran party, and Crell was thrown into prison. In Sept., 1597, he had a hearing in prison, and in 1599 he was condemned as unfaithful to the elector and to his trust. His appeal to the imperial court at Spires was rejected, and he was executed Oct. 9, 1601, commending himself to God. See Niedner, *Ztsch. f. hist. Theol.* (1848, p. 315); Hutterus, *Concordia Concors*, c. 49; Arnold, *Kirchen- u. Ketzerhistorie*, ii, 16, 32; Herzog, *Real-Encyklop.* iii, 183; and Crypto-Calvinistic Controversy.

Crell, Samuel, grandson of Johannes Crell, born in 1660. After being for some time a preacher at Königswalde, he lived successively in Berlin, in the Netherlands, and in England, where he became acquainted with Sir Isaac Newton, Dr. Grabe, and other eminent men, by whom he was highly esteemed. He died at a very advanced age at Amsterdam in 1747. He wrote several historical treatises on the ante-Nicene fathers, and one on the Introduction to St. John's Gospel. He was a disciple of Socinus, but it is said that towards the end of his life he received the orthodox view of the atonement. See Fock, *Socinianismus*, etc., p. 240; Nichols, *Calvinism and Arminianism*, ii, 342.

Crescens (Κρήσκης, for Latin *Crescens, growing*), an assistant of the apostle Paul (2 Tim. iv, 10, where he is stated to have left Rome for Galatia), A.D. 64. He is generally supposed to have been one of the seventy disciples of Christ. It is alleged in the *Apostolical Constitutions* (vii, 46), and by the fathers of the Church, that he preached the Gospel in Galatia, a fact probably deduced conjecturally from the only text (2 Tim. iv, 10) in which his name occurs. There is a less ancient tradition (in Sophronius), according to which Crescens preached, went into Gaul (Galatia; see Theodoret on 2 Tim. l. c.), and became the founder of the Church in Vienne; but it deserves no notice, having probably no other foundation than the resemblance of the names Galatia and Gallia. From the fact of his having a Latin name, many have inferred that he was a Christian of Rome. (See Bechler, *De Crescente*, Viteb. 1689.)

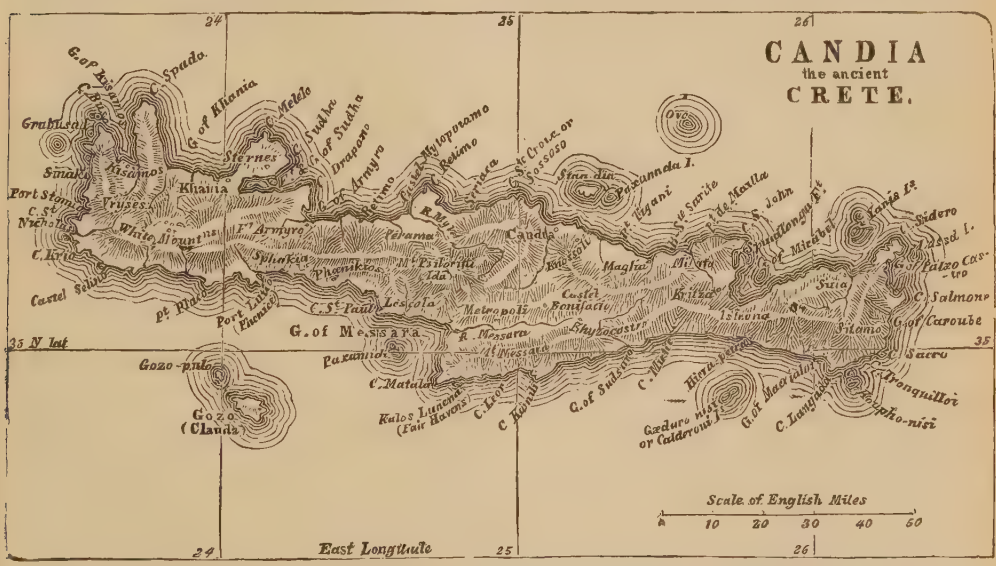
Crescens, a Cynic philosopher who acquired great influence over the mind of the emperor Aurelius. While the other schools of philosophers looked down with contempt on the Christians, the Cynics had been more favorably inclined towards them; but Justin Martyr having offended Crescens by some remarks he made against him in an apology addressed to the emperor, Crescens swore to be revenged, and, to accomplish his purpose, incited the emperor to persecute the Christians. Justin Martyr was one of the victims of this persecution. See Justin Martyr.

Crescent, the emblem of the Ottoman empire. See Constantinople (I, 1).

Crespin, Jean, a French Reformer, born at Arras, studied law at Löwen and Paris, but, being persecuted for his religious opinions, he fled to Geneva in 1548. Here he established a printing-office, was made a citizen in 1552, and died in 1572. The books issued from his press, which can be recognised by the sign of an anchor, are remarkable for beauty of typography and for correctness. Among his own writings are, *Histoire des martyrs persecutés et mis à mort pour la vérité de l'évangile* (Gen. 1570, fol.; 1619); *L'état de l'église des tems des apôtres jusqu'en* 1560 (1564, and a transl., *The Estate of the Church* [Lond. 1602, 4to]); *Bibliotheca studii theologici ex patribus collecta* (1581, fol.).

Crete (Κρήτη), one of the largest islands in the Mediterranean, now called *Candia*, and by the Turks *Kirid*. It is 160 miles long, but of very unequal width, varying from 35 to 6 miles. It is situated at the entrance of the Archipelago, having the coast of the Morea to the south-west, that of Asia Minor to the north-east, and that of Libya to the south. Great antiquity was affected by the inhabitants, and it has been supposed by some that the island was originally peopled from Egypt; but this is founded on the conclusion that Crete was the Caphtor of Deut. ii, 23, etc., and the country of the Philistines, which seems more than doubtful. See Caphtor. Surrounded on all sides by the sea, the Cretans were excellent sailors, and their vessels visited all the neighboring coasts. Though extremely bold and mountainous, this island has very fruitful valleys (Virgil, *Æn.* iii, 106), and was highly prosperous and full of people in very ancient times: this is indicated by its "hundred cities" alluded to in the epithet ἑκατόμπολις, applied to it by Homer (*Il.* ii, 649). It was remarkable for its patriotism, although it kept aloof from the intestine wars of Greece. One of its peaks was the famous Mt. Ida, and in one of its remarkable caverns was the renowned Labyrinth of antiquity. This island was also the scene of many of the fables of mythology, and was even reputed as the abode of "the father of gods and men." The chief glory of the island, however, lay in its having produced the legislator Minos, whose institutions had so important an influence in softening the manners of a barbarous age, not in Crete only, but also in Greece, where these institutions were imitated. The natives were celebrated as archers. Their character was not of the most favorable description (see Polyb. vi, 46, 3; 47, 5; Diod. Sic. *Exc. Vat.* p. 131; Livy, xliv, 45; Ovid, *Ars Amat.* i, 297; Plutarch, *Philopœm.* 13); the Cretans, or Kretans, being, in fact,

one of the three *K*'s against whose unfaithfulness the Greek proverb was intended as a caution—Kappadokia, Krete, and Kilikia. In short, the ancient notices of their character fully agree with the quotation which Paul produces from "one of their own poets" (προφήτης) in his Epistle to Titus (i, 12), who had been left in charge of the Christian church in the island: "The Cretans are always liars (ἀεὶ ψεῦσται, eternal liars), evil beasts (κακὰ θηρία, Angl. 'brutes'), slow bellies" (γαστέρες ἀργαί, gorbellies, bellies which take long to fill). The quotation is usually supposed to have been from Callimachus's *Hymn on Jove*, 8; but Callimachus was not a Cretan, and he has only the first words of the verse, which Jerome says he borrowed from Epimenides (q. v.), who was of Crete, and from whose work (Περὶ χρησιμῶν, see Clemens Alex. *Strom.* i, 129) the citation appears to have been made (see Gottschalk, *De Epimenide propheta*, Altdorp, 1714; Hoffmann, *De Paulo scripturas profan. ter allegante*, Tub. 1770, p. 17; Heinrich, *Epimenides a. Kreta*, Lpz. 1801). Ample corroboration of the description which it gives of the ancient inhabitants may be seen in the commentators (see Wolfii *Cur.* iv, 554 sq.). See CRETIAN. Mr. Hartley, in his *Researches in Greece*, says, "The Cretans of the present day are precisely what they were in the days of the apostle Paul; they are notoriously, whether Turks or Greeks, the worst characters in the Levant." (See the *Penny Cyclopædia*, s. v. Candia.)



Crete was an independent state, with some variations of government, until it was conquered by the Romans, B.C. 67, under Metellus, hence called Creticus, and united in one province with Cyrenaica, which was at no great distance (Strab. x, 475) on the opposite coast of Africa. See CYRENE. It is possible that in Tit. iii, 1, there may be an implied reference to a turbulent condition of the Cretan part of the province, especially as regarded the Jewish residents. It formed part of the Eastern empire until taken by the Saracens in 823, and was recovered from them by the emperor Nicephorus Phocas in 981. On the establishment of the Latin empire of Constantinople in 1204, it came by purchase into the hands of the Venetians, and was retained by them until the year 1669, when, after a twenty-four years' siege of the capital, the conquest of the whole island was effected by the Turks, to whose dominions it still nominally belongs. In August, 1866, the Christians of Crete rose in insurrection against the Turkish rule, and demanded annexation to the kingdom of Greece. They resisted throughout the years 1866 and 1867 the whole force of the Ottoman empire, and thereby enlisted the sympathy of all the Christian powers of Europe, most of which urged the Turkish government to consent to the annexation of the island to Greece. (In November, 1867, the fate of Crete was not yet decided.) (See Paulin, *Description physique de l'île de Crête*, Paris, 1859.)

It seems likely that a very early acquaintance took place between the Cretans and the Jews. The story in Tacitus (*Hist.* v, 2) that the Jews were themselves of Cretan origin, may be accounted for by supposing a confusion between the Philistines and the Jews, and by identifying the Cherethites of 1 Sam. xxx, 14; 2 Sam. viii, 18; Ezek. xxv, 16; Zeph. ii, 5, with Cretan emigrants. In the last two of these passages they are expressly called Κρῆτες by the Sept., and in Zeph. ii, 6, we have the word Κρήτη. Whatever conclusion we may arrive at on this point, there is no doubt that Jews were settled in the island in considerable numbers during the period between the death of Alexander the Great and the final destruction of Jerusalem. Gortyna (q. v.) seems to have been their chief residence, for it is specially mentioned (1 Macc. xv, 23) in the letters written by the Romans on behalf of the Jews, when Simon Maccabæus renewed the treaty which his brother Judas had made with Rome (see 1 Macc. x, 67). At a later period Josephus says (*Ant.* xvii, 12, 1; *War*, ii, 7, 1) that the pseudo-Alexander, Herod's supposed son, imposed upon the Jews of Crete when on his way to Italy. And later still, Philo (*Leg. ad Cai.* § 36) makes the Jewish envoys say to Caligula that all the more noted islands of the Mediterranean, including Crete, were full of Jews. Thus the special mention of Cretans (Acts ii, 11) among those who were in Jerusalem at the great Pentecost is just what we should expect. No notice is given in the Acts of any more direct evangelization of Crete, and no absolute proof can be adduced that Paul was ever there before his voyage from Cæsarea to Puteoli, though it is barely possible that he may have visited the island in the course of his residences at Corinth and Ephesus. See TITUS. The circumstances of Paul's recorded visit were briefly as follows. The vessel in which he sailed to Italy, being forced out of her course by contrary winds, was driven round the island, instead of keeping the direct course to the north of it. In doing this, the ship first made the promontory of Salmone, on the eastern side of the island, which they passed with difficulty, and took shelter at a place called Fair-Havens, near to which was the city Lasea. But after spend-

ing some time at this place, and not finding it, as they supposed, sufficiently secure to winter in, they resolved, contrary to the advice of Paul (the season being far advanced), to make for Phœnice, a more commodious harbor on the western part of the island; in attempting which they were driven far out of their course by a furious east wind called Euroclydon, and wrecked on the island of Melita (Acts xxvii). See SHIPWRECK (OF PAUL). It is evident from Tit. i, 5, that the apostle himself was here at no long interval of time before he wrote the letter. We believe this to have been between the first and second imprisonments. See TITUS, EPISTLE TO. Titus was much honored here during the Middle Ages. The cathedral of Megalo-Castron was dedicated to him; and his name was the watchword of the Cretans when they fought against the Venetians, who themselves seem to have placed him above St. Mark in Candia, when they became masters of the island (Pashley's *Travels in Crete*, i, 6, 175, Lond. 1837). See Höck's *Kreta* (Gött. 1829), and some papers from the Italian in the *Museum of Class. Antiq.* (vol. ii, Lond. 1856). Also Meursius, *De Rhodo, Creta*, etc. (Anatol. 1675); Neumann, *Rer. Creticar. spec.* (Gött. 1820); Smith, *Dict. of Class. Geogr.* s. v. Creta; Spratt's *Researches in Crete* (London, 1865, 2 vols. 8vo). See GREECE.

Crete (Acts ii, 11) or **Cre'tian** (Tit. i, 12 and subscr.), a Cretan (Κρής), or inhabitant of the island of CRETE (q. v.). Treatises on the notoriously bad character of this people (referred to in the latter passage) have been written in Latin by Hollebeck (Lugd. B. 1798), Peffinger (Argent. 1701), Schmidt (Lips. 1673), and Steger (Lips. 1684).

Crib (אֲבוּס, *ebus'*), a *stall* or barn where fodder is stored (Prov. xiv, 4) and where cattle are fed (Job xxxix, 9; Isa. i, 3); perhaps simply a *manger* for them to eat out of, as the Sept. and Vulg. render in the last-cited passage. See MANGER.

Crime (מִשְׁפָּט, *judgment*, Ezek. vii, 23; זִמָּה, *zimmah'*, *mischief*, "heinous crime," Job xxxi, 11; *aitia*, Acts xxv, 27; ἔγκλημα, Acts xxv, 16). See LAW; JUDGE; PUNISHMENT.

Crimson, שָׁנִי, *shani'* (Jer. iv, 30; elsewhere "scarlet;" fully תּוֹלַעַת שָׁנִי, *crimson-worm*, Exod. xxv, 4, or שְׁנִי תוֹלַעַת, *worm-crimson*, Lev. xiv, 4, or simply תּוֹלַע, the *worm* itself, Isa. i, 15, all rendered, except in this last passage, likewise "scarlet"), later כַּרְמִיל, *karmil'* (invariably "crimson," 2 Chron. ii, 7, 14; iii, 14; on this Heb. term, see Lorsbach, *Archiv für morgenländ. Literatur*, ii, 305; Gesenius, *Thesaur.* p. 714), a well-known red color (Pliny, xxi, 22), of a deep hue bordering on purple (q. v.), and in this respect differing from the brighter scarlet (q. v.), yet of a brilliant color (Isa. i, 18; comp. Pliny, xxxiii, 40; hence χρῶμα ὀξύ; so in Matt. xxvii, 28, χλάμυς κοκκίνη=ἐσθὴς λαμπρά in Luke xxiii, 11), highly prized among the ancients for garments and tapestry (Horace, *Sat.* ii, 6, 102), as articles of luxury with the nobility (Jer. iv, 30; 2 Sam. i, 24; Prov. xxxi, 21; Lam. iv, 5; comp. Martial, iii, 2, 11; ii, 39, 1; 43, 8; Petron. *Sat.* 32), and with the Romans for the robes of generals and princes (Pliny, xxii, 3; comp. Matt. xxvii, 28, where κοκκίνη=πυρπύρα in Mark xv, 17, 20, and John xix, 4), especially the emperors (Sueton. *Domit.* 4). Many of the fabrics of the tabernacle and sacerdotal paraphernalia were also woven (Exod. xxxviii; Num. iv, 8) of threads of this dye (Gen. xxxviii, 28; Josh. ii, 18), which was likewise employed for the curtain of Solomon's Temple (2 Chron. iii, 14; comp. Sueton. *Nero*, 30). The color again occurs in the Mosaic ritual (Lev. xiv, 6; Num. xix, 6). As to its symbolical significance, Philo (*Opp.* i, 536; comp. ii, 148) and Josephus (*Ant.* iii, 7, 7) think that it, like the two sacred colors (scarlet and purple), represents the element of fire; according to Bähr (*Symbol.* i, 333 sq.), it denotes life (i. e. fire and blood, which are both red); while others find in it other typical allusions. See DYE.

Crimson is obtained from the pulverized cochineal berries, i. e. the dead bodies and larve-nests (see Brandt and Ratzeburg's *Medicin. Zoologie*, Berl. 1831 sq., ii, pl. 26, fig. 15) of a small parasitic insect, the female cochineal-worm (תּוֹלַעַת, *tola'ath*), or *kermes* (the *Coccus ilicis* of Linn., cl. 4, Tetragynia), which towards the end of April fastens itself, like little raisins, in the form of round reddish or violet-brown berries upon the twigs, less frequently on the leaves, of the palm-oak (πρῖνος or ἡ κόκκος, *Ilex aquifolia* or *coccifera*; comp. Theophrastus, *Plant.* iii, 16; Pliny, xvi, 12; Pausanias, x, 36, 1; see Kirby, *Entomol.* i, 351; Cuvier, *Anim. King.* iii, 604, 608). This shrubby tree, some two or three feet high, grows abundantly in Asia Minor and Hither Asia (certainly also in Palestine; see Belon, *Observ.* ii, 88), as well as in Southern Europe, has oval, pointed, evergreen, thorny leaves, a grayish smooth bark, and bears round scarlet berries in clustered tufts (Dioscor. iv, 48). Among the ancients, the Phœnicians generally supplied the rest of the world with crimson materials, and best understood the art of dyeing this color (2 Chron. ii, 7; comp. Pliny, ix, 65). (See Beckmann, *Beitr.* III, i, 1 sq.; Bochart, *Hieroz.* iii, 524 sq.; Braun, *De vestitu sacerd.* l. i, c. 15, p. 215 sq.; Hartmann, *Hebr.* i, 388 sq.; iii, 135 sq.; *Penny Cyclopædia*, s. v. Cochineal.) See COLOR.

Cripple (χωλός, *lame*, as elsewhere usually rendered, or "halt"), a person deprived of the use of the lower limbs (Acts xiv, 8).

Crisp, TOBIAS, D.D., a divine of the 17th century, born 1600, died rector of Brinkworth 1642. His life was distinguished by charity, piety, humility, and purity, but he was nevertheless charged with simony in obtaining the living of Newington Butts in 1627. He followed the Puritan side in the ecclesiastical troubles, and was an extreme Calvinist, running into Antinomianism. The Westminster Assembly proposed to have his sermons burnt. The last edition of them, edited by Gill, appeared in London 1791 (2 vols. 8vo), to which the life of Crisp is prefixed. Dr. Crisp acknowledges that, "in respect of the rules of righteousness, or the matter of obedience, we are under the law still, or else," as he adds, "we are lawless, to live every man as seems good in his own eyes, which no true Christian dares so much as think of." The following sentiments, however, among others, are taught in his sermons: "The law is cruel and tyrannical, requiring what is naturally impossible." "The sins of the elect were so imputed to Christ as that, though he did not commit them, yet they became actually his transgressions, and ceased to be theirs." "The feelings of conscience, which tell them that sin is theirs, arise from a want of knowing the truth." "It is but the voice of a lying spirit in the hearts of believers that saith they have yet sin wasting their consciences, and lying as a burden too heavy for them to bear." "Christ's righteousness is so imputed to the elect that they, ceasing to be sinners, are as righteous as he was, and all that he was." "An elect person is not in a condemned state while an unbeliever; and should he happen to die before God call him to believe, he would not be lost." "Repentance and confession of sin are not necessary to forgiveness. A believer may certainly conclude before confession, yea, as soon as he hath committed sin, the interest he hath in Christ, and the love of Christ embracing him." These dangerous sentiments, and others of a similar bearing, have been fully answered by many writers, but by none more ably than by the Rev. John Fletcher, in his "Checks to Antinomianism."—Buck, *Theol. Dict.* s. v.; Orme,

Life of Baxter, ii, 232; Bogue and Bennett, *Hist. of Dissenters*, i, 400. See ANTINOMIANISM.

Crispin and **Crispinian**, two brothers who, during the reign of Diocletian, went as missionaries from Rome to Gaul, and settled at Soissons. In order to support themselves and to have access to the people, they became shoemakers. Thus they worked for some time for the propagation of Christianity, until 287, when, by order of the emperor Maximinianus, they were beheaded. They are commemorated in the Church of Rome on Oct. 25, and are commonly venerated as the special patrons of the shoemakers. There is a legend (for which, however, there seems to be no foundation) about these saints to the effect that they stole from rich persons the leather to make gratuitously shoes for the poor.—Wetzer u. Welte, *Kirchen-Lex.* ii, 918.

Crisping-pin (חֲרִיט. *charit'*, something *chiselled*; the Sept. translates undistinguishably, Isa. iii, 22). This word properly signifies a *casket* or *pouch*, and is elsewhere rendered a "bag" for money (2 Kings v, 23, where the Arabic gives a *leather money-bag*); but in the passage in Isaiah it is to be understood as some kind of female ornament; probably, like our modern *reticule*, it was a richly ornamented purse or small bag, which the women wore attached to their girdles. They are usually described as made of silk, and wrought with gold and silver; but Jahn thinks that this purse was made of solid metal, sometimes of pure gold, and fashioned like a cone, with a border of rich cloth at the top. See ORNAMENT.

Crispus (Κρίσπος, for Lat. *Crispus, curled*; found also in the Talmudists under the forms קריספא and קריספי), chief of the Jewish synagogue at Corinth (Acts xviii, 8), converted and baptized by the apostle Paul (1 Cor. i, 14) A.D. 50. According to tradition (*Constitut. Apost.* vii, 46) he was afterwards bishop of Ægina. The Greek Church observe his festival on the 4th of October.

Critĭci Sacri, a very useful work in Biblical literature, undertaken and published by Cornelius Bee, bookseller (London, 1660, 9 vols. fol.), as an appendage to Walton's Polyglot, under the direction of bishop Pearson, John Pearson, Anthony Scattergood, and Francis Gouldman. It was reprinted at Frankfort, under the care of Gurtler, in 1695, in 7 vols. In 1698 it reappeared at Amsterdam in 9 vols.; and a supplement of 2 vols. more was published in 1700 and 1701; and a second supplement appeared in 2 vols. fol., Amst. 1732. This collection contains all, or most of the books of the O. T., the entire annotations of Munster, Vatablus, Castalio, Clarius, Drusius, and Grotius; brief annotations of Fagius on the Chaldaic paraphrase of the Pentateuch, and his larger exposition of the first four chapters of Genesis; the commentaries of Masius on Joshua; the annotations of Codurcus on Job; of Pricæus on the Psalms, and of Bayne on the Proverbs; the commentary of Forerius on Isaiah, that of Lively on Hosea, Joel, Amos, Obadiah, and Jonah; of Badwell on the Apocrypha, and Hœschel on Ecclesiastes, etc. On the N. T. it contains the collations of Valla, with the animadversions of Revins; the annotations of Erasmus, Vatablus, Castalio, Clarius, Zegerus, and Grotius; on particular places and subjects of the N. T., Munster, Drusius, Scaliger, Casaubon, Cameron, Lud. Capellus, Gualtperius, Schultetus, and Pricæus. There are also a number of philological tracts and dissertations, such as John Gregory's Notes and Observations; Fagius's Comparison of the principal Translations of the O. T.; Cartwright's *Mellificium Ebraicum*; Drusius on the Mandrakes; Jos. Scaliger and Amama on Tythes; Lud. Capellus on the Vow of Jephtha and Corban; Pithæus *De Latinis Bibliorum Interpretationibus*; Urstius *De fabrica Arcœ Noœ*; Rittershusius *De Jure Asylorum*; Allatius *De Engastrymutho*; Montanus on Jewish Antiquities; Bertram and Cunæus on the Hebrew Republic; Waser on the Ancient Coins and Measures of the Hebrews, Chaldæans, and Syrians; and many others of a similar description (Orme, *Biblioth. Bibl.* p. 128). The Amsterdam edition (1698–1732, 13 vols. fol.) is the best, being well printed, with additions, and including four volumes of *Thesaurus* not contained in the original edition. Poole's *Synopsis* forms an excellent abridgment of this great work. See COMMENTARY.

Criticism, BIBLICAL. This phrase is employed in two senses. Some take it to signify not only the restoration of the text of Scripture to its original state, but the principles of interpretation. This is an extensive and improper application. The science is strictly occupied with the *text* of the Bible. It is limited to those principles and operations which enable the reader to detect and remove corruptions, to decide upon the genuineness of disputed readings, and to obtain as nearly as possible the original words of inspiration.

I. There are only three or four *sources* of material for the work of Biblical criticism, both in detecting the changes made upon the original text, and in restoring genuine readings: 1. MSS. or written copies of the Bible. 2. Ancient translations into various languages. 3. The writings and remains of those early ecclesiastical writers who have quoted the Scriptures. 4. *Critical conjecture*; but this must be used with extreme caution. See OLD TEST.; NEW TEST.

Criticism employs the ample materials furnished by these sources. To attain its end, it must work upon them with skill and discrimination. They afford wide scope for acuteness, sobriety, and learning; and long experience is necessary in order that they may be used with efficiency and success. (See *Jour. Sac. Lit.*, Jan. 1864; Heinfetter, *The True Text of the* [Heb.] *Scriptures*, 2d ed. Lond. 1861.) See MANUSCRIPTS; VERSIONS.

CANONS OF BIBLICAL CRITICISM.

I. EXTERNAL OR OBJECTIVE.

1. *Readings found in the most ancient and more carefully written MSS. should be preferred.* Hence "uncial" copies are in general more weighty than "cursive." Yet great unanimity in the latter may overbalance fluctuation in the former.

2. *Independent witnesses must chiefly be regarded.* Hence the necessity of classifying authorities, and of reckoning all that can be traced to a common origin or edition as but one, since no copy can rise higher in value than its source, and each transcription is an additional opportunity for error. On this account the critical materials of the O. T. are meagre, as all existing Heb. MSS. are of the Masoretic recension; and but for the evidence (both historical and internal) of great competency, care, and scrupulousness on the part of these editors, their work would be of much less utility than it now is. In the N. T., too, this rule greatly reduces the testimony of the earliest extant MSS., inasmuch as they all seem to belong to the Alexandrian type, and for this reason their provincialisms in orthography ought especially to be rejected.

3. *Readings found in the original text are not to be lightly set aside through deference to versions or citations.* This not only follows as a corollary from the preceding rule, but its importance is enhanced by the ignorance, prejudices, special objects, and laxity of translators and writers quoting (sometimes from memory). In doubtful cases only (either from conflict, failure, or improbability in the original readings), therefore, can these be safely resorted to. Hence is evident equally the absurdity of exalting the Septuagint as a whole above the Hebrew, and the Vulgate above the Greek Testament. When not liable to suspicion from the above causes, however, and where sufficiently exact to be verbally appreciable, translations and quotations, like direct and explicit historical statements as to particular readings, are entitled to consideration in proportion to their antiquity and excellence of opportunity.

II. INTERNAL OR SUBJECTIVE.

N. B.—This whole kind of evidence is only to be used, and that but sparingly, when the foregoing rules fall short, or are opposed by some palpable inconsistency in point of exegesis or philology in the text.

1. *Purely conjectural emendation may sometimes be cautiously employed in such cases*, because it is possible that some clerical errors may have existed in the original autographs themselves, and others probably crept in at the earliest date in copying; these would therefore be liable to corrupt all later testimony. On the other hand, arbitrary corrections must never be made except where they are absolute-

ly demanded, and where they can also be shown to have been naturally displaced by the errata; nor yet unless they are such as would be likely to have eluded the diligence of earlier collators.

2. *Among several various readings, which are otherwise nearly equally supported, that one is to be selected from which the others can most readily be derived.* On this principle is based the famous law of critics in general, that "the most difficult reading is to be preferred," which is but partially true, however, since the harshest readings may have been the result of inadvertence in copying, and on this principle they could never be eliminated; whereas the design of criticism is the common-sense one of lessening rather than increasing the incongruities of the text. It is only meant that we should choose that reading, rather than another, which, if originally in the text, would be most obnoxious to copyists; yet the rule must not be so construed as to come into collision with the foregoing canon.

3. *When the evidences in favor of the omission or insertion of a passage, clause, or highly significant word are nearly equally divided, it is safer to reject it* (if it be not already contained in the received text), or (if it be retained for the sake of convenience) to mark it as probably spurious; for the disposition of the Church, from quite an early to a comparatively recent period, has leaned towards the admission of more and more matter (whether marginal glosses or apocryphal additions) into the sacred canon, and copyists as well as editors have felt the influence of that reverent familiarity which renders it ever increasingly difficult to expunge any thing once included in Scripture. But in judging of the genuineness in such instances, little stress can be laid upon considerations drawn from doctrinal propriety or concinnity with the context, because these are greatly affected by the individual sentiments and conventional opinions of each critic.

II. The remainder of this article (which relates to the so-called "lower criticism") will contain a brief historical sketch of Biblical criticism, or a history of the texts of the Old and New Testaments; the condition in which they have been at different periods; the evidences on which our knowledge of their purity or corruption rests, and the chief attempts that have been made to rectify or amend them. A *history* of criticism must describe the various stages and forms through which the texts have passed. It will be convenient to reserve an enumeration of the *causes* which gave rise to various readings for a future article [see VARIOUS READINGS], and in this place to detail the phases which the Hebrew and Greek texts of the Old and New Testaments have presented both in their unprinted and printed state, in connection with the labors of scholars upon them.

A. THE OLD TESTAMENT.—There are four marked periods in the history of the Hebrew text.

1. *That Period in the History of the Unprinted Text which preceded the closing of the Canon.*—Of this we know nothing except what is contained in Scripture itself. The Jews bestowed much care on their sacred books. They were accustomed to hold them in great veneration even in the darkest times of national apostasy from Jehovah. How often the separate books were transcribed, or with what degree of correctness, it is impossible to tell. Many German critics suppose that the Hebrew text met with very unfavorable treatment; that it was early subjected to the carelessness of transcribers and officious critics. Differences, however, between parallel sections show rather the genuineness and integrity of the books in which they occur. Had such paragraphs *exactly harmonized*, we might have suspected design or collusion; but their variations discover the artlessness of the writers. We disagree with Eichhorn, Bauer, Gesenius, De Wette, and others, who have given lists of parallel passages in some books in order to show that the text was early exposed to extensive alterations.

The most important particular in this part of the history is the Samaritan recension of the Pentateuch. See PENTATEUCH. This *edition* (if so it may be called) of the Pentateuch is indeed uncritical in its character. While we freely acquit the *Jews* of tampering with the text of the Mosaic books, the *Samaritans* cannot be so readily exonerated from the imputation. Additions, alterations, and transpositions are quite apparent in *their* copy of the Pentateuch. A close alliance between the text which lies at the basis of the Septuagint version and that of the Samaritan Pentateuch has been always noticed. Hence some think that they flowed from a common *recension*. One thing is certain, that the Seventy agree with the Samaritan in about 2000 places in opposition to the Jewish text. In other books, too, of the Old Testament, besides the five books of Moses, the Seventy follow a recension of the text considerably different from the Jewish. Thus in Jeremiah and Daniel we find a different arrangement of sections, as well as a diversity in single passages. The books of Job and Proverbs present a similar disarrangement and alteration, which must be put down to the account of the Alexandrian Jews and Greek translators. Far different was the conduct of the *Palestinian* Jews in the treatment of the sacred books. They were very scrupulous in guarding the text from innovation, although it is impossible that they could have preserved it from *all* corruption. But whatever errors or mistakes had crept into different copies were rendered apparent at the time when the canon was formed. We believe with Hävernick (*Einleitung in das Alte Testament*, p. 49) that "Ezra, in unison with other distinguished men of his time, completed the collection of the sacred writings." He revised the various books, corrected inaccuracies that had crept into them, and rendered the Old-Testament text perfectly free from error. Thus a correct and genuine copy was furnished under the sanction of Heaven. Ezra, Nehemiah, and those with whom he was associated, were infallibly guided in the work of completing the canon. See CANON.

2. *From the Establishment of the Canon to the Completion of the Talmud*, i. e. the commencement of the sixth century after Christ.—The Targumists Onkelos and Jonathan closely agree with the *Masoretic* text. The Greek translations of Aquila, Symmachus, and Theodotion, belonging to the second century, deviate from the form of the text afterwards called the Masoretic much less than the Seventy. The Hebrew column of Origen's *Hexapla* presents a text allied to the Masoretic recension. Jerome's Latin version, made in the fourth century, is conformed to the same Hebrew original. In the two Gemaras, viz. the Jerusalem and the Babylonian, belonging to the fourth and sixth centuries respectively, we discern many traces of critical skill applied to the preservation of a pure text. Different readings in MSS. are mentioned, precepts are given respecting Biblical calligraphy, and true readings are restored. By far the most important fact which they present is the adducement of *classes* of critical corrections made at an earlier period, and which Morinus (*Exercitationes Biblicæ*, p. 408) justly calls the *fragments* or *vestiges* of recensions. These are—(1) עִטּוּר סוֹפְרִים, *Retrenchment of scribes.* (2) תִּקּוּן סוֹפְרִים, *Correction of scribes.* (3) *Extraordinary punctuation.* (4) קֶרִי וְלֹא כְתִיב, "*Keri ve-lo kethib*," *read but not written.* (5) כְּתִיב וְלֹא קֶרִי, "*Kethib ve-lo keri*," *written but not read.* (6) The Talmud also mentions different readings which the Masoretes call קֶרִי וּכְתִיב, "*Keri u-kethib*," *read and written.* See KERI and KETHIB.

The writings of Jerome afford evidence that, in the fourth century, the Hebrew text was without the vowel-points, or even the *diacritical signs.*

3. *From the sixth Century, in which the Talmud was completed, to the Invention of Printing.*—The learned Jews, especially those at Tiberias, where there was a famous school till the eleventh century, continued to occupy themselves with the Hebrew language and the criticism of the Old Testament. The observations of preceding Rabbis were enlarged, new remarks were made, and the vowel-system was invented, the origin of which can hardly be placed earlier than the sixth century. The name *Masora* has usually been applied to that grammatico-historical tradition which, having

been handed down orally for some centuries, became afterwards so extensive as to demand its committal to writing. Much of what is contained in the Masora exists also in the Talmud. Part of it, however, is older than the Talmud, though not reduced to its present form till a much later period. The various observations comprised in the Masora were at first written in separate books, of which there are MSS. extant. Afterwards they were put into the margin of the Bible MSS.

When we speak of the *Masoretic recension* of the text, it is not meant that the Masoretes gave a certain form to the text itself, or that they undertook and executed a new revision. They made the *textus receptus* of that day the basis of their remarks, and gave their sentiments concerning it. Had the text been altered in every case where they recommend; had it been made conformable to their ideas of what it should be, it would have been appropriate to have called it the *Masoretic recension*. The designation, however, though not applicable in strictness, is customary.

The most important part of the Masora (q. v.) consists of the marginal readings or *Keris*, which the Masoretes always preferred to the textual, and which the later Jews have adopted. The *Keris* are *critical, grammatical, orthographical, explanatory*, and *euphemistic*. It has been a subject of dispute among scholars from what source the Masoretes derived the Keris. It is highly probable that they were generally taken from *MSS.* and *tradition*, though they may have been in part the offspring of conjecture. It is but reasonable to suppose that these scholars *sometimes* gave the result of their own judgment. In addition to the *Keris* the Masora contains an enlargement of critical remarks found in the Talmud. Besides, the verses, words, and consonants of the different books of the Bible are counted, a task unparalleled in point of minute labor, though comparatively unprofitable.

The application of the Masora in the criticism of the Old Testament is difficult, because its text has fallen into great disorder. It was printed for the first time in the first Rabbinical Bible of Bomberg, superintended by Felix Pratensis. In the second Rabbinical Bible of Bomberg, R. Jacob ben-Chayim bestowed considerable care upon the printing of the Masora. At the end of this second Rabbinical Bible there is a collection of *Oriental* and *Western* readings, or, in other words, *Babylonian* and *Palestinian*, communicated by the editor, and the result of an ancient revision of the text. The number is about 216. Of the sources from which the collection was drawn we are entirely ignorant. Judging by the contents, it must be older than many observations made by the Masoretes. It should probably be referred to a period anterior to the introduction of the vowel system, as it contains no allusion to the vowels. It is certainly of considerable value, and proves that the *Oriental* no less than the *Western* Jews had always attended to the state of the sacred text. In addition to this list, we meet with another in the Rabbinical Bibles of Bomberg and Buxtorf, and in the sixth volume of the London Polyglot, belonging to the eleventh century. It owes its origin to the labors of Ben-Asher and Ben-Naphtali, the respective presidents of academies in Palestine and Babylon. These readings, with a single exception, refer to the vowels and accents. The vowel system had therefore been completed when this collection was made.

Here the history of the unprinted text may be said to close. The old unvowelled copies perished. New ones furnished with points and accents came into use. But, although the ancient copies are now irrecoverably lost, there is no reason for supposing that their preservation to the present time would have had any essential influence in altering the form of the text. The text appears to have been established and settled when the punctuation system was completed. The labors of the Masoretic doctors have been of substantial benefit in maintaining its integrity.

4. *From the Invention of Printing to the present Time.*—There are three early editions from which all others have been taken. 1. That published at Soncino (A.D. 1488), which was the first entire copy of the Hebrew Scriptures ever printed. The text is furnished with the points and accents, but we are ignorant of the MSS. employed by the editor. 2. The second great edition was that in the Complutensian Polyglot (1514–17) taken from seven MSS. 3. The third was the second Rabbinical Bible of Bomberg, superintended by R. Jacob ben-Chayim (Venice, 1525, 6 vols. fol.). The text is formed chiefly after the Masora, but Spanish MSS. were used. Almost all modern printed copies have been taken from it. The Antwerp Polyglot has a text compounded of those in the second and third recensions just mentioned.

Among the editions furnished with a critical apparatus, that of Buxtorf, published at Basle 1619, occupies a high place. It contains the commentaries of the Jewish Rabbis Jarchi, Aben-ezra, Kimchi, Levi ben-Gerson, and Saadias Haggaon. The appendix is occupied with the Jerusalem Targum, the great Masora corrected and amended, with the various readings of Ben-Asher and Ben-Naphtali.

The other principal editions with various readings are those of Seb. Münster, Jablonski, Van der Hooght, J. H. Michaelis, C. F. Houbigant, and Benjamin Kennicott.

(1.) Münster's edition appeared at Basle in 1536, 2 vols. 4to. The text is supposed to be founded upon that of Brescia, 1494, 4to, which resolves itself into the Soncino edition of 1488.

(2.) Jablonski's edition was published at Berlin in 1699, 8vo, and again at the same place in 1712, 12mo. It is founded upon the best preceding editions, but chiefly the second edition of Leusden (1667). The editor also collated various MSS. The text is remarkably accurate.

(3.) Van der Hooght's edition appeared at Amsterdam 1705. The text is taken from Athias's (1661 and 1667). The Masoretic readings are given in the margin; and at the end are collected the various readings of the editions of Bomberg, Plantin, Athias, and others.

(4.) The edition published by J. H. Michaelis in 1720 is accompanied with the readings of twenty-four editions which the editor examined, besides those of five MSS. in the library at Erfurdt. There is a want of accuracy in his collations.

(5.) In 1753, C. F. Houbigant published a new edition in folio. The text is that of Van der Hooght, without the points. In the margin of the Pentateuch the Samaritan readings are added. For it he collated, but hastily, twelve MSS. He has justly been blamed for his rash indulgence in conjectural emendation.

(6.) Dr. Kennicott's edition, which is the most important hitherto published, appeared at Oxford, in folio—the first volume in 1776, the second in 1780. The number of MSS. collated by himself and his associates, the chief of whom was Professor Bruns of Helmstadt, amounted to 694. In addition to his collation of MSS. and printed editions, he followed the example of various editors of the Greek Testament in having recourse to Rabbinical writings, especially the Talmud. The immense mass of various readings here collected is unimportant. It serves, however, to show that, under the influence of the Masora, the Hebrew text has attained a considerable degree of uniformity in all existing MSS.

(7.) In 1784–88, John Bernard de Rossi published at Parma, in 4 vols. 4to, an important supplement to Kennicott's collection. These various readings were taken from 88 MSS. used by Kennicott and collated anew by De Rossi, from 479 in his own possession and 110 in other hands, from many editions and Samaritan MSS., and also from ancient versions.

(8.) In 1793, Döderlein and Meisner published at Leipzig an edition intended in some measure to supply the want of the extensive collations of Kennicott and De Rossi. It contains the most important readings. The edition of Jahn, published at Vienna in 1806, is very valuable and convenient.

(9.) The most accurate editions of the Masoretic text are those of Van der Hooght, as lately edited by Hahn and by Theile, at Leipzig, and stereotyped. The text of Van der Hooght may now be reckoned as the *textus receptus*. (For full lists of the printed editions of the Hebrew Bible, the reader is referred to Le Long's *Bibliotheca*, edited by Masch, and to Rosenmüller's *Handbuch für die Literatur der biblischen Kritik und Exegese*, i, 189–277. See also Darling's *Cyclopædia Bibliographica*, vol. on the "Holy Scriptures," col. 45 sq.)

Notwithstanding all these editions, something is still wanted. In the best of them there are passages requiring emendation. It is curious to observe how contradictions are allowed to remain on the face of the Old-Testament history. It may be that the Masora has produced so great a uniformity that extant MSS. do not sanction any departure from the present text, but, where passages are manifestly corrupt, it is proper that they should be rectified. The criticism of the Hebrew Bible is still behind that of the Greek Testament. The latter was earlier begun, and has been more vigorously prosecuted. We remain nearly in the same state with regard to the Old-Testament text as that in which Kennicott and De Rossi left us, and it is time that some advance should be made in this department. The only important recent work in this direction is Dr. S. Davidson's *Revision of the Heb. Text of the O. T.* (London, 1855, 8vo). See SCRIPTURES, HOLY.

B. We shall now give a brief history of THE NEW-TESTAMENT text in its *unprinted* and *printed* form. The criticism of the New Testament is rich in materials, especially in ancient MSS. But, although the history of New-Testament criticism records the industrious collection of a large amount of materials, it is not equally abundant in *well-accredited facts*, such as might be of essential benefit in enabling us to judge of the changes made in the text. History is silent respecting the period when the two parts of the New Testament, viz., the εὐαγγέλιον and ἀπόστολος, or, in other words, the four Gospels, and the Pauline and remaining epistles, were put together, so as to form *one whole*. About the beginning of the third century, it is certain that all the books of the New Testament which we now possess were acknowledged to be divine and regarded as canonical. See CANON.

1. In the middle of the same century Hesychius and Lucian undertook to amend the MSS. of the New Testament. Of their critical labors Jerome seems not to have entertained a high opinion. The MSS. they revised did not meet with general approval, and pope Gelasius issued a decree against them. It is highly probable that they were not the authors of recensions which were widely circulated or generally adopted. Origen did not revise the text of the New Testament.

At a comparatively recent period certain internal marks were observed to belong to documents containing the same text. A similarity in characteristic readings was noticed. Bengel appears to have been the first to whom the idea suggested itself of dividing the materials according to the peculiarities which he faintly perceived. It was afterwards taken up by Semler, and highly elaborated by Griesbach. Later editors and critics have endeavored to improve upon Griesbach's system. The different forms of text observed by Semler and Griesbach they called *recensions*, although the appellation of *family* is more appropriate. Perhaps the data that have been so much regarded in classifying the documents containing the New-Testament text are insufficient to establish any system. The subject of recensions, though frequently discussed, is not settled. In the history of the *unprinted* text it is the chief topic which comes before the inquirer. Reserving it for future notice (see RECENSIONS), we pass to the history of the *printed* text, and the efforts made to emend it.

2. The *whole* of the New Testament was first printed (1.) in the Complutensian Polyglot, 1514, fol. (vol. v), though not published till 1517. The first published was (2.) that of Erasmus, at Basle, in 1516, 2 vols. in 1, fol. Both were issued independently of one another, and constitute the basis of the *received text*. Yet the best materials were not employed in preparing them, and on both the Vulgate was allowed to exert an undue influence. Even critical conjecture was resorted to by Erasmus. No less than five impressions were published by Erasmus, into the *third* of which 1 John v, 7, was first put. In the last two he made great use of the Complutensian Polyglot.

(3.) The third place among the early editors of the Greek Testament has been assigned to Robert Stephens, whose first edition was printed at Paris (1546, 12mo), chiefly taken from the Complutensian, and generally styled the *Mirifica* edition, from the commencement of the preface. His second edition was published in 1549; the third in 1550, in folio. In this last he followed the fifth of Erasmus, with which he compared fifteen MSS., and the Complutensian Polyglot. In 1551 appeared another edition, accompanied by the Vulgate and the translation of Erasmus. It is remarkable for being the first into which the division of verses was introduced.

(4.) The next person that contributed to the criticism of the Greek Testament was Theodore Beza. The text of his first edition (1565, folio) was the same as that of the third of Stephens, altered in about fifty places, accompanied with the Vulgate, a Latin version of his own, and exegetical remarks. In his second edition (1582) he had the benefit of the Syriac version and two ancient codices. A third impression appeared in 1589, and a fourth in 1598. The *Elzevir* editions exhibit partly the text of the third of Stephens, and partly that of Beza. The first appeared at Leyden in 1624. The second edition of 1633 proclaims its text to be the *textus receptus*, which it afterwards became. Subsequently three other editions issued from the same press. The editor does not appear to have consulted any Greek MSS. All his readings are either in Beza or Stephens. The Elzevir editions are all in 12mo.

(5.) Brian Walton, the learned editor of the London Polyglot, gave a more copious collection of various readings in the sixth volume of that work than had before appeared, which was further enlarged by Dr. Fell, in his edition, published at Oxford in 1675, and reprinted by Gregory in 1703, folio. See POLYGLOTS.

(6.) Dr. John Mill, encouraged and supported by Fell, gave to the world a new edition in 1707, folio. The text is that of Stephens's third edition. In it the editor exhibited, from Gregory's MSS., a much greater number of readings than is to be found in any former edition. He revised and increased the extracts formerly made from ancient versions. Nor did he neglect quotations from the fathers. It is said that the work contains thirty thousand various readings. This important edition, so far superior to every preceding one, cost the laborious editor the toilsome study of thirty years, and excited the prejudices of many who were unable to appreciate its excellence. It constituted a new era in the criticism of the New Testament. Ludolph Kuster reprinted Mill's Greek Testament at Amsterdam in 1710, enriching it with the readings of twelve additional MSS. The first attempt to emend the *textus receptus* was made by John Albert Bengel, abbot of Alpirspach. His edition appeared at Tübingen (quarto, 1734), to which was prefixed his "Introductio in crisin Novi Testamenti." Subjoined is an *apparatus criticus*, containing his collection of

various reading, chiefly taken from Mill, but with important additions.

(7.) Dr. John James Wetstein contributed, in no small degree, to the advancement of sacred criticism, by his large edition of the Greek Testament, published at Amsterdam in 1751–2, 2 vols. folic. In 1730 he had published *prolegomena*. It was his desire to give a new and corrected text, but he was compelled by circumstances to exhibit the *textus receptus*. Yet he noted, partly in the text itself, partly in the inner margin, such readings as he preferred. His collection of various readings, with their respective authorities, far exceeds all former works of the same kind in copiousness and value. He collated anew many important MSS. that had been superficially examined, gave extracts from many for the first time, and made use of the Harclean (improperly called the Philoxenian) version, hitherto uncollated. For convenience he marked the *uncial* MSS. with the letters of the alphabet, and the *cursive* with numerical letters. His exegetical notes are chiefly extracts from Greek, Latin, and Jewish writers. The edition of the Greek Testament under consideration is indispensable to every critic, and will always be reckoned a marvellous monument of indomitable energy and unwearied diligence. The *Prolegomena* contain a treasure of sacred learning that will always be prized by the scholar. They were republished, with valuable notes, by Semler (1774, 8vo).

(8.) The scholar who is pre-eminently distinguished in the history of New-Testament criticism is Dr. John James Griesbach. He enriched the materials collected by Wetstein with new and important additions, by collating MSS., versions, and early ecclesiastical writers, particularly Origen, with great labor. The idea of *recensions*, recommended by Bengel and Semler, he adopted, and carried out with much acuteness and sagacity. His first edition appeared at Halle (2 vols. 8vo, 1774–5). The first three gospels were synoptically arranged, but in 1777 he published them in their natural order. The text is founded on a comparison of the copious materials which he possessed. Nothing was adopted from conjecture, and nothing received which had not the sanction of codices as well as versions. A select number of readings is placed beneath the text. In his *Symbolæ Criticæ* he gave an account of his critical labors, and of the collations of new authorities he had made. Such was the *commencement* of Griesbach's literary labors.

(9.) Between the years 1782–88, C. F. Matthaei published a new edition of the Greek Testament at Riga, in 12 vols. 8vo. His text was founded on a collation of more than 100 Moscow MSS., which he first examined. It is accompanied with the Vulgate, *scholia*, and *excursus*. He avowed himself an enemy to the idea of *recensions*, despised the ancient MSS. (especially cod. Bezæ) and the quotations of the fathers, while he unduly exalted his Moscow MSS. His chief merit lies in the careful collation he made of a number of MSS. hitherto unknown.

(10.) Before the completion of Matthaei's edition appeared that of Alter (Vindob. 1786–7, 2 vols. 8vo). The text is that of the Vienna MS., with which he collated 22 others in the Imperial library. To these he added readings from the Coptic, Slavonian, and Latin versions.

(11.) In 1788, Professor Birch, of Copenhagen, enlarged the province of sacred criticism by his splendid edition of the four Gospels in folio and quarto. The text is a reprint of Stephens's third, but the materials appended to it are highly valuable. They consist of extracts taken by himself and Moldenhauer, in their travels, from many MSS. not examined by Wetstein, and of Alter's selections from the Jerusalem-Syriac version discovered in the Vatican. Birch was the first who carefully collated the *Codex Vaticanus*. The publication of the second volume was prevented by a fire that destroyed many of the materials. In 1798 he published his various readings on the remainder of the New Testament, except the Apocalypse. In 1800 he published those relating to this book also.

(12.) In 1796 appeared the first volume of a new and greatly-improved edition of Griesbach's New Testament. For it he made extracts from the Armenian, Slavonic, Latin, Sahidic, Coptic, and other versions, besides incorporating into his collection the results of the labors of Matthaei, Alter, and Birch. The second volume appeared in 1806, both published at Halle, in 8vo. At the end of the second volume is a dissertation on 1 John v, 7. The work was reprinted at Leipzig, 1803–7, in four splendid 4to vols.; also at London in 1809, and again in 1818, 2 vols. 8vo. The prolegomena are exceedingly valuable. This edition cannot be too highly rated. It is indispensable to every critic and intelligent theologian.

In 1827, many new materials having been procured since the date of Griesbach's last edition, it was thought necessary to publish a third. It appeared accordingly, under the superintendence of Dr. Schulz, at Berlin, in 8vo. The first volume contains the prolegomena and the Gospels. It exhibits various readings from about 20 new sources, many corrections of Griesbach's references and citations, besides considerable improvements in other respects. The second volume has not been published.

The editions of Knapp, Schott, Tittmann, Vater, Näbe, and Göschen are chiefly founded upon that of Griesbach. Of these the most esteemed is that of Knapp, which has passed through five editions, and is characterized by sound judgment, especially in the punctuation and accents.

(14.) In 1830 appeared the first volume of a large critical edition, superintended by Dr. J. Martin Augustus Scholz, professor at Bonn, containing the Gospels. The second volume, in 1836, completed the work. Both are in quarto. The editor spent twelve years of incessant labor in collecting materials for the work, and travelled into many countries for the purpose of collating MSS. The prolegomena prefixed to the first volume occupy 172 pages, and contain ample information respecting all the codices, versions, fathers, acts of councils, etc., etc., which are used as authorities, together with a history of the text, and an exposition of his classification system. In the inner margin are given the general readings characteristic of the three great families. The total number of MSS. which he has added to those previously collated is 606. Little reliance, however, can be placed on the accuracy of the extracts which he has given for the first time. His researches have tended to raise the *textus receptus* higher than Griesbach placed it. In consequence of his preferring the *Constantinopolitan* family, his text comes nearer the Elzevir edition than that of Griesbach. The merits of this laborious editor are considerable. He has greatly enlarged our critical apparatus. Yet in acuteness, sagacity, and scholarship he is far inferior to Griesbach. His collations appear to have been superficial. They are not to be depended on. Hence the text can not command the confidence of Protestant critics. We can not believe, with the editor, that the Byzantine family is equal in value or authority to the Alexandrine, which is confessedly more ancient, nor can we put his junior codices on a level with the very valuable documents of the Oriental recension. His text is, *on the whole*, inferior to that of Griesbach. In a few important passages only it is superior.

(15.) The edition of Lachmann, though small in compass, deserves to be especially mentioned. It was published at Berlin in 1831, 12mo. The editor says that he has nowhere followed his own judgment, but *the usage of the Oriental churches*. The text of Lachmann has been well received in Germany, and much importance has been attached to it. From the authority it has obtained, it would appear that the Constantinopolitan text of Scholz is not very favorably regarded.

De Wette, in his *Introduction to the Bible*, shows a leaning towards the views of Lachmann. Rinck coincides, on the whole, with the same. The last-named scholar has enlarged the critical apparatus of the New Testament by collating and describing several MSS. (*Lucubratio Critica in Acta Apost. epp. Cath. et Paulin.*, etc., etc., Basel, 1830, 8vo). There is also a large edition by Lachmann (*Novum Testamentum, Græce et Latine. Carolus Lachmannus recensuit. Philippus Buttmannus Ph. F. Græcæ lectionis auctoritates apposuit.* Tomus prior, Berolini, 1842, 8vo; tomus alter, ib. 1850).

The editions by this critic are by far the most important that have appeared since the days of Griesbach, and must produce results highly favorable to the advancement of New Testament criticism. The principles on which Lachmann proceeds were expounded in the *Theolog. Studien. und Kritiken* for 1830, p. 817–845, and again in 1835, p. 570 sq. The path which he first pursued in his smaller edition was indicated by Bentley, who purposed to publish the Greek Testament on similar principles. In order to discover his *Oriental* text (a text which is substantially the same as the *Alexandrian*), Lachmann makes use of the following authorities: 1. A, B, C, D, as also P, Q, T, Z, in the Gospels, and in the Pauline epistles, H in addition. 2. *Latin interpretations*, viz. in the Gospels the Vercellian, Veronian, Colbertine, Cambridge; in the Acts the Cambridge and Laudian; in the Pauline epistles the Clermont, St. Germains, Boernerian; in the Apocalypse the Primasian. In addition to these, the Vulgate, as edited by Jerome, is everywhere employed. Of the fathers, he consults Irenæus, Origen, Cyprian, Hilary, and Lucifer. The immense mass of later MSS. and fathers is entirely overlooked as useless. The authorities for the Greek readings are given below the text; and, when it is considered how few materials are employed, it will readily be supposed that the various readings noted are not numerous. They are, however, most valuable and important. In addition to the Greek text and critical apparatus, the Hieronymian Vulgate is given, in the same form, as nearly as possible, in which it proceeded from Jerome, with important readings extracted from the Fuldensian Codex, from the same corrected by Victor, bishop of Capua, and from the Laurentian Codex. The great aim of the editor has been to exhibit a text in which the most ancient authorities are entirely agreed. Wherever this cannot be done with certainty, his critical apparatus shows the degree of probability attached to the text as given by him. To the volume is prefixed a preface of 55 pages (a few of them from Buttmann), in which the learned editor expounds his mode of procedure, and the authorities consulted. Respecting the opponents of his system, he does not speak in the most courteous or becoming language, nor is his Latinity the purest. Yet the preface is instructive withal, and must *be studied* by him who uses Lachmann's text. Were we disposed to follow the text of any *one* editor *absolutely*, we should follow Lachmann's. But it may be doubted whether he has not confined himself to a range of authorities too circumscribed. By keeping within the *fourth* century he has occasionally been compelled to rest upon *one* or *two* testimonies. We should therefore like to see more authorities consulted. We are persuaded, however, that this author has entered upon a right path of investigation, which will lead to results both permanently useful and unusually successful. The correctness of these principles, in the main, has been vindicated by the fact that later eminent critics have pursued essentially the same path.

(16.) Since the appearance of Lachmann's first edition, another has been published in Germany by Dr. Tischendorf (Leipzig, 1841, 8vo), which requires notice. It exhibits a corrected text, taken from the most ancient and best MSS., with the principal various readings, together with the readings of the Elzevir, Knapp, Scholz, and Lachmann editions. Great pains have manifestly been bestowed on the text and the critical apparatus subjoined to it. The prolegomena, consisting of 85 pages, are exceedingly valuable. They treat of *recensions*, with an especial reference to Scholz's system; enumerate the readings peculiar to the third edition of Stephens and that of Mill, to the editions of Matthaei and Griesbach; and specify the critical materials employed in the elaboration of a pure text. A careful perusal of the editor's able preface, and a collation of his text and critical apparatus beneath it, have convinced us of the great candor, minute diligence, extreme accuracy, and admirable skill by which this edition of the Greek Testament is characterized.

In 1859, Tischendorf published the seventh edition of his Greek Testament (Lpz. 8vo), greatly enlarged and improved, from the materials which he had brought to light in the interim. A notable addition to the latter is the famous Sinaitic MS. (q. v.) discovered by him, and lately published, the results of the examination of which, together with those of the Codex Vaticanus recently given by cardinal Mai to the public, are embraced, with other fresh materials, in Tischendorf's eighth edition now in course of publication (Lpz. 1864, sq. 8vo).

(17.) A new and critical edition of the Greek Testament, accompanied by the old Latin version, has been begun by Dr. Tregelles, and issued in *fasciculi*, of which the Gospels have appeared (London, 4to). The editor aims at great accuracy in his authorities. His text, however, shows defective judgment, and relies too exclusively on a few ancient MSS. It will be a valuable contribution, however, to sacred criticism.

(18.) Alford's *Greek Testament* (London, 1853–61, 5 vols. 8vo) contains a revised text and a copious critical apparatus, mostly compiled, however, from Tischendorf, and marked by too great a leaning to subjective or *internal* evidence.

(19.) Mr. Scrivener's critical labors on the Greek Testament deserve mention in this connection for their accurate research. An account of them may be found in his *Introduction* (Cambr. 1861, 8vo).

III. The operations of sacred criticism have established the genuineness of the Old and New-Testament texts in every matter of importance. All the doctrines and duties remain unaffected by its investigations. It has proved that there is no material corruption in the inspired records. It has shown that during the lapse of many centuries the Holy Scriptures have been preserved in a surprising degree of purity. The text is substantially in the same condition as that in which it was found seventeen hundred years ago. Let the plain reader take comfort to himself when he reflects that the received text which he is accustomed to read is *substantially* the same as that which men of the greatest learning and the most unwearied diligence have elicited from an immense heap of documents.

For a copious account of the various editions of the Greek Testament the reader is referred to Le Long's *Bibliotheca*, edited by Masch; or to Rosenmüller's *Handbuch für die Literatur der biblischen Kritik und Exegese*, i, p. 278–422; or to Tregelles's *Account of the printed Text of the Gr. New Test.* (Lond. 1854). A pretty full list may be found in Darling's *Cyclopædia Bibliog.* col. 51 sq. See also an article on the "Manuscripts and Editions of the New Testament," by Moses Stuart, in Robinson's *Bibliotheca Sacra*, No. 2, May, 1843; Davidson's *Lectures on Biblical Criticism* (2 vols. 8vo, Edinb. and Bost. 1852). See BIBLE.

CRITICISM, THE HIGHER. See p. 929 of this vol.

Croatia and **Slavonia**, a united province of the Austrian empire; area 9800 square miles; population in 1857, 865,403. The inhabitants are of Slavonian descent, and mostly belong to the Roman Catholic religion (in 1851, 770,656 Roman Catholics, and 88,331 United Greeks). There were, besides, 386 Lutherans, 4445 Reformed, 718 Greeks, 6 Unitarians, and 3914

Jews. Crotia is considered a part of Hungary, but formerly possessed some privileges; among others, to exclude Protestants from its borders. In 1866 the Croatian Diet passed resolutions in favor of religious toleration.

Crocius, Johannes, a German theologian, was born at Lasphe July 28, 1590; studied at Herborn and Marburg, and graduated in 1608. In 1612 he became court preacher of the Landgrave Moritz at Cassel, doctor of divinity in 1613, and in 1616 preacher at Königsberg. Returning to Marburg, he became professor of Theology in the University. He was the leader of the evangelical state Church of Hesse-Cassel, and the Lutheran having overcome the Reformed Church, he fled to Cassel in 1624; but after the peace in 1653, he returned and became rector of the University. He died July 1, 1659. His principal works are, *Erronea dogmata novorum Arianorum in Polonia* (Bremen, 1612, 8vo); *Pacis et concordiæ evangelicorum sacra defensio* (Marburg, 1623, 8vo); *Anti-Becanus i. e. controversiarum communium, quas Mart. Becanus Catholicis, Lutheri ac Calvini nomine perperam discretis, in Manuali. movit examen, ex S. S. et antiquitate institutum* (Cassel, 1643, 2 vols. 4to); *Anti-Becani a Mogumtinorum theologorum calumniis justa vindicatio* (Marburg, 1654); *Anti-Weigelius* (Cassel, 1651).—Herzog, *Real-Encyklopädie*, iii, 187.

Crocodile, an animal doubtless referred to under the name *Leviathan* (לִוְיָתָן) in the famous description of Job xli (Heb. xl, 25–xli), of which the following is a close rendering:

Canst thou draw out Leviathan with a hook,
Or with a cord canst thou press down his tongue?
Say, canst thou put a rush-[rope] in his nose,
Or with a thorn-[hook] canst thou bore his jaw?
Will he multiply to thee supplications;
Supposest thou he will speak to thee soft [things]?
Will he ratify a covenant with thee?
Wilt thou take him for a servant [for] ever?
Wilt thou play with him as with the sparrow,
Or tie him for thy maidens?
Shall there dig [a pit] for him partners,
[And] share him between Canaanites [i. e. merchants]?
Canst thou fill with darts his skin,
Or with a fish-spear [i. e. harpoon] his head?
Lay upon him [but] thy hand—
Thou wilt remember battle no more!
Lo! his [i. e. the assailant's] hope has been belied:
At the very sight of him will he be prostrated?
None [so] bold that will rouse him!
(Then who [is] he [that] before Me shall take a stand?
Who has anticipated me [in giving], that I should repay?
Under the whole heavens to me [belongs] that!)
I will not pass in silence his members,
And famed strength, and beauteous armature.
Who has disclosed the surface of his covering?
In his double [row] of grinders who can enter?
The valves of his face who has opened?
The circuits of his teeth [are] frightful!
A pride [are his] strong shields [i. e. scales],
Shut [with] a close seal:
One in [the] other will they join,
And a breath cannot come between them:
Each in its fellow will adhere;
They will cling together that they cannot be parted.
[At] his sneezings a light will flash,
And his eyes [are] like the lashes of dawn:
From his mouth will flames proceed;
Sparks of fire will escape:
From his nostrils a smoke will go,
Like a pot blown with [blazing] reeds:
His breath—coals will it kindle,
And a flame from his mouth will go.
In his neck force shall lodge,
And before him terror shall run.
The flaps of his flesh have stuck [fast];
Solid upon him, it cannot be shaken:
His heart [is] solid like a stone,
Even solid like [the] under mill-stone.
From his rising [the] mighty shall fear,
From terrors they shall stray.
[One] hitting him [with the] sword, it will not at all stand [the shock]—
Lance, dart, or mail:
He will regard as straw, iron;
As rotten wood, copper:
The bow-shot cannot make him flee,
To chaff have sling-stones been changed for him:
Like chaff clubs have been regarded [by him],
And he will laugh at the brandishing of the javelin.
Under him [are] points [as] of pottery,
He will strew [his spiked belly like] a threshing-sledge upon [the] mud:
He will cause [the] deep to boil like the pot,
[The] sea he will make like the unguent-kettle:
Behind him he will illuminate a path;
[One] would regard [the] main as hoary.
[There is] not upon [the] dust his ruler—
The [one] made without dismay:
Everything lofty will he behold—
He, [the] king over all the sons of pride [i. e. larger beasts].

This description is in the main strikingly applicable to animals of the alligator tribe, although highly colored in the poetic style. Yet, as observed with regard to the associated animal (see Behemoth), the phraseology is perhaps rather intended generically for large amphibious monsters of the saurian or lizard family, than for any one creature distinctively; a conclusion that is confirmed by the employment of the Heb. term *leviathan* to other animals of the fishy and reptile kinds. Indeed, as in the case of the hippopotamus, despite the formidable attributes ascribed to the beast in question by the writer in Job, it appears to have been attacked without much fear by the ancients; and although held sacred in some parts of Egypt, where it is especially found, in other nomes it was hunted successfully (Wilkinson, *Anc. Eg.* i, 241 sq.). The crocodile, however, is apparently elsewhere definitely referred to in Scripture by other names, especially as *the reed-beast* (Psa. lxviii, 31; see Schramm, *De bestia arundineti*, F. ad O. 1713). See Rahab.

Crocodile (*Crocodilus Vulgaris*).

"The crocodiles, constituting the order *Loricata* among reptiles, are distinguished pre-eminently by the character noticed in Holy Writ. They are clothed on the entire upper parts of the body with distinct series of bones, imbedded in the substance of the skin, and for the most part furnished with a ridge or crest, which greatly augments their strength, and constitutes the whole a coat of plate-mail which is able to resist the assaults of the most powerful enemy. The structure of the skull is remarkably solid, and it is surmounted by bony crests. There is a single row of teeth in each side of each jaw, locking into each other. The gape is enormous; the lips are altogether wanting; so that the teeth are visible when the mouth is closed; hence the animal, even when tranquil, seems to be grinning with rage. The tongue is fleshy, flat, but free only at the extreme edge, the inferior surface being adherent to the chin and throat; hence the crocodile has been erroneously represented as tongueless.

"All the species of this order are of huge size: not

only are they the hugest of reptiles, but they are among the most gigantic of all animals. Crocodiles have been described as attaining a length of twenty-five feet, but no specimens have been brought to Europe of nearly that size. They are probably long-lived, and perhaps their increase of dimensions is commensurate with their age. Highly carnivorous and predaceous, fierce and cunning, they are greatly dreaded in all the tropical regions which they inhabit. Lurking in the dense reeds or tangled herbage that grows rank and teeming at the edges of rivers in hot climates, or under the mangroves that interweave their myriad roots in arches above the water, or concealed among the bleaching trunks and branches of trees that have fallen into the stream, these huge reptiles watch for the approach of a living prey, or feed at leisure on the putrid carcasses with which the waters daily supply them. It is even affirmed that they prefer a condition of putrescence in their prey, and that their practice, when not pressed by immediate hunger, is, on seizing a living prey, to plunge into the stream in order to drown it, after which it is dragged away to some hole, and stored until decomposition has commenced.

"Among the decorations of the palace of Shalmaneser, M. Botta discovered a bas-relief continued over five slabs, and representing a great naval expedition against a maritime city. A fleet of ships transport timber along a coast washed by the sea, and studded with fortified islands—perhaps the siege of Tyre by this Assyrian monarch. The sea is represented as filled with various marine animals, such as fishes of various forms, turtles, turbinate shells, crabs, and *crocodiles* (*Mon. de Ninive*). This, it is true, may have been but a license of the artist; but Mr. Lyell, in his *Principles of Geology*, observes that the gavial, a larger species than the crocodile of the Nile, inhabiting the Ganges, descends beyond the brackish water of the delta to the sea. And other species of the genus *Crocodilus* (as restricted) are frequently known not only to haunt the mouths of rivers, but even to swim among islands, and pass from one to another, though separated by considerable spaces of open sea." See the *Penny Cyclopædia*, s. v. Compare LEVIATHAN.

"The crocodiles consist of three varieties, or perhaps species, all natives of the Nile, distinguishable by the different arrangement of the scutæ or bony studs on the neck, and the number of rows of the same processes along the back. Their general lizard-form is too well known to need particular description; but it may be remarked that of the whole family of crocodiles, comprehending the sharp-beaked gavials of India, the alligators of the West, and the crocodiles properly so called, the last are supplied with the most vigorous instruments for swimming, both from the strength and vertical breadth of their tails, and from the deeper webs of the fingers of their paws. Although all have from thirty to forty teeth in each jaw, shaped like spikes, without breadth so as to cut, or surface so as to admit of grinding, the true crocodile alone has one or more teeth on each side in both jaws, exserted, that is, not closing within, but outside the jaw. They have no external ear beyond a follicle of skin, and the eyes have a position above the plane of the head, the pupils being contractile, like those of a cat, and in some having a luminous greenish tinge, which may have suggested the comparison of the eyes of leviathan to 'the eyelids of the dawn' (Job xli, 10 [A. V. 18]). The upper jaw is not movable, but, as well as the forehead, is extremely dense and bony; the rest of the upper surface being covered with several rows of bosses, or plated ridges, which on the tail are at last reduced from two to one, each scale having a high horny crest, which acts as part of a great fin. Although destitute of a real voice, crocodiles when angry produce a snorting sound, something like a deep growl [or rather grunt]; and occasionally they open the mouth very wide, remain for a time thus exposed facing the breeze, and, closing the jaws with a sudden snap, cause a report like the fall of a trap-door. It is an awful sound in the stillness of the night in tropical countries. The gullet of the crocodile is very wide, the tongue being completely tied to the lower jaw, and beneath it are glands exuding a musky substance. On land the crocodile, next to the gavial, is the most active, and in the water it is also the species that most readily frequents the open sea. Of the immense number of genera examined, none reached to 25 feet in length, and the specimen in the British Museum is believed to be one of the largest. Sheep are observed to be unmolested by these animals; but where they abound no pigs can be kept, perhaps from their frequenting the muddy shores; for we have known only one instance of crocodiles being encountered in woods not immediately close to the water's side: usually they bask on sandy islands. They rarely attack men, but women are sometimes seized by them: in Nubia they are much more dangerous than in Egypt. (See Wilkinson's *Modern Egypt and Thebes*, ii, 127.) As their teeth are long, but not fitted for cutting, they seize their prey, which they can not masticate, and swallow it nearly entire, or bury it beneath the waves to macerate. Having very small excretory organs, their digestion requires, and accordingly they are found to possess, an immense biliary apparatus. They are oviparous, burying their eggs in the sand; and the female remains in the vicinity to dig them out on the day the young have broken the shell. Crocodiles are caught with hooks, and they seldom succeed in cutting the rope when properly prepared. Though a ball fired point blank will penetrate between the scales which cover the body, the invulnerability of these great saurians is sufficiently exemplified by the following occurrence. One being brought well bound to the bazaar at Cawnpore on the Ganges, it was purchased by the British officers on the spot, and carried farther inland for the purpose of being baited. Accordingly, the ligatures, excepting those which secured the muzzle, being cut asunder, the monster, though it had been many hours exposed to the heat, and was almost suffocated with dust, fought its way through an immense crowd of assailants, soldiers and natives, armed with staves, lances, swords, and stones, and worried by numerous terriers, hounds, and curs; overturning all in its way, till, scenting the river, it escaped to the water at a distance of two miles, in spite of the most strenuous opposition!

"With the ancient Egyptians the crocodile was a sacred animal, not, however, one of those revered by the whole nation, but only locally held in honor. Of old it was found in Lower as well as Upper Egypt; now it is restricted to the latter region, never descending as low as Cairo, and usually not being seen until the traveller approaches the Thebaïs. In hieroglyphics it bears the name *msuh*, literally 'in the egg,' as though expressing surprise that so great an animal should issue from so small an egg. From this name the Coptic and Arabic names take their origin. The crocodile was sacred to the god Sebak, represented with the head of this animal and the body of a man, and of uncertain place in the Egyptian mythology. It was not only not worshipped throughout Egypt, but was as much hated in some as venerated in other parts of the country: thus in the Ombite nome it was worshipped, and hunted in the Apollinopolite and Tentyrite nomes. The worship of this animal is no doubt of Nigritian origin, like all the low nature-worship of Egypt. It is not certain that the crocodile was an emblem of the king with the Egyptians, but it seems probable that this was the case.

"There is evidence that the crocodile was found in Syria at the time of the Crusades. A reptile of this kind has lately been discovered in the Nahr el-Kelb, the ancient Lycus.

"The exploit of Dieudonné de Bozon, knight of St. John, who, when a young man, slew the dragon of

Rhodes, an exploit which Schiller has celebrated in his 'Kampf mit dem Drachen,' must be regarded as a combat with a crocodile, which had probably been carried northward by the regular current of the eastern Mediterranean; for so the picture still extant in the harem of a Turkish inhabitant represents the Hayawán Kebér, or Great Beast—a picture necessarily painted anterior to the expulsion of the knights in 1480. As De Bozon died Grand Master of the Order at Rhodes in 1353, and the spoils of the animal long remained hung up in a church, there is not, we think, any reason to doubt the fact, though most of the recorded circumstances may be fabulous. See DRAGON. All the ancient Greek and the later Mediterranean dragons, as those of Naples, Arles, etc., where they are not allegorical or fictitious, are to be referred to the crocodile." See LIZARD.

Crocodilopŏlis (κροκοδείλων πόλις), the name of a town in Syria, situated near a river of the same name (*Crocodilon flumen*, between Cæsarea Palæstinæ and Ptolemais (Strabo, xvi, p. 758; Pliny, v, 17, 19). Reland (*Palæst.* p. 739) thinks the latter may have been the same with the SHIHOR-LIBNATH (q. v.) of Josh. xix, 26. It is now identified with the *Nahr Zerka* (Raumer, *Palästina*, p. 53, 191), in which crocodiles have been found (Pococke, *Travels*, ii, 58; Thomson, *Land and Book*, ii, 244).

Croes, JOHN, D.D., Protestant Episcopal bishop of New Jersey, was born June 1, 1762, and ordained in 1790. Having previously acted as lay reader in the P. E. church of Swedesborough, N. J., he became its rector in 1792. He was a prominent member in the Convention of New Jersey for forty years. In 1801 he became rector of Christ Church, New Brunswick, and of St. Peter's Church, Spotswood. In 1811 he was made D.D. by Columbia College, and in 1815 was chosen bishop of New Jersey, having declined the episcopate of Connecticut. From the time of his consecration he observed a system of annual visitations, and his last public act was an ordination in Christ Church, New Brunswick. He died July 26, 1832. He published several charges to his clergy, and a sermon on *The Duty and the Interest of contributing liberally to the Promotion of Religious and Benevolent Institutions*.—Sprague, *Annals*, v, 378.

Croft, GEORGE, D.D., an English divine, was born at Skipton, Yorkshire, in 1747; admitted at University College, Oxford, in 1762, was elected scholar in 1768, and fellow in 1779. In the same year he became vicar of Arncliffe, Yorkshire; in 1791, lecturer of St. Martin's, Birmingham, and finally rector of Thwing in 1802. He died in 1809. He wrote *Thoughts concerning the Methodists and the Established Clergy* (London, 1795, 8vo):—*Eight Sermons preached in* 1786 (Oxf. 1786, 8vo):—*Sermons preached before the University of Oxford* (Birming. 1811, 2 vols. 8vo).—Darling, *Cyclopædia Bibliographica*, s. v.

Crofton, ZACHARY, a learned Nonconformist in the seventeenth century, was born and educated in Dublin. He obtained the living of Wrensbury, Cheshire, but, being a zealous Royalist during the Commonwealth, and refusing the engagement, he was deprived. He afterwards obtained the living of St. Botolph, Aldgate, London. He was ejected for nonconformity in 1662, and died in 1672. He published *The Saint's Care for Church Communion* (Lond. 1671, sm. 8vo):—*Altar Worship* (Lond. 1661, 24mo).—Darling, *Cyclopædia Bibliographica*, s. v.

Croisiers, ORDER OF. See CROSS, ORDER OF.

Croly, GEORGE, LL.D., an English divine and writer, was born in Dublin, August, 1780, and educated at Trinity College. After his ordination he went to London, and spent some years as a writer for the newspaper press. In 1835 he was appointed rector of St. Stephen's, Walbrook, and he occupied that parish with great credit, both as preacher and pastor, up to the day of his death, Nov. 24, 1860. Dr. Croly wrote several extravagant novels and tragedies, among them *Salathiel*, *Marston*, and *Catiline*. His better reputation rests upon his fidelity and power as a preacher, after his appointment to St. Stephen's, and upon his religious writings, the more important of which are, *Divine Providence, or the three Cycles of Revelation* (Lond. 1834, 8vo):—*The Apocalypse: Prophecy of the Rise, Progress, and Fall of the Church of Rome* (3d ed., Lond. 1838, 8vo):—*The Popish Primacy*, 2 sermons (Lond. 1850, 8vo):—*Sermons* (1848, 8vo). He also wrote a *Life of Burke* and a *Life of George IV*, both reprinted in America.

Crombie, ALEXANDER, LL.D., was born at Aberdeen in 1760, and was educated at Marischal College. He became pastor of a Presbyterian congregation in London, and kept a private school at Highgate, and afterwards at Greenwich, with distinguished success. He died in 1842. His principal works are, *Natural Theology, or Essays on the Existence of the Deity*, etc. (Lond. 1829, 2 vols. 8vo):—*Gymnasium, sive Symbola Critica*, 5th ed. 1834, 2 vols. 8vo; abridged, 1836, 12mo): *A Defence of Philosophical Necessity* (1793, 8vo).—Darling, *Cyclopædia Bibliographica*, s. v.

Cromlech, a huge flat and oblong stone, placed in a sloping position, and supported by pillars of unhewn and perpendicular stones. There were many of them at one time in Ireland, and they are supposed to have been Druidic altars for sacrifice. Their massiveness has defied the ravages of time and revolutions, while the simplicity of their structure bespeaks for them a high antiquity. There is one of them yet in Glansworth, Ireland, which forms a chamber of 25 feet long and 6 feet wide. Mr. Moore (*History of Ireland*) says that remotely they were called in Irish "Bothals, houses of God." The Druids in ancient Ireland had no temples. Instead of them, on a hill, in an oaken grove, and, if possible, near a flowing stream, they enclosed a circle, having a diameter of 70 or 100 feet, and in the centre of it raised the cromlech, around which, on certain days, the people marched, and always in the direction of the sun. See DRUIDS; ALTAR.

Crook-backed (גִּבֵּן, *gibben'*, *gibbous*), a hunchbacked or deformed person (Lev. xxi, 21). See BLEMISH.

Crop (מְרָאָה, *murah'*, implying *full feeding*), the *craw* of a bird (Lev. i, 16). See SACRIFICE.

Crosier (or CROZIER), properly an archbishop's staff, terminating at the top in a floriated cross, as shown in the subjoined illustration of archbishop Warham's crosier (1520) in the cathedral of Canterbury, England. It is gilt, sometimes even of gold. The term crosier is also applied to the bishop's staff, which is surmounted by a crook or curved circular head. This "pastoral staff," in the Roman Church, is carried before bishops, abbots, and abbesses as an ensign, expressive of their dignity while they are exercising the functions of their office, and the figure of which is also found in their coat of arms. The origin of the crosier is the shepherd's crook, the bishops being regarded as the pastors of their dioceses. By degrees this humble emblem became greatly adorned, and was made of costly materials. Some suppose the crosier to have been originally only a simple staff, which, from the earliest times, was given to judges, kings, etc., as an emblem of authority. St. Isidore says bishops bear the staff because it is their duty to correct the erring and to support the weak. See STAFF.

Crosiers.

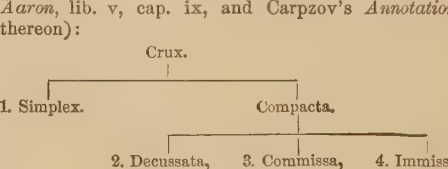
Cross (σταυρός, a pointed *stake*, prob. from ἵστημι, to *stand* upright), in the New. Test., signifies properly

the instrument of crucifixion; and hence (by metonymy) crucifixion itself, namely, that of Christ (Eph. ii, 16; Heb. xii, 2; 1 Cor. i, 17, 18; Gal. v, 11; vi, 12, 14; Phil. iii, 18). It is also put figuratively (in the phrases "take up [or bear] the cross," etc.) for any severe suffering, including the idea of exposure to contumely and death (Matt. x, 38; xvi, 24; Mark viii, 34; x, 21; Luke ix, 23; xiv, 27). (See below.)

I. *Designations.*—Except the Latin *crux* there was no word definitively and invariably applied to this instrument of punishment. The Greek word σταυρός properly, like σκόλοψ, means merely a stake (Homer, *Od.* xiv, 11; *Il.* xxiv, 453). So Eustathius and Hesychius both define it. The Greeks use the word to translate both *palus* and *crux;* e. g. σταυρῷ προσδεῖν in Dion. Cass. (xlix, 22) is exactly equivalent to the Latin *ad palum deligare.* In Livy even *crux* means a mere stake (xxviii, 29), just as *vice versâ* the fathers use σκόλοψ, and even *stipes*, of a cross proper. In consequence of this vagueness of meaning, impaling (Herod. ix, 76) is sometimes spoken of, loosely, as a kind of crucifixion, and ἀνασκολοπίζειν is nearly equivalent to ἀνασταυροῦν (Seneca, *Consol. ad Marc.* xx; and *Ep.* xiv). Other words occasionally applied to the cross are *patibulum* and *furca*, pieces of wood in the shape of Π or Y and Λ respectively (*Dig.* 48, tit. 13; Plautus *Mil. Gl.* ii, 47; and Sallust, fr. ap. Non. iv, 355, seems clearly to imply crucifixion). After the abolition of this mode of death by Constantine, Trebonianus substituted *furcâ figendos* for *crucifigendos* wherever the word occurred. More generally the cross is called *arbor infelix* (Livy, i, 26; Seneca, *Ep.* 101), or *lignum infelix* (Cicero, *pro Rab.* 3); and in Greek ξύλον (Sept. at Deut. xxi, 22): comp. "the accursed tree." The fathers in controversy used to quote the words ὁ Κύριος ἐβασίλευσεν, "The Lord reigned" (ἀπὸ τοῦ ξύλου), from Psa. xlv, 10, or Psa. xcvi, as a prophecy of the cross; but these words are a gloss (*adulterina et Christianâ devotione addita*), though Genebrardus thought them a prophetic addition of the Sept., and Agellius conjectures that they read עֵץ for אָמַר (Schleusner's *Thesaur.*). The Hebrews had no word for a cross more definite than עֵץ, "wood" (Gen. xl, 19, etc.), and so they called the transverse beams שְׁתִי וְעֵרֶב, "warp and woof" (Pearson, *On the Creed*, art. iv), like ξύλον δίδυμον, of the Sept. *Crux* is the root of *crucio*, and is often used proverbially for what is most painful (as Colum. i, 7; Terence, *Phorm.* iii, 3, 11), and as a nickname for villains (Plautus, *Pœn.* ii, 5, 17). Rarer terms are ἴκριον (Eusebius, viii, 8), σάνις (?), and *gabalus* (Varro ap. Non. ii, 373; Macrinus ap. Capitol. *Macr.* 11). This last word is derived from גָּבַל, "to complete."

II. *Forms of the Cross.*—In its simplest shape, consisting of two pieces of wood, one standing erect, the other *crossing* it at right angles, the cross was known at an early age in the history of the world. Its use as an instrument of punishment was probably suggested by the form so often taken by branches of trees, which seem to have been the first crosses that were employed. It was certainly customary to hang animals on trees. Cicero (*Rabir.* 3) appears to consider hanging on a tree and crucifixion as of the same import, and Seneca (*Ep.* 101) uses similar language. (See above.) Trees are known to have been used as crosses (Tertull. *Ap.* viii, 16), and to every kind of hanging which bore a resemblance to crucifixion, such as that of Prometheus, Andromeda, etc., the name was commonly applied. Among the Scythians, Persians, Carthaginians, Greeks, Romans, and the ancient Germans, traces are found of the cross as an instrument of punishment. The sign of the cross is found as a holy symbol among several ancient nations, who may accordingly be named, in the language of Tertullian, "crucis religiosos," devotees of the cross. Among the Indians and Egyptians the cross often appears in their ceremonies, sometimes in the shape of the letter T, at others in this shape +. At Susa, Ker Porter saw a stone cut with hieroglyphics and cruciform inscriptions, on which in one corner was the figure of a cross, thus, ☩. The cross, he says, is generally understood to be symbolical of the divinity or eternal life, and certainly a cross was to be seen in the temple of Serapis as the Egyptian emblem of the future life, as may be learned in Sozomen and Rufinus. Porter also states that the Egyptian priests urged its being found on the walls of their temple of Serapis as an argument with the victorious army of Theodosius to save it from destruction. From the numerous writings on this subject by La Croze, Jablonski, Zoega, Visconti, Pococke, Pluche, Petit Radel, and others, the symbol of the cross appears to have been most various in its significations. Sometimes it is the Phallus, sometimes the planet Venus, or the Nilometer, or an emblem of the four elements, or the seasons (Creuzer's *Symbolik*, p. 168–9). It is therefore not surprising that ancient and even modern Christian writers should on this subject have indulged in some degree of refinement and mysticism. Justin Martyr (*Apol.* i, § 72) says, "The sign of the cross is impressed upon the whole of Nature. There is hardly a handicraftsman but uses the figure of it among the implements of his industry. It forms a part of man himself, as may be seen when he raises his hands in prayer." In like manner Minutius Felix (c. 29): "Even Nature itself seems to have formed this figure for us. We have a natural cross on every ship whose sails are spread, in every yoke that man forms, in every outspreading of his arms in prayer. Thus is the cross found both in the arrangements of Nature and among the heathen."

We may tabulate thus the various descriptions of cross (Lipsius, *De Cruce*, i; Godwyn's *Moses and Aaron*, lib. v, cap. ix, and Carpzov's *Annotations* thereon):



Forms of Crosses.

1. The *crux simplex*, or mere stake "of one single piece without transom," was probably the original of the rest. Sometimes it was merely driven through the man's chest, but at other times it was driven longitudinally (Hesych. s. v. σκόλοψ), coming out at the mouth (Seneca, *Ep.* xiv), a method of punishment called ἀνασκινδύλευσις, or *infixio*. The *affixio* consisted merely of *tying* the criminal to the stake (*ad palum deligare*, Liv. xxvi, 13), from which he hung by his arms: the process is described in the little poem of Ausonius, "*Cupido crucifixus.*" Trees were naturally convenient for this purpose, and we read of their being applied to such use in the Martyrologies. Tertullian, too, tells us (*Apol.* viii, 16) that the priests of Saturn were thus punished by Tiberius (comp. Tacit. *Germ.* xii).

2. The *crux decussata* is called St. Andrew's cross, although on no good grounds, since, according to some, he was killed with the sword; and Hippolytus says that he was crucified upright on an olive-tree. It is in the shape of the Greek letter X (Jerome, *in Jer.* xxxi; Isidor. *Orig.* i, 3). Hence Justin Martyr (*Dial. c. Tryph.* p. 200) quotes Plato's expression (ἐχιάζειν ἀυτὸν ἐν τῷ πάντι) with reference to the cross. The fathers, with their usual luxuriant imagination, discover types of this kind of cross in Jacob's blessing of Joseph's sons (χέρσιν ἐνηλλαγμέναις; comp. Tert. *de Baptismo*, viii); in the anointing of priests "decussatively" (Sir T. Browne, *Garden of Cyrus*); for the

Rabbis say that priests were distinctively thus anointed (כמרך כר, i. e. *ad formam X Græcorum*, Schöttgen's *Hor. Hebr. et Talm.* iv, ad f.); and in the crossing of the hands over the head of the goat on the day of expiation (Targum *Jonath.* ad Lev. xvi, 21, etc.).

3. The *crux commissa*, or St. Anthony's cross (so called from being embroidered on that saint's cope; Mrs. Jameson's *Sacred Art*, i, xxxv), was in the shape of a T. Hence Lucian (in his Δίκη φωνηέντων) jocosely derives σταυρός from the letter Ταῦ, and makes mankind accuse it bitterly for suggesting to tyrants the instrument of torture (*Jud. Vocal.* 12). This shape is often alluded to as "the mystical Tau" (Tertullian, *adv. Marc.* iii, 22; Jerome, *in Ezech.* ix, etc.). As that letter happens to stand for 300, opportunity was given for more elaborate trifling: thus the 300 cubits of the ark are considered typical (Clemens Alexand. *Strom.* vi; S. Paulin. *Ep.* ii); and even Abraham's 318 servants (!); since 318 is represented by τιη (Barnabas, *Ep.* ix; Clemens Alex. *Strom.* vi; Ambrose, *Prol. in l. i. de Fide.*; see Pearson, *On the Creed*, art. iv).

Crux Ansata.

A variety of this cross (the crux ansata, "crosses with circles on their heads") is found "in the sculptures from Khorsabad and the ivories from Nimrud. M. Lajard (*Observations sur la Croix ansée*) refers it to the Assyrian symbol of divinity, the winged figure in a circle; but Egyptian antiquaries quite reject the theory (Layard's *Nineveh*, ii, 170, note). In the Egyptian sculptures, a similar object, called a crux ansata, is constantly borne by divinities, and is variously called "the key of the Nile" (Dr. Young in *Encycl. Britan.*), "the character of Venus," and more correctly (as by Lacroze) "the emblem of life." Indeed this was the old explanation (Sozomen, *Hist. Eccl.* vi, 15; so, too, Rufinus [ii, 29], who says it was one of the "*ἱερατικαὶ vel sacerdotales litteræ*"). "The Egyptians thereby expressed the powers and motion of the spirit of the world, and the diffusion thereof upon the celestial and elemental nature" (Sir T. Browne, *Garden of Cyrus*). This, too, was the signification given to it by the Christian converts in the army of Theodosius, when they remarked it on the temple of Serapis, according to the story mentioned in Suidas. The same symbol has been also found among the Copts, and (perhaps accidentally) among the Indians and Persians.

4. The *crux immissa* (or Latin cross) differed from the former by the projection of the upright post (*δόρυ ὕψηλον*, or *stipes*) above the transverse beam (*κέρας ἐγκάρσιον*, or *patibulum*, Eusebius, *de V. Constant.* i, 31). That this was the kind of cross on which our Lord died is obvious (among other reasons) from the mention of the "title" (q. v.), as placed *above* our Lord's head, and from the almost unanimous tradition; it is repeatedly found on the coins and columns of Constantine. Hence ancient and modern imagination has been chiefly tasked to find symbols for this sort of cross, and has been eminently successful. They find it typified, for instance, in the attitude of Moses during the battle of Rephidim (Exod. xvii, 12), saying that he was bidden to take this posture by the Spirit (Barnabas, *Ep.* 12; Justin Mart. *Dial. c. Tryph.* 89; Tertull. *adv. Marc.* iii, 18). Firmicius Maternus (*de Errore*, xxi) says (from the Talmudists?) that Moses made a cross of his rod in order to secure greater success (*ut facilius impetraret quod magnopere postularet, crucem sibi fecit ex virgâ*). He also fantastically applies to the cross expressions in Hab. iii, 3–5; Isa. ix, 6, etc. Other supposed types are Jacob's ladder (Jerome, *Com. in Ps.* xci; Augustine, *Serm. de Temp.* lxxix); the paschal lamb, pierced by transverse spits (Justin Martyr, *Dial. c. Tryph.* xl); and "the Hebrew *Tenupha*, or ceremony of their oblations waved by the priest into the four quarters of the world after the form of a cross" (Vitringa, *Obs. Sacr.* ii, 9; Schöttgen, *l. c.*). A truer type (John iii, 14) is the elevation (Chald. רקיפות) of the fiery serpent (Num. xxi, 8, 9). For some strange applications of texts to this figure, see Cypr. *Testim.* ii, 20 sq. In Matt. v, 18, the phrase "a single jot or tittle" is also made to represent a cross (Theophyl. ad loc., etc.). To the four *ἄκρα* or extremities of the cross they also applied the four dimensions of Eph. iii, 17 (as Gregory Nyss. and Augustine, *Ep.* 120); and another of their fancies was that there was a mystical significance in this four-angled piece of wood (Nonnius, *in Joh.* xix, 18), because it pointed to the four corners of the world (Sedul. iii). In all nature the sacred sign was found to be indispensable (Justin Mart. *Apol.* i, 72), especially in such things as involve dignity, energy, or deliverance; as the actions of digging, ploughing, etc., the human face, the *antennæ* of a ship in full sail, etc. (Jerome, *in Marc.* xi; Minutius Fel. *Oct.* xxix). Similar analogies are repeated elsewhere (Firm. Maten. *de Errore*, xxi; Tertull. *adv. Nat.* i, 12; *Apol.* 16; *de Coron. Mil.* iii); and, in answer to the sneers of those to whom the cross was "foolishness," they were considered sufficient proof of the universality of this sign, both in nature and religion. The types adduced from Scripture were valuable to silence the difficulties of the Jews, to whom, in consequence of Deut. xxi, 22, the cross was an especial "stumbling-block" (Tertullian, *adv. Jud.* ix). Many such fancies (e. g. the harmlessness of cruciform flowers, the southern cross, etc.) are collected in *Communications with the Unseen World.*

Besides the four corners (*ἄκρα*, or *apices*, Tert.) of the cross was a fifth (*πῆγμα*), projecting out of the central stem, on which the body of the sufferer rested (Justin Mart. *Tryph.* xci, who [*more suo*] compares it to the horn of a rhinoceros; *sedilis excessus*, Tertull. *adv. Nat.* i, 12; Iren. *adv. Hæres.* i, 12). This was to prevent the weight of the body from tearing away the hands, since it was impossible that it "should rest upon nothing but four great wounds" (Jeremy Taylor, *Life of Christ*, iii, xv, 2). This projection is probably alluded to in the famous lines of Mæcenas (ap. Sen. *Ep.* 101). Lipsius, however, thinks otherwise (*De Cruce*, i, 6). Whether there was also a *ὑποπόδιον*, or support to the feet (as we see in pictures), is doubtful. Gregory of Tours mentions it; but he is the earliest authority, and has no weight (Voss, *Harm. Passion.* ii, 7, 28). See LABARUM.

III. *Accessories of the Cross.*—An inscription, *titulus* or *elogium* (*ἐπιγραφή*, Luke xxiii; *αἰτία*, Matt. xxvii; *ἡ ἐπιγραφὴ τῆς αἰτίας*, Mark; *τίτλος*, John xix; *Qui causam poenæ indicavit*, Sueton. *Cal.* 32; *πίναξ*, Euseb.; *γράμματα τὴν αἰτίαν τῆς θανατώσεως δηλοῦντα*, Dion Cass. liv. 3; *πτυχίον ἐπίγραμμα ἔχον*, Hesych.; לוח), was generally placed above the person's head, and briefly expressed his guilt (e. g. "*οὗτός ἐστιν Ἄτταλος ὁ Χριστίανος*," Euseb. v, 1; "*Impie locutus parmularius*," Sueton. *Dom.* x), and generally was carried before the criminal (*præcedente titulo*, Sueton.). It was covered with white gypsum, and the letters were black; hence Sozomen calls it λεύκωμα (*Hist. Eccl.* ii, 1), and Nicephorus a λευκὴ σανίς (*Hist. Eccl.* viii, 29). But Nicquetus (*Tit. Sanct. Crucis*, i, 6) says it was white, with red letters. (See below.)

It is a question whether binding or absolute pinning to the cross was the more common method. In favor of the first are the expressions *ligare* and *deligare*; the description in Ausonius (*Cupido Crucif.*); the Egyptian custom (Xenoph. *Ephes.* iv, 2); the mention by Pliny (xxviii, 11) of *spartum e cruce* among magical implements; and the allusion to crucifixion noted by the fathers in John xix, 24 (Theophyl. and Tertull.). On the other side we have the expression *προσηλοῦσθαι*, and numberless authorities (Senec. *De Vit. Beatâ*, xix; Artemidor. *Oneirocr.*, in several passages; Apul. *Met.* iii, 60; Plautus, *Mostel.* ii, 1, 13, et passim). That our Lord was *nailed*, according to prophecy, is certain

(John xx, 25, 27, etc.; Zech. xii, 10; Psa. xxii, 16; comp. Tertull. *adv. Marc.* iii, 19, etc.; Sept. ὤρυξαν; although the Jews maintain that in the latter text כארי, "like a lion," is the true reading; Sixt. Senensis, *Bibl. Sanct.* viii, 5, p. 640). It is, however, extremely probable that both methods were used at once (see Lucan, vi, 547 sq.; and Hilary, *De Trin.* x). We may add that in the crucifixion (as it is sometimes called, Tertull. *adv. Marc.* i, 1; comp. Manil. *de Androm.* v) of Prometheus, Æschylus, besides the nails, speaks of a girth (μασχαλιστήρ, *Prom.* 79). When either method was used alone, the tying was considered more painful (as we find in the Martyrologies), since it was a more tedious suffering (*diutinus cruciatus*).

It is doubtful whether three or four nails were employed. The passage in Plautus (*Most.* ii, 1, 13) is, as Lipsius (*De Cruce*, ii, 9) shows, indecisive. Nonnus speaks of the two feet (ὁμοπλοκίες) being fastened with *one* nail (ἄζυγι γόμφῳ), and Gregory Naz. (*de Christ. pat.*) calls the cross "three-nailed" (ξύλον τρίσηλον); hence on gold and silver crosses the nails were represented by *one* ruby or carbuncle at each extremity (Mrs. Jameson, *l. c.*). In the "invention" of the cross, Socrates (*Hist. Ev.* i, 17) only mentions the hand-nails; and that only two were found has been argued from the τὰ μέν, τὰ δέ (instead of τοὺς μέν) in Theodoret (*Hist. Ev.* i, 17). Romish writers, however, generally follow Gregory of Tours (*de Glor. Mart.* vi) in maintaining four, which may indeed be implied by the *plural* in Cyprian (*de Passione*), who also mentions three more, used to nail on the title. Cyprian is a very good authority, because he had often been a witness of executions. (See below.)

Besides the copious monograph of Lipsius (*De Cruce*, Antwerp, 1596; Amst. 1670; Brunsw. 1640), there are works by Salmasius (*de Cruce*, Epp. 3); Kippingius (*de Cruce et Cruciariis*, Brem. 1671); Bosius (*de Cruce triumphante et gloriosâ*, Antw. 1617); Gretser (*de Cruce Christi*); and Bartholinus (*Hypomnemata de Cruce*); very much may also be gleaned from the learned notes of bishop Pearson (*On the Creed*, art. iv). See CRUCIFIXION.

IV. *The Cross as a Symbol.*—The word cross was early used in Roman literature to represent any torture, pain, or misfortune, or anything causing pain or misfortune. Christ adopted this use of the word when he says (of course before his crucifixion had taken place, or was foreseen by his followers) that they must be willing to take up their cross and follow him (Matt. xvi, 24), meaning that they must be willing to endure such sufferings as the service of God may bring. After the death and resurrection of Christ, the cross is spoken of, especially in the epistles of Paul, as the representative of Christ's whole sufferings from his birth to his death (Eph. ii, 16; Heb. xii, 2), and for the whole doctrines of the Gospel (1 Cor. i, 18; Gal. vi, 14). The opposers of the Gospel are spoken of as enemies of the cross (Phil. iii, 18). As a symbol of Christianity, its doctrines, and its duties, the cross has become a familiar figure of speech in the expression of experimental Christianity, in the preaching of Christian ministers, and in the hymns and songs of Christian poets. Very early in the history of the Church it became the custom for Christians to make the sign of the cross. See CROSS, SIGN OF. That the early Christians had a high regard for the cross is shown by the replies that Tertullian and Octavius made to the pagans who charged Christians with worshipping the cross. It is not easy, however, to fix the date at which Christians commenced to have material representations of the cross. There exist no earlier preserved examples than some rings of stone, with the cross engraved on them, the style of which seems to indicate that they were made before the time of Constantine. The martyr Procopius and a Christian soldier named Orestes are said to have had crosses attached to their necks before going to their execution. A single example of the *crux commissa*, ⊤, is preserved, of the date A.D. 370. On tombs, no cross of any kind is found before the same century. No crux immissa, ✝, or Greek cross, +, is found earlier than the fifth century. As far as yet examined, no cross is found of very early date in the Catacombs, those existing there having been traced by pilgrims centuries later. Such signs of the cross as properly belong to the monogram of Christ (q. v.) date back for their origin to the time of Constantine. Ancient texts have often spoken of this monogram under the name of cross, giving rise to many misunderstandings. In the more distant provinces of the Roman empire, as in Carthage, marbles marked by the cross have been found of the fourth century. Zeno of Verona, made bishop in 362, states that he placed a ⊤ cross on a basilica which he built. This same cross appears on the coins and medals of the emperor Valentinian I (died 375), and on bronzes struck by Constantine at Aquileia and at Treves, although many consider that these were Egyptian in origin, though adopted by the Christians. Constantine is stated to have placed a cross of gold on the tomb of St. Peter in the Vatican. Our Lord resting on a cross is seen on the tombstone of Probus and Proba (A.D. 355). Paulinus of Nola (died 432) had in his church paintings of crosses surrounded by crowns. Other similar ones are found in old mosaics, as in those of San Vitale of Ravenna (A.D. 547). Over the summit of an arch are two angels holding a crown, in the midst of which is a cross adorned with gems. Some diptychs of the fifth century also contain such crosses. The cross on tombstones was an attribute of a martyr, and on the early sarcophagi is specially used to designate St. Peter, as he died on the cross. After his vision of the cross in the heavens, Constantine (q. v.) changed the standard of the Roman empire to a cross. See LABARUM. From the sixth century the consuls began to have a cross on their sceptres. Valentinian III and his queen Eudoxia were the first (A.D. 445) to wear a cross on their crown. About A.D. 400 the cross called *crux stationalis* was first borne at the head of processions. A number of Christian cities and villages in the neighborhood of Antioch, Aleppo, and Apamea, which were suddenly deserted on the invasion of Syria by the Saracens, and which remain in the form in which they were left by their inhabitants, show how extremely general had become the custom at that time—in the early part of the sixth century—to paint the cross and the monogram of Christ, ☧, over the doors, windows, posts, and on the walls of the houses. It was also used on all domestic objects, as weights, vases, chairs, and all articles of furniture, and was put on ships to keep off disaster and the evil eye. After the fall of the Roman empire, when the labarum ceased to be used, the ensign of many cities became a real cross. The cross-bearer often held two lighted torches, under which were suspended by a chain the letters A and Ω. These *cross-standards* were soon decorated with great magnificence, containing scenes from the Old and New Testament, or busts of sacred or patriotic persons, either painted or sculptured, or adorned with gold and precious stones. This ensign was then borne into the thickest of the battle, being the rallying-point for the army, while a priest on the cart on which the ensign or gonfalone was placed, cheered on the soldiers to fight, or declared absolution to the dying. Many Christian kings on the eve of battle, or of any great enterprise, erected a cross, and, bowing before it, offered up prayer to God for success. Oswald had a wooden cross erected before he fought with Cadwallon, his soldiers all kneeling devoutly, while he himself held the cross as the earth was stamped down around it. The stones that formed the cromlechs (q.

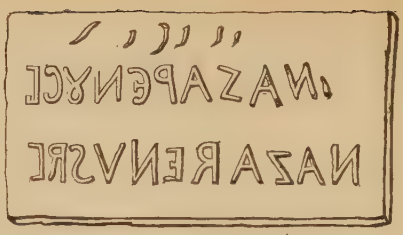
v.) were sometimes placed in the form of a cross, it is not known whether originally with any significance. But after the introduction of Christianity in England and Ireland these crosses were appropriated as Christian monuments, and, like other crosses erected for the purpose, served as marks of the boundary of property, of parishes, and sanctuaries; as monuments of battles, murder or other crimes, or disastrous events; to indicate places of public gathering to hear proclamations, sermons, and prayers; to mark the spot where the corpse of any famous person rested on its way to interment, "that passers-by might pray for his soul;" to mark the spot where some person had been delivered from great danger; to line the way to a cemetery or a church; and at cross-roads in the country, or in a market-place, to furnish protection from a passing storm. (Beggars often took their station at these crosses, asking alms in the name of Jesus, giving rise to the expression, "He begs like a cripple at a cross.") Crosses were sometimes erected on the tops of houses, tenants thus claiming the privileges of templars-hospitallers, of being free from the claims of their lords or landlords. Many of these crosses were very costly, and built in the highest architectural taste of the age. Political and religious upheavals have removed many of these crosses; time has destroyed others. Of the 360 crosses formerly existing in the small but historic island of *Iona*, but one now remains. Of the numerous series by the road leading from Paris to St. Denis, where the kings of France were buried, all are destroyed. Of the fifteen famous crosses that marked the resting-places of the corpse of queen Eleanor (died A.D. 1290), on its removal from Grantham to Westminster, but three now remain. Among the most famous preaching-crosses were those of St. Paul's in London and of Spitalfields, London, where the noted Spital Easter sermons were preached. Crosses are used freely on the vestments of priests, and on all parts of the interior and exterior of Greek, Armenian, and Romish houses of worship, and other ecclesiastical establishments. The Church of England and the Lutheran Church use them to crown their houses of worship; some other Protestant denominations use them thus at the discretion of the individual society; while others still, especially those who hold the views of the original Puritans, reject the use of the visible and material cross in any form or place. Those Christian bodies, that use the cross freely, place it upon the tombs of the dead. The cross we have hitherto spoken of is the passion cross—the representative of Christ's suffering. In the Catacombs, Christ is represented as coming forth from his tomb bearing a cross, the symbol of his triumph over death, and of the ultimate triumph of his doctrines. This triumphal cross, also called Cross of the Resurrection, never bearing Christ upon it as a crucifix, is used as a symbol of the authority and jurisdiction of different officials in certain branches of the Church. See Crosier.

V. *The Cross as a Signature.*—As early as the sixth century had it become the custom to put three crosses (✝ ✝ ✝) near the signature of important documents, these having the value of an oath on the part of the signer. Priests never omitted to add it to their signature, and bishops, as a sign of the dignity of their office, placed it before their signature. In diplomatic documents, crosses were used extensively as early as the fifth century. The appropriate use of crosses (σταυρολογία) was an important part in diplomatic knowledge. They were sometimes the ordinary cross, ✝, or the St. Andrew's cross, ✗, the starry cross, ✱, the rhomboid cross, ✠, or of other ornamental forms. They were usually made with black ink. The Byzantine emperors used red ink till they were imitated by other sovereigns, when they adopted the green color. The Anglo-Saxon kings used a golden cross, dispensing with the signature and the seal. Blue and silver crosses are also met with. The crosses were marked with a stile or pen, or were stamped, or were sometimes made of a thin plate of ivory, bone, or metal. By tradition the cross is now used as a signature, but only by those who cannot write. Crosses were often presented to cloisters by pious visitors, and are preserved in many of their manuscripts. They were used to mark the beginning and end of books, letters, documents, of chapters, paragraphs, references, and critical remarks in books. They are especially used in many countries at the head of letters announcing a death. The cross was early adopted for the ground-plan of churches. In the later Gothic period the apsis was turned out of the line of the axis of the nave to represent the drooping of the head of Christ at his death.

CROSS, Christ's. The question as to "the *true cross*" upon which our Saviour suffered has been much agitated, especially among Protestants, for the relics shown as such are generally credited among Romanists. (See the controversy revived in modern times by Mr. Williams, in favor of the tradition, *Holy City*, ii, 123; and against it, by Dr. Robinson, *Bibl. Res.* ii, 12 sq.) True, on this subject exact information ought to be accessible, since four ecclesiastical historians (Socrates, i, 13; Sozomen, ii, 1; Rufinus, i, 7; Theodoret, i, 18) concur in stating that the cross was found by Helena, mother of Constantine the Great. This event is assigned to the year of our Lord 326. Eusebius is silent on the discovery. The other writers state that Helena, when seventy-nine years of age, was induced by the warmth of her piety to visit the places which the Saviour had rendered sacred by his presence and sufferings. The hatred of the heathen had led them to obliterate as much as possible all traces of the memorable events which the life and death of Jesus had hallowed, and to cover Mount Calvary with stones and earth, and raise thereon a temple to the goddess Venus. A Jew, however, had treasured up what traditions he could gather, and was thus enabled to point out to Helena the spot where our Lord had been buried. The place being excavated, three crosses were found, and the title which that of Jesus bore was also found lying apart by itself. The question arose how the cross of Christ was to be distinguished from the other two. Macarius, bishop of Jerusalem, suggested that their respective efficacy should be tried as to the working of miracles. Sick persons were brought forward and touched by each separately. One only wrought the desired cures, and was accordingly acknowledged to be the true cross. A full view of all the authorities on this matter may be seen in Tillemont (*Mem. Eccles.* chapter on Helena). Having built a church over the sacred spot, Helena deposited within it the chief part of the real cross. The remainder she conveyed to Constantinople, a part of which Constantine inserted in the head of a statue of himself, and the other part was sent to Rome, and placed in the church of Sta. Croce in Gerusalemme, which was built expressly to receive the precious relic. When, subsequently, a festival to commemorate the discovery had been established, the bishop of Jerusalem, on Easter Sunday, exhibited to the grateful eyes of eager pilgrims the object to see which they had travelled so far and endured so much. Those who were persons of substance were farther gratified by obtaining, at their full price, small pieces of the cross set in gold and gems; and, that wonder might not pass into incredulity, the proper authorities gave the world an assurance that the holy wood possessed the power of self-multiplication, and, notwithstanding the innumerable pieces which had been taken from it for the pleasure and service of the faithful, remained intact and entire as at the first (Paulinus, *Ep.* xi *ad Sev.*). The capture of Jerusalem by the Persians, A.D. 614, placed the remains of the cross in the hands of Chosroes II, who mockingly conveyed them to his

capital. Fourteen years afterwards Heraclius recovered them, and had them carried first to Constantinople, and then to Jerusalem, in such pomp that, on his arrival before the latter city, he found the gate barred and entrance forbidden. Instructed as to the cause of this hindrance, the emperor laid aside the trappings of his greatness, and, barefooted, bore on his own shoulders the sacred relic up to the gate, which then opened of itself, and allowed him to enter, and thus place his charge beneath the dome of the sepulchre. See CALVARY. From this time no more is heard in history of the true cross, which the advocates of its genuineness claim may have been destroyed by the Saracens on their conquest of Jerusalem, A.D. 637. Fragments only of it are now exhibited in various parts of Europe. (See below.) The whole story is justly regarded by Protestants as containing unmistakable evidence of being at best a pious fraud on the part of Helena, or a trick on the part of her guides. See HELENA. But, even if the story were not so intrinsically *absurd* (for, among other reasons, it was a law among the Jews that the cross was to be burned; Othonis, *Lex. Rab.* s. v. Supplicium), it would require far more probable evidence to outweigh the silence of Eusebius. It clearly was to the interest of the Church of Rome to maintain the belief and invent the story of its miraculous multiplication, because the sale of the relics was extremely profitable. To this day the supposed title, or rather fragments of it, are shown to the people once a year in the church of Sta. Croce in Gerusalemme at Rome. On the capture of the true cross by Chosroes II, and its rescue by Heraclius, with even the seals of the case unbroken, and the subsequent sale of a large fragment to Louis IX, see Gibbon, iv, 326; vi, 66. Those sufficiently interested in the annals of such imposture may see farther accounts in Baronius (*Ann. Ecc.* A.D. 326, No. 42–50), Jortin, and Schmidt (*Problem. de Crucis Dominicæ Inventione*, Helmst. 1724); and on the fate of the true cross, a paper read by Lord Mahon before the Society of Antiquaries, Feb. 1831.

According to Ambrosius (*Oratio de Obitu Theodor.* p. 498), the piece which bore the title stood on the top of the cross of our Lord (John xix, 19–22, *ἐπὶ τοῦ σταυροῦ*; comp. Matt. xxvii, 37; Mark xv, 26; Luke xviii, 18): the form then would be somewhat thus, ✝. This fact would lead to the expectation of more accurate information from those who are said to have found the cross. But the conduct of Helena in dividing the cross, setting aside one part for Jerusalem, another for Constantinople, and another as a phylacterion for her son, and the subdivisions thereof which subsequently took place, rendered it impossible to ascertain in any satisfactory manner not only whether the alleged was the real cross, but also of what wood and in what shape it had been made. This only, then, as to the shape of the Saviour's cross, can be determined, that the prevalent form was that of the *crux capitata*, and that this form is generally found on coins and in the so-called monogram (Munter's *Sinnbilder*, l. iv). The wooden title, however, is said to be still preserved in Rome—not entire, indeed, for only fragments remain of the Hebrew letters, so that they are illegible. The Greek and Latin, except the letter *z*, are both written after the Eastern manner, from right to left. This is said to have happened either because they were written by a Jew, following a national custom, or from a desire on the part of the writer, if a Roman, to accommodate himself to what was usual among the Jews. Nicetus (*Titulus sanct. Crucis*) holds that it is not all the work of one hand, since the Roman letters are firmly and distinctly cut, but the Greek letters very badly. He thinks that a Jew cut the Hebrew (or Aramæan) and Greek, and a Roman the Latin. All that remains of the Greek is Ναζαρενους β– [i. e. Ναζαρηνός βασιλεύς], of the Latin *Nazarenus Re*– [*Rex*], i. e. "Nazarene, King." This tablet is said to



Reputed Tablet of Christ's Cross.

have been sent by Constantine to Rome, and there deposited in a leaden chest, above the vaulted dome of the church of Sta. Croce, in a little window, and then bricked into the wall, its position being recorded by a Mosaic inscription without. Time rendered the inscription almost illegible; and the window, owing to the carelessness of workmen engaged in repairing the church, was accidentally broken open, when the relic was discovered. A bull was issued by pope Alexander III commemorating the discovery and authenticating the title. The whole story is evidently of a piece with the foregoing. Monographs on the subject and relic in question have been written in Latin by Alberti (Lips. 1690; Jen. 1748), Altmann (Bern. 1739), Felter (Lips. 1725), Freiesleben (Lips. 1664), Hanke (Jen. 1672), Hiller (Tubing. 1696), Nicqueti (Antw. 1770), Reichmann (Viteb. 1655), Reyper (Kilon. 1694; also in Menthenii *Diss.* ii, 241 sq.), Weselius (L. B. 1712). See TITLE.

Much time and trouble have been wasted in disputing as to whether three or four nails were used in fastening the Lord to his cross. (See above.) Nonnus affirms that three only were used, in which he is followed by Gregory Nazianzen. The more general belief gives four nails, an opinion which is supported at much length and by curious arguments by Curtius (*De Clavis Dominicis*). Others have carried the number of nails as high as fourteen. Of the four original nails, the empress Helena is reported (Theodoret, *Hist. Eccl.* i, 17) to have thrown one into the Adriatic when furiously raging, thereby producing an instant calm. The second is said to have been put by Constantine into either his helmet or crown, or (as Zonaras says) on the head of the statue which he intended to be the palladium of Constantinople, and which the people used to surround with lighted torches (Mosheim, *Eccl. Hist.* ii, 1, 3, and notes). This nail, however, was afterwards to be found in a mutilated state in the church of Sta. Croce. In the Duomo of Milan is a third nail, which Eutropius affirms was driven through one of Jesus's hands, and which Constantine used as a bit, intending thereby to verify the prophecy of Zechariah (xiv, 20): "In that day shall be upon the bells (margin, *bridles*) of the horses, *Holiness unto the Lord.*" Treves possesses the fourth nail, which is alleged to have been driven through the sufferer's right foot (Lipsius, *De Cruce*, ii, 9). Those who maintain the number of nails to have been more than four have had no difficulty in finding as many nails as their hypothesis in each case needed, and as many sacred places for their safe keeping. There are monographs on this subject, in Latin, by Fontanus (Amst. 1643), Frischmuth (Jen. 1663), Semler (Dresd. 1741), Winer (Lips. 1845), Curtius (Monaci, 1622; Antw. 1670; also in the *Symb. litt. Brem.* iii, 309); in German, by Bähr (in Heydenreich's *Zeitschr.* ii, 309), Paulus (*Memorabil.* iv, 36–64). See NAIL.

Another dispute has been agitated relative to the existence of a *hypopodium* or tablet whereon the feet were supported. Gregory of Tours, who had seen the alleged true cross, affirms that it had such a footstool; but his dictum has been called in question. It is, however, doubted whether the hands alone, without a prop beneath, could sustain the weight of the body,

and some have supposed that a kind of seat was placed, on which the sufferer may be said to have in some way sat. The controversy is treated at length in the first of the four *Hypomnemata de Cruce* of Bartholinus (Hafn. 1651, Amst. 1670, L. B. 1695).

A common tradition assigns the perpetual shiver of the aspen to the fact of the cross having been formed of its wood. Lipsius, however (*De Cruce*, iii, 13), thinks it was of oak, which was strong enough, and common in Judæa. Few will attach any consequence to his other reason, that the relics appear to be of oak. The legend to which he alludes,

> "Pes crucis est cedrus, corpus tenet alta cupressus,
> Palma manus retinet, titulo lætatur oliva"
> (The foot is cedar, cypress forms the shaft,
> The arms are palm, the title olive bears),

hardly needs refutation. It must not be overlooked that crosses must have been of the meanest and readiest materials, because they were used in such marvellous numbers. Thus we are told that Alexander Jannæus crucified 800 Jews (Josephus, *Ant.* xiii, 14, 2), and Varus 2000 (*ib.* xvii, 10, 10), and Hadrian 500 a day; and Titus so many that "room failed for the crosses, and crosses for the bodies" (Josephus, *War*, vi, 28, where Reland rightly notices the strange retribution, "so that they who had nothing but 'crucify' in their mouth were therewith paid home in their own bodies," Sir T. Browne, *Vulg. Err.* v, 21). In Sicily, Augustus crucified 600 (Orosius, vi, 18). See Crucifixion.

CROSS, Bull of the (*Cruzada*), a bull by which pope Calixtus III, in 1487, granted very extensive indulgences to all who would take up arms, under king Henry of Castile, against the infidels, or pay to that king a certain sum for defraying the expenses of the war. The indulgence was at first granted for only five years, but was from time to time renewed and enlarged, so as to include many privileges, such as exemption from the commandment of abstinence. The proceeds of the Bull of the Cross constituted a considerable portion of the public revenue. The last renewal of the bull is of the year 1753. A similar bull was issued in 1514 by pope Leo, in favor of king Sebastian of Portugal, to whom, in consideration of his endeavors for the conversion of infidels in Africa, the third part of the tithes and the tenth part of the taxes due to the churches and ecclesiastical benefices of the kingdom was conceded.—Wetzer u. Welte, *Kirchen-Lex.* vi, 265.

CROSS, Exaltation of the, a festival in the Roman Catholic Church, instituted in commemoration of the exaltation of the supposed cross of Christ at Jerusalem, after its recovery from the Persians. The latter, when conquering Jerusalem in 614, carried off with them the relic which, since its "invention" [see Cross, Christ's] by the empress Helena, had been venerated as the "Holy Cross." With a view to a heavy sum of ransom, they had it sealed up by the patriarch Zacharias with the patriarchal seal, and took it to a strong castle in Armenia. When, in 627, the emperor Heraclius conquered the Persians, he stipulated in the treaty of peace for the restoration of the Holy Cross, and took it with him to Constantinople. From there, in 629 (according to others in 630), he took it himself, accompanied by a large retinue, to Jerusalem, where it was again set up with great solemnities. It is this restoration of the cross to Jerusalem which is annually commemorated on Sept. 14 in the Church of Rome as the Exaltation of the Cross.—Wetzer u. Welte, *Kirchen-Lex.* vi, 268.

CROSS, Invention of the, the name given in the Roman Catholic Church to a festival which commemorates the finding of the alleged true cross of our Saviour, and which is celebrated on the 3d of May. An order of friars, founded in honor of the invention of the cross, and carrying in their hand a staff, on the top of which was a cross, received the name of *Croisiers* (Fr. *croix*, cross), corrupted into *Crouched* or *Crutched* Friars. They came to England in the 13th century, and had monasteries in London, Oxford, and Ryegate. The festival of the Elevation of the Cross (September 14) commemorates its re-erection in Jerusalem by the emperor Heraclius, after it had been carried away by the Persians. See Cross, Exaltation of.

CROSS, Metaphorical Sense of. This word (1), in its most comprehensive sense, as figuratively used in N. T., designates not only the whole passion of Christ, culminating in the death on the cross, but also the whole Gospel system, as a means of reconciliation with God through Christ. (2) It is also used to designate the sufferings and trials sent upon Christians for their moral improvement, and which have the effect of strengthening faith, and teaching humility, love, and submission. The command to "take up the cross" daily (Luke ix, 23) signifies that we are cheerfully to submit to all the evils of life, circumstance, and position, which God, in his wisdom, sees fit that we should encounter; we are even to rejoice at misfortune, as the discipline of suffering brings fruits of sanctification to those who patiently submit for Christ's sake, remembering that all things work for good to them that love God (Rom. viii, 28). Four kinds of "crosses" have been recognised: 1, the cross of martyrdom, the witness unto death for Christ and the Gospel; 2, the cross of trials, for the preservation of faith, love, and hope; 3, the cross of discipline, for the purification of the heart and the subjection of sinful desires and inclinations; 4, the cross of punishment, for the chastisement of sin; though the aim of punishment also is the improvement of the sinner. God is love, and therefore lays the "cross" on every one as he needs it. He chasteneth whom he loveth. It is a sad mistake to consider suffering as the result of caprice or anger on the part of God (2 Cor. iv, 16–18; xii, 7; Heb. xii, 1–12; Gal. vi, 14; Eph. ii, 16, 17; Col. i, 19–22; 1 Cor. i, 17, 18; Gal. v, 11; Phil. iii, 18).—Krehl, *N. T. Handwörterbuch*, s. v. Kreuz.

CROSS, Orders of the, in the Roman Church. 1. *Canons Regular of the Congregation of the Holy Cross*, founded in 1211 by Theodore de Celles, a descendant of the dukes of Bretagne. It was confirmed by Innocent IV in 1248, and was exempted from the jurisdiction of the bishops by John XXII in 1318. The order spread especially in the Netherlands, Western Germany, and France, and still exists in the Netherlands and Belgium, whence in 1850 a colony was sent over to the United States, where they have an establishment in the diocese of Milwaukee. See Helyot, who calls them Croisiers or Porte-Croix; *American Catholic Almanac*. 2. *Croisiers (Cross-bearers) of Italy*, an-

Cross-bearer in Italy.

Cross-bearer with the Star in Bohemia.

other congregation of the same order, the origin of which is unknown, but which was renewed by pope Alexander III in 1169, and is now extinct. 3. *Croisiers of Bohemia*, see KNIGHTS, TEUTONIC. 4. *Daughters of the Cross*, founded by Madame de Villeneuve, in

Daughter of the Cross.

Cross-bearer in France and the Netherlands.

France, in 1640, under the direction of Vincent de Paul, and confirmed by pope Clement IX. They devote themselves principally to the instruction of girls, and have their principal establishment, with more than 100 members, at Paris. The order is rapidly increasing in France, and has one establishment in the United States, in the diocese of Natchitoches, founded in 1854.—Fehr, *Geschichte der Mönchsorden*, ii, 319. 5. Another congregation of *Daughters of the Cross* was founded in 1835 at Liege, by Habets, a Belgian priest. They teach, keep asylums for fallen women, etc., and have established several houses in Belgium and Germany.—Fehr, *Geschichte der Mönchsorden*, ii, 322. 6. *Sisters of the Cross*, also called "Sisters of St. Andrew," founded in 1806 by Mademoiselle Bechier, in the diocese of Poitiers. They devote themselves to the instruction of children, and to the nursing of the sick in the country. They are very numerous in France. 7. Another congregation of *Sisters of the Cross*, also called "Sisters of the Immaculate Heart of Mary," was founded by Abbé Moreau, at Mans, about 1834, and approved by the pope in 1857. They came to the United States in 1843, and have establishments in the dioceses of Fort Wayne, Philadelphia, and Chicago. 8. A *Congregation of Regular Clerks of the Holy Cross* was founded in 1835, together with the congregation mentioned under No. 7, by Abbé Moreau. It was afterwards united with the "Brothers of St. Joseph," founded about the same time by Very Rev. Mr. Dujarier, and the rule of the united congregations was approved by Pius IX in 1857. They had, in 1867, 82 houses and missions, of which 58 were in France, 12 in America, 7 in Bengal, 2 in Algeria, and 1 each in Rome, Poland, and Austria.

CROSS, SIGN OF THE, a rite in the Roman Church, and in the Greek and other Eastern churches. It is used by officiating priests as a form of blessing at all liturgical actions and consecrations, and by all the members of the Church at the beginning of a prayer during divine service, on entering a church, on passing the host, and on many other occasions. It is always made with the right hand. In the 6th century it became customary to make the sign of the cross with the thumb on forehead, mouth, and chest. Since the 8th century the so-called "large" or "Latin" cross has been in common use among the laity. It is made with the palm of the hand by touching first the forehead; next, in direct line downward, the chest; next, in horizontal line, the left and the right shoulder. The same form of cross is used in liturgical actions, if the cross is to be made over the object to be blessed without touching it. While among the Latins the cross beam is drawn from the left to the right, the reverse is the case among the Greeks and Russians. In making the sign of the cross, it is common to pronounce the words, "In the name of the Father, and the Son, and the Holy Ghost. Amen." Formerly there were also other forms in common use (Binterim enumerates eight), but all have been displaced by the above. The different ways of making the sign of the cross, and the number of fingers used, have called forth in the Church of Rome the most fanciful and mystical significations, and a special power has commonly been attributed to the sign of the cross. It is, therefore, also made over water, salt, oil, etc. In the Greek Church the sign of the cross is of even more frequent use than in the Roman Catholic. Among the Protestants it is almost universally abandoned (in the Lutheran Church of Saxony it was in use until the introduction of a new liturgy in 1812). In the Church of England and in the Protestant Episcopal Church its use in baptism is optional.

CROSS, WAY OF THE (*Via Crucis*), the collective name of a certain number of pictures or stations in or near Roman Catholic churches and sanctuaries, to represent an equal number of events in the history of the Passion of the Saviour. Generally the number of the pictures is 14 or 15, but sometimes less. The people who "walk the way of the cross" stop a little while at each picture, reciting a prayer, until they have, in turn, visited every station, and thus completed the commemoration of the Passion. In some Roman Catholic countries, as in Southern Germany, the "Way of the Cross" can be met with in almost every church. This practice was invented by the Franciscan monks, who offered it to the people as a substitute for the pilgrimage to the Holy Land, and justly calculated that, by obtaining numerous indulgences from the popes for those who would adopt this peculiar kind of worship, they would achieve a great popularity for the churches of their order. Their expectation was realized. The popes granted to the visitors of the "Way of the Cross" all the indulgences which had formerly been granted to the visitors of different places in the Holy Land, thus enabling the people to gain in a few minutes several "plenary" indulgences, besides a number of partial. Every "Way of the Cross" must be instituted by a Franciscan monk, and it requires a special permission from the pope if any one who is not a Franciscan is to introduce it. Many special books of devotion have been published for the *Via Crucis*.

Cross-bearer (*cruciger*). 1. In the Romish Church, the designation of the chaplain of an archbishop, or a primate, who bears a cross before him on solemn occasions. The pope has the cross borne before him everywhere; a patriarch anywhere out of Rome; and primates, metropolitans, and those who have a right to the pallium, throughout their respective jurisdictions. A prelate wears a single cross, a patriarch a double cross, and the pope a triple cross on his arms.

2. The name *cross-bearers* ("cruciferi") was also applied to the *Flagellants* in the thirteenth and fourteenth centuries. See FLAGELLANTS.

Croswell, Henry, D.D., a Protestant Episcopal minister, was born in West Hartford, Conn., June 16, 1778. While quite young he entered his brother's printing-office in Catskill, N. Y., and soon became editor of a newspaper published in that place. About 1800 he established a paper at Hudson, N. Y., called *The Balance*. He removed to Albany in 1809, where his paper attained a still wider circulation and influence. Finally he turned his attention to the Christian ministry. Though brought up among Congrega-

tionalists, he determined to unite with the Protestant Episcopal Church, and prepared to enter its ministry. In the year 1814 he was ordained deacon. After preaching a short time in Hudson, he removed to New Haven, when he took charge of Trinity Church, and in February, 1816, he was ordained priest. He remained in the same parish 43 years. It is stated that in a period of 41 years he officiated at 1844 burials, administered 2553 baptisms, and married 833 couples. He died March 13, 1858.

Croswell, William, D.D. (son of Henry), was born in Hudson, N. Y., Nov. 7, 1804, and graduated at Yale College in 1822. After studying at the General Theol. Seminary, N. Y., he was ordained in 1828, and in May, 1829, he accepted the rectorship of Christ Church, Boston. In 1840 he became rector of St. Peter's Church, Auburn, N. Y., but, after somewhat more than four years, he returned to Boston, and connected himself with a new enterprise—the Church of the Advent, which proved very successful. With this church he continued till the close of his life. In 1846 the degree of D.D. was conferred upon him by Trinity College, Hartford, and on Nov. 9, 1851, he died suddenly, after the partial delivery of a beautiful sermon, addressed to the children of his church, in connection with a baptism. His productions, especially on poetry, were published soon after his death by his father, in an extended *Memoir*, but he had strictly forbidden the publication of any of his sermons.—Sprague, *Annals*, v, 697.

Crothers, Samuel, D.D., a Presbyterian minister, was born near Chambersburg, Pa., October 22, 1783. His father removed to Lexington, Ky., in 1787. In February, 1798, he entered the Lexington Academy, and in 1804 placed himself under the care of the Kentucky Presbytery as a candidate for the ministry. He entered the New York Theological Seminary in 1805, and, returning to Kentucky in 1809, was there licensed to preach. He settled in Chilicothe in 1810, where he remained for three years, removing to Greenfield in 1813. At this time the Associate Reformed Church was greatly agitated with controversies respecting intercommunion and psalmody. With Dr. Mason and most of his students, Mr. Crothers opposed close communion, and the exclusive use of what has been called inspired psalmody. Troubles growing out of these things, he resigned his charge, and removed to Winchester, Ky. In 1820 he returned to Greenfield, where he remained 36 years. He died suddenly in Oswego, Ill., at the house of his son, on July 20, 1856.—Wilson, *Presbyterian Hist. Almanac*, 1864.

Crow (κορώνη), Baruch vi, 54, prob. the *jackdaw*. See Raven.

Oriental Jackdaw.

Crowell, Joshua, an early Methodist Episcopal minister in New England, was born in Massachusetts in 1777, of Presbyterian parents, was converted through the agency of Methodist preaching at about 20, entered the itinerancy in 1801, located in 1809, and died at Sturbridge, Mass., July, 1858, in the fifty-seventh year of his ministry. He had a strong intellect, sound judgment, generous emotions, and an earnest love of Methodism. He was an able and successful minister. He was one of the founders of the Wesleyan Academy, Wilbraham, and in many ways was of eminent service to the Church.—Sherman, *Sketches of New-England Divines*, p. 389.

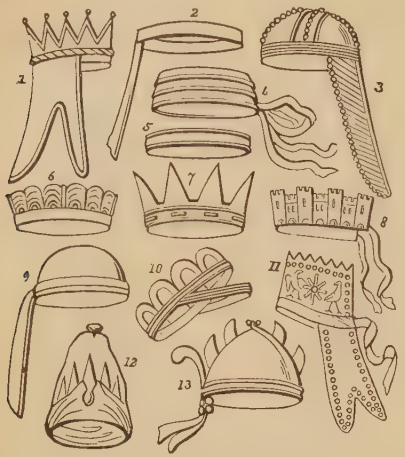
Crowell, Seth, a Methodist Episcopal minister of more than ordinary talents, was born at Tolland, Conn., in 1781, entered the New York Conference in 1801, was returned superannuated in 1813, re-entered upon work as a missionary in 1816, located in 1819, and was readmitted as superannuated in 1824. He died in 1826 in New York city. See *Minutes of Annual Conferences*, i, 542; Stevens, *Memorials of Methodism*, ii, ch. xviii.

Crowing. See Cock-crowing.

Crowl, John F., a Methodist Episcopal minister, was born at Salem, N. Y., about 1823. He removed with his parents when quite young to Troy, N. Y.; was converted in 1839, and in 1843 united with the Troy Conference. For some time during his ministry he located and labored as an evangelist. His labors were abundant and highly successful to the close of his life, Sept. 14, 1875. Mr. Crowl was a sweet singer, powerful in exhortation, and mighty in prayer. He had a deeply emotional nature, and his soul seemed greatly burdened for souls. See *Minutes of Annual Conferences*, 1876, p. 81.

Crown, an ornament often mentioned in Scripture, and in such a manner as in most cases to indicate the circumstances under which and the persons by whom it was worn; for crowns were less exclusively worn by sovereigns than among modern nations. Perhaps it would be better to say that the term "crowns" was applied to other ornaments for the head than those exclusively worn by royal personages, and to which modern usage would give such distinctive names as coronet, band, mitre, tiara, garland, etc. This ornament, which is both ancient and universal, probably originated from the fillets used to prevent the hair from being dishevelled by the wind. Such fillets are still common, and they may be seen on the sculptures of Persepolis, Nineveh, and Egypt; they gradually developed into turbans (Josephus, *Ant.* iii, 7, 7), which, by the addition of ornamental or precious materials, assumed the dignity of mitres or crowns. The use of them as ornaments was probably suggested by the natural custom of encircling the head with flowers in token of joy and triumph ("Let us crown ourselves with rosebuds," Wisd. ii, 8; 3 Macc. vii, 16; Jud. xv, 13, and the classical writers, *passim*). See Wreath. The first crown was said to have been woven for Pandora by the Graces (comp. στέφανος Χαρίτων, Prov. iv, 9). According to Pherecydes, Saturn was the first to wear a crown; Diodorus says that Jupiter was first crowned by the gods after the conquest of the Titans. Pliny, Harpocration, etc., ascribe its earliest use to Bacchus, who gave to Ariadne a crown of gold and Indian gems, and assumed the laurel after his conquest of India. Leo Ægyptius attributes the invention to Isis, whose wreath was cereal. These and other legends are collected by Tertullian from the elaborate treatise on crowns by Claud. Saturninus. Another tradition says that Nimrod was the first to wear a crown, the shape of which was suggested to him by a cloud (Eutychius Alexandr. *Ann.* i, p. 63). Tertullian, in his tract *De Cor. Militis* (c. vii sq.), argues against them as unnatural and idolatrous. He is, however, singularly unsuccessful in trying to disprove the countenance given to them in Scripture

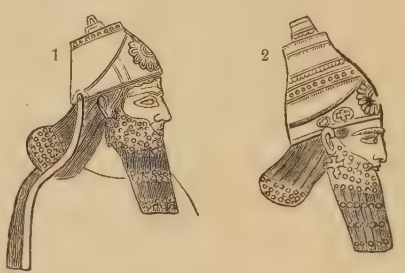
where they are constantly mentioned. See BONNET.



Ancient Asiatic Crowns.

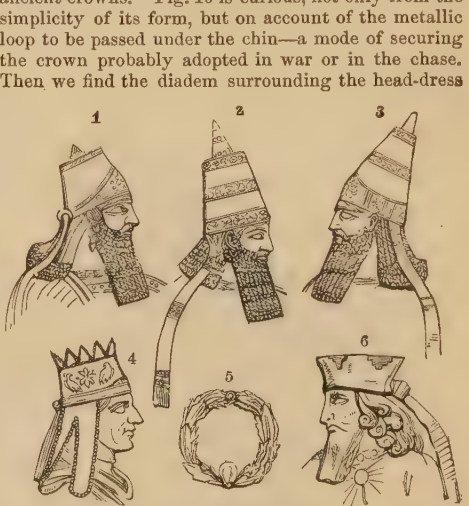
I. Fig. 5. Simple *fillet;* 2, with shoulder-piece; 4, with band and ribbon; 10, with throat-latch and edging.
II. 12. Simple *cap;* 9, with pendant; 13, with crest and ribbon; 3, with bosses and shoulder-piece.
III. 6. Simple *crown* proper; 7, with serrated edge; 8, and ribbon; 1, or cape; 11, with both.

1. The word נֵזֶר, *ne'zer* (lit. *consecration;* hence *consecrated hair*, as of a Nazarite, and then generally *long hair*), is supposed to denote a *diadem* (Greek διάδημα, Rev. xii, 3; xiii, 1; xix, 12). It is applied to the inscribed plate of gold in front of the high-priest's mitre, which was tied behind by a ribbon (Exod. xxix, 6; xxxix, 30), and which was doubtless something of the same kind that we see in figs. 8, 11. This word is also employed to denote the diadem which Saul wore in battle, and which was brought to David (2 Sam. i, 10), and also that which was used at the coronation of the young Joash (2 Kings xi, 12); and, as another word is applied elsewhere to the crown used in this ceremonial, the probability is that the Hebrew kings wore sometimes a diadem and sometimes a crown, and that the diadem only was accessible to the high-priest, by whom Joash was crowned, the crown itself being most likely in the possession of Athaliah. Both the ordinary priests and the high-priest wore head-dresses of this ornamental description. The common mitre (מִגְבָּעָה, Sept. κίδαρις, Exod. xxviii, 37; xxix, 6, etc.; Josephus, ταινία; Hesych. στρόφιον ὃ οἱ ἱερεῖς φοροῦσι) was a flat cap (πῖλος ἄκωνος), forming a sort of linen *tænia* or crown (στεφάνη), Josephus, *Ant.* iii, 7. The ceremonial mitre (מִצְנֶפֶת, Sept. βυσσίνη τιάρα) of the high-priest (used also of a regal crown, Ezek. xxi, 26) was much more splendid (Exod. xxviii, 36; Lev. viii, 9; "an ornament of honor, a costly work, the desire of the eyes," Ecclus. xlv, 12; "the *holy* crown," Lev. viii, 9, so called from the Tetragrammaton inscribed on it, Sopranes, *De re Vest. Jud.*, p. 441). It had a second fillet of blue lace (ἐξ ὑακίνθου πεποικιλμένος, the color being chosen as a type of heaven), and over it a golden diadem (נֵזֶר, Exod. xxix, 6), "on which blossomed a golden calyx like the flower of the *ὑοσκύαμος*," or hyoscyamus (Josephus, *Ant.* iii, 6). The gold band (צִיץ, Sept. πέταλον; Origen, ἱλαστήριον) was tied behind with blue lace (embroidered with flowers), and being two fingers broad, bore the inscription (not in bas-relief, as Abarbanel says) "Holiness to the Lord." (Comp. Rev. xvii, 5; Braunius, *De Vest. Sacerd.* ii, 22; Maimon. *De Apparatu Templi*, ix, 1; Reland, *Antiq.* ii, 10; Carpzov, *Appar. Crit.* p. 85; Josephus, *War*, v, 5, 7; Philo, *De Vit. Mosis*, iii, 519.) Some suppose that Josephus is describing a later crown given by Alexander the Great to Jaddua (Jennings's *Jewish Ant.* p. 158). The use of the crown by priests and in religious services was universal, and perhaps the badge belonged at first "rather to the *pontificalia* than the *regalia*." Thus Q. Fabius Pictor says that the first crown was used by Janus *when sacrificing*. "A striped head-dress and queue," or "a short wig, on which a band was fastened, ornamented with an asp, the symbol of royalty," was used by the kings of Egypt in religious ceremonies (Wilkinson's *Anc. Egypt.* iii, 354, fig. 13). The crown worn by the kings of Assyria was "a high mitre . . . frequently adorned with flowers, etc., and arranged in bands of linen or silk. Originally there was only one band, but afterwards there were two, and the ornaments were richer" (Layard, ii, 320, and the illustrations in Jahn, *Arch.* Germ. ed., pt. i, vol. ii, tab. ix, 4 and 8). See MITRE.



Ancient Assyrian Crowns.
Fig. 1, Early Kings; 2, Later.

The royal crown originated in the diadem, which was a simple *fillet* fastened round the head, and tied behind. This obviously took its rise among a people who wore long hair, and used a band to prevent it from falling over the face. The idea occurred of distinguishing kings by a fillet of different color from that usually worn; and being thus established as a regal distinction, it continued to be used as such even among nations who did not wear the hair long, or was employed to confine the head-dress. We sometimes see this diadem as a simple fillet, about two inches broad, fastened round the otherwise bare head; we then find it as a band of gold (first cut, above, figs. 2, 5). In this shape it sometimes forms the basis of raised ornamental work (figs. 6, 7, 8, 10), in which case it becomes what we should consider a crown; and, indeed, the original diadem may be traced in most ancient crowns. Fig. 10 is curious, not only from the simplicity of its form, but on account of the metallic loop to be passed under the chin—a mode of securing the crown probably adopted in war or in the chase. Then we find the diadem surrounding the head-dress



Other Ancient Crowns.

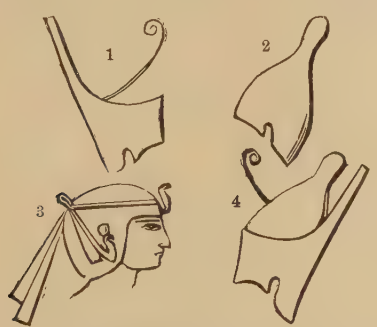
or cap (figs. 3, 9, 13), and when this also is ornamented, the diadem may be considered as having become a crown. See DIADEM.

2. The more general word for a *crown* is עֲטָרָה, *atarah'* (a *circlet*, Gr. *στέφανος*); and it is applied to crowns and head ornaments of different sorts, including those used by the kings. When applied to their crowns, it appears to denote the state crown as distinguished from the diadem. Such was probably the crown, which, with its precious stones, weighed (or rather "was worth") a talent, taken by David from the king of Ammon at Rabbah, and used as the state crown of Judah (2 Sam. xii, 30). Some groundlessly suppose that, being too heavy to wear, it was *suspended* over his head. The royal crown was sometimes buried with the king (Schickard, *Jus Reg.* vi, 19, p. 421). Idolatrous nations also "made crowns for the head of their gods" (Ep. Jer. 9). The Rabbins allege that the Hebrew state-crown was of gold, set with jewels. Of its shape it is impossible to form any notion, unless by reference to the examples of ancient crowns contained in the preceding cut. These figures, however, being taken mostly from coins, are not of that very remote antiquity which we would desire to illustrate matters pertaining to the period of the Hebrew monarchies. In Egypt and Persia there are sculptures of earlier date, representing royal crowns in the shape of a distinguishing tiara, cap, or helmet, of metal, and of cloth, or partly cloth and partly metal.



Ancient Egyptian Crowns.

Fig. 1, Lower Egypt; 2, Upper Egypt; 4, both kingdoms united; 3, Royal Fillet.

The diadem of two or three fillets (figs. 4, 5, first cut, above) may have been similarly significant of dominion over two or three countries. In Rev. xii, 3; xiii, 1; xix, 12, allusion is made to "*many* crowns" (*διαδήματα*) worn in token of extended dominion. Thus the kings of Egypt used to be crowned with the "pshent," or *united* crowns of Upper and Lower Egypt (Wilkinson, *Anc. Egypt.* iii, 351 sq.; comp. Layard, ii, 320); and Ptolemy Philometor wore *two* diadems, one for Europe and one for Asia. This would, in fact, form *three* crowns, as his previous one was doubtless the double crown of Upper and Lower Egypt. Similarly the three crowns of the papal tiara mark various accessions of power: the first corona was added to the mitre by Alexander III in 1159; the second by Boniface VIII in 1303; and the third by Urban V in 1362. These Egyptian tiaras were worn in war and on occasions of state, but on ordinary occasions a fillet or diadem was used. It is important to observe that the *mitre* of the high-priest, which is also called a crown (Exod. xxxix, 30), was of similar construction, if not shape, with the addition of the golden fillet or diadem.

3. Similar also in construction and material, though not in form, was the ancient Persian crown, for which there is a distinct name in the book of Esther (i, 11; ii, 17; vi, 8), viz., כֶּתֶר, *ke'ther* (*chaplet*), which was doubtless the *cidaris* or *citaris* (*κίδαρις* or *κίταρις*), the high cap or tiara so often mentioned by the Greek historians. From the descriptions given of it, this seems to have been a somewhat conical cap, surrounded by a wreath or fold; and this would suggest a resemblance to fig. 12 (of the first cut, above), which is, in fact, copied from a Parthian or later Persian coin. This one is worthy of very particular attention, because it forms a connecting link between the ancient and modern Oriental crowns, the latter consisting either of a cap, with a fold or turban, variously enriched with aigrettes

Modern Oriental Crowns.

as this is; or of a stiff cap of cloth, studded with precious stones. It must often occur to the student of Biblical antiquities that the modern usages of the East have more resemblance to the most ancient than have those which prevailed during that intermediate or classical period in which its peculiar manners and institutions were subject to much extraneous influence from the domination of the Greeks and Romans. So, in the present instance, we are much impressed with the conviction that such head-tires and caps as those represented in the above cut more correctly represent the regal "crowns" of the Old Testament than those figured in the first cut, above (with the exception of fig. 12 and the simple diadems); which, however, may be taken to represent the style of the crowns which prevailed in and before the time of the New Testament. See TURBAN.

4. Other Heb. terms rendered "crown" are זֵר, *zer*, a *wreath* or border of gold around the edge of the ark of the covenant (Exod. xxv, 11, etc.); and קָדְקֹד, *kodkôd'*, the *scalp* or crown of the human head (Gen. xlix, 26, etc.; *κορυφή*, Bel, 36). There are several words in Scripture for a crown (but not so rendered) besides those mentioned, as פְּאֵר, *peër'*, the headdress of bridegrooms (Isa. lxi, 10; Bar. v, 2; Ezek. xxiv, 17), and of women (Isa. iii, 20); צְפִירוֹת, *tsephiroth'*, a head-dress of great splendor (Isa. xxviii, 5); לִוְיָה, *livyah'*, a wreath of flowers (Prov. i, 9; iv, 9); such wreaths were used on festal occasions (Isa. xxviii, 1); צָנִיף, *tsaniph'*, a common tiara or turban (Job xxix, 14; Isa. iii, 23); כַּרְבְּלָא, *karbela'* ("hat," Dan. iii, 21, rather mantle). Στέμμα occurs in the N. T. only once (Acts xiv, 13) for the garlands used with victims. In the Byzantine court this word was

confined to the *imperial* crown (Du Fresne, *Gloss. Græc.* p. 1442). See GARLAND.

The Jews boast that three crowns were given to them: כֶּתֶר תּוֹרָה, the crown of the law; כֶּתֶר כְּהֻנָּה, the crown of priesthood; and מַלְכוּת, the royal crown; better than all which is כֶּתֶר שֵׁם טוֹב, the crown of a good name (Carpzov, *Apparat. Critic.* p. 60; Othonis *Lex. Rabb.* s. v. Corona). Crowns were so often used symbolically to express honor and power that it is not always safe to infer national usages from the passages in which they occur. Hence we would scarcely conclude from Ezek. xxiii, 42 that crowns were worn by Jewish females, although that they wore some ornament which might be so called is probable from other sources. Mr. Lane (*Arabian Nights*, i, 424) mentions that until about two centuries ago a kind of crown was worn by Arabian females of wealth and distinction. It was generally a circle of jewelled gold (the lower edge of which was straight, and the upper fancifully heightened to a mere point), surmounting the lower part of a dome-shaped cap, with a jewel or some other ornament at the summit. It is certain that "crowns" of this or some similar kind were worn at marriages (Cant. iii, 11; Isa. lxi, 10); and it would appear that at feasts and public festivals "crowns of rejoicing" were customary. These were probably garlands (Wisd. ii, 8; iv, 2; Ecclus. i, 11).

With the ancients generally the crown was the symbol of victory and reward, it being customary for conquerors to be crowned, as were also victors in the Grecian games. From ancient coins and medals we may observe that these crowns or wreaths usually consisted of leaves of trees, to which were added flowers. The crown worn by the victor in the Olympian games was made of the wild olive; in the Pythian games, of laurel; in the Nemean games, of parsley; and in the Isthmian games [see CORINTH], of the pine. Indeed, Claudius Saturninus says there was hardly any plant of which crowns had not been made. The Romans had several kinds of crowns or wreaths which were bestowed for various services; but the noblest was the civic crown, given to him who had saved the life of a citizen; it was made of oak leaves, and was presented by the person who had been saved to his preserver. These were all corruptible, for they began to wither as soon as they were separated from the trees or plucked out of the earth. In opposition to these, there is an incorruptible crown, a crown of life, laid up for those who are faithful unto death (Jas. i, 12; 1 Pet. v, 4; Rev. ii, 10; see *Am. Presb. Rev.* July, 1863). Pilate's guard platted a crown of thorns, and placed it on the head of Jesus Christ (Matt. xxvii, 29) with an intention to insult him, under the character

Isthmian Crowns.

of the king of the Jews (see below). The laurel, pine, or parsley garlands given to victors in the great games of Greece are finely alluded to by Paul (1 Cor. ix, 25; 2 Tim. ii, 5, etc.). See GAMES. They are said to have originated in the laurel-wreath assumed by Apollo on conquering the Python (Tertull. *de Cor. Mil.* 7, 15). (On the Greek and Roman honorary crowns, see Smith, *Dict. of Class. Antiq.*, s. v. Corona.) See AMARANTHINE. "Crown" is often used figuratively in the Bible as a general emblem of an exalted state (Prov. xii, 4; xvii, 6; Isa. xxviii, 5; Phil. iv, 1, etc.). The term is also applied to the rims of altars, tables, etc. (Exod. xxv, 25, etc.; Deut. xxii, 8; comp. Vitr. ii, 8; Q. Curt. ix, 4, 30). The ancients as well as the moderns had a *coin* called "a crown" (*τὸν στέφανον ὃν ὀφείλετε*, 1 Macc. xiii, 39; x, 29; A. V. "Crown-tax," v. Suid., s. v. *στεφανικὸν τέλεσμα*); so called, doubtless, because coins usually bore the head of the sovereign encircled with a wreath. See COIN.

The chief writers on crowns are Gaschalius (*De Coronis*, lib. x) and Meursius (*De Coronâ*, Hafniæ, 1671). For others, see Fabricius, *Bibl. Ant.* xiv, 13. See HEAD-DRESS.

CROWN OF THORNS (*στέφανος ἐξ ἀκανθῶν*, Matt. xxvii, 29). Our Lord was crowned with thorns in mockery by the Roman soldiers. The object seems to have been insult, and not the infliction of pain, as has generally been supposed. The Rhamnus, or Spina Christi, although abundant in the neighborhood of Jerusalem, cannot be the plant intended, because its thorns are so strong and large that it could not have been woven (*πλέξαντες*) into a wreath. The large-leaved acanthus (bear's-foot) is totally unsuited for the purpose. Had the acacia been intended, as some suppose, the phrase would have been *ἐξ ἀκάνθης*. Obviously some small, flexile thorny shrub is meant; perhaps *cappares spinosæ* (Reland's *Palæst.* ii, 523). Hasselquist (*Travels*, p. 260) says that the thorn used was the Arabian *nubk*. "It was very suitable for their purpose, as it has many sharp thorns which inflict painful wounds; and its flexible, pliant, and round branches might easily be plaited in the form of a crown." It also resembles the rich dark green of the triumphal ivy-wreath, which would give additional pungency to its ironical purpose (Rosenmüller, *Botany of Script.* p. 202, Eng. ed.). Another plant commonly fixed upon is the "southern buckthorn," which was very suitable to the purpose. See BRAMBLE. On the empress Helena's supposed discovery of the crown of thorns, and its subsequent fate, see Gibbon, ii, 306; vi, 66, ed. Milman.—Smith, s. v. Treatises on the crown in question have been written in Latin by Bartholin (Hafn. 1651), Bottier (in the *Bibl. Brem.* viii, 942), Frenzel (Viteb. 1667, 1679), Götsch (Altdorf, 1694), Gonsager (Hafn. 1713), Lüdemann (Viteb. 1679), Sagittarius (Jena, 1672), Wedel (Jena, 1696), Glauch (Lips. 1661), Hallmann (Rost. 1757), Müller (in Menthenii *Thes.* ii, 230–233). See THORN.

Crucifix (Low Latin *crucifixum;* from *cruci*, to a cross, and *fixum*, fastened), a representation of Christ on the cross, executed in wood, ivory, metal, or other hard material.

I. *History of Crucifixes.*—Among the many symbols which the early Christians used to represent Christ as the central object of their faith, the *lamb* was among the most predominant. In the beginning of the 6th century the lamb bears a triumphal cross; then it is lying on an altar at the foot of a cross; then it appears with blood flowing from a wound in its side, as well as from its feet; and finally, by the end of this century, a lamb is painted in the centre of the cross, where the body of Christ was later placed. On the celebrated "cross of the Vatican," on which this lamb thus appears, are two busts of the Saviour: one above, holding a book in his left hand, and giving a benediction (q. v.) in the Latin manner with the right, while the one below holds a scroll in the right hand, and a little cross in the left. The sixth Œcumenical Council (A.D. 680) ordered that Christ should be represented with his proper human body rather than under the symbol of the paschal lamb, and in the following century crucifixes multiplied greatly throughout all Christendom. The way to this decision had evidently been prepared by several intermediate steps, by which the aversion and horror of the death by the cross, though abolished as a mode of execution by Constantine, were

gradually overcome in the minds of the Christian world. Thus, on the vials of Monza, which Gregory the Great gave to queen Theodelinda, there is a head of Christ in a nimbus containing a cross. A mosaic of St. Étienne, of about the same period, contains in addition one of the thieves on each side of the head of Christ, with a highly ornamented cross below and in the centre of the vial, with an ornamented ediculum below, crowned by a cross, with an angel on one side, and the two women bringing spices to the tomb of Christ on the other side, indicating the resurrection of Christ. On another, Christ is represented with his arms extended—like the praying persons of the Catacombs—with the two thieves on crosses at his side, and the sun and moon, or other emblems, added to the representation. In the pictorial cross of Monza, said to be a present from Gregory the Great to the empress Theodelinda, and in others of the most ancient crucifixes, the figure of Christ was scratched in on the metal with some sharp-pointed instrument. Later, it was painted. It is in the 9th century that the figures first appeared in relief. The first crucifix used in a church, of which we have any proof, is spoken of by Gregory of Tours as being in the church of Narbonne (A.D. 593). After the council of 692 the Greek Church used painted crucifixes freely. Pope John VII, a Greek by birth (elected A.D. 705), first used the crucifix in St. Peter's Church, Rome. A single crucifix is found in the Catacombs, and this is considered to date from the 8th century. The crucifix soon assumed the most prominent place in the Romish church edifice, being placed over the centre of the high altar, overtowering the tapers, and being removed only at the elevation of the Host. This altar-crucifix is often made in the most costly and artistic way, being usually of gold or silver, and adorned with pearls or precious stones. Crucifixes are also placed at the doors of churches, in cloisters, in chapels by the roadside, and at every place where crosses (q. v.) are erected. They are constantly used by Roman Catholics, both ecclesiastics and laymen, and especially are kept in the bedchamber. The reason given for this abundant use of the crucifix is "to keep the sufferings and death of Christ, and the fact of atonement, ever before the minds of believers." Among the Protestant churches, the Lutheran has not rejected the use of the altar-crucifixes, though Protestants generally consider the use of crucifixes to lead to a worship of the material of which they are made, and to a forgetting of the true spiritual meaning of the Saviour's death; hence they reject them altogether, regarding them as only valuable, whether sculptured or painted, as marking a phase of the development of ritualistic worship, or as works of art.

II. *Details.*—Until the 11th century Christ was represented as living, and usually with his head crowned with a nimbus or other symbol of his triumphal resurrection. His head was erect, his eyes open, indicating his divine nature, which is not subject to death; or, more probably, his triumph over his death. Though Christ was crucified, in accordance with the law, in an entirely naked condition, the earliest crucifixes represent him clothed with a *colobium*, a tunic without arms, and reaching to the feet. At the close of the 8th century, this was modified to a tunic bound around the waist and extending about to the knees; and by the close of the tenth century, the tunic was almost universally contracted to a simple band of cloth around the loins. This has been universally adopted by artists till the present time. The crucifix of the church St. Genès, at Narbonne, is the only example extant of this type being adopted before the 9th century. A manuscript in the Laurentian library at Florence, dating about the year 1060, contains the first example extant of Christ being represented as dead. All the crucifixes from that time represent the head as drooping, and life as just extinct. A stream of blood is sometimes represented flowing from the wounds in the hands and the side, and falling upon the head of some of the characters represented, symbolizing thus the effects of the atonement. Nearly all of the great artists of the Middle Ages have painted the scene of the crucifixion, these being sometimes their master-pieces. Cimabue and Margaritone, in the 13th century, made the first representations extant of a crucifix with but three nails, the feet being crossed, in their paintings of the crucifixion in the church of St. Maria Novella in Florence. The Romish Church now usually prefers this type of the crucifix, though the former method, adopted by this church also till the 13th century, was without doubt the more in accordance with historical accuracy. The *suppedaneum* to support the feet is usually represented, though some later artists have placed a globe in place of this tablet or shelf. The *support for the body* has never been represented in art. The *title of the cross* was placed on a tablet which was attached to the head of the ┬ cross. There are but one or two cases in which artists have given the full inscription in the three languages, and these are modern. Many crucifixes have no titles. In most it is indicated by a few meaningless marks. In the Greek Church the monogram of Christ, or I C . . X C, or A, ω, is generally used.

III. *Accessories.*—These are either such as pertain to the literal circumstances of the crucifixion, or are symbolical figures having reference to the Atonement. The Virgin Mary and St. John are often represented as standing one on each side of the cross, with the head bent forward and resting on the hand—a posture of grief common in all antiquity. The names of the two are usually given either in Latin or Greek. The two soldiers are often given, one holding a lance, and the other the sponge filled with vinegar. The very earliest crucifixes have not these soldiers, but they became common after the 8th century. A single example exists of their drawing lots for the Saviour's garments. The sun and the moon, the former with a face surrounded by a circle, and giving out rays, and the latter in the form of a crescent, are often given, being to the right and left of the head of the Saviour. These are sometimes replaced by two human demi-figures, one with a royal diadem, and the other crowned with a crescent or holding a torch, while both have one hand supporting the head in an attitude of grief. Rays of light often stream, from both the sun and the moon, upon the figure of Christ. These heavenly bodies are considered by many to represent the darkness which suddenly came over nature, concealing the sun and moon. But a better interpretation is that they represent the divine and human nature of Christ, as the same figures do on other monuments. The redemption of man from sin by the death of Christ is symbolized in some crucifixes by a naked man rising up from the ground below the cross, while a hand above him is reached out from a cloud. Another represents a man lying on the ground, while a woman, with one knee on the ground, is taking hold of the hand in the cloud. This is to indicate Adam and Eve. A crucifix in St. John Lateran, in Rome, has a gate (of paradise) on one side, while on the other is a tree (of good and evil), showing that man, lost by partaking of the forbidden fruit, is restored by the cross to the paradise from which he was driven out. The emblems of the four evangelists and angels in adoration are often placed near the upper part of the crucifix. The skull and cross-bones at the foot of the cross is altogether a modern addition. The crucifix of a diptych of Rambona contains a wolf under the cross nourishing Romulus and Remus, supposed to symbolize the subjection of the Roman empire and the world to the cross of Christ, or to the city of Rome as the seat of the Romish Church. Other symbols relating to the truths of Christianity, or to the traditions relating to this central event in the his-

tory of the world, occur in various crucifixes. Many other modifications exist of the presentation of the crucifixion, whether given in full relief, or high or low relief, or whether painted in miniature, in mosaic, on fresco, or on canvas.

Crucifixion (prop. *σταύρωσις*, but in the N. T. the noun does not occur, the act being designated by some form of the verb *σταυρόω*, to *apply the cross*; once *προσπήγνυμι*, to *fasten*, i. e. to the cross, Acts ii, 23; the classical writers use *σταυροῦν*, *ἀνασταυροῦν*, *σκολοπίζειν*, *προσηλοῦν*, and, less properly, *ἀνασκινδυλεύειν*; *cruci* or *patibulo affigere*, *suffigere*, or simply *figere* [Tertull. *de Pat.* iii], *cruciare* [Auson.] *ad palum alligare*, *crucem alicui statuere*, *in crucem agere*, *tollere*, etc.; the sufferer was called *cruciarius*). See PASSION.

I. *History.*—The variety of the phrases shows the extreme commonness of the punishment, the invention of which is traditionally ascribed to Semiramis. It was in use among the Egyptians (as in the case of Inarus, Thuc. i, 30; comp. Gen. xl, 19), the Carthaginians (as in the case of Hanno, etc., Val. Max. ii, 7; Polyb. i, 86; Sil. Ital. ii, 344; Plutarch, *Paral.* 24; Justin, xviii, 7; Hirt. *Bell. Afric.* 66), the Persians (Polycrates, etc.; Herod. iii, 125; iv, 43; vii, 194; Ctesias, *Excerpt.* 5; comp. Esth. vii, 10), the Assyrians (Diod. Sic. ii, 1), Scythians (id. ii, 44), Indians (id. ii, 18), Germans (possibly Tacit. *Germ.* 12), and very frequent from the earliest times (Livy, i, 26) among the Romans. Cicero, however, refers it, not (as Livy) to the early kings, but to Tarquinius Superbus (*pro Rab.* 4); Aurel. Victor calls it *vetus veterrimumque* (? *teterr.*) *patibulorum supplicium*. Both *κρεμᾶν* and *suspendere* (Ovid, *Ibis*, 299) refer to death by *crucifixion*; thus, in speaking of Alexander's crucifixion of 2000 Tyrians, *ἀνεκρέμασεν* in Diod. Sic. answers to the *crucibus affixus* in Q. Curt. iv, 4. The Greeks (Strabo, xiv, 647) and Macedonians (Appian, *Mithr.* 8; Curt. vii, 11, 28; ix, 8, 6) also sometimes resorted to this mode of punishment.

This accursed and awful mode of punishment was happily abolished by Constantine (Sozom. i, 8) probably towards the end of his reign (see Lipsius, *De Cruce*, iii, 15), although it is curious that we have no more *definite* account of the matter. Examples of it are found in the early part of that emperor's reign, but the reverence which, at a later period, he was led to feel for the cross, doubtless induced him to put an end to the inhuman practice (Aurel. Vict. *Cæs.* 41; Niceph. vii, 46; Firmic. viii, 20). "An edict so honorable to Christianity," says Gibbon, "deserved a place in the Theodosian Code, instead of the indirect mention of it which seems to result from the comparison of the 5th and 18th titles of the 9th book" (ii, 154, note). See PUNISHMENT.

II. *As a Jewish Custom.*—Whether this mode of execution was known to the ancient Jews is a matter of dispute (see Bormitius, *De Cruce num Ebræor. supplic. fuerit*, Viteb. 1644; Chaufepié, in the *Miscell. Duisb.* ii, 401 sq.). It is asserted to have been so by Baronius (*Annal.* i, xxxiv), Sigonius (*De Rep. Hebr.* vi, 8), etc., who are refuted by Casaubon (*c. Baron. Exerc.* xvi), Carpzov (*Apparat. Crit.* p. 591). The Hebrew words said to allude to it are תָּלָה, *talah'* (sometimes with the addition of עַל עֵץ, "upon the tree;" hence the Jews in polemics call our Lord תלוי, and Christians עובדי תלוי, "worshippers of the crucified"), and יָקַע, *yaka'*, both of which in the A. Vers. are generally rendered "to hang" (2 Sam. xviii, 10; Deut. xxi, 22; Num. xxv, 4; Job xxvi, 7); for which *σταυρόω* occurs in the Sept. (Esth. vii, 10), and *crucifixerunt* in the Vulg. (2 Sam. xxi, 6, 9). The Jewish account of the matter (in Maimonides and the Rabbis) is, that the exposure of the body tied to a stake by its hands (which might loosely be called crucifixion) took place *after* death (Lightfoot, *Hor. Hebr. in Matt.* xxvii, 31; Othonis *Lex. Rabb.*, s. v. Supplicia; Reland, *Ant.* ii, 6; Sir T. Browne, *Vulg. Errors*, v, 21). Even the placing of a head on a single upright pole has been called crucifixion. This custom of crucifixion *after death* (which seems to be implied in Deut. xxi, 22, 23) was by no means rare; men were *first* killed in mercy (Sueton. *Cæs.*; Herod. iii, 125; Plutarch, *Cleom.* 38). According to a strange story in Pliny (xxxvi, 15, § 24), it was adopted by Tarquin as a post-mortem disgrace, to prevent the prevalence of suicide. It seems, on the whole, that the Rabbis are correct in asserting that *this* exposure is intended in Scripture, since the Mosaic capital punishments were four (viz., the sword, Exod. xxi; strangling, fire, Lev. xx; and stoning, Deut. xxi). Philo, indeed, says (*De leg. spec.*) that Moses adopted crucifixion as a murderer's punishment because it was the *worst* he could discover; but the passage in Deut. (xxi, 23) does not prove his assertion. Probably, therefore, the Jews borrowed it from the Romans (Josephus, *Ant.* xx, 6, 2; *War*, ii, 12, 6; *Life*, 75, etc.), although there may have been a few isolated instances of it before (Josephus, *Ant.* xiii, 14, 2). See HANGING.

It was unanimously considered the most horrible form of death, worse even than burning, since the "cross" precedes "burning" in the law-books (Lipsius, *De Cruc.* ii, 1). Hence it is called *crudelissimum teterrimumque supplicium* (Cicero, *Verr.* v, 66), *extrema pœna* (Apul. *de Aur. Asin.* x), *summum supplicium* (Paul. *Sent.* v, tit. xxi, etc.); and to a Jew it would acquire factitious horror from the curse in Deut. xxi, 23. Among the Romans also the degradation was a part of the infliction, since it was especially a *servile supplicium* (Tacitus, *Hist.* iv, 11; Juvenal, vi, 218; Horace, *Sat.* i, 3, 8, etc.; Plautus, *passim*), or "a slave's punishment" (*De Infami quo Chr. adfectus est cru. supp.*, in Lange's *Observatt. Sacr.* [Lubec, 1731], p. 151 sq.; also Hencke, *Opusc.* p. 137 sq.), so that even a freedman ceased to dread it (Cicero, *pro Rab.* 5); or if applied to freemen, only in the case of the vilest criminals (Joseph. *Ant.* xvii, 10, 10; *War*, v, 11, 1; Paul. *Sent.* v, tit. xxiii; Lamprid. *Alex. Sev.* 23), such as persons guilty of robbery, piracy (Seneca, *Ep.* vii; Cicero, *Petron.* 71), assassination, perjury (Firmic. vi, 26), sedition, treason, and (in the case of soldiers) desertion (Dion, v, 52; Joseph. *Ant.* xiii, 22; Apuleius, *Asin.* 3). Indeed, exemption from it was the privilege of every Roman citizen by the *jus civitatis* (Cicero, *Verr.* ii, 1, 3). Our Lord was condemned to it by the popular cry of the Jews (Matt. xxvii, 23, as often happened to the early Christians) on the charge of sedition against Cæsar (Luke xxiii, 2), although the Sanhedrim had previously condemned him on the totally distinct charge of blasphemy. Hundreds of Jews were crucified on the former charge, as by Florus (Joseph. *War*, ii, 14, 9) and Varus, who crucified 2000 at once (*Ant.* xvii, 10, 10). See EXECUTION.

III. *Process.*—The scarlet robe, crown of thorns, and other insults to which our Lord was subjected, were illegal, and arose from the spontaneous petulance of the brutal soldiery. But the punishment properly commenced with scourging, after the criminal had been stripped; hence, in the common form of sentence, we find "summove, lictor, *despolia*, verbera," etc. (Livy, i, 26). For this there is a host of authorities —Livy, xxvi, 13; Q. Curt, vii, 11; Lucan, *de Piscat.* 2; Jerome, *Comment. ad Matt.* xxvii, 26, etc. It was inflicted, not with the comparatively mild *virgæ*, but the more terrible *flagellum* (Horace, *Sat.* i, 3; comp. 2 Cor. xi, 24, 25), which was not used by the Jews (Deut. xxv, 3). Into these scourges the soldiers often stuck nails, pieces of bone, etc., to heighten the pain (the *μάστιξ ἀστραγαλωτή* mentioned by Athenæus, etc.; *flagrum pecuinis ossibus catenatum*, Apul.), which was often so intense that the sufferer died under it (Ulp. *de Pœnis*, l. viii). The scourging generally took

place at a column, and the one to which our Lord was bound is said to have been seen by Jerome, Prudentius, Gregory of Tours, etc., and is shown at several churches among the relics. In our Lord's case, however, this infliction seems neither to have been the legal scourging after the sentence (Val. Max. i, 7; Josephus, *War*, v, 28; ii, 14, 9), nor yet the examination by torture (Acts xxii, 24), but rather a scourging *before* the sentence, to excite pity and procure immunity from further punishment (Luke xxiii, 22; John xix, 1); and if this view be correct, the reference to it (φραγέλλωσας) in Matt. xxvii, 26, is retrospective, as so great an anguish could hardly have been endured *twice* (see Poli *Synopsis*, ad loc.). How severe it was is indicated in prophecy (Psa. xxxv, 15; Isa. l, 6). Vossius considers that it was partly legal, partly tentative (*Harm. Pass.* v, 13). See SCOURGE.

The criminal carried his own cross, or, at any rate, a part of it (Plutarch, *De iis qui sero*, etc., 9; Artemid. *Oneirocr.* ii, 61; see John xix, 17; comp. "patibulum ferat per urbem, deinde affigatur cruci," Plaut. *Carbonar.*). Hence the term *furcifer*, cross-bearer (q. v.). This was prefigured by Isaac carrying the *wood* in Gen. xxii, 6, where even the Jews notice the parallel; and to this the fathers fantastically applied the expression in Isa. ix, 6, "the government shall be upon his shoulder." They were sometimes scourged and goaded on the way (Plaut. *Mostel.* i, 1, 52). "In some old figures we see our Lord described with a table appendent to the fringe of his garment, set full of nails and pointed iron" (Jer. Taylor, *Life of Christ*, iii, xv, 2; *Hœrebas ligno quod tuteras*, Cypr. *de Pas.* p. 50). See SIMON (OF CYRENE).

The place of execution was outside the city ("post urbem," Cicero, *Verr.* v, 66; "extra portam," Plaut. *Mil. Gl.* ii, 4, 6; comp. 1 Kings xxi, 13; Acts vii, 58; Heb. xiii, 12; and in camps "extra vallum"), often in some public road (Quinct. *Decl.* 275) or other conspicuous place like the Campus Martius (Cicero, *pro Rabirio*), or some spot set apart for the purpose (Tacitus, *Ann.* xv). This might sometimes be a hill (Val. Max. vi); it is, however, rather an inference to call Golgotha a *hill;* in the Evangelists it is called "a *place*" (τόπος). See CALVARY. Arrived at the place of execution, the sufferer was stripped naked (Artemidorus, *Oneirocr.* ii, 58), the dress being the perquisite of the soldiers (Matt. xxvii, 35; *Dig.* xlviii, 20, 6); possibly not even a cloth round the loins was allowed him; at least among the Jews the rule was "that a man should be stoned naked" (*Sanhedr.* vi, 3), where the context shows that "naked" must *not* be taken in its restricted sense. The cross was then driven into the ground, so that the feet of the condemned were a foot or two above the earth (in pictures of the crucifixion the cross is generally much too large and high), and he was lifted upon it (*agere, excurrere, tollere, ascendere in crucem;* Prudent. περὶ στεφ.; Plautus, *Mostel.* "*Crucisalus;*" id. *Bacch.* 2, 3, 128; ἀνῆγον, ἦγον, ἦγον εἰς ἄκρον τέλος, Greg. Naz.), or else stretched upon it on the ground, and then lifted with it, to which there seems to be an allusion in a lost prophecy quoted by Barnabas (*Ep.* 12), ὅταν ξύλον κλιθῇ καὶ ἀναστῇ (Pearson, *On the Creed*, Acts iv). The former method was the commoner, for we often read (as in Esth. vii, 10, etc.) of the cross being erected beforehand in terrorem. Before the nailing or binding took place, a medicated cup was given out of kindness to confuse the senses and deaden the pangs of the sufferer (Prov. xxxi, 6), usually of bitter wine (οἶνος ἐσμυρμισμένος or λελιβανωμένος), as among the Jews (Lightfoot, *Hor. Hebr. ad Matt.* xxvii), because myrrh was soporific. Other bitter herbs were also employed (Pipping, *Exercit. Acad.* p. 55). Our Lord refused it that his senses might be clear (Matt. xxvii, 34; Mark xv, 23; Maimonides, *Sanhed.* xiii). Matthew calls it "vinegar mingled with gall" (ὄξος μέτα χολῆς, חֹמֶץ), an expression used in reference to Psa. lxix, 21, but not strictly accurate. This mercifully intended draught must not be confounded with the spongeful of vinegar (or *posca*, the common drink of Roman soldiers, Spart. *Hadr.;* Plaut. *Mil. Gl.* iii, 2, 23), which was put on a hyssop-stalk and offered to our Lord in mocking and contemptuous pity (Matt. xxvii, 48; Luke xxiii, 36); this he tasted to allay the agonies of thirst (John xix, 29).

The body was affixed to the cross by nails (see Corn. Curtius, *De clavis Domini*, Antw. 1760) driven into the hands, and more rarely into the feet; sometimes the feet were fastened by one nail driven through both (Tertull. *adv. Jud.* x; Senec. *De Vita Beat.* 19; Lactant. iv, 13). The feet were occasionally bound to the cross by cords; and Xenophon asserts that it was usual among the Egyptians to bind in this manner not only the feet, but the hands. An inscription (*titulus*) was written upon a small tablet (σανίς, Socrat. *Hist. Eccl.* i, 17) declaring the crime (see Alberti, *De Inscript. crucis Chr.* Lips. 1725), and placed on the top of the cross (Sueton. *Cal.* 38; *Dom.* 10; Euseb. *Hist. Eccles.* v, 1). The body of the crucified person rested on a sort of seat (πῆγμα) (Iren. *adv. Hær.* ii, 42). The criminal died under the most frightful sufferings—so great that even amid the raging passions of war pity was sometimes excited. Josephus (*War*, v, 11, 1) narrates of captives taken at the siege of Jerusalem that "they were first whipped, and tormented with all sorts of tortures, and then crucified before the walls of the city. The soldiers, out of the wrath and the hatred they bore the Jews, nailed those they caught one after one way and another after another to crosses, by way of jest, when their multitude was so great that room was wanting for the crosses and crosses wanting for the bodies. This miserable procedure made Titus greatly pity them." Sometimes the suffering was shortened and abated by breaking the legs of the criminal—*crura fracta* (Cicero, *Phil.* xiii, 12). The execution took place at the hands of the *carnifex*, or hangman, attended by a band of soldiers, and in Rome under the supervision of the Triumviri Capitales (Tacit. *Ann.* xv, 60; Lactant. iv, 26). The accounts given in the Gospels of the execution of Jesus Christ are in entire agreement with the customs and practices of the Romans in this particular (Tholuck, *Glaubwürdigkeit der evangel. Gesch.* p. 361).

Our Lord was crucified between two "thieves" (λῃσταί, *robbers*) or "malefactors" (then so common in Palestine, Josephus, *War*, ii, 6, etc.), according to prophecy (Isa. liii, 12); and was watched according to custom by a party of four soldiers (John xix, 23), with their centurion (κουστωδία. Matt. xxvii, 66; *miles qui cruces assurabat*, Petr. *Sat.* iii, 6; Plutarch, *Vit. Cleom.* 38), whose express office was to prevent the surreption of the body (Seneca, *Ep.* 101). This was necessary from the lingering character of the death, which sometimes did not supervene even for three days, and was at last the result of gradual benumbing and starvation (Euseb. viii, 8; Seneca, *Prov.* 3). But for this guard, the persons might have been taken down and recovered, as was actually done in the case of a friend of Josephus, though only one survived out of *three* to whom the same careful nursing (θεραπεία ἐπιμελεστάτη) was applied (*Life*, 75). Among the Convulsionnaires in the reign of Louis XV, women would be repeatedly crucified, and even remain on the cross three hours; we are told of one who underwent it twenty-three times (*Encycl. Metr.*, s. v. Cross); the pain consisted almost entirely in the *nailing*, and not more than a basinful of blood was lost. Still we cannot believe from the Martyrologies that Victorinus (crucified head downward) lived three days, or Timotheus and Maura nine days (compare Bretschneider, in the *Studien u. Krit.*, 1832, ii, 625; Paulus, in the *Darmst. Kirchenzeit.* 1833, No. 8, 9). Fracture of the legs (Plaut. *Pœn.* iv, 2, 64) was especially adopted by the Jews (Deut. xxi, 22) to hasten death (John xix, 31), and it

was a mitigation of the punishment (Casaub. *Exerc. Antib.* p. 537), as observed by Origen. But the unusual rapidity of our Lord's death was due to the depth of his previous agonies (which appears from his inability to bear his own cross far), and to his mental anguish (Schöttgen, *Hor. Heb.* vi, 3; *De pass. Messiæ*), or it may be sufficiently accounted for simply from peculiarities of constitution. There is no need to explain the "giving up of the ghost" as a miracle (Heb. v, 7?), or say with Cyprian, *Prevento carnificis officio, spiritum sponte dimisit* (*Adv. Demetr*). Still less can the common cavil of infidelity be thought noteworthy, since, had our Lord been in a swoon, the piercing of his pericardium (proved by the appearance of lymph and blood) would have ensured death. (See Eschenbach, *Opusc. Med. de Servatore non apparenter sed vere mortuo*, and Gruner, *De morte Christi non synopticâ*, quoted by Jahn in his *Bibl. Arch.*) (See below.) Pilate *expressly satisfied* himself of the actual *death* by questioning the centurion (Mark xv, 44); and the omission of the breaking of the legs in this case was the fulfilment of a type (Exod. xii, 46). Other modes of hastening death were by lighting fires under the cross (hence the nicknames *Sarmentitii* and *Semaxii*, Tert. *Apolog.* 50), or letting loose wild beasts on the crucified (Suet. *Ner.* 49).

Generally the body was suffered to rot on the cross (Cicero, *Tusc. Q.* i, 43; Sil. Ital. viii, 486) by the action of sun and rain (Herod. iii, 12), or to be devoured by birds and beasts (Apul. *de Aur. Asin.* 6; Horace, *Ep.* i, 16, 48; Juvenal, xiv, 77). Sepulture was generally therefore forbidden (Pliny, *Hist. Nat.* xxxvi, 24), though it might be granted as a special favor or on grand occasions (Ulp. l. ix, *De off. Pascons.*). But, in consequence of Deut. xxi, 22, 23, an express national exception was made in favor of the Jews (Matt. xxvii, 58; comp. Joseph. *War*, iv, 5, 2).

IV. *Pathology.*—It only remains to speak of the manner of death, and the kind of physical suffering endured, which we shall very briefly abridge from the treatise of the physician Richter (in Jahn's *Bibl. Arch.*). These are, 1. The unnatural position and violent tension of the body, which cause a painful sensation from the least motion. 2. The nails, being driven through parts of the hands and feet which are full of *nerves* and *tendons* (and yet at a distance from the heart), create the most exquisite anguish. 3. The exposure of so many wounds and lacerations brings on inflammation, which tends to become gangrene, and every moment increases the poignancy of suffering. 4. In the distended parts of the body more blood flows through the arteries than can be carried back into the veins: hence too much blood finds its way from the aorta into the head and stomach, and the blood-vessels of the head become pressed and swollen. The general obstruction of circulation which ensues causes an internal excitement, exertion, and anxiety more intolerable than death itself. 5. The inexpressible misery of *gradually increasing* and lingering anguish. To all this we may add, 6. Burning and raging thirst.

Death by crucifixion (physically considered) is therefore to be attributed to the sympathetic fever which is excited by the wounds, and aggravated by exposure to the weather, privation of water, and the painfully constrained position of the body. Traumatic fever corresponds, in intensity and in character, to the local inflammation of the wound. In the first stage, while the inflammation of the wound is characterized by heat, swelling, and great pain, the fever is highly inflammatory, and the sufferer complains of heat, throbbing headache, intense thirst, restlessness, and anxiety. As soon as suppuration sets in, the fever somewhat abates, and gradually ceases as suppuration diminishes and the stage of cicatrization approaches. But if the wound be prevented from healing, and suppuration continue, the fever assumes a hectic character, and will sooner or later exhaust the powers of life. When, however, the inflammation of the wound is so intense as to produce mortification, nervous depression is the immediate consequence; and if the cause of this excessive inflammation of the wound still continues, as is the case in crucifixion, the sufferer rapidly sinks. He is no longer sensible of pain, but his anxiety and sense of prostration are excessive; hiccough supervenes, his skin is moistened with a cold clammy sweat, and death ensues. It is in this manner that death on the cross must have taken place in an ordinarily healthy constitution. The wounds in themselves were not fatal; but, as long as the nails remained in them, the inflammation must have increased in intensity until it produced gangrene. The period at which death occurred was very variable, as it depended on the constitution of the sufferer, as well as on the degree of exposure and the state of the weather. It may, however, be asserted that death would not take place until the local inflammation had run its course; and though this process may be much hastened by fatigue and the alternate exposure to the rays of the sun and the cold night air, it is not completed before forty-eight hours, under ordinary circumstances, and in healthy constitutions; so that we may consider thirty-six hours to be the earliest period at which crucifixion would occasion death in a healthy adult. It can not be objected that the heat of an Eastern climate may not have been duly considered in the above estimate, for many cases are recorded of persons having survived a much longer time than is here mentioned, even as long as eight or nine days. Eusebius (*Hist. Eccles.* iii, 8) says that many of the martyrs in Egypt, who were crucified with their heads downward, perished by hunger. The want of water was a much more important privation. It must have caused the sufferer inexpressible anguish, and have contributed in no slight degree to hasten death.

Several eminent writers had occupied themselves with the physiology of our Saviour's passion, if we may so express ourselves, before the "scientific" method of treating it was resorted to; such were Scheuchzer, Mead, Bartholinus, Vogler, Triller, Richter, and Eschenbach. But a much fuller and more exact investigation has since been made by the two Gruners, father and son, the latter of whom first wrote under the direction, and by the advice of the former. These earlier authors have collected all that medical analogies could furnish towards establishing the character of our Saviour's sufferings and the reality of his death. "The pulmonary, and other veins and arteries about the heart and chest, by the abundance of blood flowing thither, and there accumulating, must have added frightful bodily suffering to the anguish of mind produced by the overpowering burden of our sins" (G. G. Richteri *Dissertationes Quatuor Medicæ*, Gotting. 1775, p. 57). But this general suffering must have made a relative impression upon different individuals; and, as Charles Gruner well observes, the effect it produced upon two hardy and hardened thieves, brought out fresh from prison, must naturally have been very different from that on our Saviour, whose frame and temperament were of a very opposite character; who had been previously suffering a night of tortures and restless fatigue; who had been wrestling with mental agony till one of the rarest phenomena had been caused—a bloody sweat; who must have felt to the most acute degree of intensity all the mental aggravation of his punishment—its shame and ignominy, and the distress of his pious mother, and few faithful friends (C. F. Gruneri *Commentatio Antiquaria Medica de Jesu Cristi morte vera non simulata*, Halæ, 1805, p. 30–45). To these he might have added other reflections, as that our Saviour was evidently weakened beyond other persons in similar circumstances, seeing he was not strong enough to carry his cross, as criminals led to execution were always able to do; and if the men whom we are answering suppose our Lord to have

only fallen into a trance from exhaustion, they have manifestly no right to judge from other cases, for in them even this did not occur. The younger Gruner goes minutely into all the smallest circumstances of the passion, examining them as objects of medical jurisprudence, and particularly takes cognizance of the stroke inflicted by the soldier's lance. He shows the great probability of the wound having been in the left side, and from below transversely upward; he demonstrates that such a stroke, inflicted by the robust arm of a Roman soldier, with a short lance, for the cross was not raised much from the ground, must, in any hypothesis, have occasioned a deadly wound. Up to this moment he supposes our Saviour may have been still faintly alive, because otherwise the blood would not have flowed, and because the loud cry which he uttered is a symptom of a syncope from too great a congestion of blood about the heart. But this wound, which, from the flowing of blood and water, he supposes to have been in the cavity of the chest, must, according to him, have been necessarily fatal. Tirinus and other commentators, as well as many physicians, Gruner, Bartholinus, Triller, and Eschenbach, suppose this water to have been lymph from the pericardium. Vogler (*Physiologia Historiæ Passionis*, Helmst. 1693, p. 44) supposes it to have been serum separated from the blood. But from the manner in which the apostle John mentions this mystical flow, and from the concurrent sentiment of all antiquity, we must admit something more than a mere physical event. Richter observes that the abundant gush of the blood and water, "non ut in mortuis fieri solet, lentum et grumosum, sed calentem adhuc et flexilem, tamquam ex calentissimo misericordiæ fonte," must be considered preternatural, and deeply symbolical. Christian Gruner goes over the same ground, and answers, step by step, the additional objections of an anonymous impugner. He shows that the words used by John to express the wound inflicted by the lance are often used to denote a mortal one; he proves that, even supposing the death of Christ to have been in the first instance apparent, the infliction of merely a slight wound would have been fatal, because, in syncope or trance arising from loss of blood, any venesection would be considered such (*Vindiciæ Mortis Jesu Christi veræ*, p. 67, 77, sq.); and that, in fine, so far from the spices or unguents used in embalming, or the close chamber of the tomb, being fitting restoratives to a person in a trance, they would be the most secure instruments for converting apparent into real death, by suffocation. To this we may add Eschenbach's observation (*Scripta Medi.-biblica*, Rostock, 1779, p. 128) that there is no well-recorded instance of syncope lasting more than one day, whereas here it must have lasted three; and also that even this period would not have been sufficient to restore to strength and health a frame which had undergone the shattering tortures of crucifixion and the enfeebling influence of syncope from loss of blood. A consideration not noticed by any of these authors seems to decide the point of the depth of the wound, and place beyond doubt that it could not be superficial, but must have entered the cavity. Our Saviour distinguishes the wounds in his hands from that of his side by desiring Thomas to measure the former by his finger, and the latter by the insertion of his hand (John xx, 27). This, therefore, must have been of the breadth of two or three fingers on the outside. But for a lance, which tapered very gently from the point, to leave a scar or incision on the flesh of such a breadth, at least four or five inches must have penetrated into the body, a supposition quite incompatible with a superficial or flesh wound. Of course, this reasoning is with those who admit the entire history of the passion and subsequent appearance of our Saviour, but deny his real death; and such are the adversaries of the Gruners.

It is not inappropriate here to introduce a case which may confirm some of the foregoing observations. It is an account of a crucified Mameluke, or Turkish servant, published by Kosegarten (*Chrest. Arab.* Lips. 1828, p. 63-65), from an Arabic manuscript entitled "*The Meadow of Flowers and the fragrant Odour.*" The narrative, after quoting the authorities, as is usual in Arabic histories, proceeds as follows: "It is said that he had killed his master for some cause or other, and he was crucified on the banks of the river Barada [Burada], under the castle of Damascus, with his face turned towards the east. His hands, arms, and feet were nailed, and he remained so from midday on Friday to the same hour on Sunday, when he died. He was remarkable for his strength and prowess; he had been engaged with his master in sacred war at Askelon, where he slew great numbers of the Franks; and when very young he had killed a lion. Several extraordinary things occurred at his being nailed, as that he gave himself up without resistance to the cross, and without complaint stretched out his hands, which were nailed, and after them his feet: he in the mean time looked on, and did not utter a groan, or change his countenance, or move his limbs." Thus we see a person, in the flower of his age, remarkable for his hardihood and strength, inured to military fatigue, nay, so strong that we are told, in another part of the narrative, that "he moved his feet about, though nailed, till he loosened the fastenings of the nails, so that, if they had not been well secured in the wood, he would have drawn them out;" and yet he could not endure the suffering more than eight-and-forty hours. But the most interesting circumstance in this narration, and the illustration of the scriptural narrative principally in view, is the fact, not mentioned by any ancient describer of this punishment, that the principal torture endured by this servant was that of thirst, precisely as is intimated in the Gospel history (John xix, 28). For the Arabic narrator thus proceeds: "I have heard this from one who witnessed it—and he thus remained till he died, patient and silent, without wailing, but looking around him to the right and to the left, upon the people. But he begged for water, and none was given him; and the hearts of the people were melted with compassion for him, and with pity on one of God's creatures, who, yet a boy, was suffering under so grievous a trial. In the mean time, the water was flowing around him, and he gazed upon it, and longed for one drop of it . . . and he complained of thirst all the first day, after which he was silent, for God gave him strength."

Various theories have therefore been proposed to account for the speedy death of Christ upon the cross. That it did not occur simply and directly from the crucifixion is evident from the above statements, and from the surprise of Pilate that it had taken place so soon, when the thieves crucified at the same time had not expired. The usual theory attributes his sudden death to a voluntary surrender of his own life, which is supposed to be favored by the expression "yielded or 'gave' up the ghost," ἀφῆκε [παρέδωκε] τὸ πνεῦμα, Matt. xxvii, 50; John xix, 30), and also by his declarations concerning his "laying down his life" (τίθημι τὴν ψυχήν, John x, 11, 15, 17). But, aside from the inappositeness of these passages (the same terms being often used of ordinary decease and of voluntary submission to a violent death), this view is derogatory to the character of Christ (who is thus, in effect, made a suicide), and inconsistent with the expressions concerning the guilt of his murderers (who are thus made only accessories or assistants). The most probable explanation of the sudden death of Christ is that proposed and extensively argued by Dr. Stroud (*Treatise on the Physical Cause of the Death of Christ*, Lond. 1847), who attributes it to a proper *rupture of the heart*, a pathological accident, which he thus describes (p. 88): "The immediate cause is a sudden and violent contraction of one of the ventricles, usually the left, on the column of blood thrown into it by a similar contraction of the corresponding auricle. Prevented from returning

backward by the intervening valve, and not finding a sufficient outlet forward in the connected artery, the blood reacts against the ventricle itself, which is consequently torn open at the point of greatest distention, or least resistance, by the influence of its own reflected force. A quantity of blood is hereby discharged into the pericardium, and, having no means to escape from that capsule, stops the circulation by compressing the heart from without, and induces almost instantaneous death. In young and vigorous subjects, the blood thus collected in the pericardium soon divides into its constituent parts, namely, a pale, watery liquid called serum, and a soft clotted substance of a deep red color, called crassamentum; but, except under similar circumstances of extravasation, this distinct separation of the blood is seldom witnessed in the dead body." This explanation meets all the circumstances of Christ's passion. The violence of his emotions was sufficient to burst open the heart, as Dr. Stroud shows by a multitude of examples of immediate death from sudden mental affections; and this, as a secondary cause, is confirmed by the occurrence of the sanguineous perspiration in the garden from similar emotions. See BLOODY SWEAT. It explains the suddenness of Christ's death, so evident in all the evangelical narratives, as well as its early occurrence, so surprising to Pilate. The loud shrieks that immediately preceded dissolution were at once the expression of the mental paroxysm (Matt. xxvii, 50; Mark xv, 37), and the effort of nature to relieve the system from the sense of suffocation consequent upon the congestion of blood at the heart. This will also account for the presence of "water" (*serum*), as well as "blood" (*crassamentum*), in a commingled yet distinct state, within the pericardium, and discharged at the orifice made by the soldier's spear (John xix, 34), since no blood would flow from a wound in a corpse's *veins*. See BLOOD AND WATER.

V. *Literature.*—An explanation of the other circumstances attending the crucifixion belongs rather to a commentary than a dictionary. The assertion of Paulus and others, that the *feet* were not nailed (Curtius, *De clavis Domini*, Antw. 1670), is amply refuted by Winer (*De pedum affixione*, Lips. 1845) and others. For the detailed incidents in our Saviour's case, see JESUS; and compare Hase, *Leben Jesu*, § 115. On the types and prophecies of it, besides those adduced, see Cypr. *Testim.* ii, 20. On the resurrection of the saints, see Lightfoot, *ad. Matt.* xxvii, 52 (there is a monograph by Gebaverius—*Dissert. de Resur. sanctorum cum Christo*, in his *Comment. Miscell.* No. 6). See RESURRECTION. On other concomitant prodigies, see Schöttgen, *Hor. Hebr. et Talmud.* vi, 3, 8. See DARKNESS; EARTHQUAKE. The chief *ancient* authorities may be found in Lipsius, *De Cruce* (Antwerp, 1589, 1594, and since); see also in Fabric. *Bibliogr. Antiquar.* (Hamb. 1760), p. 755 sq.; and especially Friedlieb, *Archäologie der Leidensgeschichte* (Bonn, 1843). On the points in which our Lord's crucifixion differed from the ordinary Jewish customs, see Othonis *Lex. Rabbinicum*, s. v. Supplicia; Bynæus, *De Morte J. Christi;* Vossius, *Harm. Passionis;* Carpzov, *Apparat. Crit.* p. 591, sq. etc.; Salmasius, *De Cruce* (L. B. 1646); Bartholinus, *De latere Christi aperto* (L. B. 1646); also *De Cruce Christi* (Amst. 1670, L. B. 1693); Zobel, in the *Magaz. fur bibl. Interpret.* ii, 321 sq. See CROSS.

There are monographs in Latin on the following points connected with the subject: on the cross itself, by Baudissus (Viteb. 1673), Cellarius (Ziz. 1677), Cyprian (Helmst. 1699), Freiesleben (Jen. 1662), Germar (Thorun. 1787), Gezelius (Upsal. 1692), Gleich (Lips. 1704), Liperuis (Sedin. 1675), Ortlob (Viteb. 1655), Nihusius (Colon. 1644), Paschius (Viteb. 1686), Richter (Zittau, 1775), Verporten (Frcft. ad V. 1759), Gretser (Ingolst. 1598–1605), id. (ib. 1610), Lipsius (Antwerp, 1595, 1606, Amst. 1670), Bosius (Antw. 1617), Bornitius (Vit. 1644), Salmasius (L. B. 1646), Lange (Vit. 1669), Lamy (*Harm. Ev.* p. 573 sq.); on the crucifixion generally, by Buddæus (Jen. 1707), Dilher (Norimb. 1642), Gerhard (Rost. 1662), Vogler (Helmst. 1693), Versteeg (Traj. ad Rh. 1700), Lydius (Dortrac. 1672, Zutphen, 1701), id. (Tr. ad R. 1701), Medhurst (*Bibl. Brem.* I, i; III, iii), Margalitha (Frcft. ad V. 1706), Merchenius (Duisb. 1722), two anonymous *fasciculi* (Dusseldorf, 1730), Westhovius (L. B. 1733), Sturm (Hal. 1763), Hessler (Sondersh. 1770), Fremery (1788), Zobel (in Germ. *Mag. für bibl. Interpret.* i, 2), Essner (in Germ. Nürnb. 1818), Jongh (Tr. ad Rh. 1827), Hug (in Germ. *Freib. Zeitschr.* 1831), Scharf (Leucop. 1606), Engelmann (Cygn. 1679), Haberkorn (Gress. 1656), Kortholt (Kilon. 1687), Pritius (Lips. 1697), Habichorst (Rost. 1681), Mieg (Heidelb. 1681), Niepeneck (Rost. 1700), Haferung (Viteb. 1739), Moebius (Lips. 1689), Scharf (Leucopetr. 1666), Stosch (Frcft. ad V. 1759), Vitringa (*Obss. sacr.* ii, 384 sq.); on the infamy of the punishment, by Henke (Helmst. 1785), Jetze (Starg. 1761), Lange (Lubec, 1729); on the time of Christ's crucifixion (in reconciliation of the discrepancy between Mark xv, 25, and John xix, 14), by Keil (Lips. 1778–1780), Liebknecht (Giess. 1726), Michaelis (in Germ. *Hamb. Bibl.* iii, 2), Reyper (*Thes. Diss.* ii, 241), Schwarz (Lips. 1778), Morinus (Lugd. B. 1686, 1698), Osiander (Tubingen, 1743), Pauli (Halle, 1744, 1752), Woerger (in Menethen. *Thesaur.* ii, 277), Wolf (Lips. 1750), Zeibich (in German, Lpz. 1713), Zeltner (three diss., Altorf. 1720, 1721, 1724), Knittel (in German, Wolfenb. 1755), Horn (Havn. 1780), Rhein (in Germ., Lpz. 1832); on Christ's thirst and drink on the cross, by Bauer (Viteb. 1714), Deyling (*Obss.* i, 227), Faber (London, 1660), Hutten (Guben. 1671), Leo (Leucop. 1721), Neumann (Viteb. 1683), Pipping (Lips. 1688), Rausch (Jena, 1733), Schlegel (in German, Henke's *Magaz.* iv, 288–291), Walch (*Obss. in Matth.* p. 101–138); on his prayer for his murderers, by Marck (*Syll. Diss.* p. 308, 328), Pfaff (Tub. 1746); on his despairing cry, by Hoepfner (Lips. 1641), Frischmuth (Jen. 1663), Niemann (Jen. 1671), Scharf (Vit. 1671), Lockerwitz (Viteb. 1680), Olearius (Lips. 1683), the same (ib. 1683, 1726), Deutschmann (Viteb. 1695), Winslow (Havre, 1706), Engeström (Lund. 1738), Luger (Jena, 1739), Leucke (Lips. 1753), Weissmann (Tub. 1746), Sommel (Lund. 1774), Wickenhöfer (in Germ., Zimmermann's *Monatssch.* 1822, No. 24); on his commending his spirit to the Father, by Wolle (Lips. 1726; again Gott. 1744); on his so-called "last seven words," by Froerysen (Argent. 1625), Dannhauer (ib. 1641), Lange (Lips. 1651), Mayer (Gryph. 1706), Crüger (Vit. 1726), Vincke (Tr. ad Rh. 1846); on the presence of Mary, by Zorn (*Opusc.* ii, 316–322); on the perforation of the hands and feet, by Fontanus (Amst. 1641), Stemler (Dresd. 1741); on the puncture by the spear, by Sagittarius (Jena, 1673; also in *Thes. Diss. Amst.* ii, 381–7), Bartholinus (L. B. 1646, Lips. 1664, 1683, Frcf. 1681), Faes (Helmst. 1676), Quenstedt (Viterb. 1678), Wedel (Jen. 1686), Jacobi (Lips. 1686), Suantenius (Rost. 1686), Loescher (Vit. 1697), Triller (Vit. 1775); on the discharge from the wound, by Kocher (Dresd. 1597), Ritter (Vit. 1687), Eschenbach (Rost. 1775), Calovius (Vit. 1679); on the medical aspects of the death, by Vogler (Helmstadt, 1673), Westphal (Grypesv. 1771), Richter (Gott. 1757), Kiesling (Erlang. 1767), Gruner (Sen., Jen. 1800, Jun., Hal. 1805), Stroud (in English, London, 1847), Bruhier (in French, Paris, 1749), Swieten (Vien. 1778), Hufeland (Germ., Weim. 1791), Taberger (Germ., Hannov. 1829); on the attestation of the by-standers, by Dietelmaier (Altdorf, 1749), Schöttgen (German, in Bidermann's *Schulsachen*, iii, 16). Cruciger, CASPAR, one of the most faithful and useful of Luther's coadjutors in the Reformation, was

born at Leipsic Jan. 1, 1504, of religious parents, who took pains with his education. In his sixteenth year he embraced the doctrines of the Reformation, and about 1521 he began to study theology at Wittenberg with Luther and Melancthon. He became profoundly skilled in Hebrew. In 1524 he was called to Magdeburg, and there taught with great success till 1527, when he returned to Wittenberg, where he lectured on the Scriptures, and aided Luther in his translation of the Bible. He was very expert in shorthand writing, and to this faculty we are indebted for many of Luther's precious remains. He died at Wittenberg Nov. 16, 1548. His letters may be found in the *Corpus Reformatorum.*—Middleton, *Evang. Biog.;* Adam, *Vitæ Theologorum;* Piper, *Evangel. Kalender*, 1854; Pressel, *Caspar Cruciger nach gleichzeitigen Quellen* (Elberfeldt, 1862).

Cruden, Alexander, author of the well-known *Concordance*, was born in Aberdeen May 31, 1701, and was educated at Mareschal College with a view to the ministry, but aberration of mind caused his temporary confinement in an asylum, and prevented his entering on the ecclesiastical career. In 1732 he went to London, and was employed as a classical tutor and corrector of the press. He was appointed bookseller to the queen, to whom in 1737 he dedicated his *Complete Concordance to the Holy Scriptures of the O. and N. Test.*, which first appeared in that year. Pecuniary difficulties growing out of the publication of this work now increased his insanity, and led to his temporary confinement, but he escaped from Bethnal Green, and brought an action against the proprietor and physician of the asylum, who of course obtained a verdict in their favor. For the rest of his life he was permitted to remain at liberty, and he returned with zeal to his learned and severe labors, manifesting his strange eccentricity in a thousand forms—soliciting knighthood from the king, a seat in Parliament from the people of London, and courting the daughter of the lord mayor, but preserving unchanged his piety and benevolence. He made a verbal index to Milton's poems, a *Scripture Dictionary*, and several religious works, continuing to the last the emendation of his Concordance. Many editions of this work have since appeared. On November 1, 1770, he was found dead in his chamber in the attitude of prayer. See Concordance.

Crumbaugh, John Samuel, a Lutheran minister, was born in Frederick County, Md., November 7, 1831. He graduated at Pennsylvania College, Gettysburg, in 1851, and the same year was appointed principal of the High School, Lancaster, Pa., a position to which he seemed specially adapted. While thus engaged, he also pursued his theological studies under the direction of Rev. Dr. Baker, and in 1853 was licensed to preach the Gospel. His first and only pastoral charge was St. John's (Lutheran) Church, Lancaster. His health, never very vigorous, began to fail under his labors, to which he had so assiduously and successfully devoted himself. He resigned his charge in 1857, and accepted the office of superintendent for common schools of Lancaster County, in the expectation that an opportunity would be afforded, in the active exercise required, for the resuscitation of his health. His zeal and success in the discharge of his varied and difficult duties were regarded by the board as unsurpassed. He was a man of more than ordinary ability, and as a teacher possessed peculiar qualifications. He died Jan. 13, 1859. "His brief life," says Dr. Burrowes, "was a record of learning, usefulness, and honor." He published an address on *God in History*, delivered before the literary societies of Franklin and Marshall College in 1855.

Crusades, the name given to the religious wars carried on from the close of the eleventh to the close of the thirteenth century by the Christian countries of Europe against the Mohammedans for the conquest of the Holy Land. (In this article we make free use of the article in Chambers's *Encyclopædia.*) From an early period in the history of the Church it was considered a pious act to make a pilgrimage to the Holy Sepulchre, and to visit the various spots which the Saviour had consecrated by his presence. When Palestine was conquered by the Arabs in the seventh century, that fierce but generous people respected the religious spirit of the pilgrims, and allowed them to build a church and a hospital in Jerusalem. Under the Fatimides of Egypt, who conquered Syria about 980 A.D., the position both of the native Christian residents and of the pilgrims became less favorable; but the conquest of Jerusalem in 1078, and the subjugation of the country by brutal hordes of Seljuk Turks from the Caucasus, rendered it intolerable. The news of their atrocities produced a deep sensation over the whole of Christendom, and kindled a general desire for the liberation of the Holy Land from the hands of the infidels. The popes encouraged this movement to the best of their ability. They saw in it an opportunity to extend the Church, to re-enforce their power, and to turn the warlike ardor of the Western princes, which so often led to conflicts between Church and State, against the infidels. In 1073, the Greek emperor, Manuel VII, sent to supplicate the assistance of the great pope, Gregory VII, against the Turks, accompanying his petition with many expressions of profound respect for his holiness and the Latin Church. Gregory cordially responded, but circumstances prevented him from ever carrying the vast designs which he entertained into execution. The idea of a crusade was, however, revived by his successor, Urban II, an able and humane man, whose sympathies were kindled by the burning zeal of Peter the Hermit, a native of Amiens, in France, who had made a pilgrimage to the Holy Land, witnessed the cruelties perpetrated by the Turks, and was now traversing Europe, preaching every where to crowds in the open air, and producing the most extraordinary enthusiasm by his impassioned descriptions of how pilgrims were murdered, robbed, or beaten, how shrines and holy places were desecrated, and how nothing but greed restrained the ruffian Turks (who made the Christians pay heavy taxes for their visits to Jerusalem) from destroying the Holy Sepulchre, and extirpating every vestige of Christianity in the land.

First Crusade, 1096–1099.—When, by the addresses of Peter the Hermit and others, the feelings of Europe had been sufficiently heated, two councils were held in 1095, one at Piacenza, in May, and the other at Clermont, in France, in November, to organize the war. At the second, at Clermont, a crusade was definitely resolved on. The pope himself delivered a stirring address to a vast multitude of clergy and laymen, and as he proceeded, the pent-up emotions of the crowd burst forth, and cries of *Deus vult* (God wills it) rose simultaneously from the whole audience. These words, *Deus vult*, by the injunction of Urban, were made the war-cry of the enterprise, and every one that embarked in it wore, as a badge, the sign of the cross; hence the name *Crusade* (Fr. *croisade*, from Lat. *crux*, a cross). From all parts of Europe thousands upon thousands hurried at the summons of the pope to engage in the holy war. In May, 1096, the crusade was actually begun by an undisciplined force of about 20,000 foot, commanded by a Burgundian gentleman, Walter the Penniless. It marched through Hungary, but was cut to pieces by the natives of Bulgaria, only a few, among whom was Walter himself, escaping to Constantinople. The second, consisting of 40,000 men, women, and children, was led by Peter the Hermit. It followed the same route as its predecessor, and reached Constantinople greatly reduced. Here the two united, crossed the Bosphorus, and were utterly defeated by the Turks at Nice, the capital of Bithynia

A third expedition of a similar kind, composed of 15,000 Germans, led by a priest named Gottschalk, was slaughtered or dispersed in Hungary, which also proved the grave of the *fourth*, a terrible horde, consisting of about 200,000 wretches from France, England, Flanders, and Lorraine, who had swept along through Germany, committing horrible ravages, especially against the Jews, whom they murdered without mercy. Now, however, the real Crusaders made their appearance—the gentry, the yeomanry, and the serfs of feudal Europe, under chiefs of the first rank and renown. Six armies appeared in the field, marching separately, and at considerable intervals of time. Their respective leaders were Godfrey of Bouillon, duke of Lorraine; Hugh the Great, count of Vermandois, and brother of Philippe, king of France; Robert Curthose, duke of Normandy, the son of William the Conqueror; count Robert of Flanders; Bohemond, prince of Tarentum, son of the famous Guiscard, under whom was Tancred, the favorite hero of all the historians of the Crusade; and, lastly, count Raymond of Toulouse. The place of rendezvous was Constantinople. The Greek emperor, Alexius, afraid that so magnificent a host—there were in all not less than 600,000 men, exclusive of women and priests—might be induced to conquer lands for *themselves*, cajoled all the leaders, excepting Tancred and count Raymond, into solemnly acknowledging themselves his liegemen. After some time spent in feasting, the Crusaders crossed into Asia Minor (accompanied by the unfortunate Peter the Hermit). Here their first step was the siege and capture of Nice, the capital of Sultan Soliman, June 24, 1097. This monarch was also defeated by Bohemond, Tancred, and Godfrey, at Dorylæum. Baldwin, brother of Godfrey, now crossed into Mesopotamia, where he obtained the principality of Edessa. After some time the Crusaders reached Syria, and laid siege to Antioch. For seven months the city held out, and the ranks of the besiegers were fearfully thinned by famine and disease. Many, even brave warriors, lost heart, and began to desert. Melancholy to relate, among the list of cowards was the poor enthusiast who had planned the enterprise. Peter was actually several miles on his way home when he was overtaken by the soldiers of Tancred, and brought back to undergo a public reprimand. At length, on the 3d of June, 1098, Antioch was taken, and the inhabitants were massacred by the infuriated Crusaders, who were in their turn besieged by an army of 200,000 Mohammedans sent by the Persian sultan. Once more famine and pestilence did their deadly work. Multitudes also deserted, and, escaping over the walls, carried the news of the sad condition of the Christians back to Europe. But again victory crowned the efforts of the besieged. On June 28, 1098, the Mohammedans were utterly routed, and the way to Jerusalem opened. It was on a bright summer morning (1099) that 40,000 Crusaders, the miserable remnant of that vast array which two years before had laid siege to Nice, obtained their first glimpse of Jerusalem. On July 15, after a siege of rather more than five weeks, the grand object of the expedition was realized. Jerusalem was delivered from the hands of the infidel. Eight days after the capture of the city, Godfrey of Bouillon was unanimously elected king of Jerusalem.

Second Crusade, 1147.—In 1144 the principality of Edessa was conquered by the emir of Mosul, and the Christians slaughtered. His son Noureddin advanced to destroy the Latin kingdoms of Syria and Palestine. Europe once more trembled with excitement. A second crusade was preached by the famous St. Bernard, abbot of Clairvaux, in Champagne; and early in 1147 two enormous armies, under the command of Louis VII, king of France, and Conrad III, emperor of Germany, marched for the Holy Land. Their united numbers were estimated at 1,200,000 fighting-men. The expedition, nevertheless, proved a total failure. The Greek emperor, Manuel Comnenus, was hostile; and through the treachery of his emissaries the army of Conrad was all but destroyed by the Turks near Iconium, while that of Louis was wrecked in the defiles of the Pisidian Mountains. After a vain attempt to reduce at first Damascus and subsequently Ascalon, the relics of this mighty host returned to Europe.

Third Crusade, 1189–1192.—The death-blow to the kingdom of Jerusalem was given by Salah-Eddin, commonly called Saladin, a young Kurdish chief, who had made himself sultan of Egypt, and who aspired to the presidency of the Mohammedan world, in October, 1187, Jerusalem itself capitulating after a siege of fourteen days. The news of this led to a third crusade, the chiefs of which were Frederick I (Barbarossa), emperor of Germany, Philippe Auguste, king of France, and Richard *Cœur-de-Lion*, king of England. Barbarossa took the field first in the spring of 1189, but accidentally lost his life by fever caught from bathing in the Orontes. His army, much reduced, joined the forces of the other two monarchs before Acre (or Ptolemais), which important city was immediately besieged, and after a beleaguering of twenty-three months surrendered. But the Crusaders were not united among themselves. Philippe soon after returned to France; and Richard, after accomplishing prodigies of valor, which excited the admiration of the Saracens, concluded a treaty with Saladin, by which "the people of the West were to be at liberty to make pilgrimages to Jerusalem, exempt from the taxes which the Saracen princes had in former times imposed." On October 25, 1192, Richard set sail for Europe.

Fourth Crusade, 1203.—In 1203 a fourth expedition was determined upon by pope Innocent III, although the condition of the Christians was by no means such as to call for it. It assembled at Venice, the government of which republic, from political reasons, promised to support the movement by its navy. The army never went to Palestine at all, but preferred to take possession of the Byzantine empire. The leader of this host of *pseudo-Crusaders*, Baldwin, count of Flanders, was seated on the throne of the East in 1204, where he and his successors maintained themselves for fifty-six years. Some writers do not number this expedition among the regular crusades, but count as the fourth crusade another expedition, in 1217, which king Andrew II of Hungary was prevailed upon by pope Honorius III to undertake. He was supported by the kings of Jerusalem and Cyprus, conquered a fortress on Mount Tabor and some small forts, but in 1218 returned home. In the same year count William of Holland, being allied with the kings of Jerusalem and Cyprus, landed in Egypt. He conquered in 1219 Damietta, but in 1221 this town and all other conquests were lost again.

Fifth Crusade, 1228–1229.—This was commanded by Frederick II, emperor of Germany. It began in 1228, and terminated in a treaty of ten years between that monarch and the sultan of Egypt, by which Palestine was ceded to Frederick, who, after being crowned king of Jerusalem in 1229, returned to Europe, leaving his new possessions in a state of tranquillity.

Sixth Crusade, 1248.—In 1244 a new race of Turks burst into Syria, and once more the Holy Land fell into the hands of these ferocious barbarians. Jerusalem was burned and pillaged. In 1248, Louis IX of France (St. Louis) headed a crusade against them. At the head of 40,000 soldiers he embarked from Cyprus, and from there went to Egypt, conquering the coast and the town of Damietta, but when he advanced further he was utterly defeated, and taken prisoner by the sultan of Egypt. By the payment of a large ransom he obtained his liberty (1250), and that of the other prisoners. On his return to Europe he was regarded as a sort of martyr in the cause of Christ.

Seventh Crusade, 1270.—This also was primarily un-

dertaken by St. Louis, but he having died at Tunis in 1270, on his way to Palestine, prince Edward of England, afterwards Edward I, who had originally intended to place himself under the command of St. Louis, marched direct for Palestine, where his rank and reputation in arms gathered round him all who were willing to fight for the Cross. Nothing of consequence, however, was accomplished, and Edward soon returned to England, the last of the Crusaders. Acre, Antioch, and Tripoli still continued in the possession of the Christians, and were defended for some time by the Templars and other military knights; but in 1291 Acre capitulated, the other towns soon followed its example, and the knights were glad to quit the country, and disperse themselves over Europe in quest of new employment, leaving Palestine in the undisturbed possession of the Saracens.

Since that time there have been no further crusades, although the popes have more than once attempted to excite the Christians to the undertaking. Some writers do not hesitate to affirm that the popes, under this device, aimed at universal power over the kings and armies employed in their service, which were numerous, because a plenary indulgence was the reward of a Crusader. The Christian princes were exhausted in the struggle, while the pope became omnipotent both over clergy and people. The people sold their property for a mere trifle, or made a gift of it to monasteries and abbeys. It is computed that nearly two millions of Christians lost their lives during the crusades by slaughter, hunger, pestilence, etc.

It is impossible to overlook the fact that, in some respects, the crusades exercised a most beneficial influence on modern society. M. Guizot, in his *Lectures on European Civilization*, endeavors to show their design and function in the destinies of Christendom. "To the first chroniclers," he says, "and consequently to the first Crusaders, of whom they are but the expression, Mohammedans are objects only of hatred: it is evident that those who speak of them do not know them. The historians of the later crusades speak quite differently: it is clear that they look upon them no longer as monsters; that they have to a certain extent entered into their ideas; that they have lived with them; and that relations, and even a sort of sympathy, have been established between them." Thus the minds of both, but particularly of the Crusaders, were partly delivered from those prejudices which are the offspring of ignorance. "A step was taken towards the enfranchisement of the human mind." Secondly, the Crusaders were brought into contact with two civilizations, richer and more advanced than their own—the Greek and the Saracenic; and it is beyond all question that they were mightily struck with the wealth and comparative refinement of the East. Thirdly, the close relationship between the chief laymen of the West and the Church occasioned by the crusades enabled the former "to inspect more narrowly the policy and motives of the papal court." The result was very disastrous to that spirit of veneration and belief on which the Church lives, and in many cases an extraordinary freedom of judgment and hardihood of opinion were induced, such as Europe had never before dreamed of. Fourthly, great social changes were brought about. A commerce between the East and West sprang up, and towns—the early homes of liberty in Europe—began to grow great and powerful. The crusades, indeed, "gave maritime commerce the strongest impulse it had ever received." As the crusades were a rising of the Christian nations of Europe for the triumph of the Church under the direct control of the popes, they naturally gave a powerful influence to the hierarchical plans of the popes. The emperors and kings, by following the exhortations of the popes and taking the cross, acknowledged the claims of the popes that the ecclesiastical power was higher than the secular. As the popes did not personally join the crusades, but were represented by legates, the system of papal legates was developed, which became in the hands of the popes a powerful weapon for curtailing the jurisdiction of archbishops and bishops. The origin of bishops *in partibus infidelium* can also be traced to the crusades. The raising of immense armies was a good pretext for the popes to extort large sums of money from princes and nations. The warlike enthusiasm against the Mohammedans kindled the popular fanaticism against all heretics, and stimulated the bloody persecutions of the Cathari, Waldenses, and other sects in Western Europe.

The influence of the crusades upon scientific theology was only indirect. The better acquaintance with the philosophical and theological literature of the Greek Church and the Mohammedans could but yield a favorable influence. In particular, the study of Aristotle was greatly promoted by the crusades, and several of his works were then first made known in the western countries of Europe. See Chambers, *Cyclopædia*, s. v.; Brockhaus, *Conversations-Lex.* ix, 76; *Christian Remembrancer*, xliv, 5; Herzog, *Real-Encyklop.* viii, 68; Mosheim, *Church History*, ii, 112, 141, 233, etc.; Milman, *Latin Christianity*, vol. iv; Wilken, *Geschichte der Kreuzzüge* (Leips. 1807–26, 4 vols.); Michaud, *Histoire des Croisades* (Paris, 1825; translated by Robson, London, 3 vols. 12mo, 1854); Mills, *History of the Crusades* (Lond. 1828, 4th ed. 2 vols. 8vo); Keightley, *The Crusades* (London, 1847, 2 vols. 12mo); Hume, *History of England*, i, 226 et al.; ii, 60 et al.; Hase, *Ch. Hist.* p. 196, 220, 269; Sybel, *Geschichte des ersten Kreuzzuges* (Leipsic, 1841); Kugler, *Studien zur Geschichte des zweiten Kreuzzuges* (Stuttgardt, 1866). A list of writers on the subject is given by Michaud, *Bibliothèque des Croisades* (Paris, 1830, 4 vols.).

Cruse. This now obsolete English word denotes a small vessel for holding water or other liquids. Three Hebrew words are thus translated in the A. V. See Cup.

1. צַפַּחַת, *tsappach'ath* (lit. something *spread out*), is applied to a utensil (usually considered a *flask*, but more probably a shallow *cup*) for holding water (1 Sam. xxvi, 11, 12, 16; 1 Kings xix, 6) or oil (1 Kings xvii, 12, 14, 16). Some clew to the nature of this vessel is perhaps afforded by its mention as being full of water at the head of Saul when on his night expedition after David (1 Sam. xxvi, 11, 12, 16), and also of Elijah (1 Kings xix, 6). In a similar case in the present day this would be a globular vessel of blue porous clay—the ordinary Gaza pottery—about nine inches diameter, with a neck of about three inches long, a small handle below the neck, and opposite the handle a straight spout, with an orifice about the size of a straw, through which the water is drunk or sucked. The form is common also in Spain, and will be familiar to many from pictures of Spanish life. A similar globular vessel probably contained the oil of the widow of Zarephath (1 Kings xvii, 12, 14, 16). For the "box" or "horn" in which the consecrated oil was carried on special occasions, see Oil. Some writers have supposed that the cruse of water mentioned in the first passage (when Saul's life was spared by David) was a *clepsydra*, or one of those water-watch measures used by the ancients, by which time was

Modern Oriental Travelling Flasks.

measured by the falling of water from one vessel into another, the undermost vessel containing a piece of cork, the different altitudes of which, as it gradually rose upon the rising water, marked the progress of time. But we can hardly suppose that such time-measures were known at that early period. It is usual for persons in the East in the present day, when they travel, to take with them a flask for holding water, and also, when they sleep in the open air, to have a small vessel of water within their reach (Thomson, *Land and Book*, ii, 21). These flasks are of various forms, and are sometimes covered with a wicker-case, See DISH.

2. בַּקְבּוּק, *bakbuk'* (from the *gurgling* sound in emptying), perhaps a *bottle* (as it is translated in Jer. xix, 1, 10) for holding any liquid, as honey (1 Kings xiv, 3), but more probably a PITCHER (q. v.).

3. צְלֹחִית, *tselochith'* (lit. that into which fluids are *poured out*), a *platter* (2 Kings ii, 20). This was probably a flat metal saucer of the form still common in the East. It occurs in 2 Kings ii, 20, "cruse;" xxi, 13, "dish;" 2 Chron. xxxv, 13, "pan;" also Prov. xix, 24; xxvi, 15, where the figure is obscured by the choice of the word "bosom." See PAN; PLATTER, etc.

Crusè, CHRISTIAN F., D.D., a minister of the Protestant Episcopal Church, was born June 27, 1794, in Philadelphia, of Lutheran parentage. He entered the University of Pennsylvania in 1812, and graduated Jan. 10, 1815, with distinguished honors. He was appointed professor in the University in 1831, and resigned in 1833. He was ordained by bishop White about 1822; became rector of Trinity Parish, Fishkill, N.Y., in April, 1846, but resigned the cure in 1851, and afterwards had no parish. He soon after removed to the General Theological Seminary, where, as librarian, he had ample opportunities for those studies in which he was so successful. In the ancient languages—Syriac, Hebrew, and Greek—Dr. Crusè was very well informed. He translated and edited Eusebius's *Church History*, and his edition is the best in English. He died in New York October 5, 1865.—*Church Review*, January, 1866.

Crusius, CHRISTIAN AUGUST, a German theologian, was born at Leuna, near Merseburg, January 10, 1715. He studied at Leipzic, where he afterwards became professor of philosophy in 1744, of theology in 1750, and primarius of theology in 1757. He died October 18, 1775. Dissatisfied with the existing philosophical systems, he attempted a new one, which he sought to bring into harmony with orthodox theology. The school which he represented in Leipzig may be designated by the name of a Philosophico-Biblical Realism. As a philosopher, he was one of the most important opponents of the idealism and mechanism of the Leibnitz-Wolffian philosophy, while, as a Bible theologian, he maintained the historical and literal as opposed to an exclusively spiritualistic exegesis. In *morals* "he drew his conclusions, not from the conceptions of the intellect, but the suggestions of the will and conscience. He derived the notion of duty from moral necessity or *obligation*. He asserted the free-agency of the human mind (which he contemplated principally in a negative point of view, i. e. as uninfluenced by physical or material laws), and developed the formal conditions of our free-will actions and the motives of them. The principle of a moral law led him to that of a moral Governor and Legislator, and consequently to the hypothesis which ascribes all moral obligations and laws to the divine authority, deducing, as the schoolmen had done, the principles of morals from the will of God. That which is consistent with the nature of the divine perfections, and accords with the designs of God, is good, and becomes obligatory on all rational beings. God demands of his rational creation, in the first place, that they should be good; and also wills their happiness as a consequence of virtue" (Tennemann). His principal works are: *Logik o. d. Weg z. Gewissheit u. Zuverlässigkeit d. menschlichen Erkenntniss* (Lpz. 1747; 2d ed. 1762); *Entwurf d. nothwendigen Vernunftwahrheiten* (Lpz. 1745; 3d ed. 1766); *Anweisung, vernünftig z. leben* (Lpz. 1744; 3d ed. 1767); *Anleitung, ü. natürliche Begebenheiten ordentlich u. vorsichtig nachzudenken* (Lpz. 1749, 2 vols., 1772); *Begriff d. christlichen Moraltheologie* (Lpz. 1772, 2 vols.). See Pierer, *Universal-Lexikon*, s. v.; Kahnis, *German Protestantism* (Edinb. 1856, 12mo, p. 107); Delitzsch, *Die biblish-prophetische Theologie, ihre Fortbildung durch Chr. Crusius*, etc. (Lpz. 1845); Tennemann, *Manual Hist. Phil.* § 368.

Cryer, THOMAS, a Wesleyan missionary of rare piety and usefulness, was born at Bingley, in Yorkshire, in 1800. At 20 he was converted, and was called into the ministry about seven years after, and labored for a few months in an English circuit. He was then appointed a missionary to India, and embarked for that country in 1829. For 22 years he labored for the salvation of the heathen, and his name will be long remembered in the East. In spite of opposition and of the long delay of prosperity, which is the great and peculiar trial of the Eastern missionary—in spite of the most acute personal and family afflictions, his heart was undaunted and his faith unsubdued. Few of his fellow-missionaries excelled him in power of utterance, in the adroitness and effect with which he exposed the sophisms of the Brahmin, or in searching and persuasive appeals to the conscience. He "determined to know nothing but Christ and him crucified." Such a minister could hardly fail of winning souls; and many will be the crown of his rejoicing in the day of Jesus Christ, not only from among the natives of India, but also from among the Europeans resident in that country. He died of cholera, October 5, 1852.—*Wesleyan Minutes*, 1853.

Crypt (Gr. κρύπτη, a *concealed* place; Lat. *crypta*; Fr. *crypte*).

I. Among the ancient Greeks and Romans a *crypt* was primarily a long, narrow gallery, above the level of the ground, surrounding a court-yard, and having walls on both of its sides, with windows in the wall facing the court. These crypts had often a portico lining them or running between them and the open court. They served as a place of promenade during the hot or wet weather, and were finally so extensively used that they were even built for the officers near the Prætorian camps in Rome. Crypts similar in construction and location were built for storing wines, vegetables, and other articles, like the modern subterranean cellar. When all the windows were closed they were dark and cool, and hence the word was applied even by the ancients to any dark and long chamber or passage, as the dark stables where horses were kept under the amphitheatre, the *cloaca maxima* at Rome, the tunnel at Naples, and to a grotto where Quartilla offered sacrifice.

II. The word *crypt* was applied by the early Christians to those subterranean burial-places which were afterwards called Catacombs (q. v.). The term was later limited to the larger chambers in the Catacombs where one or more martyrs were buried. These crypts were larger than the other rooms in the Catacombs, and were often ornamented, and devoted to divine worship. For this purpose they were double, one part serving for the men and the other for the women, with small antechambers for the catechumens. Some of these crypts had openings into the fields above.

III. When persecution ceased, and Christians built church edifices above ground, the custom was adopted of placing the remains of martyrs—later of archbishops, bishops, abbots, and other high church officials—in crypts under the intersection of the cross in the plan of the church. In the Basilican period of architecture

these crypts were often called by the name *confessio*. In the Romanesque period the name crypt was resumed. In the churches of this period, the crypt extended under the high altar and back under the entire choir or apsis, sometimes even including the space under the transept. This crypt formed almost a separate church, and caused the floor above it of the main body of the church to be raised higher than that of the nave, to which the audience had access. Churches founded in the latter part of the Romanesque period, and thereafter, had no crypts. The reason of their disappearance from church architecture is not well understood. —Lübke, *Geschichte der Architektur;* Rich, *Dictionary of Greek and Roman Antiquities.*

Crypto-Calvinistic Controversy, the name given to a dispute within the Lutheran Church of Germany (1552–1574) concerning the doctrine of the Lord's Supper. The followers of the Melancthonian doctrine, as distinguished from the strict Lutherans, were styled *Crypto-Calvinists* (also Philippists, Melancthonians).

1. Melancthon, it is well known, earnestly desired a union of the Lutheran and Calvinistic divisions of the Protestant body. His tendency towards the Calvinistic view of the Lord's Supper was early shown in the difference between the Augsburg Confessio *invariata* (1530) and the *variata* (1542). In the former, art. x, *de cœna Domini*, it is stated that the "body and blood of Christ are truly present in the Lord's Supper (in the form of bread and wine), and are there distributed and received (distribuuntur *vescentibus*); therefore the opposite doctrine is rejected." In the *variata* (Latin of 1540) the reading is "*cum pane et vino vere exhibentur* corpus et sanguis Christi vescentibus in cœna Domini." The condemnation of the "opposite doctrine," i. e. the Zwinglian, is omitted. This alteration did not meet the approbation of Luther, who nevertheless tolerated Melancthon's change of doctrine. But many Lutherans (e. g. Flacius, q. v.) were less tolerant; and during Melancthon's lifetime he was held by many to be a concealed (crypto-) Calvinist. The truth seems to be fairly stated by Hase, as follows: "As Melancthon was convinced that neither Luther's nor Calvin's doctrine of the sacrament was an insuperable bar to saving communion with Christ, he thought he might allow both of them to continue in the Church. But when the doctrine of the omnipresence of Christ's body (ubiquity, q. v.) was proposed as the only saving basis of the Holy Supper, and made, by Brentz (see BRENTIUS), the law of the Church in Würtemberg, he expressed disapprobation of such novel doctrines in provincial Latin being introduced into the symbols of faith" (*Church History*, § 350). Melancthon and Luther never quarrelled on the subject; but the controversy, even during Melancthon's lifetime, began to be bitter. He did not live, however, to see the fierce strife which finally arose on the subject within the bosom of the Church (died 1560).

2. But the controversy, as such, began in the year 1552, when Joachim Westphal, a preacher in Hamburg, proclaimed the Calvinistic doctrine of the Lord's Supper heretical. The controversy was especially violent at Bremen, between Tilemann Heshusius and Albert Hardenberg, cathedral preacher, who acted for the Calvinistic doctrine, and it went on until Hardenberg was dismissed from his position. Shortly after Heshusius shared a like fate. In 1558 Heshusius was made general superintendent at Heidelberg, and he soon detected "Crypto-Calvinism" in deacon Wilhelm Krebitz. In both cities Lutheranism was finally expelled, and Frederick III, elector of the Palatinate, went over to the Reformed Church. In Würtemberg Brentz urged the ultra-Lutheran doctrine (see above); but Christoph, duke of Würtemberg, endeavored to allay the strife, and finally succeeded, in 1561, at the Fürstentag (Diet of Princes) at Naumburg, in obtaining the recognition of the *altered* Augsburg Confession. The elector Frederick III of the Palatinate withdrew from the controversy, and introduced, in 1563, in his dominions a mixed doctrine of Melancthonian tendency, by the incorporation of the Heidelberg Catechism into the state law.

In the Saxon electorate the Wittenberg and Leipzig theologians undertook a like combination of the doctrines. Kaspar Peucer, son-in-law of Melancthon, Cracow, Schütz, and Stössel; G. Major, P. Eber, Paul Crell, and, later, P. Cruciger, Pezel, Moller, and others, in their writings, and also in the well-known Katechesis, favored the view, and these Melancthonian theologians were called Philippists. The Thuringian theologians in Jena, especially Flacius, also Wigand, Cölestrin, Kirchner, and others, were strict Lutherans, and bitterly opposed the electorate Saxons. A conference between the Wittenberg and Jena theologians was held at Altenburg (October, 1568, to March, 1569), in which very intemperate accusations were made against the Philippists. The rupture was widened. The electoral duke Augustus of Saxony called his theologians together in Dresden on the 7–10th of October, 1571. They agreed upon the *Consensus Dresdensis* and the *Wittenberg Catechism*, which opposed the doctrine of ubiquity, but used Lutheran language in moderate terms, Melancthonian in spirit; for the time it was thought that the strife was ended. But in 1574 appeared an anonymous work entitled *Exegesis perspicua et ferme integra controversiæ de sacra cœna*, which strongly advocated the Calvinistic view of the Supper. (It has been shown by Heppe, *Geschichte des deutsch. Prot.* ii, 468, that this work was written by the physician Joachim Cureus [died 1573], and was not originally intended for publication.) The work caused a bitter renewal of the controversy, and the elector determined to suppress Calvinism, and he deposed or imprisoned the leaders, and commanded subscription to the Confession of Torgau (May, 1574). Peucer was imprisoned for twelve years. In 1586 the elector died, and his son, Christian I, succeeded him. Chancellor Nicolas Crell (q. v.) and others influenced him to favor the Calvinistic view. After his death, the duke Frederick William of Saxe-Weimar, who was regent, put down Philippism by brute force, even executing Crell in 1601. See Löscher, *Histor. motuum*, 1723; Heppe, *Geschichte des deutschen Protestantismus*, 1852, 2 vols.; *Zeitschr. f. d. hist. Theol.* 1865, iv; Gieseler, *Church History* (Smith's), iv, § 37, 38; Gass, *Geschichte d. prot. Theol.* i, 63 sq.; Hagenbach, *History of Doctrines*, § 215; Herzog, *Real-Encyklop.* viii, 127.

Crystal. There are several words which appear to have this meaning in the Bible. See ICE; PEARL.

1. קֶרַח, *ke'rach* (properly *ice*, as it is rendered Job vi, 16; xxxviii, 29; "frost," Gen. xxxi, 40; Job xxxvii, 10; Jer. xxxvi, 30; Sept. κρύσταλλος), occurs in Ezek. i, 22, where the epithet "terrible" seems to be added by way of distinction from the ordinary signification of the word.

2. גָּבִישׁ, *gabish'* (properly *ice;* Sept. γαβίς), occurs only in Job xxviii, 18, where it is rendered "pearls" in our version.

3. זְכוּכִית, *zekukith'* (lit. what is *pure* or transparent; Sept. ὕαλος), occurs only in Job xviii, 17, where some regard it as denoting *glass*.

4. Κρύσταλλος (prop. *ice*) occurs in Rev. iv, 6; xxi, 11; xxii, 1, evidently in the sense of *crystal*, and in such connections as to identify it in a good degree with the preceding terms.

"Crystal was anciently held to be only pure water, congealed by great length of time into ice harder than the common (Diod. Sic. ii, 52; Plin. *Hist. Nat.* xxxvii, 2), and hence the Greek word for it, in its more proper signification, also signifies ice. From this it necessarily followed that crystal could only be produced in the regions of perpetual ice, and this was accordingly the ancient belief; but we now know that it is found

in the warmest regions. Theophrastus (54) reckons crystal among the pellucid stones used for engraved seals. In common parlance we apply the term *crystal* (as the ancients apparently did) to a glass-like transparent stone, commonly of a hexagonal form, which, from being found in rocks, is called by mineralogists rock-crystal. It is a stone of the flint family, the most refined kind of quartz." See GLASS.

Cubit (in Heb. אַמָּה, *ammah'*, lit. *mother*, i. e. of the arm, the *fore*-arm; Greek πῆχυς, an *ell*) is a word derived immediately from the Latin *cubitus*, the lower arm. The length of the cubit has varied in different nations and at different times. Derived as the measure is from a part of the human body, and as the human stature has been of very dissimilar length, the cubit must of necessity have been various. The lower arm, moreover, may take in the entire length from the elbow to the tip of the third or longest finger, or it may be considered as extending from the elbow merely to the root of the hand at the wrist, omitting the whole length of the hand itself. If the definition of Celsus (viii, 1) is taken, and the cubit is identified with the *ulna*, the under and longer of the two bones of which the arm consists, still a fixed and invariable measure is not gained. That the cubit among the Hebrews was derived as a measure from the human body is clear from Deut. iii, 11—"after the cubit of a man" (אַמַּת אִישׁ, see Böttcher, *Proben alttest. Schrift.* p. 288). But it is difficult to determine whether this cubit was understood as extending to the wrist or the end of the third finger. As, however, the latter seems most natural, since men, when ignorant of anatomy, and seeking in their own frames standards of measure, were likely to take both the entire foot and the entire fore-arm, the probability is that the longer was the original cubit, namely, the length from the elbow to the extremity of the longest finger. The Egyptian cubit, which it is likely the Hebrews would adopt, consisting of six hand-breadths, is found on the ruins of Memphis (*Journal des Savans*, 1822, Nov., Dec.; comp. Herod. ii, 149). The Rabbins also (Mishna, *Chelim*, xvii, 9) assign six hand-breadths to the Mosaic cubit. By comparing Josephus (*Ant.* iii, 6, 5) with Exod. xxv, 10, it will, moreover, be found that the weight of his authority is in the same scale. According to him, a cubit is equal to two spans. Now a span is equal to three hand-breadths (Schmidt, *Bibl. Mathemat.* p. 117; Eisen-Schmidt, *De Ponderibus*, p. 110); a cubit, therefore, is equal to six hand-breadths. The hand-breadth is found as a measure in 1 Kings vii, 26; comp. Jer. lii, 21. In the latter passage the finger-breadth is another measure. The span also occurs Exod. xxviii, 16. So that, it appears, measures of length were, for the most part, borrowed by the Hebrews from members of the human body. Still no absolute and invariable standard presents itself. If the question, What is a hand or finger-breadth? be asked, the answer can be only an approximation to fact. If, however, the palm or hand-breadth be taken at 3⅓ inches, then the cubit will amount to 21 inches. In addition to the common cubit, the Egyptians had a longer one of six palms four inches. The Hebrews also have been thought to have had a longer cubit, for in Ezek. xl, 5, we read of a cubit which seems to be an ordinary "cubit and an hand-breadth;" see also Ezek. xliii, 13, where it is expressly said, "the cubit is a cubit and an hand-breadth." The prophet has been supposed to refer here to the then current Babylonian cubit, a measure which it is thought the Jews borrowed during the period of their captivity. The Rabbins make a distinction between the common cubit of five hand-breadths and the sacred cubit of six hand-breadths—a distinction which is held to be insufficiently supported by De Wette (*Archäologie*, p. 178). Consult Lamy, *De Tabernaculo*, c. 8; Carpzov, *Apparat.* p. 676.—Kitto, s. v. An ancient Egyptian cubit now in the Royal Museum of Paris measures 20.484 inches. The Hebrew cubit, according to Bishop Cumberland and M. Pelletier, is twenty-one inches; and the Talmudists observe that the Hebrew cubit (meaning probably the longer or sacred measure) was larger by one quarter than the Roman, which would make it contain 21.843 inches. Many writers fix it at eighteen inches, confounding it with the Greek and Roman measure of a foot and a half. The most approved computation assigns each kind of Jewish cubits the same length as the corresponding Egyptian, namely, 20.24 inches for the ordinary one, and 21.888 for the sacred, which is confirmed by the mean length of several ancient cubits marked on the Egyptian monuments (Wilkinson's *Anc. Egyptians*, 2d series, i, 30), by a comparison of the dimensions of the Pyramids with those given in ancient authorities (Vyse's *Pyramids of Gizeh*, iii, 104, 105), and which we shall find to correspond remarkably with the Talmudical statement of the circuit of the Temple. In a later edition of his *Ancient Egyptians*, however ("*Popular Account*," ii, 258), Wilkinson makes the ordinary Egyptian cubit to have consisted of seven palms or twenty-eight digits, and gives nine exact computations of its length, varying from 20.4729 to 20.7484 inches, which yield an average of 20.6169 inches; and he states the cubit on the Nilometer at Elephantine, from actual measurement, to be 20.625 inches. This last is perhaps the most accurate dimension attainable for the standard cubit. (See Böckh, *Metrol. Untersuch.* Berl. 1838, p. 12; Thenius, in the *Stud. u. Krit.* 1846, i, 770; ii, 299; Lepsius, *Die alt-ägyptische Elle*, Berl. 1865.) See METROLOGY.

In Judg. iii, 16, the term translated "cubit" is in the original גֹּמֶד, *go'med* (literally, a *cut*), a *rod* or staff, as the measure of a cubit. In the New Testament our Lord characteristically employs the term cubit (Matt. xxvii, 6; Luke xii, 25) for the enforcement of a moral and spiritual lesson. The term also occurs in John xxi, 8, and in Rev. xxi, 17; and in the Apocrypha (2 Macc. xiii, 5). See MEASURE.

Cucius. See KAUTZ.

Cuckoo (שַׁחַף, *shach'aph*, prob. from its *leanness;* Sept. and Vulg. *sea-gull;* A.V. "cuckow") occurs only in Lev. xi, 16; Deut. xiv, 15, among birds of prey not clearly identified, but declared to be unclean. None of the various ancient or modern versions of this word give a bird possessing any affinity with the other species enumerated; and although the cuckoo is a winter and spring bird, distinctly heard, it appears, by Mr. Buckingham, early in April, while crossing the mountains between Damascus and Sidon, at that time covered with snow, it could scarcely deserve to be included in the prohibited list, for the species is everywhere scarce. The identifications proposed by late writers on the subject all equally lack a sufficient foundation. Bochart (*Hieroz.* vol. ii, c. 18) thinks the *sea-gull* is meant. Upon the whole, while so much obscurity still remains on the subject, the interpretation of "cuckoo" may as well remain undisturbed. (See *Penny Cyclopædia*, s. v.) The word *shachaph* was a

Common Cuckoo (*Cuculus Canorus*).

good imitation of the dissyllabic voice of this bird, as our word *cuckoo*, variously repeated in all European languages, and *yakoob*, which the bird is supposed by the Arabs to utter. The latter, indeed, call it *tîr el-Yakûb*, or "Jacob's bird," on this account (Kitto, *Phys. Hist. of Palest.* p. cccciii). The common cuckoo (*Cuculus canorus*) is a bird of considerable size, unfit for food, because habitually feeding on reptiles and large insects. It is spread over the whole of Asia and Africa as well as Europe, migrating northward in spring, and probably not breeding in Palestine, although passing the winter there. The American cuckoo (*Erythiophris Americanus*), often called "cow-bird," is a different species of the family of the *Cuculinæ*, all the members of which are distinguished by laying their eggs in the nests of other birds, and rearing no young themselves.

Eastern Black Cuckoo (*Eudynamys Orientalis*).

Cucullus. See Cowl.

Cucumber is the translation of קִשֻּׁא, *kishshu'* (so called probably from its *difficulty of digestion;* Sept. σίκυος), in our Auth. Vers., and the correctness of this rendering has been almost universally admitted. It occurs in Num. xi, 5, where the Israelites, when in the desert, express their longings for the melons and the *cucumbers* of Egypt. The Heb. is so similar to the Arabic *kissa* that there can be very little doubt of their both meaning the same thing. Celsus (*Hierobot.* ii, 247) gives *keta*, *kati*, and *kusaia* as different pronunciations of the same word in different Oriental languages. It does not follow that these names always indicate exactly the same species, since in the different countries they would probably be applied to the kinds of cucumber most common, or perhaps to those which were most esteemed in particular localities. Thus, in Egypt (see Prosp. Alpin, *Plantt. Æg.* c. 38, p. 54), the name *kati* appears to be applied to the species which is called *Cucumis chate* by botanists, and "queen of cucumbers" by Hasselquist, who describes it as the most highly esteemed of all those cultivated in Egypt (*Trav.* p. 258). See Melon. In India the name *kissa* is applied by the Mohammedans to the *Cucumus utilissimus*, or the common *kukree* of the natives, while in Persia and Syria the same name would probably be applied only to the common cucumber, or *Cucumis sativus*, as the two preceding species are not likely to

Syrian Cucumber (*Cucumis sativus*).

be much known in either country. The Talmudists (*Maaser.* i, 4; *Terumoth*, ii, 6; vi, 6; *Baba Mez.* vii, 5) have קִשּׁוּת, and the Phœnicians had the word Κουσίμεζαρ (Diosc. iv, 152), which is probably קִשֻּׁא מִצְרַיִם, "cucumber of Egypt" = σίκυς ἄγριος. The same name for cucumber exists in all cognate languages. (For an account of the cucumbers of Syria and Egypt, see Forskal, *Flora Ægypt.* p. 169; Celsii *Hierobot.* ii, 249.) See Botany.

All travellers in the East notice the extensive cultivation and consumption of cucumbers and other vegetables of the same tribe, especially where there is any moisture of soil, or the possibility of irrigation (see Burckhardt, *Arabic Proverbs*, No. 660). Thus, even in the driest parts, the neighborhood of a well is often occupied by a field of cucurbitaceous plants, generally with a man or boy set to guard it from plunder, perched up on a temporary scaffolding, with a slight protection from the sun, where he may himself be safe from the attacks of the more powerful wild animals. That such plants appear to have been similarly cultivated among the Hebrews is evident from Isa. i, 8, "The daughter of Zion is left like a cottage in a vineyard, like a lodge in a *garden of cucumbers*" (מִקְשָׁה, *mikshah'*, Sept. σικυήρατον), as well as from Baruch vi, 70, "as a scarecrow in a *garden of cucumbers* (σικυήρατον) keepeth nothing, so are their gods of wood." See Garden; Cottage.

Cud (גֵּרָה, *gerah'*, *rumination*), the pellet of half-chewed food brought up from the first stomach of ruminant animals to be thoroughly masticated (Lev. xi, 3–7, 26; Deut. xiv, 6–8). See Clean (animals).

Cudworth, Ralph, an eminent English divine and philosopher, was born at Aller, Somersetshire, in 1617, and entered Emmanuel College, Cambridge, in 1630, became M.A. 1639, rector of N. Cadbury 1641, and master of Clare Hall 1644. In 1645 he became professor of Hebrew; in 1654, master of Christ Col-

lege; in 1662, vicar of Ashwell; and in 1678, prebendary of Gloucester. He died in 1688. Cudworth was a Platonist, of "great strength of genius and vast compass of learning." His reputation as a writer rests chiefly on his *True Intellectual System of the Universe*, which appeared in 1678 as the first part of a still greater work which he never completed. It is a defence of human liberty, and of belief in God, against fatalism and atheism. Cudworth describes three false systems or hypotheses of the universe in the preface: "Of the three fatalisms or false hypotheses of the universe mentioned in the beginning of this book, one is absolute atheism, another immoral theism, or religion without any natural justice and morality (all just and unjust, according to this hypothesis, being mere thetical or factitious things, made by arbitrary will and command only); the third and last such a theism as acknowledges not only a God or omnipotent understanding Being, but also natural justice and morality, founded in him, and derived from him; nevertheless, no liberty from necessity anywhere, and therefore no distributive or retributive justice in the world." Before erecting the true intellectual system of the universe (the epithet *intellectual* being used, as he tells us, "to distinguish it from the other, vulgarly so called, systems of the world, that is, the visible and corporeal world, the Ptolemaic, Tychonic, and Copernican"), it was his object to demolish these false systems. And the first of them, atheism, or the atheistic fate, is demolished in the first part of the "Intellectual System." It is a work of great learning and acuteness. In attacking the atheistic faith, Dr. Cudworth describes the atomic physiology, which, as held by Democritus, and other ancient philosopers, involved atheism. For the better confutation of other forms of atheism, to which he gives the names Hylozoic and Cosmo-plastic, he makes the hypothesis of an "artificial, regular, and plastic nature," working in complete subordination to the Deity. And to avert an argument brought against the oneness of the Deity, from its unnaturalness as shown by the general prevalence of polytheism among the pagan nations, he contends that "the pagan theologers all along acknowledged one sovereign and omnipotent Deity, from which all their other gods were generated or created," and that their polytheism was but a polyonymy of one God. The *Treatise on Eternal and Immutable Morality* corresponds to the second part of the *Intellectual System*. It is directed against Hobbes and those who, with him, "affirm justice and injustice to be only by law, and not by nature." Besides the *Intellectual System*, Cudworth published, 1. *A Discourse concerning the true Notion of the Lord's Supper*, in which he maintains, as Warburton has since maintained, that the Lord's Supper is a feast upon a sacrifice:—2. *The Union of Christ and the Church Shadowed:*—3. *A Sermon on John ii*, 3, 4, preached in 1647 before the House of Commons:—4. *A Sermon preached in* 1664 *at Lincoln's Inn on* 1 *Cor. xv*, 57:—5. *Deus Justificatus against the Assertors of absolute and unconditional Reprobation.* He left several works in MS., only one of which has yet been published, namely, the *Treatise concerning Eternal and Immutable Morality* (1731). The rest are, 1. *A Discourse of Moral Good and Evil:*—2. *A Discourse of Liberty and Necessity, in which the Grounds of the Atheistical Philosophy are confuted, and Morality vindicated and explained:*—3. *A Commentary on Daniel's Prophecy of the Seventy Weeks:*—4. *Of the Verity of the Christian Religion against the Jews:*—5. *A Discourse of the Creation of the World and Immortality of the Soul:*—6. *A Treatise on Hebrew Learning:*—7. *An Explanation of Hobbes's Notion of God, and of the Extension of Spirits.* These MSS. are now in the British Museum. In 1733 a Latin translation of the *Intellectual System* was published by Mosheim (Lugd. Bat. 2 vols. 4to). The best ed. of the English work is Harrison's (London, 1845, 3 vols. 8vo, with index). A good and cheap edition is that of Andover (1837, 2 vols. 8vo), which includes all the published writings of Cudworth, but has no index. See Birch, *Life of Cudworth* (prefixed to most editions of his works); *Engl. Cyclopœdia;* Mackintosh, *Ethical Philosophy*, p. 73.

Cujacius (properly *De Cujas*), JACQUES, a distinguished teacher of canon law, was born in 1522, at Toulouse. He became in 1554 a professor of law at Cahors, in 1555 at Bourges, in 1567 at Valence, and in 1575 again at Bourges. The civil war in France induced him shortly after to go to Paris, where he also received permission to give lectures on law. In 1577 he once more returned to Bourges, where he thenceforth remained, notwithstanding the most profitable offers from the University of Bologna. He died Oct. 4, 1590. Cujacius was the most famous teacher of the Roman law in the sixteenth century, and his reputation attracted large numbers of students from all countries of Europe. He corrected numerous passages of the Roman law-books from the more than 500 manuscripts which he had collected, and a great many obscure points were by him for the first time elucidated. He gained the love of the thousands of his pupils to a rare degree by the affectionate attention which he paid to the welfare of each. From the theological controversies of his time he cautiously abstained, though he was always a steadfast adherent of the cause of Henry IV. In his will he referred his wife and his daughter to the letter of the pure Bible, without note or comment, as the sole rule of their faith. He published himself a collection of his works (Paris, 1577), which, however, is not complete. The editions by Colombet (Paris, 1617 and 1634) does likewise not contain all the works of Cujacius. A complete edition was prepared by Fabroti (Paris, 1658, 10 vols.), which has several times been reprinted, with some additions (latest edition, Prato, 13 vols. 1836). A life of Cujacius was published in 1590 by Papyrius Masson, but the best account of Cujacius is by Saint Prix (appendix to his work *Histoire du droit Romain*, Paris, 1821; an extract from this, in German, by Spangenberg, *Cujacius u. seine Zeitgenossen*, Leipz. 1822).—Brockhaus, *Conversations-Lex.* s. v.; Wetzer u. Welte, *Kirch.-Lex.* ii, 933.

Culbertson, MATTHEW SIMPSON, D.D., a Presbyterian minister and missionary, was born at Chambersburgh, Pa., Jan. 18, 1819, and was educated at the Military Academy, West Point. While serving as lieutenant of artillery he made a religious profession, and went to the Theological Seminary at Princeton, where he graduated in 1844. In that year he was licensed and ordained as missionary to China. He labored, together with Bridgeman, for several years in preparing a revised translation of the Scriptures in Chinese; and wrote *Darkness in the Flowery Land, or Religious Notions and Popular Superstitions in North China* (N. Y. 1857, 12mo). He died of cholera, August, 1862.—Wilson, *Presb. Almanac*, 1863, p. 163.

Culdees. The name Culdee is variously derived and explained by several different authorities. Ebrard gives "Kile De"—"man of God;" Dr. Braun, "Gille De"—"servant of God." But the latest, and perhaps best authority, gives us *Cuildich* as the only name of the Culdees known among native Celts. This word means "a secluded corner;" a Culdee, therefore, is "the man of the recess." This accurately enough describes the Culdees' mode of life; though not monks, they were in a certain sense recluses.

The Scottish Church, when it first meets the eye of civilization, is not Romish, nor even prelatical. When the monk Augustine, with his forty missionaries, in the time of the Saxon Heptarchy, came over to Britain under the auspices of Gregory, the bishop of Rome, to convert the barbarian Saxons, he found the northern part of the island already well-nigh filled with Christians and Christian institutions. These Chris-

tians were the Culdees, whose chief seat was the little island of Hi or Iona, on the western coast of Scotland. An Irish presbyter, Columba, feeling himself stirred with missionary zeal, and doubtless knowing the wretched condition of the savage Scots and Picts in the year 565, took with him twelve other missionaries, and passed over to Scotland. They fixed their settlement on the little island just named, and from that point became the missionaries of all Scotland, and even penetrated into England. Before the end of the 6th century they had filled the country with their institutions, and subjected it, at least nominally, to Christ. Invited to England by Oswald, king of Northumberland, to preach the Gospel to his people, they sent Corman, who failed because of too great austerity of behavior, and then Aidan, who, without knowing the people's language, succeeded, and proved himself one of the noblest of missionaries. The people in the south of England converted by Augustine and his assistants, and those in the north who had been won by Culdee labor, soon met, as Christian conquest advanced from both sides; and when they came together, it was soon seen that Roman and Culdee Christianity very decidedly differed in a great many respects. The Culdees, for the most part, had a simple and primitive form of Christianity, while Rome presented a vast accumulation of superstitions, and was arrayed in her well-known pomp. The result was, that in England the Culdee soon gave place to the Roman, and retired to his Northern home. Columba no doubt chose the little island of Iona as a place of safety from barbarian attack, as also because it was near to Ireland, whence he had brought his divine message. Besides, the loneliness of a small island in the sea was favorable to meditation, and accorded with the ascetic tendencies which at least *touched* the best men of those ages. The institution set up by Columba has been called a monastery, but, in truth, it had no claim to that name. True, the members of the community lived in cells, to which they retired for devotion and study, but this no more made them monks than a similar life makes monks of theological students of our own day. The Culdee recluses were not pledged to celibacy; many of them were married; many of them were succeeded in office by their own sons; they were not dedicated for life to their calling, but were free at any time to change it for another. Their families did not live within the sacred enclosure, but the husbands, their work within being done, passed out to spend the rest of their time with their families. Nor, indeed, was the aim of the institution at all kindred to that of monachism. The monk generally retires for his own improvement solely; he is weary of the world, and will have no more contact with it. He renounces it. The Culdee went to Iona that in quiet, with meditation, study, and prayer, he might fit himself for going out into the world as a missionary. Indeed, Iona was a great mission institute, where preachers were trained who evangelized the rude tribes of Scotland in a very short time. To have done such a work as this in less than half a century implies apostolic activity, purity, and success. With the exception of the principal men, they must have been much more out of their cells than in them. Traces of the schools and churches they established are found all over Scotland. The reason of this freedom from Romish asceticism may be found, at least in part, in the doctrines of these men. They had no dogma of purgatory, no saint worship, no works of supererogation, no auricular confession, or penance, or absolution; no mass, no transubstantiation, no "chrism" in baptism, no priesthood, and no third order (bishops). They knew nothing of any authoritative rule except the Holy Scriptures. "These were held to be the one standard of truth, and were made by the missionaries a subject of close and constant study. Columba's own home work and that of his disciples was transcribing the Scriptures. These early missionaries were thoroughly Biblical. Columba's life by Adamnan represents him in almost every page as familiar with the Word of God, and ready to quote it on all occasions as of supreme authority." . . . "The great subject of their teaching was the simple truth of the Gospel of salvation. It was '*verbum Dei*,' the Word of God. Adamnan says of Columba that from his boyhood he was instructed in the love of Christ." "The spirit of the Culdean Church may suitably and rightfully be described as an evangelical spirit, because it was free and independent of Rome; and when it and the papal Church came into contact, it always and obstinately repudiated its authority, under appeal to the single and supreme authority of holy Scripture; but, above all, because in its inner life it was penetrated throughout by the main principles of the evangelical Church. The Culdees read and understood the Scriptures in their original texts. Wherever they came they translated them orally and in writing into the language of the country, explaining them to the inhabitants, exhorting them to diligent and regular Bible reading. But the Scriptures were more to them than a codex of authoritative doctrines of faith. They were the living word of Christ. In the most earnest manner they preached the natural, inborn inability of man for good; the atoning death of Christ; justification without all merit of works; the worthlessness, especially, of all mere outward works; and the necessity of the new birth" (Ebrard). These views of life and doctrine reveal sufficiently the reason why the Culdees were missionaries rather than monks. The truths of the Gospel, pure and simple, just as they warmed the hearts of the apostles, had possession of them, and all their work was to make men feel and accept them. Their theory of Church government was very simple. The institution at Iona was under the presidency of a presbyter called a presbyter abbot, who had associated with him twelve other presbyters. In case of a vacancy in the headship, these brethren elected their abbot. That he was a presbyter simply there can be no doubt. Bede, who belonged to the Romish Church, himself mentions it as a very strange thing "that a man who is merely a presbyter should govern a diocese, and have even bishops under him." The truth is, that the missionaries sent out from these Culdee seminaries were appointed and ordained pastors of the churches they founded; and the pastor of the church was the overseer of it, i. e. the bishop. The presbyter abbot, therefore, had ordained an elder, but, by appointment to a parish, had made him a bishop. They evidently knew nothing of the distinction between the order of presbyter and that of bishop. After the success of Augustine and his monks in England, the Culdees had shut themselves up within the limits of Scotland, and had resisted for centuries all the efforts of Rome to win them over. At last, however, they were overthrown by their own rulers. Margaret, the daughter of William the Conqueror, the queen of Malcolm Canmore, devoted to the cause of Rome, notable for piety, of powerful mind and skilful in the management of others, set her heart upon exchanging the Culdee for the Romish Church in Scotland. She got the Culdee presbyters together, and for three days discussed the matter with them in person. She succeeded by persuasion and artifice. This was in the latter part of the 11th century. It was not, however, till the 13th century that Culdeeism was completely overturned and Romanism established. Nay, it is more than probable that Culdeeism, with its simple and powerful Gospel influence, continued to live in the hearts of the people long after its forms and public ministrations had been buried beneath the finery of triumphant Romanism. There was a readiness among the Scotch to embrace the Reformation when it came, which, together with their sturdy evangelical character, reminds the historical reader of Culdeeism.

Culon (Κουλόν v. r. Κουλόμ, Jerome *Caulon*), the fifth named of the group of eleven cities added by the Septuagint to those in the mountains of Judah (between ver. 59 and 60 of Josh. xv); thought to be the modern *Kulonieh*, a trace of which appears in the notice of the Crusades (Wilken, *Gesch. der Kreuz.* iv, 509), a village with ruins about 1½ h. W. of Jerusalem towards Jaffa (Van de Velde, *Memoir*, p. 305); but, as this lay beyond the border of Judah (Schwarz, *Palest.* p. 118), the authenticity of the names in the Sept. being, moreover, dubious (Wilson, *Bible Lands*, ii, 266 n.), the place perhaps only represents some station or *Colonia* of the Romans (Robinson, *Later Res.* p. 158).

Cultus. See WORSHIP.

Culverwell, NATHANIEL, M.A., a pious and learned writer. He was fellow of Emmanuel College, Cambridge, and died about 1650. We have of him an *Elegant and learned Discourse on the Light of Nature* (on Prov. xx, 27), with several other treatises (Lond. 1661, 4to). The *Light of Nature* abounds in striking thoughts, and has passages of rare eloquence.

Cumānus, VENTIDIUS, procurator of Judæa immediately next to Alexander (a short time after Fadus), and partly in conjunction with Felix (q. v.), B.C. 49–53; under his administration the commotions broke out that led eventually to the final war with the Romans (Josephus, *Ant.* xx, 5, 2 and 3; 6, 1–3; *War*, ii, 12, 1–7).

Cumberland, RICHARD, D.D., bishop of Peterborough, a learned divine and archæologist, was born in London in 1632, and was educated at St. Paul's School, and Magdalen College, Cambridge. He was made rector of Brampton, and in 1667 vicar of All Hallows, Stamford. In 1691 he was raised to the see of Peterborough without any solicitation on his part. He was previously known by his treatise *De Legibus Naturæ* (Lond. 1672, 4to), in answer to Hobbes, and by his *Essay on Jewish Weights and Measures* (London, 1686, 8vo). He was indefatigable in performing his episcopal duties. Being advised, on account of his age and infirm state, to relax a little, he replied, "It is better to wear out than rust out." After his death appeared his *Origines Gentium* (Lond. 1724, 8vo), and his translation of *Sanchoniatho's Phœnician History* (London, 1720, 8vo). At the age of eighty-three, Dr. Cumberland, having been presented by Dr. Wilkins with a copy of his Coptic Testament, then just published, commenced, like another Cato, the study of Coptic. "At this age," says Mr. Payne, "he mastered the language, and went through great part of this version, and would often give me excellent hints and remarks as he proceeded in reading of it." He died Oct. 9, 1718. Cumberland's theory of morals is set forth in his treatise *De Legibus Naturæ*. Tendency to effect the general good is made the standard of morality. To endeavor to effect the greatest amount of general good is the one great duty, or the one great "law of nature;" and we know, according to Cumberland, that it is a duty or law of nature, or law of God, because we know that an individual derives the greatest happiness from the exercise of benevolence, and that God desires the greatest possible happiness of all his creatures. Carrying out the fundamental principle that the greatest general good is to be sought, he deduces the several particular duties or particular "laws of nature." He founds government upon, and tests it by the same principle. An abridged translation of the work was published by Tyrrel in 1701. Maxwell, an Irish clergyman, published a translation in 1727. Barbeyrac published a French version in 1744. A third English translation, by the Rev. John Towers, D.D., appeared in 1750. On Cumberland as a moralist, see Mackintosh, *Hist. of Ethical Philosophy*, p. 70; Whewell, *Hist. of Moral Philosophy*, p. 52.

Cu'mi (κοῦμι), a mode of Græcizing the Heb. imperative קוּמִי (*ku'mi*), signifying *rise*, as it is immediately explained (Mark v, 41).

Cumin (כַּמּוֹן, *kammon'*, lit. a *condiment*, from its use; Greek κύμινον; and names of similar sound in all the Oriental dialects) is an umbelliferous plant, mentioned both in the Old and New Testaments, and, like the dill and the coriander, continues to be cultivated in modern as it was in ancient times in Eastern countries (Pliny, xix, 47). These are similar to and used for many of the same purposes as the anise

Cumin (*Cuminum Cyminum*), with enlarged view of the Flower, Capsule, and semisection of the last.

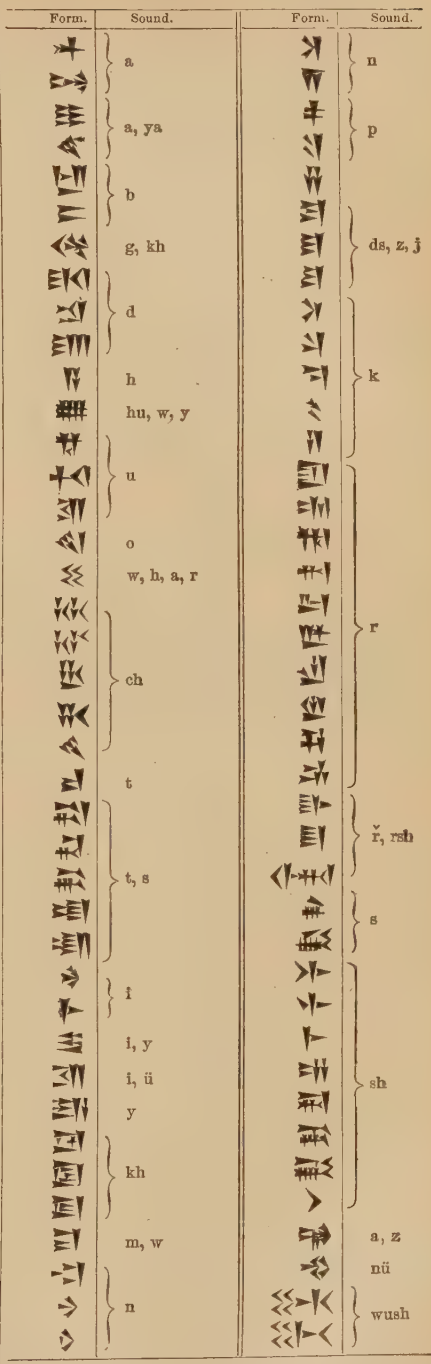
and caraway, which supply their place, and are more common in Europe. All these plants produce fruits, commonly called seeds, which abound in essential oil of a more or less grateful flavor, and warm, stimulating nature; hence they were employed in ancient as in modern times both as condiments (Pliny, xix, 8; Apicius, i, 32; iii, 18; Polyæn. iv, 3, 32) and as medicines (Mishna, *Shabb.* xix, 2). A native of Upper Egypt and Ethiopia, it is still extensively cultivated in Sicily and Malta. It would appear to have been a favorite herb among the Hebrews, and as late as the last century it retained a place of some importance in pharmacy (see Ehrmann, *De cumino*, Argent. 1733). Cumin is first mentioned in Isaiah (xxviii, 25): "When he (the ploughman) hath made plain the face thereof, doth he not cast abroad the fitches, and scatter the *cumin?*" showing that it was extensively cultivated, as it is in the present day, in Eastern countries, as far even as India. In the south of Europe it is also cultivated to some extent. In the above chapter of Isaiah (ver. 27) cumin is again mentioned: "For the fitches are not threshed with a threshing instrument, neither is a cart-wheel turned about upon the *cumin;* but the fitches are beaten out with a staff, and the *cumin* with a rod." This is most applicable to the fruit of the common cumin, which, when ripe, may be separated from the stalk with the slightest stroke, and would be completely destroyed by the turning round of a wheel, which, bruising the seed, would press out the oil on which its virtues depend (see Dioscor. iii,

68). In the New Testament, cumin is mentioned in Matt. xxiii, 23, where our Saviour denounces the Scribes and Pharisees, who paid their "tithe of mint, and anise, and *cumin*," but neglected the weightier matters of the law. In the Talmudical tract *Demai* (ד, 1) cumin is mentioned as one of the things regularly tithed. (See Celsii *Hierob.* i, 516; *Penny Cyclop.* s. v.) See AROMATICS.

Cumming, ALEXANDER, a Congregational minister, native of Freehold, N. J., was born 1726. He entered the ministry 1747, and was made colleague pastor of the Presbyterian Church in New York, Oct. 1750. Owing to troubles in the Church, both pastors requested to be dismissed by a committee of the Synod in 1753, and Mr. Cumming was relieved Oct. 25, 1753. He was ordained collegiate pastor with Dr. Sewall, of the Old South Church, Boston, Feb. 25, 1761, where he remained until his death, Aug. 25, 1763. He published his ordination sermon at Boston (1761), and *Animadversions on Rev. Mr. Croswell's late Letter*, etc. (1763).—Sprague, *Annals*, i, 462.

Cuneïform (*wedge-shaped*) or ARROW-HEADED INSCRIPTIONS, is the name now generally applied to those angular letters first found engraved on Persepolitan relics (see Ker Porter's *Travels;* Rich's *Memoir*), and lately in great abundance stamped on Babylonian bricks [see BRICK], and carved on the Assyrian monuments. See ASSYRIA. The most copious collections of these legends are contained in the great works on the Ninevite antiquities by Botta and Flandin (*Monuments de Nineve*, Par. 1847, sq.), and by Layard (*Assyrian Inscriptions*, Lond. 1851), and more lately those of Loftus (*Inscriptions from the Ruins of Susa*, Lond. 1852); a considerable collection is also given by Rich (*Memoir on Bab.* Lond. 1839). The character is the simplest and earliest known, and was in common use by the Medes, Persians, Assyrians, and Chaldæans in the most ancient times. Like the Egyptian hieroglyphics, or rather *hieratic*, it seems to have been chiefly employed in monumental inscriptions, there being doubtless another form (like the *demotic*) better adapted to common use. It appears to have fallen into disuse when, on the fall of Babylon under Alexander, these mighty empires ceased to have any great national annals to record. Within the past eighty years the first specimens found their way into Europe from the fragments of Persepolis, and at length engaged the attention of several German philologists, especially Tyschen; but Dr. Grotefend, of Hanover, was the first who obtained any clew to their decipherment (see Vaux's *Nineveh and Persepolis*, p. 391 sq.). According to him, this mode of writing is formed of two radical signs, the *wedge* and the *angle*, susceptible, however, of about thirty different combinations; and consists of three varieties, the Persian, the Median, and the Assyrian, distinguished from each other by a greater or less complication of the characters, the last being the most elaborate: others make still further subdivisions, e. g. the Achæmænian, Babylonian, Medo-Assyrian, Elymæan, Scythian, Arian, etc. The whole of each alphabet, however, is obviously reducible to a single element, the wedge, which is found either singly or in groups of two, three, or more, and placed vertically, horizontally, or obliquely, in the several characters. It is evidently of Asiatic origin, is written from right to left, and is alphabetic. (See an elucidation of the process of deciphering these letters by Layard, *Nineveh*, ii, 134 sq.) The other great laborer in this field of discovery is Col. Rawlinson, of England, who has so completely succeeded in confirming and extending the results arrived at by others, that the meaning of these inscriptions, with the exception of the exact rendering of some of the proper names, may now be said to be established beyond dispute. (See his *Commentary on the Cuneiform Inscriptions*, read before the Roy. As. Soc., and published in a separate

Assyrian Cuneiform Alphabet.



form, Lond. 1850.) Dr. Hincks has also successfully prosecuted these inquiries. (See his papers in the *Transactions* of the Roy. Irish Acad. vol. xxii.) The inscriptions are usually trilingual as well as triliteral, the alphabets and entire structure differing in each version. See BEHISTUN. The language is Shemitic, but corresponds with neither the Hebrew, Chaldee, Syriac, nor Arabic, as they have come down to us. The inscriptions of various periods and at different places differ considerably in their form and diction.

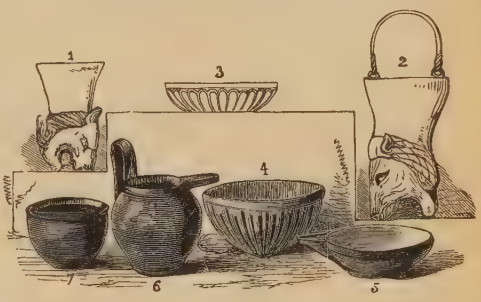
Cunigunda, wife of Henry of Bavaria, who afterwards became emperor. She was crowned with her husband by pope Benedict VIII, A.D. 1014. According to the Roman *Acts of the Saints*, she had made a vow of virginity, and her husband suspecting her fidelity, she "walked over red-hot ploughshares without being hurt," and thus vindicated her innocence! She died March 3, 1040, and was canonized in 1200 by Innocent III. The Romish legends tell of many miracles wrought at her tomb.—Butler, *Lives of Saints*, March 3.

Cunningham, William, D.D., an eminent minister of the Free Church of Scotland, was born in October, 1805, and was fully identified with all the movements and controversies which led to the disruption of the Church of Scotland. He received at the hands of the Free Church all the honors in their gift, and was moderator of the Assembly in 1859. At the time of his death he was principal of the college of the Free Church of Scotland. After the disruption he visited America, where his eloquence and intellectual power enabled him to enlist the sympathies of a large portion of the churches, and to secure an

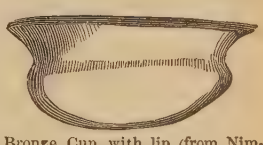
amount of material aid at that time greatly needed by the Free Church. He died at his house in Edinburgh, Scotland, December 14, 1861. His principal writings were collected after his death by his literary executors, as follows, viz., *The Reformers, and the Theology of the Reformation* (Edinb. 1862, 8vo); *Discussions of Church Principles* (Edinb. 1863, 8vo); *Historical Theology* (Edinb. 1864, 2 vols. 8vo). The first two works consist chiefly of Dr. Cunningham's Review articles; the last, of his lectures in the Free Church College. They manifest large learning, great grasp of theological science, both historical and doctrinal, and a thoroughly evangelical spirit. In regard to Church government, Dr. Cunningham was a Presbyterian, "believing that Christ has committed the government of his Church, not to congregations, nor to prelatic bishops, but to presbyters or elders, otherwise called bishops. But, above all, he was a Calvinist, maintaining that man is by nature helplessly lost, and is and can be saved only by the free and sovereign love of God, giving salvation to whom he will, in what manner he will, because he wills it. He will be recognised in history, not as a Free Churchman, nor as a Presbyterian, but as a great Calvinist, occupying a place in his generation such as Calvin and Turretine occupied in theirs. The Calvinistic system Dr. Cunningham holds not provisionally, as a half-way house to some more comprehensive system *in posse*, 'looming in the future,' but definitely, as what has been ascertained to be *the* system revealed in God's Word, *the only possible* exhibition of all the Scripture facts regarding God and man, the only scriptural description of what God actually is, and has done, and is doing, in his relation to rational creatures, and specially in order to man's salvation. He therefore immovably rests in the conviction that no new discovery can be made in theology; that any pretended novelty is either Calvinism under a new form, or some of the old errors in disguise which have been advanced against Calvinism, and which, *as opposed* to Calvinism, are, *ipso facto*, shown to involve a lie."—*Brit. and For. Evangelical Review*, Jan. 1863, p. 193 sq.; Wilson, *Presbyt. Almanac*, 1863, p. 163; *Lond. Quarterly Review*, April, 1863, p. 258; *N. British Review*, Feb. 1863.

Cup (usually כּוֹס, *kos*, prop. a *receptacle;* N. T. ποτήριον, a *drinking vessel*) denotes originally a wine-cup (Gen. xl, 11–21), various forms of which, of different materials, are delineated on the Egyptian and Assyrian monuments. See Wine. The cups of the Jews, whether of metal or earthenware, were possibly borrowed, in point of shape and design, from Egypt and from the Phœnicians, who were celebrated in that branch of workmanship (*Il.* xxiii, 743; *Od* iv, 615, 618). Among the Egyptians the forms of cups and vases were very varied, the paintings upon the tombs representing many of most elegant design, though others are equally deficient in the properties of form and proportion. The forms used during the fourth and other early dynasties (1700 B.C.) continued to be common to a late date (Kenrick, *Egyptians of Time of Pharaohs*, Lond. 1857, p. 48). There are not any representations of cups like the head of an animal (Bonomi, *Nineveh and its Palaces*, 3d edit. p. 215, 216). Many of the Egyptian vases, cups, and bowls were of gold (Herod. ii, 151) and silver (Gen. xliv, 2; comp. Num. vii, 84), some being richly studded with precious stones, inlaid with vitrefied substances in brilliant colors, and even enamelled. In Solomon's time all his drinking-vessels were of gold, none of silver (1 Kings x, 21). Babylon is compared to a golden cup (Jer. li, 7). Assyrian cups from Khorsabad and Nimroud were of gold and bronze (Layard, *Nineveh*, ii, 236; *Nin. and Bab.* p. 161; Bonomi, *Nineveh*, p. 187), as well as of glass and pottery. They were perhaps of Phœnician workmanship, from which source both Solomon and the Assyrian monarch possibly derived both their workmen and the works themselves. The cups and other vessels brought to Babylon by Nebuchadnezzar



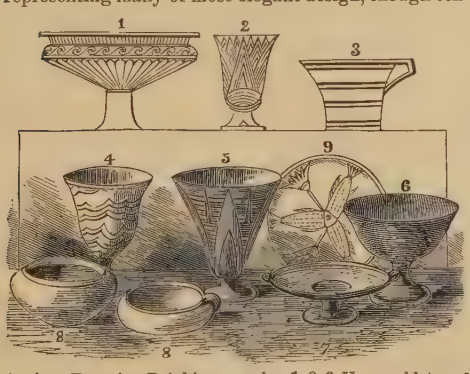
Ancient Assyrian Cups: 1 and 2. Lion-headed (the latter with handle); 3. Sculptured; 4. Red pottery; 5. Painted; 6, 7. Bronze.

may thus have been of Phœnician origin (Dan. v, 2). See Banquet. On the bas-reliefs at Persepolis many figures are represented bearing cups or vases, which may fairly be taken as types of the vessels of that sort described in the book of Esther (Esth. i, 7; Niebuhr, *Travels*, ii, 106; Chardin, *Voyages*, viii, 268, pl. lviii). The great laver, or "sea," was made with a rim like the edge of a cup (*cos*), "with flowers of lilies" (1 Kings vi, 26), a form which the Persepolitan cups resemble (Jahn, *Arch.* § 144). Similar large vases have been found represented at Khorsabad (Botta, pl. lxxvi). The use of gold and silver cups was introduced into Greece after the time of Alexander (Athen. vi, 229, 230; xi, 446, 465; Birch, *Anc. Pott.* ii, 109). The cups of the N. T. (ποτήρια) were often, no doubt, formed on Greek and Roman models. (See Smith, *Dict. of Class. Antiq.* s. v. Patera.) They were sometimes of gold (Rev. xvii, 4).—Smith, s. v.; Fairbairn, s. v. The common Eastern drinking-cup is of brass, and frequently has devices and sometimes sentences from the Koran engraved on the inside (Lane, *Mod. Eg.* i, 222). As the Moslem law, however, forbids the drinking of wine to good Mohammedans, the common beverage in its place is coffee, which is invariably offered to visitors. The coffee (*kahweh*, i. e. the drink) is made very strong, and without sugar or milk. The coffee-cup (which is called *fingan*) is small, generally holding not quite an ounce and a half

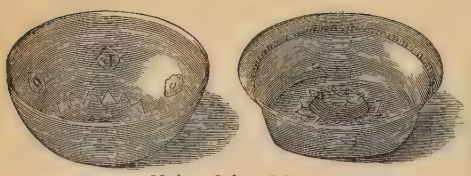


Bronze Cup, with lip (from Nimroud).

Drinking-cup from Pompeii.



Ancient Egyptian Drinking-vessels: 1, 2, 3. Vase, goblet, and cup from paintings; 4. Porcelain; 5. Green earthenware; 6. Coarse pottery; 7. Wood; 8. Arragonite; 9. Saucer of earthenware.



Modern Oriental Cups.

of liquid. It is of porcelain or Dutch-ware, and, being without a handle, is placed within another cup (called *zarf*) of silver or brass, according to the circumstances of the owner, and both in shape and size nearly like an egg-cup. In a full service there are ten *fingans* and *zarfs* of uniform kinds, and often another *fingan* and *zarf* of a superior kind for the master of the house or for a distinguished guest. In the accompanying sketch, the coffee-pot (*bekreg* or *bakrag*) and the *zarfs* and tray are of silver, and are represented on a scale of one eighth of the real size. Below this set are a similar *zarf* and *fingan*, on a scale of one fourth, and a brass *zarf*, with the *fingan* placed in it. Some *zarfs* are of plain or gilt silver filigree, and a few opulent persons have them of gold. Many Moslems, however, religiously disallow all utensils of gold and of silver (Lane, *Mod. Eg.* i, 205). See CUP-BEARER.

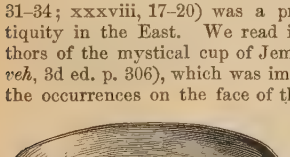
Modern Oriental Coffee-service.

The practice of divining by means of a cup (גָּבִיעַ, *gabi'a*, Gen. xliv, 2–17; a *goblet*, distinguished from the preceding or smaller cups used in drinking; rendered "pot" in Jer. xxxv, 5; spoken of the calix-form "bowls" of the golden candlestick, Exod. xxv, 31–34; xxxviii, 17–20) was a practice of great antiquity in the East. We read in early Persian authors of the mystical cup of Jemshid (Bonomi, *Nineveh*, 3d ed. p. 306), which was imagined to display all the occurrences on the face of the globe (Tieroff, *De Scypho Josephi*, Jen. 1657; Tittel, *id.* Tor. 1727). See DIVINATION. The bronze cup, with the sacred beetle engraved in the bottom, found by Layard among the ruins of Nimroud, may have been used for such a purpose (*Nineveh and Babylon*, p. 157). Κόνδυ, the word used in Gen. by the Sept., occurs in Hipparchus (*ap. Athen.* p. 478, A), and is curiously, like the Indian *kundi*, a sacred Indian cup (Bohlen on *Gen.* p. 403; Kalisch, *Comment.* p. 673). In Isa. xxii, 24, the word translated "cup" is אַגָּן (*aggan'*, literally a trough for *washing* garments), and signifies a *laver* or basin (as it is rendered in Exod. xxiv, 6; "goblet," Cant. vii, 2). The "*cup* of trembling" (סַף, *saph*, elsewhere "basin" or "bowl") signifies a broad convex *dish*, such as is easily made to rock or vibrate. The "cups" referred to in 1 Chron. xxviii, 17, were the קְשָׂוֹת (*kesavoth'*), or broad *bowls* for libation (elsewhere improperly rendered "covers," Exod. xxv, 29; xxxviii, 16; Num. iv, 7). Such vessels appear in the hands of the Assyrian king on the monuments, apparently in festive

Ancient Assyrian Cup of Libation after a Bull-hunt.

or religious drinking after public exploits (Bonomi, *Nineveh*, p. 252). In the Apocrypha we find the sacred vesels of Jehovah called σπονδεῖα, *goblets* (1 Esd. ii, 13. "In their *cups*" 1 Esd. iii, 22, is a rendering for ὅταν πίνωσι, *when they drink*). See BASIN; BOWL; DISH; VASE; VIAL, etc.

"The word 'cup' is used in both Testaments in some curious metaphorical phrases. Such are *the cup of salvation* (Psa. cxvi, 13), which Grotius, after Kimchi, explains as 'poculum gratiarum actionis,' a cup of wine lifted in thanksgiving to God (comp. Matt. xxvi, 27). That it alludes to a paschal *libation* cannot be proved; and that it was understood by the Jews to be expressive of gratitude we may see from 3 Macc. vi, 27, where the Jews offer 'cups of salvation' in token of deliverance. In Jer. xvi, 7 we have the term '*cup of consolation*,' which is a reference to the wine drunk at the περίδειπνα, or funeral feasts of the Jews (2 Sam. iii, 35; Prov. xxxi, 6; Joseph. *War*, ii, 1). In 1 Cor. x, 16, we find the well-known expression '*cup of blessing*' (ποτήριον τῆς εὐλογίας), contrasted (ver. 21) with the '*cup of devils*.' The sacramental cup is called the cup of blessing because of the blessing pronounced over it (Matt. xxvi, 27; Luke xxii, 17; see Lightfoot, *Hor. Hebr.* in loc.). No doubt Paul uses the expression with a reference to the Jewish 'cup of blessing' (כּוֹס שֶׁל בְּרָכָה), the third of the *four* cups drunk by the Jews at their Paschal feast (Schöttgen, *Hor. Hebr.* in 1 Cor.; Jahn, *Bibl. Arch.* § 353), but it is scarcely necessary to add that to this Jewish custom our Lord, in his solemn institution of the Lord's Supper, gave an infinitely nobler and diviner significance (Buxtorf, *De Sacrâ Cœnâ*, § 46, p. 310). Indeed, of itself, the *Jewish* custom was liable to abuse, and similar abuses arose even in Christian times (Augustine, *Serm.* cxxxii, *de tempore;* Carpzov, *App. Critic*, p. 380 sq.). See PASSOVER. In Psa. xi, 5; xvi, 5, 'the portion of *the cup*' is a general expression for the condition of life, either prosperous or miserable (Psa. xxiii, 5). A *cup* is also in Scripture the natural type of sensual allurement (Jer. li, 7; Prov. xxiii, 31; Rev. xvii, 4; xviii, 6). See BANQUET.



Ancient Assyrian Mystical Cup.

"But in by far the majority of passages, the cup is a 'cup of astonishment,' a 'cup of trembling,' the full red flaming wine-cup of God's wrath and retributive

indignation (Psa. lxxv, 8; Isa. li, 17; Jer. xxv, 15; Lam. iv, 21; Ezek. xxiii, 32; Zech. xii, 2; Rev. xvi, 19, etc.). There is, in fact, in the prophets no more frequent or terrific image; and it is repeated with pathetic force in the language of our Lord's agony (Matt. xxvi, 39, 42; John xviii, 11; Mark x, 38). God is here represented as the master of a banquet, dealing the madness and stupor of vengeance to guilty guests (Vitringa in Isa. li, 17; Wichmannshausen, *De iræ et tremoris Calice*, in *Thes. Nov. Theol. Philol.* i, 906 sq.). The cup thus became an obvious symbol of death (*ποτήριον . . . σημαίνει καὶ τὸν θάνατον*, Etym. M.); and hence the Oriental phrase, to 'taste of death,' so common in the N. T. (Matt. xvi, 28; Mark ix, 1; John viii, 52; Heb. ii, 9), in the Rabbis (Schöttgen, *Hor. Hebr.* in Matt. xvi), in the Arabian poem Antar, and among the Persians (Schleusner, *Lex. N. T.*, s. v. *ποτήριον*; Jahn, *Bibl. Arch.* § 203). The custom of giving a cup of wine and myrrh to condemned criminals (Otho, *Lex. Rabb.* s. v. Mors) is alluded to in Matt. xxvii, 34; Mark xv, 22." See Wemyss, *Clavis Symbol.* s. v.; Stier, *Words of Jesus*, i, 378 sq. See CRUCIFIXION.

CUP. See LORD'S SUPPER.

CUP GIVEN TO THE LAITY. See LORD'S SUPPER.

Cup-bearer (מַשְׁקֶה, *mashkeh'*, one *who gives to drink*; so Gr. *οἰνοχόος*, *wine-pourer*; Vulg. *pincerna*), an officer of high rank with Egyptian, Persian, Assyrian, as well as Jewish monarchs. The chief cup-bearer, or butler, to the king of Egypt was the means of raising Joseph to his high position (Gen. xl, 1–21; xli, 9). Rabshakeh, who was sent by Sennacherib to Hezekiah, appears from his name to have filled a like office in the Assyrian court (2 Kings xviii, 17; Gesen. *Thesaur.* p. 1225), and it seems probable, from his association with Rab-saris (*chief of the eunuchs*), and from Eastern custom in general, that he was, like him, a eunuch (Gesen. p. 973). See RABSHAKEH. Herod the Great had an establishment of eunuchs, of whom one was a cup-bearer (Josephus, *Ant.* xvi, 8, 1). Nehemiah was cup-bearer to Artaxerxes Longimanus, king of Persia (Neh. i, 11; ii, 1). Cup-bearers are mentioned among the attendants of Solomon (1 Kings x, 5; 2 Chron. ix, 4; so Achiacharus, Tobit, i, 22). They are frequently represented on the Assyrian monuments (Bonomi, *Nin.* p. 250), always as eunuchs (Layard, *Nin.* ii, 253).

Ancient Assyrian Cup-bearer, with Fan.

Cupboard (*κυλικεῖον*), a place of deposit for vases, dishes, etc. (so Athen. *Deipn.* xi, c. 2, p. 48; Zonaras, *Lex.* col. 1268), e. g. for the royal plate (1 Macc. xv, 32).

Curate, literally one who has the cure (Lat. *cura*, care) of souls, in which sense it is used in the Church of England Prayer-book, "all bishops and curates." In the Church of Rome it was originally appropriated to assistants and vicars appointed by the bishops. It is now generally used to denote the humblest degree of ministers in the Church of England. A curate, in this sense, is a minister employed by the incumbent of a church (rector or vicar), either as assistant to him in the same church, or else in a chapel of ease within the parish belonging to the mother church. He must be licensed and admitted by the bishop of the diocese, or by an ordinary having episcopal jurisdiction, who also usually appoints his salary. Any curate that has no fixed estate in his curacy, not being instituted and inducted, may be removed at pleasure by the bishop or incumbent. But there are *perpetual* curates as well as temporary, who are appointed where tithes are impropriate and no vicarage was ever endowed: these are not removable, and the impropriators are obliged to maintain them. In general, the salaries of curates, certainly the hardest-worked and not the least devoted of the English clergy, are shamefully small, and reform in this matter is urgently required. "This large class of men are absolutely at the disposal of the bishops; they have no security whatever, no rights, no powers; public opinion may protect them to a certain extent, but any bishop who chooses to set public opinion at defiance is absolute over the whole class." —*Church of England Quarterly Review*, April, 1855, p. 25; Chambers, *Encyclop.* s. v.; Hook, *Church Dictionary*, s. v.

Curcellæus, STEPHANUS (*Étienne de Courcelles*), an eminent and learned divine, was born at Geneva in 1586. He studied under Beza at Geneva, and afterwards at Heidelberg. In 1614 he was appointed pastor at Fontainebleau; in 1621, at Amiens; but, on his refusal to subscribe to the canons of Dort (q. v.), he was compelled to resign his pastoral charge. But, yielding to the importunity of friends, he afterwards gave a modified assent to the decrees of Dort, and became pastor at Verrez, in Piedmont, where he remained until 1634. Becoming satisfied that he could not, with a good conscience, serve in a Church which held the doctrine of absolute predestination, he removed to Amsterdam, where he acquired a great reputation among the followers of Arminius. He read lectures in divinity, and succeeded Episcopius (1634) in the professorship of theology in the Remonstrants' College. He had great skill in Greek, as appears by his translation of Comenius's book, *Janua linguarum*, into that language. He applied himself particularly to a critical examination of the Greek of the New Testament, of which he gave a new edition, with many various readings drawn from different MSS. He prefixed a large dissertation to this edition, in which he treats of various readings in general (Amst. 1658 and 1675, 12mo). His large culture and tolerant spirit commended him to his great contemporaries in Holland, Grotius and Uitembogaert, with both of whom he was intimately connected. In the discussion between Amyraut and Du Moulin he intervened, as a sort of arbiter, by his *Advis d'un personnage désintéressé relativement à la dispute sur la prédestination* (Amst. 1638, 8vo). Later he published *Vindiciæ Arminii adv. M. Amyraldum* (1645, 8vo); *Defensio D. Blondelli adv. Maresii Criminationes* (Amst. 1657); *Dissertationes* (Amst. 1659, 8vo). These, and other of his writings (translated into Latin), are given, together with his *Institutio Religionis Christianæ* (an incomplete system of Theology), in *Curcellæi Opera Theologica* (Amstelod. 1675, fol.), with preface by Limborch, and eulogy on Curcellæus by Arnold Poelemburg. Curcellæus died at Amsterdam in 1659. Poelemburg thus characterizes him: "He first of all directed his mind to a search after divine TRUTH; for he thought that this treasure, descending from heaven, should be preferred to all other acquirements. Next, he had all the thoughts of his mind directed to INTEGRITY, because he believed that not even truth could be of benefit to us, unless it brought some strikingly advantageous aid to our piety. Finally, this especially he wished, and for this peculiarly he labored, to unite the Christian body, torn into many and terrible schisms; to compose and conciliate the separate, distracted feelings of various minds; and to teach that not all the doctrines which were alleged as a pretext for causing or cherishing a schism were vital for salvation, and at the same time to show that those things

which had not the weight of necessity by no means sufficed for dividing the Church of Christ. To this all things were to be referred which he meditated, uttered, or performed; for this he refused to subscribe to the famous canons of the synod, because we, whose opinions ought not to be, were condemned; for this he abandoned his loved country, France, and endured many hardships for the sake of mutual toleration; and for this he determined to contest, as if for some divine palladium. He conceded to others as much as he thought should be equally granted to him; demanded that nothing should be conceded to himself from others except what justice, and right reason, and the sacred writings require should be admitted. What is more holy than this proposition, what more salutary, what more necessary for the times? For many contend concerning the truth, and so contend that they never obtain truth, but lose charity. Hence the many disputes in Christendom on slight causes. But what is more disgraceful to us as members of Christ, what more ignominious to Christ as our Head and Leader, than that his seamless coat, and his body, which ought to be united by the closest ties of love, should be torn into a thousand fragments? This, indeed, is the distinction of Remonstrantism; this our crown of glory, because we neither caused this schism, nor consented to any other, nor cherished nor approved any; but we invite and exhort all who love Christ and adhere to his Gospel alone to enter this communion of peace" (see translation of Poelemburg's eulogy in the *Methodist Quarterly Review*, January and April, 1863). The theology of Curcellæus was a modified Arminianism. He held the Grotian view of the atonement, but (see ATONEMENT) set special emphasis upon the sacrificial character of the death of Christ in its reference to God as well as to man, asserting that Christ made satisfaction for sin, but not by enduring the whole punishment due to sinners (*Instit.* lib. v, chap. xviii, xix). As to the Trinity, he held that Christ and the Holy Spirit are divine, but that both Son and Spirit are subordinate to the Father, from whom they receive both existence and divinity (*Instit. Relig. Christ.* lib. ii, cap. xix).—Curcellæus, *Opera* (as cited above); Hagenbach, *History of Doctrines*, ii, § 235, 268; Dorner, *Doctrine of the Person of Christ* (Edinb. transl.), div. ii, vol. ii, 350 sq.; Bull, *Defence of the Nicene Creed* (Lib. of Angl. Cath. Theology), i, 81 sq.

Cure, מַרְפֵּא, *marpè'* (Jer. xxxvi, 6); ἴασις (Luke xiii, 32). From the same Heb. root, רָפָא, *rapha'*, to "heal" or *cure*, is derived רִפְאוּת, *riphuth'*, the art of healing, curing (Prov. iii, 8); and רְפָאוֹת, *rephuoth'*, remedies, medicines (Jer. xlvi, 11; Ezek. xxx, 21). The Scriptures make no mention of physicians before the time of Joseph, and then it is Egyptian, not Hebrew physicians that are spoken of. Indeed, it does not appear that physicians were ever much resorted to among the Hebrews, especially for internal maladies. For wounds, bruises, and external injuries, they had physicians or surgeons who understood dressing and binding them, with the application of medicaments (Jer. viii, 22; xlvi, 11; Ezek. xxx, 21); and the Levites, it seems from Lev. xiii, 14; Deut. xx, 2, had peculiar duties assigned them, which rendered it necessary they should know something of the art of medicine. The probable reason of king Asa's not seeking help from God, but from the physicians, was, that they had not recourse to the simple medicines which nature offered, but to certain superstitious rites and incantations; and this, no doubt, was the ground of the reflection cast upon him (2 Chron. xvi, 12). The balsam, or balm of Gilead, was particularly celebrated as a medicine (Gen. xxxvii, 25; xliii, 11; Jer. viii, 22; xlvi, 11; li, 8). That mineral baths were deemed worthy of notice, and perhaps from ancient times, we know from Josephus. See CALLIRHOË. Although there can be no doubt that there were physicians in the country when our Saviour appeared in Palestine, it is evident that the people placed but little confidence in them (Mark v, 26; Luke viii, 43). The Egyptian physicians, on the other hand, were highly esteemed. We first read of them as being commanded by Joseph to embalm the body of his father Jacob (Gen. l, 2). Pliny states that, during the process of embalming, certain examinations took place, which enabled them to study the disease of which the deceased had died. Wilkinson observes (*Anc. Egypt.*, 2d ser., ii, 460 sq.), "These examinations appear to have been made in compliance with an order from the government, as, according to Pliny (xix, 5), the kings of Egypt had the bodies opened after death to ascertain the nature of their diseases, by which means alone the remedy for phthisical complaints was discovered. Indeed, it is reasonable to suppose that a people so far advanced as were the Egyptians in knowledge of all kinds, and whose medical art was so systematically arranged that they had regulated it by some of the very same laws followed by the most enlightened and skilful nations of the present day, would not have omitted so useful an inquiry, or have failed to avail themselves of the means which the process adopted for embalming the body placed at their disposal. And nothing can more clearly prove their advancement in the study of human diseases than the fact of their assigning to each his own peculiar branch, under the different heads of oculists, dentists, those who cured diseases in the head, those who confined themselves to intestinal complaints, and those who attended to secret and internal maladies. Their knowledge of drugs, and of their effects, is sufficiently shown by the preservation of the mummies, and the manner in which the intestines and other parts have been removed from the interior. And such is the skill evinced in the embalming process, that every medical man of the present day, who witnesses the evidence derived from such an examination of the mummies, willingly acquiesces in the praise due to the ability and experience of the Egyptian embalmers." See EMBALMING. There is reason to believe that the ancient Egyptians encouraged, or at least profited by, the growth of many wild plants of the desert, which were useful for medicinal purposes. Many of them are still known to the Arabs, as the *Salvadora Persica*, *Heliotropium inebrians*, *Lycium Europæum*, *Scilla maritima*, *Cassia Senna*, *Ochradenus baccatus*, *Ocimum Zatarhendi*, *Linaria Ægyptiaca*, *Spartium monospermum*, *Hedysarum Alhagi*, *Santolina fragrantissima*, *Artemisia Judaica* (*monosperma* and *inculta*), *Inula undulata* and *crispa*, *Cucumis Colocynthis*, etc.; and many others have probably fallen into disuse from the ignorance of the modern inhabitants of the country, who only know them from the Arabs, by whom the traditions concerning their properties are preserved. From what Homer tells us of "the infinity of drugs produced in Egypt" (*Odys.* ii, 229), the use of "many medicines," mentioned by Jeremiah, ch. xlvi, 11, and the frequent allusion by Pliny to the medicinal plants of that country, we may conclude that the productions of the desert (where those herbs mostly grew) were particularly prized. See MEDICINE. The art of medicine was very ancient in Egypt, and some writers have supposed that Moses, having been instructed in all the learning of the Egyptians, must have known the chief secrets of medicine, a fact which they also infer from his accurate diagnosis, or indications concerning diseases. Though the Arabian physicians were in the Middle Ages the most skilful of their class, medical art in the East has long sunk into mere empiricism and merited contempt. It is, indeed, in the estimation of the common people, of far less utility than the employment of charms for the recovery of health, and is never resorted to till this means has failed. Roberts informs us, "Physicians in England would be perfectly astonished at the numerous kinds of medicine which are administered to a patient in India. The people themselves are unwill-

ing to take one kind for long together, and I have known a sick woman swallow ten different sorts in one day. Should a patient, when about to take his medicine, scatter or spill the least quantity, nothing will induce him to take the rest; it is a bad omen; he must have the nostrum changed. The people of the East give a decided preference to external applications; hence, when they are directed to 'eat' or 'drink' medicine, they ask, Can they not have something to apply outside? For almost every complaint a man will smear his body with bruised leaves or saffron, or ashes of certain woods or oils, and he professes to derive more benefit from them than from those medicines which are taken internally; at all events, he knows they cannot do him so much harm. It ought to be observed that they do not attach any miraculous effects to the being 'anointed with oil.'" See DISEASES; PHYSICIAN.

Cureton, WILLIAM, D.D., an eminent English divine and Orientalist, was born in 1808, and educated at Christ Church, Oxford. He was ordained priest in 1834, and was for a time sub-librarian of the Bodleian. In 1837 he became assistant keeper of the MSS. in the British Museum, which post he retained till 1849, when he was appointed to a canonry of Westminster and to the attached rectorship of the parish of St. Margaret's. Two years before that date he had been appointed chaplain in ordinary to the queen. He was also a Fellow of the Royal Society, an honorary D.D. of Halle, corresponding member of the Institute of France, and member of the Asiatic Society of Paris, the Oriental Society of Germany, and many other Continental societies. These honors he owed to his great reputation as an Orientalist, and especially as a Syriac scholar. This reputation was formed by his publications while an official in the British Museum. His *Corpus Ignatianum*, an edition of an ancient Syriac version of the Epistles of St. Ignatius, with commentaries thereon, was published in 1845, and gave rise to an interesting controversy. Among his subsequent works were an edition of a palimpsest of parts of Homer found in an Eastern convent, and his *Spicilegium Syriacum*, published in 1855. He was understood to be engaged on some work connected with St. Matthew's Gospel at the time of his death, June 17, 1864.

Curia Romāna, in the narrower sense, a collective appellation of all the authorities in Rome which exercise the rights and privileges enjoyed by the pope as supreme bishop of the Roman Catholic Church; in a wider sense, the collective appellation of all officers and authorities which assist the pope both in his secular and spiritual rule, or belong in any way to his retinue. In the following article we speak only of those authorities which assist the pope as supreme bishop, and in the papal court.

I. *Judicial Authorities.*—They are the following: 1. The *Rota Romana* (Italian, *Ruota Romana*), the supreme Court of the Roman Catholic Church, and in particular the highest court of appeal. See ROTA ROMANA. 2. The *Signatura Justitiæ*. It decides on the admissibility of appeals to the Rota, and consists of a cardinal as president (præfectus), seven (formerly twelve) voting prelates, some referendaries who prepare the reports on law cases, and have, with regard to them, a decisive vote. An *Auditor* of the Rota decides what matter may be brought before the Rota, and decides various preliminary questions; but appeal may be taken from his decisions to the full court of the *Signatura*. The decisions of the Signatura are signed by the pope with the word *Fiat*, or, in the presence and by order of the pope, by a cardinal, with the formula *Concessum in præsentia Domini nostri Papæ*. 3. The *Signatura gratiæ* decides on those cases on which a decision is expected from the personal grace of the pope, and which on that account must be expedited more promptly. The pope himself presides in this college, which consists of cardinals appointed by him. The cardinal penitentiary, the secretary of the briefs, and the prefect of the dataria, belong to it in virtue of their office. The reports are made by three referendaries. The members have only a consultative vote. The pope alone decides, and signs personally all decisions.

II. *Boards of Administration.*—These are as follows: 1. *Secretaria Apostolica.* To it belong the *cardinal secretary of memorials*, who has to receive and report on all memorials not belonging to any other board, and the *cardinal secretary of briefs* (*cardinalis a secretis brevium*), who has to draw up certain papal briefs, which he signs and seals with the fisher's ring. This office is now part of the bureau of the *cardinal secretary of state for foreign affairs*, the leading officer of the papal government, who conducts the negotiations on Church affairs with all the foreign governments. The nuncios and other diplomatic agents of the papal government are his subordinates, receive from him his instructions, and have to report to him on the condition of the Church in those states to which they have been sent. His office employs a large number of clerks. In important questions he consults extraordinary "congregations," and even the regular congregation of ecclesiastical affairs. He reports to the pope on indulgences, on dispensations from the *defectus ætatis*, *natalium*, *interstitiorum*, and on *holy days*. 2. The *Dataria Apostolica* was formerly a board of expedition, but in the course of time has become an independent board of administration. Its president is called *datarius*, and if he is—as is usually the case—a cardinal, *prodatarius*. It has its name from the common subscription, *Datum apud Sanctum Petrum*. Within the jurisdiction of the *Dataria* belong the granting of certain privileges, of dispensations from certain cases of consanguinity, etc. Among the officers of the *Dataria* is the *officialis ad obitum*, to whom belongs the management of those ecclesiastical benefices which become vacant in consequence of the deaths of their occupants. The Datarius, after obtaining the consent of the pope, signs *Annuit Sanctissimus*. 3. The *Cancellaria Apostolica* (Apostolical Chancellory) issues bulls or briefs on all important subjects which have been transacted in the Consistory or in the *Dataria*. Its chief is a *cardinal vice-chancellor*, the name *vice*-chancellor having originated in the fact that formerly (until the thirteenth century) the honorary dignity of chancellor was conferred upon some foreign prelate, and having been retained since, although from that time the presidency of the Chancellory has always been vested in a cardinal. 4. The *Camera Apostolica* (the Apostolical Chamber) has the administration of the papal revenues. Its president is a cardinal chamberlain (camerarius or camerlengo). The ecclesiastical revenues having been greatly reduced in the course of time, the chief business of the Apostolical Chamber is the administration of the finances of the papal territory. 5. The *Pœnitentiaria Romana* (Penitentiary) acts in all cases of absolutions and dispensations which are reserved to the pope; as regards dispensations, however, only in secret cases, or *in foro interno*. The president of the board is a cardinal, who has the title *Pœnitentiarius Major*.

III. *The Papal Court, or the so-called "Papal Family" (Famiglia Pontifica).*—It comprises the officers on service who live in the papal palace (*palatini*), besides a large number of honorary members. Among them are: 1. The *cardinales palatini*; namely, the cardinal secretary of state, the cardinal secretary of briefs, and the cardinal prodatarius. 2. The *prælatini palatini*, embracing a court marshal, a master of ceremonies, a master of the sacred palace (always a Dominican monk, who is also censor of the books published in Rome), the sacristan of the palace (always an Augustinian monk, who assists the pope in his private chapels), an *auditor sanctissimi* (a lawyer who is consulted

by the pope), a large number of privy chamberlains and of honorary domestic prelates (*prelati domestici*), and bishops assistant of the throne (*vescovi assistenti al soglio*). These latter titles are conferred on a large number of bishops and priests in all parts of the world. Among the earlier writings on the papal curia, the best is that by the chevalier Lunadoro, *Relazione della Corte di Roma* (Padua, 1641; many edit. since; latest edition, with all the necessary additions, Rome, 1830, 2 vols.). See also Dr. O. Mejer, *Die heutige römische Curie*, in Jacobson's *Zeitschrift für das Recht der Kirche* (Leips. 1847); Wetzer und Welte, *Kirchen-Lex.* ii, 944.

Curio (or CURION), CŒLIUS SECUNDUS, one of the Italian Reformers of the 16th century, was born at Chirico, near Turin, in 1503. He took an active part in the reformatory efforts made in Italy, and, in consequence of his teaching, was persecuted by the Roman Catholic priesthood at Milan, Pavia, and Lucca. He finally fled to Lausanne, where he became rector. Subsequently he was appointed professor of elocution at the University of Basel, in which city he died in 1569. He wrote, among others, the following works: —*Pasquilli ecstatici* (first edit. without year; again Geneva, 1544); *Pasquillorum tomi duo* (Basel, 1544); *Christianæ religionis institutio* (Basel, 1549); *De perfecto grammatico* (Basel, 1555); *Forum Romanum* (Basel, 1561, 3 vols. fol.); *Logicis Elementa* (Basel, 1569); *De bello Melitensi* (Basel, 1567). He also published editions of several Roman classics.—Pierer, *Univ.-Lex.* iv, 590.

Curious Arts (*τὰ περίεργα*, literally *the sedulous things*, hence the term is applied to an over-officious person, e. g. a "busy-body," 1 Tim. v, 13), prop. *overwrought*, hence *magic* (see Iren. *adv. Hæres.* i, 20; Isidor. iii, 139; comp. *curiosus*, Horace, *Epod.* xvii, 77); spoken of the black art as practised by the Ephesian conjurors (Acts xix, 19; see Kuinöl, in loc.). The appropriateness of the term is shown by Deyling (*Observatt. Sacr.* iii, 277 sq.). The allusion is doubtless to the famous *Ephesian spells* (Ἐφέσια γράμματα), i. e. charms or scraps of parchment (originating or most used at Ephesus) whereon were written certain marks and formulæ, which, like amulets, were worn upon the person as a safeguard against diseases, dæmons, and other evils (see Wagenseil, *Tela Ignea*, preface, p. 33; Ursinus, *Analect.* ii, 46; Dietric, *Antt. Biblic.* in loc.; Cellarius, *Disputt. Academ.* p. 441; Wolburg, *Observatt. Sacr.* p. 470; Laur. Rannires, in *Penteconcarch.* p. 214). See DIVINATION. They are frequently referred to in ancient writings (see Wetstein, Kype, etc. in loc.), e. g. Eustathius (*ad* Hom. *Odyss.* i, p. 994, 35), "Ephesian letters: some say these were incantations which were of very great assistance to Crœsus when used by him at the stake; in the Olympic games, however, it is said that a certain Milesian failed to outstrip an Ephesian till the charm worn by the latter was discovered and removed" (comp. Erasmus, *Adagg. Center.* ii, 578). The phrase appears to have been applied to any talismanic inscription (Küster, *ad* Suidam, i, 919; Gale, *ad* Jamblichum, p. 290). Ortlob, however, in his *Diss. de Ephesiorum libris combustis* (Lips. 1708), § 9, contends that the arts in question were rather methods of promoting the worship of the patron goddess of the city (see Wolf, *Curæ*, in loc.). The other and usual view is maintained by Siber (*Disputatio de περιεργίᾳ Ephesiorum*, Vitemb. 1685; also in *Thesaur. Dissertationum super N. T.* i, 484 sq.), and Schurzfleisch (*Dissertatio de libris Ephesiis*, Vitemb. 1698). See EPHESUS.

Curse (the rendering of various Heb. and Greek words). God denounced his curse against the serpent which had seduced Eve (Gen. iii, 14), and against Cain, who had imbued his hands in his brother Abel's blood (iv, 11). He also promised to bless those who should bless Abraham, and to curse those who should curse him. The divine maledictions are not merely imprecations, nor are they impotent wishes; but they carry their effects with them, and are attended with all the miseries they denounce or foretell. (See Zachary, *Threats of Scripture*, Oxford, 1653.) Holy men sometimes prophetically cursed particular persons (Gen. ix, 25; xlix, 7; Deut. xxvii, 15; Josh. vi, 26), and history informs us that these imprecations had their fulfilment, as had those of our Saviour against the barren fig-tree (Mark xi, 21). But such curses are not consequences of passion, impatience, or revenge; they are *predictions*, and therefore not such as God condemns. See IMPRECATION. No one shall presume to curse his father or his mother (see CORBAN), on pain of death (Exod. xxi, 17); nor the prince of his people (xxii, 28); nor one that is deaf (Lev. xix, 14); whether a man really deaf be meant here, or one who is absent, and therefore cannot hear what is said against him. Blasphemy, or cursing of God, is punished with death (Lev. xxiv, 10, 11). Our Lord pronounces blessed those disciples who are (falsely) loaded with curses, and requires his followers to bless those who curse them; to render blessing for cursing, etc. (Matt. v, 11). The Rabbins say that Barak cursed and excommunicated Meroz, who dwelt near the brook Kishon, but who came not to assist Israel against Jabin. Wherefore Barak excommunicated him by the sound of four hundred trumpets, according to Judg. v, 23. But Meroz is more probably the name of a place.—Calmet. The Jews were cursed by the Almighty for rejecting the Messiah (Mal. iv, 6; see on this the dissertation of Iken, *De Anathemate*, etc., Brem. 1749). See ANATHEMA; OATH.

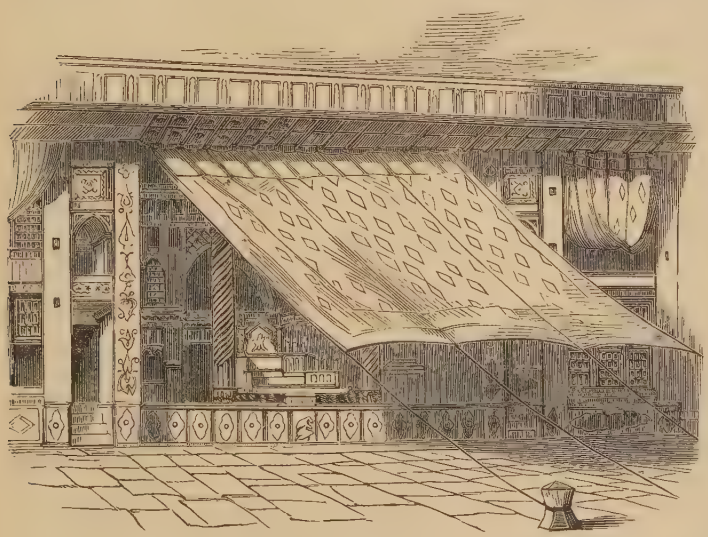
On the passage in Job (ii, 9), "Curse God and die," Mr. Roberts makes the following remarks: "Some suppose this ought to be, 'Bless God and die' (the Heb. is בָּרֵךְ); but Job would not have reproved his wife for such advice, except she meant it ironically. It is a fact, that when the heathen have to pass through much suffering, they often ask, 'Shall we make an offering to the gods for this?' that is, 'Shall we offer our devotions, our gratitude for afflictions?' Job was a servant of the true God, but his wife might have been a heathen; and thus the advice, in its most literal acceptation, might have been in character. Nothing is more common than for the heathen, under certain circumstances, to curse their gods. Hear the man who has made expensive offerings to his deity, in hope of gaining some great blessing, and who has been disappointed, and he will pour out all his imprecations on the god whose good offices have, as he believes, been prevented by some superior deity. A man in reduced circumstances says, 'Yes, yes, my god has lost his eyes; they are put out; he cannot look after my affairs.' 'What!' said an extremely rich devotee of the supreme god Siva, after he had lost his property, 'shall I serve him any more? What! make offerings to him? No, no; he is the lowest of all gods.' With these facts before us, it is not difficult to believe that Job's wife actually meant what she said." See JOB.

Curtain, the rendering in the Auth. Vers. of three Hebrew terms.

1. יְרִיעָה, *yeriah'* (from its *tremulous* motion, invariably thus translated), the ten "curtains" of fine linen, etc., each twenty-eight cubits long and four wide, and also the eleven of goats' hair, which covered the tabernacle of Moses (Exod. xxvi, 1–13; xxxvi, 8–17). The charge of these curtains and of the other textile fabrics of the tabernacle was laid on the Gershonites (Num. iv, 25). Having this definite meaning, the word came to be used as a synonym for the tabernacle —its transitoriness and slightness—and is so employed in the sublime speech of David, 2 Sam. vii, 2 (where "curtains" should be "the curtain"), and 1 Chron xvii, 1. In a few later instances the word bears the more general meaning of the sides of a tent, as in the

beautiful figure of Isa. liv, 2 (where "habitations" should be "tabernacles," מִשְׁכְּנוֹת, poetic word for "tents"); Jer. iv, 20; x, 20 (here "tabernacle" and "tent" are both one word, אֹהֶל, *tent*); Psa. civ, 2 (where "stretch," נָטָה, is the word usually employed for extending a tent). Also specially of nomadic people, Jer. xlix, 29; Hab. iii, 7 (of the black hair-cloth of which the tents of the real Bedouin are still composed); but Cant. i, 5 rather refers to the hangings of the palace. See TENT.

2. מָסָךְ, *masak'*, the "hanging" for the doorway of the tabernacle (Exod. xxvi, 36, 37; xxxv, 15; xxxvi, 37; xxxix, 38; xl, 5; Num. iii, 25; iv, 25); and also for the gate of the court round the tabernacle (Exod. xxvii, 16; xxxv, 17; xxxviii, 18; xxxix, 40; xl, 33; Num. iii, 26; iv, 26). Among these the rendering "curtain" occurs but once (Num. iii, 26), while "hanging" is shared equally between *masak* and a very different word—קְלָעִי, *kelaï'*. See HANGING. Besides "curtain" and "hanging," *masak* is rendered "covering" in Exod. xxxv, 12; xxxix, 34; xl, 21; Num. iv, 5; 2 Sam. xvii, 19; Psa. cv, 39; Isa. xxii, 8. The idea in the root of *masak* seems to be of shielding or protecting (סָכַךְ, Gesenius, *Thes. Heb.* p. 951). If this be so, the object denoted may have been not a curtain or veil, but an awning to shade the entrances—a thing natural and common in the fierce sun of the East (see Fergusson's *Nineveh and Persepolis*, p. 184). s. v. See TABERNACLE. The sacred curtain separating the holy of holies from the sanctuary is designated by an entirely different term, פָּרֹכֶת, *pero'keth* (Exod. xxvi, 31 sq.; Lev. xvi, 2; Num. xviii, 7, etc.). See VAIL.



Awning before the Throne-room at Teheran.

3. דֹּק, *dok* (prop. *fineness*), fine cloth for a garment, specially a *curtain*, apparently a tent-covering of superior fineness (Isa. xl, 22), such as the rich Orientals spread for a *screen* over their courts in summer (Henderson, in loc.). See COURT.

Curtius, VALENTIN, a prominent Lutheran minister of the sixteenth century, was born at Lebus Jan. 6, 1493. He studied at the University of Rostock, and early entered the order of Franciscans. He was one of the earliest adherents of the Reformation of Luther, and became its leader, first in the city of Rostock, and subsequently in that of Lubeck. In 1554 he was appointed superintendent of all the churches of Lubeck, and in this position exercised a most beneficent influence upon the religious life of the city. He also took a prominent part in many of the theological conferences of the Lutheran Church. Thus he was present at the "convent of Brunswick" in 1557, which was to settle the adiaphoristic controversies, and in 1561 at the "convent of Luneburg," when the "Luneburg Articles" were drawn up, which were incorporated with the symbolical books of Brunswick. Curtius is also the author of the so-called "Lubeck Formula" (*Formula consensus*, etc.), which he drew up in concert with the secular authorities and the entire clergy of the city. By it the ministers pledge themselve to abide by the doctrine of the prophets and the apostles, the Apostolic Creed, the Augsburg Confession, the Apology, and the Articles of Schmalkald. It was signed by Curtius and all the other ministers of Lubeck in 1560, and afterwards by all ministers appointed in Lubeck until 1683, when the signing of it was no longer required. Curtius also drew up, in the name of the clergy, a "*Protestatio contra Synodum Tridentinam.*" He died Nov. 28, 1573.—Herzog, *Real-Encykl.* xix, 373; Starke, *Lüb. Kirch-Hist.* (Hamburg, 1724, 2 vols., where both the "*Formula Consensus*" and the *Protestatio* are printed).

Cusa, NICHOLAS DE, or CUSANUS, a cardinal of great learning. His name was properly NICHOLAS KHRYPFFS (KREBS), but he was named *Cusanus* or *De Cusa* from Cues on the Mosel, where he was born in 1401. He was the son of a poor fisher, who wished him to learn the same trade. Rather than comply with this request, Nicholas left the paternal home, and found employment with the count of Manderscheid, who, having discovered the eminent talent of his servant, sent him to the school of the Brothers of Common Life at Deventer, and subsequently to the University of Padua. At the age of 23 Nicholas became doctor of law, but when he lost his first lawsuit he left the profession of law for the study of theology. Possessing a thorough knowledge of the Greek, Latin, and Hebrew languages, and a rare degree of eloquence, he soon attracted attention. After holding several ecclesiastical benefices at St. Wendel and Coblentz, he was present as archdeacon of the cathedral church of Liege at the Council of Basel, where he presented to the assembled bishops the celebrated work *De Concordantia Catholica*. This is one of the ablest works published during the Middle Ages in favor of the opinion that the pope is subordinate to an œcumenical council; it attacks the pretended donation of Constantine, and the authority of the false decretals, and insists on the reformation of the Church and the Germanic empire. Cusa was opposed to the dissolution of the council which was attempted by Eugene IV, and showed himself favorable to the reforms which the council decreed. But soon after he left the reformatory party and became an adherent of the pope, who added him to the legation which was sent over to Constantinople to dissuade the Greeks from going to Basel, and to induce them to go to Ferrara. After the rupture between the pope and the council, Cusa accompanied the papal legate, Thomas de Sarzana, on his missions to Germany and France. When the latter became pope, under the name of Nicholas V, Cusa was made a cardinal (1449), and bishop of Brixen, in the

Tyrol, in 1459. He was also sent on important missions to Germany, England, and Prussia. Being charged with the re-establishment of ecclesiastical discipline in Holland, he acquitted himself of this task with great firmness. His reform measures in his own diocese involved him in a quarrel with the archduke Sigismond of Austria. Cusa excommunicated the archduke, who, in his turn, imprisoned the cardinal, and compelled him to agree to a compromise. The matter was not fully settled when the cardinal died at Lodi in 1464.

The transition of Cusa from the reform party to the adherents of the court of Rome has by some writers been charged to ignoble motives; but, in view of the purity of his life, and the honesty of his purposes exhibited in all his public acts, most of the writers consider it as an honest change of opinion. It is thought that Cusa himself discovered the inconsistency of some of his views on the unity of the Church, the papal prerogatives, and the authority of the councils, as laid down in the work *De Concordantia Catholica*, and that, finding it necessary to discard the one or the other, he laid greater stress on the monarchical government of the Church than on the representative councils. This agrees with the strong attachment which Cusa shows to the monarchical principle in general. See Brockhaus, *Nicolai Cusani de concilii universalis potestate sententia explicatur* (Lpzg. 1867).

As a philosopher, Cusa was among the first to abandon the scholastic creed. "He arranged and republished the Pythagorean ideas, to which he was much inclined, in a very original manner, by the aid of his mathematical knowledge. He considered God as the unconditional Maximum, which at the same time, as *Absolute Unity*, is also the unconditional Minimum, and begets of himself and out of himself equality and the combination of equality with unity (Son and Holy Ghost). According to him, it is impossible to know directly and immediately this absolute unity (the Divinity), because we can make approaches to the knowledge of him only by the means of number or plurality. Consequently he allows us only the possession of very imperfect notions of God, and those by mathematical symbols. It must be admitted that the cardinal did not pursue this thought very consequently, and that his view of the universe, which he connected with it, and which represented the universe as the maximum *condensed*, and thus *become finite*, was very obscure. Nor was he more successful in his view of the *one*ness of the Creator and of creation, or in his attempt to explain the mysteries of the Trinity and Incarnation by means of this pantheistic theism. Nevertheless, numerous profound though undeveloped observations on the faculty of cognition are found in his writings, interspersed with his prevailing mysticism. For instance, he observes that the principles of knowledge possible to us are contained in our ideas of number (*ratio explicata*) and their several relations; that absolute knowledge is unattainable to us (*precisio veritatis inattingibilis*, which he styled *docta ignorantia*), and that all which is attainable to us is a *probable* knowledge (*conjectura*). With such opinions he expressed a sovereign contempt for the dogmatism of the schools." The works of Cusa were published in 1514 at Paris (3 vols. fol.), and again in 1565 at Basel (3 vols. fol.). The latter edition is the more complete. See Tennemann, *Manual Hist. Phil.* § 286; Scharpff, *Der Cardinal und Bishop Nic. von Cusa* (vol. i, Mainz, 1843; the 2d vol. has not appeared); Düx, *Der deutsche Cardinal Nic. von Cusa* (Ratisbon, 1847, 2 vols.); Clemens, *G. Bruno und N. von Cusa* (Bonn, 1847); Zimmermann, *Cusa als Vorläufer Leibnitzens* (Vienna, 1852).

Cush (Heb. *Kush*, כּוּשׁ, deriv. uncertain; A. V. "Cush," Gen. x, 6, 7, 8; 1 Chron. i, 8, 9, 10; Psa. vii, title; Isa. xi, 11; "Ethiopia," Gen. ii, 13; 2 Kings xix, 9; Esth. i, 1; viii, 9; Job xxviii, 19; Psa. lxviii, 31; lxxxvii, 4; Isa. xviii, 1; xx, 3, 5; xxxvii, 9; xliii, 3; xlv, 14; Ezek. xxix, 10; xxx, 4, 5; xxxviii, 5; Nah. iii, 9; Zeph. iii, 10; "Ethiopians," Isa. xx, 4; Jer. xlvi, 9; Ezek. xxx, 9), the name of two men, and of the territory or territories occupied by the descendants of one of them.

1. (Sept. Χούς, Vulg. *Chus.*) A son (apparently the eldest) of Ham. B.C. cir. 2510. In the genealogy of Noah's children Cush seems to be an individual, for it is said "Cush begat Nimrod" (Gen. x, 8; 1 Chron. i, 10). If the name be older than his time, he may have been called after a country allotted to him. The following descendants of Cush are enumerated: his sons, Seba, Havilah, Sabtah or Sabta, Raamah, and Sabtechah or Sabtecha; his grandsons, the sons of Raamah, Sheba and Dedan; and Nimrod, who, as mentioned after the rest, seems to have been a remoter descendant than they, the text not necessarily proving him to have been a son. See Ham. The only direct geographical information given in this passage is with reference to Nimrod, the beginning of whose kingdom was in Babylonia, and who afterwards went, according to the reading which we prefer, into Assyria, and founded Nineveh and other cities. The reasons for our preference are: (1) that if we read "Out of that land went forth Asshur," instead of "he went forth [into] Asshur," i. e. Assyria, there is no account given but of the "beginning" of Nimrod's kingdom; and (2) that Asshur the patriarch would seem here to be quite out of place in the genealogy. See Nimrod.

Land of Cush.—From the eldest son of Ham (Gen. x, 6; 1 Chron. i, 8) seems to have been derived the name of the *land* of Cush, which is commonly rendered by the Sept. Αἰθιοπία, and by the Vulgate *Æthiopia*; in which they have been followed by almost all other versions, ancient and modern. The German translation of Luther has *Mohrenland*, which is equivalent to Negroland, or the Country of the Blacks. A native was called *Cushi'* (כּוּשִׁי, Αἰθίοψ, *Æthiops*, Jer. xiii, 23), the feminine of which was *Cushith'* (כּוּשִׁית, Αἰθιόπισσα, *Æthiopissa*, Num. xii, 1), and the plural, *Cushîim'* (כּוּשִׁים, Αἰθίοπες, *Æthiopes*, Amos ix, 7). See Ethiopian. "Of the four sons of Ham," says Josephus (*Ant.* i, 6, 2), "time has not at all hurt the name of Chus; for the Ethiopians over whom he reigned are even at this day, both by themselves and by all men in Asia, called *Chusites*." The Peshito Syriac version of Acts viii, 27, styles both queen Candace and her treasurer *Cushæans*. See Candace.

The locality of the land of Cush is a question upon which eminent authorities have been divided; for while Bochart (*Phaleg*, iv, 2) maintained that it was exclusively in Arabia, Gesenius (*Lex.* in voce) held, with no less pertinacity, that it is to be sought for nowhere but in Africa. In this opinion he is supported by Schulthess of Zurich, in his *Paradies* (p. 11, 101). Others again, such as Michaelis (*Spicileg. Geogr. Heb. Ext.* cap. 2, p. 237) and Rosenmüller (*Bibl. Geogr.* by Morren, i, 80; iii, 280), have supposed that the name Cush was applied to tracts of country both in Arabia and Africa—a circumstance which would easily be accounted for on the very probable supposition that the descendants of the primitive Cushite tribes who had settled in the former country emigrated across the Red Sea to the latter region of the earth, carrying with them the name of Cush, their remote progenitor. This idea had been developed by Eichhorn (*De Cuschæis*, Ohrduf, 1774). The term Cush is generally applied in the Old Testament to the countries south of the Israelites. It was the southern limit of Egypt (Ezek. xxix, 10), and apparently the most westerly of the provinces over which the rule of Ahasuerus extended, "from India even unto Ethiopia" (Esth. i, 1; viii, 9). Egypt and Cush are associated in the majority of instances in which the word occurs (Psa. lxviii,

31; Isa. xviii, 1; Jer. xlvi, 9, etc.); but in two passages Cush stands in close juxtaposition with Elam (Isa. xi, 11) and Persia (Ezek. xxxviii, 5). The Cushite king, Zerah, was utterly defeated by Asa at Mareshah, and pursued as far as Gerar, a town of the Philistines, on the southern border of Palestine, which was apparently under his sway (2 Chron. xiv, 9, etc.). In 2 Chron. xxi, 16, the Arabians are described as dwelling "beside the Cushites," and both are mentioned in connection with the Philistines. The wife of Moses, who, we learn from Exod. ii, was the daughter of a Midianite chieftain, is in Num. xii, 1, denominated a Cushite. Further, Cush and Seba (Isa. xliii, 3), Cush and the Sabæans (Isa. xlv, 14), are associated in a manner consonant with the genealogy of the descendants of Ham (Gen. x, 7), in which Seba is the son of Cush. From all these circumstances it is evident that under the denomination Cush were included both Arabia and the country south of Egypt on the western coast of the Red Sea. It is possible also that the vast desert tracts west of Egypt were known to the Hebrews as the land of Cush, but of this we have no certain proof. The Targumist on Isa. xi, 11, sharing the prevailing error of his time, translates Cush by India, but that a better knowledge of the relative positions of these countries was anciently possessed is clear from Esth. i, 1.

Some have sought for another Cush in more northerly regions of Asia, as in the Persian province of *Chusistan* or Susiana, in *Cuthah*, a district of Babylonia, etc.; and as Nimrod, the youngest son (or descendant) of Cush, spread his conquests in that direction, it is no doubt possible that his father's name might be preserved in the designation of some part of the territory or people. But here again the data are not very satisfactory; indeed, the chief thing which led to the supposition is the mention, in the description of the site of Paradise (Gen. ii, 13), of a land of Cush, compassed by the river Gihon. Yet, even though the name of Cush were more variously applied in Scripture than it really is, it would not be more so than was the corresponding term Ethiopia among the Greeks and Romans, which comprised a great many nations far distant, as well as wholly distinct from each other, and having nothing in common but their swarthy, sun-burnt complexion—Αἰθίοψ q. d. *αἰθὸς τὴν ὄψιν*, i. e. "burnt-black in the face." Homer (*Odyss.* i, 22) speaks of them as "a divided race—the last of men—some of them at the extreme west, and others at the extreme east." Strabo (i, 60) describes them as a "two-fold people, lying extended in a long tract from the rising to the setting sun." Herodotus (vii, 69, 70) distinguishes the eastern Ethiopians in Asia from the western Ethiopians in Africa by the straight hair of the former and the curly hair of the latter. The ancients, in short, with the usual looseness of their geographical definitions, understood by Ethiopia *the extreme south* in all the earth's longitude, and which, lying, as they thought, close upon the fiery zone, exposed the inhabitants to the sun's scorching rays, which burned them black. It is the mistaken idea of the scriptural term "Cush" being used in the same vague and indeterminate manner that has led to so much confusion on this subject; and one writer (Buttmann, *Alt. Erdk. d. Morgenl.* p. 40, note), in his desire to carry out the parallel between Ethiopia and Cush, derives the latter word from the root כּוּה (*kavh, kau, ku*), "to burn;" but that is opposed to all the rules of etymological analogy in the formation of Hebrew proper names (comp. Ritter's *Erdkunde*, i, 222; Heeren's *African Nations*, Engl. transl. i, 289). See CUTH.

1. The existence of an *African* Cush cannot reasonably be questioned, though the term is employed in Scripture with great latitude, sometimes denoting an extensive but undefined country (Ethiopia), and at other times one particular kingdom (Meroë). It is expressly described by Ezekiel as lying to the south of Egypt beyond Syene (xxix, 10; comp. xxx, 4–6.—Strabo, xvii, 817; Pliny, *Hist. Nat.* vi, 35; Josephus, *War*, iv, 10, 5). Its limits on the west and south were undefined; but it was probably regarded as extending eastward as far as the Red Sea, if not as including some of the islands in that sea, such as the famous Topaz Isle (Job xxviii, 19; Pliny, *Hist. Nat.* vi, 29; xxxvii, 8; Strabo, xvi, 4, 6; Diod. Sic. iii, 39). It thus corresponded, though only in a vague and general sense, to the countries known to us as Nubia and Abyssinia, so famous for the Nile and other great rivers. Hence the allusions in Scripture (Isa. xviii, 1; Zeph. iii, 11) to the far-distant "rivers of Ethiopia," a country which is also spoken of (Isa. xviii, 2) in our version as the land "which the rivers have *spoiled*," there being a supposed reference to the ravages committed by inundations (Bruce's *Travels*, iii, 158, and Taylor's *Calmet*, iii, 593–4); but recent translators prefer to render בָּזְאָ by "divide," q. d. "a land intersected by streams." Isaiah likewise takes notice (in the above passage) of the "bulrush"-boats, or vessels of papyrus, which the Ethiopians employed upon the waters, a fact which is confirmed by Heliodorus in his *Æthiopica* (x, 460), and also by Bruce, who states that the only kind of boat in Abyssinia is that called *tancoa*, which is made of reeds, "a piece of the acacia-tree being put in the bottom to serve as a keel, to which the plants are joined, being first sewed together, then gathered up at stem and stern, and the ends of the plants tied fast there." It is to the swiftness of these papyrus vessels that Job (ix, 26) compares the rapid speed of his days. From its proximity to Egypt we find Mizraim and Cush (i. e. Egypt and Ethiopia) so often classed together by the prophets (e. g. Psa. lxviii, 31; Isa. xi, 11; xx, 4; xliii, 3; xlv, 14; Nah. iii, 9). The inhabitants are elsewhere spoken of in connection with the Lubim and Sukkiim (2 Chron. xii, 3; xvi, 8; Jer. xlvi, 7; Dan. xi, 43), supposed to be the Libyans and Ethiopic Troglodytes, and certainly nations of Africa, for they belonged to the vast army with which Shishak, king of Egypt, "came out" of that country against Rehoboam, king of Judah. In these, and indeed in most other passages where "Cush" occurs, Arabia is not to be thought of; the Ethiopia of Africa is beyond all doubt exclusively intended. See ETHIOPIA.

In the ancient Egyptian inscriptions Ethiopia above Egypt is termed *Keesh* or *Kish*, and this territory probably corresponds perfectly to the African Cush of the Bible (Wilkinson, *Anc. Eg.* i, 404, abridgment). The Cushites, however, had clearly a wider extension, like the Ethiopians of the Greeks, but apparently with a more definite ethnic relation. The settlements of the sons and descendants of Cush mentioned in Gen. x, may be traced from Meroë to Babylon, and probably on to Nineveh. Thus the Cushites appear to have spread along tracts extending from the higher Nile to the Euphrates and Tigris. Philological and ethnological data lead to the same conclusion. There are strong reasons for deriving the non-Shemitic primitive language of Babylonia, variously called by scholars Cushite and Scythic, from an ante-Shemitic dialect of Ethiopia, and for supposing two streams of migration from Africa into Asia in very remote periods; the one of Nigritians through the present Malayan region, the other and later one of Cushites, "from Ethiopia properly so called, through Arabia, Babylonia, and Persia, to Western India" (Poole, *Genesis of the Earth*, p. 214 sq.). Sir H. Rawlinson has brought forward remarkable evidence tending to trace the early Babylonians to Ethiopia, particularly the similarity of their mode of writing to the Egyptian, and the indication in the traditions of Babylonia and Assyria of "a connection in very early times between Ethiopia, Southern Arabia

and the cities on the Lower Euphrates," the Cushite name of Nimrod himself as a deified hero being the same as that by which Meroë is called in the Assyrian inscriptions (Rawlinson's *Herod.* i, 353 n.). History affords many traces of this relation of Babylonia, Arabia, and Ethiopia. Zerah the Cushite (A.V. "Ethiopian"), who was defeated by Asa, was most probably a king of Egypt, certainly the leader of an Egyptian army; the dynasty then ruling (the 22d) bears names that have caused it to be supposed to have had a Babylonian or Assyrian origin, as Sheshonk, Shishak, Sheshak; Namuret, Nimrod; Tekrut, Teklut, Tiglath. The early spread of the Mizraites illustrates that of the Cushites [see CAPHTOR]; it may be considered as a part of one great system of migrations. On these grounds we suppose that these Hamite races, very soon after their arrival in Africa, began to spread to the east, to the north, and to the west; the Cushites establishing settlements along the southern Arabian coast, on the Arabian shore of the Persian Gulf and in Babylonia, and thence onward to the Indus, and probably northward to Nineveh; and the Mizraites spreading along the south and east shores of the Mediterranean, on part of the north shore, and in the great islands. These must have been seafaring peoples, not wholly unlike the modern Malays, who have similarly spread on the shores of the Indian Ocean. They may be always traced where very massive architectural remains are seen, where the native language is partly Turanian and partly Shemitic, and where the native religion is partly cosmic or high-nature worship, and partly fetichism or low-nature worship. These indications do not fail in any settlement of Cushites or Mizraites with which we are well acquainted. See ETHNOLOGY.

But that part of this vast region of Cush which seems chiefly intended in these and most other passages of Scripture is the tract of country in Upper Nubia which became famous in antiquity as the *kingdom of Ethiopia*, or the state of Meroë. The Ethiopian nations generally ranked low in the scale of civilization; "nevertheless," says Heeren, "there did exist a better cultivated, and, to a certain degree, a civilized Ethiopian people, who dwelt in cities; who erected temples and other edifices; who, though without letters, had hieroglyphics; who had government and laws; and the fame of whose progress in knowledge and the social arts spread in the earliest ages over a considerable part of the earth." Meroë Proper lay between the river Astaboras (now the Atbara or Tacazzé) on the east, and the Nile on the west. Though not completely enclosed with rivers, it was called an island, because, as Pliny observes, the various streams which flowed around it were all considered as branches of the Nile, so that to it the above description of a "country of rivers" was peculiarly appropriate. Its surface exceeded that of Sicily more than a half, and it corresponded pretty nearly to the present province of Atbara, between 13° and 18° N. lat. In modern times it formed a great part of the kingdom of Sennaar, and the southern portion belongs to Abyssinia. Upon the island of Meroë lay a city of the same name, the metropolis of the kingdom, the site of which has been discovered near a place called Assur, about twenty miles north of the town of Shendy, under 17° N. lat. The splendid ruins of temples, pyramids, and other edifices found here and throughout the district have been described by Caillaud, Gau, Rüppell, Belzoni, Waddington, Hoskins, and other ravellers, and attest the high degree of civilization and art among the ancient Ethiopians. See MEROË.

Josephus, in his account of the expedition of Moses when commander of the Egyptian army against the Ethiopians, says that the latter "at length retired to Saba, a royal city of Ethiopia which Cambyses afterwards called Meroë, after the name of his own sister" (*Ant.* ii, 10, 2). The same origin of the name is given both by Strabo and Diodorus Siculus, but see Mannert's *Geog. of the Greeks and Romans*, x, 199. There is still a place called *Merawé* considerably north of the island and near Mount Berkal, where Heeren thinks there may have been a settlement of the parent state called by the same name. The opinion of Josephus that Meroë was identical with Seba accords well with the statement in Gen. x, 7, that Seba was the eldest son of *Cush*, whose name (סְבָא) is not to be confounded with either of the Shebas (שְׁבָא), who are mentioned as descendants of *Shem* (Gen. x, 28; xxv, 3). Now this country of African Seba is classed with the Arabian Sheba as a rich but far-distant land (Psa. lxxii, 10). In Isa. xliii, 3, God says to Israel, "I have given Egypt for thy ransom; Cush and Seba in thy stead;" and in Isa. xlv, 14, "The wealth of Egypt, and the merchandise of Cush and of the Sebaïm, men of stature, shall pass over to thee, and shall be thine." Charles Taylor, the ingenious but fanciful editor of *Calmet*, had the singular notion that by the expression "men of stature" in that passage is meant men of *short* measure, or dwarfs; and hence he identifies the Ethiopians with the pygmies of antiquity (*Fragments to Calmet*, cccxxii). But the Hebrew phrase plainly denotes "tallness of stature" (comp. 1 Chron. xi, 23), and the Ethiopians are described by Herodotus as of gigantic stature (*ἄνδρες μέγιστοι*, iii, 114; *μέγιστοι ἀνθρώπων*, iii, 20); and Solinus affirms that they were twelve feet in height (*Polyhist.* cap. xxx). In common with the other Cushite tribes of Africa the skin was black, to which there is an obvious allusion in Jer. xiii, 23: "Can the Cushite change his skin?" Bruce finds Seba in Azab, a sea-port on the east coast of Africa, near the entrance to the Red Sea, and in this he is followed by Heeren, while others think of a place called Subah, about lat. 15° N., where are some of the most remarkable ruins of Nubian grandeur; but both opinions are merely conjectural. See SEBA.

Among other tribes of Africa said to have been in alliance with Egypt, the prophet Ezekiel (xxx, 5) mentions along with Ethiopia the name of *Chub*, which Michaelis connects with *Kobé*, a trading town described by Ptolemy as on the west coast of the Red Sea. But in the Arabic translation made from the Septuagint, instead of *Chub* we find "the people of *Nubia*," a name easily interchanged for the other, and in some Heb. MSS. actually read there. There are still two districts adjoining Meroë on the south-west, called *Cuba* and *Nuba*, which are said to abound in gold. The *Sukkiim*, who, along with the Cushites and Lubim or Libyans, formed part of the host of Shishak (2 Chron. xii, 3), are in the Sept. designated as Troglodytes, i. e. cave-dwellers, and were no doubt the people known to the Greeks by the same name as inhabiting the mountain caverns on the west coast of the Red Sea (Diod. Sic. iii, 32; Strabo, xvii, p. 785). They were noted for swiftness of foot and expertness in the use of the sling, and hence were employed, as Heliodorus informs us (*Æthiopica*, viii, 16), as light troops. Pliny makes mention of a town of *Suche* in that region (*Hist. Nat.* vi, 29, 34), and there is still on the same coast a place called Suakim, described by Burckhardt in his *Travels in Nubia*. If, however, the term *Sukkiim* be of Hebrew derivation, it would specially denote those who lived in booths, i. e. tabernacles made of the *boughs of trees;* and it deserves remark that the Shangallas who inhabit that country still dwell during the good season in arbors fitted up for tents, repairing in winter to their rocky caves. See CHUB.

In the age of Herodotus, the countries known to us as Nubia and Sennaar were occupied by two different races, one of whom he includes under the general appellation of Ethiopians, the other an immigratory Arabian race leading, for the most part, a nomadic life. This distinction has continued down to the present day. Among the original inhabitants the first place is due to the Nubians, who are well-formed, strong, and mus-

cular, and with nothing whatever of the negro physiognomy. They go armed with spear, sword, and a shield of the skin of the hippopotamus. South of Dongola is the country of the Scheygias, whose warriors are horsemen, also armed with a double-pointed spear, a sword, and a large shield (comp. Jer. xlvi, 9, the "Cushites who handle the shield"). They were completely independent till subdued by Mehemet Ali, pacha of Egypt. It is in their country that the pyramidal monuments which adorned the ancient Meroë are first met with, and even its name has been preserved in that of their chief place, Merawé, though the original Meroë must be sought farther south. Next comes the territory of the Berbers, strictly so called, who, though speaking Arabic, evidently belong to the Nubian race. Above these regions, beyond the Tacazzé, and along the Nile, the great mass of the inhabitants, though sometimes with a mixture of other blood, may be regarded as of Arab origin. But between the valley of the Nile and the Red Sea there is still, as of old, a variety of scattered aboriginal tribes, among whom the Arabic is much less common; they are, doubtless, partly the descendants of the abovementioned Sukkiim, or Troglodytes, and of the Ichthyophagi, or fish-eaters. Some of them spread themselves over the plains of the Astaboras, or Tacazzé, being compelled to remove their encampments, sometimes by the inundations of the river, at other times by the attacks of the dreaded *zimb*, or gad-fly, described by Bruce, and which he supposes to be the "fly which is in the utmost part of the rivers of Egypt" (Isa. vii, 18). Another remarkable Ethiopic race in ancient times was the *Macrobians*, so called from their supposed longevity. They were represented by the ambassadors of Cambyses as a very tall race, who elected the highest in stature as king: gold was so abundant that they bound their prisoners with golden fetters—circumstances which again remind us of Isaiah's description of Ethiopia and Seba in ch. xlv, 14. (See Ludolf, *Hist. Æthiopica*, F. ad M. 1681; with his *Commentaries* thereon, ib. 1691; and his *Hodiern. Habess. status*, ib. 1693). See Africa.

2. That some of the posterity of Cush settled in the south of *Arabia* may readily be granted; but that he gave a permanent name to any portion either of the country or people is by no means so evident: it is, at least, more a matter of inferential conjecture than of historical certainty. Almost all the passages usually cited in support of the averment are susceptible of a different interpretation. (1.) For example, in Num. i, 21, Miriam and Aaron are said to have taken offence at Moses for having married "a Cushitess;" and upon the presumption that this was the same person as Zipporah, daughter of the priest of Midian (Exod. ii, 16, 21), it is inferred that Midian was in Cush. But, to say nothing of Zipporah's high rank, or of the services of her family to Israel, there would have been something so grossly incongruous and absurd in Moses's brother and sister complaining for the first time of his selection of a wife, after the marriage had subsisted for more than forty years, that it is evident Zipporah was now dead, and this second wife, though doubtless a proselyte to Judaism, was (whether born in Asia or Africa) a descendant of Cush, and therefore a *Hamite*, and not one of the Midianites, who were of *Shemitic* origin, being the children of Abraham by Keturah. But, admitting that it is a second marriage which is thus referred to, the case is not materially altered, for still Cush must be sought near the place of Israel's encampment, as it cannot be supposed that Moses would go to Ethiopia to fetch a wife. See Zipporah. (2.) Others discover a connection between Cush and Midian, because in Hab. iii, 7, the clause, "I saw the tents of Cushan in affliction," finds a parallelism in "the curtains of the land of Midian did tremble"—*Cushan* being held to be the poetical and high-sounding form of *Cush*. But this idea is met by another identification; for while it is acknowledged that part of the sublime description in that chapter refers to the Exodus and the transactions at Sinai, other portions (such as the passage of the Jordan, verse 8, and the standing still of the sun, verse 11) have plainly a reference to incidents in the books of Joshua and Judges. Now in the latter book (iii, 10; viii, 12) we find a record of signal victories successively obtained by Othniel over *Cushan* Rishathaim, king of Mesopotamia, and by Gideon over the princes of *Midian*. See Cushan. (3.) But perhaps a stronger argument is the mention of Arabians as contiguous to the Cushites. Thus, in 2 Chron. xxi, 16, among those who were stirred up against the Hebrews are mentioned the Philistines, and "Arabs that were near the Cushites," and the expression "near" (עַל יַד) in this connection can scarcely apply to any but dwellers in the Arabian peninsula. Other arguments adduced by Michaelis (*Spicileg. Geograph. Hebr.* i, 149) in favor of the Arabian Cush are not decisive, and the passages on which he relies apply with greater probability to the African Cush. Thus the retreat of Sennacherib from Judæa in order to meet Tirhakah (2 Kings xix, 9; Isa. xxxvii, 9) does not necessarily imply that the latter passed through Palestine, since the Egyptians had reached Carchemish on the Euphrates without doing so (2 Chron. xxxv, 20), and Tirhakah was undoubtedly an African prince. See Tirhakah. Again, it has been rashly concluded that Zerah the Cushite, who attacked Asa, king of Judah, with so immense a host (2 Chron. xiv, 9), could not have been an Ethiopian of Africa, and yet the fact of his army having included Libyans (xvi, 8) as well as Ethiopians, seems decisive of the fact that the latter were of African origin. Their ancestors may have belonged to the "people without number" whom Shishak had led forth against Asa's grandfather, Rehoboam (xii, 3), and these their descendants may have retained possession of the north of Arabia Petræa, between Palestine and Egypt (see Bruce's *Travels*, i, 30). See Zerah.

Yet, though there is a great lack of evidence to show that the name of Cush was ever applied to any part of Arabia, there seems no reason to doubt that a portion of the Cushite race did early settle there. According to the ethnographic table in the 10th chapter of Genesis, Cush was the father of Seba, Havilah, Sabta, Raamah (whose sons were Sheba and Dedan), Sabtechah, and also of Nimrod (Gen. x, 7, 8; 1 Chron. i, 9, 10). The last mentioned appears to have moved northward, first into Babylonia and then into Assyria, but the others seem to have migrated to the south, though it is impossible accurately to trace out their settlements. Yet, even if we give Seba to Africa, and pass over as doubtful the names of Havilah, Sheba, and Dedan (for these were also the names of Shemitic tribes, Gen. x, 28, 29; xxv, 3), still, in Ezek. xxvii, 22, Raamah is plainly classed with the tribes of Arabia, and nowhere are any traces of Sabtah and Sabtechah to be found but in the same country. By referring, however, to the relative geographical positions of the south-west coast of Arabia and the east coast of Africa, it will be seen that nothing separates them but the Red Sea, and it is not unlikely that while a part of the Cushite population immigrated to Africa, others remained behind, and were occasionally called by the same name. In the fifth century of our era, the Himaryites, in the south of Arabia, were styled by Syrian writers Cushæans and Ethiopians (Assemanni, *Bibl. Orient.* i, 360; iii, 568). The Chaldee paraphrast Jonathan, at Gen. 6, and another paraphrast at 1 Chron. i, 8, explain "Cush" by Arabia. Niebuhr (*Beschr.* p. 289) found in Yemen a tribe called *Beni Chusi*. The book of Job (xxviii, 19) speaks of the topaz of Cush, and there was a Topaz Island in the Red Sea (Diod. Sic. iii, 39; Pliny, *Hist. Hat.* xxxvii, 8; Strabo, xvi, 4, 6). Yet most of these are circumstances

upon which we can lay but little stress; and the passage in 2 Chron. xxi, 16, is the only direct evidence we possess of the name "Cush" being applied in Scripture to any part of Arabia, and even that does not amount to absolute demonstration. See ARABIA.

3. Cush, as a country, therefore appears to be African or Arabian in all passages except Gen. ii, 13. We may thus distinguish a primeval and a post-diluvian Cush. The former was encompassed by Gihon, the second river of Paradise: it would seem, therefore, to have been somewhere to the northward of Assyria. See GIHON. From etymological considerations, Huet was induced to place Cush in Chusistan (called Cutha, 2 Kings xvii, 24), Leclerc in Cassiotis in Syria, and Reland in the "regio Cossæorum." Bochart identified it with Susiana, Link with the country about the Caucasus, and Hartmann with Bactria or Bálkh, the site of Paradise being, in this case, in the celebrated vale of Kashmir. It is possible that Cush is in this case a name of a period later than that to which the history relates, but it seems more probable that it was of the earliest age, and that the African Cush was named from this older country. Most ancient nations thus connected their own lands with Paradise, or with primeval seats. In this manner the future Paradise of the Egyptians was a sacred Egypt watered by a sacred Nile; the Arabs have told of the terrestrial paradise of Sheddad the son of Ad (q. v.) as sometimes seen in their deserts; the Greeks located the all-destroying floods of Ogyges and Deucalion in Greece; and the Mexicans seem to have placed a similar deluge in America—all carrying with them their traditions, and fixing them in the territories where they established themselves. We are told that, in the Hindoo mythology, the gardens and metropolis of Indra are placed around the mountain Méru, the celestial north pole; that, among the Babylonians and Medo-Persians, the gods' mountain, Alborj, "the mount of the congregation," was believed to be "in the sides of the north" (Isa. xiv, 13); that the oldest Greek traditions point northwards to the birthplace of gods and men; and that, for all these reasons, the Paradise of the Hebrews must be sought for in some far-distant hyperborean region. Guided by such unerring indications, Hasse (*Entdeckungen*, p. 49, 50, n.) scrupled not to gratify his national feeling by placing the Garden of Eden on the coast of the Baltic; Rudbeck, a Swede, found it in Scandinavia; and the inhospitable Siberia has not been without its advocates (Morren, Rosenmüller's *Geog.* i, 96). But, with all this predilection in favor of the north, the Greeks placed the gardens of the Hesperides in the extreme west, and there are strong indications in the Puránas "of a terrestrial paradise, different from that of the general Hindu system, in the southern parts of Africa" (*As. Res.* iii, 300). Even Méru was no further north than the Himalayan range, which the Aryan race crossed in their migrations. See EDEN.

2. (Sept. Χουσί, Vulg. *Chusi*.) A Benjamite, apparently at the court of Saul, by the name of Cush is mentioned in the title of Psalm vii, respecting whom nothing more is known than that the psalm is there said to have been composed "concerning his words" (or affairs). B.C. 1061. "There is every reason to believe this title to be of great antiquity (Ewald, *Psalmen*, p. 9). Cush was probably a follower of Saul, the head of his tribe, and had sought the friendship of David for the purpose of 'rewarding evil to him who was at peace with him'—an act in which no Oriental of ancient or modern times would see any shame, but, if successful, the reverse. Happily, however, we may gather from ver. 15 that he had not succeeded." By some (see Poole's *Synopsis*, in loc.) he is believed to have been Saul himself (see Hengstenberg, in loc.); by others he is identified with Shimei (see Pfeiffer, *Dict. Vexata*, in *Opp.* i, 297), who treated David so scurrilously on his retreat from Absalom (2 Sam. xvi, 5-8). A recent view (Kitto's *Daily Illustrations*, in loc.) is that this was the name of some treacherous informer in David's corps, through fear of whose intrigues he fled the second time to Achish (1 Sam. xxvii, 1); or (see Calmet's *Comment.* in loc.), most probably, some of Saul's malicious courtiers, as no good reason can be given for calling so well-known characters as either Saul or Shimei by so fanciful a title as Cush. See DAVID.

Cu'shan (Heb *Kushan'*, כּוּשָׁן; Sept. Αἰθίοπες; Vulg. *Æthiopia*), usually regarded as a prolonged or poetic form (Hab. iii, 7) of the name of the land of CUSH (q. v.), but perhaps rather the same as *Cushan-rishathaim* (A. V. "Chushan-"), king of Mesopotamia (Judg. iii, 8, 10). The order of events alluded to by the prophet seems to favor this supposition. First he appears to refer to former acts of divine favor (ver. 2); he then speaks of the wonders at the giving of the Law, "God came from Teman, and the Holy One from Mount Paran;" and he adds, "I saw the tents of Cushan in affliction: [and] the tent-curtains of the land of Midian did tremble," as though referring to the fear of the enemies of Israel at the manifestations of God's favor for his people. Chushan-rishathaim, the first recorded oppressor of the days of the Judges, may have been already reigning at the time of the entrance into Palestine. The Midianites, certainly allied with the Moabites at that time, feared the Israelites, and plotted against them (Num. xxii, xxiii, xxiv, xxv); and it is noticeable that Balaam was sent for from Aram (xxiii, 7), perhaps the Aram-naharaim of the oppressor. Habakkuk afterwards alludes to the crossing of Jordan or the Red Sea, or both (ver. 8–10, 15), to the standing still of the sun and moon (11), and apparently to the destruction of the Canaanites (12, 13, 14).—Smith, s. v. There is, however, good reason for the supposition that Cushan here stands for an Asiatic Cush (see *Meth. Quar. Rev.* Jan. 1861, p. 81), as it is named in connection with Midian (q. v.). Delitzsch (*Der Prophet Habakuk*, Leips. 1843, p. 159), who admits only the African Cush, holds that its mention along with Midian is intended to show how places so far removed from each other were equally affected by the theophany; but this is exceedingly strained, and at variance with the parallelism of the passage. See CHUSHAN-RISHATHAIM.

Cu'shi (Heb. *Kushi'*, כּוּשִׁי, q. d. *Cushite* or *Ethiopian;* Sept. Χουσί; Vulg. *Chusi*), a name of three men in the Old Test. See CUSH.

1. (With the article, הַכּוּשִׁי, i. e. "the Cushite," "the Ethiopian;" Sept. ὁ Χουσί; Vulg. *Chusi*.) The messenger sent by Joab to announce to David the success of the battle against Absalom and the death of the young prince (2 Sam. xviii, 21, 22, 23, 31, 32). B.C. 1023. He was apparently attached to Joab's person, but unknown and unaccustomed to the king, as may be inferred from his not being recognised by the watchman, and also from the abrupt manner in which he breaks his evil tidings to David—unlike Ahimaaz, who was well aware of the effect they were sure to produce. See DAVID. That Cushi was a foreigner—as we should infer from his name—is also slightly corroborated by his ignorance of the ground in the Jordan valley—"the way of the 'Ciccar'" (q. v.)—by knowing which Ahimaaz was enabled to outrun him. Ewald, however, conjectures that a mode of running is here referred to peculiar to Ahimaaz, and by which he was recognised a long distance off by the watchman.

2. The father of Shelemiah, and great grandfather of Jehudi, which last was sent by the Jewish magnates to invite Baruch to read his roll to them (Jer. xxxvi, 14). B.C. long ante 605.

3. The son of Gedaliah, and father of the prophet Zephaniah (Zeph. i, 1). B.C. ante 635.

Cushion. See Bed; Pillow.

Cushman, Elisha, a Baptist minister, was born at Kingston, Mass., May 2, 1788. He was ordained pastor of the First Baptist Church of Hartford, June 10, 1813. In 1824 he was made M.A. (honorary) by Yale College. In 1825 he resigned his charge in Hartford, and became pastor of the New Market Street Baptist Church of Philadelphia. In September, 1829, he returned to Connecticut, and, after preaching some time at Stratfield, was, in April, 1831, called to the pastoral charge of the Baptist church in New Haven. In 1835 he removed to Plymouth, Mass., but returned to Hartford in 1838, and resumed the editorship of *The Christian Secretary*, a religious paper of which he had been the original editor in 1822. He died October 26, 1838. Mr. Cushman's preaching was simple, instructive, and often eloquent. He published a number of occasional sermons and addresses.—Sprague *Annals*, vi, 562.

Cuspius. See Fadus.

Custom (Chald. חֶלַךְ, *halak'*, a *way*-tax, i. e. *toll*, Ezra iv, 13, 20; vii, 24; Gr. *τέλος*, a *tax*, 1 Macc. xi, 35; Matt. xvii, 25; Rom. xiii, 7; *φόρος*, *tribute*, 2 Macc. iv, 28; *τιμή*, *price*, 1 Macc. x, 29), Receipt of (*τελώνιον*, *collector's office*, i. e. *toll-house*, Matt. ix, 9; Mark ii, 14; Luke v, 27). See Toll. Under the Persian and Syrian supremacy, imposts of various kinds were collected by local agents. Under the Romans, the management of the provincial revenues was generally committed to the Roman knights, who were thence denominated *chief publicans*, or chief collectors of the taxes; the tax-gatherers or exactors whom they employed were termed *publicans*. It was different in Judæa, for there the management of the revenues was committed to the Jews themselves, and those who held this office eventually obtained an equal rank with the knights of Rome (Luke xix, 2; Josephus, *War*, ii, 14, 9). The subordinate agents, or *publicans*, in collecting the revenues, took their position at the gates of cities and in the public ways, and, at the place appointed for that purpose, called the "*receipt of custom*," examined the goods that passed, and received the moneys that were to be paid (Matt. ix, 2; Mark ii, 14; Luke v, 27, 29). These tax-gatherers, if we may believe Cicero (*Pro Flacc.* 28), were more inclined to exact too much than to forget the promise which they had made to their masters; and were, accordingly, in consequence of their extortions, everywhere, more particularly in Judæa, objects of hatred, and were placed in the same class with notorious sinners (Mark ii, 15, 16; Luke iii, 12, 13). The Pharisees held no communication with them; and one ground of their reproaches against the Saviour was, that he did not refuse to sit at meat with persons of such a character (Matt. v, 46, 47; ix, 10, 11; xi, 19; xviii, 17; xxi, 31, 32). The *half-shekel tax* was a tax or tribute to be paid annually by every adult Jew at the Temple. It was introduced after the captivity in consequence of a wrong interpretation of certain expressions in the Pentateuch, and differed from the revenue which accrued to the kings, tetrarchs, and ethnarchs, and from the general tax that was assessed for the Roman Cæsars. It was required that this tax should be paid in Jewish coin (Matt. xxii, 17–19; Mark xii, 14, 15). The prominent object of the temple money-changers (q. v.) was their own personal emolument; but the acquisition of property in this way was contrary to the spirit of the law in Deut. xxiii, 20, 21. It was for this reason that Jesus drove them from the temple (Matt. xxi, 22; Mark xi, 15; John ii, 15). Messengers were sent into other cities for the purpose of collecting this tax (Matt. xvii, 25). The Jews who collected this tax from their countrymen dwelling in foreign nations transmitted the sums collected every year to Jerusalem. This accounts for the immense amount of the treasures which flowed into the Temple (Josephus, *Ant.* xiv, 7, 2). See Tax.

Cut the Flesh; CUT off from the People. See Cutting, etc.; Excommunication.

Cuth (Hebrew, *Kuth*, כּוּת, signif. unknown; Sept. Χούθ, 2 Kings xvii, 30) or **Cu'thah** (Heb. *Kuthah'*, כּוּתָה, fem. of same; Sept. Χουθά, ver. 24), one of the districts in Asia whence Shalmaneser transplanted certain colonists into the land of Israel, which he had desolated. See Samaria. From the intermixture of these colonists with the remaining natives sprung the Samaritans (q. v.), who are called Cuthites (כּוּתִים) in the Chaldee and the Talmud (see Buxtorf, *Lex. Talm.* col. 1027), and for the same reason a number of non-Shemitic words which occur in the Samaritan dialect are called Cuthian (compare Χουθαῖοι, Josephus, *Ant.* ix, 14, 3; comp. xiii, 9, 1). Josephus places Cuthah in central Persia (comp. Zonar. i, p. 77), and finds there a river of the same name (Χούθος, *Ant.* ix, 14, 3; x, 9, 7). Rosenmüller and others incline to seek it in the Arabian Irak, where Abulfeda and other Arabic and Persian writers place a town of the name of *Kutha*, in the tract near the Nahr-Malka, or royal canal (the fourth in Xenophon, *Anab.* i, 7), which connected the Euphrates and Tigris to the south of the present Bagdad. The site has been identified with the ruins of *Towibah*, immediately adjacent to Babylon (Ainsworth's *Assyria*, p. 165; Knobel, *Völkertafel*, p. 252); the canal may be the river to which Josephus refers. Others prefer the conjecture of Stephen Morin (in Ugolini *Thes.* vii) and Le Clerc, which identifies the Cuthites with the *Cossæi* in Susiana (Arrian, *Indic.* xl; Plin. *Hist. Nat.* vi, 31; Diod. Sic. xvii, 111; Mannert, ii, 493), a warlike tribe who occupied the mountain ranges dividing those two countries, and whose lawless habits made them a terror even to the Persian emperors (Strab. xi, 524; xvi, 744). They were never wholly subdued until Alexander's expedition, and it therefore appears doubtful whether Shalmaneser could have gained sufficient authority over them to effect the removal of any considerable number; their habits would have made such a step highly expedient, if practicable. Fürst (*Heb. Handwört.* s. v.) identifies this district with the modern *Khusistan* of Susiana, the province *Jutija* of the cuneiform inscriptions of Behistun (Benfey, *Die Pers. Keilinschr.* p. 18, 32). All these conjectures refer essentially to the same quarter, and any of them is preferable to the one suggested by Michaelis (*Spicil.* i, 104), that the Cuthites were Phœnicians from the neighborhood of Sidon; founding it upon the connection between the Samaritans and the Sidonians, as stated in their letter to Alexander the Great (Joseph. *Ant.* 8, 6; xii, 5, 5), and between the Sidonians and the Cuthæans, as expressed in the version of the Chaldee Paraphrast Pseudo-Jonathan in Gen. x, 19, who substitutes כּוּתְנָיֵא for צִדוֹן, and in the Targum, 1 Chron. i, 13, where a similar change is made; this is without doubt to be referred to the traditional belief that the original seat of the Phœnicians was on the shores of the Persian Gulf (Herod. i, 1). Rawlinson is confident that the ancient Cuth is identical with the modern ruined site *Ibrahim*, about twelve miles from Babylon (*Herod.* i, 243, 515; *Hist. Ev.* p. 340 sq.). See Nergal. After all, it is possible that there is some historical and etymological connection (שׁ changed to ת) between *Cuth* and the *Cush* of Gen. ii, 13, which must have lain somewhere in the same quarter. See Cush.

Cuthbert, St., an eminent monk, born in the north of England in the beginning of the 7th century. His life, written by Bede, is full of marvellous stories; but it is clear that he was an earnest and faithful minister. He was educated by the Scottish monks at Icolmkill. After being for some time a monk in the monastery of

Mailros, he became prior of the monastery of Lindisfarne. In 676 he withdrew to the island of Farne, where he lived a life of most rigorous asceticism as a hermit, and enjoyed the reputation of working many miracles. In 685 he yielded to the entreaties of king Egbert, and accepted the episcopal see of Hexham. When he felt the approach of death he returned to his hermitage on Farne, and there died, March 20, 687. He is commemorated in the Roman Church March 20. "The fame of St. Cuthbert had been great during his life; it became far greater after his death. Churches were dedicated to him throughout all the country between the Trent and Mersey on the south, and the Forth and Clyde on the north. When his tomb was opened at the end of eleven years, it was believed that his body was found incorrupt, and so for more than 800 years it was believed still to continue. It remained at Lindisfarne till 875, when the monks, bearing it on their shoulders, fled inland from the fury of the Danes. After many wanderings through the south of Scotland and the north of England, it found a resting-place at Chester-le-Street in 882. It was transferred to Ripon in 995, and in the same year it was removed to Durham. Here, enclosed in a costly shrine, and believed to work daily miracles, it remained till the Reformation, when it was buried under the pavement of the cathedral. The grave was opened in 1827, when a coffin, ascertained to have been made in 1541—when the body was committed to the earth—was found to enclose another, which there was reason to suppose had been made in 1104; and this again enclosed a third, which answered the description of one made in 698, when the saint was raised from his first grave. This innermost case contained, not, indeed, the incorruptible body of St. Cuthbert, but his skeleton, still entire, wrapped in five robes of embroidered silk. Fragments of these, and of the episcopal vestments, together with a comb and other relics, found beside the bones, are to be seen in the cathedral library. The asceticism which distinguished St. Cuthbert in life long lingered round his tomb. Until the Reformation, no woman was suffered to approach his shrine; the cross of blue marble still remains in the cathedral floor which marked the limits beyond which female footsteps were forbidden to pass, under pain of instant and signal punishment from the offended saint. His wrath, it was believed, was equally prompt to avenge every injury to the honor or possessions of his church. It was told that William the Conqueror, anxious to see the incorrupt body of the saint, ordered the shrine to be broken up; but scarcely had a stroke been struck, when such sickness and terror fell upon the king that he rushed from the cathedral, and, mounting his horse, never drew bridle till he had crossed the Tees! A cloth, said to have been used by St. Cuthbert in celebrating mass, was fashioned into a standard, which was believed to insure victory to the army in whose ranks it was carried. Flodden was only one of many fields in which the defeat of the Scots was ascribed to the banner of St. Cuthbert. It hung beside his shrine until the Reformation, when it is said to have been burnt by Calvin's sister, the wife of the first Protestant dean of the cathedral. The life of St. Cuthbert was twice writen by the Venerable Bede—briefly in vigorous hexameters in his *Liber de Miraculis Sancti Cuthbercti Episcopi;* at greater length in prose, in his *Liber de Vita et Miraculis Sancti Cuthbercti Lindisfarnensis Episcopi.* In this latter work he made use of an earlier life by a monk of Lindisfarne, which is still preserved. Besides these lives—all of which have been printed more than once—and what is told of St. Cuthbert in Bede's *Historia Ecclesiastica Gentis Anglorum,* the chief ancient authorities are the *Historia Translationis S. Cuthberti,* published by the Bollandists in the *Acta Sanctorum, mens. Martii,* vol. iii; the *Libellus de Exordio Dunhelmensis Ecclesiæ,* by Symeon of Durham; the *Libellus de Nativitate S. Cuthberti de Historiis Hybernensium excerptus,* and the *Libellus de Admirandis B. Cuthberti Virtutibus,* by Reginald of Durham, both published by the Surtees Society. There are two modern memoirs of St. Cuthbert—the late Rev. James Raine's *St. Cuthbert* (Durham, 1828), and the Very Rev. Monsignor C. Eyre's *History of St. Cuthbert* (Lond. 1849)."—Chambers, *Encyclopædia,* s. v.; Butler, *Lives of Saints,* March 20; Herzog, *Real-Encyklop.* xix, 374.

Cuthites. See CUTH.

Cutler, Benjamin Clarke, D.D., a minister of the Protestant Episcopal Church, was born in Roxbury, Mass., Feb. 6, 1798, and died in Brooklyn, N.Y., Feb. 10, 1863. On his mother's side he was descended from the Huguenots. His religious character developed early; it was marked by no epoch of sudden transition, but at the age of eighteen, two years after his confirmation, he became a decided Christian. He immediately began to study for the ministry, and graduated with high honor at Brown University in 1822. He discharged the functions of the ministry seven years in Quincy, Mass.; one year in Leesburg, Va.; two years in New York as a city missionary, and thirty years as rector of St. Ann's Church, Brooklyn. As a preacher he was pre-eminently evangelical, and as a pastor remarkably successful. He was one of the originators and most active promoters of the missionary work of the Protestant Episcopal Church. He was a Low-Churchman, and was deeply grieved by the rise of Puseyism, and its introduction into this country. He wrote of it as "the reigning heresy of incipient Romanism." In 1843 he visited England for the sake of his health. On his return the vessel struck a shoal in the harbor of New York, and for twelve hours it labored heavily in a storm. Always after he observed the anniversary of that day as an occasion of special thanksgiving. Dr. Cutler was a chronic invalid. Before he went to college he was thought to be in a decline, and his life was one long battle with disease. His final illness was protracted and very distressing. He would often say, "the under-currents are all peace." He left no published works except a few occasional discourses and a volume of sermons, which are good specimens of direct, fervent Gospel preaching.

Cutler, Manasseh, LL.D., a Congregational minister, was born in Killingly, Conn., May 28, 1742, graduated at Yale 1765, studied law, and was admitted to the bar, but in a short time devoted himself to the study of theology. He was installed pastor in Hamilton, Mass., Sept. 11, 1771. After the Revolution the Ohio Company chose him agent for the purchase of land in the West, and Washington offered him the honorable position of judge of the U. S. Court in the North-west Territory, but he declined. He was elected to Congress in 1800. Dr. Cutler devoted himself largely to botany, and to the study and practice of medicine, but retained his pastoral relation until his death, July 28, 1823. He was made LL.D. by Yale in 1789. He published a number of articles on scientific subjects and a few occasional sermons.—Sprague, *Annals,* ii, 15.

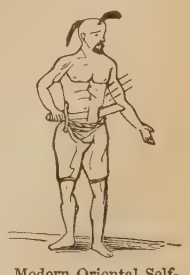
Cutler, Timothy, D.D., minister of the English Church in America, was born at Charlestown, Mass., in the year 1683, and graduated at Harvard in 1701. He was educated and ordained for the Presbyterian ministry, and in 1710 was installed pastor of the Congregational church in Stratford, Conn. He became president of Yale College in 1719, at the request of the trustees; but on the day after Commencement in 1772, a paper was presented to the clergy and others assembled in the college library, signed by the rector and one of the tutors, together with several of the neighboring ministers, in which they say: "Some of us doubt of the validity, and the rest are fully persuaded of the invalidity, of Presbyterian ordination in opposition to Episcopal." In October following a dis-

cussion took place in the college library, the principal speakers being the rector and Mr. Samuel Johnson (afterwards Dr. Johnson, of Hartford) on the one side, and governor Saltonstall on the other. The result was that the rector declared himself confirmed in his Episcopal proclivities, and in October following the trustees voted "to excuse the Rev. Mr. Cutler from all further service as rector of Yale College." He went to England in July, 1722, to procure Episcopal ordination, which he received the following year, with the degree of D.D. from both Oxford and Cambridge. In 1723, on his return, he was appointed missionary to the Society for the Propagation of the Gospel, and became rector of Christ Church, Boston. In that station he died, Aug. 17, 1765. He published several occasional sermons.—Sprague, *Annals*, v, 50.

Cutting (IN THE FLESH), expressed technically by שֶׂרֶט, *se'ret* (Lev. xix, 28), or שָׂרֶטֶת, *sare'teth* (Lev. xxi, 5, where the cognate verb שָׂרַט, *sarat'*, is used in the same connection), a *gash* or incision (Sept. ἐντομίς, Vulg. *incisura*) in the flesh (בְּבָשָׂר); also by גְּדוּד, *gedud'* (Jer. xlvii, 37), a *cut* in the skin (e. g. the hand, as there; the verb גָּדַד, *gadad'*, occurs in the same sense, with reference to the ceremonies of mourning, Jer. xvi, 6; xli, 5; xlvii, 5, or as a part of idol worship, Deut. xiv, 1; 1 Kings xviii, 28); and by קַעֲקַע, *kaaka'*, a "mark" punctured on the person (Lev. xix, 28); compare the dæmoniac in Mark v, 5, κατακόπτων ἑαυτόν, "cutting himself" with stones. Among the prohibitory laws which God gave the Israelites there was one that expressly forbad the practice embraced in those words, viz. "Ye shall not make any cuttings in your flesh for the dead" (Lev. xix, 28). It is evident from this law that such a species of *self-inflicted* torture obtained among the nations of Canaan; and it was doubtless to guard his people against the adoption of so barbarous a habit, in its idolatrous form, as well as to restrain desperate grief (comp. 1 Thess. iv, 13; see Macdonald, *Introd. to the Pentateuch*, Edinb. 1861, p. 113), that God led Moses to *reiterate* the prohibition: "They shall not make baldness upon their heads, neither shall they shave off the corner of their beards, nor make any cuttings in their flesh" (Lev. xxi, 5; Deut. xiv, 1). (See J. G. Michaelis, *De incisura propter mortuos*, F. ad O. 1733.) See CORNER.

1. The ancients were very violent in their expressions of sorrow. Virgil represents the sister of Dido as tearing her face with her nails, and beating her breasts with her fists (*Æn.* iv, 672). Some of the learned think that that law of Solon's which was transferred by the Romans into the Twelve Tables (Cicero, *De Leg.* ii, 23), *that women in mourning should not scratch their cheeks* (*Corp. Jur. Civ.* v, 66, 67, ed. Godofredus, 1583), derived its origin from this law of Moses (Lev. xix, 28). But, however this opinion may be questioned, it would appear that the simple tearing of the flesh out of grief and anguish of spirit is taken in other parts of Scripture *as a mark of affection:* thus (Jer. xlviii, 37), "Every head shall be bald, every beard clipped, and upon all *cuttings*." Again (ch. xvi, 6): "Both the great and the small shall die in the land: they shall not be buried, neither shall men lament for them, *nor cut themselves*." So (ch. xli, 5): "There came from Samaria fourscore men having their heads shaven and their clothes rent, and having cut themselves, with offerings to the house of the Lord." A notion apparently existed that self-inflicted baldness or mutilation had a propitiatory efficacy with respect to the manes of the dead, perhaps as representing, in a modified degree, the solemnity of human or animal sacrifices. Herodotus (iv, 71) describes the Scythian usage in the case of a deceased king, for whose obsequies not fewer than six human victims, besides offerings of animals and other effects, were considered necessary. An extreme case of funereal bloodshed is represented on the occasion of the burial of Patroclus, when four horses, two dogs, and twelve Trojan captives are offered up (*Il.* xxiii, 171, 176). Originally used with human or animal sacrifices at funerals, after these had gone out of use, the minor propitiatory acts of self-laceration and depilation continued alone (*Il.* xxiii, 141; *Od.* iv, 197; Virg. *Æn.* iii, 67, with Servius ad loc. xii, 605; Eurip. *Alc.* p. 425; Seneca, *Hippol.* v, 1176, 1193; Ovid, *Eleg.* I, iii, 3; Tibullus, *Eleg.* I, i, 1). Plutarch says that some barbarians mutilate themselves (*De Consol. ad Apollon.* p. 113, vol. vi, Reiske). He also says that Solon, by the advice of Epimenides, curtailed the Athenian practice in this respect (*Solon.* 12–21, i, 184, 194). Such being the ancient heathen practice, it is not surprising that the law should forbid similar practices in every case in which they might be used or misconstrued in a propitiatory sense. "Ye shall not make cuttings *for* (*propter*) the dead," לָנֶפֶשׁ (Lev. xix, 28; see Gesenius, *Thes. Heb.* p. 731; Spencer, *De Leg. Hebr.* II, xix, 404, 405). See GRIEF.

2. But the practice of self-mutilation as an act of worship belonged also to heathen religious ceremonies not funereal. The priests of Baal, a Syrian and also an Assyrian deity, cut themselves with knives to propitiate the god "after their manner" (1 Kings xviii, 28). Herodotus says that the Carians, who resided in Europe, cut their foreheads with knives at festivals of Isis; in this respect exceeding the Egyptians, who beat themselves on those occasions (Herod. ii, 61). This shows that the practice was not then at least an Egyptian one. Lucian, speaking of the Syrian priestly attendants of this mock deity, says that, using violent gestures, they cut their arms and tongues with swords (Lucian, *Asinus*, c. 37, vol. ii, 102, Amst.; *De Dea Syr.* ii, 658, 681; comp. Ezek. viii, 14). Similar practices in the worship of Bellona are mentioned by Lucan (*Phars.* i, 560), and alluded to by Ælius Lampridius (*Comm.* p. 209), by Tertullian (*Apol.* 9), and Lactantius (*Div. Instit.* i, c. 21, 29, Paris). Herodotus, speaking of means used for allaying a storm, uses the words ἕντομα ποιεῦντες, which may mean cutting the flesh, but more probably offering human sacrifices (Herod. vii, 191; ii, 119, with Schweighäuser's note; see also Virg. *Æn.* ii, 116; Lucr. i, 85). Agreeably to the inference which all this furnishes, we find Tacitus declare (*Hist.* i, 4) that "the gods care, not for our safety, but *punishment*." In fact, it was a current opinion among the ancient heathen that the gods were *jealous* of human happiness; and in no part of the heathen world did this opinion more prevail, according to Sanchoniathon's account, than among the inhabitants of those very countries which surrounded that land where God designed to place his people Israel. The prohibition, therefore, is directed against practices prevailing, not among the Egyptians whom the Israelites were leaving, but among the Syrians, to whom they were about to become neighbors (Selden, *De Diis Syris*, lib. ii, c. 1). The spirit of Islam is less favorable than that of heathenism to displays of this kind; yet examples of them are not of rare occurrence even in the Moslem countries of Western Asia, including Palestine itself. The annexed figure is copied from one which is represented in many of the books of travel in Egypt and Palestine that were printed in the seventeenth century. It is described by the missionary Eugene Roger (*La Terre Saincte*, etc., 1646, p. 252) as representing "one of those calenders or devotees whom the Arabs name Balhoaua," and whom the simple people honor as holy martyrs. He appears in public with a



Modern Oriental Self-torture.

cimeter stuck through the fleshy part of his side, with three heavy iron spikes thrust through the muscles of his arm, and with a feather inserted into a cut in his forehead. He moves about with great composure, and endures all these sufferings, hoping for recompense in the Paradise of Mohammed. Add to this, the common accounts of the gashes which the Persian devotees inflict upon themselves, in the frenzy of their love and grief, during the annual mourning for Hassan and Hossein (see Mrs. Postans, in the *Jour. Sac. Lit.*, July, 1848, p. 107). The Mexicans and Peruvians offered human sacrifices both at funerals and festivals. The Gosáyens of India, a class of Brahminical friars, endeavor in some cases to extort alms by gashing their limbs with knives. Among the native negro African tribes also the practice appears to prevail of offering human sacrifices at the death of chiefs. (See Chardin, *Voyages*, vi, 482; ix, 58, 490; Olearius, *Travels*, p. 237; Lane, *Mod. Eg.* ii, 59; Prescott, *Mexico*, i, 53, 63; *Peru*, i, 86; Elphinstone, *Hist. of India*, i, 116; Strabo, xv, 711 et sq.; Niebuhr, *Voyages*, ii, 54; Livingstone, *Travels*, p. 318, 588; *Col. Ch. Chron.* No. cxxxi, 179; Muratori, *Anecd.* iv, 99, 100). See SACRIFICE.

3. But there is another usage contemplated more remotely by the prohibition, viz., that of printing marks (*στίγματα*), tattooing, to indicate allegiance to a deity, in the same manner as soldiers and slaves bore tattooed marks to indicate allegiance or adscription. (See Biedermann, *De Charact. corpori impressis*, Frib. 1755.) This is evidently alluded to in the Revelation of John (xiii, 16; xix, 20; xvii, 5), though in a contrary direction, by Ezekiel (ix, 4), by Paul (Gal. vi, 17), in the Revelation (vii, 3), and perhaps by Isaiah (xliv, 5) and Zechariah (xiii, 6). Lucian, speaking of the priests of the Syrian deity, says that they, and, in fact, the Assyrians generally, bear such marks on some part of their body (*De Dea Syr.* ii, 684). A tradition, mentioned by Jerome, was current among the Jews, that king Jehoiakim bore on his body marks of this kind which were discovered after his death (Spencer, *De Leg. Hebr.* II, xx, 410). Philo, quoted by Spencer, describes the marks of tattooing impressed on those who submitted to the process in their besotted love for idol-worship, as being made by branding (*σιδήρῳ πεπυωμένῳ*, Philo, *de Monarch.* i, 819; Spencer, p. 416). The Arabs, both men and women, are in the habit of tattooing their faces, and other parts of the body, and the members of Brahminical sects in India are distinguished by marks on the forehead, often erroneously supposed by Europeans to be marks of caste (Niebuhr, *Descr. de l'Ar.* p. 58; *Voyages*, i, 242; Wellsted, *Arabia*, ii, 206, 445; Olearius, *Travels*, p. 299; Elphinstone, *India*, i, 195). See MARK (ON THE PERSON).

CUTTING OFF (FROM THE PEOPLE). See EXCOMMUNICATION.

Cutty-stool, the stool or seat of repentance in the Scotch kirks, placed near the roof and painted black, on which offenders against chastity sit during service, professing repentance and receiving the minister's rebukes. It is somewhat remarkable that a breach of the seventh commandment should be the only sin subjecting the offender in the Scotch Church to this sort of discipline.

Cuyler, CORNELIUS C., D.D., born at Albany, N. Y., Feb. 15, 1783; graduated at Union College 1806; studied theology under Rev. Drs. Livingston and Bassett; licensed 1808 in the Reformed Dutch Church; settled in Poughkeepsie 1808–1833, and from that year until his decease, Aug. 31, 1850 was pastor of the Second Presbyterian Church, Philadelphia. Dr. Cuyler is represented as "an excellent model of diligence, fidelity, and wisdom," a man of strong and well-furnished mind, an earnest and effective preacher, an adept in the management of ecclesiastical business. His ministry was characterized by several powerful revivals of religion, in which his wisdom, zeal, and success were very conspicuous. His printed works consist of a number of occasional sermons, tracts, pamphlets, articles for periodicals and essays upon special topics, e. g. the subjects of Baptism, the Atonement, the Purity of the Ministry, Capital Punishment, etc.—Sprague, *Annals*, iv, 432.

Cy'amon (Κυαμών; Vulgate, *Chelmon*), a place named only in Judith vii, 3, as lying in the plain (*αὐλών*, A. V. "valley") over against (*ἀπέναντι*) Esdrelom. If by "Esdrelom" we may understand Jezreel, this description answers to the situation of the modern village Tell *Kaimôn*, on the eastern slopes of Carmel, on a conspicuous position overlooking the Kishon and the great plain (Robinson, *Later Res.* p. 114; Van de Velde, *Narrative*, i, 330). The place was known to Eusebius (Καμμωνά) and Jerome (*Cimana*), and is mentioned by them in the *Onomasticon* (s. v. Camon, Καμών), where they identify it with CAMON, the burial-place of Jair the Gileadite (Judg. x, 5).—Smith, s. v. Schultz assumes Cyamon to be identical with the modern *Kumieh*, south-east of Little Hermon (*Zeitschr. d. morg. Ges.* iii, 48); but Dr. Robinson (*ut sup.* p. 339) thinks this inconsistent with the true position (according to his location) of Bethulia (q. v.), and suggests that "*Cyamon*" may be only the Greek rendering (*κύαμος*) of the Heb. name (פּוֹל, *pol*, a *bean*) corresponding to the present *Fuleh*, on the east side of the plain of Esdraelon, a trace of which appears in the notices of the Crusaders (Wilken, *Gesch. der Kreuzz.* III, ii, 231, 267). But see JOKNEAM.

Cyaxares (Κυαξάρης, Græcised for the Old Pers. *Uvakshatara*, "beautiful-eyed," Rawlinson, *Herod.* iii, 455), the name of two Median kings. See MEDIA.

1. CYAXARES I was, according to Herodotus, the third king of Media, being the son of Phraortes, and grandson of Dejoces. His father having been killed while besieging Ninus (Nineveh), he, immediately on his accession, B.C. 634, collected all the military resources of the empire to revenge his father's death; but he was called away from the siege of Ninus by an attack of the Scythians, by whom he was defeated, and reduced to a tributary condition of great rigor for many years, B.C. 634–607 (Herod. i, 103). Herodotus elsewhere (i, 73 sq.) gives a different account of this war, as having originated in the treachery of Alyattes of Syria, who had sheltered some fugitive Scythians that had served up to Cyaxares as a banquet one of his own sons whom they had killed. The war, carried on for five years against the Lydians by the Median monarch, who evidently still retained his throne, was terminated by the mutual awe inspired by an eclipse, which has been variously calculated, but probably was that of Sept. 30, B.C. 610 (Bailly, *Philos. Transact.* 1811; Oltmann, *Schrift. der Berl. Acad.* 1812–13; Hales, *Anal. of Chronology*, i, 74–78; Ideler, *Handbuch der Chronologie*, i, 209 sq.; Fischer, *Griech. Zeittaf.* s. a. 610). Cyaxares after this expelled the Scythians, B.C. 607, and in the following year, with the aid of the king of Babylon, he took and destroyed the Assyrian capital, at that time governed by Sardanapalus. This event is referred to in the Apocrypha (Tob. xiv, 15), where the Median king is styled "Ahasuerus" (q. v.), and his Babylonian ally is called Nabuchodonosor, doubtless referring to Nabopolassar, the father of Nebuchadnezzar. See BABYLONIA. The result of this campaign, according to Herodotus, was, that the Medes made the Assyrians their subjects, except the district of Babylon, probably meaning that the king of Babylon now obtained complete deliverance from the yoke of Assyria. The league between Cyaxares and the king of Babylon is said by Polyhistor and Abydenus (ap. Euseb. *Chron. Arm.* and *Syncell.* p. 210 b) to have been cemented by the betrothal of Anyhis or Anytis, the daughter of Cyaxares, to Nabuchadrossar or Nabuchadonosor (i. e. Nebuchadnezzar), the son of the

Babylonian king. They have, however, by mistake, put the name of his son Asdapages (Astyages) for Cyaxares (Clinton, i, 271, 279). Cyaxares was a brave and energetic, but violent and cruel prince, and died B.C. 594, after a reign of 44 years, leaving the throne to Astyages (Herod. i, 73, 74, 103–106; iv, 11, 12; vii, 20).—Smith, *Dict. of Class. Biog.* s. v.

2. CYAXARES II, the son of Astyages and grandson of the preceding, succeeded his father at the age of forty-nine years; but, being of a gentle disposition, he left the government principally in the hands of his nephew and son-in-law Cyrus. This account is given by Xenophon (in his *Cyropædia*), with which, however, the statements of Herodotus and Ctesias materially disagree. See CYRUS. This Cyaxares is believed to be the "Darius the Mede" (q. v.) referred to in the book of Daniel (ix, 1).

Cycle, a certain number of years in civil and ecclesiastical chronology. The *Lunar Cycle* (*cyclus lunæ*, or *decemnovalis*) embraces nineteen years, after the expiration of which the days of the new and full moon generally fall again upon the same day of the month. The Greek astronomer Meton is the inventor of this cycle. Anatolius, bishop of Laodicea, in Syria, toward the close of the third century, first used it for calculating Easter (q. v.). When the Council of Nice terminated the Easter controversy, and established uniformity in the celebration of Easter, the bishops of Alexandria were commissioned to calculate annually the time of Easter, and to communicate it to the other metropolitans. At first the bishops of Alexandria used astronomical calculations, but subsequently they again adopted the lunar cycle, and by means of it calculated Easter for a number of cycles in advance. Thus the patriarch Theophilus of Alexandria prepared an Easter cycle for 480 years, or 22 lunar cycles, beginning with the year 380. This cycle was, however, not well received in the Western churches, and patriarch Cyril consequently reduced it to 95 years, or five lunar cycles. This new Easter cycle extended from 437 to 531. When it approached its termination, Dionysius Exiguus (q. v.), in 525, proposed a new Easter cycle, which embraced 16 lunar cycles, or 304 (Julian) years. The defects of this cycle resulted from the inaccuracy of the Julian year, and were not remedied until the introduction of the Gregorian calendar. Nearly connected with the lunar cycle is the *Golden Number* (q. v.), which indicates what place a given year occupies in the lunar cycle. The *Cycle of the Sun* (or of the dominical letter) embraces 28 years, after the expiration of which the Sundays, and consequently also the days of the week, fall again upon the same days of the month. In Christian chronology it became early customary to use the first seven letters of the alphabet for designating the seven days of the week. *A* was always used for the 1st of January, and the letter upon which fell the first Sunday of the year was called the *Dominical Letter*, which, in ordinary years, designated every Sunday of the year. But in every fourth year the 25th of February was intercalated, and as it had the same letter as the 24th of February, the intercalary year had two dominical letters, one applying from Jan. 1 to Feb. 24, and the second from Feb. 25 to the close of the year. As an ordinary year consists of 52 weeks and 1 day, the dominical letter of the new year is generally the one preceding the dominical letter of the year past; and if all years were ordinary years of 365 days, the same dominical letter would revert every seventh year. As there is, however, a change of one day every fourth year by the intercalation of one day, and the consequent advance of the dominical letter, it takes four times seven, or 28 years, before the cycle is completed, and the same series of dominical letters recommences. Another slight disturbance is, however, produced by the omission of the intercalary day three times in every 400 years (thus, in the years 1700, 1800, 1900).

To find the dominical letter of a particular year, it is first necessary to find the place of the year in the cycle of the sun. As, according to the chronology of Dionysius, Christ is said to have been born in the ninth year of the cycle of the sun, the place of a particular year in the cycle of the sun is found by adding 9 to the given year, and dividing the whole by 28, the remainder indicating the place of the year in the cycle. For instance, to find the dominical letter for the year 1868, we add 9 and divide by 28; thus, $\frac{1868+9}{28}=\frac{1877}{28}$, which leaves a remainder of 1. The year 1868, therefore, is the first of the cycle of the sun for the present century (the omission of the intercalary day in the year 1800, as stated above, interrupting the regular order of the cycle). The cycle of the dominical letter is as follows:

Year.	Dom. L.	Year.	Dom. L.	Year.	Dom. L.	Year.	Dom. L.
1st	ed	8th	c	15th	a	22d	f
2d	c	9th	ba	16th	g	23d	e
3d	b	10th	g	17th	fe	24th	d
4th	a	11th	f	18th	d	25th	cb
5th	gf	12th	e	19th	e	26th	a
6th	d	13th	dc	20th	b	27th	g
7th	e	14th	b	21st	ag	28th	f

The intercalary year 1868, as the first of a new cycle, has therefore the two dominical letters e d, e from Jan. 1 to Feb. 24, and d from Feb. 25 to Dec. 31. After thus ascertaining the dominical letter of the year, it is easy to find what days of every month are Sundays. For that purpose the initial letters of the several words in the following two hexameters are used:

Astra **D**abit **D**ominus **G**ratisque **B**eabit **E**genos
Gratia **C**hristicolæ **F**eret **A**urea **D**ona **F**ideli.

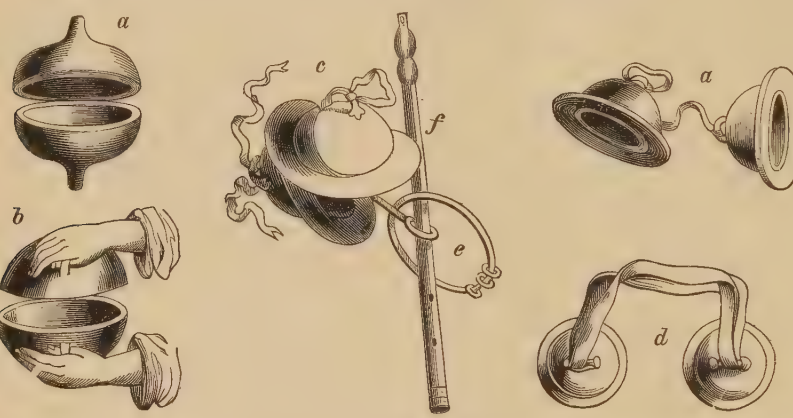
The initial letters of the words of these two verses are the letters designating the first days of every month. *A* being the 1st of January, and *E* being the dominical letter of the year 1868 from Jan. 1 to Feb. 24, the Sundays of 1868 are the 5th, 12th, 19th, and 26th of January. The initial *D* of the second word shows that the first dominical letter (*E*) of February falls on the 2d of February. For March and the following months, the dominical letter of the year 1868 is *D*; consequently, the first Sundays of the following months are, March 1, April 5, May 3, June 7, July 5, August 2, September 6, October 4, November 1, and December 6.

Finally, in order to ascertain upon which day of the month and the week full and new moons occur, the *Epacts* are used.—Wetzer und Welte, *Kirchen-Lex.* ii, 960. See EPACTS; CHRONOLOGY, CHRISTIAN.

Cymbal (צֶלְצַל, *tselatsal'*, in the plur. 2 Sam. vi, 5; Psa. cl, 5; or מְצִלְתַּיִם, *metse'leth*, in the dual, 1 Chron. xiii, 8; xv, 16, 19, 28; xvi, 5, 42; xxv, 1, 6; 2 Chron. v, 12, 13; xxix, 25; Ezra iii, 10; Neh. xii, 27; both from צָלַל, *tsalal'*, to *tinkle*; κύμβαλον, in the plur. 1 Esdr. iv, 9; Judith xvi, 2; 1 Macc. iv, 54; 1 Cor. xiii, 1), a musical instrument consisting of two convex pieces of brass, which are struck together to make the rythm or time, and produce a loud clanging sound. They are generally employed in connection with the drum in out-door orchestras. Josephus (*Ant.* vii, 12, 3) describes in like manner the cymbals (κύμβαλα) used in the Temple services as "large plates of brass." They were used from the most ancient times in the East as a part of a martial band in public religious occasions (1 Chron. xiii, 8), and also by females in connection with dancing (Lucian, *Saltat.* c. 68; comp. Chrysost. *in Gen. XXIV*, hom. 48; Clem. Al. *Pædag.* ii, 4); also along with the drum (Pliny, v, i). Niebuhr (*Reis.* i, 181, pl. 27) learned that in Arabia two kinds of *castanets* were employed in a similar manner; one of small metal clappers held between the thumb and fingers, especially by females, as with the dancing-girls of Egypt (Lane, *Mod. Eg.* ii, 106); the other consisting of larger pieces of metal, like our cymbals. Pfeiffer (*Musik der Hebr.* p. 55) thinks this distinction

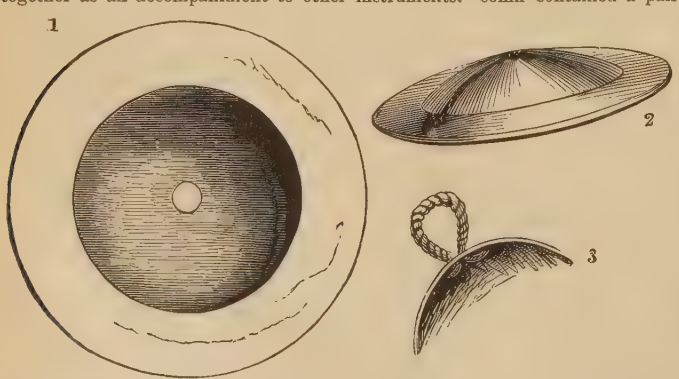
Dancing Figures, with Castanets.—From Herculaneum.

is intended between the two kinds of cymbals mentioned in Psa. cl, 5, צִלְצְלֵי שָׁמַע, "loud cymbals," and צִלְצְלֵי תְרוּעָה, "high-sounding cymbals." "The Asaph, Heman, and Jeduthun, the renowned conductors of the music of the sanctuary, employed the 'loud cymbals' possibly to beat time, and to give the signal to the choir when it was to take part in the sacred chant." The ancient Egyptians likewise had cymbals and cylindrical *maces* (*crotala*, or clappers), two of which were struck together, and probably emitted a sharp metallic sound. The cymbals were of mixed metal, apparently brass, or a compound of brass and silver, and of a form exactly resembling those of modern times, though smaller, being only seven, or five inches and a half in diameter. The handle was also of brass, bound with leather, string, or any similar substance, and being inserted in a small hole at the summit, was secured by bending back the two ends. The same kind of instrument is used by the modern inhabitants of the country, and from them have been borrowed the very small cymbals played with the finger and thumb, which supply the place of castanets in the *almeh* dance. These were the origin of the Spanish castanet, having been introduced into that country by the Moors, and afterwards altered in form, and made of chestnut (castaña) and other wood instead of metal. The cymbals of modern Egypt (see *Descr. de l'Egypte*, xiii, 496 sq.) are chiefly used by the attendants of sheiks' tombs, who travel through the country at certain periods of the year to exact charitable donations from the credulous or the devout among the Moslems by the promise of some blessing from the indulgent saint. Drums and some other noisy instruments, which are used at marriages and some other occasions, accompany the cymbals, but these last are more peculiarly appropriated to the service of the sheiks, and the external ceremonies of religion, as among the ancient Egyptians; and a female, whose coffin contained a pair of cymbals, was described in the hieroglyphics of the exterior as the minstrel of a deity. The cylindrical maces, or clappers, were also admitted among the instruments used on solemn occasions, and they frequently formed part of the military band, or regulated the dance. They varied slightly in form, and some were of wood or of shells; others of brass, or some sonorous metal having a straight handle, surmounted by a head or other ornamental device. Sometimes the handle was slightly curved, and double, with two heads at the upper extremity; but in all cases the performer held one in



Ancient Cymbals.—From Herculaneum.

former probably consisted of four small plates of brass or of some other hard metal; two plates were attached to each hand of the performer, and were smitten together to produce a loud noise. The latter consisted of two larger plates, one held in each hand, and struck together as an accompaniment to other instruments.



Ancient Egyptian Cymbals (5½ inches in diameter).—From the British Museum.

each hand; and the sound depended on their size, and the material of which they were made. When of wood they corresponded to the *crotala* of the Greeks, a supposed invention of the Sicilians, and reported to have been used for frightening away the fabulous birds of Stymphalus; and the paintings of the Etruscans show that they were adopted by them, as by the Egyptians, in the dance (Wilkinson, *Anc. Egypt.* i, 99 sq.). Among the Greeks and Romans cymbals of a similar description were anciently used in the worship of Cybele, Bacchus, Juno, and other earlier deities. They were probably derived from the East. At Rome they are first mentioned in Livy's account (xxxix, 9) of the Bacchic orgies introduced from Etruria (Smith, *Dict. of Class. Antiq.*, s. v. Cymbalum). See Mendelssohn's Preface to *Book of Psalms;* Kimchi; Lewis, *Origines Hebrææ* (Lond. 1724, 176–7); Forkel, *Gesch. der Musik;* Jahn, *Archæology*, Am. ed., cap. v, § 96, 2; Munk, *Palestine*, p. 456; Esendier, *Dict. of Music*, i, 112. Lampe has an excellent dissertation, *De Cymbalis veterum* (Traj. ad Rh. 1703; also in Ugolini *Thes.* xxxii). Monographs on the subject have also been written in Latin by Ellis (*Fortuita Sacra*, Rotterd. 1727, p. 257–378), Magius (Amst. 1664), Zorn (*Opusc.* i, 111–163). See Musical Instruments.

Cypress (תִּרְזָה, *tirzah'*, from its *hardness*; Sept. ἀγριοβάλανος, but most copies omit; Vulg. *ilex*) is mentioned only in Isa. xliv, 14: "He (i. e. the carpenter, ver. 13) heweth him down cedars, and taketh the *cypress*," for the purpose of making an idol. There is no doubt that the wood must have been of a texture fit to be worked, as well as to retain the shape given to it. Though translated "cypress," we have no proof that this tree was intended, but it is well suited for the purpose indicated. See Fir. The Greek translators, Aquila and Theodotion, have employed a word which denotes the wild or forest oak (ἀγριοβάλανος). The oldest Latin version renders the Heb. word by *ilex*, "the evergreen oak" (Rosenmüller, p. 317). As the wood of this species is well fitted for being worked into images, and was so employed by the ancients, it is possible that it may be that intended, though we have no satisfactory proof of its being so. Celsius (*Hierob.* ii, 269, 70) defends the rendering of the Vulg. in Isa. xliv, 14, but the etymology of the word from תָּרַז, *to be hard* (as in Latin we get *robur*, an oak), equally well suits the cypress, and there is great probability that the tree mentioned by Isaiah with the cedar and the oak is identical with the "cypress" (κυπάρισσος) of the Apocrypha. In Ecclus. xxiv, 13, it is described as growing upon the mountains of Hermon; and it has been observed by Kitto (*Phys. Hist. of Palest.* p. ccxxiv) that if this be understood of the great Hermon, it is illustrated by Pococke, who tells us that it is the only tree which grows towards the summit of Lebanon. In Ecclus. l, 10, the high-priest is compared to a "cypress towering to the cloud," on account of his tall and noble figure. It is usually supposed that the words translated "fir," "gopher-wood," and "thyine-wood," in our version of the Bible indicate varieties of the juniper or cypress. (See each in its alphabetical order.)

The Cypress (*Cupressus Sempervirens*).

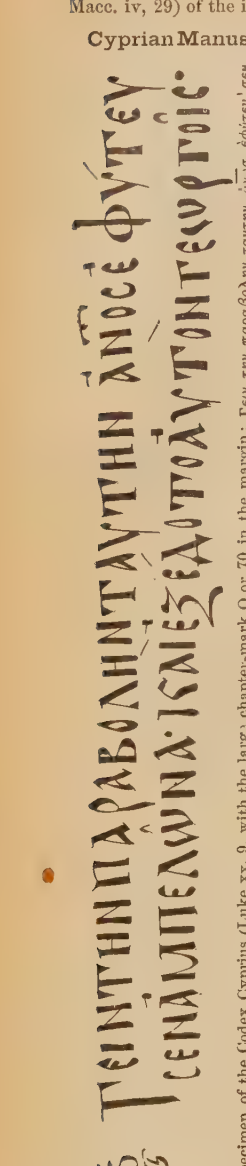
Cypress, the κυπάρισσος of the Greeks and the *suroo* of the Arabs, called also by them *shujrut-alhyat*, or tree of life, is the *Cupressus sempervirens*, or the evergreen cypress of botanists. This tree is well known as being tapering in form, in consequence of its branches growing upright and close to the stem, and also that in its general appearance it resembles the Lombardy poplar, so that the one is often mistaken for the other when seen in Oriental drawings. In southern latitudes it usually grows to a height of fifty or sixty feet. Its branches are closely covered with

Cypress Branch and Cone.

very small imbricated leaves, which remain on the trees five or six years. Du Hamel states that he has observed on the bark of young cypresses small particles of a substance resembling gum tragacanth, and that he has seen bees taking great pains to detach these particles, probably to supply some of the matter required for forming their combs. This cypress is a native of the Grecian Archipelago, particularly of Candia (the ancient Crete) and Cyprus, and also of Asia Minor, Syria, and Persia. It may be seen on the coast of Palestine, as well as in the interior, as the Mohammedans plant it in their cemeteries. That it is found on the mountains of Syria is evident from the quotations by Celsius (*Hierobot.* i, 133), from Cyril of Alexandria (*in Esaiam*, p. 848), Jerome (*Comment. in Hos.* xiv, 6), and others. See Cedar. The wood of the cypress is hard, fragrant, and of a remarkably fine close grain, very durable, and of a beautiful reddish hue, which Pliny says it never loses (*Hist. Nat.* xvi, 33). As to the opinion respecting the durability of the cypress-wood entertained by the ancients, it may be sufficient to adduce the authority of Pliny, who says that "the statue of Jupiter, in the Capitol, which was formed of cypress, had existed above 600 years without showing the slightest symptom of decay, and that the doors of the temple of Diana at Ephesus, which were also of cypress, and were 400 years old, had the appearance of being quite new." This wood was used for a variety of purposes, as for wine-presses, poles, rafters, and joists, and was an especial favorite for funereal grounds. Horace says (*Carm.* ii, 14, 23) that whatever was thought worthy of being handed down to remote posterity was preserved in cypress or cedar wood; and Virgil refers to it in similar terms (*Georg.* ii, 442; *Æn.* v, 64). (See *Penny Cyclopædia*, s. v. Cupressus.) See Botany.

Cyp'rian (Κύπριος), a Cypriot or inhabitant (2 Macc. iv, 29) of the island of Cyprus (q. v.).

Cyprian Manuscript (Codex Cyprius, so called from its place of discovery), usually designated as K of the Gospels, one of the important uncial MSS. of the N. T., containing the four Gospels complete, was brought into the Colbert collection from Cyprus in 1673, and is now in the Royal or National Library at Paris, where it is No. 63. It is an oblong quarto, written in a single column of about twenty-one lines on each page, in large upright and compressed characters, somewhat irregular. A single point of interpunction often standing where the sense does not require it, seems to indicate that it was copied from a text arranged in *στίχοι*. The subscriptions, *τίτλοι*, Ammonian sections, and indices of the *κεφάλαια* of the last three Gospels, are believed to be the work of a later hand; the Eusebian canons are absent. The breathings and accents are by the first hand, but often incorrectly placed. The writing, etc., may be taken as proof that the MS. is not older than the middle of the ninth century. Wetstein used readings from it for his N. T., and Scholz also collated it, but not accurately. This has been done more thoroughly by Tischendorf and Tregelles. The MS. yields many valuable readings.—Scrivener, *Introduc.* p. 101 sq.; Tregelles, in Horne's *Introduc.* iv, 201 sq. See Manuscripts, Biblical.



Specimen of the Codex Cyprius (Luke xx, 9, with the large chapter-mark O or 70 in the margin: Περι την παραβολην ταυτην ειπεν εφ' ετερ'σεν ημερων και εξεδοτο αυτον γεωργοις).

Cyprian, Thascius Caecilius, a bishop and martyr, was born in North Africa, probably in Carthage, about the beginning of the third century. His father was wealthy, and one of the principal senators of Carthage. His noble parentage insured him a good education, by which his natural endowments, which were of a high order, were duly developed, both intellectually and morally, according to the heathen type of training. The representation he gives, after his conversion to Christianity, of his earlier immoral life, is generally regarded as an exaggeration springing from humility, and the legend to the effect that he had given himself to the practice of sorcery is not accredited. His life, while he still stood in heathenism, is very much buried in obscurity, even as to the precise time and place of his birth. His biographer, the deacon Pontius, regarded all this as unworthy of mention "in view of that spiritual greatness" which characterized his subsequent life. It seems, however, that he was an earnest student, and that, having enjoyed all the advantages furnished in his time, he excelled in the study of oratory and eloquence, and devoted himself to the teaching of law and rhetoric in his native city, where he was greatly admired, became wealthy, and lived in affluence and grandeur. His life seems to have received new impetus, concentrated purpose, and true meaning from the time of his conversion and baptism, which occurred A.D. 246, when he was not far short of fifty years old. He had been won to Christianity by a presbyter, Caecilius, who also instructed and prepared him for baptism, at which time Cyprian added to his name that of Caecilius, out of gratitude to his Christian teacher. Before his conversion he was exercised by a deep sense of the vanity of heathenism. In his tract *De Gratia Dei*, addressed to his friend Donatus soon after his conversion, speaking of his spiritual state while yet in heathenism, he says: "I lay in darkness, and floated on the world's boisterous sea, with no resting-place for my feet, ignorant of my proper life, and estranged from truth and light." God's mercy in his baptism he ever praises as being a marked epoch in his life. He felt himself to be a new man, having received "by means of the regenerating wave" the "second birth, by the Spirit derived from on high." As a new man, he now devoted himself fully to the study of the holy Scriptures, and also to a life of celibacy and voluntary poverty. He studied the holy Scriptures earnestly, and also the best ecclesiastical writers known, among whom Tertullian was his favorite, with whom he communed in mind every day, calling for him, as Jerome relates, with the simple word, "Hand me the Master." He sold his estate, and gave the proceeds, together with almost all else that he possessed, for the support of the poor. This he did with the double end in view of renouncing and despising all secular influences, and at the same time fulfilling the law of charity, which he believed God prefers to all sacrifices. Besides the above-mentioned letter, *ad Donatum*, he about this time wrote several works, in which he unfolded his new principles and convictions, as, for instance, *De idolorum vanitate* and his *Libri III testimoniorum adv. Judæos*. So wonderfully grew his Christian reputation that, on the death of Donatus, the bishop of Carthage, there was a pressing cry from both clergy and laity that Cyprian might be ordained as his successor. He modestly declined the nomination, but the people would not be put off. They so besieged him with their importunities that he fled into retirement to avoid the popular pressure; but the place of his concealment was discovered, and the people surrounded his house, closed every avenue of escape, and refused to withdraw until he should yield to their wishes. He at length humbly bowed to what seemed to him now a necessity imposed on him by the providence of God. Thus, in perhaps not more than two years after his baptism, with the unanimous approbation of the bishops of the province, he was consecrated bishop of Carthage A.D. 248. His elevation to this place of dignity and power, though effected under such wide favor, was for him the beginning of long and severe conflicts. Opposition to him arose among some presbyters. Some of the more aged, among whom were Fortunatus and Donatus, who had themselves aspired to the vacant office, with some of their friends among the laity, opposed his elevation as being still only a novice in the Church. See Donatists. These gave him much trouble. He treated them with kindness, but at the same time maintained the authority and dignity of his office with decision. In the time of peace which had preceded his official term, luxurious extravagance and immorality had gotten the upper hand in society. Cyprian pushed earnestly for reform and discipline. This became the occasion of increased opposition, his strictness having been attributed to a spirit of hierarchical assumption of power, though he did nothing, especially in the beginning of his episcopate, without first gathering in the views of the presbyters, whom he calls his *compresbyteri* (comp. Ep. 14). Still worse troubles came with the persecution under Decius, which broke out not much more than a year after he had been raised to the episcopal office, in which the heathen populace

with violence demanded his death, crying *Cyprianum ad leonem!* The cruel edict came to Carthage about the beginning of A.D. 250. The heathen hailed it as letting loose their rage upon one who, having but a few years before stood so prominent in heathenism, now occupied the front rank in the Christian Church. He accordingly was their first mark. He, however, saved himself by flight, which was made the occasion for fresh reproaches from those in the Church who still bore the old grudge against him. Some saw cowardice in this self-exile, but many praised it from considerations of prudence, and as a course which would still preserve his great worth and influence to the Church after peace should be restored. He kept himself in constant correspondence with the Church, and in the deepest sympathy with the trials of the confessors and martyrs. He longed to be with them, and looked upon himself as deprived of all this by a necessity painful to his heart. He himself seems to have possessed the consciousness of having been in the path of duty, and he gave abundant evidence in his after life, in times of pestilence and in the persecution of Valerian, that he possessed the firmest Christian courage, and knew no fear of death in the path of duty. The strict and severe manner in which, after his return from flight, he dealt with those who had denied the faith under trial was not favorably regarded even by those who had faithfully endured the persecution, and was viewed as coming with less charity and grace from him who had himself withdrawn from the fire. The effects of the persecution had been terribly disastrous. Multitudes were driven from the faith like chaff before the wind. Cyprian looked upon it as a providential sifting of the Church made necessary by its previous worldly and immoral state, and hence was concerned that the lapsed should not be restored without the strictest care. Of the havoc and confusion thus produced in the Church, and the troubles of restoration, he gives a sad picture in his work *De Lapsis*. His strictness with the lapsed gave rise to new troubles. The faction of disaffected presbyters was headed now by Felicissimus, with whom were joined Novatian and four others who refused to acknowledge his authority in the form he exercised it in the case of the lapsed. They undertook to establish an independent church, into which the lapsed were to be allowed to enter without further delay. Many of the impatient among the lapsed were charmed by this open door for speedy restoration. The result was a serious schism. Cyprian maintains his position firmly, and in a letter warns all against this snare of the devil (Epistle 43). An important series of controversies ensues relating to the unity of the Church, the nature of schism, the validity of baptism by heretics, and affiliated points, which became the occasion of one of the most important works of Cyprian on *The Unity of the Church*. This controversy also gradually involved the question of the independency of the episcopate, and the merits of the claims of Stephanus, the bishop of Rome, as over against the bishop of Carthage. (See Herzog's *Real-Encyklopädie*, iii, 219, 220; also four articles on Cyprian by Dr. Nevin in the *Mercersburg Review*, vol. iv, 1852, particularly p. 527–536.) In this Novatian controversy Cyprian showed great bitterness as well as great firmness, and his statements as to his adversaries are to be taken with many grains of allowance. Hagenbach, in Herzog's *Real-Encyklopädie*, briefly sums up the closing scene of his life, and gives an estimate of his character, which we translate. "At length the time came when he should have opportunity to wipe out the stain which was supposed to rest on his name in consequence of his flight by the blood of his own martyrdom. It took place in the Valerian persecution. On the 30th of August, 257, it was demanded of him by the Roman consul, Aspasius Paternus, to offer to the gods. Having refused, he was banished to Caribis, a day's journey from Carthage. From this place he comforted the Church through letters. In a dream he saw foreshadowed the bloody fate which should in a year befall him. Having been called back from exile, he withdrew for a brief season to his country home. Under the consul Galerius Maximus, the successor of Aspasius Paternus, he received his final hearing. With serene composure and the words 'God be praised,' he welcomed the sentence, which was that he should be executed by the sword. Followed by a large crowd of spectators, he was led out beyond the city to a spot planted with trees. Here he laid off his over-clothes, kneeled down, prayed, and received the stroke of death, on the 14th of September, A.D. 258. To the executioner he gave twenty-five pieces of gold. The Christians buried him near the spot on which he suffered martyrdom. Over his grave, as well as over the place where he suffered death, churches were afterwards erected, which were, however, demolished at the invasion of the Vandals under Genseric. According to a legend, Charlemagne conveyed his bones to France, where they were preserved, first at Lyons and afterwards at Arles." Other churches also (Venice, Compiègne, and Rosnay in Flanders) claim to be in possession of his remains.

The character of Cyprian and his acts, in the various circumstances of his life, have been variously estimated. While some admire and praise his exalted views and shining virtues as a Church dignitary, others charge him with pride and despotism. The holy earnestness with which he honored his calling, the high degree of self-denial he manifested in life and in death, can as little be denied him as his extraordinary qualifications and activity as a leader in the Church. Herein we must seek his peculiar greatness. Speculative thinking was not his forte. In this respect he is excelled not only by the Alexandrians, but also by Tertullian, to whose theology he conformed his own. Prominent among his doctrinal presentations is that of the Church, the unity of which he develops, not so much dialectically and theoretically as he apprehends it in actual life, and sets it forth in telling pictures in a concrete and energetic way. (Comp. his work, *De unitate ecclesiæ*.) Cyprian may be regarded as the father of the Roman episcopal system. "In consequence of confounding the ideas of the visible and invisible Church, he referred all Christian life to communion with a definite external Body. In his view the Church was an outward organism founded by Christ, of which the bishops were the pillars; to them the Holy Spirit was communicated through the ordination of the apostles, and hence they were the indispensable links for connecting the Church with Christ. Only through them could the Holy Spirit be imparted, and out of the Church no one could be saved. *Extra ecclesiam hanc visibilem nulla salus.* It is of no avail, says Cyprian, what any man teaches; it is enough that he teaches out of the Church. It can be only human outrageous wilfulness to substitute anything for a divine institution, to erect a human altar instead of the divine" (Neander). Nor can it be denied that Cyprian laid the foundations of the primacy of the see of Rome. He placed the unity of the Church in the episcopate, making the bishops representatives of the apostles; and further, he made the chair of St. Peter the centre of episcopal unity, and the Church at Rome the root of all (*radix et matrix ecclesiæ Catholicæ*, Epist. 45). Practically, in his quarrel with pope Stephen (see above), he denied this primacy; but the doctrine lay in his own writings, and, after he had passed away, the legitimate inferences from his doctrines were drawn by his successors. But, while the writings of Cyprian afforded undoubtedly a basis, on the one hand, for Roman and prelatical claims, they have unquestionable merit, on the other, of setting forth Scripture as the sole ground of faith. During his controversy with pope Stephen, who was continually talking of

tradition, Cyprian uttered the sharp and pregnant aphorism, "Custom without truth is only ancient error." As an interpreter of Scripture, Cyprian occupies altogether a practical stand-point, and hence does not despise allegory wherever it forces itself upon his fancy. (See Herzog, *Real-Encyklop.* iii, 220–221.) His life has been written by the African presbyter Pontius, *De vita Cypriani* (in Ruinart, *Acta Martyrum*, ii, and in the editions of the works of Cyprian). With this, compare *Acta Proconsularia Martyrii Cypriani* (in Ruinart, 216 sq.); Lactant. *Div. Inst.* v, 1; Eusebius, *H. E.* vii, 3; also later works of Pearson, *Annales Cyprianici* (Oxf. 1682); P. Maran, *Vita Cypriani*; H. Dodwell, *Diss. Cyprianicæ* (Oxon. 1684); Tillemont, *Memoires*, iv, 76 sq.; (Gervaise), *La vie de S. Cyprien* (Paris, 1717, 4 vols.); Freppel, *St. Cyprien, et l'église d'Afrique en iii^me siècle* (Paris, 1865, 8vo); *Quart. Review*, London, July, 1853, art. iv; Cooper, *Free Church of ancient Christendom*, p. 297 sq. (Lond. 1844, 18mo); Cunningham, *Historical Theology*, ch. vi, § 6.

The best editions of Cyprian's works (*Opera Omnia*) are those of Oxf. 1682, fol., ed. Fell; Amst. 1700; Par., Benedictine ed., 1726, fol., and Ven. 1728, fol. Translation: *The genuine Works of St. Cyprian*, with his Life, by Pontius, by Nathaniel Marshall, LL.B. (London, 1717, fol.); also in French by Lombert (1682). Translations of separate tracts: *On Mortality*, with others, by Elyot (1534), by Brende (1553), by Story (1556), and by Lupset (1560); on *The Lord's Prayer*, by Paynel (1539); on *Virgins*, by Barksdale (1675); on *The Unity of the Church*, by bishop Fell (1681, 4to); and by Horsburgh (1815). The *Epistles* translated, *Library of the Fathers*, vol. xvii (Oxf. 1844); the *Treatises*, *Lib. of Fathers*, vol. iii (Oxford, 1840). The life and martyrdom of Cyprian, by Pontius, his intimate friend, is still extant, and printed in several editions of the *Opera Omnia*, but the style is too rhetorical for simple truth. A compact edition of Cyprian for practical use is *Cypriani Opera Genuina*, ed. Goldhorn (Leips. 1838–9, 2 parts). A new *Life of Cyprian*, by Poole, was published in 1840 (Oxf. 8vo); another, by Rettberg, in 1831 (Göttingen, 8vo); another in *Saint Cyprien*, Œuvres complètes, traduct. Guillon (Par. 1836, 2 vols. 8vo). New editions of several of the epistles were published by Krabinger (Tubing. 1853–1858, sq.).

Cypriarch (Κυπριάρχης, "governor of Cyprus"), the title of Nicanor (q. v.) as Syrian viceroy of the island of Cyprus (2 Macc. xii, 2).

Cypros (Κύπρος, i. e. *Cyprus*), the name of several females of the Herodian family. See Herod.

1. An Idumæan (or Arabian) of noble family, wife of Antipater the elder, by whom he had four sons, Phasaelus, Herod (the Great), Joseph, and Pheroras, and a daughter, Salome (Joseph. *Ant.* xiv, 7, 3; *War* i, 9, 9).

2. The second of the two daughters of Herod (the Great) by Mariamne; she was married to her cousin Antipater, the son of Salome, Herod's sister (Joseph. *Ant.* xviii, 5, 4).

3. The second of the two daughters of Phasaelus (Herod the Great's brother) by his niece Salampsio; she was married to Agrippa I, the son of Aristobulus, by whom she had two sons and three daughters (Joseph. *Ant.* xviii, 5, 4; *War*, ii, 11, 6). She once diverted her husband from his purpose of suicide (*Ant.* xviii, 6, 2).

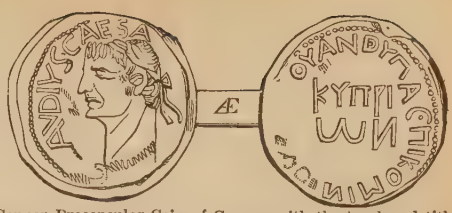
4. The daughter of the above (No. 2) wife of Antipater; she was married to Alexas Selcias (Joseph. *Ant.* xviii, 5, 4).

5. A daughter by the marriage preceding (*ib.*).

Cy'prus (Κύπρος), the modern *Kebris*, one of the largest islands in the Mediterranean, and next to Sicily in importance. It is about 140 miles in length, and varies in breadth from 50 to 5 miles. The interior of the island is mountainous, a ridge being drawn across the entire length, attaining its highest elevation near the central region anciently called Olympus. It had several names in early ages, mostly poetical. From its numerous headlands and promontories, it was called Κεραστίς, *Cerastis*, or *the Horned*; and from its exuberant fertility, Μακαρία, *Macaria*, or *the Blessed* (Horace, *Carm.* iii, 26, 9). Its proximity to Asia Minor, Phœnicia, and Egypt, and its numerous havens, made it a general rendezvous for merchants. "Corn, wine, and oil," which are so often mentioned in the Old Testament as the choicest productions of Palestine (Deut. xii, 17; 1 Chron. ix, 29; Neh. x, 39; Jer. xxxi, 12), were found here in the highest perfection. The forests also furnished large supplies of timber for shipbuilding, which rendered the conquest of the island a favorite project of the Egyptian kings. It was the

boast of the Cyprians that they could build and complete their vessels without any aid from foreign countries (Ammian. Marcell. xiv, 8, § 14). Among the mineral products were diamonds, emeralds, and other precious stones, alum, and asbestos; besides iron, lead, zinc, with a portion of silver, and, above all, copper, the far-famed *æs Cyprium*. The principal mines were in the neighborhood of Tamassus (Strabo, xiv, 6; iii, 245, ed. Tauchn.). Pliny ascribes the invention of brass to this island (*Nat. Hist.* xxxiv, 2). Cyprus is a famous place in mythological history. The presiding divinity of the island was Venus, who had a celebrated temple at Paphos, and is hence often called the Paphian goddess. The inhabitants were luxurious and effeminate (Herod. i, 199; Athen. 12, p. 516; Clearch. *apud Athen.* 6, p. 255). Nevertheless, literature and the arts flourished here to a considerable extent, even at an early period, as the name of the *Cypria Carmina*, ascribed by some to Homer, sufficiently attests (Herod. ii, 118; Athen. 15, p. 682). Situated in the extreme eastern corner of the Mediterranean, with the range of Lebanon on the east and that of Taurus on the north distinctly visible, it never became a thoroughly Greek island. Its religious rites were half Oriental, and its political history has almost always been associated with Asia and Africa.—Smith's *Dict. of Class. Geog.* s. v. See PAPHOS.

Cyprus was originally peopled from Phœnicia (Gesenius, *Mon. Phœn.* p. 122). Amasis I, king of Egypt, subdued the whole island (Herod. ii, 182). In the time of Herodotus the population consisted of Athenians, Arcadians, Phœnicians, and Ethiopians (vii, 90); and for a long time the whole island was divided into nine petty sovereignties (Xenoph. *Cyrop.* viii, 6, 21; Pliny, v, 35; Diod. Sic. xvi, 42). It became a part of the Persian empire (Herod. iii, 19, 91), and furnished ships against Greece in the expedition of Xerxes (*ib.* vii, 90). For a time it was subject to Greek influence, but again became tributary to Persia. After the battle of Issus it joined Alexander, and after his death fell to the share of Ptolemy. In a desperate sea-fight off Salamis (q. v.), at the east end of Cyprus (B.C. 306), the victory was won by Demetrius Poliorcetes; but the island was recovered by his rival, and afterwards it remained in the power of the Ptolemies, and was regarded as one of their most cherished possessions (Livy, xlv, 12; Josephus, *Ant.* xiii, 10, 4; Strabo, xiv, 684; Diod. Sic. xix, 59, 79; xx, 21, 47). It became a Roman province (B.C. 58) under circumstances discreditable to Rome (Strabo, xiv, 684; Flor. iii, 9; Vell. Pat. ii, 38; Dion Cass. xxxviii, 31; xxxix, 22). At first its administration was joined with that of Cilicia, but after the battle of Actium it was separately governed. In the first division it was made an imperial province (Dion Cass. liii, 12). From this passage and from Strabo (xiv, p. 683) it has been supposed by some, as by Baronius, that Luke (Acts xiii, 7) used the word ἀνθύπατος (*proconsul*, "deputy"), because the island was still connected with Cilicia; by others, as by Grotius and Hammond, that the evangelist employs the word in a loose and general manner. But, in fact, Dion Cassius himself distinctly tells us (*ib.* and liv, 4) that the emperor afterwards made this island a senatorial province, so that Luke's language is in the strictest sense correct. Further confirmation is supplied by coins and inscriptions, which mention other *proconsuls* of Cyprus not very remote from the time of Sergius (q. v.) Paulus. The governor appears to have resided at Paphos, on the west of the island. Under the Roman empire a road connected the two towns of Paphos and Salamis, as appears from the *Peut. Table.* One of the most remarkable events in this part of the history of Cyprus was a terrible insurrection of the Jews in the reign of Trajan, which led to a massacre, first of the Greek inhabitants, and then of the insurgents themselves (Milman, *History of the Jews*, iii, 111, 112). When the empire was divided it



Copper Proconsular Coin of Cyprus, with the head and title (in Latin) of *Claudius Cæsar*, and the legend (in Greek), "Under Arminius Proclus, Proconsul [ἀνθύπατος] of the Cyprians."

fell to the share of the Byzantine emperors. Richard I of England conquered it in 1191, and gave it to Guy Lusignan, by whose family it was retained for nearly three centuries. In 1473 the republic of Venice obtained possession of it; but in 1571 it was taken by Selim II, and ever since has been under the dominion of the Turks. Cyprus was famed among the ancients for its beauty and fertility, and all modern travellers agree that in the hands of an industrious race it would be one of the most productive countries in the world, but Turkish tyranny and barbarism have reduced it to a deplorable condition. Through the neglect of drainage, the streams that descend from the mountain range form marshes, and render the island particularly unhealthy. Imperfectly as it is cultivated, however, it still abounds in every production of nature, and bears great quantities of corn, figs, olives, oranges, lemons, dates, and, indeed, of every fruit seen in these climates; it nourishes great numbers of goats, sheep, pigs, and oxen, of the latter of which it has at times exported supplies to Malta. The most valuable product at present is cotton. The majority of the population belong to the Greek Church; the archbishop resides at Leikosia.—*Penny Cyclopædia*, s. v.; M'Culloch's *Gazetteer*, s. v.

"This island was in early times in close commercial connection with Phœnicia, and there is little doubt that it is referred to in such passages of the O. T. as Ezek. xxvii, 6. See CHITTIM. Josephus makes this identification in the most express terms (*Ant.* i, 6, 1; so Epiphan. *Haer.* xxx, 25). Possibly Jews may have settled in Cyprus before the time of Alexander. Soon after his time they were numerous in the island, as is distinctly implied in 1 Macc. xv, 23 (comp. Josephus, *Ant.* xiii, 10, 4; Philo, *Opp.* ii, 587). The name also occurs 2 Macc. x, 13; xii, 2. The copper mines were at one time farmed to Herod the Great (Josephus, *Ant.* xvi, 4, 5), and there is a Cyprian inscription (Böckh, No. 2628) which seems to refer to one of the Herods. The first notice of it in the N. T. is in Acts iv, 36, where it is mentioned as the native place of Barnabas. In Acts xi, 19, 20, it appears prominently in connection with the earliest spreading of Christianity, first as receiving an impulse among its Jewish population from the persecution which drove the disciples from Jerusalem at the death of Stephen, and then as furnishing disciples who preached the Gospel to Gentiles at Antioch. Thus, when Paul was sent with Barnabas from Antioch on his first missionary journey, Cyprus was the first scene of their labors (Acts xiii, 4–13). Again, when Paul and Barnabas separated and took different routes, the latter went to his native island, taking with him his relative Mark, who had also been there on the previous occasion (Acts xv, 39). Another Christian of Cyprus, Mnason, called 'an old disciple,' and therefore probably an early convert, is mentioned Acts xxi, 16. The other notices of the island are purely geographical. On Paul's return from the third missionary journey, they 'sighted' Cyprus, and sailed to the southward of it on the voyage from Patara to Tyre (ib. 3). At the commencement of the voyage to Rome they sailed to the northward of it on leaving Sidon, in order to be under the lee of the land (Acts xxvii, 4), and also in order to obtain the advan-

tage of the current, which sets northerly along the coast of Phœnicia, and westerly with considerable force along Cilicia." See SHIPWRECK (OF PAUL).

All the ancient notices of Cyprus are collected by Meursius (*Opera*, vol. iii, Flor. 1744). Comp. Cellarii *Notit.* ii, 266 sq.; see also Engel's *Kypros* (Berlin, 1843) and Ross's *Reisen nach der Insel Cypern* (Halle, 1852). Further accounts may be found in Mannert, *Geographia*, VI, ii, 422–454. Modern descriptions are given by Pococke, *East*, ii, 210–235; Wilson, *Lands of Bible*, ii, 174–197; Turner, *Levant*, ii, 40, 528; Mariti, *Viag. in Cyper.* (Flor. 1679); Unger and Kotschy, *Die Insel Cypern* (Wien, 1865); Cesnola, *Cyprus* (Lond. 1877).

CYPRUS, CHRISTIANITY IN. Bishops of Cyprus are for the first time mentioned in the 4th century. Soon Constantia became the seat of a metropolitan, who asserted and maintained his independence of all the patriarchs. At the beginning of the 5th century the patriarch John of Antioch made an effort to have Cyprus incorporated with his patriarchal district, but the Œcumenical Council of Ephesus (431), before which the newly-elected metropolitan Rheginus and two other Cyprian bishops pleaded their right, decided in favor of the independence of Cyprus. Ever since the churches of Cyprus have constituted an independent group of the orthodox Greek Church.—Wetzer und Welte, *Kirchen-Lex.* ii, 964 sq.

Cyran, St. See DUVERGIER DE HAURANNE.

Cyre'nè (Κυρήνη; *Ghrenna*, in modern Arabic), a city in Upper Libya, founded by a colony of Greeks from Thera (Santorini), a small island in the Ægæan Sea (Thirlwall's *History of Greece*, vol. ii, ch. 12). Its name is generally supposed to be derived from a fountain (but according to Justin, *Hist.* xiii, a mountain), called Κυρή, *Cyre*, near its site. It was built on a table-land, 1800 feet above the level of the sea, in a region of extraordinary fertility and beauty. It was the capital of a district, called from it *Cyrenaïca* (Barca), which extended from the Gulf of Platæa (Bomba) to the Great Syrtis (Gulf of Sidra). With its port Apollonia (Musa Soosa), about ten miles distant, and the cities Barca, Teuchira, and Hesperis, which at a later period were named Ptolemais, Arsinoë, and Berenice (Strabo, xvii; vol. iii, p. 496, ed. Tauchn.), it formed the Cyrenaic Pentapolis (Mel. i, 4, 8; Pliny, v, 5; Ptolem. iv, 4, 11; Amm. Marcell. xxii, 16). It is observable that the expression used in Acts ii, 10, "the parts of Libya about (κατά) Cyrene," exactly corresponds with a phrase used by Dion Cassius (Λιβύη ἡ περὶ Κυρήνην, liii, 12), and also with the language of Josephus (ἡ πρὸς Κυρήνην Λιβύη; *Ant.* xvi, 6, 1). See LIBYA. Its inhabitants were very luxurious and refined, and it was, in a manner, a commercial rival of Carthage (Forbiger, *Handb. der alt. Geogr.* ii, 380 sq.; Ritter, *Erdk.* i, 946 sq.). The Greek colonization of this part of Africa under Battus began as early as B.C. 631, and it became celebrated not only for its commerce, but for its physicians, philosophers, and poets (Herod. iv, 155, 164). It would seem that the old Hellenic colonists cultivated friendly relations with the native Libyans, and to a much greater extent than usual became intermingled with them by marriage relationships (Herod. iv, 186–189). For above 180 years the form of government was monarchical; it then became republican, and at last the country became tributary to Egypt, under Ptolemy Soter. It was bequeathed to the Romans by Apion, the natural son of Ptolemy Physcon, about B.C. 97 (Tacitus, *Ann.* xiv, 18; Cicero, *De leg. Agrar.* ii, 19), and in B.C. 75 formed into a province (Strabo, xvii, 3). On the conquest of Crete (B.C. 67) the two were united in one province, and together frequently called Creta-Cyrene. See CRETE. An insurrection in the reign of Trajan led to great disasters, and to the beginning of its decay. In the 4th century it was destroyed by the natives of the Libyan desert, and its wealth and honors were transferred to the episcopal city of Ptolemais, in its neighborhood. The Saracens completed the work of destruction, and for centuries not only the city, but

Map of the Coast of Africa adjoining Cyrene.

the once populous and fertile district of which it was the ornament, has been almost lost to civilization. During three parts of the year the place is tenanted by wild animals of the desert, and during the fourth part the wandering Bedouins pitch their tents on the low grounds in its neighborhood.—Smith, *Dict. of Class. Geog.* s. v.; *Penny Cyclopædia*, s. v. Cyrenaica, Cyrene; Rawlinson's *Herodotus*, iii, 108 sq.

Coins of Cyrene, bearing the sacred *Silphium* Plant (which was the chief article of export).

Strabo (quoted by Josephus, *Ant.* xiv, 7) says that in Cyrene there were four classes of persons, namely, citizens, husbandmen, foreigners, and Jews, and that the latter enjoyed their own customs and laws (comp. Dio Cass. lviii, 32). Ptolemy, the son of Lagus, introduced them, because he thought they would contribute to the security of the place (Joseph. *c. Apion.* ii, 4). They became a prominent and influential class of the community (*Ant.* xiv, 7, 2), and they afterwards received much consideration from the Romans (xvi, 6, 5). See 1 Macc. xv, 23; comp. 2 Macc. ii, 23. We learn from Josephus (*Life*, 76) that soon after the Jewish war they rose against the Roman power. The notices above given of the numbers and position of the Jews in Cyrene (confirmed by Philo, who speaks of the diffusion of the Jews southward to Ethiopia, *adv. Flacc.* p. 523) prepare us for the frequent mention of the place in the N. T. in connection with Christianity. Simon, who bore our Saviour's cross (Matt. xxvii, 32; Mark xv, 21; Luke xxiii, 26), was a native of Cyrene. Jewish dwellers in Cyrenaica were in Jerusalem at Pentecost (Acts ii, 10). They even gave their name to one of the synagogues in Jerusalem (vi, 9). Christian converts from Cyrene were among those who contributed actively to the formation of the first Gentile church at Antioch (xi, 20), and among those who are specially mentioned as laboring at Antioch, when Barnabas and Saul were sent on their missionary journey, is Lucius of Cyrene (xiii, 1), traditionally said to have been the first bishop of his native district. Other traditions connect Mark with the first establishment of Christianity in this part of Africa. See AFRICA.

See Della Cella, *Viaggio da Tripoli*, etc. (Genoa, 1819); Pacho, *Voyage dans la Marmarique, la Cyrenaique* (Paris, 1827–29); Trige, *Res Cyrenenses* (Hafn. 1828); Beechey, *Expedition to Explore the north Coast of Africa* (London, 1828); Barth, *Wanderungen durch das Punische u. Kyrenäische Küstenland* (Berlin, 1849); Hamilton, *Wanderings in North Africa* (London, 1856), p. 78; Smith and Porcher, *Hist. of Discoveries at Cyrene* (Lond. 1865).

Cyre'nian (Κυρηναῖος, *Cyrenæan*, "of Cyrene," Matt. xxvii, 32; Acts xi, 20; xiii, 1), a native of Cyrene (q. v.) or Cyrenaica, in Africa (Mark xv, 21; Luke xxiii, 26; Acts vi, 9).

Cyre'nius (Græcized Κυρήνιος, Luke ii, 2; see Deyling, *Obss.* ii, 431 sq.), for the Latin *Quirinus* (prob. not *Quirinius;* see Meyer, *Comment.* in loc.). His full name was PUBLIUS SULPICIUS QUIRINUS (see Sueton. *Tiber.* 49; Tacit. *Ann.* ii, 30). He is the second of that name mentioned in Roman history (see Smith, *Dict. of Class. Biog.* s. v.), and was consul with M. Valerius Messala, B.C. 12. From the language of Tacitus (*Ann.* iii, 48), it would appear that he was of obscure origin, a supposition apparently favored by

his surname, *Quirinus*, if rendered (as it might perhaps be) the *Cyrenian*, but opposed by it if referred to the old Sabine epithet of Romulus. He is more likely to have been the son of the consul of the same name, B.C. 42. Tacitus, however, states (*ut sup.*) that he was a native of Lanuvium, near Rome, and was not a member of the ancient Sulpician family; and that it was owing to his military abilities and active services that he gained the consulship under Augustus. He was subsequently sent into Cilicia, where he was so successful in his campaign as to receive the honor of a triumph. In B.C. 1, or a year or two afterwards, Augustus appointed him to direct the counsels of his grandson C. Cæsar, then in Armenia; and on his way thither he paid a visit to Tiberius, who was at that time living at Rhodes. Some years afterwards, but not before A.D. 5, he was appointed governor of Syria, and while in this office he took a census of the Jewish people. He was a favorite with Tiberius, and on his death, A.D. 21, he was buried with public honors by the senate at the request of the emperor. (Dion Cass. liv, 28; Tacitus, *Ann.* iii, 22; Strab. xii, p. 569; Josephus, *Ant.* xiv, 1, 1.)—Smith, *Dict. of Class. Biog.* s. v.

The mention of the name of Quirinus in connection with the census which was in progress at the time of our Lord's birth presents very serious difficulties, of which, from the want of adequate data, historical and critical inquiry has not yet attained an entirely satisfactory solution. The passage is as follows: *αὕτη ἡ ἀπογραφὴ πρώτη ἐγένετο ἡγεμονεύοντος τῆς Συρίας Κυρηνίου*, translated in the Authorized Version thus: "Now this taxing was first made when Cyrenius was governor of Syria." Instead of "taxing" it is now agreed that the rendering should be "enrolment" or "registration" (of which use of the word *ἀπογράφεσθαι* many examples are adduced by Wetstein), as it is clear from Josephus that no taxing did take place till many years after this period. The whole passage, as it now stands, may be properly read, "This first enrolment took place while Cyrenius was governor of Syria." This appears very plain, and would suggest no difficulty were it not for the knowledge which we obtain from other quarters, which is to the effect, 1. That there is no historical notice of any enrolment at or near the time of our Lord's birth; and, 2d, That the enrolment which actually did take place under Cyrenius was not until ten years after that event. The difficulty begins somewhat before the text now cited; for it is said that "in those days there went out a decree from Cæsar Augustus that the whole world should be taxed" (enrolled). But since no historian mentions any such general enrolment of the whole empire, and since, if it had taken place, it is not likely to have been mentioned in connection with the governor of Syria, it is now usually admitted that Judæa only is meant by the phrase rendered "the whole earth" (but more properly "the whole land"), as in Luke xxi, 26; Acts xi, 28; and perhaps in xxi, 20. The real difficulties are thus reduced to the two now stated. With regard to the enrolment, it may be said that it was probably not deemed of sufficient importance by the Roman historians to deserve mention, being confined to a remote and comparatively unimportant province. Nor was it perhaps of such a nature as would lead even Josephus to take notice of it, if it should appear, as usually supposed, that no trace of it can be found in his writings.

Quirinus held a census in Judæa after the banishment of Archelaus (Joseph. *Ant.* xviii, 1, 1), which took place B.C. 6. This is what is meant by the *taxing* (*ἀπογραφή*) in Acts v, 37. Hence it is evident that he cannot have held a census in Judæa in the year of Christ's birth, as is said in Luke ii, 2, in the capacity of head of the province of Syria (the census, however, being a general one throughout the empire, according to the emperor's command, v, 1). At that time Q. Sentius Saturninus (Tert. *adv. Marc.* iv, 19), or, if Jesus was born after B.C. 6, P. Quintilius Varus, must have been governor of Syria (Ideler, *Chronol.* ii, 394 sq.). The interpreters have attempted various methods of reconciling the words of Luke, "This taxing was first made when Cyrenius was governor of Syria," Luke ii, 2, with the chronology of Josephus. (See Wolf, *Cur.* i, 576 sq.; Zorn, *Histor. Fixi Jud.* p. 91 sq.; Thiess, *Krit. Comment.* ii, 385 sq.; Kuinöl, *Comment.* ii, 301 sq., whose references, however, are not precise; K. Nahmmacher, *De Augusto ter censum agente*, Helmst. 1758, ii, 4; Huschke, *Ueb. d. zur Zeit der Geburt J. Chr. gehalt. Cens.* Bresl. 1840; Wieseler, *Chron. Synopse*, p. 111 sq.). Apart from these, who cut the knot by pronouncing the passage an interpolation (as Beza in his first three eds., Pfaff, Venema, Kuinöl, Olshausen, and others), we notice the following:

1. Some suppose that *πρώτη*, *first*, stands for *προτέρα*, *former* (comp. John i, 15, *πρῶτός μου*, *before* me), and that the genitive *ἡγεμονεύοντος Κυρηνίου* is governed by the comparative; rendering, *this census took place before Quirinus was governor of Syria*. (So J. G. Herwart, *Admir. Ethnic. Theol. Myster. propal.* Monach. 1626, p. 188; Petavius, Bynäus, Clericus, J. Perizonius, *De August. Orbis Terrar. Descrip.*, in his *Disquis. de Prætor.* p. 908 sq.; Zeltner, Heumann, *De Censu Antequir.* 1732, and in his *Dissert. Sylloge*, i, 763 sq.; Norisius, *Cenotaph. Pisan.* ii, 16; Storr, *Opusc. Acad.* iii, 126 sq.; Süskind, *Verm. Aufsätze*, p. 63; Michaeler, *Ueber d. Geburts- und Sterbejahr Christi*, i, 59 sq.; Tholuck, *Glaubwürd.* p. 182 sq., and others). But this would be strange Greek, even if *προτέρα* stood in the passage (comp. Fritzsche on Rom. ii, 421 sq., where also the passage of the Sept. Jer. xxix, 2, compared by Tholuck, is settled); and the possibility of writing *πρώτη* for it is not established by the reference to John, and certainly such a use would be especially avoided where, as here, every reader must naturally understand the passage as the Auth. Vers. renders it. More recently, Huschke, *ut. sup.* p. 89; Wieseler, *ut sup.* 117 sq., and an anonymous writer in Rheinwald's *Repertor.* xxxvi, 105, have discovered that Luke purposely places the superlative before the genitive to express this meaning: *this census as the first* (i. e. of all Roman censuses) *before Quirinus became governor*; and that there is here an abbreviated expression, as is usual with the comparative degree, which they would fill out thus: *πρὸ τῆς ἀπογραφῆς γενομένης ἡγεμονεύοντος κ. τ. λ.* Surely no one acquainted with Luke's style could suppose him to have written such jargon, and expressed this complicated idea with words which on their face mean something very different. This is the result of considering a language only in the light of one's study, not in that of living intercourse.

2. Several have tried conjectural emendation (comp. Bowyer, *Critical Conject. on the N. T.* i, 117 sq.). Hermann gives as another's suggestion *Κρονίου*, corresponding to the Latin Saturninus. Whiston, *Prim. N. T.* (Lond. 1745), reads *αὕτη ἡ ἀπογρ. πρ. Σατρνίνου, δευτέρα δὲ ἐγένετο ἡγεμ. τῆς Συρ. Κυρ.*, i. e. *This first census took place when Saturninus was governor of Syria, and a second under Quirinus.* But the last clause has no pertinence here. L. Cappellus and Huetius, *Demonstr. Evang.* p. 781, put *Κυιντιλίου*, *Quintilius*, or K. *Οὐάρου*, *Q. Varus*, instead of Quirinus. Q. Varus succeeded Saturninus B.C. 6 (see Josephus, *Ant.* xvii, 5, 2; Tacit. *Hist.* v, 9). Michaelis, *Einleit. ins N. T.* i, 71, would read *πρὸ τῆς* after *πρώτη* (i. e. *before that under Quirinus*, etc.), which might easily have dropped out (comp. R. Roullier, *Dissert. Sacr.* Amst. 1750, No. 4). H. Venema, *Selectæ e Scholis Valck.* i, 70, thought *αὕτη ἡ ἀπογρ. πρώτη. ἡ β* (i. e. *δευτέρα*) *ἐγένετο ἡγεμ.*, etc., i. e. *This was the first census; but the second took place when Quirinus*, etc. But again the second clause is out of place. Valesius (ad Euseb. *H. E.* i, 5) would at once write Saturninus for Quirinus. All such changes of the text, especially in the face of the una-

nimity of manuscripts and versions (see Griesbach in loc.), is uncritical and forced.

3. Rejecting all these methods of reconciliation, some here suppose a mistake or misrecollection on Luke's part (Ammon, *Bibl. Theolog.* ii, 271; *Comm. de Censu Quir.* Erlangen, 1810; *Leben Jesu*, i, 201 sq.; Thiess, *Krit. Comm.* ii, 385; Strauss, *Leben Jesu*, p. 262 sq.; Weisse, *Evangel. Geschichte*, i, 204 sq.), it being, at the time of writing, many years since the occurrence. So Winer, who still holds the census as a fact, and thinks Quirinus may have conducted it (Neander, *Leben Jesu*, p. 25; Meyer on Luke, ii, 2), the only error being in naming him governor of Syria (comp. *Altes und Neues*, 1727, p. 120). Certainly it is not to be supposed that Luke here refers to the above-mentioned census of Quirinus (Acts v, 37), and misdates it thus, for the mention of it in Acts shows that he was well acquainted with it; and even in ii, 2, the word *first* seems to imply the other.

4. Another mode of getting over the difficulty is sanctioned by the names of Calvin, Valesius, Wetstein, Hales, and others. First, changing *αὕτη* into *αὐτή*, they obtain the sense: "In those days there went forth a decree from Augustus that the whole land should be enrolled; but the *enrolment itself* was first made when Cyrenius was governor of Syria." The supposition here is, that the census was commenced under Saturninus, but was not completed till two years after, under Quirinus. Dr. Robinson (*Addit. to Calmet*, in "Cyrenius") objects to this view the entire absence of any historical basis for it. But he must at the time have been unmindful of Hales, who, in his *Chronology* (iii, 48–53), has worked out this explanation with more than his usual care and success. Hales reminds us that a little before the birth of Christ, Herod had marched an army into Arabia to redress certain wrongs which he had received; and this proceeding had been so misrepresented to Augustus that he wrote a very harsh letter to Herod, the substance of which was, that "having hitherto treated him as a friend, he would now treat him as a subject." And when Herod sent an embassy to clear himself, the emperor repeatedly refused to hear them, and so Herod was forced to submit to all the *injuries* (*παρανομίας*) offered to him (Joseph. *Ant.* xvi, 9). Now it may be collected that the chief of these injuries was the performance of his threat of treating him as a subject by the degradation of his kingdom to a Roman province. For soon after Josephus incidentally mentions that "the whole nation of the Jews took an oath of fidelity to Cæsar and the king jointly, except 6000 of the Pharisees, who, through their hostility to the regal government, refused to take it." The date of this transaction is determined by its having been shortly before the death of Pheroras, and coincides with the time of this decree of enrolment and of the birth of Christ. The oath which Josephus mentions would be administered at the same time, according to the usage of the Roman census, in which a return of persons, ages, and properties was required to be made upon oath, under penalty of confiscation of goods, as we learn from Ulpian. That Cyrenius, a Roman senator and procurator, was employed to make this enrolment, we learn not only from Luke, but by the joint testimony of Justin Martyr, Julian the Apostate, and Eusebius; and it was made while Saturninus was president of Syria (to whom it was attributed by Tertullian), in the thirty-third year of Herod's reign, corresponding to the date of Christ's birth. Cyrenius, who is described by Tacitus as "an active soldier and rigid commissioner," was well qualified for an employment so odious to Herod and his subjects, and probably came to execute the decree with an armed force. The enrolment of the inhabitants, "each in his own city," was in conformity with the wary policy of the Roman jurisprudence, to prevent insurrections and to expedite the business; and if this precaution was judged prudent even in Italy, much more must it have appeared necessary in turbulent provinces like Judæa and Galilee. At the present juncture, however, it appears that the census proceeded no farther than the first act, namely, the enrolment of persons in the Roman register. For Herod sent his trusty minister, Nicolas of Damascus, to Rome, who, by his address and presents, found means to mollify and undeceive the emperor, so that he proceeded no farther in the design which he had entertained. The census was consequently at this time suspended; but it was afterwards carried into effect upon the deposal and banishment of Archelaus, and the settlement of Judæa as a Roman province. On this occasion the trusty Cyrenius was sent again, as president of Syria, with an armed force, to confiscate the property of Archelaus, and to complete the census for the purposes of taxation. This taxation was a poll-tax of two drachmæ a head upon males from fourteen, and females from twelve to sixty-five years of age—equal to about fifteen pence of our money. This was the "tribute money" mentioned in Matt. xvii, 24–27. The payment of it became very obnoxious to the Jews, and the imposition of it occasioned the insurrection under Judas of Galilee, which Luke himself describes as having occurred "in the days of the taxing" (Acts v, 37). By this statement, connected with the slight emendation of the text already indicated, Hales considers that "the Evangelist is critically reconciled with the varying accounts of Josephus, Justin Martyr, and Tertullian; and a historical difficulty satisfactorily solved, which has hitherto set criticism at defiance." This is perhaps saying too much, but the explanation is undoubtedly one of the best that has yet been given (Lardner's *Credibility*, i, 248–329; Wetstein, Kuinöl, and Campbell, on Luke ii, 2, etc.).

5. The preceding explanations all render *πρώτη*, "first," as an *adverb*, but it is clearly not susceptible of such a construction, being an *adjective* regularly qualifying *ἀπογραφή*, evidently for the purpose of distinguishing the present "taxing" from a subsequent one under the same authority, namely, that mentioned in the Acts. The writer of an elaborate article in the *Journal of Sacred Literature* (October, 1851) indeed urges that Luke ought to have said *ἡ ἀπογραφὴ ἡ πρώτη*, and adduces many citations to show the adverbial force of *πρῶτος*; but these are inappropriate, for they would rather require the rendering "this was the first taxing that took place," etc., a sense equally difficult; and Luke's design does not appear to be to contrast so strongly the two taxings, since they were in a measure one, this the beginning, the other the completion. We are disposed, therefore, to adopt a modification of this last preceding explanation, and find the distinction between these two dates in the verb *ἐγένετο*, rendering it "effected" or *completed*, the enrolment having only been *begun* in the present case. This will combine all the historical notices above cited, and obviate all the objections that have been raised to the explanations of this difficult text hitherto proposed. (See Strong's *Harmony and Exposition of the Gospels*, Append. i, p. 20.) There is the greater propriety in this solution, inasmuch as Luke himself not only elsewhere alludes to the later enforcement of the tax-roll in question, but in this very passage under discussion he clearly implies it by the use of *πρώτη, first;* the rendering of which as an adverb ("first occurred") makes the word itself either altogether nugatory or positively inapposite, since no later census of the kind is recorded than that referred to in the Acts. There can be no good philological reason assigned for adding this distinctive term, except to throw greater stress upon *ἐγένετο*, which otherwise would not naturally bear so strong a sense as the *execution*, under the direction of Quirinus, of what had already been inaugurated (*πρώτη*) under different auspices (see Alford, *Gr. Test.* in loc.). The paren-

thetical character of the clause is probably the cause of this somewhat blended antithesis in its phraseology. It is Luke who gives both incidents.

6. Many take ἡγεμών in the wider signification of *high executive officer* in general, including, for instance, the procurators. (So Casaubon, *Exercit. Antibaron.* p. 126 sq.; Grotius, B. Ch. Richard, in Iken, *Nov. Thesaur.* ii, 428 sq.; Magnani, *Probl. de Nativ. Christi*, p. 260 sq.; G. Wernsdorf, *De censu quem Cæs. Oct. August. fecit*, Viteb. 1693, 1720; Deyling, *Observat.* i, 233 sq.; *Weihnachtsprogr v. Helmstadt.* 1737; K. Nahmmacher, *ut. sup.*; Volborth, *De censu Quirini*, Götting. 1785; Birch, *De censu Quirini*, Havn. 1790; Sanclemente, *De Vulg. Æra Emend.* p. 413 sq.; Münter, *Stern d. Weisen*, p. 88 sq.; Neander, *Leben Jesu*, p. 25, and others.) These suppose that Quirinus held this census as an extraordinary magistrate, at the especial command of Augustus. (Comp. Usher, *Annal.* p. 530 sq.; Wedel, *De censu August.* Jena, 1703.) Münter, p. 99 sq., has shown, after others, that extraordinary legates, besides the chiefs of the provinces, were sometimes sent for such special duties, though perhaps not all the instances adduced by him are valid. If we are fully to believe Justin Martyr, *Apol.* i, 44, Quirinus must have held the census when he first became ἐπίτροπος, or procurator in Judæa. See Credner, *Beiträge z. Einleit. ins N. T.* i, 230 sq. But there were no procurators in Judæa in Herod's time. We must then suppose, with Credner, that Quirinus was then sent to Palestine as procurator of Syria simply to take the census of the people, whose number Augustus wished to know. But this is simply multiplying hypotheses. Comp. also Huschke, p. 73 sq. This view appears the more probable, since Quirinus, who was a favorite with the emperor, was then in the East on his commission (Tacit. *Ann.* iii, 48; ii, 42). There is also an inscription (Muratori, *Thesaur. Inscript.* i, p. 670) which states that Q. Æmil. Palicanus Secundus, by order of Quirinus, held a census in Apamea (in Syria), and, likewise by his order, conquered the Ituræans in Lebanon. But, though the word ἡγεμών is not limited to a permanent governor of a province, yet Luke could hardly use such a phrase as this (ἡγεμονεύοντος τῆς Συρίας) of an extraordinary officer. In common language this could only mean "*being governor of Syria*" (see besides, Huschke, p. 65 sq.). Just as little does Bengel hit the mark (*Ordo Temp.* p. 203) when he makes Quirinus to have filled, as governor, an interim between Saturninus and Varus.

7. Assuming, on the authority of Luke, that an enrolment actually did take place at the time of our Lord's birth, a modification of the last foregoing hypothesis proceeds to make out a probability that Cyrenius was then joint governor of Syria along with Saturninus. It is known that a few years previous to this date Volumnius had been joined with Saturninus as the procurator of that province, and the two, Saturninus and Volumnius, are repeatedly spoken of together by Josephus, who styles them equally governors of Syria (*Ant.* xvi, 9, 1; 9, 8). Josephus does not mention the recall of Volumnius; but there is certainly a possibility that this had taken place before the birth of Christ, and that Cyrenius, who had already distinguished himself, had been sent in his place. He would then have been under Saturninus, a ἡγεμών, "governor," of Syria, just as Volumnius had been before, and as Pilate was afterwards, of Judæa. That he should here be mentioned as such by Luke rather than Saturninus is very naturally accounted for by the fact that he returned, ten years afterwards, as procurator or chief governor, and then held a second and more important census for the purpose of registration and taxation, when Archelaus was deposed, and Judæa annexed to the Roman province of Syria. The only real objection to this solution is the silence of all other history. But, although profane history does not affirm the fact of Cyrenius having formerly been procurator of Syria, yet it does not in any way deny it; and we may therefore safely rest upon the authority of the sacred writer for the truth of this fact, just as we do for the fact of the existence of the first enrolment itself.—Kitto, s. v. See Syria.

A. W. Zumpt, of Berlin, in his *Commentatio de Syria Romanorum provincia a Cæsare Augusto ad T. Vespasianum*, has recently shown it to be probable that Quirinus was *twice* governor of Syria. This he supports by the following considerations: In B.C. 9 Sentius Saturninus succeeded M. Titius in the province of Syria, and governed it three years. He was succeeded by T. Quintilius Varus (Joseph. *Ant.* xvii, 5, 2), who, as it appears, remained governor up to the end of B. C. 4. Thenceforward we lose sight of him till he is appointed to the command in Germany, in which he lost his life in A.D. 7. We also lose sight of the governors of Syria till the appointment of P. Sulpicius Quirinus in A.D. 6. Now, from the maxim acted on by Augustus (Dion. Cass. lii, 23), that none should hold an imperial province for less than three or more than five years, Varus cannot have been governor of Syria during the twelve years from B.C. 6 to A.D. 6. Who, then, were the missing governors? One of them has been found—L. Volusius Saturninus, whose name occurs as "legatus Syriæ" on a coin of Antioch, A.D. 4 or 5. But his proconsulate will not fill the whole time, and one or two governors must be supplied between Varus, ending B.C. 4, and Volusius, A.D. 4 or 5. Just in that interval falls the census of Luke ii, 2. Could Quirinus have been governor at any such time? From January to August, B.C. 12, he was consul. Soon after that he triumphed over the Homonadenses (Tacit. *Ann.* iii, 48). Now Zumpt applies the exhaustive process to the provinces which could by any possibility have been under Quirinus at this time, and eliminates from the inquiry Asia—Pontus and Bithynia—and Galatia. Cilicia only remains. But at this time, as he shows, that province had been reduced by successive diminutions, had been separated (Dion. Cass. liv, 4) from Cyprus, and—as is shown by the history of the misconduct of Piso soon afterwards, who was charged with having, as ex-governor of Syria, attempted a forcible repossession of the province (Tacit. *Ann.* iii, 12), because he had attacked Celenderis, a fort in Cilicia (*ib.* ii, 78–80), attached to the province of Syria. This Zumpt also confirms by the accounts in Tacitus (*Ann.* vi, 41; xii, 55) of the Clitæ, a seditious tribe of Cilicia Aspera, who on two occasions were repressed by troops sent by the governors of Syria. Quirinus then appears to have been governor of Syria at some time during this interval. But at *what time?* We find him in the East (Tacit. *Ann.* iii, 48) in connection with Cæsar's campaign against the Armenians; and this cannot have been during his well-known governorship of Syria, which began in A.D. 6; for Caius Cæsar died in A.D. 4. Zumpt, by arguments too long to be reproduced here, but very striking and satisfactory, fixes the time of his first governorship at from B.C. 4 to B.C. 1, when he was succeeded by M. Lollius.—Smith, s. v. This, however, still leaves a discrepancy of one or two years between his first appointment and Christ's birth, which cannot be brought down so late as B.C. 4. (See Lutheroth, *Recensement de Quirinius en Judée*, Par. 1865.) See Census.

Cyria (Κυρία, "lady," 2 John, ver. 1, 5), a Greek term signifying *mistress*, and used as an honorary title of address to a female (so Epict. *Ench.* 40), as in English. But in 2 John it appears to be the proper name of the distinguished female to whom John directed his epistle (see Alford, *Gr. Test.* vol. v, proleg. p. 185 sq.) That *Cyria* was often a proper name of females among the Greeks there is no doubt (Gruteri *Inscript.* p. 1127). Others regard the associated term ἐκλεκτῇ ("elect") as a proper name, q. d. *Electa* (q. v.), and the word in question as a common title. See John, Epistles of.

Cyriăcus, said to have been pope, and, according to Romish tradition, to have, for the sake of St. Ursula and her 11,000 maidens, forsaken the papal see to suffer martyrdom with them at Cologne (Aug. 8th). His existence is probably as mythical and fictitious as that of the 11,000 virgins. The church and college of St. Cyriac (formerly St. Dionysii), at Neuhausen, near Worms, claims to have possessed his relics since the beginning of the 9th century.

Cyriacus, patriarch of Constantinople at the end of the 6th century, and successor of *John Jejunator* after 595, took, like his predecessor, the title of *ἐπίσκοπος οἰκουμενικός*, which he caused to be confirmed by a council. The Romish bishop, Gregory the Great, opposed him at first without success, but by giving his support to the usurper Phocas he finally gained his end, and Cyriacus had to renounce his title. He is said to have died of grief in 606.—Herzog, *Real-Encyklopädie*, iii, 221.

Cyril (St.) (Κύριλλος), *of Alexandria*, was born in Alexandria towards the end of the 4th century, and was educated under his uncle Theophilus, bishop of that place. Theophilus died in 412, and Cyril was elected patriarch of Alexandria. One of his first steps, according to Socrates, was to plunder and shut up the churches of the Novatians (Socr. *Hist. Eccl.* vii, 7). He led on a furious mob, which drove out the Jews, who had enjoyed many privileges in the city for ages. This proceeding excited the anger of Orestes, the governor of the city, and made him henceforth the implacable opponent of the bishop. An attack was made on the governor in his chariot by a band of 500 monks; and one who severely wounded him having suffered death on the rack, Cyril, in his church, pronounced a eulogy over his body as that of a martyr (Socrates, l. vii, c. 14). He is also charged with the murder of Hypatia, the celebrated daughter of the mathematician Theon; but his share in this atrocity was only indirect. See Hypatia. The titles of *Doctor of the Incarnation* and *Champion of the Virgin* have been given to Cyril on account of his violent dispute with Nestorius. "The condemnation and deposition of Nestorius having been decreed by Pope Celestine, Cyril was appointed to execute the sentence, for which he presided at a council of sixty bishops at Ephesus. John, patriarch of Antioch, having a few days afterwards held a council of forty-one bishops, who supported Nestorius and excommunicated Cyril, the two parties appealed to the emperor Theodosius, who forthwith committed both Cyril and Nestorius to prison, where they remained for some time under rigorous treatment. Cyril, by the influence of Celestine, was at length liberated and restored (431) to the see of Alexandria, which he retained until his death, which occurred in 444" (*Engl. Cyclop.* s. v.). See Nestorius. Cyril's doctrinal writings are chiefly on topics connected with the controversies on the Trinity. The following are some of the principal treatises: *Thesaurus on the Trinity*, intended as a complete refutation of Arianism. In *Dialogues on the Incarnation*, in *Five Books against Nestorius*, and in an ample *Commentary on St. John's Gospel*, the same subject is continued. Ten books *against Julian* contain replies to that emperor's three books against the Gospels, which, if Cyril's quotations are faithful, were as weak and absurd as the answers. Seventeen books *On Worship in Spirit and Truth* show that all the Mosaical institutions were an allegory of the Gospel; "a proof," says Dr. Adam Clarke, "how Scripture may be tortured to say *anything*." Thirteen books on the *Pentateuch and the Prophets* are written with a similar view. Thirty paschal *Homilies* announce, as customary at Alexandria, the time of Easter. Sixty-one *Epistles* nearly all relate to the Nestorian controversy. Cyril's *Synodical Letter* contains twelve solemn curses against Nestorius, who as solemnly replied with twelve curses against Cyril. His writings abound in turgid praises of Mary, though he did not hold her to be without sin. "The history of none among the Christian fathers is more disgraceful to the Christian character than that of St. Cyril of Alexandria—a man immoderately ambitious, violent, and headstrong; a breeder of disturbances; haughty, imperious, and as unfit for a bishop as a violent, bigoted, unskilful theologian could possibly be—but resolved that if the meek inherit the earth, the violent should have possession of the sees" (Clarke, *Succession of Sacred Literature*, ii, 137). "But the faults of his personal character should not blind us to the merits of Cyril as a theologian. He was a man of vigorous and acute mind, and extensive learning, and is clearly to be reckoned among the most important dogmatic and polemic divines of the Greek Church. Of his contemporaries Theodoret alone was his superior. He was the last considerable representative of the Alexandrian theology and the Alexandrian Church, which, however, was already beginning to degenerate and stiffen; and thus he offsets Theodoret, who is the most learned representative of the Antiochian school. He aimed to be the same to the doctrine of the incarnation and the person of Christ that his purer and greater predecessor in the see of Alexandria had been to the doctrine of the Trinity a century before. But he overstrained the supranaturalism and mysticism of the Alexandrian theology, and in his zeal for the reality of the incarnation and the unity of the person of Christ he went to the brink of the Monophysite error, even sustaining himself by the words of Athanasius, though not by his spirit, because the Nicene age had not yet fixed beyond all interchange the theological distinction between *οὐσία* and *ὑπόστασις*" (Schaff, *Church History*, § 171). The best edition of the *Opera Omnia* of Cyril, in Greek and Latin (Paris, 1638), is that of Aubert (7 vols. fol.). This edition is followed by Migne, in his *Patrol. Cursus Completus* (lxviii–lxxvii). His *Comm. in Lucæ Evangelium* was re-edited in Latin by R. P. Smith (Oxford, 1858); and in an English version, by the same, with notes (Oxf. 1859). See Clarke, *Succession Sac. Lit.* ii, 137; Cave, *Hist. Lit.* Anno 412; Tillemont, *Mémoires*, xiv, 272; Butler, *Lives of Saints*, Jan. 28; Neander, *Church History*, ii, 453–498; Lardner, *Works*, vol. iv; Dorner, *Person of Christ* (Edinb. trans.), div. i, vol. ii.

Cyril (St.) (Κύριλλος), *of Jerusalem*, is supposed to have been born in that city about A.D. 315. He was ordained deacon by Macarius about 335, and priest by the patriarch Maximus about 345. On the death of Maximus, Cyril was chosen to succeed him (A.D. 350). A luminous appearance in the heavens, called the "Apparition of the Cross," is said to have marked the beginning of his episcopate (Socrates, *Hist. Eccl.* ii, 28). He soon became involved in disputes with the Arian Acacius, bishop of Cæsarea, who commenced a persecution against him, which terminated in his deposition by a council in 357. He was restored to his see, but was deposed a second time by the Arian Council of Constantinople in 360. On the accession of Julian, Cyril returned to his bishopric, but was expelled a third time (A.D. 367). Finally, under Theodosius, he was restored by the Council of Constantinople in 381, and died, cleared of all charges against his orthodoxy, May, 386. "An incident noticed by all the biographers of St. Cyril is the celebrated attempt and failure of the emperor Julian to rebuild the temple of the Jews at Jerusalem, ostensibly for the purpose of promoting their religion, but really with the sinister view of falsifying the prophecies respecting its irreparable destruction" (see Gregory Nazian. *Orat.* 4 *advers. Julian;* Theodoret, Socrates, Philostorgius, Sozomen, and bishop Warburton's Dissertation on the subject, p. 88).

"The extant writings of St. Cyril are in the Greek language, and consist of eighteen books of *Catecheses*, or sermons, delivered during Lent to the catechumens (called before baptism *Illuminati*); five similar dis-

courses delivered during Easter week to the neophytes after baptism, called *Mystagogic*, being explanatory of the mysteries of the Christian sacraments; a treatise on words, and the letter to Constantius, besides which several homilies and epistles are sometimes improperly included. Rivetus (lib. iii, c. 8, 9, 10, *De Cyrilli Catechesibus*) considers the five Mystagogics and the letter to Constantius as supposititious; but by Vossius, Cave, Mill, Whittaker, and bishop Bull, they are received as genuine. The books of Catecheses are crowded with quotations from Scripture, and the style is dull and tiresomely prolix; but the facts they contain relating to the doctrines and discipline of the Eastern Church in the 4th century are extremely interesting to the student of Christian antiquities. In the first Catechesis are described the effects of baptism. The fourth gives an exposition of all the Christian doctrines, and treats of numerous questions concerning the body, soul, virginity, marriage, etc. The subsequent discourses exhibit and enjoin a belief in the miraculous virtues of the relics of saints, which are represented as worthy of all veneration; in the efficacy of prayers and sacrifices for the dead; in the powers of exorcism, consecrated unction, oil, and water. Christians are exhorted to cross themselves on every occasion and action throughout the day. The enthusiastic adoration of the cross displayed by St. Cyril was probably owing to his officiating in the church of the Holy Cross in Jerusalem, where, after the 'Invention of the Cross,' it was deposited in a silver case, and shown by the archbishop to thousands of pilgrims, who each took a little chip of it without occasioning any diminution of its bulk! A description of this cross is given by Touttée at the end of his edition of Cyril's works. His chief theological work is the above-named Κατηχήσεις φωτιζομένων, Catecheses, delivered in preparing a class of catechumens for baptism, and it is the first example we have of a popular compend of Christian doctrine. The perpetual virginity of Mary is taught by Cyril. The state of virginity in general is extolled as equal to that of angels, with an assurance that, in the day of judgment, the noblest crowns will be carried off by the virgins. The resurrection is proved and illustrated by the story of the Phœnix" (*English Cyclopædia*). The best editions of his works are, Mille, *Opera Omnia*, Græce et Latine (fol., 1703, with notes, indices, and various readings); Touttée (Benedictine, Gr. et Lat., Paris, fol., 1720); also in Migne, *Patrologiæ Curs. Græc.* vol. xxxiii. The Catecheses are given in English in the *Library of the Fathers* (vol. ii), Oxford, 1839, 8vo.—See Clarke, *Succession Sac. Liter.* i, 279; Lardner, *Works*, iv; Neander, *Church History*, ii, 98; Cave, *Hist. Lit.* i, 211; Taylor, *Ancient Christianity*; Schaff, *Hist. of the Christian Church*, § 168.

Cyril, St., the apostle of the Slavi, was born in Thessalonica about 820. His original name was Constantine. He was educated at Constantinople, where he became acquainted with Photius, and gave for some time lectures on philosophy. He therefore received and always retained the name "The Philosopher." After some time he took orders, became a monk, and soon, with his brother Methodius, withdrew into solitude. He now fell out with Photius, defended the veneration of images, and wrote against the Mohammedans. About 860 he was sent by the emperor Michael III as a missionary to a Tartar tribe, the Chazari, which at that time inhabited the northern shores of the Black Sea as far as the Lower Volga. Jews and Mohammedans vied with Christian missionaries to gain an influence upon this tribe, and the selection of Constantine by the emperor for this difficult mission indicates the high reputation which he enjoyed. He first went to Kherson, acquired a knowledge of the language, and put himself in possession of some relics of Clemens Romanus, which he seems to have always carried with him from this time. A portion of the tribe embraced Christianity, but there is no proof of a Christianization of the whole tribe and of the organization of a national Church. After his return to Constantinople he again lived with his brother Methodius in ascetic retirement until he was sent by the emperor as a missionary to the South Slavic tribes. Both Greek and Roman missionaries had for some time been at work among this people, which, anxious to preserve its independent nationality, mistrusted both. Constantine gained their confidence by convincing them that he sympathized with their national sentiments, and had in view nothing but their conversion to Christianity. He became the founder of a Slavic literature by translating into their language portions of the Scriptures and the most important liturgical books. For this purpose he used an alphabet which either had been invented by him or modified from one (the "Glagolitic") more ancient. The new alphabet, called after him the "Cyrillic," was adopted by most of the Eastern Slavi (Bulgarians, Servians, Bosnians, Slavonians, Russians, etc.), but subsequently underwent in the several countries a number of modifications. By prince Rastislav he was called as a missionary into the Slavic countries outside of the Greek empire. This Rastislav is probably the same whom the Germans call Rastices, the founder of a great Moravian empire whose exact limits cannot at present be defined. About 863 they arrived at the court of Rastislav, the seat of which we do not know, but which was probably at a point far to the south-east from the present Moravia. By disseminating the Scriptures and celebrating divine worship in the Slavic language, they soon founded a flourishing Slavic Church in the territory of Rastislav and other Pannonian princes. When pope Nicholas I heard of their successes he invited them to Rome. In 868 they followed this invitation, accompanied by many disciples. Their Slavic Bible and Slavic mass attracted great attention, and the successor of Nicholas (who in the meanwhile had died), Adrian II, received them with marks of great favor. They presented the pope with the relics of Clemens Romanus, and the pope approved their work, inclusive of the Slavic translation of the Bible and the Slavic liturgy, and declared his intention to organize the new churches in the Slavic provinces as an independent ecclesiastical province, under Constantine and Methodius as bishops. But Constantine, who felt the end of his life approaching, preferred to remain as a monk in Rome, assumed the name of Cyril, under which he has since been known in Church history, and died a few weeks later, Feb. 14, 869. The work of evangelization was continued by his brother Methodius. The works which were formerly ascribed to Cyril (*Apologi Morales*, Vienna, 1630; *Opusculum de Diction.* Venice, 1497) are spurious.—Herzog, *Real-Encyklop.* iii, 223; Schafarik, *Slav. Alterthümer*, ii, 471; Wattenbach, *Beiträge zur Geschichte der christl. Kirche in Mähren u. Böhmen* (Vienna, 1849); *Acta Sanctorum, Mart.* ii, 14; Dobrowsky, *Cyrill und Method* (Prague, 1823); Philaret (Russian bishop of Riga), *Cyrillus und Methodius* (German transl., Mittau, 1847); McLear, *Missions in the Middle Ages*, chap. xiii.

Cyril Lucar (Cyrillus Lucaris), a Greek patriarch of Constantinople, noted for his efforts to introduce into his Church the doctrines of the Reformed (Calvinistic) churches. He was born about 1568 in Candia, which at that time was under the sovereignty of Venice and the chief seat of Greek scholarship. He studied for several years in Venice and Padua, and subsequently made a journey through several European countries. In Geneva, where he staid for some time, he became acquainted with several prominent theologians of the Reformed Church. In Lithuania he was rector of a literary institution at Ostrog, and took a prominent part in opposing the projected union of the Greek

churches of Poland and Lithuania with Rome. After his return to his native land, he was soon promoted by the patriarch of Alexandria to the dignity of an archimandrite. In 1602 Cyril succeeded Meletius as patriarch of Alexandria. While holding this position he carried on an active correspondence with David le Leu, de Wilelm, and the Remonstrant Uytenbogaert of Holland, Abbot, archbishop of Canterbury, Leger, professor of Geneva, the republic of Venice, the Swedish king Gustavus Adolphus, and his chancellor, Axel Oxenstierna. Many of these letters, written in different languages, are still extant. They show that Cyril was an earnest opponent of Rome, and a great admirer of the Protestant Reformation. He sent for all the important works, Protestant and Roman Catholic, published in the Western countries, and sent several young men to England to get a thorough theological education. The friends of Cyril in Constantinople, and among them the English, Dutch, and Swedish ambassadors, endeavored to elevate Cyril to the patriarchal see of Constantinople. They would have succeeded in 1613, after the banishment of the patriarch Timotheus, but for the unwillingness of Cyril to pay the amount demanded by the Turkish government. After the death of Timotheus in 1621, he was elected his successor by a unanimous vote of the synod. His life as patriarch was full of vicissitudes. The Jesuits, in union with the agents of France, several times procured his banishment, while his friends, supported by the ambassadors of the Protestant powers in Constantinople, obtained, by means of large sums of money, his recall. During all these troubles, Cyril, with remarkable energy, pursued the great task of his life. In 1627 he obtained a printing-press from England, and at once began to print his Confession of Faith and several catechisms. But, before these documents were ready for publication, the printing establishment was destroyed by the Turkish government at the instigation of the Jesuits. Cyril then sent his Confession of Faith to Geneva, where it appeared, in 1629, in the Latin language, under the true name of the author, and with a dedication to Cornelius de Haga. It created throughout Europe a profound sensation, and many were inclined to regard it as spurious. Cyril, however, openly confessed the authorship, published in 1633 a Greek edition of the Confession, and in 1636, in a letter to the professors of Geneva, declared his concurrence in the principal doctrines of the Reformed Church. Many opponents, however, now rose against him in the Greek Church, and in 1638 a synod convened at Constantinople to try him. But, before sentence was pronounced, the Janissaries arrested him by order of the government, carried him to a boat, strangled him, and cast the corpse into the sea. Some friends found the corpse and buried it upon an island, and ten years later a solemn funeral was held at Constantinople. Several synods condemned the innovations attempted by Cyril, but the Confession of Faith was generally treated by them as spurious.

The Confession of Cyril uses of the procession of the Holy Spirit the compromising formula ἐκ τοῦ πατρὸς δι' υἱοῦ (*a patre per filium*). It teaches absolute predestination, denies moral freedom prior to regeneration, declares strongly against the rights claimed by the popes, and acknowledges only two sacraments, baptism and the Lord's Supper. It recommends the reading of the Bible, distinguishes the canonical from the deutero-canonical books, and rejects the veneration of images. It has been published by Kimmel in his *Libri symbol. eccles. Græcæ*.—Thom. Smith, *Collectanea de Cyrillo Lucarî* (Lond. 1707); Bohnstedt, *De Cyrillo Lucari* (Halle, 1724); Herzog, *Real-Encyklop.* viii, 538; Pichler, *Geschichte des Protestantismus in der Orientalischen Kirche*, etc. (Munich, 1862, 8vo); Stanley, *Eastern Church; Princeton Review*, v, 312; Murdoch's Mosheim, *Church History*, iii, 347, note 5 (N. Y. 1854).

Cy'rus (Hebraized *Ko'resh*, כּוֹרֶשׁ [twice כֹּרֶשׁ, Ezra i, 1 lat. clause, 2], 2 Chron. xxxvi, 22, 23; Ezra i, 1, 7, 8; iii, 7; iv, 3, 5; Isa. xliv, 28; xlv, 1; Dan. i, 21; x, 1; Chald. id. Ezra v, 13, 14, 17; vi, 3, 14; Dan. vi, 28; Greek Κῦρος, as in 1 Esdr. ii, 3; iv, 44, 57; v, 71, 73; vi, 17, 21; for the old Persic *Kurush*, supposed by the Greeks to mean the *sun* [Ctesias, *Pers. Exc.* 49; Plutarch, *Artax. I*], but rather connected with the Sanscrit *Kuru*, of unknown signif., Rawlinson, *Herod.* iii, 455), originally called *Agradates* (Ἀγραδάτης, Strabo, xv, 729; see Rosenmüller, *Alterth.* I, i, 367), the celebrated Persian king (מֶלֶךְ פָּרַס) and conqueror of Babylon, who promulgated the first edict for the restoration of the Jews to their own land (Ezra i, 1, etc.). "In consequence of a dream, Astyages, it is said, designed the death of his infant grandson, but the child was spared by those whom he charged with the commission of the crime (Herod. i, 109 sq.), and Cyrus grew up in obscurity under the name of Agradates (Strab. xv, 729). His real parentage was discovered by the imperious spirit which he displayed while yet a boy (Herod. i, 114), and when he grew up to manhood his courage and genius placed him at the head of the Persians. The tyranny of Astyages had at that time alienated a large faction of the Medes, and Cyrus headed a revolt which ended in the defeat and capture of the Median king, B.C. 559, near Pasargadæ (now Murgh-Aub) (Strabo, xv, 730). After consolidating the empire which he thus gained, Cyrus entered on that career of conquest which has made him the hero of the East. In B.C. 546 (?) he defeated Crœsus, and the kingdom of Lydia was the prize of his success. While his general Harpagus was engaged in completing the reduction of Asia Minor, Cyrus turned his arms against the Babylonians. Babylon fell before his army, and the ancient dominions of Assyria were added to his empire (B.C. 538). The conquest of Babylon opened the way for greater designs. It is probable that Cyrus planned an invasion of Egypt; and there are traces of campaigns in Central Asia, in which he appears to have attempted to extend his power to the Indus (Ctesias, *Pers.* c. 5 sq.). Afterwards he attacked the Massagetæ, and, according to Herodotus, (i, 214; comp. Josephus, *Ant.* xi, 2, 1), he fell in a battle against them B.C. 529 (Clinton, *Fast. Hell.* ii, 301 sq.). His tomb is still shown at

Symbolical Figure of Cyrus (from the Persepolitan Monuments), and his Name in cuneiform Characters.

Pasargadæ (Arrian, *Exp. Al.* vi, 29), the scene of his first decisive victory (Rawlinson, *Herod.* i, 273).

"It is impossible to insist upon the details of the outline thus sketched. In the time of Herodotus Cyrus was already regarded as the national hero of Persia, and his history had received various popular embellishments (Herod. i, 95; comp. iii, 18, 160; Xenoph. *Cyrop.* i, 2, 1). In the next century Xenophon chose him as the hero of his romance, and fact and fiction became thenceforth hopelessly confused in classical writers. But, in the absence of authentic details of his actions, the empire which he left is the best record of his power and plans. Like an Oriental Alexander, he aimed at universal dominion; and the influence of Persia, like that of Greece, survived the dynasty from which it sprung. In every aspect the reign of Cyrus marks an epoch in universal history. The fall of Sardis and Babylon was the starting-point of European life; and it is a singular coincidence that the beginning of Grecian art and philosophy, and the foundation of the Roman constitution, synchronize with the triumph of the Arian race in the East (Niebuhr, *Gesch. Ass.* p. 232)." The following points demand especial consideration, and we therefore elaborate them at considerable length.

1. *His Parentage.*—Herodotus (i, 107) and Xenophon (*Cyrop.* i, 2, 1) agree that he was son of Cambyses, prince of Persia, and of Mandane, daughter of Astyages, king of the Median empire. In an Assyrian inscription he is called the "son of Cambyses the powerful king" (Rawlinson, *Herod.* i, 193). Ctesias denies that there was any relationship at all between Cyrus and Astyages (*Pers. Exc.* 2). According to him, when Cyrus had defeated and captured Astyages, he *adopted* him as a grandfather, and invested Amytis, or Amyntis, the daughter of Astyages (whose name is in all probability only another form of Mandane), with all the honors of queen dowager. His object in so doing was to facilitate the submission of the more distant parts of the empire, which were not yet conquered; and he reaped excellent fruit of his policy in winning the homage of the ancient, rich, and remote province of Bactria. Ctesias adds that Cyrus afterwards married Amytis. It is easy to see that the latter account is by far the more historical, and that the story followed by Herodotus and Xenophon is that which the courtiers published in aid of the Persian prince's designs. Yet there is no reason for doubting that, on the father's side, Cyrus belonged to the Achæmenidæ, the royal clan of the military tribe of the Persians. See Sartorius, *De rationib. cur in expon. vita et rel. gest. Cyri, Xenophonti potius quam Herodot. sit credendum* (Lübben, 1771). A different view is taken in Smith's *Dict. of Class. Biog.* s. v. See DARIUS (THE MEDE).

2. *His Elevation to the Throne.*—It was the frequent practice of the Persian monarchs, and probably therefore of the Medes before them, to choose the provincial viceroys from the royal families of the subject nations, and thereby to leave to the vanquished much both of the semblance and of the reality of freedom. This will be sufficient to account for the first steps of Cyrus towards eminence. But as the Persian armies were at that time composed of ruder and braver men than the Medes (indeed, to this day, the men of Shirâz are proverbially braver than those of Isfahân), the account of Xenophon is credible, that in the general wars of the empire Cyrus won the attachment of the whole army by his bravery; while, as Herodotus tells, the atrocious cruelties of Astyages may have revolted the hearts of the Median nobility. See PERSIA.

3. *Transition of the Empire from the Medes to the Persians.*—Xenophon's romance omits the fact that the transference of the empire was effected by a civil war; nevertheless, the same writer, in his *Anabasis*, confesses it (iii, 4, 7, 12). Herodotus, Ctesias, Isocrates, Strabo, and, in fact, all who allude to the matter at all, agree that it was so. In Xenophon (*l. c.*) we find the Upper Tigris to have been the seat of one campaign, where the cities of Larissa and Mespila were besieged and taken by Cyrus. From Strabo we learn that the decisive battle was fought on the spot where Cyrus afterwards built Pasargadæ, in Persis, for his native capital. This agrees with Herodotus's account of two armies being successively lost, which may mean that the war was ended in two campaigns. Yet Ctesias represents Astyages as finally captured in the palace of Ecbatana. Cyrus (says Herodotus) did Astyages no harm, but kept him by his side to the end of his life. Ctesias, however, states that he was first made ruler of the Barcanians, and afterwards murdered by a eunuch sent by Cyrus to bring him home to visit his family. The date of the accession of Cyrus is fixed by the unanimous consent of the ancient chronologers as occurring in B.C. 559 (Africanus, *ap. Euseb.* x, 10; Clinton, ii, s. an.).

The Medes were by no means made subject to the Persians at first. It is highly probable that, as Herodotus and Xenophon represent, many of the noblest Medes sided with Cyrus, and during his reign the most trusted generals of the armies were Medes. Yet even this hardly explains the phenomenon of a Darius the Mede, who, in the book of Daniel, for two years holds the government in Babylon, after the capture of the city by the Medes and Persians. Indeed, the language used concerning the kingdom of Darius might be explained as Oriental hyperbole, and Darius be supposed to have been a mere satrap of Babylon, were it not for the fact that Cyrus is clearly put forward as a *successor* to Darius the Mede. Many have been the attempts to reconcile this with the current Grecian accounts; but there is one only that has the least plausibility, viz. that which, with Xenophon, teaches that Astyages had a son still living (whom Xenophon calls Cyaxares), and that this son is no other than Darius the Mede; to whom Cyrus, by a sort of nephew's piety, conceded a nominal supremacy at Babylon. See CYAXARES. In the reign of the son of Cyrus the depression of the Medes probably commenced. At his death the Magian conspiracy took place, after the defeat of which the Medes doubtless sunk lower still. At a later time they made a general insurrection against the Persian power, and its suppression seems to have brought them to a level with Hyrcanians, Bactrians, and other vassal nations which spoke the tongue of Persia; for the nations of the poetical *Irân* had only dialectual variations of language (Strabo, xv, 2, p. 311). See MEDIA.

4. *Military Career of Cyrus.*—The descriptions given us in Ctesias, and in Plutarch's Artaxerxes (the latter probably taken from Ctesias), concerning the Persian mode of fighting, are quite *Homeric* in their character. No skill seems to be needed by the general; no tactics are thought of: he does his duty best by behaving as the bravest of common soldiers, and by acting the part of champion, like a knight in the days of chivalry. We cannot suppose that there was any *greater* advance of the military art in the days of Cyrus. It is agreed by all that he subdued the Lydians, the Greeks of Asia Minor, and the Babylonians: we may doubtless add Susiana, which must have been incorporated with his empire before he commenced his war with Babylon; where also he fixed his military capital (Susa, or Shushan), as more central for the necessities of his administration than Pasargadæ. Yet the latter city continued to be the more sacred and beloved home of the Persian court, the place of coronation and of sepulture (Strabo, xv, 3, p. 318; and Plut. *Artax.* init.). All Syria and Phœnicia appear to have come over to Cyrus peaceably.

With regard to the Persian wars, the few facts from Ctesias, which the epitomator has extracted as differing from Herodotus, carry with them high probability. He states that, after receiving the submission of the Bactrians, Cyrus made war on the Sacians, a Scythian

(i. e. a Slavonic) people, who seem to have dwelt, or perhaps rather roved, along the Oxus, from Bokhara to Khiva; and that, after alternate successes in battle, he attached the whole nation to himself in faithful allegiance. Their king is called Amorges by Ctesias. They are undoubtedly the same people that Herodotus (vii, 64) calls *Amyrgian* Sacians; and it is highly probable that they gave to the district of Margiana its name. Their women fought in ranks as systematically as the men. Strabo has cursorily told us of a tradition (xv, 2, p. 307) that Cyrus escaped with but seven men through the deserts of Gedrosia, fleeing from the "Indians"—which might denote an unsuccessful war against Candahar, etc., a country which certainly was not reduced to the Persian empire until the reign of Darius Hystaspis.

The closing scene of the career of Cyrus was in battle with a people living on one or both banks of the river Iaxartes, now the Syr-deria. Herodotus calls the enemy the Massagetans, who roamed along the north bank of the river: according to Ctesias it was the Derbices, who seem to have been on the south. Both may, in fact, have combined in the war. In other respects the narrative of Ctesias is beyond comparison more credible, and more agreeable with other known facts, except that he introduces the fiction of Indians *with elephants* aiding the enemy. Two battles were fought on successive days, in the former of which Cyrus was mortally wounded, but was carried off by his people (B.C. 529, according to Clinton). In the next, the Sacian cavalry and the faithful Amorges came to support him, and the Derbices sustained a total and bloody defeat. Cyrus died the third day after his wound: his body was conveyed to Pasargadæ, and buried in the celebrated monument, which was broken open by the Macedonians two centuries afterwards (Strabo, xv, 3). A description is given of the tomb in Arrian (vi, 29): it was a neat quadrangular edifice, with a low door leading into a little chamber, in which lay a golden sarcophagus, containing the body of Cyrus. The inscription, reported by Aristobulus, an eyewitness, is this: "O man, I am Cyrus, who acquired the empire for the Persians, and was king of Asia. Grudge me not, then, this monument." It is generally supposed to have perished, but Sir R. K. Porter has sought to identify it with an extant building known by the natives as that of "the mother of Suleiman" (*Travels*, i, 498). His name is found on monuments at Murghab, north of Persepolis (Höck, *Vet. Med. N. Pers. Monum.*).

Supposed Tomb of Cyrus.

5. *Conduct and Relations of Cyrus towards the Jews.*—Hitherto the great kings, with whom the Jews had been brought into contact, had been open oppressors or seductive allies; but Cyrus was a generous liberator and a just guardian of their rights. An inspired prophet (Isa. xliv, 28) recognised in him "a shepherd" of the Lord, an "anointed" king (Isa. xlv, 1; מָשִׁיחַ, *Messiah*); and the title seemed to later writers to invest him with the dignity of being in some sense a type of Christ himself (Jerome, *Comm. in Isa.* xlv, 1). His successes are connected in the prophecy with their religious issue; and if that appear to be a partial view of history which represents the restoration of a poor remnant of captive Israelites to their own land as the final cause of his victories (Isa. xliv, 28–xlv, 4), it may be answered that the permanent effects which Persia has wrought upon the world can be better traced through the Jewish people than through any other channel. The laws, the literature, the religion, the very ruins of the material grandeur of Persia have passed away, and still it is possible to distinguish the effects which they produced in preparing the Jews for the fulfilment of their last mission. In this respect, also, the parallel, which has already been hinted, holds good. Cyrus stands out clearly as the representative of the East, as Alexander afterwards of the West. The one led to the development of the idea of order, and the other to that of independence. Ecclesiastically the first crisis was signalized by the consolidation of a Church, the second by the distinction of sects. The one found its outward embodiment in "the great synagogue," the other in the dynasty of the Asmonæans.

The kings of Assyria and Babylon had carried the Jews into captivity, both to remove a disaffected nation from the frontier, and to people their new cities. By *un*doing this work, Cyrus attached the Jews to himself as a garrison at an important post. But we may believe that a nobler motive conspired with this. The Persian religion was primitively monotheistic, and strikingly free from idolatry; so little *pagan* in its spirit that, whatever of the mystical and obscure it may contain, not a single impure, cruel, or otherwise immoral practice was united to any of its ceremonies. It is credible, therefore, that a sincere admiration of the Jewish faith actuated the noble Persian when he exclaimed, in the words of the book of Ezra, "Go ye up and build in Jerusalem the house of Jehovah, God of Israel; *he is God!*"—and forced the Babylonian temples to disgorge their ill-gotten spoil. It is the more remarkable, since the Persians disapproved the confinement of temples. Nevertheless, impediments to the fortification of Jerusalem afterwards arose, even during the reign of Cyrus (Ezra iv, 5). See CAPTIVITY.

Perhaps no great conqueror ever left behind him a fairer fame than Cyrus the Great. His mighty achievements have been borne down to us on the voice of the nation which he elevated; his evil deeds had no historian to record them. What is more, it was his singular honor and privilege to be the first Gentile friend to the people of Jehovah in the time of their sorest trouble, and to restore them to the land whence light was to break forth for the illumination of all nations. To this high duty he is called *by name* by the prophet (Isa. xliv, 28; xlv, 1), and for performing it he seems to be entitled "the righteous man" (xli, 2; xlv, 13). There are also important passages in Jeremiah (xxv, 12; xxix, 10; xxiii, 7–13) that predict the same event, without mentioning the name of Cyrus as the agent. The corresponding history is found in the books of Daniel and Ezra. The language of the proclamation in Ezra i, 2, and 2 Chron. xxxvi, 22, seems to countenance the idea that he was

acquainted, as he easily might be through Daniel, with the prophecy of Isaiah respecting him. See DANIEL.

The "first year of Cyrus" there spoken of is not the year of his elevation to power over the Medes, nor the date of the conquest of Persia, nor yet that of the fall of Babylon, B.C. 538; but at the close of the two years succeeding this last event, during which "Darius the Mede" held the viceroyship of Babylon, i. e. in B.C. 536. It was not till then that Cyrus became actual ruler over Palestine, which continued to be attached to the Babylonian department of his empire (see Browne's *Ordo Sæclorum*, p. 173). The edict of Cyrus for the rebuilding of the Temple (2 Chron. xxxvi, 22, 23; Ezra i, 1–4; iii, 7; iv, 3; v, 13, 17; vi, 3) was, in fact, the beginning of Judaism; and the great changes by which the nation was transformed into a church are clearly marked. (On the identity of the times of Cyrus and Daniel, see *Jour. Sac. Lit.* July, 1854, p. 435 sq.; Jan. 1855, p. 364 sq.)

(1.) The lesson of the kingdom was completed by the captivity. The sway of a temporal prince was at length felt to be at best only a faint image of that Messianic kingdom to which the prophets pointed. The royal power had led to apostasy in Israel and to idolatry in Judah, and men looked for some other outward form in which the law might be visibly realized. Dependence on Persia excluded the hope of absolute political freedom, and offered a sure guarantee for the liberty of religious organization.

(2.) The captivity which was the punishment of idolatry was also the limit of that sin. Thenceforth the Jews apprehended fully the spiritual nature of their faith, and held it fast through persecution. At the same time wider views were opened to them of the unseen world. The powers of good and evil were recognised in their action in the material world, and in this way some preparation was made for the crowning doctrine of Christianity.

(3.) The organization of the outward Church was connected with the purifying of doctrine, and served as the form in which the truth might be realized by the mass. Prayer—public and private—assumed a new importance. The prophetic work came to an end. The Scriptures were collected. The "law was fenced" by an oral tradition. Synagogues were erected, and schools formed. Scribes shared the respect of priests, if they did not supersede them in popular regard.

(4.) Above all, the bond by which "the people of God" were held together was at length felt to be religious and not local, nor even primarily national. The Jews were incorporated in different nations, and still looked to Jerusalem as the centre of their faith. The boundaries of Canaan were passed; and the beginnings of a spiritual dispensation were already made when the "Dispersion" was established among the kingdoms of the earth (comp. Niebuhr's *Gesch. Assurs und Babels*, p. 224 sq.; Ewald, *Gesch. d. Volkes Israel*, iv, 60 sq.; Jost, *Gesch. des Judenthums*, i, 13 sq.). See DISPERSION (OF JEWS).

D.

Däah. See GLEDE.

Dab'areh, a less correct mode of Anglicizing (Josh. xxi, 28) the name DABERATH (q. v.).

Dabaritta. See DABERATH.

Dab'basheth (Heb. *Dabbe'sheth*, דַּבֶּשֶׁת, a camel's *hump*, as in Isa. xxx, 6, q. d. Camel-hump Hill; Sept. Δαβασθέ, Alex. Δαβασθαί, Vat. Βαιθάραβα; Vulg. *Debbaseth*), a place on the boundary-line of the tribe of Zebulon, between Maralah and Jokneam (Josh. xix, 11; see Keil, *Comment.* in loc.); apparently the modern *Jebâta*, which seems likewise to correspond to one of the places named *Gabatha* (Euseb. Γαβαά and Γαβαθά), located by Jerome (*Onomast.* s. v. Gabathon) near Diocæsarea, in the plain of Legio (Robinson, *Researches*, iii, 201, whose map places it east of Uknufis, apparently by an error; see Van de Velde, *Memoir*, p. 140). It was again visited by Dr. Robinson (*Later Res.* p. 113), but is not described by him (comp. Ritter, *Erdkunde*, xvi, 748). Knobel suggests (*Jos. erklärt*, p. 458) that the name in the *Onomasticon* may have arisen from a Hebrew epithet (גִּבְעַת, i. e. *Gibeath*, q. d. the *hill of* the plain), a view which its isolation from the camel ridge seems to confirm (Ritter, xvi, 700), although the modern village seems to be upon a very slight, if any eminence.

Dab'erath (Heb. *Daberath'*, דָּבְרַת [once, Josh. xix, 12, with the art. *had-Daberath'*, הַדָּבְרַת; once, 1 Chron. vi, 72, *Dobrath'*, דָּבְרַת], according to Fürst a fem. form of דֹּבֶר, *pasture;* Sept. in Josh. Δαβράθ and Δαβραθά v. r. Δαβιρώθ, in Chron. Ἀμώς v. r. Δαβώρ; Vulg. *Dabereth*), a town in the tribe of Issachar (Josh. xxi, 28, where the A. V. has "Dabareh"), near the border of Zebulon (Josh. xix, 12, where it is named next to Chisloth-tabor), and assigned to the Levites (1 Chron. vi, 72). It is probably the same with the village *Dabira* (Δαβειρά), mentioned by Eusebius and Jerome (*Onomast.* s. v.) as lying near Mt. Tabor, in the region of Diocæsarea (Reland, *Palæst.* p. 737); and also the *Dabaritta*, repeatedly mentioned by Josephus (Δαβαρίττων κώμη, *War*, ii, 21, 3; Δαβαριττηνοί, *Life*, 26; Δαβάριττα v. r. Δαράβιττα, *Life*, 62) as lying in the great plain on the confines of Galilee (Reland, *Palæst.* p. 737, too nicely objects that the border between Issachar and Zebulon would not be assigned to Galilee). In exact agreement with these notices there still exists, on the side of a ledge of rocks just at the base of Mt. Tabor, on the north-west, the village *Deburieh*, a small, poor, and filthy place, containing the bare walls of an old church, based upon massive foundations of a still older date. The situation, however, is beautiful, with the wooded heights of Tabor rising behind, and in front the plain of Esdraelon expanding like a sea of verdure (Robinson, *Res.* iii, 210; Maundrell, *Early Trav.* p. 479, Ritter, *Erdk.* xvi, 679; De Saulcy, *Narrative*, i, 75; Schwarz, *Palest.* p. 166, 167). Tradition (Van de Velde, ii, 374) incorrectly makes this the scene of the miracle on the lunatic child performed by our Lord after his descent from the Mount of Transfiguration (Matt. xvii, 14).

Da'bria, one of the five swift scribes who recorded the visions of Esdras (2 Esdr. xiv, 24; comp. 37, 42).

Dach, SIMON, a German Christian poet, born July 29, 1605, at Memel; became in 1633 sub-teacher of the cathedral school of Königsberg, co-rector in 1636, professor of poetry in the University in 1639, and died April 16, 1659. He stands among the first poets of the so-called Königsberg school. His productions were partly religious, partly social, and appeared under divers titles; they were collected and published by his widow. Some 150 of his religious pieces were published by H. Alberti, *Arien*, etc. (Königsb. 1640–50), and afterwards incorporated in the Königsberg Hymnbook of 1690. See Gebauer, *S. Dach u. seine Freunde als Kirchenliederdichter* (Tübing. 1828); Henneberger, *Jahrb. f. deutsche Literaturgesch.* (Meiningen, 1854.—Pierer, *Universal-Lexikon*, s. v.

Dacherius. See ACHERY, D'.

D'Achery. See ACHERY, D'.

Daco'bi (Δακουβί v. r. Δακούβ, Vulg. *Accuba*), one of the heads of the families of "porters" that re-

turned from Babylon (1 Esdr. v, 28); the same with AKKUB (q. v. No. 2) of the Heb. text (Ezra ii, 42).

Da Costa, ISAAC (a descendant of Uriel Acosta, q. v.), was born Jan. 14, 1798, at Amsterdam, where he also pursued his studies until 1817, when he went to Leyden to devote his time to the study of law and belles-lettres. In 1822, after the death of his father, he abandoned Judaism and embraced Christianity, and became one of the most active opponents of the new rationalistic opinions. A circle of religiously-inclined persons gathered about him, and to these he expounded the Bible until after the Revolution of 1830, when he visited different cities of Holland and delivered a series of lectures. In 1839 he became a member of the Netherlands Institute, and renewed his efforts as a poet, while he still carried on a controversy with theologians of other schools and against all ecclesiastical innovations. He died April 28, 1860. Besides numerous poems and works in general literature, he wrote, *Israel en de Volken* (1849); *Over de eenheid en overeenstimming de evangelien* (1840, 2 vols.); *Over de waarheid en wardij van het Oude Testament* (1843); *Paulus* (1846); *Beschouwing over het evangelie van Lukas* (1856); *De apostel Johannes en zijne schriften*. —Pierer, *Universal-Lexikon*, xix, 831.

Daddæ'us (Λοδδαῖος v. r. Δολδαῖος, Vulg. *Loddæus*), the "captain of the treasury" among the exiles at Babylon (1 Esdr. viii, 46; in the preceding verse Anglicized *Saddæus*); evidently a corruption (through the blending with the preceding particle עַל) of the IDDO (q. v.) of the Hebrew text (Ezra viii, 17).

Dæmon, in Greek δαίμων, and its derivative δαιμόνιον, both rendered "devil" in the English version of the New Test.; in the original, however, they are carefully distinguished from the term διάβολος. See DEVIL. These two words, δαίμων and δαιμόνιον, are used as synonymous both by profane and sacred writers. The etymologies which the Greek authors themselves assign to them all point to some supposed characteristic of those *intelligent beings* to whom the words are applied. For example, Plato, in his *Cratylus* (i, 398, ed. Serran.), derives the word from δαήμων, "knowing" (of which, indeed, the form δαίμων is found in Archil. [B.C. 650]), in allusion to the superior intelligence and consequent efficiency ascribed to dæmons; Eusebius (*Præp. Evang.* iv, 5) from δειμαίνω, "to be terrified;" others, as Proclus (*in Hesiod.*), from δαίω, "to distribute," because dæmons were supposed to assign the lots or destinies of mankind (in which case it would be similar to Μοῖρα). The subject is greatly encumbered with superstition.

I. *By heathen writers* the terms in question are employed with considerable latitude. In Homer, where the gods are but supernatural men, δαίμιον is used interchangeably with θεός (*Il.* xvii, 98, 99; comp. 104); hence any particular divinity, as Venus (*Il.* iii); afterwards in Hesiod (*Op.* 121), when the idea of the gods had become more exalted and less familiar, the δαίμονες are spoken of as intermediate beings ("minores diis et majores hominibus," Liv. viii, 20; Adam, *Rom. Antiq.* p. 287), the messengers of the gods to men. This latter usage of the word evidently prevailed afterwards as the correct one, although in poetry, and even in the vague language of philosophy, τὸ δαιμόνιον was sometimes used as equivalent to τὸ θεῖον for any superhuman nature. Aristotle applies δαιμόνιον to the Divinity, Providence (*Rhetor.* ii, 23). But Plato (*Symp.* p. 202, 203) fixes it distinctly in the more limited sense. Among them were numbered the spirits of good men, "made perfect" after death (Plato, *Crat.* p. 398, quotation from Hesiod). It was also believed that they became tutelary deities of individuals (to the purest form of which belief Socrates evidently referred in the doctrine of his δαιμόνιον); and hence δαίμων was frequentiy used in the sense of the "fate" or "destiny" of a man (as in the tragedians constantly), thus recurring, it would seem, directly to its original derivation.

1. Dæmons, in the theology of the Gentiles, are middle beings between gods and mortals. This is the judgment of Plato, which will be considered decisive: "*Every* dæmon is a middle being between God and mortal." He thus explains what he means by a middle being: "God is not approached immediately by man, but all the commerce and intercourse between gods and men are performed by the mediation of dæmons." He enters into further particulars: "Dæmons are reporters and carriers from men to the gods, and again from the gods to men, of the supplications and prayers of the one, and of the injunctions and rewards of devotion from the other" (Plato, *Sympos.* iii, 202, 203, ed. Serran.). "And this," says the learned Mede, "was the *œcumenical* philosophy of the apostles' times, and of the times long before them."

2. Dæmons were of two kinds; the one were the souls of good men, which upon their departure from the body were called heroes, were afterwards raised to the dignity of dæmons, and subsequently to that of gods (Plutarch, *De Defect. Orac.*). Plato (*Cratylus*, ut sup.) says, "The poets speak excellently who affirm that when good men die they attain great honor and dignity, and become dæmons." It is also admitted that Iamblichus, Hierocles, and Simplicius use the words angels and dæmons indiscriminately. Philo (*De Gigantibus*) says that souls, dæmons, and angels are only different names that imply one and the same substance; and he affirms (*De Somn.*) that Moses calls those angels whom the philosophers call dæmons. It was also believed that the souls of *bad* men became evil dæmons (Chalcid. *in Platon. Tim.* c. 135, p. 330). Accordingly δαιμόνιος often occurs in ancient authors as a term of reproach. The *other* kind of dæmons were of more noble origin than the human race, having never inhabited human bodies (Plato, *Tim.* p. 41, 42, 69, 71, 75; Apuleius, *De Deo Socratis*, p. 690).

3. The heathens held that some dæmons were malignant by *nature*, and not merely so when provoked and offended. Plutarch says, "It is a very ancient opinion that there are certain *wicked* and *malignant* dæmons, who envy good men, and endeavor to hinder them in the pursuit of virtue, lest they should be partakers of greater happiness than they enjoy" (Plut. *Dion.* i, 958, Paris, 1624). On this passage bishop Newton remarks, "This was the opinion of all the later philosophers, and Plutarch undeniably affirms it of the very ancient ones" (*Dissert. on the Proph.*, Lond. 1826, p. 476). Pythagoras held that certain dæmons sent *diseases* to men and cattle (Diog. Laert. *Vit. Pythag.* p. 514, ed. Amstel.). Zaleucus, in his preface to his Laws (*apud Stobæum*, Serm. xlii), supposes that an evil dæmon might be present with a witness to influence him to injustice.

II. *By Hellenistic writers.*—In the Septuagint the words δαίμων and δαιμόνιον, though not found very frequently, are yet employed to render different Hebrew words; generally in reference to the idols of heathen worship, as in Psa. xcv, 3, for אֱלִילִים, the "empty," the "vanities" (rendered χειροποίητοι, etc., in Lev. xix, 4; xxvi, 1); in Deut. xxxii, 17, for שֵׁדִים, "lords" (comp. 1 Cor. viii, 5); in Isa. lxv, 11, for גָּד, *Gad*, the goddess of Fortune: sometimes in the sense of avenging or evil spirits, as in Psa. xci, 6, for קֶטֶב, "pestilence," i. e. evidently "the destroyer;" also in Isa. xiii, 21; xxxiv, 14, for שָׂעִיר, "hairy," and צִיִּים, "dwellers in the desert," in the same sense in which the A.V. renders "satyrs." See SPECTRE. In the book of Tobit (iii, 8) we meet with "an evil dæmon" (πονηρὸν δαιμόνιον). See ASMODÆUS.

In Josephus we find the word "dæmons" used always of evil spirits; in vii, 6, 3, he says expressly, "Dæmons are no other than the spirits of the wicked,

that enter into men and kill them, unless they can obtain some help against them;" and he speaks of their exorcism by fumigation (as in Tob. viii, 2, 3). See also *Ant.* vi, c. 8, 2; viii, c. 2, 5. Writing as he did with a constant view to the Gentiles, it is not likely that he would use the word in the other sense, as applied to heathen divinities.

By Philo the word appears to be used in a more general sense, as equivalent to "angels," and referring to both good and evil. See GIANT.

III. *The New-Testament writers* always use the word in a bad sense when they speak as from themselves. In the Gospels generally, in James ii, 19, and in Rev. xvi, 14, the dæmons are spoken of as spiritual beings at enmity with God, and having power to afflict man not only with disease, but, as is marked by the frequent epithet "unclean," with spiritual pollution also. In Acts xix, 12, 13, etc., they are exactly defined as "evil spirits" (*τὰ πνεύματα τὰ πονηρά*). They "believe" the power of God "and tremble" (James ii, 19); they recognise our Lord as the Son of God (Matt. viii, 29; Luke iv, 41), and acknowledge the power of his name, used in exorcism, in the place of the name of Jehovah, by his appointed messengers (Acts xix, 15); and look forward in terror to the judgment to come (Matt. viii, 29). The description is precisely that of a nature akin to the angelic (see ANGEL) in knowledge and powers, but with the emphatic addition of the idea of positive and active wickedness. Nothing is said either to support or to contradict the common Jewish belief, that in their ranks might be numbered the spirits of the wicked dead. In support of it are often quoted the fact that the dæmoniacs sometimes haunted the tombs of the dead (Matt. viii, 28), and the supposed reference of the epithet *ἀκάθαρτα*, "unclean," to the ceremonial uncleanness of a dead body. In 1 Cor. x, 20, 21; 1 Tim. iv, 1; and Rev. ix, 20, the word *δαιμόνια* is used of the objects of Gentile worship, and in the first passage it is opposed to the word *Θεῷ* (with a reference to Deut. xxxii, 17). So also is it used by the Athenians in Acts xvii, 18. The same identification of the heathen deities with the evil spirits is found in the description of the damsel having "a spirit of divination" (*πνεῦμα πύθωνα*, or *πύθωνος*) at Philippi, and the exorcism of her as a dæmoniac by Paul (Acts xvi, 16); and it is to be noticed that in 1 Cor. x, 19, 20, the apostle is arguing with those who declared an idol to be a pure nullity, and while he accepts the truth that it is so, he yet declares that all which is offered to it is offered to a "dæmon." See PYTHONESS. Indeed, it has been contended that evidence is found in the Old Test. to show that dæmons who had once been souls of men were the objects of *immediate worship* among the heathens (Deut. xxvi, 14; Psa. cvi, 28; Isa. viii, 19), and it is in contradistinction to these that Jehovah is so frequently called "the *living* God" (Deut. v, 6, etc. etc.; see Farmer's *Essay on the Dæmoniacs*, passim). More particularly,

1. As to their *nature*, dæmons are *πνεύματα*, or *spirits* (comp. Matt. viii, 16; x, 1; xii, 43–45; Mark ix, 20; Luke x, 20, etc.). Hence there is ascribed to them *intelligence* and *will* (Mark i, 24; Luke iv, 34; James ii, 19; iii, 14), as well as great power (Matt. viii, 28–32; Mark ix, 26; Eph. vi, 12). Whether they are to be reckoned as belonging to the class, and as fallen from the original condition of the angels, does not clearly appear from any statement of Scripture. As the messengers and agents of Satan (q. v.), they may be either the one or the other; but the probability seems to be that they belong to the same class as himself (see Doddridge, *Family Expositor*, i, 33, London, 1799; Campbell, *Prelim. Dissert.* p. 190). He is called the Prince of the Dæmons; the dæmons whom our Lord cast out are collectively called Satan (Matt. xii, 24–29; Luke xiii, 16); and the phrase "unclean spirits," which is applied to them (Matt. x, 1; Mark iii, 11; vi, 7, etc.), is applied also to fallen angels (Rev. xvi, 13; xviii, 2), and even in the singular to Satan himself (Mark iii, 30; comp. 22). These considerations, we think, render it probable that the *δαιμόνια* of the N. T. belong to the number of those angels "who kept not their first estate;" and we conclude probably (though attempts have been made to deny the inference) that they must be the same as "the angels of the devil" (Matt. xxv, 41; Rev. xii, 7, 9), "the principalities and powers" against whom we "wrestle" (Eph. vi, 12, etc.).

2. As to character, dæmons are described as *evil, unclean* (*πονηρά, ἀκάθαρτα*) (Matt. xii, 45; x, 1, etc.), as belonging to the kingdom of darkness, and used by Satan for his wicked designs (Matt. ix, 34; xxv, 41; Eph. vi, 12).

3. As to their abode, they are represented as "reserved in everlasting chains under darkness unto the judgment of the great day" (Jude 6; comp. 2 Pet. ii, 4). They are said also to be in the abyss (Luke viii, 31; comp. Rev. ix, 1–11). See ABYSS. Such descriptions, however, can be understood as intimating nothing more than their being in a state of punishment, and under control; for the activity which is ascribed to them is incompatible with the idea of their being in a state of *confinement;* and, besides, such passages as Eph. ii, 2; vi, 12, would lead to the conclusion that a sphere of extended physical freedom is assigned to these fallen spirits.

III. The *fathers* frequently refer to dæmons in their writings. By some they are represented as angels who, originally created holy, fell into rebellion and sin (Joan. Damasc. *Expos. Fidei*, ii, 4), while others represent them as the fruit of the intercourse of angels with women (Justin M. *Apol.* ii, 5), and others that they are the souls of the giants whom the daughters of men bore to devils (*Pseudo-Clementin.* viii, 18). They also teach that they are *ἀσώματα*, yet not in such a sense as to be absolutely impassable, but as *σκιᾷ ὄντα* (Clem. Alex. p. 791; comp. Chrysostom, *Hom.* cxxv; Theodoret, *in Jes.* xiii). They all describe them as evil, as deceiving and destroying men, as being the object of worship to the heathen, and as employed by God to punish the wicked (Origen, *Cont. Cels.* v, 234; viii, p. 399, etc.). See the passages collected in Suicer, *Thes.* s. v. *δαίμων*, and in Usteri, *Paulin. Lehrbegriffe* (Anh. iii, p. 421 sq., 5th ed.); comp. also on the whole subject Winzer, *De Dæmonologia in N. T. libris* (Viteb. et Lips. 1812–22); Lindinger, *De Hebræor. arte med. de Dæmone* (Wittenb. 1774); Pisanski, *Beleuchtung der sogenannt. biblisch. Dämonologie* (Danz. 1778); Schmid, *De lapsu dæmonum* (Wittenberg, 1775). See DÆMONIAC.

Dæmoniac (*δαιμονιζόμενος*, rendered "possessed with a devil;" also *δαίμονα ἔχων*), a term (in the Gr.) frequently used in the New Test., and applied to persons suffering under the possession of a dæmon or evil spirit [see DÆMON], such possession generally showing itself visibly in bodily disease or mental derangement. The word *δαιμονᾶν* is used in a nearly equivalent sense in classical Greek (as in Æsch. *Choeph.* p. 566; *Sept. c. Theb.* p. 1001; Eurip. *Phœn.* p. 888, etc.), except that as the idea of spirits distinctly evil and rebellious, hardly existed, such possession was referred to the will of the gods or to the vague prevalence of an *Ἄτη*, or fury. Neither word is employed in this sense by the Sept., but in our Lord's time (as is seen, for example, constantly in Josephus) the belief in the possession of men by dæmons, who were either the souls of wicked men after death or evil angels, was thoroughly established among all the Jews, with the exception of the Sadducees alone. Dæmonized persons, in the N. T., are those who were spoken of as having a dæmon or dæmons occupying them, suspending the faculties of their minds, and governing the members of their bodies, so that what was said and done by the dæmoniacs was ascribed to the indwelling dæmon. Plato (*apud Clem. Alex. Strom.* i, 405,

Oxon.) affirms that "dæmoniacs do not use their own dialect or tongue, but that of the dæmons who have entered into them." Lucian says "the patient is silent; the dæmon returns the answer to the question asked." Apollonius thus addresses a youth supposed to be possessed: "I am treated contumeliously by the dæmon, and not by thee" (comp. Matt. viii, 28 and 31; Mark v, 2; ix, 12; Luke viii, 27, 32). With regard to the frequent mention of dæmoniacs in Scripture, three main opinions have been started.

1. That of Strauss and the mythical school, which makes the whole account merely symbolic, without basis of fact. The possession of the devils is, according to this idea, only a lively symbol of the prevalence of evil in the world, the casting out of the devils by our Lord a corresponding symbol of his conquest over that evil power by his doctrine and his life. This notion stands or falls with the mythical theory as a whole: with regard to this special form of it, it is sufficient to remark the plain, simple, and prosaic relation of the facts as facts, which, whatever might be conceived as possible in highly poetic and avowedly figurative passages, would make their assertion here not a symbol or a figure, but a lie. It would be as reasonable to expect a myth or symbolic fable from Tacitus or Thucydides in their accounts of contemporary history.

2. The second theory is, that our Lord and the evangelists, in referring to dæmoniacal possession, spoke only in accommodation to the general belief of the Jews, without any assertion as to its truth or its falsity. It is concluded that, since the symptoms of the affliction were frequently those of bodily disease (as dumbness, Matt. ix, 32; blindness, Matt. xii, 22; epilepsy, Mark ix, 17–27), or those seen in cases of ordinary insanity (as in Matt. viii, 28; Mark v, 1–5); since, also, the phrase "to have a devil" is constantly used in connection with, and as apparently equivalent to, "to be mad" (see John vii, 20; viii, 48; x, 20, and perhaps Matt. xi, 18; Luke vii, 33); and since, lastly, cases of dæmoniacal possession are not known to occur in our own days, therefore we must suppose that our Lord spoke, and the evangelists wrote, in accordance with the belief of the time, and with a view to be clearly understood, especially by the sufferers themselves, but that the dæmoniacs were merely persons suffering under unusual diseases of body and mind.

With regard to this theory also, it must be remarked that it does not accord either with the general principles or with the particular language of Scripture. Accommodation is possible when, in things indifferent, language is used which, although scientifically or etymologically inaccurate, yet conveys a true impression, or when, in things not indifferent, a declaration of truth (1 Cor. iii, 1, 2), or a moral law (Matt. xix, 8), is given, true or right as far as it goes, but imperfect, because of the imperfect progress of its recipients. But certainly here the matter was not indifferent. The age was one of little faith and great superstition; its characteristic the acknowledgment of God as a distant lawgiver, not an inspirer of men's hearts. This superstition in things of far less moment was denounced by our Lord; can it be supposed that he would sanction, and the evangelists be permitted to record for ever, an idea in itself false, which has constantly been the very stronghold of superstition? Nor was the language used such as can be paralleled with mere conventional expression. There is no harm in our "speaking of certain forms of madness as lunacy, not thereby implying that we believe the moon to have or to have had any influence upon them; . . . but if we began to describe the cure of such as the moon's ceasing to afflict them, or if a physician were solemnly to address the moon, bidding it abstain from injuring his patient, there would be here a passing over to quite a different region, . . . there would be that gulf between our thoughts and words in which the essence of a lie consists. Now Christ does everywhere speak such language as this" (Trench, *On Miracles*, p. 153, where the whole question is most ably treated). Nor is there, in the whole of the N. T., the least indication that any "economy" of teaching was employed on account of the "hardness" of the Jews' "hearts." Possession and its cure are recorded plainly and simply; dæmoniacs are frequently distinguished from those afflicted with bodily sickness (see Mark i, 32; xvi, 17, 18; Luke vi, 17, 18); even, it would seem, from the epileptic (σεληνιαζόμενοι, Matt. iv, 24); the same outward signs are sometimes referred to possession, sometimes merely to disease (comp. Matt. iv, 24, with xvii, 15; Matt. xii, 22, with Mark vii, 32, etc.); the dæmons are represented as speaking in their own persons with superhuman knowledge, and acknowledging our Lord to be, not, as the Jews generally called him, son of David, but Son of God (Matt. viii, 29; Mark i, 24; v, 7; Luke iv, 41, etc.). All these things speak of a personal power of evil, and, if in any case they refer to what we might call mere disease, they at any rate tell us of something in it more than a morbid state of bodily organs or self-caused derangement of mind. Nor does our Lord speak of dæmons as personal spirits of evil to the multitude alone, but in his secret conversations with his disciples, declaring the means and conditions by which power over them could be exercised (Matt. xvii, 21). Twice also he distinctly connects dæmoniacal possession with the power of the evil one; once in Luke x, 18, to the seventy disciples, where he speaks of his power and theirs over dæmoniacs as a "fall of Satan," and again in Matt. xii, 25–30, when he was accused of casting out dæmons through Beelzebub, and, instead of giving any hint that the possessed were not really under any direct and personal power of evil, he uses an argument, as to the division of Satan against himself, which, if possession be unreal, becomes inconclusive and almost insincere. Lastly, the single fact recorded of the entrance of the dæmons at Gadara (Mark v, 10–14) into the herd of swine, and the effect which that entrance caused, is sufficient to overthrow the notion that our Lord and the evangelists do not assert or imply any objective reality of possession. In the face of this mass of evidence, it seems difficult to conceive how the theory can be reconciled with anything like truth of Scripture.

But, besides this, it must be added that, to say of a case that it is one of disease or insanity, gives no real explanation of it at all; it merely refers it to a class of cases which we know to exist, but gives no answer to the further question, how did the disease or insanity arise? Even in disease, whenever the mind acts upon the body (as e. g. in nervous disorders, epilepsy, etc.), the mere derangement of the physical organs is not the whole cause of the evil; there is a deeper one lying in the mind. Insanity may indeed arise, in some cases, from the physical injury or derangement of those bodily organs through which the mind exercises its powers, but far oftener it appears to be due to metaphysical causes, acting upon and disordering the mind itself. In all cases where the evil lies not in the body, but in the mind, to call it "only disease or insanity" is merely to state the fact of the disorder, and give up all explanation of its cause. It is an assumption, therefore, which requires proof, that, amid the many inexplicable phenomena of mental and physical disease in our own days, there are none in which one gifted with "discernment of spirits" might see signs of what the Scripture calls "possession."

The truth is, that here, as in many other instances, the Bible, without contradicting ordinary experience, yet advances to a region where human science cannot follow. As generally it connects the existence of mental and bodily suffering in the world with the introduction of moral corruption by the Fall, and refers the power of moral evil to a spiritual and personal source, so also it asserts the existence of inferior spir-

its of evil, and it refers certain cases of bodily and mental disease to the influence which they are permitted to exercise directly over the soul and indirectly over the body. Inexplicable to us this influence certainly is, as all action of spirit on spirit is found to be; but no one can pronounce *à priori* whether it be impossible or improbable, and no one has a right to eviscerate the strong expressions of Scripture in order to reduce its declarations to a level with our own ignorance. See CONDESCENSION.

3. We are led, therefore, to the ordinary and literal interpretation of these passages, that there are evil spirits (see DÆMON), subjects of the Evil One, who, in the days of the Lord himself and his apostles especially, were permitted by God to exercise a direct influence over the souls and bodies of certain men. This influence is clearly distinguished from the ordinary power of corruption and temptation wielded by Satan through the permission of God. Its relation to it, indeed, appears to be exactly that of a miracle to God's ordinary Providence, or of special prophetic inspiration to the ordinary gifts of the Holy Spirit. Both (that is) are actuated by the same general principles, and tend to the same general object; but the former is a special and direct manifestation of that which is worked out in the latter by a long course of indirect action. The distinguishing feature of possession is the complete or incomplete loss of the sufferer's reason or power of will; his actions, his words, and almost his thoughts are mastered by the evil spirit (Mark i, 24; v, 7; Acts xix, 15), till his personality seems to be destroyed, or, if not destroyed, so overborne as to produce the consciousness of a twofold will within him, like that sometimes felt in a dream. In the ordinary temptations and assaults of Satan, the will itself yields consciously, and by yielding gradually assumes, without losing its apparent freedom of action, the characteristics of the Satanic nature. It is solicited, urged, and persuaded against the strivings of grace, but not overborne.

Such possession, however, is only the special and, as it were, miraculous form of the "law of sin in the members," the power of Satan over the heart itself, recognised by Paul as an indwelling and struggling power (Rom. vii, 21–24). Nor can it be doubted that it was rendered possible in the first instance by the consent of the sufferer to temptation and to sin. That it would be most probable in those who yielded to *sensual* temptations may easily be conjectured from general observation of the tyranny of a habit of sensual indulgence. The cases of the habitually lustful, the opium-eater, and the drunkard (especially when struggling in the last extremity of delirium tremens) bear, as has often been noticed, many marks very similar to those of the scriptural possession. There is in them physical disease, but there is often something more. It is also to be noticed that the state of possession, although so awful in its wretched sense of dæmoniacal tyranny, yet, from the very fact of that consciousness, might be less hopeless and more capable of instant cure than the deliberate hardness of wilful sin. The spirit might still retain marks of its original purity, although through the flesh and the dæmoniac power acting by the flesh it was enslaved. Here, also, the observation of the suddenness and completeness of conversion seen in cases of sensualism, compared with the greater difficulty in cases of more refined and spiritual sin, tends to confirm the record of Scripture.

It was but natural that the power of evil should show itself, in more open and direct hostility than ever, in the age of our Lord and his apostles, when its time was short. It was natural also that it should take the special form of possession in an age of such unprecedented and brutal sensuality as that which preceded his coming, and continued till the leaven of Christianity was felt. Nor was it less natural that it should have died away gradually before the great direct, and still greater indirect influence of Christ's kingdom. Accordingly we find early fathers (as Just. Mart. *Dial. c. Tryph.* p. 311 B.; Tertullian, *Apol.* 23, 37, 43) alluding to its existence as a common thing, mentioning the attempts of Jewish exorcism in the name of Jehovah as occasionally successful (see Matt. xii, 27; Acts xix, 13), but especially dwelling on the power of Christian exorcism to cast it out from the country as a test of the truth of the Gospel, and as one well-known benefit which it already conferred on the empire. By degrees the mention is less and less frequent, till the very idea is lost or perverted. See EXORCIST.

Such is a brief sketch of the scriptural notices of possession. That round the Jewish notion of it there grew up, in that noted age of superstition, many foolish and evil practices, and much superstition as to fumigations, etc. (comp. Tob. viii, 1–3; Joseph. *Ant.* viii, 2, 5), of the "vagabond exorcists" (see Acts xix, 13), is obvious, and would be inevitable. It is clear that Scripture does not in the least sanction or even condescend to notice such things; but it is certain that in the Old Testament (see Lev. xix, 31; 1 Sam. xxviii, 7, etc.; 2 Kings xxi, 6; xxiii, 24, etc.), as well as in the New, it recognises possession as a real and direct power of evil spirits upon the heart. See POSSESSED (*with a devil*).

Dagan. See CORN; AGRICULTURE.

Dagger (חֶרֶב, *che'reb*, usually "sword"), any sharp instrument, especially a military weapon (Judg. iii, 16, 21, 22). See SWORD.

Daggett, Herman, a Congregational minister, was born at Walpole, Mass., Sept. 11, 1766, and graduated at Brown University, 1788. He entered the ministry Oct. 1789, and after preaching a year in Southhold, L. I., was ordained pastor in Southampton, April 12, 1792. In 1796 he removed to West Hampton. In 1801 he was ordained pastor over the churches of Fire Place and Middle Island, which he resigned in 1807. In 1818 he became principal of the For. Miss. School at Cornwall. This position he resigned in 1824, and died May 19, 1832.—Sprague, *Annals*, ii, 291.

Daggett, Naphtali, D.D., a Congregational minister, was born at Attleborough, Mass., Sept. 8, 1727; graduated at Yale 1748, and was ordained pastor in Smithtown, L. I., 1751. He was elected Prof. of Divinity in Yale College, 1756, and remained there until his death, Nov. 25, 1780. He occupied the presidential chair of the college *pro tempore* from 1766 until 1777. When the British landed at West Haven, 1779, his patriotic ardor led him to take up arms, and he was very rudely treated by the enemy. His death was hastened by his sufferings. He published a few sermons.—Sprague, *Annals*, i, 479.

Dagobert. See DAIMBERT.

Da'gon (Heb. *Dagon'*, דָּגוֹן; Sept. and Josephus, Δαγών), the national god of the Philistines. Some have derived the name from דָּגָן, *grain* (Sanchoniathon, *Fragm.* ed. Orelli, p. 26, 32; Bochart, *Hieroz.* i, 381; Beyer, *ad Seld.* p. 285); but the derivation from דָּג, a *fish*, with the diminutive (i. e. endearing) termination *ôn* (Gesenius, *Thes.* p. 320), is not only more in accordance with the principles of Hebrew derivation (Ewald, *Heb. Gram.* § 312, 341), but is most decisively established by the terms employed in 1 Sam. v, 4. It is there said that Dagon fell to the earth before the ark, that his head and the palms of his hands were broken off, and that "*only Dagon was left on him.*" If Dagon is derived from דָּג, *fish*, and if the idol, as there is every reason to believe, had the body of a fish with the head and hands of a man, it is easy to understand why a *part* of the statue is there called *Dagon* in contradistinction to the head and hands, but not otherwise. That such was the figure of the idol is asserted

by Kimchi, and is admitted by most modern scholars. It is also supported by the analogies of other fish deities among the Syro-Arabians (see Herod. ii, 72; Ælian, *Anim.* x, 46; xii, 2; Xenoph. *Anab.* i, 4, 9; Strabo, xvii, 812; Diod. Sic. ii, 4; Cicero, *Nat. Deor.* iii, 15; comp. Münter, *Rel. d. Karth.* p. 102; Movers, *Phöniz.* p. 491 sq.; Creuzer, *Symbol.* ii, 78 sq.). Besides the ATERGATIS (q. v.) of the Syrians (which was the female counterpart of Dagon), the Babylonians had a tradition, according to Berosus (Berosi *Quæ supersunt*, ed. Richter, p. 48, 54), that at the very beginning of their history an extraordinary being, called *Oannes*, having the entire body of a fish, but the head, hands, feet, and voice of a man, emerged from the Erythræan Sea, appeared in Babylonia, and taught the rude inhabitants the use of letters, arts, religion, law, and agriculture; that, after long intervals between, other similar beings appeared and communicated the same precious lore in detail, and that the last of these was called *Odakon* (Ὠδάκων). Selden is persuaded that this Odakon is the Philistine god Dagon (*De Diis Syris*, p. 265), a conclusion in which Niebuhr coincides (*Gesch. Assurs*, p. 477), but from which Rawlinson dissents (*Herod.* i, 482). The resemblance between Dagon and Atergatis (q. d. אַדִּיר and דָּג, *great fish*) or Derketo (which is but an abbreviation of the last name) is so great in other respects that Selden accounts for the only important difference between them—that of sex—by referring to the androgynous nature of many heathen gods. It is certain, however, that the Hebrew text, the Sept., and Philo Byblius (in Euseb. *Præp. Ev.* i, 10) make Dagon masculine (ὁ Δαγών). The fish-like form was a natural emblem of fruitfulness, and as such was likely to be adopted by seafaring tribes in

Representation of a Fish-god.—From the Assyrian Monuments at Khorsabad.

Fish-god on Gems in British Museum.

the representation of their gods. (See Götze, *Dissert. de ἰχθυολατρείᾳ*, Lips. 1723.)

The most famous temples of Dagon were at Gaza (Judg. xvi, 21–30) and Ashdod (1 Sam. v, 5, 6; 1 Chron. x, 10). The former was employed as a theatre (see Faber, *Archäol.* i, 444, 436), and was once overthrown by Samson (Judg. xvi). The latter temple was destroyed by Jonathan in the Maccabæan wars (1 Macc. x, 84; xi, 4; Josephus, *Ant.* xiii, 4, 5). There would also seem to have been a third in the vicinity of Jericho, which was demolished by Ptolemy (Joseph. *War*, i, 2, 3); and the site of which Schwarz claims (*Palest.* p. 163) to have discovered in a stream still bearing the name of *Duga*, or fish-river: it is but a relic of the ancient *Doch*, or DOCUS (q. v.). Traces of the worship of Dagon likewise appear in the names Caphar-Dagon (near Jamnia), and Beth-Dagon in Judah (Josh. xv, 41), and Asher (Josh. xix, 27). See BETH-DAGON.

Besides the female figure of Atergates, there have lately been discovered among the Assyrian ruins (Botta, pl. 32–35) figures of a male fish-god, not only of the forms given above (Layard, *Nineveh*, ii, 353), but occasionally with a human form and feet, the fish only covering the back like a cloak (Layard, *Babylon*, p. 301). Colonel Rawlinson has also deciphered the name *dagon* on the cuneiform inscriptions (q. v.). See Roser, *De Dagone*, in Ugolini, *Thesaur.* xxiii; Sharpe in Bonomi's *Nineveh*, 3d ed. p. 169.

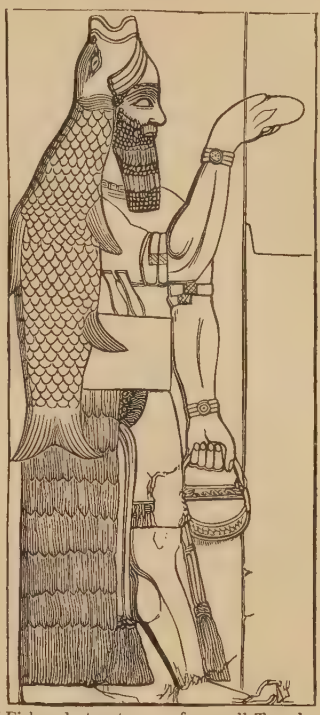


Figure of Fish-god at entrance of a small Temple, Nimroud.

DAGON'S HOUSE (1 Sam. v, 5), or *the* HOUSE (1 Sam. v, 2) or TEMPLE OF DAGON (1 Chron. x, 10), בֵּית־דָּגוֹן, i. e. *Beth-Dagon*, as it is elsewhere rendered (Josh. xv, 41; xix, 27; so Βηθδαγών, 1 Macc. x, 83), or the sanctuary of Dagon, the god of the Philistines, mentioned in Judg. xvi, 23, and other places. See this etymology defended against the older one (which Fürst retains, *Heb. Lex.* p. 286) in Gesenius, *Monument. Phœn.* p. 387, and *Thesaur.* p. 204. In the first two (and possibly also the third) of the above passages, the temple of Dagon, situated in or near Ashdod (as stated under the foregoing article DAGON), is evidently intended; the other collocations of these words [see BETH-] require a fuller elucidation than could well be given in the article BETH-DAGON (q. v.).

1. BETH-DAGON, in Josh. xv, 41, was one of the second group of "sixteen cities with their villages," which the sacred writer places in *the lowlands* (שְׁפֵלָה) of the tribe of Judah, apparently on the actual plain which stretches westward towards the Philistine coast from "the hill country" so often mentioned. This does not (as in Reland, *Palæstina*, p. 636) designate a *Gederoth-bethdagon*, as the name Gederoth occurs *alone* in 2 Chron. xxviii, 18, with the same description as it has in this place, as one of the cities of the lowlands of Judah. Gesenius and Fürst identify this Beth-dagon with the Caphar-dagon, which in the time of Eusebius was a very large village (*κώμη μεγίστη*, inter Jamniam et Diospolin) in the neighborhood of Joppa; but modern research has shown that this latter place, of which still remain some traces in *Beit-Dejan*, a village between Yâfa and Ludd, is considerably above the northern boundary of Judah. Our Beth-dagon, indeed, no longer exists by the same name (Van de Velde's *Map of Palestine* and *Memoir*, p. 294). The same must be said of

2. BETH-DAGON, mentioned in Josh. xix, 27, as one of the *border* cities of the tribe of Asher. Though, however, no modern landmark points out the site of

this north Beth-dagon, it is not difficult to discover, from the precise topographical statement of the sacred writer, that this city was situated at the point where the boundary-line of the tribe, after crossing the ridge south of the promontory of Carmel towards the east, intersects the stream of the Kishon, on the confines of Zebulon. It is remarkable that, as there is a modern *Beit-Dejan* in the south which yet cannot be identified with, but is far to the north-west of, the southern Beth-dagon, so there is still, in the central district of the Holy Land, a second *Beit-Dejan*, which is equally far distant from our northern Beth-dagon, only in the opposite direction of south-east. In the fertile and beautiful plain of Sâlim, a little to the east of Nâbulus (Shechem), Dr. Robinson descried at the east end of it, on some low hills, a village called *Beit-Dejan* (*Bibl. Researches*, iii, 102; *Later Researches*, p. 298). This *Beit-Dejan*, Robinson thinks, has no counterpart in the Beth-dagons of the Bible. The French traveller, De Saulcy, is not of this opinion, but identifies the village near Nâbulus with the Beth-dagon of Chron. x, 10; because "this village is only one day's march from Jilboun, the locality in the mountain to the north-east of Jenin, which was unquestionably the scene of Saul's disaster" (*Dead Sea*, i, 101). If his conjecture be right, we must indicate this as the

3. Beth-dagon of 1 Chron. x, 10 (Sept. οἶκος Δαγών), in the western half-tribe of Manasseh (some distance from Mount Gilboa), where the Philistines, after their victory, placed Saul's head in the temple of their god—his body and those of his sons having been carried (the same distance north-east) to Bethshan, whence the Jabesh-Gileadites afterwards rescued them. It no doubt aids this view that we are not otherwise informed *where* the temple was in which they deposited their ghastly trophy; moreover, the phrase (in ver. 9) בְּאֶרֶץ־פְּלִשְׁתִּים סָבִיב, denoting a *circuit of the adjacent country*, which had been evacuated by Israel, and was then occupied by the enemy (ver. 7), very well suits the relative positions of this *Beit-Dejan* and Bethshan, equally distant from the fatal field, and in different directions.

4. With regard to the Beth-dagon of 1 Macc. x, 83, Gesenius (*Thes.* p. 194) expresses a doubt whether this passage means only Dagon's temple at Azotus, or a Beth-dagon, a town so called in the neighborhood. In that case we might regard this as a city in the vicinity of Azotus (or Ashdod), answering probably to Dr. Robinson's western *Beit-Dejan*, and Eusebius's Caphar-dagon, already mentioned. It will be observed that in the 84th verse Beth-dagon occurs as a proper name, as it also does in the original, Βηθδαγών, whereas, in the next verse, the temple of the Philistine god is described by the appellative τὸ ἱερὸν Δαγών. On the whole, however, there does not appear to be sufficient reason for the distinction.

Dailey, David, a Methodist Episcopal minister, was born in Gloucester County, N. J., March 1, 1792, was converted in 1805, entered the itinerancy in 1812, became superannuated in 1855, and died May 4, 1856. For more than forty years he was a useful minister and presiding elder, and was especially "proficient in the theology of the plan of salvation." He filled many important stations with uniform and excellent success. He was one of the editors of the revised *Hymn-book* of the Methodist Episcopal Church now in use.—*Minutes of Conferences*, vi, 219.

Daillé, Jean, minister of the French Reformed Church, and one of the most learned theologians of his age. He was born at Chatellerault Jan. 6, 1594; became tutor in the family of Duplessis-Mornay (q. v.) in 1612, and was ordained in 1623. Most of the remainder of his life was spent as minister of Charenton. He died April 15, 1670. In theology Daillé belonged to the moderate school of Saumur (q. v.). "His discourses are characterized by a heart-stirring eloquence, and it has been remarked of him that he had all the eloquence of Saurin without any approach to his turgid and bombastic style. The work by which Daillé is best known is his treatise *De usu Patrum*, a work designed to check or moderate the excessive reverence which is felt in many quarters for the writers of ecclesiastical antiquity. It rendered an important service to the Protestant cause in his own country and times, and may still be consulted with great advantage." It was published in 1632; in Latin in 1636 (Genev. 4to); and a translation into English in 1651, under the title of *A Treatise concerning the right Use of the Fathers in the Decision of Controversies that are at this Day in Religion* (new ed. by Jekyll, Lond. 1841, 12mo; Amer. ed. Phila. 1842, 12mo). We have translations also of his *Exposition of the Philippians*, by Sherman (Lond. 1841, imp. 8vo); *Exposition of Colossians*, by Sherman (Lond. 1841, imp. 8vo). Among his other writings are *De Cultibus Latinorum* (Genev. 1671, 4to); *De Pœnis et Satisfactionibus humanis* (Amst. 4to); *De la Créance des Pères sur le fait des Images* (8vo); *De Confirmatione et ext. unctione* (Genev. 1659, 4to); *De Auriculari Confessione* (Genev. 1661, 4to); *De Pseudepigraphis Apostolicis* (1658, 8vo); and 20 volumes of sermons. — See Haag, *La France Protestante*, iv, 181; Rich, *Biog. Dictionary*, s. v.; *Life of Daillé*, prefixed to his *Right Use of the Fathers;* Chase, in *Bibliotheca Sacra*, iv, 5 sq.; Bayle, *Dictionary*, s. v.; Hoefer, *Nouv. Biog. Générale*, xii, 790.

D'Ailly. See Ailly.

Daily occurs in the Engl. version of our Lord's Prayer as the rendering of ἐπιούσιος (Matt. vi, 11; Luke xi, 3), which literally means *for subsistence*, i. e. *needful*, as it probably should have been translated. The same Greek word occurs nowhere else, although several Heb. and Greek words are thus translated in other passages. Conant, however (*Revised Version of Matthew*, N. Y. 1860, p. 30), maintains the correctness of the Auth. Vers., as does also Schaff (in Lange's *Matthew*, p. 121). But this involves a palpable tautology. See Day. Treatises on the phrase "daily bread" have been written in Latin by Kirchmaier (Viteb. 1711), Kortholt (Kil. 1677), Stolberg (Viteb. 1688), Pfeiffer (Regiom. 1689), Zorn (*Opusc.* i, 465–503). See Lord's Prayer.

DAILY OFFERING or SACRIFICE (עוֹלַת־תָּמִיד, *the continual offering;* Josephus ὁλοκαύτωμα ἐνδελ χισμοῦ, ἐνδελεχισμός, *War*, vii, 2, 1), in Daniel (viii, 12 sq.; xi, 31; xii, 11) and the Talmud (simply תָּמִיד, "the continual," *sacrificium juge*), was a burnt-offering of two year-old lambs, which were daily immolated in the name of the whole Israelitish people (ἐκ τοῦ δημοσίου ἀναλώματος, Joseph. *Ant.* iii, 10, 1) upon the great altar; the first lamb early (as soon as it became light, Mishna, *Tamid*, iii, 2; no reliance is to be placed upon Zorn's treatise *De certis tempp. in jugi sacrificio ap. Ebr. offerendo*, in the *Miscell. Lips. Nov.* ii, 1 sq.), the other (מִנְחַת עֶרֶב, "the evening oblation," Dan. ix, 21) at evening (more definitely בֵּין הָעַרְבַּיִם, *between the two evenings* [see Passover]; according to *Pesach*, v, 1, the eve-offering was sacrificed as a rule between the eighth-and-a-half and the ninth-and-a-half hour [2½ to 3½ o'clock P.M.], but on Sabbath-eve and Passover-eve [14th Nisan] one hour earlier; Josephus, *Ant.* xiv, 4, 3, designates "about the ninth hour" as the time; comp., however, Jonathan's *Targum*, Gen. xlix, 27. This was the usual termination of a fast [q. v.], Dan. ix, 21; Acts iii, 1; x, 3, 30), each with one tenth of an ephah of fine wheaten flour as a meat offering, and a quarter of a hin of wine as a drink offering (Exod. xxix, 38–42; Num. xxviii, 3–8; Ezra iii, 5). It was not superseded by the Sabbath or festival offerings (Num. xxviii, 9 sq., 15 sq.; not even by those of the Passover, *Pesach*, v, 1). The regulations concerning the preparation of

the priests for this annual religious service, the allotment of the several operations, and the ritual of the sacrifice itself, were eventually prescribed in the tract *Tamid* (Mishna, v, 10), which Iken has illustrated with erudite explanation (Brem. 1736, and in Ugolini *Thesaur.* xix); comp. also Loscan, *De Sacrificio Quotid.* (Lips. 1718). In the (last) Temple there was a lamb-apartment in the north-west corner for the special purpose of this offering (*Tamid*, iii, 3). See SACRIFICE.

DAILY SERVICE or PRAYERS. In the ancient Church, wherever it was practicable, daily service was established, at which every clergyman was compelled to attend, under pain of suspension or deprivation, whether it was his duty to officiate or not. This subject is determined by several councils, by the first council of Toledo, and by that of Agde: the law of Justinian punishes the neglect of this duty with degradation, because of the scandal it gives to the laity. In some churches a daily celebration of the Lord's Supper seems to have been recommended, and to some extent practiced. There are found testimonies on this subject in Tertullian, Cyprian, and Irenæus; the last of whom says, "It is the will of our Lord that we should make our offering at his altar frequently, and without intermission." But there was no fixed and express rule as to the time of celebration. The rubric of the Church of England declares that all "priests and deacons are to say daily the morning and evening prayer, either privately or openly, not being let by sickness or some other urgent cause. And the curate that ministereth in every parish church or chapel, being at home, and not being otherwise reasonably hindered, shall say the same in the parish church or chapel where he ministereth, and shall cause a bell to be tolled thereunto a convenient time before he begin, that the people may come to hear God's word and to pray with him." But this rule is now a dead letter.—*Prayer-book*, Preface; Bingham, *Orig. Eccl.* bk. vi, chap. iii, § 5, 6; Procter, *On Common Prayer*, p. 195–197.

Daimbert or **Dagobert**, the first Latin patriarch of Jerusalem. While he was bishop of Pisa, pope Urban II conferred upon him the sovereignty of Corsica for an annual tribute of fifty livres, and appointed him papal legate in the East. In Nov. 1095, Daimbert was present at the Council of Clermont when Urban II preached the first crusade, and he joined the crusade at the head of troops from Pisa and Genoa. When Daimbert arrived in Palestine, Godfrey of Bouillon was already master of Jerusalem. At a general meeting of the Christian chiefs, held on Christmas, 1099, Daimbert was elected patriarch of Jerusalem, in the place of one Arnulphus who was deposed. Godfrey had to leave to Daimbert the sovereignty of Jaffa, and of that quarter of Jerusalem in which the Church of the Resurrection was situated. On the death of Godfrey, Daimbert aspired to the throne of Jerusalem, but finally had to yield to Baldwin, and to crown the new king. Falling out with Baldwin, he was expelled by the latter, and Arnulphus returned to the patriarchate. Daimbert went to Italy, and prevailed upon pope Pascal II to decide in his favor. He intended to return to Jerusalem and to enforce the papal decision, but died on his way at Palermo, in 1107.—Hoefer, *Biographie Générale*, xii, 792.

Dai'san (Δαισάν v. r. Δεσάν, Vulg. *Desanon*), the head of one of the families of temple-servants that returned from Babylon (1 Esdr. v, 31); evidently a corruption (ר being mistaken for ד) for the REZIN (q. v.) of the Heb. texts (Ezra ii, 48; Neh. vii, 50).

Daiyah. See VULTURE.

Dalaï'ah (1 Chron. iii, 24), the same name elsewhere more correctly Anglicized DELAIAH (q. v.).

Dalberg, KARL THEODOR, baron of Dalberg, was born Feb. 8, 1744, at Hernsheim, near Worms; he studied at Göttingen and Heidelberg; became, while yet very young, prebendary of Mayence, and canon of Worms and Würzburg. In 1772, as governor of Erfurt, he gave a great impulse to agriculture, commerce, and industry. In 1787 he became coadjutor of the elector of Mayence and the bishop of Worms; was made bishop of Constance in 1788, and soon after archbishop of Tarsus. The last elector of Mayence died in 1802, and as, by the treaty of Luneville, the electorate of Mayence on the one side of the Rhine had been abolished and on the other secularized, Dalberg became arch-chancellor, which position he held with great credit; but by suppressing the convents he incurred the hatred of the clergy, and by sympathy for France that of Germany. In 1804 he was present at the coronation of the emperor at Paris. When the confederacy of the Rhine was formed he had to resign his office, but, in exchange, was made prince-primate of the confederacy, and was Napoleon's adviser in spiritual and ecclesiastical matters. He afterwards became grand-duke of Frankfort, and appointed Eugène Beauharnais as his successor. In 1813 he renounced his title, went first to Constance, where he protected the vicar general Wessenberg from the enmity of the pope, and afterwards returned to Regensburg, where he lived in retirement on a pension of 100,000 florins, and died Feb. 10, 1817. His principal works are, *Betrachtungen ü. d. Universum* (Frankf. 1777; 6th ed. 1819); *Verhältniss zwischen Moral und Staatskunst* (Frankf. 1786); *Grundsätze d. Æsthetik* (Erf. 1791); *Von d. Bewusstsein als allgem. Gründe d. Weltweisheit* (Erf. 1793); *Betrachtungen ueber d. Charakter Karls d. Gr.* (Erfurt, 1806); *Perikles* (Rome, 1811). See Krämer, *Gedächtniss-schrift auf K. von Dalberg* (Gotha, 1817).—Hoefer, *Nouv. Biographie Générale*, xii, 802.

Dale, THE KING'S (עֵמֶק הַמֶּלֶךְ, *valley of the king*), the name of a valley apparently near the Dead Sea, where Melchizedek met Abraham (Gen. xiv, 17); otherwise called *the Valley of Shaveh* (q. v.), but identified by some with another of the same name (the modern Valley of Jehoshaphat, or, rather, its southern part, opening into the plot used for the king's garden, about the well of Job and the pool of Siloam), in which Absalom reared his family monument (2 Sam. xviii, 18). See ABSALOM'S TOMB.

Dale, or DALEN, ANTONIUS VAN, was born Nov. 8, 1638, in Haarlem. He was brought up to business against his will. At the age of thirty he applied himself to the study of the ancient languages, and at the same time to that of medicine. He became a practising physician, and attained distinction in his profession. His faithful and disinterested attention to his poor patients secured him high praise. He also exercised for a time his preaching gift among the Mennonites; but his sermons were overloaded with learned citations, and hence were hardly acceptable to the people. His European reputation rests, however, on the learned works which he wrote against what he regarded as superstition. In 1683 he published *De oraculis Ethnicorum dissertationes duæ, quarum prior de ipsorum duratione ac defectu, posterior de eorundem auctoribus* (Amst. 8vo). In this work he combated the opinion that demoniac influence was exerted in connection with the oracles of the ancients, and that sorcery is to be ascribed to Satan. The work produced a great sensation. Fontenelle made free use of it in the composition of his *Histoire des Oracles* (Paris, 1707, 12mo). He wrote several other works in Latin, and one in his native tongue, on the same subject, discrediting belief in Satanic agency, especially when applied to the interpretation of Scripture. He also published a *Dissert. super Aristea de LXX interpretibus*, with a history of ceremonies of baptism among the Jews, and among the various Christian communions (Amst. 1704, 4to). He died Nov. 28, 1708, deeply la-

mented. I. Clericus, T. Janssonius, and Prof. Morus were among his friends.

Daleites, followers of David Dale, pastor of an Independent congregation at Glasgow. Since the death of Mr. Dale they have formed a connection with the Inghamites (q. v.).

Dalmanu'tha (Δαλμανουθά, deriv. unknown, unless [as suggested by Lightfoot, *Hor. Hebr.* p. 555; comp. Simonis *Onom.* p. 51] for the *Zalmon*, צלמון, a town mentioned in the Talmud as lying near Tiberias), a place mentioned only in Mark viii, 10, where we read that Jesus, after feeding the multitude in the Decapolis, east of the Sea of Galilee, took a boat and "came into the regions (εἰς τὰ μέρη) of Dalmanutha;" while the parallel passage (Matt. xv, 39) states that he "came into the borders of Magdala." From this we may conclude that Dalmanutha was a town on the west side of the lake near Magdala. The latter stood close upon the shore, at the southern end of the little plain of Gennesaret, at the present Mejdel. See MAGDALA. Immediately south of it a precipitous hill juts out into the sea. Beyond this, about a mile from Magdala, a narrow glen breaks down from the west. At its mouth are some cultivated fields and gardens, amid which, just by the beach, are several copious fountains, surrounded by heavy ancient walls and the ruins of a village. The place is called *'Ain el-Bârideh*, "the cold fountain" (Robinson, *Res.* iii, 27), and has, with great probability, been thought to be the site of Dalmanutha (Porter, in Smith and Kitto, s. v.; Tristram, *Land of Israel*, p. 429). See CAPERNAUM. Thomson thinks it may be the present ruined site called *Dalhamia*, on the river south of the lake, although he admits this seems too far from Magdala (*Land and Book*, ii, 60). Schwarz (*Palest.* p. 189) finds it in the "cave of *Telimân*" (תלמאן), mentioned in the Talmud, situated probably in the cliffs above Mejdel (Van de Velde, *Memoir*, p. 334), which, he learns, was also called *Talmanuta*.

Dalma'tia (Δαλματία, deriv. unknown), a mountainous country on the eastern shore of the Adriatic Sea (Pliny, iii, 28; Strabo, vii, 315), between the rivers Titius and Drinus, and the Bebian and Scordian hills, south of Laburnia (Pliny, iii, 26), which, together with it, formed, after the expedition of Tiberius, A.D. 9, the Roman province of Illyricum, for which, indeed, it was often spoken of synonymously (Conybeare and Howson's *St. Paul*, ii, 126). Its principal towns were Salona, Epidaurus, Lissus, etc. (Ptolemy, ii, 17, 4). It derived its name from the Dalmatæ, a barbarous but valiant race, supposed to be of Thracian origin, and who were very skilful in navigating the sea along their coasts, and extremely bold in their piracies. The capital, Dalminium, was taken and destroyed by the Romans, B.C. 157; the country, however, was not completely subdued till the time of Augustus. The modern name of the country is the same as the ancient. Education and morality are here at a lower ebb than in any other part of the Austrian empire (see the *Penny Cyclopœdia*, s. v.; Smith's *Dict. of Class. Geog.* s. v., and the travellers there referred to). See ILLYRICUM.

During Paul's second imprisonment at Rome, Titus left him to visit Dalmatia (2 Tim. iv, 10), but for what purpose is not stated, unless we may conjecture that it was to regulate the affairs of the Church in that region (Cellarii *Notit.* i, 614 sq.), in the vicinity of which Paul had formerly preached (Rom. xv, 19). See TITUS.

At present Dalmatia is a crown-land of the Austrian emperor, the emperor bearing among his other titles that of king of Dalmatia. According to the last census of 1887, the population amounted to 476,101, mostly Slavi. Of these, 396,836 were Roman Catholics, under the archbishop of Zara and five bishops (Sebenico, Spalato, Lesina, Ragusa, and Cattaro); 138 United Greeks (in three congregations, belonging to the diocese of Kreuz, in Croatia; 78,744 members of the orthodox (non-United) Greek Church, under one bishop, who formerly resided at Sebenico, and since 1842 at Zara; 43 Lutherans; 34 Reformed; and 283 Israelites. The Roman Catholics have 297 parishes, 122 chaplaincies, and 69 monasteries; the orthodox Greeks, 92 parishes, 9 chaplaincies, and 11 monasteries.—*Allgemeine Real-Encyklop.* iii, 73.

Dalmatic, the characteristic dress of the deacon in the administration of the Eucharist, so called from being first woven in Dalmatia, or first used by the Dalmatian clergy (Durandus, *Rat.* iii, 1). It is a robe reaching down to the knees, and open at each side for a distance varying at different periods. It is not marked at the back with a cross like the chasuble, but in the Latin Church with two narrow stripes, the remains of the *angusti clavi* worn on the old Roman dress. In the Greek Church it is called *colobium*, and is covered with a multitude of small crosses. The dalmatic is seen, in some old brasses, worn over the alb and the stole, the fringed extremities of which reach just below it. It was adopted at a later period by the higher clergy. The chasuble (q. v.) was sometimes worn over the dalmatic. Its symbolical meaning is thus explained by the ritualists: "The deacon's robe of white with purple stripes, with the right sleeve plain and very full, but the left fringed or tasselled, is the image of bountifulness towards the poor. It is the robe given to deacons and sub-deacons, because they were chosen by the apostles to serve the tables; and a deacon should have a dalmatic with broader sleeves than a sub-deacon, because he should have a larger generosity, while a bishop should have one with sleeves much broader and wider than the deacon's, because of the same reason in an ascending ratio. A dalmatic signifies an immaculate life as well as hospitality, and it has two stripes before and behind to show that a bishop should exercise his charity to all, both in prosperity and adversity. The transverse line, which forms a cross behind, is, of course, in allusion to the cross which the great Bishop of our souls bore when on his way to Calvary."—Bingham, *Orig. Eccl.* bk. vi, ch. iv, § 20; Rock, *Hierurgia*, ii, 647; Hook, *Church Dictionary*, s. v.; Palmer, *Orig. Liturgicæ*, ii, 314.

Dal'phon (Heb. *Dalphon'*, דַּלְפוֹן, prob. Persian; Sept. Δελφών v. r. καὶ ἀδελφῶν; Vulg. *Delphon*), the second of the ten sons of Haman; killed by the Jews on the 13th of Adar (Esth. ix, 7), B.C. 473.

Dam (אֵם, *mother*), the female parent of young birds (Deut. xxii, 6, 7), or lambs (Exod. xxii, 30; Lev. xxii, 27). With the Mosaic regulations of merciful treatment toward these creatures spoken of in these passages, compare the similar ordinance respecting boiling a kid in its own mother's milk (Exod. xxiii, 19), and the treatise of Heumann, *De legis paradoxe* (Gött. 1748, and in his *Syllog. Diss.* ii, 282 sq.). See BEAST.

Damages, whether to person or property, according to the Mosaic statutes. See also FINE.

1. Injury to limb, in the case of a free Israelite, entailed an equal infliction (*jus talionis*) upon the same part of the body of the aggressor (Exod. xxi, 23–25; Lev. xxiv, 19 sq.; Deut. xix, 21; comp. Matt. v, 38); in the case of a slave it effected his freedom (Exod. xxi, 26 sq.; comp. Philo, *Opp.* ii, 332). Pecuniary satisfaction, however, in the former case, was a well-established custom (Josephus, *Ant.* iv, 8, 35), so that retaliation was probably resorted to only in cases of intentional or malicious injury (comp. Exod. xxii, 22 sq.; see Michaelis, *Mos. Recht*, v, 55 sq.). Greek legislation also (Diod. Sic. xii, 17; Diog. Laert. i, 57), as well as the law of the Roman Twelve Tables (see Gell. xx, 1; comp. Heinecc. *Antiq. Jur. Rom.* iv, 18, 8, and *Opusc. min.* p. 213 sq.; on the Germanic usages, see

Strodtmann, *Deutche Alterthümer*, p. 45), sanctioned this natural and simple judicial observance of "like for like" (comp. Dougtæi *Analect.* i, 92, 11; Danz, in Menschen's *N. Test. Talm.* p. 488 sq.). Among the Israelites, however, it does not seem to have often been enforced (comp. Lightfoot, *Hor. Hebr.* p. 282), and corporal injuries, at least under the monarchy, were almost always compromised by a sum of money (so generally among the Turks; see Hammer, *Osman. Reich*, i, 146 sq.). The Talmudical interpretation growing out of this enactment may be seen in *Baba Kamma*, viii, 1. See RETALIATION.

2. Wounding a free person in an affray (where both parties might be presumed to be pretty nearly equally to blame, the injury, however, must have been inflicted with a stone or the fist, אֶגְרוֹת; comp. Philo, ii, 317, τῇ χειρί; not with a proper weapon, Josephus, *Ant.* iv, 8, 33; also in a suddenly outbreaking quarrel between them that gave no evidence of long-meditated harm), which rendered the individual unfit for work, required compensation for the loss through sickness and the expense of cure (Exod. xxi, 18 sq.; ver. 19 prescribes that this mulct should cease when the wounded person became able to go about again); should he die afterwards no further penalty was to be exacted (Philo, *Opp.* ii, 317; comp. *Baba Kamma*, viii, 1). More severe exaction followed when in a fray a pregnant woman was so injured as to suffer abortion, for then the law of life for life prevailed in full (Exod. xxi, 22; according to Josephus, however, *Ant.* iv, 8, 33, and Philo, *Opp.* ii, 317, pecuniary reparation was allowed in such cases likewise). See PUNISHMENT.

3. Damage to one's property by cattle (Exod. xxii, 5), or accidental spread of fire in the field (ver. 6), called for full remuneration of the loss (as also among the Romans; see Walter, *Gesch. d. röm. Rechts*, p. 812), and was to be paid for in kind, although a commutation in money certainly might obtain (Philo, *Opp.* ii, 339). For fuller details, see the Talmudic treatise *Baba Kamma*, iv, 1. When a hired animal or article was injured no special restitution was required (Exod. xxii, 15). It was otherwise, however, with property placed in trust. See DEPOSIT. On the jurisdiction of all cases, see ELDER.

Dam'aris (Δάμαρις), an Athenian woman converted to Christianity by Paul's preaching (Acts xvii, 34), A.D. 48. Chrysostom (*de Sacerdotio*, iv, 7) and others held her to have been the wife of Dionysius the Areopagite, but apparently for no other reason than that she is mentioned together with him in this passage. Grotius and Hemsterhuis think the name should be *Damalis*, Δάμαλις (signifying *heifer*), which is frequently found as a woman's name; but the permutation of λ and ρ was not uncommon both in pronunciation and writing (Lobeck on Phrynichus, p. 652).

Damascene' (Δαμασκηνός), an inhabitant (2 Cor. xi, 32) of the city of Damascus (q. v.).

Damascenus, JOANNES. See JOHN OF DAMASCUS.

Damas'cus (Heb. *Damme'sek*, דַּמֶּשֶׂק [sometimes *Darme'sek*, דַּרְמֶשֶׂק, by resolution of the Dagesh, 1 Chron. xviii, 5, 6; once *Dumme'sek*, דֻּמֶּשֶׂק, probably by erroneous transcription for the last, 2 Kings xvi, 10], signifying *activity* [Gesenius, *Thes.* p. 345 sq.], from its commerce; Arab. *Dimeshk*; Gr. Δαμασκός), one of the most ancient, and at all times one of the most important of Oriental cities. It is called by the natives *Es-Sham*, and is capital of an important pashalic of this latter name, and indeed is the chief or capital city of Syria. It was sometimes spoken of by the ancients as an Arabian city, but in reality it belongs to Syria (Cœle-Syria, Strabo xvi, 756; Ptolemy, v, 15, 22). In 2 Sam. viii, 5, 6, "the Syrians of Damascus" are spoken of, and the words "Syria of Damascus" are found in Isa. vii, 8. It is expressly said, "the head of Syria is Damascus;" also, Isa. xvii, 3, "the kingdom" is to cease "from Damascus;" so that this place was obviously the metropolis of a Syrian empire. It gave name (Syria Damascena, Plin. *Hist. Natural.* v, 13) to a district of Syria, which, in 1 Chron. xix, 6, is distinguished as "Syria-Maachah" in the A.V. The city is even mentioned in the cuneiform inscriptions (q. v.). There has never been any doubt of its identity.

1. *Situation.*—Damascus occupies the most beautiful site in Syria, or perhaps in all Western Asia. At the eastern base of Anti-Libanus lies a vast plain, having an elevation of about 2200 feet above the level of the sea. It is bounded on the south by the river Awaj, with its branches, which separates it from Ituræa. On the east a little group of conical hills divides it from the great Arabian desert. Its form is triangular, and its area about 500 square miles. Only about one half of this is now inhabited, or indeed habitable; but in richness and beauty this half is unsurpassed. It owes all its advantages to its rivers (2 Kings v, 12). The plain is about 400 stadia from the Mediteranean, and from six to eight days' journey from Jerusalem. Its celebrity is of early date. Strabo (xvi, p. 756) speaks of it in eulogistic terms. In a religious point of view, also, its repute was great. Julian (*Ep.* 24) terms it "the great and sacred Damascus, surpassing every city both in the beauty of its temples and the magnitude of its shrines, as well as the timeliness of its seasons, the limpidness of its fountains, the volume of its waters, and the richness of its soil." The Abana (q. v.), now called Barada, rising high up on the western flank of Anti-Libanus, forces its way through the chain, running for some time among the mountains, till suddenly it bursts through a narrow cleft upon the open country east of the hills, and diffuses fertility far and wide. "From the edge of the mountain-range," says a modern traveller, "you look down on the plain of Damascus. It is here seen in its widest and fullest perfection, with the visible explanation of the whole secret of its great and enduring charm, that which it must have had when it was the solitary seat of civilization in Syria, and which it will have as long as the world lasts. The river is visible at the bottom, with its green banks, rushing through the cleft; it bursts forth, and as if in a moment scatters over the plain, through a circle of thirty miles, the same verdure which had hitherto been confined to its single channel. . . . . Far and wide in front extends the level plain, its horizon bare, its lines of surrounding hills bare, all bare far away on the road to Palmyra and Bagdad. In the midst of this plain lies at your feet the vast lake or island of deep verdure, walnuts and apricots waving above, corn and grass below; and in the midst of this mass of foliage rises, striking out its white arms of streets hither and thither, and its white minarets above the trees which embosom them, the city of Damascus. On the right towers the snowy height of Hermon, overlooking the whole scene. Close behind are the sterile limestone mountains—so that you stand literally between the living and the dead" (Stanley, *Palestine*, p. 402). Another writer mentions among the produce of the plain in question "walnuts, pomegranates, figs, plums, apricots, citrons, pears, and apples" (Addison's *Dam. and Palmyra*, ii, 92). Olive-trees are also a principal feature of the scene. Besides the main stream of the Barada, which runs directly through the town, supplying its public cisterns, baths, and fountains, a number of branches are given off to the right and to the left, which irrigate the meadows and corn-fields, turning what would otherwise be a desert into a garden. These various streams, although greatly weakened in volume, flow on towards the east for about twenty miles, when they pour their waters into two small and shallow lakes, which lie upon the verge of the desert. Two other streams, the

Map of the Vicinity of Damascus.

Wady Helbon upon the north, and the Awaj upon the south, which flows direct from Hermon, increase the fertility of the Damascene plain, and contend for the honor of representing the "Pharpar" (q. v.) of Scripture. The city stands on the banks of the main stream, about two miles distant from, and 500 feet below the pass through which it emerges into the plain. The modern Oriental architecture does not bear close inspection, but when seen from a distance it is singularly imposing. Tapering minarets and swelling domes, tipped with golden crescents, rise up in every direction from the confused mass of white terraced roofs, while in some places their tops gleam like diamonds amid the deep green foliage. In the centre of the city stands the great mosque, and near it the massive towers of the castle.

2. *History.*—According to Josephus (*Ant.* i, 6) Damascus was founded by Uz, the son of Aram, and grandson of Shem. It is first mentioned in Scripture in connection with Abraham, whose steward was a native of the place (Gen. xv, 2). We may gather from the name of this person, as well as from the statement of Josephus, which connects the city with the Aramæans, that it was a Shemitic settlement. According to a tradition preserved in the native writer Nicolaüs, Abraham staid for some time at Damascus after leaving Charran and before entering the promised land, and during his stay was king of the place. "Abraham's name was," he says, "even in his own day, familiar in the mouths of the Damascenes, and a village was shown where he dwelt, which was called after him" (*Fragm.* 30). This last circumstance would seem, however, to conflict with the notion of Abraham having been king, since in that case he would have dwelt in the capital. In the village of Buzeh, three miles north of the city, is a highly venerated shrine, called for the last eight centuries "the house of Abraham." (On these fables, see Julian, *Epist.* 24, p. 392; Cellarii *Notitiæ*, ii, 442 sq.; Mannert, VI, i, 407 sq.; Justin, xxxvi, 2; Isidorus, *Origg.* xv, 1; D'Herbelot, *Biblioth. Or.* i, 70.) See ABRAHAM.

Nothing more is known of Damascus until the time of David, when "the Syrians of Damascus came to succor Hadadezer, king of Zobah," with whom David was at war (2 Sam. viii, 5; 1 Chron. xviii, 5). On this occasion David "slew of the Syrians 22,000 men," and in consequence of this victory became completely master of the whole territory, which he garrisoned with Israelites. "David put garrisons in Syria of Damascus; and the Syrians became servants to David, and brought gifts" (2 Sam. viii, 6). Nicolaüs of Damascus said that the name of the king who reigned at this time was Hadad; and he ascribes to him a dominion not only over Damascus, but "over all Syria except Phœnicia" (*Fragm.* 31). He noticed his *attack* upon David, and related that many battles were fought between them, the last, wherein he suffered defeat, being "*upon the Euphrates.*" According to this writer, Hadad the first was succeeded by a son, who took the same name, as did his descendants for ten generations. But this is irreconcilable with Scripture (see Müller, *Origo regni Damasc.* Lips. 1714; also in Ikenii *Thesaur.* i, 721 sq.). It appears that in the reign of Solomon a certain Rezon, who had been a subject of Hadadezer, king of Zobah, and had escaped when David conquered Zobah, made himself master of Damascus, and established his own rule there (1 Kings xi, 23–5). He was "an adversary to Israel all the days of Solomon . . . and he abhorred Israel, and reigned over Syria" (Joseph. *Ant.* viii, 7, 6). Afterwards the family of Hadad appears to have recovered the throne, and a Benhadad, who is probably Hadad III of Nicolaüs, a grandson of the antagonist of David, is found in league with Baasha, king of Israel, against Asa (1 Kings xv, 19; 2 Chron. xvi, 3), and afterwards in league with Asa against Baasha (1 Kings xv, 20). He made a successful invasion of the Israelitish territory in the reign of that king; and in the reign of Omri he not only captured a number of Israelitish cities, which he added to his own dominions, but even seems to have exercised a species of lordship over Samaria itself, in which he acquired the right of "making himself streets" (1 Kings xx, 34; comp. Nic. D. *Fragm.* 31, ad fin.). He was succeeded by his son, Hadad IV (the Benhadad II of Scripture, and the Ben-idri of the Assyrian inscriptions), who came at the head of thirty-two subject kings against Ahab, and laid siege to Samaria (1 Kings xx, 1). The attack was unsuccessful, and was followed by wars, in which victory declared itself unmistakably on the side of the Israelites; and at last Benhadad was taken prisoner, and forced to submit to a treaty whereby he gave up all that his father had gained, and submitted in his turn to the suzerainty of Ahab (ib. xx, 13–34). The terms of the

treaty were perhaps not observed. At any rate, three years afterwards war broke out afresh, through the claim of Ahab to the city of Ramoth-Gilead (1 Kings xxii, 1–4). The defeat and death of Ahab at that place (ib. 15–37) seems to have enabled the Syrians of Damascus to resume the offensive. Their bands ravaged the lands of Israel during the reign of Jehoram; and they even undertook at this time a second siege of Samaria, which was frustrated miraculously (2 Kings vi, 24; vii, 6–7). After this, we do not hear of any more attempts against the Israelitish capital. The cuneiform inscriptions show that towards the close of his reign Benhadad was exposed to the assaults of a great conqueror, who was bent on extending the dominion of Assyria over Syria and Palestine. Three several attacks appear to have been made by this prince upon Benhadad, who, though he had the support of the Phœnicians, the Hittites, and the Hamathites, was unable to offer any effectual opposition to the Assyrian arms. His troops were worsted in several engagements, and in one of them he lost as many as 20,000 men. It may have been these circumstances which encouraged Hazael, the servant of Benhadad, to murder him and seize the throne, which Elisha had declared would certainly one day be his (2 Kings viii, 15). He may have thought that the Syrians would willingly acquiesce in the removal of a ruler under whom they had suffered so many disasters. The change of rulers was not at first productive of any advantage to the Syrians. Shortly after the accession of Hazael (about B.C. 884), he was in his turn attacked by the Assyrians, who defeated him with great loss amid the fastnesses of Anti-Libanus. However, in his other wars he was more fortunate. He repulsed an attack on Ramoth-Gilead, made by Ahaziah, king of Judah, and Jehoram, king of Israel, in conjunction (2 Kings viii, 28–9); ravaged the whole Israelitish territory east of Jordan (ib. x, 32–3); besieged and took Gath (ib. xii, 17; compare Amos vi, 2); threatened Jerusalem, which only escaped by paying a heavy ransom (2 Kings xii, 18); and established a species of suzerainty over Israel, which he maintained to the day of his death, and handed down to Benhadad, his son (2 Kings xiii, 3–7, and 22). This prince, in the earlier part of his reign, had the same good fortune as his father. Like him, he "oppressed Israel," and added various cities of the Israelites to his own dominion (2 Kings xiii, 25); but at last a deliverer appeared (ver. 5), and Joash, the son of Jehoahaz, "beat Hazael thrice, and recovered the cities of Israel" (ver. 25). In the next reign still further advantages were gained by the Israelites. Jeroboam II (B.C. cir. 836) is said to have "recovered Damascus" (ib. xiv, 28), and though this may not mean that he captured the city, it at least implies that he obtained a certain influence over it. The mention of this circumstance is followed by a long pause, during which we hear nothing of the Syrians, and must therefore conclude that their relations with the Israelites continued peaceable. See BENHADAD. When they reappear, nearly a century later (B.C. cir. 742), it is as allies of Israel against Judah (2 Kings xv, 37). We may suspect that the chief cause of the union now established between two powers which had been so long hostile was the necessity of combining to resist the Assyrians, who at the time were steadily pursuing a policy of encroachment in this quarter. Scripture mentions the invasions of Pul (2 Kings xv, 19; 1 Chron. v, 26), and Tiglath-Pileser (2 Kings xv, 29; 1 Chron. v, 26); and there is reason to believe that almost every Assyrian monarch of the period made war in this direction. It seems to have been during a pause in the struggle that Rezin, king of Damascus, and Pekah, king of Israel, resolved conjointly to attack Jerusalem, intending to depose Ahaz and set up as king a creature of their own (Isa. vii, 1–6; 2 Kings xvi, 5). Ahaz may have already been suspected of a friendly feeling towards Assyria, or the object may simply have been to consolidate a power capable of effectually opposing the arms of that country. In either case the attempt signally failed, and only brought about more rapidly the evil against which the two kings wished to guard. Jerusalem successfully maintained itself against the combined attack; but Elath, which had formerly been built by Azariah, king of Judah, in territory regarded as Syrian (2 Kings xiv, 22), having been taken and retained by Rezin (ib. xvi, 6), Ahaz was induced to throw himself into the arms of Tiglath-Pileser, to ask aid from him, and to accept voluntarily the position of an Assyrian feudatory (ib. xvi, 7–8). The aid sought was given, with the important result that Rezin was slain, the kingdom of Damascus brought to an end, and the city itself destroyed, the inhabitants being carried captive into Assyria (ib. ver. 9; comp. Isa. vii, 8, and Amos i, 5). Among the sculptures lately discovered on the site of Nineveh are thought to be delineations of this siege and capture of Damascus. Rawlinson even reads the name of the city on an obelisk connected with them (Bonomi, *Nineveh*, p. 234 sq.). Assyrian remains have lately been discovered in a mound near Damascus (*Journal of Sacred Literature*, October, 1854, p. 218; January, 1855, p. 469). See ASSYRIA.

Final Assault of Damascus. From the Assyrian Monuments.

Captivity of the Inhabitants. From the same.

It was long before Damascus recovered from this serious blow. As Isaiah and Amos had prophesied in the day of her prosperity that Damascus should be "taken away from being a city and be a ruinous heap" (Isa. xvii, 1), that "a fire should be sent into the house of Hazael which should devour the palaces of Benhadad" (Amos i, 4), so Jeremiah, writing about B.C. 600, declares "Damascus *is waxed feeble* and turneth herself to flee, and fear hath seized on her; anguish and sorrows have taken her as a woman in travail. How is the city of praise *not left*, the city of my joy!" (Jer. xlix, 24–5). Damascus remained a province of Assyria until the capture of Nineveh by the Medes (B.C. 625), when it submitted to the conquerors. Its wealth and commercial prosperity appear to have declined for a considerable period, probably on account of the ravages of Tiglath-Pileser, and the captivity of the most influential and enterprising of its people. The city was afterwards held in succession by the Egyptians, Babylonians, and Persians. We have no particulars of its history for a period of three centuries. Under the rule of the Persians it was the capital of the province of Syria, and the residence of the satrap. We do not know at what time Damascus was rebuilt, but Strabo says that it was the most famous place in Syria during the Persian period (xvi, 2, § 19). When Darius, the last king of Persia, made his great effort to repress the rising power, and bar the progress of Alexander of Macedon, it was in this city he deposited his family and treasures (Arrian, *Exp. Al.* ii, 11). The fate of Damascus, with that of all Western Asia, was decided by the battle of Issus, in which the Persian army was almost annihilated. Damascus now became the capital of a province which Alexander gave to his general Laomedon (Plut. *Vit. Alexandri*). During the long wars which raged between the Seleucidæ and the Ptolemies, Damascus had no separate history: it sometimes fell to the one, and sometimes to the other. Antioch was founded, and became their favorite residence, and the capital of the Seleucidæ; but when the Syrian kingdom was divided in B.C. 126, Damascus was made the second capital. Its territory embraced Cœle-Syria, Phœnicia, and the country east of the Jordan, and it was afterwards governed in succession by four princes of the family of Seleucus. Damascus and Antioch thus became the seats of rival factions, and aspirants after complete sovereignty (Joseph. *Ant.* xiii, 13, 4, and 15, 1). The last of these princes, Antiochus Dionysus, was killed in battle against Aretas, king of Arabia, and the Damascenes forthwith elected Aretas his successor (Josephus, *Ant.* xiii, 15, 1), B.C. 84. In the year B.C. 64, the Romans, under Pompey, invaded and captured Syria, constituted it a province of the empire, and made Damascus the seat of government (*ib.* xiv, 2, 3, and 4, 5; Mos. Choren. i, 14; Appian, *Bell. Mithrid.* p. 224). From Josephus (*War*, i, 2; xxv, 2; xx, 2; comp. Acts ix, 2) it appears that its population contained great numbers of Jews.

Coin of Damascus.

For twenty years Damascus continued to be the residence of the Roman procurators. The city prospered under their firm and equitable rule, and even after their removal to Antioch did not decline. Strabo, who flourished at this period, describes it as one of the most magnificent cities of the East. Nicolaüs, the famous historian and philosopher, the friend of Herod the Great and Augustus, was now one of its citizens (Strabo, *Geogr.* xvi; Josephus, *Ant.* xvi, 10, 8). But the strong arm of Rome was not sufficient to quell the fiery spirit of the Syrians. The whole country was rent into factions, and embroiled by the unceasing rivalries and wars of petty princes. About the year A.D. 37, a family quarrel led to a war between Aretas, king of Arabia, and Herod Antipas. The Roman governor, Vitellius, was instructed to interfere in favor of the latter; but when he was ready to attack Aretas, who had already driven back Herod, news arrived of the death of the emperor Tiberius. The government of Syria was thus thrown into confusion, and Vitellius returned to Antioch (Joseph. *Ant.* xviii, 5, 1–3). It appears that now Aretas, taking advantage of the state of affairs, followed up his successes, advanced upon Damascus, and seized the city. It was during his brief rule (or some earlier one) that Paul visited Damascus on his return from Arabia (Gal. i, 16, 17). See ARETAS. His zeal as a missionary, and the energy with which he opposed every form of idolatry, had probably attracted the notice and excited the enmity of Aretas; and consequently, when informed by the Jews that the apostle had returned to the city, he was anxious to secure him, and gave orders to the governor to watch the gates day and night for that purpose (Acts ix, 24; 2 Cor. xi, 32. See Neander, *Planting and Training of the Christian Church*, i, 106). The Romans adorned Damascus with many splendid buildings, the ruins of which still exist. Some of them were probably designed by Apollodorus, a native of the city, and one of the most celebrated architects of his age, to whose genius we are indebted for one of the most beautiful monuments of ancient Rome, the Column of Trajan (Dion Cass. lxix). A little later it was reckoned to Decapolis (Plin. *Hist. Nat.* v, 16), after which it became a part of the province known as Phœnicia-Libanesia (Hierocl. *Synecd.* p. 717).

Christianity was planted in Damascus by Paul himself (Acts ix, 20 sq.; Gal. i, 12), and obtained a firm footing in the apostolic age. It spread so rapidly among the population that in the time of Constantine the great temple, one of the noblest buildings in Syria, was converted into a cathedral church and dedicated to John the Baptist. When the first general council assembled at Nice, Magnus, the metropolitan of Damascus, was present with seven of his suffragans. But the Roman empire was now waxing feeble, and the religion which, by its establishment as a national institute, ought to have infused the germ of a new life into the declining state, was itself losing its purity and its power. Damascus felt, like other places, the demoralizing tendencies of a corrupt faith. In the beginning of the 7th century a new and terrible power appeared upon the stage of the world's history, destined, in the hands of an all-wise though mysterious Providence, to overthrow a degenerate empire and chastise an erring Church. In A.D. 634 Damascus opened its gates to the Mohammedans, and thirty years later the first caliph of the Omeiades transferred the seat of his government to that city. It now became for a brief period the capital of a vast empire, including Syria, Mesopotamia, Persia, Northern Africa, and Spain (Elmacin, *Hist. Sarac.* xiii). In A.D. 750 the Omeiades were supplanted by the dynasty of Abbas, and the court was removed to Bagdad. A stormy period of four centuries now passed over the old city without leaving a single incident worthy of special note. An attack of the Crusaders (A.D. 1148), under the three chiefs, Baldwin, Conrad, and Louis VII, might have claimed a place here had it not been so disgraceful to the Christian arms. It is enough to say that the cross never displaced the crescent on the battlements of Damascus. The reigns of Nureddin and his more distinguished successor Saladin form bright epochs in the city's history. Two centuries later came Timur, who literally swept Damascus with "the besom

of destruction." Arab writers sometimes call him *el-Wahsh*, "the wild beast," and he fully earned that name. Never had Damascus so fearfully experienced the horrors of conquest. Its wealth, its famed manufactures, and its well-filled libraries, were all dissipated in a single day. It soon regained its opulence. A century later it fell into the hands of the Turks, and, with the exception of the brief rule of Ibrahim Pasha, it has ever since remained nominally subject to the sultan.

The Mohammedan population of Damascus have long been known as the greatest fanatics in the East. The steady advance of the Christian community in wealth and influence during the last thirty years has tended to excite their bitter enmity. In July, 1860, taking advantage of the war between the Druses and Maronites, and encouraged also by the Turkish authorities, they suddenly rose against the poor defenceless Christians, massacred about 6000 of them in cold blood, and left their whole quarter in ashes! Such is the last act in the long history of Damascus. (There is a work by Pieritz on the *Persecution of the Jews at Damascus*, Lond. 1840.) Damascus is still the largest city in Asiatic Turkey. It contained in 1859 a population of about 150,000. Of these, 6000 were Jews and 15,000 Christians. The Christian community has since been almost exterminated by the above massacre of the greater portion of the males. The pasha ranks with the first officers of the empire, and the city is the head-quarters of the Syrian army.

3. *Commerce.*—Damascus has always been a great centre for trade. The difficulties and dangers of the mountain passes to the west of Anti-Libanus made the line of traffic between Egypt and Upper Syria follow the circuitous route by Damascus rather than the direct one through Cœle-Syria, while the trade of Tyre with Assyria and the East generally passed naturally through Damascus on its way to Palmyra and the Euphrates. Ezekiel, speaking of Tyre, says, "Damascus was thy merchant *in the multitude of the wares of thy making*, for the *multitude of all riches;* in the wine of Helbon and white wool." It would appear from this that Damascus took manufactured goods from the Phœnicians, and supplied them in exchange with wool and wine. The former would be produced in abundance in Cœle-Syria and the valleys of the Anti-Libanus range, while the latter seems to have been grown in the vicinity of HELBON, a village still famous for the produce of its vines, ten or twelve miles from Damascus to the north-west (*Geograph. Jour.* xxvi, 44). But the passage-trade of Damascus has probably been at all times more important than its direct commerce. Its merchants must have profited largely by the caravans which continually passed through it on their way to distant countries. It is uncertain whether in early times it had any important manufactures of its own. According to some expositors, the passage in Amos iii, 12, which we translate "in Damascus on a couch" (בִּדְמֶשֶׂק עֶרֶשׂ), means really "on the *damask* couch," which would indicate that the Syrian city had become famous for a textile fabric as early as the eighth century B.C. There is no doubt that such a fabric gave rise to our own word, which has its counterpart in Arabic as well as in most of the languages of modern Europe; but it is questionable whether either this, or the peculiar method of working in steel, which has impressed itself in a similar way upon the speech of the world, was invented by the Damascenes before the Mohammedan era. In ancient times they were probably rather a consuming than a producing people, as the passage in Ezekiel clearly indicates. It afterwards became famous for its sword-blades and cutlery; but its best workmen were carried off by Timur to Ispahan. Its chief manufactures are, at present, silks, coarse woollen stuffs, cottons, gold and silver ornaments, and arms. The bazaars are stocked with the products of nearly all nations—Indian muslins, Manchester prints, Persian carpets, Lyons' silks, Birmingham cutlery, Cashmere shawls, Mocha coffee, and Dutch sugar.

4. *Topography, Antiquities, etc.*—The old city, the nucleus of Damascus, stands on the south bank of the river, and is surrounded by a tottering wall, the foundations of which are Roman, and the superstructure a patchwork of all succeeding ages. It is of an irregular oval form. Its greatest diameter is marked by the "*street called Straight*," which intersects it from east to west, and is about a mile long. This street was anciently divided into three avenues by Corinthian colonnades, and at each end were triple Roman gateways, still in a great measure entire. In the old city were the Christian and Jewish quarters, and the principal buildings and bazaars. On the north, west, and south are extensive suburbs. The internal aspect of the city is not prepossessing, and great is the disappointment of the stranger when he leaves the delicious environs and enters the gates. Without, nature smiles joyously, the orchards seem to blush at their own beauty, and the breeze is laden with perfumes. Within, all is different. The works of man show sad signs of neglect and decay. The houses are rudely built; the lanes are paved with big rough stones, and partially roofed with ragged mats and withered branches; long-bearded, fanatical-visaged men squat in rows on dirty stalls, telling their beads, and mingling, with muttered prayers to Allah and his prophet, curses deep and terrible on all infidels. The bazaars are among the best in the East. See BAZAAR. They are narrow covered lanes, with long ranges of open stalls on each side; in these their owners sit as stiff and statue-like as if they had been placed there for show. See MERCHANT. Each trade has its own quarter. Every group in the bazaars would form a lively picture. All the costumes of Asia are there, strangely grouped with panniered donkeys, gayly-caparisoned mules, and dreamy-looking camels. The principal *khans* or caravansaries are spacious buildings. They are now used as stores and shops for the principal merchants. The great khan, Assad Pasha, is among the finest in Turkey. A noble Saracenic portal opens on a large quadrangle, ornamented with a marble fountain, and covered by a series of domes supported on square pillars. Many of the *mosques* are fine specimens of Saracenic architecture. Their deeply-moulded gateways are very beautiful, and the interlaced stone-work around doors and windows is unique. They are mostly built of alternate layers of white and black stone, with string courses of marble arranged in chaste patterns. But they are all badly kept, and many of them are now ruinous.

The *private houses* of Damascus share, with the plain, the admiration of all visitors. No contrast could be greater than that between the outside and inside. The rough mud-walls and mean doors give poor promise of taste or beauty within. The entrance is always through a narrow winding passage—sometimes even a stable-yard—to the "outer court," where the master has his reception-room, and to which alone male visitors are admitted. Another winding passage leads to the *harem* (q. v.), which is the principal part of the house. Here is a spacious court, with tesselated pavement, a marble basin in the centre, *jets d'eau* around it, orange, lemon, and citron trees, flowering shrubs, jessamines and vines trained over trellis-work for shade. The rooms all open on this court, intercommunication between room and room being almost unknown. On the south side is an open alcove, with marble floor and cushioned dais. The decorations of some of the rooms is gorgeous. The walls of the older houses are wainscoted, carved, and gilt, and the ceilings are covered with arabesque ornaments. In the new houses painting and marble fretwork are taking the place of arabesque and wainscoting.

The principal building of Damascus is the *Great Mosque*, the domes and minarets of which are everywhere conspicuous. It occupies one side of a large quadrangular court, flagged with marble, arranged in patterns, and ornamented with some beautiful fountains. Within the mosque are double ranges of Corinthian columns supporting the roof, in the style of the old basilicas. The walls were once covered with Mosaic, representing the holy places of Islam; but this is nearly all gone. In the centre is a spacious dome. The building was anciently a temple, with a large cloistered court, like the Temple of the Sun at Palmyra. In the time of Constantine it was made a church and dedicated to John the Baptist, whose head was said to be deposited in a silver casket in one of the crypts. In the 7th century the Moslems took possession of it, and it has since remained the most venerated of their mosques. It is a singular fact, however, that though it has now been for twelve centuries in possession of the enemies of our faith, though during the whole of that period no Christian has ever been permitted to enter its precincts, yet over its principal door is an inscription embodying one of the grandest and most cheering of Christian truths (Psa. cxlv, 13).

The *Castle* is a large quadrangular structure, with high walls and massive flanking towers. It is now a mere shell, the whole interior being a heap of ruins. The foundations are at least as old as the Roman age. It stands at the north-west angle of the ancient wall.

The *traditionary sacred places* of Damascus are the following: A "long, wide thoroughfare"—leading direct from one of the gates to the castle or palace of the pasha—is "called by the guides 'Straight'" (Acts ix, 11); but the natives know it among themselves as "the Street of Bazaars" (Stanley, p. 404). The house of Judas is shown, but it is not in the street "Straight" (Pococke, ii, 119). That of Ananias is also pointed out. The scene of the conversion is confidently said to be "an open green spot, surrounded by trees," and used as the Christian burial-ground; but this spot is on the eastern side of the city, whereas Paul must have approached from the south or west. Again it appears to be certain that "four distinct spots have been pointed out at different times" (Stanley, p. 403) as the place where the "great light suddenly shined from heaven" (Acts ix, 3). The point of the walls at which St. Paul was let down by a basket (Acts ix, 25; 2 Cor. xi, 33) is also shown; and it is a fact that houses are still constructed in Damascus in like manner overhanging the wall. In the vicinity of Damascus certain places are shown traditionally connected with the prophet Elisha; but these local legends are necessarily even more doubtful than those which have reference to the comparatively recent age of the apostles. There are even spots pointed out as the scene of events in the life of Abraham (Stanley, p. 404).

The climate of Damascus is healthful except during July, August, and September, when fevers and opthalmia are prevalent, engendered by filth and unwholesome food. The thermometer ranges from 80° to 87° Fahr. during the summer, and seldom falls below 45° in winter. There is usually a little snow each year. The rain begins about the middle of October, and continues at intervals till May. The rest of the year is dry and cloudless.

A full description of Damascus, with notices, plans, and drawings, is given in *Porter's Five Years in Damascus* (Lond. 1855, 2 vols. 8vo); and in the *Jour. Sac. Lit.* July, 1853, p. 245 sq.; Oct. 1853, p. 45 sq.; see also Addison's *Damascus and Palmyra* (ii, 92–196); Walch, *Antiquitates Damasc. illustratæ* (Jen. 1757 [a copious treatise, giving all facts known in his day]; also in his *Acta Apostol.* ii, 31 sq.); Kelly, *Syria* (chap. xv), and travellers in Palestine generally. See Syria.

Damascus, John of. See John of Damascus.

Damaskios, one of the last eclectic philosophers, was a native of Damascus, studied in Alexandria and Athens, and taught the Neo-Platonic philosophy in the latter city. In consequence of the persecution of paganism by the emperor Justinian, Damaskios, in 529, emigrated to Persia, where he was well received by Khosroes, who, at the treaty of peace in 533, obtained for him permission to return and freedom of his religious belief. He is the author of a number of works, the most important of which is entitled Περὶ ἀρχῶν (edited by J. Kopp, Frankfort, 1826). On his life and opinions, see Kopp, preface to the above work, and Jules Simon in *Dictionnaire des Sciences Philosophiques.*—Hoefer, *Biog. Générale*, xii, 842.

Damasus I, pope, born in Spain (others say in Rome) A.D. 306, succeeded Liberius as bishop of Rome A.D. 366. He was opposed by Ursicinus, who claimed the election, and in their disgraceful strifes many people were murdered. He was a man of vigorous intellect, and extended the power of the see of Rome very greatly. The emperor Gratian conferred upon him, in 378, the right to pass judgment upon those clergymen of the other party who had been expelled from Rome, and, at the request of a Roman synod held in the same year, instructed the secular authorities to give to him the necessary support. Damasus was a vigorous opponent of Arianism; a synod held by him in 368 condemned the two Illyrian bishops Ursacius and Valens, and another, held in 370, passed sentence against Auxentius of Milan. He also exerted himself for putting an end to the Antioch schism, and took part in the Œcumenical Council of Constantinople of 381. One of his best acts was to make Jerome his secretary, and to aid him in his version of the Bible. He died in 384, and after his death was soon enrolled in the catalogue of saints, being commemorated on Dec. 11. See Damasi *Opera, edited by Merenda* (Rome, 1754, fol.; Paris, 1840, 8vo); Mosheim, *Ch. Hist.* bk. ii, cent. iv, pt. ii, ch. ii, note 40; Milman, *Hist. of Latin Christianity*, i, 108 sq.; *Christian Remembrancer*, Oct. 1854, 283 sq.

Damasus II, pope, originally Poppo, a native of Bavaria. He was bishop of Brixen when he was elected pope in 1048, upon the recommendation of the emperor Henry III, on the day of the abdication of Benedict X, and died twenty-three days after his election, 1048.

Damian (Damianus or Damiani), Peter, an eminent cardinal and reformer in the Roman Church, born at Ravenna about 1007. His parents appear to have taken much pains with his education, for he early excelled as much in piety as he did in learning. When he had completed his studies, he entered the monastery of the "Holy Cross" at Avellana, in Umbria. So high was his reputation that pope Stephen X created him cardinal bishop of Ostia. In A.D. 1061 he resigned all his preferments, which at the first even had been forced upon him, being unable to live with such a dissolute, debauched, and unholy crew as the clergy of those parts and times were. In the year 1069 he was sent as legate to prevent the emperor Henry from being divorced from his wife Bertha. His last public employment was in A.D. 1072, when he was commissioned to dissolve the excommunication under which his natal city Ravenna had lain for several years. He died of a fever at Faenza, on February 23, 1072, aged 66 years. His acts and his writings, which are numerous, tended much to the enlargement and consolidation of the papal power; yet he does not seem to have been at all a party man, but to have proceeded in a direct and honest course, which led him, on the whole, to the support of that dominion which then prevailed. Not one of his least merits with the Romish Church would be that he was the first who required his monks to recite the Office of the Virgin; but that Church should also recollect that he strongly deprecates the use of temporal weapons for the

increase of spiritual power. Altogether Damian was among the foremost men of his age, both morally and intellectually. His works were collected by Cajetan (Rome, 1606–1615, 3 vols. fol.), and have been several times reprinted; the best edition is that of Bassani (1783, 4 vols. fol.). His life is given in the first volume of his works; also in *Vita P. Damiani*, by Laderchi (Rome, 1702, 4to); and in the *Acta Sanctorum*, Feb. iii, 406 sq. See Dupin, *Eccl. History*, vol. ix, ch. viii; Mosheim, *Ch. Hist.*, bk. iii, c. xi, pt. ii, chap. ii, n. 67; Bayle, *Dictionary*, s. v.; Clarke, *Succ. of Sacred Literature*, ii, 608; Schröckh, *Kirchengeschichte*, xxii, 523 sq.; Lea, *Sacerdotal Celibacy* (1867), chap. xii.

Damianists *or* **Damianites.** The followers of Damianus of Alexandria (q. v.) were so called.

Damiānus, Monophysite patriarch of Alexandria († 601), expressed himself on the doctrine of the Trinity in a sense similar to that of Sabellius. He maintained that the divinity (θεότης) of the Father, the Son, and the Holy Ghost is an essential characteristic (ὕπαρξις) divided among the three, so that they are God only in their unity, not each one in himself (καθ' ἑαυτόν), and that in this unity they constitute the one divine essence (μίαν οὐσίαν καὶ φύσιν). His followers were called Damianites, after him, or Angelists, from Angelium, the place where they held their assemblies in Alexandria; their adversaries were called Tetradists (Τετραδῖται), as, going still further than the Tritheists, they acknowledged four gods, namely, the Father, the Son, the Holy Ghost, and the higher Being, which, in his nature (φύσει) and in himself (καθ' ἑαυτόν), is God.—Herzog, *Real-Encyklopädie*, iii, 263; Mosheim, *Ch. History*, bk. ii, ch. vi, pt. ii, § 4; Hagenbach, *Hist. of Doctrines*, § 96.

Damianus, St. See Cosmas.

Damin. See Adami.

Dammim. See Ephes-dammim.

Damnation, condemnation. This word is used to denote the final loss of the soul, but it is not always to be understood in this sense in the sacred Scripture. Thus it is said in Rom. xiii, 2, "They that resist shall receive to themselves damnation," i. e. condemnation, "from the rulers, who are not a terror to good works, but to the evil." Again, in 1 Cor. xi, 29, "He that eateth and drinketh unworthily, eateth and drinketh damnation to himself," i. e. condemnation; exposes himself to severe temporal judgments from God, and to the judgment and censure of the wise and good. Again, Rom. xiv, 23, "He that doubteth is damned if he eat," i. e. is condemned both by his own conscience and the word of God, because he is far from being satisfied that he is right in so doing.

Dan (Heb. *id.* דָּן, a *judge;* Sept. Δάν), the name of a man and his tribe and of two towns. See Mahaneh-dan; Dan-jaan.

1. (Josephus translates Θεόκριτος, *Ant.* i, 19, 8.) The fifth son of Jacob, and the first of Bilhah, Rachel's maid (Gen. xxx, 6), born B.C. 1916. The origin of the name is there given in the exclamation of Rachel —"'God hath judged me (דָּנַנִּי, *danan'ni*) . . . and given me a son,' therefore she called his name Dan," i. e. "judge." In the blessing of Jacob (Gen. xlix, 16) this play on the name is repeated—"Dan shall judge (יָדִין, *yadin'*) his people." Dan was own brother to Naphtali; and, as the son of Rachel's maid, in a closer relation with Rachel's sons, Joseph and Benjamin, than with the other members of the family. It may be noticed that there is a close affinity between his name and that of Dinah, the only daughter of Jacob. See Jacob.

Tribe of Dan.—Only one son is attributed to this patriarch (Gen. xlvi, 23); but it may be observed that "Hushim" is a plural form, as if the name, not of an individual, but of a family; and it is remarkable—whether as indicating that some of the descendants of Dan are omitted in these lists, or from other causes—that when the people were numbered in the wilderness of Sinai, this was, with the exception of Judah, the most numerous of all the tribes, containing 62,700 men able to serve. The position of Dan during the march through the desert was on the north side of the tabernacle (Num. ii, 25). Here, with his brother Naphtali, and Asher, the son of Zilpah, before him, was his station, the hindmost of the long procession (ii, 31; x, 25). The names of the "captain" (נָשִׂיא) of the tribe at this time, and of the "ruler" (the Hebrew word is the same as before), who was one of the spies (xiii, 12), are preserved. So also is the name of one who played a prominent part at that time, "Aholiab, the son of Ahisamach, of the tribe of Dan," associated with Bezaleel in the design and construction of the fittings of the tabernacle (Exod. xxxi, 6, etc.). The numbers of this tribe were not subject to the violent fluctuations which increased or diminished some of its brethren (comp. the figures given in Num. i and xxvi), and it arrived at the threshold of the Promised Land, and passed the ordeal of the rites of Baal-peor (Num. xxv) with an increase of 1700 on the earlier census. The remaining notices of the tribe before the passage of the Jordan are unimportant. It furnished a "prince" (*nasi*, as before) to the apportionment of the land; and it was appointed to stand on Mount Ebal, still in company with Naphtali (but opposite to the other related tribes), at the ceremony of blessing and cursing (Deut. xxvii, 13).

After this nothing is heard of Dan till the specification of the inheritance allotted to him (Josh. xix, 48). He was the last of the tribes to receive his portion, and that portion, according to the record of Joshua—strange as it appears in the face of the numbers just quoted—was the smallest of the twelve. But, notwithstanding its smallness, it had eminent natural advantages. On the north and east it was completely embraced by its two brother tribes Ephraim and Benjamin, while on the south-east and south it joined Judah, and was thus surrounded by the three most powerful states of the whole confederacy. Of the towns enumerated as forming "the 'border' of its inheritance," the most easterly which can now be identified are Ajalon, Zorah (Zareah), and Ir-Shemesh (or Beth-shemesh, q. v.). These places are on the slopes of the lower ranges of hills by which the highlands of Benjamin and Judah descend to the broad maritime plain, that plain which on the south bore the distinctive name of "the Shefelah," and more to the north, of "Sharon." From Japho—afterwards Joppa, and now Yâfa—on the north, to Ekron and Gathrimmon on the south—a length of at least fourteen miles—that noble tract, one of the most fertile in the whole of Palestine, was allotted to this tribe. By Josephus (*Ant.* v, 1, 22, and 3, 1) this is extended to Ashdod on the south, and Dor, at the foot of Carmel, on the north, so as to embrace the whole, or nearly the whole, of the great plain, including Jamnia and Gath. (This discrepancy may be accounted for by supposing that the Danites at some period may have overrun the country thus far, when the Philistines were humbled by the powerful Ephraimites and the still more powerful David.) But this rich district, the corn-field and the garden of the whole south of Palestine, which was the richest prize of Phœnician conquest many centuries later, and which, even in the now degenerate state of the country, is enormously productive, was too valuable to be given up without a struggle by its original possessors. The Amorites accordingly "forced the children of Dan into the mountain, for they would not suffer them to come down into the valley" (Judg. i, 34)—forced them up from the corn-fields of the plain, with their deep black soil, to the villages whose ruins

still crown the hills that skirt the lowland. True, the help of the great tribe so closely connected with Dan was not wanting at this juncture, and "the hand of the children of Joseph," i. e. Ephraim, "prevailed against the Amorites" for the time. But the same thing soon occurred again, and in the glimpse with which we are afterwards favored into the interior of the tribe, in the history of its great hero, the Philistines have taken the place of the Amorites, and with the same result. Although Samson "comes down" to the "vineyards of Timnath" and the valley of Sorek, yet it is from Mahaneh-Dan—the fortified camp of Dan, between Zorah and Eshtaol, behind Kirjath-jearim—that he descends, and it is to that natural fastness, the residence of his father, that he "goes up" again after his encounters, and that he is at last borne to his family sepulchre, the burying-place of Manoah (Judg. xiv, 1, 5, 19; xiii, 25; xvi, 4; comp. xviii, 12; xvi, 31). It appears from that history that there was an under-current of private and social intercourse between the Philistines and the Danites, notwithstanding the public enmity between Israel and the former (Judg. xiii–xvi).

These considerations enable us to understand how it happened that long after the partition of the land "all the inheritance of the Danites had not fallen to them among the tribes of Israel" (Judg. xviii, 1). They perhaps furnish a reason for the absence of Dan from the great gathering of the tribes against Sisera (Judg. v, 17). They also explain the warlike and independent character of the tribe betokened in the name of their head-quarters, as just quoted—Mahaneh-Dan, "the camp, or host, of Dan"—in the fact specially insisted on and reiterated (xviii, 11, 16, 17) of the complete equipment of their 600 warriors "appointed with weapons of war," and the lawless freebooting style of their behavior to Micah. There is something very characteristic in the whole of that most fresh and interesting story preserved to us in Judg. xviii—a narrative without a parallel for the vivid glance it affords into the manners of that distant time—characteristic of boldness and sagacity, with a vein of grim sardonic humor, but undeformed by any unnecessary bloodshed.

In the "security" and "quiet" (Judg. xviii, 7, 10) of their rich northern possession the Danites enjoyed the leisure and repose which had been denied them in their original seat. But of the fate of the city to which they gave "the name of their father" (Josh. xix, 47), we know scarcely anything. The strong religious feeling which made the Danites so anxious to ask counsel of God from Micah's Levite at the commencement of their expedition (Judg. xviii, 5), and afterwards take him away with them to be "a priest unto a tribe and a family in Israel," may have pointed out their settlement to the notice of Jeroboam as a fit place for his northern sanctuary. But beyond the exceedingly obscure notice in Judg. xviii, 30, we have no information on this subject. From 2 Chron. ii, 14, it would appear that the Danites had not kept their purity of lineage, but had intermarried with the Phœnicians of the country. (See an elaboration of this in Blunt, *Coincidences*, pt. ii, ch. iv.)

In the time of David Dan still kept its place among the tribes (1 Chron. xii, 35). Asher is omitted, but the "prince of the tribe of Dan" is mentioned in the list of 1 Chron. xxvii, 22. But from this time forward the name as applied to the tribe vanishes; it is kept alive only by the northern city. In the genealogies of 1 Chron. ii to xii Dan is omitted entirely, which is remarkable when the great fame of Samson and the warlike character of the tribe are considered, and can only be accounted for by supposing that its genealogies had perished. It is perhaps allowable to suppose that little care would be taken to preserve the records of a tribe which had left its original seat near the head-quarters of the nation, and given its name to a distant city notorious only as the seat of a rival and a forbidden worship. Lastly, Dan is omitted from the list of those who were sealed by the angel in the vision of John (Rev. vii, 5–8).—Smith, *Dict. of Bible*, s. v. Perhaps the portion of the tribe which remained south was in time amalgamated with the tribe of Judah (as appears in the cities enumerated after the exile, Neh. xi, 35), while the northern section united with the northern confederacy, and shared in its dispersion.

Map of the Tribe of Dan.

The following is a list of all the places in the tribe of Dan mentioned in Scripture, with their probable identification:

Ajalon.	Town.	*Yalo.*
Allon.	do.	See ELON.
Arimathæa.	do.	*Ramleh?*
Ataroth-Joab.	do.	*Deir-Ayub?*
Baalath.	do.	*Deir Balut.*
Bene-barak.	do.	*Buraka.*
Beth-car.	Hill.	*Beit Far?*
Beth-shemesh.	Town.	*Ain Shems.*
Charashim.	Valley.	[*Wady Mazeirah*]?
Ekron.	Town.	*Akir.*
Elon.	do.	[*Beit Susin*]?
Eltekeh.	do.	[*El-Mansureh*]?
Eshtaol.	do.	*Yeshua?*
Gath-rimmon.	do.	[*Rafat.*]
Gibbethon.	do.	[*Saidon*]?
Gimzo.	do.	*Jimzu.*
Gittaim.	do.	See ARIMATHÆA.
Hadid.	do.	*El-Haditheh.*
Heres.	Mountain.	See JEARIM.
Ir-shemesh.	Town.	See BETH-SHEMESH.
Jabniel, or Jabneh.	do.	*Yebna.*
Japho.	do.	*Yafa.*
Jearim.	Mountain.	[Hills W. of Wady Ghurab].
Jehud.	Town.	*El-Yehudiyeh.*
Jethlah.	do.	[Ruins N. of Latrum]?
Joppa.	do.	See JAPHO.
Lod, or Lydda.	do.	*Ludd.*
Mahaneh-dan.	Plain.	W. of Kirjath-jearim?
Makaz.	District.	E. of Ekron?
Me-jarkon.	Town.	[*Danniyal*]?
Neballat.	do.	*Beit Nebala.*
Ono.	do.	*Kefr-Auna.*
Rakkon.	do.	[*Kheibeh*]?
Seir [or Seirath ?].	Mountain.	*Saris.*
Shaalbin.	Town.	[*Beit Sira*]?
Sharon.	Plain.	Vicinity of Ludd.
Shicron.	Town.	[*Beit Shit*]?
Timnah, or Timnath.	do.	*Tibneh.*
Zorah, or Zoreah.	do.	*Sura.*

The mention of this tribe in the "blessings" of Jacob and Moses must not be overlooked, but it is difficult to extract any satisfactory meaning from them. According to Jewish tradition, Jacob's blessing on Dan is a prophetic allusion to Samson, the great "judge" of the tribe; and the ejaculation with which it closes was that actually uttered by Samson when brought

into the temple at Gaza. (See the Targum Ps. Jonathan on Gen. xlix, 16, 17; and the quotations in Kalisch's *Genesis* ad loc.) Modern critics likewise see an allusion to Samson in the terms of the blessings which they presume on that account to have been written after the days of the Judges (Ewald, *Gesch.* i, 92). Jerome's observations (*Qu. in Gen.*) on this passage are very interesting. Herder's interpretation as given by Stanley (*Palestine*, p. 388) is as follows: "It is doubtful whether the delineation of Dan in Jacob's blessing relates to the original settlement on the western outskirts of Judah, or to the northern outpost. Herder's explanation will apply almost equally to both. 'Dan,' the judge, 'shall judge his people;' he the son of the concubine no less than the sons of Leah; he the frontier tribe no less than those in the places of honor shall be 'as one of the tribes of Israel.' 'Dan shall be a serpent by the way, an adder in the path,' that is, of the invading enemy by the north or by the west, 'that biteth the heels of the horse,' the indigenous serpent biting the foreign horse unknown to Israelite warfare, 'so that his rider shall fall backwards.' And his war-cry as from the frontier fortresses shall be, 'For Thy salvation, O Lord, I have waited!' In the blessing of Moses the southern Dan is lost sight of. The northern Dan alone appears, with the same characteristics, though under a different image; 'a lion's whelp' in the far north, as Judah in the far south: 'he shall leap from Bashan'—from the slopes of Hermon, where he is couched watching for his prey."

2. (Josephus τὸ Δάνιον.) The city so familiar as the most northern landmark of Palestine in the common expression "from Dan even to Beersheba." The name of the place was originally LAISH or LESHEM (Josh. xix, 47). Its inhabitants lived "after the manner of the Zidonians," i. e. engaged in commerce, and without defence. But it is nowhere said that they were Phœnicians, though this may perhaps be inferred from the parentage of Huram—his mother "of the daughters of Dan," his father "a man of Tyre" (2 Chron. ii, 14). They seem to have derived their security from the absence of any adverse powers in their neighborhood, and from confidence in the protection of Sidon, which was, however, too far off to render aid in the case of such a sudden assault as that by which they were overpowered. This distance of Sidon was carefully noted by the Danite spies as a circumstance favorable to the enterprise; and it does not appear that Sidon ever made any effort to dispossess the intruders. Living thus "quiet and secure," they fell an easy prey to the active and practised freebooters of the Danites. These conferred upon their new acquisition the name of their own tribe, "after the name of their father who was born unto Israel" (Judg. xviii, 29; Josh. xix, 47), and Laish became Dan. The graven image which the wandering Danites had stolen from Micah they set up in their new home, and a line of priests was established, which, though belonging to the tribe of Levi and even descended from Moses, was not of the family of Aaron, and therefore not belonging to the regular priesthood. To the form of this image and the nature of the idolatry we have no clew, nor to the special relation which existed between it and the calf-worship afterwards instituted there by Jeroboam (1 Kings xii, 29, 30). It only appears that Jeroboam took advantage of the confirmed idolatry of the Danites (Judg. xviii, 30), erected a temple in their city, and set up there one of his golden calves for the benefit of those to whom a pilgrimage to Jerusalem would not have been politic, and a pilgrimage to Bethel might have been irksome (1 Kings xii, 28). The latter worship is alluded to by Amos (viii, 14) in a passage which possibly preserves a formula of invocation or adjuration in use among the worshippers; but the passage is very obscure. The worship of the calf may be traced to this day in the secret rites of the Nosairian Druse saints of the vicinity (Newbold, *Jour. As. Soc.* xvi, 27). After the establishment of the Danites at Dan it became the acknowledged extremity of the country, and the formula "from Dan even to Beersheba" is frequent throughout the historical books (Judg. xx, 1; 1 Sam. iii, 20; 2 Sam. iii, 10; xvii, 11; xxiv, 2, 15; 1 Kings iv, 25). In the later records the form is reversed, and becomes "from Beersheba even to Dan" (1 Chron. xxi, 2; 2 Chron. xxx, 5). It is occasionally employed alone in a somewhat similar meaning; thus, in Jer. viii, 16, "The snorting of his horses was heard from Dan; the *whole land* trembled at the sound of the neighing of his strong ones" (also iv, 15). Dan was, with other northern cities, laid waste by Benhadad (1 Kings xv, 20; 2 Chron. xvi, 4), and this is the last mention of the place.

Various considerations would incline us to the suspicion that Dan was a holy place of note from a far earlier date than its conquest by the Danites. These are: (1.) The extreme reluctance of the Orientals—apparent in numerous cases in the Bible—to initiate a sanctuary, or to adopt for worship any place which had not enjoyed a reputation for holiness from pre-historic times. (2.) The correspondence of Dan with Beersheba in connection with the life of Abraham—the origin of Beersheba also being, as has been noticed, enveloped in some diversity of statement. (3.) More particularly its incidental mention in the very clear and circumstantial narrative of Gen. xiv, 14, as if well known even at that very early period. Its mention in Deut. xxxiv, 1, is also before the events related in Judg. xviii, though still many centuries later than the time of Abraham. But the subject is very difficult, and we can hardly hope to arrive at more than conjecture upon it. With regard to Gen. xiv, 14, three explanations suggest themselves. *a.* That another place of the same name is intended. (See Kalisch, *ad loc.* for an ingenious suggestion of Dan-jaan). Against this may be put the belief of Josephus (comp. *Ant.* i, 10, 1, with v, 3, 1) and of Jerome (*Onomast.* s. v. Laisa, comp. with *Quæst. Hebr. in Genesim*, xiv, 14), who both unhesitatingly identify the Dan near Paneas with the Dan of Abraham. *b.* That it is a prophetic anticipation by the sacred historian of a name which was not to exist till centuries later, just as Samson has been held to be alluded to in the blessing of Dan by Jacob. *c.* That the passage originally contained an older name, as Laish; and that, when that was superseded by Dan, the new name was inserted in the MSS. This last is Ewald's (*Gesch.* i, 73), and of the three is the most feasible, especially when we consider the characteristic, genuine air of the story in Judges, which fixes the origin of the name so circumstantially. Josephus (*Ant.* v, 3, 1) speaks positively of the situation of Laish as "not far from Mount Libanus and the springs of the lesser Jordan, near (κατά) the great plain of the city of Sidon" (compare also *Ant.* viii, 8, 4); and this, as just said, he identifies with the Dan in Gen. xiv, 14 (*Ant.* i, 10, 1). In consonance with this are the notices of Jerome, who derives the word "Jordan" from the names of its two sources. In Deut. xxxiv, 1, also, we find the phrase "all the land of Gilead unto Dan" employed by Moses some fifty years before the conquest of Leshem. The locality of the town is specified with some minuteness. It was "far from Zidon," and "in the valley (עֵמֶק, *Emek*) that is by (לְ) Beth-rehob;" but as this latter place has not been identified with certainty, the position of Dan must be ascertained by other means. Josephus says that it stood at the "lesser" fountain of the Jordan . . . in the plain of Sidon, a day's journey from that city, and that the plain around it was of extraordinary fertility (*Ant.* i, 10, 1; v, 3, 1; viii, 8, 4; *War*, iv, 1, 1). Eusebius and Jerome are still more explicit—"A village, *four miles distant from Paneas*, on the road leading to Tyre; it was the boundary of Judæa (ὅριον τῆς Ἰουδαίας), and at it the Jordan took its rise." Jerome

adds, "De quo et Jordanis flumen erumpens à loco sortitus est nomen. *Jor* quippe ῥεῖθρον, id est, fluvium sive rivum Hebræi vocant" (*Onomast.* s. v. Dan). Some writers, both ancient and modern, have confounded Dan with Paneas or Cæsarea Philippi (Philostorgius, *History*, vii, 3; Theodoret *in Genes.*; Sanson, *Geog. Sac.* s. v.; Alford *on Matt.* xvi, 13). This error appears to have arisen chiefly from indefinite remarks of Jerome in his commentary on Ezek. xlviii, 18: "Dan . . . ubi hodie Paneas, quæ quondam Cæsarea Philippi vocabatur;" and on Amos viii, "Dan in terminis terræ Judaicæ, *ubi nunc Paneas est.*" It is plain from Jerome's words in the *Onomasticon* that he knew the true site of Dan, and therefore these notices must be understood as meaning that Cæsarea Philippi was in his days the principal town in the locality where Dan was situated, and that both were upon the border of Palestine. The Jerusalem Targum calls it "Dan of Cæsarea," intimating its vicinity to the latter (*on Gen.* xiv, 14; see Reland, *Palæst.* p. 919–21). In perfect agreement with this is the position of *Tell el-Kadi*, a mound from the foot of which gushes out "one of the largest fountains in the world," the main source of the Jordan (Robinson, *Later Res.* iii, 390–393). The tell itself, rising from the plain by somewhat steep terraces, has its long, level top strewed with ruins, and is very probably the site of the town and citadel of Dan. The spring is called *el-Leddân*, possibly a corruption of Dan (Robinson, iii, 392), and the stream from the spring *Nahr ed-Dhan* (Wilson, ii, 173), while the name, *Tell el-Kadi*, "the Judge's mound," agrees in signification with the ancient name. Those who have visited it give the exact agreement of the spot with the requirements of the story in Judg. xviii—"a good land and a large, where there is no want of anything that is on the earth" (Thomson, *Land and Book*, ii, 320). Tell el-Kady is cup-shaped, resembling an extinct crater, and is covered with a dense jungle of thorns, thistles, and rank weeds. Its circumference is about half a mile, and its greatest elevation above the plain eighty feet. There are some traces of old foundations, and heaps of large stones on the top and sides of the southern part of the rim, where perhaps the citadel or a temple may have stood. There are also ruins in the plain a short distance north of the tell. There are doubtless other remains, but they are now covered with grass and jungle. At the western base of the tell is the great fountain, and there is a smaller one within the cup, shaded by noble oak-trees (Porter, *Damascus*, i, 303). About a quarter of an hour north, Burckhardt noticed ruins of ancient habitations; and the hill which overhangs the fountains appears to have been built upon, though nothing is now visible (Burckhardt, *Syria*, p. 42; Robinson, *Researches*, iii, 351–358).

3. "Dan also" stands in the A.V. as the rendering of דָּן (*Vedan*, lit. *and Dan;* Sept. translates undistinguishably), an Arabian city mentioned in Ezek. xxvii, 19 as a place from which cloths, wrought iron, cassia, and other spices were brought to Tyre. By it is probably meant the city and mart of *Aden*, in connection with which Edrisi enumerates these very wares: "The town of Aden is small, but celebrated for its seaport, from which vessels sail bound for India, China, and neighboring countries, returning with cargoes of iron, Damascus sword-blades . . . . cardamom, cinnamon . . . . myrobolan . . . . and various kinds of rich figured and velvet stuffs" (i, 51). (See M'Culloch's *Gazetteer*, s. v. Aden). See VEDAN.

Dana, Daniel, D.D., a Presbyterian minister, was born at Ipswich, Mass., July 24, 1771, and was educated at Dartmouth College, where he graduated in 1788. For several years he was employed as a tutor. In 1793 he was licensed "as a qualified candidate preacher of the Gospel of Christ." In 1794 he was ordained pastor of the Presbyterian church in Newburyport, and after a successful ministry of twenty-six years was transferred to Hanover, New Hampshire, as president of Dartmouth College. He soon withdrew from that position as uncongenial with his feelings, and settled in Londonderry as pastor of the church, where he remained four years and a half. In 1826 he became pastor of the Second Presbyterian church at Newburyport, which position he resigned in 1845, in the seventy-fifth year of his age. Dr. Dana was regarded as "one of the most able, devoted, and useful ministers of the period in which he lived." He died August 26, 1859. He edited Gibbon's *Memoirs of Pious Women* (1802), and Flavel's *Works*, and published numerous tracts and sermons.—Wilson, *Presbyterian Almanac*, 1861, p. 84; *Princeton Review*, Jan. 1867; Sprague, *Life of Daniel Dana*, D.D. (Boston, 1866).

Dana, James, D.D., a Congregational minister, was born in Cambridge 1735, graduated at Harvard 1753, and in 1758 was installed pastor at Wallingford, Conn. He became pastor of the First Church, New Haven, 1789; was dismissed July 30, 1805; and died Aug. 18, 1812. He was made D.D. by the University of Edinburgh, 1768. Dr. Dana published "*An Examination of Edwards on the Will*" (anon. 1770); "*An Examination of the Same, continued*" (1773); and a number of occasional sermons. In his writings in reply to Edwards, he held "that men themselves are the only efficient causes of their own volitions; nor do they always determine according to the greatest apparent good; the affections do not follow the judgment; men sin against light, with the wiser choice, the greater good full in their view. Through the impetuosity of their passions, they determine *against* the greatest apparent good. This is the case with every sinner who resolves to delay repentance to a future time. Self-determination is the characteristic of every moral agent. The absence of liberty he deemed inconsistent with moral agency; and by liberty he meant, not merely liberty in regard to the external action, but liberty of volition; an exemption from all circumstances and causes having a controlling influence over the will—a self-determining power of man, as a real agent, in respect to his own volitions. On the whole, he regarded the scheme of Edwards as acquitting the creature of blame, and impeaching the truth and justice of the Creator."—Sprague, *Annals*, i, 565.

Danăba (Δάναβα), a small town placed by Ptolemy (v, 15, 24) in Palmyrene, a subdivision of his Cœle-Syria; also mentioned under the name *Danabe* in the war between the emperor Julian and the Persians (Zozim. *Hist.* iii, 27, 7). It does not appear to correspond to any of the three places of a similar name mentioned by Eusebius (Δαναβά, Δαννέα) and Jerome (*Onomast.* s. v. Damnaba), lying in the region of Moabitis. It was the seat of a bishopric (*Notit. Eccles.*), and has lately been identified by Porter (*Damascus*, i, 346)—from an Arabic MS. written in the 7th century by Macarius—with *Saidnâya*, now a large village at the foot of Anti-Lebanon, with a convent and extensive ruins (Van de Velde, *Memoir*, p. 306).

Danæus, or Daneau, LAMBERT, an eminent French Protestant divine, was born at Orleans, 1530. He first studied law, afterwards theology, and became minister at Geneva, and subsequently at Leyden; finally at Orthez, in Navarre, where he died in 1595. He was the first writer who treated Christian ethics separately from theology (*Ethices Christianæ lib. iii*, Genev. 1577). He was a strong Calvinist, as shown in his *Loci Communes*. He edited portions of Augustine, and wrote largely in controversy. We have in English his *Commentary on the Minor Prophets*, translated by Stockwood (Lond. 1594, 4to). See Haag, *La France Protestante*, iv, 192; *Theol. Stud. u. Krit.* 1850, p. 22.

Dance. This act is usually denoted in Heb. by some form of חוּל, *chul*, which literally signifies to *twist* (and is often applied to *writhing* under pain, as of birth, or *trembling* under fear), and hence probably refers to the *whirling* motions of the Oriental sacred dances (Judg. xxi, 21, 23; Psa. xxx, 11; cxlix, 3; cl, 4; Jer. xxxi, 4, 13; Lam. v, 15; Exod. xv, 20; xxxii, 19; Judg. xi, 34; 1 Sam. xviii, 6; xxi, 21; xxix, 5; Cant. vi, 13). A similar idea of *moving in a circle* is radically contained in the word חָגַג, *chagag'*, translated "dancing" in 1 Sam. xxx, 16. Another term thus rendered (Eccles. iii, 4, Job xxi, 11; Isa. xiii, 21; 1 Chron. xv, 29) is רָקַד, *rakad'*, which simply means to *skip* or leap for joy, as it is elsewhere rendered, and is nearly equivalent to a fourth term thus translated (2 Sam. vi, 14, 16), כָּרַר, *karar'*, which means to *jump* or spring. In the New Test. the terms translated "dance" are χορός (radically expressive of the same idea of *circular* motion), applied to a festive occasion in connection with music (Luke xv, 25), and ὀρχέομαι, literally to *leap* up and down, but conventionally used in later times to denote a regular dance according to rule, either in concert (Matt. xi, 17; Luke vii, 32) or by a single person, especially in the elaborate *pantomime* dance of Roman times (Matt. xiv, 6; Mark vi, 22). (See Smith's *Dict. of Class. Antiq.* s. v. Saltatio, Pantomimus.)

As emotions of joy and sorrow universally express themselves in movements and gestures of the body, efforts have been made among all nations, but especially among those of the South and East, in proportion as they seem to be more demonstrative, to reduce to measure and to strengthen by unison the more pleasurable—those of joy. The dance is spoken of in holy Scripture universally as symbolical of some rejoicing, and is often coupled for the sake of contrast with mourning, as in Eccles. iii, 4, "a time to mourn and a time to dance" (comp. Psa. xxx, 11; Matt. xi, 17). Children dance spontaneously (Job xxi, 11; Matt. xi, 17; Luke vii, 32).

1. At a very early period, dancing was enlisted into the service of religion among the heathen; the dance, enlivened by vocal and instrumental music, was a usual accompaniment in all the processions and festivals of the gods (Strabo, x); and, indeed, so indispensable was this species of violent merriment, that no ceremonial was considered duly accomplished—no triumph rightly celebrated, without the aid of dancing. The Hebrews, in common with other nations, had their sacred dances, which were performed on their solemn anniversaries, and other occasions of commemorating some special token of the divine goodness and favor, as means of drawing forth, in the liveliest manner, their expressions of joy and thanksgiving. The performers were usually a band of females, who, in cases of public rejoicing, volunteered their services (Exod. xv, 20; 1 Sam. xviii, 6), and who, in the case of religious observances, composed the regular chorus of the temple (Psa. cxlix, 3; cl, 4), although there are not wanting instances of men also joining in the dance on these seasons of religious festivity. Thus David deemed it no way derogatory to his royal dignity to *dance* on the auspicious occasion of the ark being brought up to Jerusalem (2 Sam. vi, 14, 16). The word used to describe his attitude is significant of violent efforts of leaping (מְכַרְכֵּר בְּכָל־עֹז, מְפַזֵּז וּמְכַרְכֵּר); and, from the apparent impropriety and indecency of a man advanced in life, above all a king, exhibiting such freaks, with no other covering than a linen ephod, many learned men have declared themselves at a loss to account for so strange a spectacle. It was, unquestionably, done as an act of religious homage; and when it is remembered that the ancient Asiatics were accustomed, in many of their religious festivals, to throw off their garments even to perfect nudity, as a symbol sometimes of penitence, sometimes of joy, and that this, together with many other observances that bear the stamp of a remote antiquity, was adopted by Mohammed, who has enjoined the pilgrims of Mecca to encompass the Kaaba clothed only with the *ihram*, we may perhaps consider the linen *ephod*, which David put on when he threw off his garments and danced before the ark, to be symbolic of the same objects as the *ihram* of the Mohammedans (see Foster's *Mohammedanism Unveiled*). The conduct of David was imitated by the later Jews, and the dance was incorporated among their favorite usages as an appropriate close of the joyous occasion of the feast of Tabernacles. "The members of the Sanhedrim, the rulers of the synagogues, doctors of schools, and all who were eminent for rank or piety, accompanied the sacred music with their voices, and leaped and danced with torches in their hands for a great part of the night, while the women and common people looked on." This strange and riotous kind of festivity was kept up till exhaustion and sleep dismissed them to their homes (Buxtorf, *De Synag. Jud.* cap. 21).

The character of the ancient dance was very different from that of ours, as appears from the conduct of Miriam, who "took a timbrel in her hand, and all the women went out after her with timbrels and with dances." Precisely similar is the Oriental dance of the present day, which, accompanied of course with music, is led by the principal person of the company, the rest imitating the steps. The evolutions, as well as the songs, are extemporaneous—not confined to a fixed rule, but varied at the pleasure of the leading dancer; and yet they are generally executed with so much grace, and the time so well kept with the simple notes of the music, that the group of attendants show wonderful address and propriety in following the variations of the leader's feet. The missionary Wolff describes a festival of some Eastern Christians, where one eminent individual, who led the song as well as the dance, conducted through the streets of the city a numerous band of people, who leaped and danced in

Arab Dance.

imitation of the gestures used by him. When the late deputation of the Church of Scotland were on their way through Palestine, their young Arab guides, to relieve the tedium of the journey, sometimes "commenced a native song and dance; one of them, advancing a little before the rest, began the song, dancing forward as he repeated the words; when the rest, following him in regular order, joined in the chorus, keeping time by a simultaneous clapping of hands. They sang several Arabian songs, responding to one another, dancing and clapping their hands." In their "dancing dervishes" the Turks seem to have adopted into their system the enthusiastic raptures, at once martial and sacred, which (e. g. in the Roman *Salii*) seem indigenous in many Southern and Eastern races from the earliest times.

In the earlier period dancing is found combined with some song or *refrain* (Exod. xv, 20; xxxii, 18, 19; 1 Sam. xxi, 11); and with the תֹּף, or tambourine (A. V. "timbrel"), more especially in those impulsive outbursts of popular feeling which cannot find sufficient vent in voice or in gesture singly. Nor is there any more strongly popular element traceable in the religion of the ancient Jews than the opportunity so given to a prophet or prophetess to kindle enthusiasm for Jehovah on momentous crises of national joy, and thus root the theocracy in their deepest feelings, more especially in those of the women, themselves most easily stirred, and most capable of exciting others. The dance was regarded even by the Romans as the worship of the body, and thus had a place among sacred things (Servius ad Virg. *Bucol.* v, 73). A similar sentiment is conveyed in Psa. xxxv, 10: "All my bones shall say, Lord, who is like unto thee?" So the "tongue" is the best member among many, the "glory" (Psa. lvii, 8) of the whole frame of flesh, every part of which is to have a share in the praises of God. Similarly among the Greeks is ascribed by Athenæus to Socrates a fragment in praise of dancing (Athen. xiv, 627; comp. Arrian, *Alex.* iv, 11). Plato certainly (*Leg.* vii, 6) reckons dancing (ὄρχησις) as part of gymnastics (γυμναστική). So far was the feeling of the purest period of antiquity from attaching the notion of effeminacy to dancing, that the ideas of this and of warlike exercise are mutually interwoven, and their terms almost correspond as synonyms (Homer, *Il.* xvi, 617; comp. Creuzer, *Symb.* ii, 367; iv, 474; and see especially Lucian, *De Salt.*, passim). Women, however, among the Hebrews made the dance their especial means of expressing their feelings; and when their husbands or friends returned from a battle on behalf of life and home, they felt that they too ought to have some share in the event, and found that share in the dance of triumph welcoming them back. The "eating, and drinking, and dancing" of the Amalekites is recorded, as is the people's "rising up to play" (צָחַק, including a revelling dance), with a tacit censure; the one seems to mark the lower civilization of the Amalekites, the other the looseness of conduct into which idolatry led the Israelites (Exod. xxxii, 6; 1 Cor. x, 7; 1 Sam. xxx, 16). So, among the Bedouins, native dances of men are mentioned (Lynch, *Dead Sea*, p. 295), and are probably an ancient custom. The Hebrews, however, save in such moments of temptation, seem to have left dancing to the women. But, more especially, on such occasions of triumph, any woman, whose nearness of kin to the champion of the moment gave her a public character among her own sex, seems to have felt that it was her part to lead such a demonstration of triumph or of welcome; so Miriam (Exod. xv, 20), and so Jephthah's daughter (Judg. xi, 34), and similarly there no doubt was, though none is mentioned, a chorus and dance of women led by Deborah, as the song of the men by Barak (comp. Judg. v, 1 with Exod. xv, 1, 20). Similarly, too, Judith (xv, 12, 13) leads her own song and dance of triumph over Holofernes. There was no such leader of the choir mentioned in the case of David and Saul. Hence, whereas Miriam "answered" the entire chorus in Exod. xv, 21, the women in the latter case "answered one another as they played" (1 Sam. xviii, 7), that "answer" embodying the sentiment of the occasion, and forming the burden of the song. The "coming out" of the women to do this (Judg. xi, 34; 1 Sam. xviii, 6; comp. "went out," Exod. xv, 20) is also a feature worthy of note, and implies the object of meeting, attending upon, and conducting home. So Jephthah's daughter met her father, the "women of all the cities" came to meet and celebrate Saul and David, and their host, but Miriam in the same way "goes out" before "Jehovah" the "man of war," whose presence seems implied. This marks the peculiarity of David's conduct when, on the return of the ark of God from its long sojourn among strangers and borderers, he (2 Sam. vi, 5–22) was himself *choregus;* and here, too, the women, with their timbrels (see especially ver. 5, 19, 20, 22), took an important share. This fact brings out more markedly the feelings of Saul's daughter Michal, keeping aloof from the occasion, and "looking through a window" at the scene. She should, in accordance with the examples of Miriam, etc., have herself led the female choir, and so come out to meet the ark and her lord. She stays with the "household" (ver. 20), and "comes out to meet" him with reproaches, perhaps feeling that his zeal was a rebuke to her apathy. It was before "the handmaids," i. e. in leading that choir which she should have led, that he had "uncovered" himself; an unkingly exposure as she thought it, which the dance rendered necessary—the wearing merely the ephod or linen tunic. The occasion was meant to be popularly viewed in connection with David's subjugation of various enemies and accession to the throne of Israel (see 1 Chron. xii, 23–xiii, 8); he accordingly thinks only of the honor of God who had so advanced him, and in that forgets self (comp. Müller, *De Davide ante Arc.* Ugolini, xxxii). From the mention of "damsels," "timbrels," and "dances" (Psa. lxviii, 25; cxlix, 3; cl, 4) as elements of religious worship, it may perhaps be inferred that David's feeling led him to incorporate in its rites that popular mode of festive celebration. This does not seem to have survived him, for as Saalschütz remarks (*Archäol. der Hebr.* i, 299), in the mention of religious revivals under Hezekiah and Josiah, no notice of them occurs; and this, although the "words," the "writing," and the "commandment of David" on such subjects are distinctly alluded to (2 Chron. xxix, 30; xxxv, 4, 15). It is possible that the banishing of this popular element, which found its vent no doubt in the idolatrous rites of Baal and Astarte (as it certainly did in those of the golden calf, Exod. xxxii, 19), made those efforts take a less firm hold on the people than they might have done, and that David's more comprehensive scheme might have retained some ties of feeling which were thus lost. On the other hand was doubtless the peril of the loose morality which commonly attended festive dances at heathen shrines. Certainly in later Judaism the dance was included among some religious festivities, e. g. the feast of tabernacles (Mishna, *Succah*, v, 3, 4), where, however, the performers were men. This was probably a mere following the example of David in the letter. Also in the earlier period of the Judges the dances of the virgins in Shiloh (Judg. xxi, 19–23) were certainly part of a religious festivity. It seems also from this last instance clear, and from the others probable, that such dances were performed by maidens apart from men, which gives an additional point to the reproach of Michal. What the fashion or figure of the dance was is a doubtful question, nor is it likely to have lacked such variety as would adapt it to the various occasions of its use. The terms employed, however, all point to dancing in a ring. In

modern Oriental dances a woman leads off the dance, the others then follow her with exact imitation of her

Oriental Dancing-girl.

artistic and graceful attitudes. A parallelism of movement is also incident to it (Saalschütz, *ib.* p. 301). Possibly Miriam so led her countrywomen. The same writer thinks that in Cant. vi, 13, the words מְחֹלַת הַמַּחֲנָיִם (A.V. "company of two armies") imply two rows of dancing girls, and that the address in the singular number, "return, return," and again in vii, 1, applies to the movements of the individual performer in a kind of *contre-danse*. This interpretation, however, does not remove the obscurities of the passage.

From being exclusively, or at least principally, reserved for occasions of religious worship and festivity, dancing came gradually to be practised in common life on any remarkable seasons of mirth and rejoicing (Jer. xxxi, 4; Psa. xxx, 11). In early times, indeed, those who perverted the exercise from a sacred use to purposes of amusement were considered profane and infamous; and hence Job introduces it as a distinguishing feature in the character of the ungodly rich, that they encouraged a taste for dancing in their families (Job xxi, 11). During the classic ages of Greece and Rome society underwent a complete revolution of sentiment on this subject, insomuch that the Grecian poets represent the gods themselves as passionately fond of the diversion (Potter's *Grec. Antiq.* ii, 400), and that not only at Rome, but through all the provinces of the empire it was a favorite pastime, resorted to not only to enliven feasts, but in the celebration of domestic joy (Luke xv, 25; Matt. xiv, 6). Notwithstanding, however, the strong partiality cherished for this inspiriting amusement, it was considered beneath the dignity of persons of rank and character to practise it. The well-known words of Cicero, that "no one dances unless he is either drunk or mad," express the prevailing sense as to the impropriety of respectable individuals taking part in it; and hence the gay circles of Rome and its provinces derived all their entertainment, as is done in the East to this day, from the exhibitions of professional dancers. Under the patronage of the emperors, and of their luxurious tributaries, like Herod, the art was carried to the utmost perfection, the favorite mode being pantomime, which, like that of the modern Almehs or Arab women, was often of the most licentious description (see Lane's *Mod. Eg.* ii, 105–9; St. John's *Nubia*, p. 268 sq.). A story of love was chosen—generally an adventure of the gods—as the plan of the dance, and the address of the performer consisted in representing, by the waving of his hands, the agility of his limbs, and the innumerable attitudes into which he threw himself, all the various passions of love, jealousy, disgust, that sway the human breast. (See at large Lucian's *Treatise on Dancing.*)

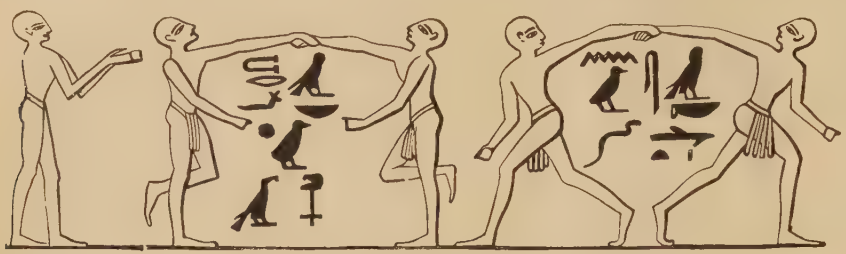
Amateur dancing in high life was, as that writer informs us, by no means uncommon in the voluptuous times of the later emperors. But in the age of Herod it was exceedingly rare and almost unheard of, and therefore the condescension of Salome, who volunteered, in honor of the anniversary of that monarch's birthday, to exhibit her handsome person as she led the mazy dance in the saloons of Machærus — for, though she was a child at this time, as some suppose (Michaelis, *Introd.*), she was still a princess—was felt to be a compliment that merited the highest reward. The folly and rashness of Herod in giving her an unlimited promise, great as they were, have been equalled and even surpassed by the munificence which many other Eastern monarchs have lavished upon favorite dancers. Shah Abbas (to mention only one anecdote of the kind), having been on a particular occasion extremely gratified with a woman who danced before him, and being at the time much intoxicated, made her a present of a magnificent khan that yielded him a considerable revenue. Next morning his minister reminded him of his extravagant liberality, whereupon, being now cool and ashamed of his folly, he sent for the dancer, and obliged her to be contented with a sum of money (Thevenot's *Trav. in Persia*, p. 100). It is by no means improbable that Herod too was flushed with wine, and that it was from fear he should retract his promise if she delayed till the morning that Herodias sent *immediately* for the head of the Baptist.

It remains to notice further that the Jewish dance was performed by the sexes separately. There is no evidence from sacred history that the diversion was promiscuously enjoyed, except it might be at the erection of the deified calf, when, in imitation of the Egyptian festival of Apis, all classes of the Hebrews intermingled in the frantic revelry. In the sacred dances,

Female Sacred Dance.—From the Egyptian Monuments.

although both sexes seem to have frequently borne a part in the procession or chorus, they remained in distinct and separate companies (Psa. lxviii, 25; Jer. xxxi, 13.

Dancing formed a part of the religious ceremonies of the Egyptians, and was also common in private entertainments (see Wilkinson's *Anc. Eg.* abridgment, i, 133 sq.). Many representations of dances both of men and women are found in the Egyptian paintings. The "feast unto the Lord," which Moses proposed to Pharaoh to hold, was really a dance (חג; see above).



Male Dance in Figures among the ancient Egyptians.

A modern Oriental dancing-party is thus described by Layard (*Nineveh*, i, 119): "The dance of the Arabs, the *Debkè*, as it is called, resembles in some respects that of the Albanians, and those who perform in it are scarcely less vehement in their gestures or less extravagant in their excitement than those wild mountaineers. They form a circle, holding one another by the hand, and, moving slowly round at first, go through a shuffling step with their feet, twisting their bodies into various attitudes. As the music quickens their movements are more active; they stamp with their feet, yell their war-cry, and jump as they hurry round the musicians. The motions of the women are not without grace; but as they insist on wrapping themselves in their coarse cloaks before they join in the dance, their forms, which the simple Arab shirt so well displays, are entirely concealed. When those who formed the debkè were completely exhausted by their exertions, they joined the lookers-on, and seated themselves on the ground. Two warriors of different tribes, furnished with shields and naked cimeters, then entered the circle, and went through the sword-dance. As the music quickened the excitement of the performers increased. The by-standers at length were obliged to interfere and to deprive the combatants of their weapons, which were replaced by stout staves. With these they belabored one another unmercifully, to the great enjoyment of the crowd. On every successful hit, the tribe to which the one who dealt it belonged set up their war-cry and shouts of applause, while the women deafened us with the shrill *tahlehl*, a noise made by a combined motion of the tongue, throat, and hand vibrated rapidly over the mouth. When an Arab or a Kurd hears this tahlehl he almost loses his senses through excitement, and is ready to commit any desperate act. A party of Kurdish jesters from the mountains entertained the Arabs with performances and imitations more amusing than refined. They were received with shouts of laughter. The dances were kept up by the light of the moon the greater part of the night."

Hebr.* (Altorf. 1726); Altenon, *De choreis Paulo interdictis* (Misen. 1744); Brömel, *Festtänze der ersten Christen* (Jen. 1701); Grünenberg, *De saltatione Christiano licita* (Rost. 1704, 1719, 1730); Purmann, *De saltatione* (Frcft. 1785); Burette (in the *Mém. de l'Acad. des Inscr.* i, 93 sq.); Bonnet, *Hist. de la Danse* (Par. 1724); Hecker, *Die Tanzwuth* (Berl. 1832). See Musical Instruments.

Dancers, a sect which appeared on the Rhine and in the Netherlands about 1374. They paraded the streets, entered houses and churches half naked, crowned with garlands, dancing and singing, uttering unknown names, falling senseless on the ground, and exhibiting other marks of demoniacal agitation. It was customary for persons of both sexes, in their public worship, to begin dancing; and, holding each other's hands, to continue their extraordinary violence till they fell down on the ground breathless. They affirmed that during these intervals of vehement agitation they were favored with wonderful visions. They evinced open contempt for the authority, rites, and doctrines of the Roman Church, and were considered as possessed with devils. The same phenomena appeared at Strasburg in 1418.—Mosheim, *Ch. Hist.* ii, 416; Gieseler, *Ch. History*, § 121.

Dancing. A form of religious dancing sometimes made part of the public worship of the early Christians. The custom was borrowed from the Jews, in whose solemn processions choirs of young men and maidens, moving in time with solemn music, always bore a part. It must not be supposed that the "religious dances" had any similarity to modern amusements; they were rather processions in which all who took part marched in time with the hymns which they sung. The custom was very early laid aside, probably because it might have led to the adoption of such objectionable dances as were employed in honor of the pagan deities. Prohibitions of dancing, as an amusement, abound in the Church fathers and in the decrees of the councils. See Bingham, *Orig. Eccl.* bk. xvi, ch. xi, § 15. On dancing as an amusement, see Crane, *On Dancing*, N. Y. 12mo.

Dandini, Girolamo, a Roman theologian and papal legate, was born at Cesena in 1554. After being professor of philosophy at the University of Paris, and professor of theology at the University of Padua, he entered the order of Jesuits, and became its provincial in Poland and at Milan. In 1596 he was sent by Clement XI as nuncio to the Maronites in order to effect their union with the Church of Rome, but in this mission he was not successful. He died at Forli Nov. 29, 1634. He is the author of a work on *Ethica Sacra* (Cesena, 1651; Antw. 1676, fol.). He also published a report on his mission to the Maronites (*Missione Apostolica al Patriarcha e Maroniti del Monte Libano* (Cesena, 1656; Paris, 1675; English, 1698). According to the French translator, Richard Simon, Dandini gave an incorrect account of the creed of the Maronites.—Pierer, *Univers. Lex.* iv, 686; Hoefer, *Biog. Gén.* xii, 910.

Danforth, Calvin, a Methodist Episcopal minister, was born at Fort Covington, Franklin Co., N. Y., Nov. 28, 1809, was licensed to exhort in 1828, entered the Oneida Conference in 1830, was superannuated in 1834, went South for his health, and took a situation in an academy at Warrenton, Ga., still retaining his connection with the Church in the North. In 1837

he served for a time as professor of mathematics in Covington Manual Labor School, but his health soon failed. By medical advice he went to St. Augustine, Fla., where he died in great peace in May, 1839. Mr. Danforth endeared himself to thousands by his piety, zeal for education, love for souls, and eloquence.—*Minutes of Conferences*, ii, 675; Gorrie, *Black River Conf. Memorial.*

Danforth, Joshua Noble, D.D., a Presbyterian minister, was born in Pittsfield, Mass., in 1792. He was educated at Williams College, and in his last year there determined to devote himself to the ministry. After three years' study in the Princeton Theological Seminary (1818–21), he took his first pastoral charge at Newcastle, Del.; his second was at the City of Washington. After a short time spent in the service of the American Colonization Society, he became pastor of a Congregational Church at Lee, Mass., and afterwards of the Second Presbyterian Church at Alexandria, Va., where he remained fifteen years. Everywhere his ministry was productive of abundant fruit. He was also a frequent writer in the periodical press. Finally he re-entered the service of the Colonization Society, and remained in it till a short time before his death, which occurred Nov. 14, 1861, at Washington. —Wilson, *Presbyterian Almanac*, 1863, p. 293.

Danforth, Samuel, a Congregational minister, was born at Framingham, Suffolk Co., England, September, 1626, and came with his father to New England in 1634. He graduated at Harvard in 1643, and was chosen tutor and fellow. In 1650 he was installed colleague pastor in Roxbury, where he labored during his life, which ended Nov. 19, 1674. He studied astronomy carefully, and published several almanacs, and astronomical and theological remarks upon the comet (1664).—Sprague, *Annals*, i, 138.

Danforth, Samuel, son of the preceding, was born Dec. 18, 1666, and graduated at Harvard College in 1683. He was one of the most learned and eminent ministers of his day. In the beginning of the year 1705, through his labors, a deep impression was made upon the minds of his people, and a revival occurred, of which an account is given in some letters of Mr. Danforth, preserved in Prince's *Christian History*. He published a eulogy on Thomas Leonard, 1713, and the election sermon, 1714. He left behind him a manuscript Indian dictionary, a part of which is now in the library of the Massachusetts Historical Society. It seems to have been formed from Eliot's Indian Bible, as there is a reference under every word to a passage of Scripture. He died Nov. 14, 1727.

Dan'iel (Heb. and Chald. *Daniyel'*, דָּנִיֵּאל; also [Ezek. xiv, 14, 20; xxviii, 3] in the shorter form *Daniel'*, דָּנְאֵל; see below), the name of at least three men.

1. (Sept. Δαμνιήλ v. r. Δαλονία, Vulg. Daniel.) King David's second son, "born unto him in Hebron," "of Abigail the Carmelitess" (1 Chron. iii, 1), B.C. cir. 1051. In the parallel passage, 2 Sam. iii, 3, he is called CHILEAB. For the Jewish explanation of the origin of the two names, see Bochart, *Hierozoic.* ii, 55, p. 663.

2. (Sept. and N. T. Δανιήλ, Josephus Δανιῆλος.) The celebrated prophet and minister at the court of Babylon, whose life and prophecies are contained in the book bearing his name. The exact meaning of the name is disputed. The full form (דָּנִיֵּאל) is probably more correct, and in this the *yod* appears to be not merely formative, but a pronominal suffix (as צוּרִיאֵל, אֲחִלִיבָה), so that the sense will be *God* is *my Judge* (C. B. Michaelis ap. Rosenmüller, *Schol.* § 1). Others interpret the word as the *Judge of God*, and the use of a *yod* formative is justified by the parallel of Melchizedek, etc. (Hitzig, § 2). This interpretation is favored by the Chaldæan name, Belteshazzar (בַּלְטְשַׁאצַּר, i, 7, i. e. *the prince of Bel*; Sept. [Theod.]; Βαλτάσαρ; Vulg. *Baltassar*), which was given to Daniel at Babylon (Dan. i, 7), and contains a clear reference to his former name. Hitzig's interpretation ("Pâla tschâçara = *Ernährer und Verzehrer*") has nothing to recommend it. Such changes have been common at all times; and for the simple assumption of a foreign name, compare Gen. xli, 45; Ezek i, 11; v, 14 (Sheshbazzar). See NAME.

Daniel was descended from one of the highest families in Judah, if not even of royal blood (Dan. i, 3; comp. Josephus, *Ant.* x, 10, 1; of Zedekiah, according to Epiphan. *Opp.* ii, 242). Jerusalem was thus probably his birth-place, though the passage (Dan. ix, 24) quoted in favor of that opinion is considered by many commentators as not at all conclusive. He appears to have possessed considerable personal endowments (Dan. i, 4). He was taken to Babylon (while yet a boy, according to Jerome, *adv. Jovin.* i, 276, ed. Ven.; of twelve years, says Ignatius, *ad Magnes.* p. 56, ed. Cotel.), together with three other Hebrew youths of rank, Ananiah, Mishael, and Azariah, at the first deportation of the people of Judah in the fourth year of Jehoiakim, B.C. 606. He and his companions were obliged to enter the service of the royal court of Babylon, on which occasion he received the Chaldæan name BELTESHAZZAR (q. v.), according to Eastern custom when a change takes place in one's condition of life, and more especially if his personal liberty is thereby affected (comp. 2 Kings xxiii, 34; xxiv, 17; Esth. ii, 7; Ezra v, 14). In this his new career, Daniel received that thorough polish of education which Oriental etiquette renders indispensable in a courtier (comp. iii, 6; Plato, *Alcib.* § 37), and was more especially instructed "in the writing and speaking Chaldæan" (Dan. i, 4), that is, in the dialect peculiar to the Chaldæans. See CHALDEE LANGUAGE. In this dialect were composed all the writings of the ecclesiastical order, containing the substance of all the wisdom and learning of the time, and in the knowledge of which certainly but few favored laymen were initiated. That Daniel had distinguished himself, and already at an early period acquired renown for high wisdom, piety, and strict observance of the Mosaic law (comp. Ezek. xiv, 14, 20; xxviii, 3; Dan. i, 8–16), is too evident from passages in the truly authentic Scriptures to require any additional support from the ill-warranted apocryphal stories concerning the delivery of Susannah by the wisdom of the lad Daniel, etc. A proper opportunity for evincing both the acuteness of his mind and his religious notions soon presented itself in the custom of the Eastern courts to entertain the officers attached to them from the royal table (Athenæus, iv, 10, p. 145, ed. Casaub.). Daniel was thus exposed to the temptation of partaking of unclean food, and of participating in the idolatrous ceremonies attendant on heathen banquets. Like Joseph in earlier times, he gained the favor of his guardian, and was divinely supported in his resolve to abstain from the "king's meat" for fear of defilement (Dan. i, 8–16). His prudent proceedings, wise bearing, and absolute refusal to comply with such customs, were crowned with the divine blessing, and had the most important results. Another reason of a sanitary nature may also be assigned for this temperance, as it is probable he was at this time undergoing the curative process after emasculation, in accordance with the barbarous custom of Oriental courts. See EUNUCH.

At the close of his three years' discipline (Dan. i, 5, 18), Daniel had an opportunity of exercising his peculiar gift (Dan. i, 17) of interpreting dreams (comp. Herod. i, 34; Diod. Sic. ii, 29) on the occasion of Nebuchadnezzar's decree against the Magi (Dan. ii, 14 sq.). In consequence of his success, by the divine aid —like Joseph of old in Egypt—he rose into high fa-

vor with the king, and was intrusted with two important offices — the governorship of the province of Babylon, and the head-inspectorship of the sacerdotal caste (Dan. ii). See MAGI. Considerably later in the reign of Nebuchadnezzar we find Daniel interpreting another dream of the king's, to the effect that, in punishment of his pride, he was to lose for a time his throne, but to be again restored to it after his humiliation had been completed (Dan. iv). Here he displays not only the most touching anxiety, love, loyalty, and concern for his princely benefactor, but also the energy and solemnity becoming his position, pointing out with vigor and power the only course left for the monarch to pursue for his peace and welfare. Under the unworthy successors of Nebuchadnezzar, Daniel and his merits seem to have been forgotten, and he was removed from his high posts. His situation at court appears to have been confined to a very inferior office (comp. Dan. viii, 27); neither is it likely that he should have retained his rank as head inspector of the *order of the Magians* in a country where these were the principal actors in effecting changes in the administration whenever a new succession to the throne took place. We thus lose sight of Daniel until the first year of king Belshazzar (Dan. v, 7, 8), when he was both alarmed and comforted by two remarkable visions (Dan. vii, viii), which disclosed to him the future course of events, and the ultimate fate of the most powerful empires in the world, but in particular their relations to the kingdom of God, and its development to the great consummation. He afterwards interpreted the handwriting on the wall which disturbed the feast of Belshazzar (v, 10-28), though he no longer held his official position among the magi (Dan. v, 7, 8, 12), and probably lived at Susa (Dan. viii, 2; comp. Joseph. *Ant.* x, 11, 7; Bochart, *Geogr. Sacr.* iii, 14). After the conquest of Babylon by the united powers of Media and Persia, Daniel, being made first of the "three presidents" of the empire (comp. 1 Esdr. iii, 9), seriously busied himself under the short reign (two years) of Darius the Mede or Cyaxares II with the affairs of his people and their possible return from exile, the term of which was fast approaching, according to the prophecies of Jeremiah. In deep humility and prostration of spirit he then prayed to the Almighty, in the name of his people, for forgiveness of their sins, and for the Divine mercy in their behalf; and the answering promises which he received far exceeded the tenor of his prayer, for the visions of the seer were extended to the end of Judaism (Dan. ix). In a practical point of view, also, Daniel appeared at that time a highly-favored instrument of Jehovah. Occupying, as he did, one of the highest posts of honor in the state, the strictness and scrupulousness with which he fulfilled his official duties could not fail to rouse envy and jealousy in the breasts of his colleagues, who well knew how to win the weak monarch, whom they at last induced to issue a decree imposing certain acts, the performance of which they well knew was altogether at variance with the creed of which Daniel was a zealous professor (comp. the apocryphal Bel and the Dragon). For his disobedience the prophet suffered the penalty specified in the decree; he was thrown into a den (q. v.) of lions, but was miraculously saved by the mercy of God—a circumstance which enhanced his reputation, and again raised him to the highest posts of honor. He had at last the happiness to see his most ardent wishes accomplished—to behold his people restored to their own land. Though his advanced age would not allow him to be among those who returned to Palestine, yet did he never for a moment cease to occupy his mind and heart with his people and their concerns (Dan. x, 12). At the accession of Cyrus he still retained his prosperity (vi, 28; comp. i, 21; Bel and Dr. 2), though he does not appear to have remained at Babylon (comp. Dan. i, 21). In the third year of Cyrus he had a series of visions, in which he was informed of the minutest details respecting the future history and sufferings of his nation, to the period of their true redemption through Christ, as also a consolatory notice to himself to proceed calmly and peaceably to the end of his days, and then await patiently the resurrection of the dead at the end of time.

From that period the accounts respecting Daniel are vague and confused (see Prideaux, *Connection*, i, 206). According to the Mohammedan tradition (D'Herbelot. *Bibl. Or.* i, 561) he returned to Judæa, held the government of Syria, and finally died at Susa (Rosenmüller, *Schol.* p. 5, n.), where his tomb is still shown (Ouseley's *Trav. in Persia*, i, 422; iii, 564), and is visited by crowds of pilgrims (see Loftus, *Trav. in Chaldæa*, p. 320 sq.). Ezekiel mentions Daniel as a pattern of righteousness (xiv, 14, 20) and wisdom (xxviii, 3); and since Daniel was still young at that time, some have thought that another prophet of the name must have lived at some earlier time (Bleek), perhaps during the captivity of Nineveh (Ewald, *Die Propheten*, ii, 560), whose fame was transferred to his later namesake. Hitzig imagines (*Vorbemerk.* § 3) that the Daniel of Ezekiel was purely a mythical personage, whose prototype is to be sought in Melchizedek, and that the character was borrowed by the author of the book of Daniel as suited to his design. These suppositions are favored by no internal probability, and are unsupported by any direct evidence. The order of the names "Noah, Daniel, and Job" (Ezek. xiv, 14) seems to suggest the idea that they represent the first and last historic types of righteousness before the law and under it, combined with the ideal type (comp. Delitzsch, p. 271). On the other hand, the narrative in Dan. i, 11 implies that Daniel was conspicuously distinguished for purity and knowledge at a very early age (comp. the apocryphal Hist. of Susan. 45), and he may have been nearly forty years old at the time of Ezekiel's prophecy (B.C. 592). See Alexander, *De Daniele* (in his *Hist. Eccles.* iii, 566); Robinson, *Script. Char.* ii; M'Gavin, *Life of Daniel* (1832); Evans, *Script. Biog.* ii, 174; Williams, *Char. of O. T.* p. 301; Kennedy, *Daniel, his Life and its Lessons* (Lond. 1858); Knox, *Reflections on Daniel's Life and Character* (Lond. 1849). See PROPHET.

Allusion has been made above to the comparison which may be instituted between Daniel and Joseph, who stand at the beginning and the close of the divine history of the Jews as representatives of the true God in heathen courts (Auberlen, *Daniel*, p. 32, 33). In this respect the position of Daniel must have exercised a powerful influence upon the form of the revelations conveyed through him; and in turn the authority which he enjoyed renders the course of the exile and the return clearly intelligible. By station, by education, and by character, he was peculiarly fitted to fulfil the work assigned to him. He was not only a resident in a foreign land, like Jeremiah or Ezekiel, but the minister of a foreign empire, and of successive dynasties (Dan. ii, 48; vi, 28). His political experience would naturally qualify him to give distinct expression to the characteristics of nations in themselves, and not only in their relation to God's people. His intellectual advantages were as remarkable as his civil dignity. Like the great lawgiver who was "trained in all the wisdom of the Egyptians," the great seer was trained in the secrets of Chaldæan wisdom, and placed at the head of the school of the Magi (Dan. ii, 48). He was thus enabled to preserve whatever was true in the traditional teaching of the East, and to cast his revelations into a form suited to their special character. But, though engaged in the service of a heathen prince and familiar with Oriental learning, Daniel was from the first distinguished by his strict observance of the Mosaic law (i, 8-16; comp. vi, 10, 11). In this way the third outward condition for his work was satisfied, and at the close of the exile he offered a pattern of holiness for the instruction of the Dispersion

of after times (comp. Auberlen, *Daniel*, p. 24, etc.). See DANIEL, BOOK OF.

Various apocryphal fragments attributed to Daniel are collected by Fabricius (*Cod. Pseud. V. T.* i, 1124), and his wisdom is extravagantly lauded by the Rabbins (Gemara, *Yoma*); but it is surprising that his fame in later times seems to have been obscured (Hottinger, *Hist. Orient.* 92). Comp. Epiph. *Vit. Dan.* ii, p. 243, ed. Petav.; *Vit. Dan.* ap. Fabric.; Josephus, *Ant.* x, 11, 7. See DANIEL, APOCRYPHAL ADDITIONS TO.

DANIEL, BOOK OF. This important and in many respects remarkable book takes its name not only from the principal person in it, but also and chiefly from him as its real author, there being no just cause of doubt that, as the book itself testifies, it was composed by Daniel (comp. vii, 1, 28; viii, 2; ix, 2). It occupies, however, but a third rank in the Hebrew canon; not among the *Prophets*, but in the *Hagiographa*, owing apparently to the correct view of the composers of the canon, that Daniel did not exercise his prophetic office in the more restricted and proper sense of the term "prophecy," but stood to the theocracy in a different relation from those real prophets whose calling and profession consisted exclusively in declaring the messages they received, and in the communion which they held with God. These latter are termed, in the ancient Hebrew idiom, נְבִיאִים, *prophets*, in contradistinction to חֹזִים, *seers*, who, though they were equally favored with divine revelations, were nevertheless not prophets by *profession*, a calling that claimed the entire service of a man's whole life. See CANON. The Babylonian exile supplied the outward training and the inward necessity for this last form of divine teaching; and the prophetic visions of Ezekiel form the connecting link between the characteristic types of revelation and prophecy (comp. Lucke, *Versuch*, i, 17 sq.; Hitzig, *Daniel, Vorbem.* § 9; Hilgenfeld, *Die Jud. Apok.* 1 sq.). This book has given rise to many and various polemical discussions both in ancient and modern times.

1. The book of Daniel divides itself into two parts, *historical* (ch. i–vi) and *prophetic* (ch. vii–xii), arranged respectively in chronological order. In the first seven chapters, accordingly, Daniel is spoken of *historically* (i, 8–21; ii, 14–49; iv, 8–27; v, 13–29; vi, 2–28; vii, 1, 2); in the last five he appears *personally* as the writer (vii, 15–28; viii, 1–ix, 22; x, 1–19; xii, 5). Its object is by no means to give a summary historical account of the period of the exile, or of the life of Daniel himself, since it contains only a few isolated points both as to historical facts and prophetic revelations. But the plan or tendency which so consistently runs through the whole book is of a far different character; it is to show the extraordinary and wonderful means which the Lord made use of, in a period of the deepest misery, when the theocracy *seemed* dissolved and fast approaching its extinction, to afford assistance to his people, proving to them that he had not entirely forsaken them, and making them sensible of the fact that his merciful presence still continued to dwell with them, even without the Temple and beyond the Land of Promise.

The wonders related in Daniel (ch. i–vi) are thus mostly of a peculiar, prominent, and striking character, and resemble in many respects those performed of old time in Egypt. Their divine tendency was, on the one hand, to lead the heathen power, which proudly fancied itself to be the conqueror of the theocracy, to the acknowledgment that there was an essential difference between the *world* and the *kingdom of God;* and, on the other, to impress degenerate and callous Israel with the full conviction that the power of God was still the same as it was of old in Egypt.

The following are the essential features of the prophetic tenor of the book of Daniel, while the visions in ch. ii and vii, together with their different symbols, may be considered as embodying the leading notion of the whole. The development of the whole of the heathen power, until the completion and glorification of the kingdom of God, appeared to the prophet in the shape of four powers of the world, each successive power always surpassing the preceding in might and strength, namely, the Babylonian, Medo-Persian, Greek, and Syrian (otherwise Roman). The kingdom of God proves itself conqueror of them all; a power which alone is everlasting, and showing itself in its utmost glorification in the appearance of the Messiah, as Judge and Lord of the world. Until the coming of the Messiah, the people of God have yet to go through a period of heavy trials. That period is particularly described, ch. viii and xi, in the struggles of the Maccabæan time, illustrative of the last and heaviest combats which the kingdom of God would have to endure. The period until the appearance of the Messiah is a fixed and sacred number—seventy weeks of years (ch. ix). After the lapse of that period ensues the death of the Messiah; the expiation of the people is realized; true justice is revealed, but Jerusalem and the Temple are in punishment given up to destruction. The true rise from this fall and corruption ensues only at the end of time, in the general resurrection (ch. xii).

The interpretation of Daniel has hitherto proved an inexhaustible field for the ingenuity of commentators, and the certain results are comparatively few. According to the traditional view, which appears as early as the fourth book of Ezra [see ESDRAS] and the epistle of Barnabas (ch. iv), the four empires described in ch. ii and vii are the Babylonian, the Medo-Persian, the Greek, and the Roman. With nearly equal consent it has been supposed that there is a change of subject in the eleventh chapter (xi, 31 sq.), by which the seer passes from the persecutions of Antiochus to the times of Antichrist. A careful comparison of the language of the prophecy with the history of the Syrian kings must, however, convince every candid student of the text that the latter hypothesis is wholly unfounded and arbitrary. The whole of the eleventh chapter forms a history of the struggles of the Jewish Church with the Greek powers up to the death of its great adversary (xi, 45). This conflict, indeed, has a typical import, and foreshows in its characteristic outlines the abiding and final conflict of the people of God and the powers of evil, so that the true work of the interpreter must be to determine historically the nature of each event signalized in the prophetic picture, that he may draw from the past the lesson of the future. The traditional interpretation of "the four empires" seems to spring from the same error as the other, though it still finds numerous advocates (Hofmann, Auberlen, Keil, Hävernick, Hengstenberg, and most English commentators). It originated at a time when the triumphant advent of Messiah was the object of immediate expectation, and the Roman empire appeared to be the last in the series of earthly kingdoms. The long interval of conflict which has followed the first Advent formed no place in the anticipations of the first Christians, and in succeeding ages the Roman period has been unnaturally prolonged to meet the requirements of a theory that took its rise in a state of thought which experience has proved false. See HORN, LITTLE.

The parallel character and striking fulfilment of Daniel's predictions, many of which are carried out with a detail elsewhere unknown, may be seen from the following synoptical table. Those relating to the seventy weeks (ch. ix, 24–27) will be treated separately under that head.

2. The language of the book is partly Chaldee (ii, 4; vii, 28) and partly Hebrew. The latter is not unlike that of Ezekiel, though less impure and corrupt, and not so replete with anomalous grammatical forms. The Chaldee is noways that of the Chaldæans *proper*,

HARMONY OF DANIEL'S PROPHECIES OF THE

HISTORY.	CHAP. II.	CHAP. II.	CHAP. VII.
I. *Babylonian Empire.*			
This is depicted at its acme under Nebuchadnezzar, who attained the universal sovereignty of Western Asia and Egypt. Griffins or winged lions are a common emblem on the Assyrian sculptures. The empire subsequently degenerated, and, at the same time, became more civilized.	31 Thou, O king, sawest, and behold a great image. This great image, whose brightness *was* excellent, stood before thee; and the form thereof *was* terrible. 32 This image's head *was* of fine gold,	37 Thou, O king, *art* a king of kings: for the God of heaven hath given thee a kingdom, power, and strength, and glory. 38 And wheresoever the children of men dwell, the beasts of the field and the fowls of the heaven hath he given into thine hand, and hath made thee ruler over them all. Thou *art* this head of gold.	2 Daniel spake and said, I saw in my vision by night, and, behold, the four winds of the heaven strove upon the great sea. 3 And four great beasts came up from the sea, diverse one from another. 4 The first *was* like a lion, and had eagle's wings: I beheld till the wings thereof were plucked, and it was lifted up from the earth, and made stand upon the feet as a man, and a man's heart was given to it.
II. *Persian Empire.*			
The original element was Media, where bears abound. Persia was the higher horn and more elevated side. The three ribs are probably Lydia, Assyria, and Babylonia, which were successively absorbed by Cyrus. He was victorious in every direction except eastward. The kings following him were: 1. Cambyses; 2. Smerdis; 3. Darius Hystaspis; 4. Xerxes, who first exerted all his resources against Greece.	his breast and his arms of silver,	39 And after thee shall arise another kingdom inferior to thee,	5 And behold another beast, a second, like to a bear, and it raised up itself on one side, and *it had* three ribs in the mouth of it between the teeth of it: and they said thus unto it, Arise, devour much flesh.
III. *Macedonian Empire.*			
Copper denotes the mercenary Greeks. The leopard represents their slyness and pertinacity. The four wings are indicative of double velocity. Alexander marched with unexampled rapidity. He was the sole ruler of his dynasty. His dominions were divided, shortly after his premature death, between, 1. Ptolemy, in Egypt and the Mediterranean coast; 2. Seleucus, in Asia; 3. Lysimachus, in Thrace; 4. Cassander, in Greece.	his belly and his thighs of brass,	and another third kingdom of brass, which shall bear rule over all the earth.	6 After this I beheld, and lo another, like a leopard, which had upon the back of it four wings of a fowl; the beast had also four heads; and dominion was given to it.
IV. *Syrian Monarchy.*			
This was of a mongrel character, the native Oriental element corresponding to the clay, and the foreign Greek to the iron. These were combined in all sorts of affinities. The ten toes may symbolize the numerous satrapies which fell to the share of Seleucus. This dynasty is depicted as fierce, from contrast with the lenient governments preceding, and especially from its intolerance towards the Jewish religion.	33 His legs of iron, his feet part of iron and part of clay.	40 And the fourth kingdom shall be strong as iron: forasmuch as iron breaketh in pieces and subdueth all *things:* and as iron that breaketh all these, shall it break in pieces and bruise. 41 And whereas thou sawest the feet and toes, part of potters' clay, and part of iron, the kingdom shall be divided; but there shall be in it of the strength of the iron, forasmuch as thou sawest the iron mixed with miry clay. 42 And *as* the toes of the feet *were* part of iron and part of clay, *so* the kingdom shall be partly strong and partly broken. 43 And whereas thou sawest iron mixed with miry clay, they shall mingle themselves with the seed of men: but they shall not cleave one to another, even as iron is not mixed with clay.	7 After this I saw in the night visions, and behold a fourth beast, dreadful and terrible, and strong exceedingly; and it had great iron teeth: it devoured and brake in pieces, and stamped the residue with the feet of it: and it *was* diverse from all the beasts that *were* before it;
1. *Seleucus Nicator* was originally Ptolemy's general at Babylon, but soon managed to secure not only the entire East, but also the province of Syria (including Palestine). 2. *Antiochus Soter* was engrossed with subduing the Gauls. 3. *Antiochus Theos* made peace with Ptolemy Philadelphus by marrying Berenice, his daughter; but soon repudiated her in favor of Laodice, his former wife, who revenged herself by poisoning him and killing her rival with her infant.			and it had ten horns.
Berenice's brother, Ptolemy Euergetes, avenged her death by invading Syria, carrying away immense spoil.			
4. *Seleucus Callinicus* attempted to retaliate by attacking the Egyptian provinces [translate, ver. 9, "And he (the king of the north) shall come into the kingdom of the king of the south"], but was forced to retire with defeat. 5. *Seleucus Ceraunus*, his son, renewed the attempt, but was slain; and his brother, 6. *Antiochus the Great*, pushed the campaign to the border of Egypt.			
This roused Ptolemy Philopator, who assembled an army, with which he totally routed Antiochus at Gaza; but he then concluded a truce with him.			
Fourteen years afterwards, Antiochus returned with the spoils of his Eastern campaigns to renew his designs against			

FOUR GREAT ORIENTAL KINGDOMS.

CHAP. VII.

17 These great beasts, which are four, *are* four kings, *which* shall arise out of the earth.

19 Then I would know the truth of the fourth beast, which was diverse from all the others, exceeding dreadful, whose teeth *were of* iron, and his nails *of* brass; *which* devoured, brake in pieces, and stamped the residue with his feet.

20 And of the ten horns that *were* in his head,

CHAP. VII.

23 Thus he said, The fourth beast shall be the fourth kingdom upon earth, which shall be diverse from all kingdoms, and shall devour the whole earth, and shall tread it down, and break it in pieces.

24 And the ten horns out of this kingdom *are* ten kings *that* shall arise:

CHAP. VIII.

3 Then I lifted up mine eyes, and saw, and, behold, there stood before the river a ram which had *two* horns: and the *two* horns *were* high; but one *was* higher than the other, and the higher came up last.

4 I saw the ram pushing westward, and northward, and southward; so that no beasts might stand before him, neither *was there any* that could deliver out of his hand; but he did according to his will, and became great.

5 And as I was considering, behold, a he-goat came from the west on the face of the whole earth, and touched not the ground: and the goat *had* a notable horn between his eyes.

6 And he came to the ram that had *two* horns, which I had seen standing before the river, and ran unto him in the fury of his power.

7 And I saw him come close unto the ram, and he was moved with choler against him, and smote the ram, and brake his two horns: and there was no power in the ram to stand before him, but he cast him down to the ground, and stamped upon him: and there was none that could deliver the ram out of his hand.

8 Therefore the he-goat waxed very great: and when he was strong, the great horn was broken; and for it there came up four notable ones toward the four winds of heaven.

CHAP. VIII.

20 The ram which thou sawest having *two* horns *are* the kings of Media and Persia.

21 And the rough goat *is* the king of Grecia: and the great horn that *is* between his eyes *is* the first king.

22 Now that being broken, whereas four stood up for it, four kingdoms shall stand up out of the nation, but not in his power.

CHAP. XI.

2 And now will I show thee the truth. Behold, there shall stand up yet three kings in Persia; and the fourth shall be far richer than *they* all: and by his strength through his riches he shall stir up all against the realm of Grecia.

3 And a mighty king shall stand up, that shall rule with great dominion, and do according to his will.

4 And when he shall stand up, his kingdom shall be broken, and shall be divided toward the four winds of heaven; and not to his posterity, nor according to his dominion which he ruled: for his kingdom shall be plucked up, even for others besides those.

5 And the king of the south shall be strong, and *one* of his princes; and he shall be strong above him, and have dominion; his dominion *shall be* a great dominion.

6 And in the end of years they shall join themselves together; for the king's daughter of the south shall come to the king of the north to make an agreement: but she shall not retain the power of the arm; neither shall he stand, nor his arm: but she shall be given up, and they that brought her, and he that begat her, and he that strengthened her in *these* times.

7 But out of a branch of her roots shall *one* stand up in his estate, which shall come with an army, and shall enter into the fortress of the king of the north, and shall deal against them, and shall prevail.

8 And shall also carry captives into Egypt their gods, with their princes, *and* with their precious vessels of silver and of gold; and he shall continue *more* years than the king of the north.

9 So the king of the south shall come into *his* kingdom, and shall return into his own land.

10 But his sons shall be stirred up, and shall assemble a multitude of great forces: and *one* shall certainly come, and overflow, and pass through: then shall he return, and be stirred up, *even* to his fortress.

11 And the king of the south shall be moved with choler, and shall come forth and fight with him, *even* with the king of the north: and he shall set forth a great multitude; but the multitude shall be given into his hand.

12 *And* when he hath taken away the multitude, his heart shall be lifted up; and he shall cast down *many* ten thousands: but he shall not be strengthened *by it*.

13 For the king of the north shall return, and shall set forth a multitude greater than the former, and shall certainly come after certain years with a great army and with much riches.

the Egyptian provinces, and, with the assistance of a party of the Jews, he defeated the Egyptian general at the sources of the Jordan, besieged and captured the remainder of the Egyptian force in Zidon, and got full possession of Palestine. He now concluded a hollow alliance with Ptolemy Epiphanes, giving him his daughter Cleopatra, with the Palestinian provinces as a dowry, hoping that she would favor his purposes, an expectation in which he was ultimately disappointed. He then

turned his arms against the Greek colonies of Asia Minor and the Ægæan till checked by the Romans under Scipio, who compelled him to sue for peace on the most humiliating terms. He was killed while attempting to plunder a temple in his own dominions. 7. *Seleucus Philopator* was engrossed with efforts to raise the enormous fine imposed by the Romans upon his father as the price of peace, and was at length assassinated by his minister, 8. *Heliodorus*, who held the throne a short time, although, 9. *Demetrius Soter*, son of the last king, was rightfully heir, and, 10. *Ptolemy Philometor* was entitled to the Palestinian provinces by virtue of his mother's dower right.

11. ANTIOCHUS EPIPHANES, brother of Seleucus, artfully and quietly secured the succession, expelling Heliodorus, and ignoring the claims of his nephews Demetrius and Ptolemy. (Daniel styles him "vile," in contrast with his surname "illustrious," and notes the Hellenizing corruptions of his reign in Judæa, as detailed below.) The guardians of the latter

prince resenting this, a struggle ensued, in which Antiochus twice defeated the Egyptians in a pitched battle on their own borders. He then pretended to make a truce with them, but only used it as a cover for entering Egypt with a small force, and seizing quietly upon the capital and other points. On his

return from his second campaign into Egypt, he endeavored to carry out the scheme of introducing Greek customs among the Jews. In a third campaign he continued his successes, and in a fourth he was likely to capture Alexandria and reduce the whole Egyptian power, when he was peremptorily ordered to desist by the Romans. On is way home he vented his cha-

grin at this interference upon the unhappy Jews, in whose quarrels he meddled, deposing the high-priest, abolishing the sacrificial offerings, interdicting the ritual, and bitterly persecuting all who refused to apostatize to paganism. The Temple remained closed to all but heathen victims for three years and a half (1290 days), and was shortly afterwards rededicated on Dec. 25, B.C. 165 (making 1335 days), six and a half years (2300 days) from the first act of profanation in the removal of the legitimate pontiff. Antiochus's disregard for even the native deities is evident from his renewal of his father's attempt to plunder the temple of the Syrian Venus. Yet he made the most violent efforts to introduce the worship of Jupiter Capitolinus.

The remainder of his reign is obscure, owing to the nearly total loss of the ancient records concerning it. We have therefore but slight intimations of the final expedition against Egypt, etc., referred to by Daniel as being so successful. It is certain, however, that the last act of his reign was a campaign in the north-eastern provinces, and that he perished miserably (one account says as a raving maniac) as he was hastening to the support of his generals, who had been defeated by the Jewish patriots and zealots. The Maccabees had raised the standard of civil and religious liberty in Judæa, and, after a long and severe struggle, the Jews secured their independence. This they retained for a century, a period of great political and spiritual prosperity in general, which Daniel and the other prophets speak of in such glowing terms as being introductory to the Messianic times, the Gospel "kingdom of Heaven," never to end.

CHAP. II.	CHAP. II.	CHAP. VII.	CHAP. VII.
		8 I considered the horns, and, behold, there came up among them another little horn, before whom there were three of the first horns plucked up by the roots: and, behold, in this horn *were* eyes like the eyes of man, and a mouth speaking great things.	and *of* the other which came up, and before whom three fell; even *of* that horn that had eyes, and a mouth that spake very great things, whose look *was* more stout than his fellows.
			11 I beheld then, because of the voice of the great words which the horn spake,
34 Thou sawest till that a stone was cut out without hands, which smote the image upon his feet *that were* of iron and clay, and brake them to pieces. 35 Then was the iron, the clay, the brass, the silver, and the gold, broken to pieces together, and became like the chaff of the summer threshing-floors: and the wind carried them away, that no place was found for them:	44 And in the days of these kings shall the God of heaven set up a kingdom which shall never be destroyed: and the kingdom shall not be left to other people, *but* it shall break in pieces and consume all these kingdoms, and it shall stand forever. 45 Forasmuch as thou sawest that the stone was cut out of the mountain without hands, and that it brake in pieces the iron, the brass, the clay, the silver, and the gold, the great God hath made known to the king what shall come to pass hereafter: and the dream *is* certain, and the interpretation of	9 I beheld till the thrones were cast down, and the Ancient of days did sit, whose garment *was* white as snow, and the hair of his head like the pure wool: his throne *was like* the fiery flame, *and* his wheels *as* burning fire. 10 A fiery stream issued and came forth from before him: thousand thousands ministered unto him, and ten thousand times ten thousand stood before him: the judgment was set, and the books were opened. 13 I saw in the night visions, and, behold, *one* like the Son of man came with the clouds of heaven, and came to the Ancient of days, and they brought him near before him. 14 And there was given him dominion, and glory, and a kingdom, that all people, nations, and languages should serve him: his dominion *is* an everlasting dominion, which shall not pass away, and his kingdom *that* which shall not be destroyed.	I beheld *even* till the beast was slain, and his body destroyed, and given to the burning flame. 12 As concerning the rest of the beasts, they had their dominion taken away: yet their lives were prolonged for a season and time.
and the stone that smote the image became a great mountain, and filled the whole earth.			18 But the saints of the Most High shall take the kingdom, and possess the kingdom forever, even forever and ever.

FOUR GREAT ORIENTAL KINGDOMS.—*(Continued.)*

Chap. VII.

and another shall rise after them; and he shall be diverse from the first, and he shall subdue three kings.

21 I beheld, and the same horn made war with the saints, and prevailed against them;
25 And he shall speak *great* words against the Most High, and shall wear out the saints of the Most High, and think to change times and laws: and they shall be given into his hand until a time and times and the dividing of time.

22 Until the Ancient of days came, and judgment was given to the saints of the Most High; and the time came that the saints possessed the kingdom.
26 But the judgment shall sit, and they shall take away his dominion, to consume and to destroy *it* unto the end.

27 And the kingdom and dominion, and the greatness of the kingdom under the whole heaven, shall be given to the people of the saints of the Most High, whose kingdom *is* an everlasting kingdom, and all dominions shall serve and obey him.

Chap. VIII.

9 And out of one of them came forth a little horn, which waxed exceeding great, toward the south, and toward the east, and toward the pleasant *land*.
11 And it waxed great, *even* to the host of heaven; and it cast down *some* of the host and of the stars to the ground, and stamped upon them.

11 Yea, he magnified *himself* even to the prince of the host, and by him the daily *sacrifice* was taken away, and the place of his sanctuary was cast down.
12 And a host was given *him* against the daily *sacrifice* by reason of transgression, and it cast down the truth to the ground; and it practised and prospered.
13 Then I heard one saint speaking, and another saint said unto that certain *saint* which spake, How long *shall be* the vision *concerning* the daily *sacrifice*, and the transgression of desolation, to give both the sanctuary and the host to be trodden under foot?
14 And he said unto me, Unto two thousand and three hundred days; then shall the sanctuary be cleansed.

Chap. VIII.

23 And in the latter time of their kingdom, when the transgressors are come to the full, a king of fierce countenance, and understanding dark sentences, shall stand up.

24 And his power shall be mighty, but not by his own power: and he shall destroy wonderfully, and shall prosper, and practise, and shall destroy the mighty and the holy people.
25 And through his policy also he shall cause craft to prosper in his hand; and he shall magnify *himself* in his heart, and by peace shall destroy many: he shall also stand up against the Prince of princes;

but he shall be broken without hand.
26 And the vision of the evening and the morning which was told *is* true: wherefore shut thou up the vision; for it *shall be* for many days.

Chap. XI.

14 And in those times there shall many stand up against the king of the south: also the robbers of thy people shall exalt themselves to establish the vision; but they shall fall.
15 So the king of the north shall come, and cast up a mound, and take the most fenced cities: and the arms of the south shall not withstand, neither his chosen people, neither *shall there be any* strength to withstand.
16 But he that cometh against him shall do according to his own will, and none shall stand before him: and he shall stand in the glorious land, which by his hand shall be consumed.
17 He shall also set his face to enter with the strength of his whole kingdom, and upright ones with him; thus shall he do: and he shall give him the daughter of women, corrupting her: but she shall not stand *on his side*, neither be for him.
18 After this shall he turn his face unto the isles, and shall take many: but a prince for his own behalf shall cause the reproach offered by him to cease; without his own reproach he shall cause *it* to turn upon him.
19 Then he shall turn his face toward the fort of his own land: but he shall stumble and fall, and not be found.
20 Then shall stand up in his estate a raiser of taxes *in* the glory of the kingdom: but within few days he shall be destroyed, neither in anger, nor in battle.
21 And in his estate shall stand up a vile person, to whom they shall not give the honor of the kingdom: but he shall come in peaceably, and obtain the kingdom by flatteries.
22 And with the arms of a flood shall they be overflown from before him, and shall be broken; yea, also the prince of the covenant.
23 And after the league *made* with him he shall work deceitfully: for he shall come up, and shall become strong with a small people.
24 He shall enter peaceably even upon the fattest places of the province; and he shall do *that* which his fathers have not done, nor his fathers' fathers; he shall scatter among them the prey, and spoil, and riches: *yea*, and he shall forecast his devices against the strong holds, even for a time.
25 And he shall stir up his power and his courage against the king of the south with a great army; and the king of the south shall be stirred up to battle with a very great and mighty army: but he shall not stand; for they shall forecast devices against him.
26 Yea, they that feed of the portion of his meat shall destroy him, and his army shall overflow: and many shall fall down slain.
27 And both these kings' hearts *shall be* to do mischief, and they shall speak lies at one table; but it shall not prosper: for yet the end *shall be* at the time appointed.
28 Then shall he return into his land with great riches; and his heart *shall be* against the holy covenant; and he shall do *exploits*, and return to his own land.
29 At the time appointed he shall return, and come toward the south; but it shall not be as the former, or as the latter.
30 For the ships of Chittim shall come against him: therefore he shall be grieved, and return, and have indignation against the holy covenant: so shall he do; he shall even return, and have intelligence with them that forsake the holy covenant.
31 And arms shall stand on his part, and they shall pollute the sanctury of strength, and shall take away the daily *sacrifice*, and they shall place the abomination that maketh desolate.
32 And such as do wickedly against the covenant shall he corrupt by flatteries: but the people that do know their God shall be strong, and do *exploits*.
33 And they that understand among the people shall instruct many: yet they shall fall by the sword, and by flame, by captivity, and by spoil, *many* days.
34 Now when they shall fall, they shall be holpen with a little help: but many shall cleave to them with flatteries.
35 And *some* of them of understanding shall fall, to try them, and to purge, and to make *them* white, *even* to the time of the end: because *it is* yet for a time appointed.
36 And the king shall do according to his will; and he shall exalt himself, and magnify himself above every god, and shall speak marvellous things against the God of gods, and shall prosper till the indignation be accomplished: for that that is determined shall be done.
37 Neither shall he regard the god of his fathers, nor the desire of women, nor regard any god: for he shall magnify himself above all.
38 But in his estate shall he honor the God of forces: and a god whom his fathers knew not shall he honor with gold, and silver, and with precious stones, and pleasant things.
39 Thus shall he do in the most strong holds with a strange god, whom he shall acknowledge *and* increase with glory: and he shall cause them to rule over many, and shall divide the land for gain.
40 And at the time of the end shall the king of the south push at him: and the king of the north shall come against him like a whirlwind, with chariots, and with horsemen, and with many ships; and he shall enter into the countries, and shall overflow and pass over.
41 He shall enter also into the glorious land, and many *countries* shall be overthrown: but these shall escape out of his hand, *even* Edom, and Moab, and the chief of the children of Ammon.
42 He shall stretch forth his hand also upon the countries: and the land of Egypt shall not escape.
43 But he shall have power over the treasures of gold and of silver, and over all the precious things of Egypt: and the Libyans and the Ethiopians *shall be* at his steps.
44 But tidings out of the east and out of the north shall trouble him: therefore he shall go forth with great fury to destroy, and utterly to make away many.
45 And he shall plant the tabernacles of his palace between the seas in the glorious holy mountain; yet he shall come to his end, and none shall help him.

Chap. XII.

7 And I heard the man clothed in linen, which was upon the waters of the river, when he held up his right hand and his left hand unto heaven, and sware by him that liveth forever, that *it shall be* for a time, times, and a half; and when he shall have accomplished to scatter the power of the holy people, all these *things* shall be finished.

Chap. XII.

10 Many shall be purified, and made white, and tried; but the wicked shall do wickedly: and none of the wicked shall understand; but the wise shall understand.
11 And from the time *that* the daily *sacrifice* shall be taken away, and the abomination that maketh desolate set up, *there* shall *be* a thousand two hundred and ninety days.
12 Blessed *is* he that waiteth, and cometh to the thousand three hundred and five and thirty days.

but a corrupt vernacular dialect, a mixture of Hebrew and Aramaic, formed during the period of the exile. It resembles mostly the Chaldee pieces in Ezra, but differs greatly from the dialect of the later Targums (see Hilgenfeld, *Esra u. Dan. und ihre neuesten Bearbeitungen*, Halle, 1863). See CHALDEE LANGUAGE.

The style is, even in the prophetic parts, more prosaic than poetical, as Lowth has already observed. The historical descriptions are usually very broad and prolix in details; but the prophecies have a more rhetorical character, and their delivery is frequently somewhat abrupt; their style is descriptive, painting with the most lively colors the still fresh impression which the vision has made on the mental eye.

3. The *unity* of the book has been disputed by several critics, and more especially by Eichhorn and Bertholdt, who conceived it to have been written by more than one author, on account of some contradictions which they thought they had discovered in it, such as in i, 21, compared with x, 1; and in i, 5–18, compared with ii, 1. With regard to the first supposed contradiction, we consider the meaning of i, 21, to be that Daniel had lived to see the first year of the reign of Cyrus, as a particularly memorable, and, for the exiled people, a very important year. This does by no means exclude the possibility of his having lived still longer than up to that period.

Respecting the second presumed contradiction, the matter in ch. i, 5–18, belongs properly to the co-regency of Nebuchadnezzar, which term is there added to his period of government, while in ch. ii, 1, his reign is counted only from the year of his actual accession to the throne. These attempts to disturb the harmony of the work are also discountenanced by the connecting thread which evidently runs through the whole of the book, setting the single parts continually in mutual relation to each other. Indeed, most critics have now given up that hypothesis, and look at the book as a closely connected and complete work in itself.

4. Much greater is the difference of opinion respecting the *authenticity* of the book. The oldest known opponent of it is the heathen philosopher Porphyry, in the third century of the Christian era. The greater the authority in which the book of Daniel was held at that time by both Jews and Christians in their various controversies, the more was he anxious to dispute that authority, and he did not disdain to devote one whole book (the twelfth)—out of the fifteen which he had composed against the Christians—to that subject alone. He there maintains that the author of the book of Daniel was a Palestinian Jew of the time of Antiochus Epiphanes, that he wrote it in Greek, and fraudulently gave to *past* events the form of prophecies. Porphyry was answered by Eusebius of Cæsarea, Methodius of Tyre, and Apollinaris of Laodicea. But their works, as well as that of Porphyry himself, are lost; and we know the latter only from the numerous quotations and refutations in the Commentary of Jerome.

Porphyry found no successor in his views until the time of the English deists, when Collins attempted to attack the authenticity of Daniel, as was done by Semler in Germany. After this a few critics, such as J. D. Michaelis and Eichhorn, disputed the authenticity of the first six chapters. The learned Swiss, Corrodi (*Freimüth. Versuch*, etc., Berlin, 1783), went still further, and, reviving the views of Porphyry, questioned the genuineness of the *whole* book. The question of the authenticity of the book is discussed in most of the later commentaries, and specially by Hengstenberg (*Die Authentie der Dan. erwiesen*, 1831, translated by Ryland, Edinb. 1847, 8vo), Hävernick (*Neue krit. Untersuch.* Hamb. 1838, 8vo), Delitzsch (in Herzog's *Encyklopädie*, s. v. 1854), Keil (*Lehrb. der Einl. in der A. T.* Frank. 1853, 8vo), Davidson (*Introduction to the O. T.* ii, Lond. 1846, 8vo), who maintain the affirmative; and by Bleek (*Berl. theolog. Zeitschr.* iii, 1822), Bertholdt (*Einleit.* Erlang. 1814), Lücke (*Versuch einer vollständ. Einl.* 2d ed. Bonn. 1852), and De Wette (*Einleit.* 7th ed. Berl. 1852), who deny its authenticity. See Ewald (*Die Proph. d. Alt. Bund.* ii, 559 sq.).

The real grounds on which most modern critics rely in rejecting the book are the "fabulousness of its narratives" and "the minuteness of its prophetic history." "The contents of the book," it is said, "are irrational and impossible" (Hitzig, § 5). It is obvious that it is impossible to answer such a statement without entering into general views of the providential government of the world. It is admitted that the contents of the book are exceptional and surprising; but revelation is itself a miracle, however it be given, and essentially as inconceivable as any miracle. There are times, perhaps, when it is required that extraordinary signs should arrest the attention of men, and fix their minds upon that Divine Presence which is ever working around them. Prodigies may become a guide to nature. Special circumstances may, and, according to the Bible, usually do determine, the peculiar form which the miraculous working of God will assume at a particular time; so that the question is, whether there is any discernible relation between the outward wonders and the moral condition of an epoch. Nor is it impossible to apply this remark to the case of Daniel. The position which he occupied was as exceptional as the book which bears his name. He survived the exile and the disappointment which attended the first hopes of the Jews. The glories which had been connected with the return in the foreshortened vision of earlier prophets were now felt to be far off, and a more special revelation may have been necessary as a preparation for a period of silence and conflict. The very character of the Babylonian exile seems to have called for some signal exhibition of divine power. As the first exodus was distinguished by great marvels, it might appear natural that the second should be also (comp. Mic. vii, 15; Delitzsch, p. 272, etc.). National miracles, so to speak, formed the beginning of the theocracy; personal miracles, the beginning of the Church. To speak of an "aimless and lavish display of wonders" is to disregard the representative significance of the different acts, and the relation which they bore to the future fortunes of the people. A new era was inaugurated by fresh signs. The Jews, now that they were left among the nations of the world, looked for some sure token that God was able to deliver them and work out his own purposes. The persecution of Antiochus completed the teaching of Daniel; and the people no longer sought without what at length they had found within. They had withstood the assault of one typical enemy, and now they were prepared to meet all. The close of special predictions coincided with the consolidation of the national faith. See ANTIOCHUS EPIPHANES.

The following are the more important of the arguments which evidence the genuineness of the book (see the works on the *Authenticity of Daniel*, by Boyle [Lond. 1863] and Waters [ib. eod.]).

(1.) The existence and authority of the book are most decidedly testified by the New Testament. Christ himself refers to it (Matt. xxiv, 15), and gives to himself (in virtue of the expression in Dan. vii, 13) the name of *Son of Man;* while the apostles repeatedly appeal to it as an authority (1 Cor. vi, 2; 2 Thess. ii, 3). Apart from the general type of apocalyptic composition which the apostolic writers derived from Daniel (Rev. *passim;* comp. Matt. xxvi, 64; xxi, 44?), the New Testament incidentally acknowledges each of the characteristic elements of the book, its miracles (Heb. xi, 33, 34), its predictions (Matt. xxiv, 15), and its doctrine of angels (Luke i, 19, 26). To the objection that Christ and the writers of the New Testament are here no *real* authority, inasmuch as they accommodate themselves to the Jewish notions and views, we reply that the genuineness of the book of Daniel is

so closely connected with the truth of its contents—in other words, that the *authenticity* of the book is so immediately connected with its *authority*—that it is impossible to doubt its *genuineness* without suspecting at the same time a wilful cheat in its contents; so that the *accommodation* in this case to national views would be tantamount to wilfully confirming and sanctioning an unpardonable fraud.

(2.) The period of the exile would be altogether incomprehensible without the existence of a man like Daniel, exercising great influence upon his own people, and effecting their return to Palestine by means of his high station in the state, as well as through the peculiar assistance of God with which he was favored. Without this assumption, it is impossible to explain the continued state of independence of the people of God during that period, or to account for the interest which Cyrus took in their affairs. The exile and its termination are indicative of uncommon acts of God towards highly-gifted and favored men; and the appearance of such a man as Daniel is described in that book as having been, is an indispensable requisite for the right understanding of this portion of the Jewish history.

(3.) An important hint of the existence of the book in the time of Alexander is found in Josephus (*Ant.* xi, 8, 4), according to which the prophecies of Daniel had been pointed out to that king on his entrance into Jerusalem. It is true that the fact may have been somewhat embellished in its details by Josephus, yet is it historically undeniable that Alexander did bestow great favors on the Jews, a circumstance which is not easily explained without granting the fact recorded by Josephus to be true in the main. See ALEXANDER (THE GREAT).

(4.) The first book of the Maccabees, which is almost contemporary with the events related in it, not only presupposes the existence of the book of Daniel, but actually betrays acquaintance with the Alexandrian version of the same (1 Macc. i, 54; comp. Dan. ix, 27; ii, 59; comp. Dan. iii), a proof that the book must have been written long before that period.

(5.) If the book had been written in the Maccabæan period, there would probably have been produced in that period some similar prophetic and apocalyptic productions, composed by Palestinian Jews. Of such, however, not the slightest notice can anywhere be found; so that our book—if of the Maccabæan time—forms an isolated enigmatical phenomenon in the later Jewish literature.

(6.) The reception of the book into the canon is also an evidence of its authenticity. In the Maccabæan age the canon had long been completed and closed; but, even doubting that point, it is not likely that, at a time when so much scrupulous adherence was shown towards all that was hallowed by time and *old* usage, and when scriptural literature was already flourishing—it is not probable, we say, that a production then recent should have been raised to the rank of a canonical book.

(7.) We have an important testimony for the authenticity of the book in Ezek. xiv, 14, 20; xxviii, 3. Daniel is there represented as an unusual character, as a model of justice and wisdom, to whom had been allotted superior divine insight and revelation. This sketch perfectly agrees with that contained in our book.

(8.) The book betrays such an intimate acquaintance with Chaldæan manners, customs, history, and religion as none but a contemporary writer can fairly be supposed to possess. Thus, e. g. the description of the Chaldæan magians and their regulations perfectly agrees with the accounts of the classics respecting them. The account of the illness and insanity of Nebuchadnezzar is confirmed by Berosus (in Joseph. *c. Apion.* i, 20). The edict of Darius the Mede (Dan. v) may be satisfactorily explained from the notions peculiar to the Medo-Persian religion, and the importance attached in it to the king, who was considered a sort of incarnate deity. The scene and characters of the book are *Oriental.* The colossal image (צֶלֶם, iii, 1, not necessarily a human figure; the term is applied familiarly to the *cross*, Buxtorf, *Lex. Rabb.* s. v.), the fiery furnace, the martyr-like boldness of the three confessors (iii, 16), the decree of Darius (vi, 7), the lions' den (vi, 7, 19, גֻּב), the demand of Nebuchadnezzar (ii, 5), his obeisance before Daniel (ii, 46), his sudden fall (iv, 33; comp. Eusebius, *Præp. Ev.* ix, 41; Joseph. *c. Ap.* i, 20), are not only consistent with the nature of Eastern life, but in many instances directly confirmed by other evidence. (See DARIUS THE MEDE for the difficulties of i, 1; ii, 1; v, 31.)

(9.) The religious views, the ardent belief in the Messiah, the purity of that belief, the absence of all the notions and ceremonial practices of later Judaism, etc., the agreement of the book in these respects with the genuine prophetic books, and more especially with the prophets in and after the exile—all this testifies to the genuineness of Daniel. In doctrine the book is closely connected with the writings of the exile, and forms a last step in the development of the ideas of Messiah (vii, 13, etc.), of the resurrection (xii, 2, 3), of the ministry of angels (viii, 16; xii, 1, etc.), of personal devotion (vi, 10, 11; i, 8), which formed the basis of later speculations, but received no essential addition in the interval before the coming of our Lord.

(10.) The linguistic character of the book is most decisive for its authenticity. In the first instance, the language in it, by turns Hebrew and Aramæan, is particularly remarkable. In that respect the book bears a close analogy to that of Ezra. The author must certainly have been equally conversant with both languages—an attainment exactly suited to a Hebrew living in the exile, but not in the least so to an author in the Maccabæan age, when the Hebrew had long since ceased to be a living language, and had been supplanted by the Aramæan vernacular dialect. The Hebrew in Daniel bears, moreover, a very great affinity to that in the other later books of the Old Testament, and has, in particular, idioms in common with Ezekiel. The Aramaic, also, in the book differs materially from the prevailing dialect of the later Chaldæan paraphrastic versions of the Old Testament, and has much more relation to the idiom of the book of Ezra. Nor is the mention of Greek musical instruments (iii, 5, 7, 10, קִיתָרֹס, *κίθαρα*; סַבְּכָא, *σαμβυκή*; סוּמְפֹנְיָה, *συμφωνία*; פְּסַנְתֵּרִין, *ψαλτήριον*), for these words only can be shown to be derived from the Greek (De Wette, *Einl.* p. 255 b.), other than suitable to a time when the intercourse of the East and West was already considerable, and when a brother of Alcæus (B.C. 600–500) had gained distinction "at the farthest end of the world, aiding the Babylonians" (Alc. *Frag.* 33, Bergk.; Brandis, in Delitzsch, p. 274). (For a full view of the criticism, history, and literature of the book of Daniel, see Stuart's *Commentary*, p. 373–496.)

5. There is no Chaldee *translation* of Daniel, and the deficiency is generally accounted for, as in the parallel case of Ezra, by the danger which would have existed in such a case of confounding the original text with the paraphrase; but, on the other hand, the whole book has been published in Hebrew. Kennicott prepared a special commentary on the Chaldee portions (ed. Schulze, Hal. 1782, 8vo); comp. Bird (*Lectures*, Lond. 1845).

The Greek version has undergone singular changes. At an early time the Sept. translation was supplanted in the Greek Bibles by that of Theodotion, which in the time of Jerome was generally "read by the churches" (c. *Ruffin.* ii, 33; *Præf. in Comm.*). This change, for which Jerome was unable to account (*Præf. in Vers. Dan.*), may have been made in consequence of

the objections which were urged against the corrupt Sept. text in controversy with Jews and heathen. The Sept. version was certainly very unfaithful (Jerome, *l. c.*); and the influence of Origen, who preferred the translation of Theodotion (Jerome *in Dan.* iv, 6), was probably effectual in bringing about the substitution (comp. Credner, *Beitr.* ii, 256 sq.). In the course of time, however, the version of Theodotion was interpolated from the Sept., so that it is now impossible to recover the original text. Comp. Wald, *Curæ in hist. textus Dan.* (Lips. 1783). See DANIEL, APOCRYPHAL ADDITIONS TO. Meanwhile the original Sept. translation passed entirely out of use, and it was supposed to have been lost till the last century, when it was published at Rome from a *Codex Chisianus* (*Daniel secundum LXX.* . . . Romæ, 1772, ed. P. de Magistris), together with that of Theodotion, and several illustrative essays. It has since been published several times (ed. Michaelis, Gotting. 1774; ed. Segaar, Utrecht, 1775; ed. Hahn, Lpz. 1845), and lastly by Tischendorf in the second edition of his Septuagint (Lips. 1856). Another recension of the text is contained in the Syro-Hexapiaric version at Milan (ed. Bugatus, 1788); but a critical comparison of the several recensions is still required. See SEPTUAGINT.

On other ancient versions, see Münter, *Spec. versionum Dan. Copticarum.* etc. (Rom. 1786); Wald, *Ueb. d. Arab. Uebers. d. Dan.* (in Eichhorn's *Repertor.* xiv, 205 sq.). See VERSIONS.

6. The *commentaries* on Daniel are very numerous. Those in Hebrew by R. Saadiah Haggaon († 942), Rashe († c. 1105), and Aben Ezra († c. 1167), are printed in the great Rabbinic Bibles of Bomberg and others. That of Abarbanel († c. 1507) has been printed separately several times (Amst. 1647, 4to), and others are enumerated below. Among the patristic commentaries the most important is that of Jerome (vol. v, ed. Migne), who noticed especially the objections of Porphyry; also those of Chrysostom (*Opera*, vi, 228), Theodoret (ii, 1053 sq., ed. Schulze; interp. Gabio, Rom. 1562, fol.), and Ephraem Syrus (*Op. Syr.* ii, Romæ, 1740). There are also annotations by Rupert Tuitiensis (*Opera*, i, 520), Thos. Aquinas [rather Thos. Wallensis] (*Commentarii*, etc., Paris, 1641, fol.), Albertus Magnus (*Opera*, viii), and Peter the Archdeacon (Martene and Durand's *Collectio*, ix, 275). Considerable fragments remain of the commentaries of Hippolytus (collected in Migne's edition, Paris, 1857) and Polychronius (Mai, *Script. Vet. Nov. Coll.* vol. i); and Mai has published (*ib.*) a catena on Daniel, containing fragments of Apollinarius, Athanasius, Basil, Eusebius, and many others. The chief reformers, Luther (*Auslegung d. Proph. Dan.* 1530–1546; *Op.* Germ. vi, ed. Walch), Œcolampadius (*In Dan. libri duo*, Basil. 1530), Melancthon (*Comm. in Dan. proph.* Vitemb. 1543), and Calvin (*Prælect. in Dan.* Genevæ, 1563, etc.; in French, 1565; in English, Lond. 1852–3), wrote on Daniel; also Joachim the Abbot (Ven. 1519, 4to). A comparison of the prophecies of Daniel with the visions of the Apocalypse (Newton, *On the Prophecies*, London, 1733, 4to) opened the way to a true understanding of Daniel. Auberlen (*Der Proph. Dan. u. d. Offenbarung Joh.* etc. 2d ed. Basel, 1857, translated into English from the 1st ed. by Saphir, 1856, 12mo) has thrown considerable light upon the general construction and relations of the book. Comp. Hofmann, *Weissag. u. Erfüllung*, i, 276 sq.; Burton, *Numbers of Daniel and John* (Norw. 1766–8); Anon., *Seven prophetical Periods* (Lond. 1790); Birks, *The four prophetic Empires* (London, 1844), and *The two later Visions of Daniel* (ib. 1846); Elliott, *Horæ Apocalypticæ* (Lond. 1844); Tregelles, *Remarks on the prophetic Visions of Daniel* (Lond. 1852); Stuart, *Hints on Prophecy* (Andov. 1844); Desprez, *Daniel the Apocalypse of the O. T.* (Lond. 1865, 8vo). See REVELATION. Among subsidiary works additional to the above may be named Bleek, *Weissag. in D.* (in the *Jahrb. f. Deutsche Theol.* 1860, v); Walter, *Genuineness of Daniel* (Lond. 1862); Baxmann, in the *Stud. u. Krit.* 1863, iv; Fuller, *Authenticity of Daniel* (Cambr. 1864); Bosanquet, *Inspiration of Daniel* (Lond. 1866); Harman, in the *Meth. Quart. Rev.* Oct. 1854.

Other special exegetical works on the entire book, or principal portions of it, are the following, of which the most important are designated by an asterisk (*) prefixed: Bañolas, פֵּרוּשׁ (s. l. ante 1480, 4to; and in the Rabb. Bibles); Alscheich, חֲבַצֶּלֶת הַשָּׁרוֹן (Safet, 1568, 4to, and since); Teitsak, לֶחֶם סְתָרִים (Ven. 1608, 4to); Joy, *Exposition* (Genev. 1545, 16mo; Lond. 1550, 8vo); Draconites, *Commentarius* (Marb. 1544, 8vo); *Suaningius, *Commentarii* (Havn. 1554–66, also 1688, 2 vols. fol.); Strigelius, *Concio* (Lips. 1565, 1571, 1572, 8vo); Selnecker, *Erklärung* (Jen. 1567, 1608, 4to); Wigand, *Explicatio* (Jen. 1571, Erf. 1581, 8vo); Bullinger, *Homiliæ* (Tigur. 1576, fol.); Pintus, *Commentarii* (Conimb. 1582, 8vo; Ven. 1583, 4to; Colon. 1587, Antw. 1595, 8vo); Pererius, *Commentarii* (Rom. 1586, fol.; Lugd. 1588, 4to; 1591, 1602, 8vo; Antw. 1594, 4to); Heilbrunner, *Loci communes* (Lauing. 1587, 8vo); Marcellinus, *Commentarius* (Ven. 1588, 4to); Rollock, *Commentarius* (Edinburgh, 1591, 8vo; Basil. 1594, 4to; Genev. 1598, 8vo; 1670, 4to); Junius, *Expositio* (Heidelb. 1593, Genev. 1594, 4to); Broughton, *Annotations* (in *Works*, p. 164, 261; in Lat. ed. Boreel, Basil. 1599, 4to); Polanus, *Commentarius* (Basil. 1599, 4to; 1606, 8vo); Gesner, *Disputationes* (Viteb. 1601, 4to; 1607, 1611, 1638, 8vo); *Elucidarius* (ib. 1658, 8vo); Veldius, *Commentarius* (Antw. 1602, 8vo); Leyser, *Commentarius* (in 6 parts, Darmst. and Francof. 1609–10, 4to); Willet, *Hexapla* (Cantuar. 1610, fol.); Veld, *Commentarius* (Antwerp, 1611, 4to); Sanctius, *Commentarius* (Lugd. 1612, fol.); Rhumelius, *Paraphrasis* (Norimb. 1616, 8vo); Angelocrator, *Erklärung* (Cassel, 1638, 4to); Alsted, *Trifolium* (Herb. 1640, 4to); Huit, *Paraphrase* (London, 1643, 4to); Brightman, *Exposition* (ib. 1644, 4to); Parker, *Exposition* (ib. 1646, 4to); *Geier, *Prælectiones* (Lips. 1667, 1684, 1697, 1702, 4to); Varenius, *Animadversio* (Rost. 1667, 4to); Wingendorp, *Paraphrasis* (Leyd. 1674, 1680, 8vo); Jungmann, *Commentarius* (Cass. 1681, 4to); Moore, *Exposition* (Lond. 1681, 4to); *Answers* (ib. 1684, 4to); *Supplement* (ib. 1685, 4to); *Notes* (ib. 1685, 4to); Bekker, *Vitlegginge* (Amst. 1688, 1698, 4to); Meissner, *Anmerkungen* (Hamb. 1695, 12mo); Anon., *Explanation* (Lond. 1700, 12mo); Kerkhedere, *Prodromus* (Lovan. 1710, 8vo); Wells, *Help*, etc. (Lond. 1716, 8vo); Friderici, *Daniel et ejus vaticinia* (Lpz. 1716, 4to); Musæus, *Scholæ* (Quedlinb. 1719, 4to); Michaelis, *Adnotationes* (Hal. 1720, 4to); Petersen, *Sinn*, etc. (F. ad M. 1720, 4to); Koch, *Auflösung* (Lemg. 1740, 4to); Venema, *Dissertationes* (Leid. 1745, 1752, 1768, 4to); Petri, *Zahlen Daniels* (Offenb. 1768, 8vo); Roos, *Auslegung* (Lpz. 1771, 8vo; tr. into Engl. Edinb. 1811, 8vo); Harenberg, *Aufklärung* (Blankenb. and Quedlinb. 1773, 4to); Scharfenberg, *Animadversiones* (Lips. 1774, 8vo); Segaar, *Animadversiones* (Utr. 1775, 8vo); Amner, *Essay*, etc. (Lond. 1776, 8vo); Zeis, *Erklärung* (Dresd. 1777, 8vo); Holber, *D. Zeiten in d. Zweck* (in the *Theolog. Zeitschr.* Berl.

1822, iii); Wilson, *Dissertations* (Oundle, 1824, 8vo); Irving, *Discourse* (Glasg. 1826, 2 vols. 12mo); Kirmss, *Commentatio* (Jen. 1828, 4to); *Rosenmüller, *Scholia* (Lips. 1832, 8vo); *Hävernick, *Commentar* (Hamburg, 1832, 8vo); Jeitteles, דניאל, etc. (Vienna, 1835, 8vo); Cox, *Lectures* (Lond. 1834, N. Y. 1836, 12mo); *Lengerke, *Auslegung* (Königsb. 1835, 8vo); Tyso, *Elucidation* (London, 1838, 8vo); Farquharson, *Illustrations* (London, 1838, 8vo); Gaussen, *Lectures* (London, 1840, 12mo); Miles, *Lectures* (ib. 1840–1, 2 vols. 12mo); Folsom, *Interpretation* (Boston, 1842, 12mo); Chase, *Remarks* (ib. 1844, 8vo); George (Duke of Manchester), *Times of Daniel* (Lond. 1846, 8vo); Wood, *Lectures* (ib. 1847, 12mo); Jacobi, vol. i of *Kirchliche Lehre*, etc. (Berl. 1847, 8vo); Harrison, *Outlines* (*Warburt. Lect.* London, 1849, 8vo); *Stuart, *Commentary* (Bost. 1850, 8vo); *Barnes, *Notes* (N. Y. 1850, 12mo); *Hitzig, *Erklär.* (Lpz. 1850, 8vo); Cumming, *Lectures* (Lond. 1850, 8vo); Ramsay, *Exposition* (ibid. 1853, 12mo); Osbon, *Daniel Verified* (N. Y. 1856, 12mo); Magnin, *Notes* (Par. 1861, 8vo); Zündel, *Untersuch.* (Basel, 1861, 8vo); Bellamy, *Translation* (Lond. 1863, 4to); Pusey, *Lectures* (new ed. ibid. 1865, 4to); Shrewsbury, *Notes* (Edinb. 1865, 8vo); Cowles, *Commentary* (N. Y. 1867, 12mo); Kranichfeld, *Erklär.* (Berl. 1868, 8vo); Kliefoth, *Erklär.* (Schw. 1868, 8vo); Füller, *Erklär.* (Basel, 1868, 8vo). See PROPHETS.

DANIEL, APOCRYPHAL ADDITIONS TO, i. e. pieces found in the Greek translations, but not in the Hebrew text. See DEUTERO-CANONICAL. The most important of these additions are contained in the Apocrypha of the English Bible under the titles of *The Song of the three holy Children* (Dan. iii), *The History of Susanna* (Dan. xiii), and *The History of . . . Bel and the Dragon* (Dan. xiv). See APOCRYPHA.

I. *Their Character.*—1. The first of these pieces is incorporated into the narrative of Daniel. After the three confessors were thrown into the furnace (Dan. iii, 23), Azarias is represented as praying to God for deliverance (Song of the three Children, 3–22); and in answer the angel of the Lord shields them from the fire which consumes their enemies (23–27), whereupon "the three, as out of one mouth," raise a triumphant song (29–68), of which a chief part (35–66) has been used as a hymn (*Benedicite*) in the Christian Church since the fourth century (*Rufin. Apol.* ii, 35; comp. *Concil. Tolet.* iv, Can. 14). Like several similar fragments, the chief parts of this composition are given at the end of the Psalter in the Alexandrine MS. as separate psalms, under the titles of "The Prayer of Azarias" and "The Hymn of our Fathers;" and a similar arrangement occurs in other Greek and Latin psalters.

2. The two other pieces appear more distinctly as appendices, and offer no semblance of forming part of the original text. *The History of Susannah* (or *The Judgment of Daniel*) is generally found at the beginning of the book (Gr. MSS. Vet. Lat.), though it also occurs after the 12th chapter (Vulg. ed. Compl.). *The History of Bel and the Dragon* is placed at the end of the book, and in the Sept. version it bears a special heading as "*Part of the Prophecy of Habakkuk*" (ἐκ προφητείας Ἀμβακοὺμ υἱοῦ Ἰησοῦ ἐκ τῆς φυλῆς Λευί).

II. *Their Currency.* — The additions are found in both the Greek texts—the Sept. and Theodotion—in the Old Latin and Vulgate, and in the existing Syriac and Arabic versions. On the other hand, there is no evidence that they ever formed part of the Hebrew text, and they were originally wanting in the Syriac (Polychronius ap. Mai, *Script. Vett. Nov. Coll.* i, p. 113, says of the hymn expressly οὐ κεῖται ἐν τοῖς Ἑβραϊκοῖς ἢ ἐν τοῖς Συριακοῖς βιβλίοις). From the Sept. and Vulgate the fragments passed into common use, and they are commonly quoted by Greek and Latin fathers as parts of Daniel (Clem. Alex. *Ecl. proph.* i; Origen, *Ep. ad Afric.*; Tertull. *de Pudic.* 17, etc.), but rejected by those who adhered to the Hebrew canon. Jerome, in particular, called attention to their absence from the Hebrew Bible (*Præf. in Dan.*), and, instead of any commentary of his own, adds shortly Origen's remarks "on the fables of Bel and Susanna" (*Comm. in Dan.* xiii, 1). In a similar manner, he notices shortly the Song of the three Children, "lest he should seem to have overlooked it" (*Comm. in Dan.* iii, 23).

III. *Their Derivation.* — Various conjectures have been made as to the origin of the additions. It has been supposed that they were derived from Aramaic originals (De Wette, *Einl.* ii, 2, Kap. 8, gives the arguments at length), but the intricate evidence is wholly insufficient to establish the point. The character of the additions themselves indicates rather the hand of an Alexandrine writer; and it is not unlikely that the translator of Daniel wrought up traditions which were already current, and appended them to his work (comp. Fritzsche, *Exeg. Handb. zu den Apok.* i, 121). The abruptness of the narrative in Daniel furnished an occasion for the introduction of the prayer and hymn; and the story of the Dragon seems like a strange exaggeration of the record of the deliverance of Daniel (Dan. vi), which may naturally have formed the basis of different legends. Nor is it difficult to see in the history of Susanna a pointed allusion to the name of the prophet, though the narrative may not be wholly fictitious.

The Sept. appears to be the original source from which all the existing recensions of the fragments were derived (comp. Hody, *De Bibl. text.* p. 583). Theodotion seems to have done little more than transcribe the Sept. text, with improvements in style and language, which are considerably greater in the appended narratives than in the Song incorporated into the canonical text. Thus, while the history of Susanna and Bel and the Dragon contain large additions which complete and embellish the story (e. g. Hist. Sus. 15–18; 20, 21; 24–27; 46, 47, 49, 50; Bel and Dr. 1, 9–13; Eichhorn, p. 431 sq.), the text of the Song is little more than a repetition of that of the Sept. (comp. De Magistris, *Daniel*, etc. p. 254 sq.; Eichhorn, *Einleit. in der Apokryph. Schrift.* p. 422 sq.). The Polyglot-Syriac, Arabic, and Latin versions are derived from Theodotion, and the Hexaplar-Syriac from the Sept. (Eichhorn, p. 430, etc.).

The stories of Bel and Susanna received various embellishments in later times, which throw some light upon the manner in which they were originally composed (comp. Origen, *Ep. ad Afric.* § 7, 8; Bochart, *Hieroz.* iii, 3; Eichhorn, p. 446, etc.), just as the change which Theodotion introduced into the narrative of Bel, to give some consistency to the facts, illustrates the rationalizing process through which the legends passed (comp. Delitzsch, *De Habacuci vitâ et ætate*, 1844). It is thus useless to institute any inquiry into the historic foundation which lies below the popular traditions; for, though the stories cannot be regarded as mere fables, it is evident that a moral purpose determined the shape which they assumed. A later age found in them traces of a deeper wisdom, and to Christian commentators Susanna appeared as a type of the true Church tempted to infidelity by Jewish and pagan adversaries, and lifting up her voice to God in the midst of persecution (Hippol. *In Susann.* p. 689 sq., ed. Migne).

V. *Their Spuriousness.*—These addenda are regarded as canonical by the Roman Church, but the only evidence that can be adduced for this authority being attached to them is the fact of their existence in the Sept., Vulg., and other versions, and their quotation by the early Church fathers. On the other hand, these arguments are more than counterbalanced by the fact of their non-existence in the Heb. text and the earliest Syriac, the weak authority of the Sept. (especially in the book of Daniel), and consequently of the Vulg., which is based upon it, and the general manner in which these fathers refer to them. Jerome, indeed, frequently and openly ridicules their ab-

surd legends; and their own contradictions are sufficient to stamp them as spurious upon their very face.

Breithaupt, Goth. et Lips. 1710), p. 34; Whitaker, *Disputation on Scripture* (Parker Society ed.), p. 76 sq.; Du Pin, *History of the Canon* (London, 1699), p. 14 sq., 117 sq.; Arnold, *Commentary on Apocrypha;* Zunz, *Gottesdienstlichen Vorträge*, p. 122; Herzfeld, *Geschichte der Israel*, p. 317; Grätz, *Gesch. der Juden*, iii, 308; Ewald, *Gesch. Israel*, iv, 557 sq.; Fritzsche, *Exeg. Handb.* i, 111; Davidson, *Text of the O. T.* p. 976. See SONG OF THE THREE HOLY CHILDREN; SUSANNA, HISTORY OF; DESTRUCTION OF BEL AND THE DRAGON, HISTORY OF.

3. (Sept. Δανιήλ.) A priest of the family of Ithamar, who returned from the exile in the time of "Artaxerxes" (Ezra viii, 2), B.C. 459. He is probably the same with the priest Daniel who joined in the covenant drawn up by Nehemiah (Neh. x, 6), B.C. 410. He has been confounded with the prophet in the apocryphal addenda to the Sept. (Dan. xiv, 1, Sept., not Theodotion), where he is called "a priest by the name of Daniel, the son of Abda" (Jerome, *Præfat. in Daniel.*).

Daniel the Stylite was born near Samosata about A.D. 410, and died near Constantinople about 490. He entered a monastery at twelve, and determined in middle life to imitate Simeon the Stylite (q. v.). In 461 he fixed himself on a pillar on the height called Anapla, near Constantinople, and exposed himself there day and night. It is said that he had the gift of prophecy, and was at last escorted to heaven by the angels! He is celebrated as a saint in the Greek and Roman churches, Dec. 11.—Butler, *Lives of the Saints*, Dec. 11.

Daniel, bishop of Winchester, a monk in the convent of Malmesbury, was raised to the see of Winchester in 705. The convent from whence came Boniface, the apostle of Germany, was situated in his diocese, and Daniel himself strongly encouraged Boniface in his resolution of preaching the Gospel on the Continent. He gave him, on the occasion of his first journey to Rome, two letters of introduction, one addressed to all Christians, kings, and bishops (*epist. B. ed. Würdtwein*, *ep.* 1), and another to Gregory II, which has been lost. He remained in relation with Boniface, and sustained him by his advice, instructions, and sympathy (*ep. B. ep.* 12–14). In 721 he undertook a pilgrimage to Rome, and on his return furnished to Bede the sources of his history of the kingdom of Wessex, as the latter himself states in his Ecclesiastical History of the Anglo-Saxons. Having become blind, he renounced his charge, and returned to the convent of Malmesbury, where he died in 745 or 746. The four letters mentioned above are all that remains of his writings; the *ep.* 14, by Würdtwein, is also to be found in Baronius A.D. 724.—Herzog, *Real-Encyklop.* s. v.; Wright, *Biographica Literaria* (Anglo-Saxon Period), p. 292 sq.

Dan'ite (Heb. always with the article *had-Dani'*, הַדָּנִי; Sept. ὁ Δάν, Δάν, οἱ Δανῖται; A. V. "Danites," Judg. xiii, 2; xviii, 1, 11; 1 Chron. xii, 35; "of Dan," Judg. xviii, 30), a member of the tribe of DAN (q. v.).

Dan-ja'än (Heb. but once and with ה local appended, *Da'nah Ya'an*, דָּנָה יַעַן; Sept. Δανιδὰν καὶ Οὐδὰν v. r. Δανιαρὰν καὶ Ιουδάν; Vulg. *Dan silvestria*), a place named only in 2 Sam. xxiv, 6 as one of the points visited by Joab in taking the census of the people. It occurs after Gilead, between "the land of Tahtim-hodshi" and Zidon, and therefore may have been somewhere in the direction of Dan (Laish), at the sources of the Jordan. The reading of the Alexandrian Sept. and of the Vulg. was evidently דָּן יַעַר, *Dan-jaar*, the nearest translation of which is "Dan in the wood." This reading is approved by Gesenius (*Thes. Heb.* p. 336), and agrees with the well-wooded character of the country about *Tel el-Kadi*. See DAPHNE. Fürst (*Heb. Handwörterbuch*, p. 303) compares Dan-jaan with Baal-jaan, a Phœnician divinity whose name is found on coins. Thenius suggests that Jaan was originally Laish, the ל having fallen away, and עַן having been substituted for שׁ (*Exeg. Hdbuch.* on Sam. p. 257). There seems no reason for doubting that the well-known DAN, or Leshem, is intended. We have no record of any other Dan in the north, and even if this were not the case, Dan, as the accepted northern limit of the nation, was too important a place to escape mention in such a list as that in the text. Dr. Schultz, however, the late Prussian consul at Jerusalem, discovered an ancient site called *Danian* or *Danyal*, in the mountains above Khan en-Nakûra, south of Tyre, which he proposes to identify with Danjaan (Van de Velde, *Memoir*, p. 306).

Dan'nah (Heb. *Dannah'*, דַּנָּה, prob. *murmuring*, but Fürst thinks *lowly;* Sept. Ῥαννά v. r. Ῥεννά, evidently by mistake of ר for ד; Vulg. *Danna*), a city in the mountains of Judah, mentioned between Socoh and Kirjath-sannah (Josh. xv, 49), and evidently lying in the group south-west of Hebron (Keil, *Comment.* in loc.); possibly the modern *ed-Dhoheriyeh*, a conspicuous village on the hills west of Wady el-Khulil, consisting of stone hovels with remains of older structures, and surrounded by a fine grazing region (Robinson, *Researches*, i, 308, 311). Knobel (*Exeg. Handb.* in loc.) suggests the site *Zanuta*, but this is probably that of the ancient Zanoah.

Dannhauer, CONRAD, a Lutheran divine, was born in the Breisgau 1603, and studied at the universities of Marburg, Altdorf, and Jena. In 1628 he became professor of eloquence, and later of theology at Strasburg, where also in 1638 he became pastor of the Cathedral church. He died in 1666. Dannhauer was a learned theologian, and an earnest Lutheran controvertist against Romanism and Syncretism (q. v.). For an account of his numerous writings, see Tholuck, *Akademisches Leben d. 17 Jahrhunderts*, sæc. xvii, p. 274; and Tholuck's article in Herzog, *Real-Encyklop.* xix, 386.

Dante (properly DURANTE) **Alighieri**, one of the greatest Christian poets of all times, and, on account of his views of religion and the Church, generally counted among the forerunners of the Reformation of the sixteenth century. He was born at Florence May 8, 1265; according to others, May 27, 1263. He studied philosophy at the universities of Bologna and Padua; later, when an exile, he devoted himself to the study of philosophy at Paris. According to a statement of Boccaccio, he also visited England. In his youth Dante took an active part in the politics of his native city, and in 1300 was for two months one of its two *Priori*. In the party strife between the *Neri* (Blacks), the unconditional adherents of the pope, and the *Bianchi* (Whites), who rather sympathized with the Ghibellines, Dante was one of the leading men of the latter. His party sent him to Rome to counteract the plans of the Neri, who had implored the aid of Boniface VIII. The pope induced Charles of Valois, brother of Philip IV of France, to go to Florence to make peace. Charles recalled the exiled chiefs of the Neri and gave up the houses and the property of the Bianchi to plundering. Many of the prominent men of the party, among them Dante, were banished. Dante never saw his native city again, and his subsequent life was very unsettled. After the last unsuccessful attempt of the "Whites" to re-enter Florence, he probably left Italy for Paris. When emperor Henry VII marched against Rome, Dante wrote enthusiastic letters in favor of the emperor against the pope. It is thought that his work *De monarchia* was compiled at the same time. The death of the emperor disappointed his last hope. The last years of his life

were spent at Ravenna, where prince Guido Novello da Polenta was his patron. He died Sept. 14, 1321.

The first powerful influence which awakened in him the poetical inspiration was the love which at the age of nine years he conceived for Beatrice Portinari, then eight years old, the daughter of a rich citizen. How pure, chaste, and tender this love was is testified by his first work, the *Vita Nuova*, which was published about 1300, and consists of a collection of poems, all having reference to his first love (best edition by Marchese Trivulzio, Milan, 1827). Beatrice died early (1290) as the wife of the knight Simone de Bardi, and a few years after her death Dante married a lady named Gemma, of the powerful house of Donati, by whom he had five or six children. A fruit of the philosophical studies in which he sought consolation for the death of Beatrice was the *Convito* (Banquet), which was to consist of 15 *trattati* and 14 *canzone*, of which, however, only 4 *trattati* and three *canzone* were finished (best edition by Trivulzio, Milan, 1826).

But the great work, which has settled for all the ages the reputation of Dante as one of the greatest Christian poets, is his immortal *Commedia*, or, as it was subsequently called, the *Divina Commedia*, written in *terze rime*, and consisting of 100 *cantos*, of which the first is introductory to the following visions, and 33 are devoted to Hell (*Inferno*), Purgatory (*Purgatorio*), and Paradise (*Paradiso*) each. "The poet is conducted first by Virgil, the representative of human reason, through hell and purgatory, and then by Beatrice, the representative of revelation, and finally by St. Bernard, through the several heavens, where he beholds the triune God. Hell is represented in the poem as a funnel-shaped hollow, formed of gradually contracting circles, the lowest and narrowest of which is at the earth's centre. Purgatory is a mountain rising solitary from the ocean on that side of the earth that is opposite to us: it is divided into terraces, and its top is the terrestrial paradise, the first abode of man. From this the poet ascends through the seven planetary heavens, the heaven of the fixed stars, and the 'primum mobile,' to the empyrean, or fixed seat of God. In all parts of the region thus traversed there arise conversations with noted personages, for the most part recently deceased. At one time the reader is filled with the deepest sorrow, at another with horror and aversion; or the deepest questions of the then philosophy and theology are discussed and solved; and the social and moral condition of Italy, with the corruptions of Church and State, are depicted with a noble indignation" (Chambers). The conversations contained in the *Divina Commedia* give a full exposé of most of the fundamental doctrines of the Christian religion. The creation of the world, the fall of angels and man, and the atonement, are treated of with great fulness. The doctrine that salvation can be found in faith in Christ alone is repeatedly insisted on. The poet in many places complains of the moral, social, and political degeneracy of the time, and of the corruption of the Church and the papal see. He violently inveighs against indulgences and the false veneration of saints, against the preference given to the decretals of the popes over the holy Scriptures, and thrusts three popes in succession into hell. A thorough reformation of the Church in head and members is expected, not from the popes, but from the emperors. "Fifty-two years after the poet's death, the republic of Florence, at the instigation of Boccaccio, set apart an annual sum for public lectures to explain the *Divine Comedy* to the people in one of the churches, and Boccaccio himself was appointed first lecturer. The example was imitated in several other places in Italy. The works of these men are among the earliest commentaries on Dante that we possess. The number of editions of the work amounts by this time to about 300. Only a few deserve notice. They are, that printed at Fuligno in 1472—the earliest of all; the Nidobeatine edition at Milan (1478); the first Aldine edition (1502); the first Cruscan edition (1695); that of Volpi (1727); of Venturi (1732); of Lombardi (1791), and with additions and illustrations in 1815, 1821, and 1822; of Dionisi (1795); of Ugo Foscolo (Lond. 1842–1843). A reprint of the Fuligno edition above mentioned, together with those printed at Jesi (1472), at Mantua (1472), and at Naples by Francisco del Tuppo (about 1478), appeared at London in 1858 under the superintendence of Mr. Panizzi, and at the expense of Lord Vernon" (Chambers). Among the most recent editions are those by Bianchi (Florence, 5th ed. 1857) and Karl Witte (Berlin, 1862, 4to and 8vo). The last is regarded as the best from a critical point of view. "The *Divina Commedia* has been translated into almost all European languages. Two translations of the whole into Latin have been printed, one by Carlo d'Aquino (1728), and lately by Piazza (1848). In French there are a number of translations both in prose and verse. The earliest, by Grangier, in 1596, is still the nearest to the original in form, but none is good. The German translations are numerous, and such as no other modern language can equal in faithfulness. Kannegiesser has translated the whole in the measure and rhyme of the original (Leipsic, 1843, 4th ed.); prince [subsequently king] John of Saxony's translation is said by some to be the best. The chief English translations are Boyd's (1785) and Cary's (1814), in blank verse; Wright's (1833), in triple rhymes; Cayley's, in the original ternary rhyme (the *Inferno*, 1851; the *Purgatorio*, 1853; the *Paradiso* in 1854, with a volume of notes in 1855); Dr. John Carlyle's, the *Inferno*, in prose, with a judicious commentary (1849); Fred. Pollock's, in blank verse (1854)" (Chambers). The first complete American translation is by Longfellow (*The Divine Comedy of Dante*, Boston, 1867, 3 vols.).

Of the other works of Dante, his Latin work, *De Monarchia*, written in the interest of the emperor against the temporal power claimed by pope Boniface VIII over all secular rulers, is the most important. Dante takes the ground that both powers, like two swords, have been directly ordained by God to support each other. This book became a powerful weapon in the hands of the opponents of the papacy. Pope John XXII forbade it, and ordered it to be burned. The *Rime sacre*, containing the seven penitential psalms and the *Credo* in *terze rime*, were for the first time published in 1752, and their genuineness is still doubted by some.

The religious and ecclesiastical views of Dante have been for centuries, and still are, the subject of an animated controversy. Matthias Flacius placed him in his *Catalogus testium veritatis evangelicæ* (1556), and since then Protestant writers generally have claimed him as a forerunner of the Reformation, or, at least, as an ardent opponent of many of the worst corruptions prevalent in the Papal Church during the Middle Ages. The Jesuit Harduin, in order to save Dante from the charge of heresy, ascribed the *Divina Commedia* to a disciple of Wickliffe; but most of the Roman Catholic writers (in particular the Frenchmen Ozanam and Artaud de Montor) maintain that Dante, in spite of his opposition to some abuses in the Church, was, in point of doctrine, a faithful adherent of the Church of Rome. See Baumgarten-Crusius, *De Doctrina Dantis Aligerii theologica* (1836); Aroux, *Dante hérétique, revolutionnaire et socialiste* (Par. 1854); Boissard, *Dante révolutionnaire et socialiste, mais non hérétique* (Paris, 1854).

The literature on the life and the works of Dante is immense. The first who wrote a critical life was Pelli (1758), after whom the Italians Dionisi, Orelli, and Misserini wrote valuable works. Among the numerous works of Germany on the subject we mention Abeken, *Beiträge für das Studium der göttlichen Komödie Dante's* (Berlin, 1826); Schlosser, *Dante-Studien* (Lpz. 1855); Ruth, *Studien über Dante* (Tüb. 1853); Wegele,

Dante's Leben und Werke (Jena, 1852); Floto, *Dante Alighieri; sein Leben und seine Werke* (Stutt. 1858); Paur, *Ueber die Quellen zur Lebensgeschichte Dante's* (Görlitz, 1862). The best among recent Italian works is Balbo's *Vita di Dante* (2 vols. Turin, 1839). A list of all editions, translations, and commentaries on the *Divina Commedia* is given in Colomb de Batine's *Bibliografia Dantesca* (2 vols. Prato, 1845-1848). The best illustrations of the chief works of Dante are from Flaxman (*Atlante Dantesco*, Milan, 1822), Genelli, and Doré. In 1865, from the 14th to the 16th of May, the sixth centenary of the birth of Dante was celebrated at Florence with immense enthusiasm, and his statue (by Enrico Pazzi in Ravenna) erected at the Piazza della Croce. See Brockhaus, *Conversations-Lexicon*, s. v.; Herzog, *Real-Encyklop.* iii, 286.

Danz, Johann Andreas, a Lutheran theologian and distinguished Hebrew scholar, was born in 1654 at Sundhausen, near Gotha. He became professor at the University of Jena, first in the philosophical, and subsequently (1713) in the theological faculty, remaining, however, at the same time professor of the Oriental languages. He was the founder of a new school of Oriental philologists, and had the reputation of being the greatest Hebrew scholar of the age. He was intimate with Spener and Francke, but yet his private life was not beyond reproach. He died Dec. 22, 1727. The most important of his works are *Compendium grammaticæ hebr. and chald.* (3d edition, 1706); *Rabbinismus enucleatus* (Frankf. 1761); *Literator Ebræo-Chaldæus* (Jena, 1696; the first edit. had been published under the title *Nucifrangibulum* [nut-cracker], Jena, 1686).—Herzog, *Real-Encyklop.* xix, 388; Pierer, *Univ.-Lex.* iv, 735.

Danz, Johann Traugott Leberecht, a Protestant theologian of Germany, was born May 31, 1769, at Weimar. He studied at the universities of Jena and Göttingen, became in 1807 professor of theology at Jena, which position he retained until 1837, and died at Jena May 16, 1851. He was a man of immense learning in all departments of literature, an interesting writer on a number of subjects, and a popular professor. In his theological views he was a representative of the school of Biblical Rationalists, advocating the mutual toleration of Rationalists and Supranaturalists in the same church, and opposing the views both of Schleiermacher and Strauss. Among his theological works the following are the most important: *Lehrbuch der Kirchengeschichte* (Jena, 1824); *Die Wissenschaften des geistlichen Berufs* (Jena, 1824); *Theolog. Encyclopædia* (Weimar, 1832); *Universal-Wörterbuch der theolog. und religionsgeschichtl. Literatur* (Leipsic, 1837, sq.); *Initia Doctrinæ Patristicæ* (Jena, 1839); *Geschichte des Tridentiner Concils* (Jena, 1846), according to Paul Sarpi. His edition of the *Libri Symbolici ecclesiæ Romano-Catholicæ* (Vimar. 1835) was dedicated to *Gregorio XVI, Pontifici Maximo, ecclesiæ Romano-Catholicæ præsuli*, with some good Protestant advice. He also published a biography of his deceased (1835) friend and colleague, H. A. Schott (Jena, 1836), and edited a posthumous work of the latter on the authenticity of the Gospel according to Matthew (Leips. 1837). One of his last works was "Two Conversations" on the Life of Jesus by Strauss (*Zwei Gespräche*, 1839).—Herzog, *Real-Encyklop.* xix, 389 sq.

Daph'nè (Δάφνη, the *laurel;* so called from the verdure of the place, or because this tree was sacred to Apollo), the name of several localities mentioned in later writers.

1. A celebrated grove and sanctuary of Apollo near Antioch (q. v.), in Syria. Its establishment, like that of the city, was due to Seleucus Nicator. The distance between the two places was about five miles (Strabo, xvi, 750), and in history they are associated most intimately together (Antioch being frequently called Ἀ. ἐπὶ Δάφνῃ, and ἡ πρὸς Δάφνην, and conversely Daphne entitled Δ. ἡ πρὸς Ἀντιοχείαν, Josephus, *War*, i, 12, 5; comp. *Ant.* xiv, 15, 11; xvii, 2, 1). The situation was of extreme natural beauty, with perennial fountains and abundant wood. Seleucus localized here, and appropriated to himself and his family the fables of Apollo and the river Peneus, and the nymph Daphne. Here he erected a magnificent temple and colossal statue of the god (Libanius, *De Daphnæo Templo*, iii, 334). The succeeding Seleucid monarchs, especially Antiochus Epiphanes, embellished the place still further. Among other honors, it possessed the privileges of an asylum. It is in this character that the place is mentioned, 2 Macc. iv, 33. In the reign of Antiochus Epiphanes (B.C. 171), the aged and patriotic high-priest Onias, having rebuked Menelaus for his sacrilege at Jerusalem, took refuge at Daphne, whence he was treacherously brought out, at the instance of Menelaus, and murdered by Andronicus, who was governor of Antioch during the king's absence on a campaign. Josephus does not give this account of the death of Onias (*Ant.* xii, 5, 1). When Syria became Roman, Daphne continued to be famous as a place of pilgrimage and vice. "*Daphnici mores*" was a proverb (see Gibbon's 23d chapter). The beginning of the decay of Daphne must be dated from the time of Julian, when Christianity in the empire began to triumph over heathenism. The site has been well identified by Pococke and other travellers at *Beit el-Maa*, "the House of the Water," on the left bank of the Orontes, to the south-west of Antioch, and on higher ground, where the fountains and the wild fragrant vegetation are in harmony with all that we read of the natural characteristics of Apollo's sanctuary.—Smith, s. v. It is a small natural amphitheatre on the declivity of the mountains, where the springs burst with a loud noise from the earth, and running in a variety of directions for a distance of about two hundred yards, terminate in two beautiful cascades, which fall into the valley of the Orontes. The largest of the fountains rises from under a vertical rock, forming a small abyss or concavity, on the top and sides of which are the massive remains of an ancient edifice, perhaps those of the Temple of Apollo (Kelly's *Syria*, p. 281). For a translation of an ancient inscription recently discovered on the site, see the *Jour. Am. Or. Soc.* vi, 550. See Müller, *Antiq. Antiochenæ*, p. 64; Smith's *Dict. of Class. Geogr.* s. v. See Antioch.

2. A town or village (χώριον) near the fountains of the little Jordan (Josephus, *War*, iv, 1, sec. 1). Reland (*Palæstina*, p. 263) and others have considered this as identical with Dan, proposing to read Δάνης for Δάφνης, and referring in support to Josephus, *Ant.* viii, 8, 4. Recent explorers have shown this to be an error, and have discovered the site of the Daphne of Josephus in the present *Dufneh*, two miles to the south of Tell el-Kady, the site of Dan (Van de Velde, *Memoir*, p. 306; *Syria and Palestine*, ii, 419; Robinson, *Later Researches*, p. 393; Wilson, *Bible Lands*, ii, 172); Thomson, *Land and Book*, i, 388).

3. In Num. xxxiv, 11, the clause rendered in the A. V. "on the east side of Ain" (q. v.), and by the Sept. "on the east to (of) the fountain," is given in the Vulgate "contra fontem Daphnim." The word *Daphnim* is most probably a marginal gloss, and may perhaps refer to No. 2. Jerome, in his commentary on Ezekiel (c. 47), refers to the passage in Numbers, and gives reasons for concluding that "the fountain" is Daphne No. 1. The Targums of Jonathan and of Jerusalem give Daphne or Dophne as the equivalent of Riblah (q. v.) in Num. xxxiv, 11 (q. v.). The error into which Jerome and the Targums have fallen appears to have arisen either from a confusion between Daphne on the Jordan with Daphne on the Orontes, or from mistaking the fountains near the mouth of the Orontes for those at its source.

4. A fortified town on the Pelusiac branch of the

Nile (Δάφναι, Herod. ii, 30, 107), the TAHPENES (q. v.) of Scripture, distant from Pelusium sixteen Roman miles (*Itin. Ant.* Iter a Pelusio Memphim).

Dar. See MARBLE.

Da'ra (Heb. *Dara'*, דָּרַע; Sept. Δαρά v. r. Δαράδ, Δαραδέ), a contracted or corrupt form (1 Chron. ii, 6) of the name DARDA (q. v.).

Darbyites. See PLYMOUTH BRETHREN.

Darcmonim. See DARIC.

Dar'da (Heb. *Darda'*, דַּרְדַּע, *pearl of knowledge;* Sept. Δαρδάλα v. r. *τὸν δάραα*; Josephus, Δάρδανος v. r. Δάρθανος, *Ant.* viii, 2, 5; Vulg. *Dorda*), a son of Mahol, one of four men of great fame for their wisdom, but who were excelled by Solomon (1 Kings iv, 31). B.C. ante 1010. Ethan, the first of the four, is called "the Ezrachite," but it is uncertain whether the designation extends to others. In 1 Chron. ii, 6, however, the same four names occur again as "sons of Zerach," of the great family of Pharez, in the tribe of Judah, with the slight difference that "Darda" appears as "Dara." The identity of these persons with those in 1 Kings iv has been greatly debated (see the arguments on both sides in Burrington, i, 206–8); but there cannot be much reasonable doubt that they are the same (Mövers, *Kritik. Unters.* p. 237); although Keil argues that nothing can be proved from the mere identity of the names (*Versuch üb. der Chron.* p. 164). There is nothing to support the Jewish tradition (in the *Seder Olam Rabba*) that they prophesied during the Egyptian bondage. See ETHAN.

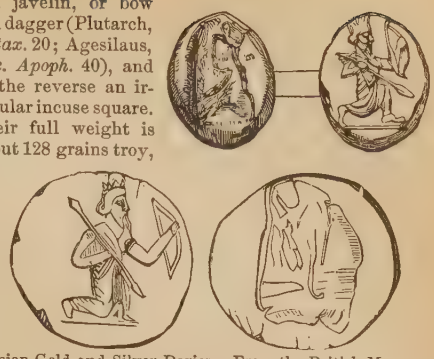
(1.) A great number of Hebr. MSS. read Darda in Chron. (Davidson, *Hebr. Text*, p. 210), in which they are followed by the Targum and the Syriac and Arabic versions. See DARA.

(2.) The son of Zerach would without difficulty be called in Hebrew the Ezrachite, the change depending merely on the position of a vowel point. And further, the change is actually made by the Targum Jonathan, which in Kings has "son of Zerach." See EZRAHITE.

(3.) The word "son" is used in Hebrew so often to denote a descendant beyond the first generation that no stress can be laid on the "son of Mahol" as compared with the "son of Zerach." For instance, of the five "sons of Judah" in 1 Chron. iv, 1, the first was really Judah's son, the second his grandson, the third his great grandson, and the fourth and fifth still later descendants. Besides, there is some plausibility in the conjecture that "*Bene Mahol*" means "sons of the choir" (comp. "daughters of music," Eccles. xii, 4), in which case the men in question were the famous musicians, two of whom are named in the titles to Psalms lxxxviii and lxxxix. See MAHOL.

Dardar. See THISTLE.

Daric (דַּרְכְּמוֹן, *darkemon'*, or אַדַּרְכֹּן, *adarkon'*, only in plur.; Talm. דַּרְכּוֹן, *darkon'*; Sept. *χρυσοῦς*; Vulg. *solidus, drachma;* rendered "dram" [q. v.], Ezra ii, 69; viii, 27; Neh. vii, 70, 71, 72; 1 Chron. xxix, 7), a gold coin (Xenoph. *Anab.* i, 7, 18; i, 1, 9; vii, 6, 1; *Cyrop.* v, 2, 7; Ælian, i, 22; Plutarch, *Artax.* 22) current in Palestine in the period after the return from Babylon, and used even for the Temple tax (Mishna, *Shekal.* ii, 4). That the Hebrew word is, in the Bible, the name of a coin and not of a weight, appears from its similarity to the Greek appellation of the only piece to which it could refer (Lysias in Eratosth. 11; Athen. xii, 534). The mentions in Ezra and Neh. show that the coin was current in Palestine under Cyrus and Artaxerxes Longimanus. At these times there was no large issue of gold money except by the Persian kings, who struck the coin known to the Greeks as the *στατὴρ Δαρεικός*, or simply *δαρεικός*. The darics which have been discovered are thick pieces of pure gold (see Wurm, *De ponder. et mensur.* p. 58 sq.), of archaic style, bearing on the obverse the figure of a king with bow and javelin, or bow and dagger (Plutarch, *Artax.* 20; Agesilaus, *Lac. Apoph.* 40), and on the reverse an irregular incuse square. Their full weight is about 128 grains troy,

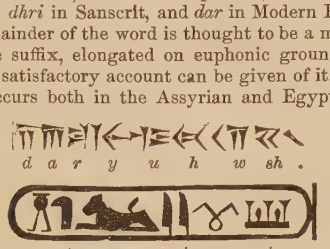


Persian Gold and Silver Darics.—From the British Museum. Actual size.

or a little less than that of an Attic *stater*, and is most probably that of an early didrachm of the Phœnician talent (see Böckh, *Metrolog. Untersuch.* p. 130). They must have been the common gold pieces of the Persian empire. The oldest that are often seen cannot be referred to an earlier period than about the time of Cyrus, Cambyses, or Darius Hystaspis, and it is more probable that they are not anterior to the reign of Xerxes, or even to that of Artaxerxes Longimanus. There are, however, gold pieces of about the same weight, but of an older style, found about Sardis, which cannot be doubted to be either of Crœsus or of an earlier Lydian king, in the former case the Κροισεῖοι (*στατῆρες*) of the Greeks (Rawlinson, *Herod.* i, 561). It is therefore probable, as these followed a Persian standard, that darics were struck under Cyrus or his nearer successors. The origin of this coin is attributed by the Greeks to a Darius, supposed by the moderns to be either Darius the Mede or Darius Hystaspis (see Schol. ad Aristoph. *Eccles.* p. 741; Hengstenberg, *Authentie Dan.* p. 51). That the Greeks derived their distinctive appellation of the coin from this proper name cannot be doubted; but the difference of the Hebrew forms of the former from that of the latter דָּרְיָוֶשׁ, renders this a questionable derivation. Gesenius suggests the ancient Persian word *Dara* (*Lex.* s. v.), "king;" but (in his *Thesaur.* s. v.) inclines to connect the Hebrew names of the coin and that of Darius. In favor of the derivation from *Dara*, it must be noted that the figure borne by these coins is not that of any one king, but of the king of Persia in an abstract sense, and that on the same principle the coins would rather be called regal coins than darics. The silver darics mentioned by Plutarch (*Cim.* 10) are probably the Persian silver pieces similar in type to the gold darics, but weighing a drachm and a third of the same standard. (See Harenberg, in Ugolini *Thesaur.* xxviii; Eckhel, *Doctrin. num.* I, iii, 551 sq.; Boden, *De daricis*, Viteb. 1779; Wesseling, *Observv. var.* Amst. 1729, p. 241 sq.) See MONEY; DRACHMA.

Dari'us (Hebrew *Dareya'vesh*, דָּרְיָוֶשׁ, Ezra iv, 4; Neh. xii, 22; Dan. ix, 1; xi, 1; Hag. i, 1, 15; ii, 10; Zech. i, 1, 7; vii, 1; Chald. the same, Ezra iv, 24; v, 5–15; Dan. v, 31; vi, 1–28; Gr. Δαρεῖος, 1 Esdr. ii, 30; iii, 1–8; iv, 47; v, 2, 6, 73; vi, 1, 6, 7, 23, 34; vii, 1, 4, 5; 1 Macc. i, 1; xii, 7; Strabo Δαρειήκης, xvi, p. 785; Ctesias Δαριαῖος), the name of several kings of Persia, three of whom are mentioned in the O. T. and the Apocrypha. The original form of the name, to which the Hebrew and Greek words are only approximations, has been read by Grotefend, in the cuneiform inscriptions of Persepolis, as *Darheush* or *Darjeush* (Heeren's *Ideen*, ii, 350), and by Beer as *Daryawush* (*Allg. Lit. Zeit.* 1838, No. 5). Herodotus assigns to the name the sense of *ἐρξίης*, or, according to another reading, *ἐρξείης* (vi, 98): probably meaning

coercer or *conservator*. The former accords with *holding fast*, which is the sense of *Dārā*, the modern Persian name of Darius, the latter with the derivation (according to Lassen, *Inschriften*, p. 39, 158) from Sanscrit *dri*, to preserve. (See Gesenius, *Thes. Heb.* p. 350.) According to Rawlinson (*Herod.* iii, 455), "It does not appear to mean either ἐρξείης, 'the *worker*,' as Herodotus states, or φρόνιμος, 'the *wise*,' as Hesychius, or πολεμικός, 'the *warlike*,' as the author of the *Etymologicum* says. The root appears to be the Old Persian *dar*, 'to hold' or 'possess,' which is *dere* in Zend, *dhri* in Sanscrit, and *dar* in Modern Persian. The remainder of the word is thought to be a mere appellative suffix, elongated on euphonic grounds; but no very satisfactory account can be given of it." The name occurs both in the Assyrian and Egyptian in-



Cuneiform and Hieroglyphical Forms of "Darius."

scriptions. This title appears to have been the proper name of the son of Hystaspes, who first won it, but was assumed as a throne-name by Ochus (i. e. Darius Nothus), son and successor of Artaxerxes Longimanus (Ctesias, *Pers.* xlviii, 57), in like manner as Arsaces, successor of this Darius (*ib.* liii, 57) and Bessus (Curt. vi, 6), both took the royal name of "Artaxerxes" (q. v.). See Smith's *Dict. of Class. Biog.* s. v. See PERSIA.

1. "DARIUS the MEDE" (הַ מָּדָי, Dan. xi, 1, Sept. ὁ Κῦρος; Chald. דָּרְיָוֶשׁ הַ מָּדָאָה, Sept. Δαρεῖος ὁ Μῆδος), "the son of Ahasuerus of the seed of the Medes" (ix, 1, Sept. Δαρεῖος ὁ υἱὸς Ἀσυήρου), who succeeded to (קִבֵּל) the Babylonian kingdom on the death of Belshazzar, being then sixty-two years old (Dan. v, 31; ix, 1), B.C. 538. Only one year of his reign is mentioned (Dan. ix, 1; xi, 1), but that was of great importance for the Jews. Daniel was advanced by the king to the highest dignity (Dan. vi, 1 sq.), probably in consequence of his former services (compare Dan. v, 17); and after his miraculous deliverance, Darius issued a decree enjoining throughout his dominions "reverence for the God of Daniel" (Dan. vi, 25 sq.). See MEDE.

The statement (Dan. vi, 28) that "Daniel prospered in the reign of Darius, and in the reign of Cyrus the Persian," seems to represent him as the immediate predecessor of Cyrus. No Darius occupying this place, nor indeed any Darius anterior to the son of Hystaspes, is found either in profane history or (hitherto) on monuments. See AHASUERUS. Only the Scholiast on Aristoph. (*Eccl.* 602), followed by Suidas (s. v. Δαρεικός), and Harpocration, says that the daric took its name from "another Darius, earlier than the father of Xerxes" (D. Hystaspis). Herodotus and Ctesias, differing widely in other respects, agree in making Astyages last king of the Median dynasty, with no male heir, conquered and deposed by Cyrus, first king of the Medo-Persian dynasty at Babylon. Xenophon, however, in the *Cyropædia* (i, 5, 2) introduces, as son and successor of Astyages, and uncle (mother's brother) of Cyrus, a second Cyaxares, acting under whose orders Cyrus takes Babylon, and receives in marriage his daughter, unnamed, with Media as her portion. Josephus (*Ant.* x, 11, 1) clearly means the Cyaxares II of Xenophon when he says that "Darius was the son of Astyages, but known to the Greeks by a different name;" and the statement of Aben Ezra, who reports from "a book of the kings of Persia" that this Darius was Cyrus's father-in-law, probably rests at last on the supposed authority of Xenophon. See CYRUS. Under these circumstances, the extreme obscurity of the Babylonian annals has given occasion to three different hypotheses as to the name under which Darius the Mede is known in history.

1. The first of these, which identifies him with Darius Hystaspis, rests on no plausible evidence, and may be dismissed at once (Lengerke, *Dan.* p. 219 sq.). See below, No. 2.

2. Another identification is that maintained by Marcus von Niebuhr (*Gesch. Ass. u. Bab.* p. 45), by which Darius is represented as the personal name of "Astyages," the last king of the Medes. It is contended that the name "Astyages" was national and not personal, and that Ahasuerus represents the name Cyaxares, borne by the father of "Astyages" (Tob. xiv, 15). On the contrary, however, Ahasuerus (Heb. *Achashverosh*) is Xerxes (cuneiform *Khshyarsha*), and not Κυαξάρης (cuneiform *Uvakshatra*). The description of the unnamed king in Æschylus (*Pers.* 763 sq.) as one whose "feelings were guided by wisdom," is moreover assumed, on this view, to be applicable to the Darius of Scripture and the Astyages of Herodotus. Assuming the immediate fulfilment of the announcement of Dan. v, 28, in the catastrophe of vi, 1, Niebuhr (*ib.* p. 91 sq.) determines that Belshazzar is Evil-merodach, son and successor of Nebuchadnezzar; that, on his death (slain by Neriglissar, his sister's husband), B.C. 559, Astyages, who is Daniel's Darius the Mede, reigned one year at Babylon, which year in the Canon is 1 Neriglissar; in the following year he was conquered by Cyrus, B.C. 558, in exact accordance with the apparent incompleteness of the political arrangements which Darius "purposed" to make (Dan. vi, 3, עָשִׂית). For the short duration of his supreme power may have caused his division of the empire (Dan. vi, 1)—a work congenial to his character—to fall into abeyance, so that it was not carried out till the time of his namesake Darius Hystaspis: a supposition that may go for what it is worth. Daniel himself passed from the service of Darius to that of Cyrus, and did not again return to Babylon; so Dan. vi, 28 is explained. The mention, Dan. viii, 1, of the *third* year of Belshazzar makes a difficulty—not as Von Niebuhr puts it, because Evil-merodach has but two years in the Canon, for the actual reign may very well have reached its third year, but from the mention of Susa as the scene of the vision; for Susa, being Median, was not subject to any Chaldæan king. The explanation gravely proposed by Niebuhr is, that Daniel, while at Susa in the service of Darius the Mede, continued to date by years of Belshazzar's reign, and this though he is related to have been present in Babylon the night in which Belshazzar was slain. The difficulty is not confined to Niebuhr's scheme: Belshazzar, whoever he was, was a Chaldæan; and the explanation may be, that the prophet is at Susa, not in bodily presence, but transported in spirit to the city which was to be the metropolis of the Persian monarchy, the fate of which, under the emblem of the ram, is portrayed in the ensuing vision. See DANIEL. After the fall of this Darius Astyages, Babylon recovered its independence under Nabonned, to fall finally under the arms of Cyrus, B.C. 538. See BABYLON.

The chronological difficulties which have been raised (Rawlinson, *Herodotus*, i, 331) against the identification of Darius with Astyages on the assumption that the events in Dan. v relate to the taking of Babylon by Cyrus (B.C. 538), in which case he would have ascended the throne at seven years of age, are indeed set aside by the view of Niebuhr; but it is clogged with other objections (in addition to those already alluded to), which render it as untenable as it is ingenious and intricate, to say nothing of the fact that it is made up of a series of assumptions throughout. In the first place, the supposition that Belshazzar was Evil-merodach is inadmissible; for it is now pretty well deter-

mined that he was the son of Nabonned, the actually last king of the Babylonian line. See BELSHAZZAR. Secondly, this hypothesis sets up a Medo-Persian prince at Babylon during the very time assigned by well-approved history to a native sovereign, and even then leaves a blank of eighteen years between him and Cyrus, whom Daniel's history and prophecies evidently make immediately contiguous. See ASTYAGES.

3. There remains, therefore, but one other view, which was adopted by Josephus (*Ant.* x, 11, 4), and has been supported by many recent critics (Bertholdt, Von Lengerke, Hävernick, Hengstenberg, Auberlen, and others). According to this, the "Darius" in question was *Cyaxares* II, the son and successor of Astyages, who is commonly regarded as the last king of Media. It is supposed that the reign of this Cyaxares has been neglected by historians from the fact that through his indolence and luxury he yielded the real exercise of power to his nephew Cyrus, who married his daughter, and so after his death received the crown by direct succession (Xen. *Cyrop.* i, 5, 2; iv, 5, 8; viii, 5, 19). It is true that the only direct evidence for the existence of a second Cyaxares is that of Xenophon's pædagogic romance. The title "Cyrus [filius] Cyaxaris," which has been quoted from an inscription (Auberlen, *Daniel u. d. Offenbarung*, p. 18), is either a false reading or certainly a false translation (Niebuhr, *Gesch. Ass. u. Bab.* p. 214, n. 4); and the passage of Æschylus (*Pers.* p. 766) is not very consistent with the character assigned to Cyaxares II. On the other hand, Herodotus expressly states that "Astyages" was the last king of the Medes, that he was conquered by Cyrus, and that he died without leaving any male issue (Herod. i, 73, 109, 127 sq.); and Cyrus appears as the immediate successor of "Astyages" in the Chronicle of Eusebius (*Chron.* ad Ol. 54; Syncell. p. 188; comp. Bel and Dragon, i). These objections, however, are not insuperable, and must give way before the manifest exigencies of the case (see Bertholdt's able excursus on the subject in his *Commentar zu Dan.*). We may add that an important chronological difficulty is best adjusted by assuming the existence and reign of this Cyaxares (Clinton's *Fasti Hellenici*, p. 301 sq.). See CYAXARES.

2. "Darius, king of Persia," in whose second year the building of the Temple was resumed, and completed in his sixth (Ezra iv, 5, 24; vi, 15), under the prophesying of Haggai and Zechariah, is understood by most writers, ancient and modern, to be Darius son of Hystaspes, whose reign in the Canon extends from B.C. 521 to 485. Scaliger, however, makes him Darius Nothus (B.C. 424–405), and this view has been advocated by the late Dr. Mill (*The Evangelical Accounts of the Birth and Parentage of our Saviour*, etc., 1842, p. 153–165), who refers for further arguments to Hottinger (*Pentas Dissertationum*, p. 107–114). Before we examine the grounds on which this conclusion rests, it will be convenient to consider the difficulties with which it is attended.

Zerubbabel, son of Shealtiel, as prince of the house of David, and Jeshua, son of Jozadak, as high-priest, headed the first colony of exiles from Babylon in the first year of Cyrus (Ezra iii, 2), at which time neither can have been less than twenty years old. By these same two persons the work of rebuilding the Temple was resumed and completed after its suspension. Now from the first year of Cyrus, in the Biblical reckoning (B.C. 536), to the second of Darius Nothus (B.C. 423), are 113 years; so that, if he be the Darius of this history, both Zerubbabel and Jeshua must then have reached the age of 130 years at least. This is incredible, if not in itself, certainly under the entire silence of the history and the contemporary prophets as to a fact so extraordinary. Moreover, that the work of rebuilding the Temple should have been abandoned for a century and more is scarcely conceivable. Its suspension during fifteen or sixteen years is sufficiently accounted for by the history and the representations of the prophets. The adversaries "weakened the hands of the people of Judah, and troubled them in building, and hired counsellors against them to frustrate their purpose all the days of Cyrus, even until the reign of Darius" (Ezra iv, 4, 5). Besides molesting the builders in their work, they prevailed by their machinations at the court of Cyrus, or of his viceroy, to bring it to a stand-still, by interposing official obstacles, stopping the grants from the royal treasury (vi, 4), and the supply of materials from the forest and the quarry (iii, 7). So the people were discouraged: they said, "The time is not come for the house of the Lord to be built," and turned to the completion of their own houses and the tilling of their lands (Hagg. i, 3). This is intelligible on the supposition of an interval of fifteen or sixteen years, during which, there having been no decree issued to stop it, the work was nominally in progress, only deferred, as the builders could allege at the time of its resumption, "Since that time (2d of Cyrus), even until now, hath it been in building, and yet it is not finished" (Ezra v, 16). But in no sense could the Temple be said to have "been in building" through the entire reigns of Cambyses, Darius, Xerxes, and Artaxerxes I: there is no testimony to the fact, nor any means of accounting for it. Again, the persons addressed by Haggai are "the residue of the people" who came from Babylon with Zerubbabel and Jeshua, some of whom had seen the first house in its glory (ii, 2, 3), i. e. who might be some 80 years old on the usual view, but on the other must have been 170 at the least. The prophet further admonishes his countrymen that the blights, droughts, and mildews which year by year disappointed their labors in the fields were the chastisement of their want of faith in letting the house of God lie waste, while they dwelt in their "ceiled houses" (i, 4–17); so long as they had been guilty of this neglect, so long had they been visited with this punishment. On the one supposition, this state of things had lasted from twelve to fifteen years at most; on the other, we are required to imagine that the curse had been on the land for three successive generations, an entire century. Lastly, in the same second year of Darius, Zechariah distinctly intimates what length of time had elapsed from the destruction of the first Temple—"threescore and ten years" (i, 12). So in vii, 5, mention is made of a period of 70 years, during which the people had "fasted and mourned in the fifth and seventh month." The events commemorated by those fasts were the destruction of the Temple in the fifth, and the murder of Gedaliah in the seventh month of the same year. From that year to the second of Darius I are almost, if not exactly, 70 years. To the corresponding year of Darius II the interval is more than 160 years, and the mention of "those 70 years" is quite unintelligible, if that be the epoch of Zechariah's prophesying. Certainly, if the prophecies of Haggai and Zechariah, and the first five chapters of Ezra, are worth anything as testimony, "the second year of Darius" must lie within one generation from the decree of Cyrus, and not more than 70 years from the destruction of the first Temple.

The reasons alleged on the other side may be thus stated: 1. In Ezra iv, between the edict of Cyrus for the return of the exiles and rebuilding of the Temple, and that of Darius for the completion of the work after its discontinuance, two Persian kings are named, Achashverosh and Artachshashta, "which the names on the Zendic monuments will not permit us to apply to other kings than Xerxes and his son" (Dr. Mill, *u. s.* 153, *note*). The Persian history, as related by the Greeks and the Astronomical Canon, give three names in succession, Xerxes, Artaxerxes I, Darius II; Ezra, in like manner, three, Achashverosh, Artachshashta, and Dareyavesh. By those who hold this last to be Darius, son of Hystaspes, the first two are commonly

supposed to be Cambyses and the impostor Smerdis, whom Justin (i, 9) calls Oropasta, Ctesias (*de reb. Pers.* 10) Sphendadates, who reigned under the name of Cambyses's younger brother Tany-oxarces (see Ewald, *Gesch. des V. I.* iv, 81 and 118). But nowhere on monuments is Cambyses called Khshyarsha, or Smerdis Artakashasha; the former is constantly Kabujiya (Pers.), Kambudsiya (Bab.), Kembath (hierogl.); the latter, Bart'iya (Pers.), Bardsija (Bab.). Moreover, as Artachshashta (or —shasht) elsewhere in Ezra and Neh. is constantly Artaxerxes, and it scarcely admits of a doubt that Achashverosh in Esther is Xerxes, it would be strange if these two names were here applied to other quite different kings.

The true explanation of this difficulty, proposed long ago by Mr. Howes, and adopted by Dr. Hales, has been recently put forward by Bertheau (in the *Kurzgefast. exeget. Hdb.* on Ezra, Neh., and Esther, 1862, p. 69–73). This writer had formerly upheld the more usual view (*Beiträge zu der Gesch. der Isr.* p. 396); so had Vaihinger (in the *Studien u. Kritiken*, 1854, p. 124), who (*ib.* 1857, p. 87) abandons it for the other. (See also Schultz, *Cyrus der Grosse*, in the *Stud. u. Krit.* 1853, p. 624, and Bunsen, *Bibelwerk*). It is clear that, as in iv, 24, the narrative returns to the point at which it stood in verse 5; in the interposed portion it either *goes back* to times before Darius, for the purpose of supplying omitted matter, or *goes forward* to record the successful machinations of the people of the land under subsequent kings, Xerxes and Artaxerxes I. But nothing in the contents of ver. 6–23 intimates a reverting to an earlier time. After reading of Darius we naturally take for granted that Ahasuerus and Artaxerxes are later than he. It appears that the adversaries had succeeded in hindering the building of the Temple till the second year of Darius. In the beginning of the next reign (Xerxes) they "wrote an accusation," the purport and issue of which are not recorded. In the following reign mention is made of another letter addressed to Artaxerxes, its contents not specified; but a second letter to the same king is given *in extenso*, together with the royal rescript. It is represented to the king that the Jews are building the city, and have "set up the walls thereof, and joined (excavated) the foundations." The rescript orders that this work be made to cease. Not a word is said of the Temple. It may indeed be alleged that the "walls" are part of it, intended for its defence; but with their straitened resources the builders would hardly attempt more than was essential to the fabric itself. Besides, in the representations given by Hag. and Zech. from their own observation, nothing implies that quite recently the people had been actively engaged in the work of rebuilding either city walls or Temple, as according to these documents they had been, if Artachshashta be the impostor Smerdis with his brief reign of a few months; nor, again, is it possible to reconcile the statement in Ezra v, 16, "Since that time even until now (2 Darius) hath it (the Temple) been in building, and yet it is not finished," with the assumption that the work had been peremptorily stopped by command of Smerdis. But it is certain that at some time between the 7th and the 20th year of Artaxerxes some great reverse befel the colonists, in consequence of which "the wall of Jerusalem was broken down, and the gate thereof burned with fire," Neh. i, 3 (for it is absurd to imagine that this can relate to the desolation effected by Nebuchadnezzar a hundred and forty years before), and the documents under consideration show what that reverse was. It was the result of that rescript of Artaxerxes, in virtue of which "Rehum and Shimshai and their companions went up to Jerusalem to the Jews," and made them to cease by force and power" (Ezra iv, 23); to cease from walling the *city* (ver. 21), not from building the Temple, which was finished long before. So far, all is plain and consistent. But at ver. 24, with the word בְּאֵדֵין, "at that time," prop. "at the same time," arises the difficulty. Were the last clause of verse 5, "until the reign of Darius," absent, the obvious import would be, that at the time when the order from Artaxerxes caused the building of the wall to cease, the work of rebuilding the Temple ceased also, and consequently that Darius (ver. 24) reigned after Ahasuerus and Artaxerxes. But as this view is beset with insuperable difficulties, in whichever way it is taken, i. e. alike whether Darius be supposed to be the first or the second of that name, we are forced by the necessity of the case to conclude that ver. 24 refers not to what immediately precedes, but to the time spoken of above ver. 4, 5, and that the whole passage from ver. 6 to 23 is digression. Having shown how the machinations of "the people of the land" prevailed for a time to delay the rebuilding of the Temple, the narrative breaks off at that point to notice their subsequent, also for a while successful, plottings against the building of the city and its walls. If the בְּאֵדֵין *can* only refer to the matter immediately preceding, we must either accept the consequences, part incredible and absurd, part directly opposed to statements of the contemporary prophets, or charge it as an error upon the redactor of this book, that he inserted ver. 6–23 in the wrong place (so Kleinert in the Dorpat *Beiträge zu den theol. Wissensch.* 1832). Considered as a prolepsis, it is, as Bertheau remarks, less striking than that which occurs in vi, 14: "and they builded and finished (the Temple, viz. in 6 Darius) . . . according to the commandment of Cyrus and Darius, *and Artaxerxes*, king of Persia."

2. A second reason alleged by Dr. Mill (*u. s.* p. 165, note) is "the circumstance that, in the next ascent from Babylon, that of Ezra himself, . . . the chief of David's house was removed from Zorobabel by at least *six* generations . . . thus proving . . . the impossibility of the descendant's ascent from Babylon being earlier than the reign next to that of Darius Nothus, viz. that of Artaxerxes II." This argument is derived from the Davidic genealogy, 1 Chron. iii, 19–22, compared with Ezra viii, 2. It is assumed that Hattush in both places is the same person; now, in the genealogy, it is alleged there are at least six generations between his ancestor Zerubbabel and him, yet he accompanied Ezra from Babylon; of course this is impossible, if between the ascent of Zerubbabel and that of Ezra are but eighty years (1 Cyrus to 7 Artaxerxes Longimanus). Dr. Mill (p. 152, note) mentions "four ways of exhibiting the offspring of Hananiah, son of Zerubbabel;" the first, that of the common Hebrew text and our version, which, "if intelligible, yet leaves the number of generations undetermined;" and three others, followed by ancient interpreters, and versions, which result severally in making Hattush sixth, eighth, and ninth from Zerubbabel. There is no absolute necessity for departing from the Hebrew text, which is both "intelligible" and consistent with the customary chronology. The genealogy, perhaps, proceeds thus: 1. Zerubbabel; 2. his children, Meshullam, *Hananiah*, Shelomith (sister), and five others; 3. the sons of this Hananiah are Pelatiah and Jeshaiah; *and there the pedigree of Zerubbabel ends*, i. e. with the two grandsons. Then, "the sons of Rephaiah, the sons of Arnan, the sons of Obadiah, the sons of Shechaniah; and the sons of Shechaniah, Shemaiah; and the sons of Shemaiah, *Hattush*" and five others. That is to say, the genealogist, having deduced the Davidic line through Solomon, and the regal succession down to the grandsons of Zerubbabel, proceeds to mention four other branches of the house of David, and gives a particular account of the fourth, namely, of Shemaiah, the father of that Hattush who went up from Babylon with Ezra, and was in his generation the representative of the Davidic house of Shechaniah. (So likewise Movers, *Ueber die biblische Chronik*, p. 29;

Hävernick, *Handb. der Einleit. in das A. T.* ii, 1, 266; Herzfeld, *Gesch. des V. I. von der Zerstörung des ersten Tempels an*, i, 379; Keil, *Apolog. Versuch über die Bücher der Chronik*, p. 43. On the other hand, Ewald, *Gesch. des V. I.* i, 219, note, makes Shechaniah son of Hananiah and father of Shemaiah, so that Hattush is fourth from Zerubbabel; and so Bertheau in the *Kgf. exeget. Hdb.* on 1 Chron. iii, 21; which view is consistent with the usual chronology, as of course it is quite possible that a grandson of Zerubbabel's grandson may have been adult at the time of Ezra's mission, eighty years after the 1st of Cyrus. See, however, a different explanation in Strong's *Harm. and Expos. of the Gospels*, p. 17, note *m*.) See ZERUBBABEL. So, in fact, the Hattush who accompanied Ezra is described (according to the reading, proposed by some, of the passage, viii, 2, 3), "of the sons of David, *Hattush, of the sons of Shechaniah;*" for the last clause is out of place as prefixed to the following enumeration "of the sons of Parosh," etc. So the Sept. read it (*ἀπὸ υἱῶν Δαυίδ, Ἀττοὺς ἀπὸ υἱῶν Σαχανία*); and the apocryphal version more plainly still (1 Esdras viii, 29, *ἐκ τῶν υἱῶν Δανιὴλ, Λαττοὺς ὁ Σεχενίου*). But still more probably *a different Hattush* (q. v.) is meant.

3. The concluding argument on the same side is derived from "the circumstance that in the next ascent from Babylon after that of Ezra, and in the same reign, the principal opponent of Nehemiah in his work of rebuilding Jerusalem was a man [Sanballat] who can be demonstrated to have continued an active chief of the Samaritans till the time of Alexander the Great, and to have then founded the temple on Mount Gerizim, Joseph. *Ant.* xi, 8, 2–4" (Dr. Mill, *u. s.*). Josephus's story is that Sanballat, satrap in Samaria of Darius III, had given his daughter in marriage to a brother of the high-priest Jaddua, named Manasses, who, refusing to put her away, took refuge with his father-in-law, and became the first high-priest of the rival temple built on Mount Gerizim by permission of Alexander, then engaged in the siege of Tyre. All this, with perhaps the marvellous romance that follows about Alexander's reception by the high-priest Jaddua, needs a better voucher than Josephus before it can be accepted as history. The story about Manasses and Sanballat is clearly derived from the last recorded act of Nehemiah, his expulsion of a son of Joiada, and grandson of the then high-priest Eliashib, who was son-in-law to Sanballat the Horonite. It is remarkable that Josephus, in his account of Nehemiah, makes no mention of this act, and does not even name Sanballat: the reason of which may be that, after referring the mission of Nehemiah, as also of Ezra, to the reign of Xerxes, to extend the life of this active chief of the Samaritans from that time to the time of Alexander, full 130 years later, would have been too absurd. See SANBALLAT. So is the assumption of Petermann (s. v. "Samaria," in Herzog's *Real-Encyklop.* xiii, 1, p. 367) that there were two Sanballats, one contemporary with Nehemiah, the other with Alexander, and that both had daughters married into the family of the high-priest (Eliashib and Jaddua), whose husbands were therefore expelled. As to Jaddua, the fact may be, as Josephus represents it, that he was still high-priest in the time of Alexander. The six who are named in lineal succession in Neh. xii, 10, 11; Jeshua, Joiakim, Eliashib, Joiada, Johanan, and Jaddua, will fill up the interval of 200 years from Cyrus to Alexander. Of these, Eliashib was still high-priest in the thirty-second year of Nehemiah's Artachshashta, and later (xiii, 6, 28); it is scarcely possible that this could be Artaxerxes Mnemon, whose thirty-second year is removed from the first of Cyrus by more than 160 years, which is far too much for a succession of three high-priests. It does not follow from the mention of the successors of Eliashib down to Jaddua in xii, 10 sq., that Nehemiah lived to see any of them in the office of high-priest, but only that these genealogies and lists were brought down to his own times by the compiler or last redactor of this book (see under No. 3 below). See NEHEMIAH.

DARIUS HYSTASPIS (i. e. son of Hystaspes or Vashtaspa), the fifth in descent from Achæmenes, the founder of the Perso-Arian dynasty, or ninth in the succession of the Archæmenids (comp. Herod. vii, 11), as he styles himself in the *Behistun* (q. v.) *Inscription* (Rawlinson, *Herod.* ii, 491), being third descendant from the younger brother of Cambyses, father of Cyrus, was, according to the popular legend (Herod. i, 209, 210), already marked out for empire during the reign of Cyrus. Cambyses having died without issue, and no other son of Cyrus surviving, Darius was hereditary successor to the throne, to which, as Herodotus relates, he was elected on the death of the pretended Smerdis by his fellow-conspirators. In the Canon, the date of his succession is B.C. 521, and the length of his reign 36 years, both points confirmed by Herodotus (vii, 1–4), according to whom he died five years after the battle of Marathon (therefore B.C. 485), after a reign of thirty-six years (also attested by an Egyptian inscription, Rosellini, *Mon. Storici*, ii, 164). He devoted himself to the internal organization of his kingdom, which had been impeded by the wars of Cyrus and Cambyses, and the confusion of the reign of Smerdis. His designs of foreign conquest were interrupted by a revolt of the Babylonians, under a pretender who bore the royal name of Nabukudrassar (Niebuhr, *Gesch. Ass. und Bab.* p. 94), which was at length put down, and punished with great severity (B.C. cir. 516). After the subjugation of Babylon, Darius turned his arms against Scythia, Libya (Herod. iv, 145 sq.), and India (Herod. iv, 44). Thrace and Macedonia acknowledged his supremacy, and some of the islands of the Ægæan were added to his dominion in Asia Minor and the seaboard of Thrace (B.C. 513–505). Shortly afterwards he came into collision with Greece, and the defeat of Marathon (B.C. 490) only roused him to prepare vigorously for that decisive struggle with the West which was now inevitable. His plans were again thwarted by rebellion. Domestic quarrels (Herod. vii, 2) followed on the rising in Egypt, and he died (B.C. 485) before his preparations were completed (Herod. vii, 4).

With regard to the Jews, Darius Hystaspis pursued the same policy as Cyrus, and restored to them the privileges which they had lost. For the usurpation of Smerdis involved a religious as well as a political revolution, and the restorer of the Magian faith willingly listened to the enemies of a people who had welcomed Cyrus as their deliverer (Ezra iv, 17 sq.). But in the second year of Darius, B.C. 520, as soon as his power had assumed some solidity, Haggai (Hag. i, 1; ii, 1, 10) and Zechariah encouraged their countrymen to resume the work of restoration (Ezra v, 1 sq.), and when their proceedings came to the king's knowledge he confirmed the decree of Cyrus by a new edict, and the Temple was finished in four years (B.C. 516; Ezra vi, 15), though it was apparently used before that time (Zech. vii, 2, 3). The benefits conferred by Darius upon the Jews are not mentioned in his inscriptions. Of the satrapies, twenty in number, into which he formed the empire, Palestine would be part of the fourth, including Syria, Phœnicia, and Cyprus. The fourth king of Persia, who should "be far richer than they all, and by his strength, through his riches, should stir up all against the realm of Grecia (Dan. xi, 2), may be Darius, if the pseudo-Smerdis is reckoned, but the description better suits Xerxes (see Hitzig in the *Kgf. exeget. Hdb.* in loc.).

3. "Darius the Persian" (הַ חַפַּרְסִי, Sept. *Δαρεῖος ὁ Πέρσης*) occurs (Neh. xii, 22) in a passage which merely states that the succession of priests was registered up to his reign. The question as to the person

here intended bears chiefly on the authorship of the passage. It may be briefly stated thus: If, as is more commonly believed, this king be Darius Nothus (originally Ochus), who came to the throne in B.C. 424, and reigned nineteen years, we must (assuming that the Jaddua here mentioned is the high-priest who went out to meet Alexander the Great [q. v.] on his entry into Jerusalem, Josephus, *Ant.* xi, 8) conceive either that Jaddua reached an age exceeding a century—for so long he must have lived, if he was already high-priest in the reign of Darius Nothus, and saw Alexander's entry; or that the Jaddua of Nehemiah and of Josephus are not the same person. Carpzov has tried to show, from this very chapter, that the Jaddua of ver. 22 was a Levite, and not the high-priest (*Introduct. ad Libr. Vet. Test.* p. 347). See JADDUA. If, however, the register was continued to a later time, as is not improbable, the occurrence of the name Jaddua (ver. 11, 22), who was high-priest at the time of the invasion of Alexander (q. v.), points to Darius III Codomannus, the antagonist of Alexander, and last king of Persia, B.C. 336–330 (1 Macc. i, 1). Compare Jahn, *Archäol.* II, i, 272 sq.; Keil, *Lehrb. d. Einleit.* § 152, 7, who defends at length the integrity of the passage. On this latter view, we must either assume that Nehemiah himself attained the age of 130 years at least, or that this passage is an interpolation by a later hand (Bertholdt, *Einleit.* iii, 1031). Perhaps the meaning of the verses in question only is, that the priests enumerated were those included in the genealogical records down to the time of the return from Babylon, i. e. as finally made out by Nehemiah and Ezra (ver. 26); and therefore containing those prospectively high-priests, although at the time but children. Supposing that Jaddua was five years of age at the time of the closing of the O. T. canon [see EZRA], in B.C. 406 (to which date Nehemiah undoubtedly lived), he would have been but about fifty years old on his accession as high-priest (q. v.), B.C. cir. 359. The king referred to in Neh. xii, 22, would then be Darius Nothus. This explanation is consistent with all the circumstances, and leaves the authenticity of the passage unaffected.

DARIUS II was named OCHUS (Ὦχος), but on his accession he was distinguished by the epithet NOTHUS (Νόθος), from his being one of the seventeen illegitimate sons of Artaxerxes I or Longimanus, who made him satrap of Hyrcania. He rebelled against Sogdianus, another brother, who had murdered their father, and, with the aid of several of the provincial satraps, succeeded in gaining supreme power, putting the usurper to death. He was a weak prince, completely under the control of his favorites, and especially of his wife Parysatis; and his reign was distinguished by continual insurrections, particularly that of the Egyptians, who succeeded in gaining for a while their independence (B.C. 414). Darius died in B.C. 405–4, and was succeeded by his oldest son Artaxerxes II (Ctesias, *Pers.* xliv–lvi; Diod. Sic. xii, 71; xiii, 36, 70, 108; Xenoph. *Hell.* i, 2, 19; ii, 1, 8; *Anab.* i, 1, 1).

Darkemon. See DARIC.

Darkness (properly חֹשֶׁךְ, *cho'shek*; σκότος), the absence of light; the state of chaos as represented by the sacred writer in Genesis i, 2. See CREATION.

The plague of darkness in Egypt (Exod. x, 21) was one so thick and intense as to seem almost palpable. The "palpable obscure" of Milton appears to express the idea in a forcible manner. The Tamul translation gives "darkness which causeth to feel," or so dark that a man is obliged to feel his way, and until he shall have so felt he cannot proceed. Some expositors are disposed to contend for the literal palpableness of this darkness by supposing that the agency employed was a wind, densely filling the air with particles of dust and sand. Such winds are not unknown in the Eastern deserts, and they are always very appalling and destructive in their effects. Others think that a dense fog was spread over the land; but a darkness consisting of thick clammy fogs and exhalations, so condensed as to be perceived by the organs of touch, might have extinguished animal life in a few hours. Whether the darkness was exhibited in these or any other forms, the miracle must have struck the Egyptians with astonishment and horror, as the sun was one of their principal deities, and was supposed to be the source of life and the soul of the world, and with the moon to rule all things. See PLAGUES OF EGYPT.

In the Gospels of Matthew (xxvii, 45) and Luke (xxiii, 44) we read that, while Jesus hung upon the cross, "from the sixth hour there was darkness over all the land unto the ninth hour." Most of the ancient commentators believed that this darkness extended to the whole world. But their arguments are now seldom regarded as satisfactory, and their proofs even less so. Of the latter the strongest is the mention of an eclipse of the sun, which is referred to this time by Phlegon Trallianus, and, after him, by Thallus (ap. Africanum). But even an eclipse of the sun could not be visible to the whole world, and neither of these writers names the place of the eclipse. Some think it was Rome; but it is impossible that an eclipse could have happened from the sixth to the ninth hour *both* at Rome and Jerusalem. It is, therefore, highly probable that the statement of Phlegon, which in the course of time has come to be quoted as independent authority, was taken from the relation of the Christians or from the Scriptures. That the darkness could not have proceeded from an eclipse of the sun is further placed beyond all doubt by the fact that, it being then the time of the Passover, the moon was at the full. This darkness may therefore be ascribed to an extraordinary and preternatural obscuration of the solar light, which might precede and accompany the earthquake that took place on the same occasion; for it has been noticed that often before an earthquake such a mist arises from sulphureous vapors as to occasion a darkness almost nocturnal (see the authors cited in Kuinöl *ad Matt.* xxiv, 29, and compare Joel iii, 3; Rev. vi, 12 sq.). See EARTHQUAKE. Such a darkness might extend over Judæa, or that division of Palestine in which Jerusalem stood, to which the best authorities agree that here, as in some other places, it is necessary to limit the phrase πᾶσαν τὴν γῆν, rendered "all the land." In the "Acts of Pilate" (q. v.), which have been quoted by Justin Martyr and Tertullian, we find the following document, in which this preternatural darkness is referred to. See ECLIPSE.

"Pilate to Tiberius, etc.

"I have at length been forced to consent to the crucifixion of Jesus Christ, to prevent a tumult among the Jews, though it was very much against my will. For the world never saw, and probably never will see, a man of such extraordinary piety and uprightness. But the high-priests and Sanhedrim fulfilled in it the oracles of their prophets and of our sibyls. While he hung on the cross, a horrid darkness, which covered the earth, seemed to threaten its final end. His followers, who profess to have seen him rise from the dead and ascend into heaven, and acknowledge him for their God, do still subsist, and, by their excellent lives, show themselves the worthy disciples of so extraordinary a master. I did all I could to save him from the malice of the Jews, but the fear of a total insurrection made me sacrifice him to the peace and interest of your empire," etc.

The "thick darkness" in which God is said to have been (Exod. xx, 21), was doubtless the "thick cloud upon the mount" mentioned chap. xix, 16; and the "thick darkness" in which "the Lord said that he would dwell" (1 Kings viii, 12), has reference to the cloud upon the mercy-seat, in which he promised to "appear" to Aaron, and which seems to have been rather a cloud of glory and light than of darkness. See CLOUD. When it is said (Psa. xcvii, 2) "clouds and darkness are round about him," the reference is apparently to the inscrutability of the divine nature and working. The darkness which is frequently (Isa. xiii, 9, 10; Joel ii, 31; iii, 15; Matt. xxiv, 29, etc.) con-

nected with the coming of the Lord has reference to the judgments attendant on his advent.

"Darkness is often used symbolically in the Scriptures as opposed to light, which is the symbol of joy and safety, to express misery and adversity (Job xviii, 6; Psa. cvii, 10; cxliii, 3; Isa. viii, 22; ix, 1; lix, 9, 10; Ezek. xxx, 18; xxxii, 7, 8; xxxiv, 12); hence also captivity (Isa. xlvii, 5; Lam. iii, 6). 'He . . . that maketh the morning darkness,' in Amos iv, 13, is supposed to be an allusion to the dense black clouds and mists attending earthquakes. 'The day of darkness' in Joel ii, 2, alludes to the obscurity occasioned by the flight of locusts in compact masses. See Locust. In Ezek. viii, 12, darkness is described as the accompaniment of idolatrous rites. Darkness of the sun, moon, and stars is used figuratively to denote a general darkness or deficiency in the government or body politic (Isa. xiii, 10; Ezek. xxxii, 7; Joel ii, 10–31). In Eph. v, 11, the expression 'works of darkness' is applied to the heathen mysteries on account of the impure actions which the initiated performed in them. 'Outer darkness' in Matt. viii, 12, and elsewhere, refers to the darkness outside, in the streets or open country, as contrasted with the blaze of cheerful light in the house, especially when a convivial party is held in the night time. And it may be observed that the streets in the East are utterly dark after nightfall, there being no shops with lighted windows, nor even public or private lamps to impart to them the light and cheerfulness to which we are accustomed. This gives the more force to the contrast of the 'outer darkness' with the inner light. Darkness is used to represent the state of the dead (Job x, 21; xvii, 13). It is also employed as the proper and significant emblem of ignorance (Isa. ix, 2; lx, 2; Matt. vi, 23; John iii, 9; 2 Cor. iv. 1–6)."

Dar'kon (Heb. *Darkon'*, דַּרְקוֹן; according to Gesenius, *strewer;* according to Fürst, *porter;* Sept. Δαρκών, Δορκών; Vulg. *Deron*), a person whose "children" or descendants were among "Solomon's servants" that returned from Babylon with Zerubbabel (Ezra ii, 56; Neh. vii, 58). B.C. ante 536.

Darling (יָחִיד, *yachid'*, *only*, hence *beloved*) stands (Psa. xxii, 21; xxxv, 17) for *life* (as a thing not to be replaced); hence *self* (like נֶפֶשׁ, *soul;* comp. "dear me").

Darom (דָּרוֹם; Sept. λίψ, and Δαρόμ). This word is generally used in Scripture to denote "the south" (Ezek. xl, 24; Job xxxvii, 17). Its meaning in Deut. xxxiii, 23 is doubtful. Moses in blessing Naphtali says, "Possess thou the *sea* and *Darom*." The A. V. renders it "the west and the south;" the Septuagint, θάλασσαν καὶ λίβα; the old Latin, "mare et Africum;" and the Vulgate, "mare et meridiem." The territory of Naphtali lay on the north-east of Palestine. It did not touch or go near the Mediterranean; consequently "the sea" cannot mean the Mediterranean. The sea of Galilee is doubtless referred to, the whole western shore of which belonged to Naphtali. The Septuagint rendering of Darom in this passage (λίψ, i. e. Africa) must be wrong. Naphtali never had any connection with Africa, or with that region on its northern frontier afterwards called Darom. The word seems here to denote a district near Tiberias, and probably the sunny plain of Gennesaret, which surpassed all the rest of Palestine in fertility (Joseph. *War*, iii, 10, 8). With this agrees the probable etymology of the word, which, according to Gesenius, signifies *bright*, according to Fürst, *glowing*.

In Ezek. xx, 46 (xxi, 2), Darom appears to be a proper name. "Son of man, set thy face towards Teman, and drop the word towards *Darom*." The A. V. translates both words "south," but the Septuagint more correctly Θαιμάν and Δαρώμ. Instead of Δαρώμ Symmachus gives Λίβα. We learn from Jerome and other ancient writers that the plain which lies along the southern border of Palestine and extends towards Egypt was formerly called Darom. Thus, Jerome says, Duma "is a large village in Darom—that is, in the *south country* in the region of Eleutheropolis, seventeen miles distant from that city" (*Onomast.* s. v. Darom); and Eusebius describes Gerar as situated ὑπὲρ τὸν Δαρωμᾶν (*ib.* s. v. Γέραρα). The name appears to have been applied to the whole plain from the Mediterranean to the Arabah, and southern shore of the Dead Sea (Reland, *Palæst.* p. 185 sq.). In the early ages of Christianity a Greek convent was erected near the coast, about seven miles south of Gaza, and named *Daron*. During the crusades it was converted into a fortress, and was the scene of many a hard struggle between the Christians and Saracens (Will. Tyr. in *Gesta Dei per Francos*, p. 988; Marinus Sanutus, p. 86, 246; Bohadin, *Vita Saladini*, p. 72, and *Index Geog.* s. v. Darounum; Robinson, *Bib. Res.* ii, 375). The site is now marked by a small village called *Deir el-Balah*, "the convent of the dates" (Porter, *Handbook for S. and P.* p. 266).

Dart (in Prov. vii, 23, חֵץ, *chets*, an *arrow*, as elsewhere; in Job xli, 26, מַסָּע, *massa'*, an *arrow;* in 2 Sam. xvii, 14, שֵׁבֶט, *she'bet*, a *rod* or staff, as elsewhere; in 2 Chron. xxxii, 5, שֶׁלַח, *she'lach*, any *missile* weapon; in Job xli, 29, תּוֹתָח, *tothach'*, a *bludgeon;* in the New. Test. βέλος, Eph. vi, 16, or βολίς, Heb. xii, 20, a *javelin*), an instrument of war similar to an arrow or light spear. It is thought that the Hebrews were in the habit of discharging darts from the bow while on fire. These fiery darts were made of the shrub *rothem* or Spanish broom (the *Spartium junceum* of Linn.), which grows abundantly in the Arabian desert. It is probably in reference to this fact that arrows are sometimes compared to lightnings (Deut. xxxii, 23, 42; Psa. vii, 13; cxx, 4; Zech. ix, 14). The fiery darts among the Romans, according to Ammianus Marcellinus, consisted of a hollow reed, to the lower part of which, under the point or barb, was fastened a round receptacle, made of iron, for combustible materials, so that such an arrow had the form of a distaff. This was filled with burning naphtha, and when the arrow or dart was shot from a slack bow (for if discharged from a tight bow the fire went out) it struck the enemies' ranks and remained fixed, the flame consuming whatever it met with; water poured on it increased its violence, and there were no other means to extinguish it but by throwing earth upon it. Similar darts or arrows, which were twined round with tar and pitch and set fire to, are described by Livy as having been made use of by the inhabitants of the city of Saguntum when besieged by the Romans (*Hist.* xxi, 9). The apostle alludes to these fiery darts in Eph. vi, 11–16. See Arms.

Datarius (*datary*), a chancellor in the papal court. His title is derived from *datum*, usually prefixed to the date of the documents issued (e. g. datum, *given*, August 20). He is always a prelate, and sometimes a cardinal, and receives his name from his office, which is to *date* certain petitions for benefices that have been presented and registered: he writes upon them *Datum Romæ apud*, etc. He is empowered to grant, without acquainting the pope therewith, all benefices which do not produce upwards of twenty-four ducats annually; for such as amount to more he is obliged to get the provisions signed by the pope, who admits him to audience every day. If there be several candidates for the same benefice, he has the liberty of bestowing it on any whom he may select. His salary is two thousand crowns, exclusive of perquisites. When the pope's consent has been obtained, the datary subscribes the petition with the words *Annuit sanctissimus*. The pope's assent is subscribed in these words,

Fiat ut petitur, "Be it according to the petition." The pope's bull granting the benefice is then dispatched by the datary, and passes through the hands of many persons, belonging to different offices, who have all their stated fees. It is very expensive to procure the pope's bull for a benefice, and very large sums go into the office of the datary, especially when the provisions are for bishoprics, or other rich benefices.—Buck, *Theol. Dict.* s. v.; Farrar, s. v.

Date (2 Chron. xxxi, 5, margin, for דְּבַשׁ, *debash'*, "*honey*," Sept. *μέλι*, Vulg. *mel*), the fruit of one species of the palm (תָּמָר [Talm. דְּקָל, comp. *δάκτυλος*, date], *φοῖνιξ*, *Phœnix dactilifera* of Linn.). This tree formerly grew abundantly in Palestine (Joel i, 12; Neh. viii, 15; Judg. iv, 5; Mishna, *Biccurim*, i, 10; comp. Pliny, xiii, 6; Tacitus, *Hist.* v, 6, 2; Theoph. *Plaut.* ii, 8; Pausan. ix, 19, 5), especially in certain warm localities (Schubert, *Reisen*, p. 105), namely, around Jericho (which hence was called the Palm City, Josephus, *Ant.* xv, 4, 2; Pliny, v, 15; xiii, 9; Strabo, xvi, 763; Philostr. *Apollon.* vi, 39), En-gedi (Solin. xxxviii, 12), and the Dead Sea (Diod. Sic. ii, 48; xix, 98); also at the Sea of Galilee (Josephus, *War*, iii, 10, 8); as a stately tree (especially fine at Jericho, Strabo xvii, 800; Galen, *Facult. alim.* ii, 26; Buxtorf, *Lex. Chald.* col. 1109; Pliny, xiii, 9), so that on Jewish and Roman coins (also Phœnician, Spanheim. *Præstant. et us. num.* p. 272) it was even employed as the symbol of the country (Froelich, *Ann. Syr. tab.* 18; see the praises of Idumæan palms in Virgil, *Georg.* iii, 12; Sil. Ital. iii, 600; vii, 456; Lucan, iii, 216; Martial, x, 50, 1). At present it is seldom to be met with there (Shaw, *Travels*, p. 297; Schubert, iii, 114; at Jericho there exists but a solitary one, Robinson, *Researches*, ii, 537; at En-gedi none whatever, Robinson, ii, 441); they are abundant, however, and even grow wild in Arabia (in Arabia Petræa they were anciently found here and there, Exod. xv, 27; Num. xxxiii, 9; comp. Burckhardt, *Reisen*, ii, 815; Robinson, i, 256, 264), in Egypt (Strabo, xvii, p. 818; Gellius, vii, 16, 5; Prosp. Alpin. *Plantt. Æg.* c. 7) and Persia (Kämpfer, *Amœn.* p. 669: on the extent of the date-palm, see Link, *Urwelt*, i, 347 sq.; Arago, in the *Annuaire du Bureau des Longitudes*, 1834), in which countries it has from antiquity been regarded as the choicest of fruit-trees (Strabo, xvi, 742; Plato, *Sympos.* viii, 4–5; compare Hasselquist, p. 541). It loves a light, sandy, warm soil (Josephus, *War*, iii, 10, 8), yet not one deficient in moisture (Sirach xxiv, 14; Strabo, xvi, 776; Pallad. *R. R.* xi, 12), attains a height of 30 to 40 (in some instances 60 and even 100) feet, and lives till about 200 years old (Pliny, xvi, 89; Plutarch, *Sympos.* viii, 4, 2; Shaw, p. 128; comp. [in the Sept.] Job xxix, 18); it has a slim (Cant. vii, 7), straight, single trunk of 10 to 18 inches' diameter, covered rather with the scaly remains of the boughs that have fallen or broken off than with a proper bark. At its summit only the palm bears a large number (40 to 80) slender branches, which, growing shorter and shorter towards the top (the bottom ones being some 20 feet long), and bending at the ends in a curve towards the ground, inclose a considerable extent of shade (Wellsted, i, 70). The boughs generally surround the body in a circle six in number, and put forth rush-like, sword-shaped, evergreen (Psa. xcii, 13; comp. Shaw, p. 128) leaves, about 2 inches broad, and 8 to 12 feet long. In the midst of the topmost and youngest branches is found a pointed, pithy heart (*ἐγκέφαλον*, or head), nearly two yards in length, which contains the buds of new twigs and leaves (this, when cut off, was relished as a dainty article of food from the taste of the drupes, Theophr. *Plantt.* ii, 8; Pliny, xiii, 9; Mishna, *Okzin*, iii, 7; Mariti, *Trav.* p. 407). Staminate and pistillate flowers are upon separate stems. This renders an artificial fertilization necessary in order to insure the produce (see Mishna, *Pesach*, iv, 8; Ammian. Marc. xxiv, 3, p. 13, Bip.), for which the right time must be very exactly observed. For in February there appear on the stem, at the joints of the lowest branches, long (even one yard) capsules, inclosed in a leathery skin, which in May shoot up into male blossoms and female buttons. The former are now plucked off (about March), slit through the length, and inserted upon the female germs (Kämpfer, *Amœn.* p. 707; Hasselquist, p. 133, 223 sq.; Shaw, p. 127; Thevenot, ii, 170). See Bough.

Cluster of Date-palm Fruit.

The fruit (Talm. בֻּסְרָא, Surenhusius, *Mischna*, ii, 253; vi, 91), which comes to maturity in about five months (August and September, or October), hangs in clusters (Cant. vii, 7) together, in form like the acorn, but mostly larger, and with a fine ruddy (Diod. Sic.

Ancient Egyptian Cake of preserved Dates, found by Wilkinson at Thebes. At *a* is a Date-stone.

ii, 53) or white skin. The best kind is call *jeni*. They were sometimes used in a fresh state (Heliod. *Æth.* ii, 23; comp. Hasselquist, p. 540) as a very common article of food (Burckhardt, *Arab.* p. 45, 575; Harmar, iii, 415), sometimes dried as a dessert-fruit (Xenoph. *Anab.* ii, 3, 15), and sometimes their juice was pressed out (comp. Jonathan's *Targum* on Deut. viii, 8), which, as *date-wine* (*οἶνος φοινίκων*), was made use of from ancient times (Herod. i, 193; iii, 86; Xenoph. *Anab.* ii, 3, 14; Pliny, xiii, 9; xiv, 19; Philostr. *Apol.* ii, 6, 1; Athen. xiv, 651; Strabo, xvi, p. 742; Dioscor. v, 40; Wilkinson, iii, 174 sq.), or occasionally boiled down into a kind of *palm-honey* (*Targ.* Jon. and *Jerus.* on Deut. viii, 3; Strabo, xi, 742; Pliny, xiii, 9; Ammian. Marcel. xxiii, 10; Josephus, *War*, iv, 8, 3; Shaw, p. 128; Heeren, *Ideen*, I, ii, 46). See Wine; Honey. The dates (*caryotæ*, *φοινικοβάλανοι*) left by this last operation of squeezing, being still further subjected to the action of hot water, and thus *macerated*, are made into an inferior but palatable wine. The ripe dates are also at the present day pressed into large, firm, caky masses, which serve the travellers in caravans as a satisfying and refreshing aliment (Sonnini, ii, 26; Burckhardt, *Arab.* p. 45).

This is the form, similar to that of raisins or figs, in which they appear in modern commerce. From the twigs (ribs of the leaves) baskets are made (Mishna, *Chel.* xxvi, 1), also bird-cages and other wicker-ware; their fibres are twisted into ropes and thread, but the leaves themselves are manufactured into baskets, mats, and brooms (Horace, *Sat.* ii, 4, 83; Mishna, *Okzin*, i, 3; Pococke, *East*, i, 306; Döbel, *Wander.* ii, 194: hence the palm-twigs were called καλλυντήρια or κάλλυντρα; compare Sept. at Lev. xxiii, 42 sq., כַּפּוֹת תְּמָרִים; accordingly, in Cant. vii, 8, by סַנְסִנִּים, boughs, we are to understand the crown of the palm; ascetics used the leaves for clothing, Jerome, *Opp.* ii, 10; they are now made into fans). The Jews employed palm-branches on the Feast of Tabernacles (Lev. xxiii, 40; Neh. viii, 15; like the Egyptians in honor of Osiris, Minutoli, p. 16), and on festive occasions they carried them before princes and distinguished personages, and waved them in token of joy and triumph (Rev. vii, 9; comp. Virgil, *Georg.* ii, 47; *Æn.* v, 111; Plutarch, *Sympos.* viii, 4, 1; 1 Macc. xiii, 51; John xii, 13; Philo, *Opp.* i, 101; Minutoli, *Trav.* tab. 13). Even the kernels of the dates are made use of at the present day as fodder for cattle (Burckhardt, *Arab.* p. 542). The seed of the male tree, which sheds a fragrant odor, is greedily eaten by the modern Arabs (Wellsted, i, 200). The wood is very spongy, but it lasts pretty well as building material for inside beams (Xenophon, *Cyrop.* vii, 5, 11; Strabo, xv, 731; xvi, 739; xvii, 822. See generally Theophr. *Plantt.* ii, 6 (Sprengel, *Erläut.* ii, 73 sq.); Plin. xiii, 6 sq.; *Descr. de l'Égypte*, xvii, 108 sq.; Celsius, ii, 445 sq.; Oken, *Lehrb. d. Botanik*, II, i, 1003 sq. See PALM-TREE.

Da'than (Heb. *Dathan'*, דָּתָן, *welled*, q. d. *Fontanus;* Sept. Δαθάν; Joseph. Δάθαμνος, *Ant.* iv, 2, 2), a Reubenite chieftain, son of Eliab, who joined the conspiracy of Korah (q. v.) the Levite, and with his accomplices was swallowed up by an earthquake (Num. xvi, 1; xxvi, 9; Deut. xi, 6; Psa. cvi, 17; comp. Ecclus. xlv, 18). B.C. cir. 1618. See EXODE.

Dathe, JOHANN AUGUST, an eminent Oriental scholar and Biblical critic, was born at Weissenfels July 4, 1731, became professor of Oriental literature at Leipsic in 1762, and died March 17, 1791, at Leipsic. His chief work is *Libri Vet. Test. ex recensione textus Heb. notisque philolog. et crit. illustrati* (Halæ, 1791, 6 vols. 8vo). He also edited Glassius, *Philologia Sacra*, and the *Prolegomena* to Walton's Polyglot (Lips. 1777); a *Syriac Psalter*, with the translation and notes of Erpenius (Halle, 1768); and (posthumous) *Opuscula ad Crisin et interp. Vet. Test. spectantia* (ed. by Rosenmüller, jun., Lips. 1795).

Dath'ema (Διάθεμα; Alex. and Josephus, Δάθεμα; other MSS. Δάμεθα; Vulg. *Dathema*), a fortress (τὸ ὀχύρωμα; Joseph. φρούριον) in which the Jews of Gilead took refuge from the heathen (1 Macc. v, 9; Joseph. *Ant.* xii, 8, 1). Here they were relieved by Judas and Jonathan (1 Macc. v, 24). They marched from Bozora to Dathema (ver. 28, 29), and left it for Maspha (Mizpeh) (ver. 35). The reading of the Peshito, *Ramtha*, points to Ramoth-Gilead, which can hardly fail to be the correct identification. Ewald, however, *Gesch. Isr.* iii, 2, p. 359, note), would correct this to *Damtha*, which he compares with *Dhami*, a place reported by Burckhardt (*Syr.* p. 196).

Dathenus, PETRUS, one of the Dutch Reformers, was born at Yperen, in Flanders. At an early age, he entered the Carmelite monastery at Poperingen. Here he became acquainted with the doctrine of the Reformation, and was so captivated by it that he soon resolved to leave the monastery and repair to England. In London he followed the occupation of a printer. Enjoying liberty of conscience under the reign of Edward VI, he applied himself diligently to the study of the Scriptures, in the knowledge of which he made such proficiency that he was soon admitted to the service of the Church. He soon left England, and entered on the work of the ministry at Frankfort. He subsequently sojourned in the Palatinate. Here he seems to have been held in high esteem. He was one of the five Reformed preachers who, in the presence of the elector and the duke of Würtemberg, held a disputation with five Lutheran ministers on the ubiquity of Christ's body. In 1566 he returned to his native land. West Flanders was at first the scene of his labors. He soon became known as one of the most zealous of the Reformed preachers. His enthusiasm, the cogency of his reasoning, and his rude but captivating eloquence, attracted multitudes. His audience sometimes amounted to more than fifteen thousand. His labors were not confined to Flanders, but extended to Zealand and other parts of Holland. Obliged to flee for his life, he again sought refuge in the Palatinate, and at Frankenthal, whither many Dutch, French, and Walloons had fled, he exercised his ministry. From here he went to Heidelberg, where he became court-preacher to John Casimir. In 1578 he was sent as delegate from Ghent to the General Synod at Dort, over whose deliberations he presided. He preached in various cities of Holland, but made Ghent the place of his permanent abode. Here he became involved in political affairs. His harangues so inflamed the populace that the Romanists were driven out of the city, and great excesses were committed in and around Ghent. As a consequence he was again obliged to flee, and again he sought and found refuge with his former protector, John Casimir. In the midst of his active and troublous life he still found time for literary pursuits. His translation of the Heidelberg Catechism into Dutch was adopted, and has, with slight modifications, continued in use to the present time. He also gave a Dutch versification of the Book of Psalms, according to the French of Beza and Marot. This was also adopted by the Reformed Church, and was used in public worship till 1773, when it was superseded by a version of higher poetic merit. His burning zeal and abundant labors contributed much to advance the cause of the Reformation in Holland.

Daub, KARL, a German theologian of the Hegelian school, was born at Cassel March 20, 1765. In 1791 he became tutor in the academy of Marburg, where he had been studying since 1786. He was afterwards professor of philosophy in Hanau, and finally, in 1794, became professor of theology at Heidelberg. He died Nov. 22, 1836. Daub was one of the representatives of the new speculative theology. At first, especially in his *Predigten nach Kantischen Grundsätzen* (1794), and in his *Katechetik* (Heidelb. 1801), he was a Kantian; he afterwards inclined to Fichte; and in his *Theologoumena* (Heidelb. 1806), and *Einleitung in d. Studium d. Dogmatik* (Heidelb. 1810), he applied Schelling's doctrine to theology. As the latter ended with theosophic dualism, so Daub, in his *Judas Iscariot* (Heidelb. 1816; 2d ed. 1818), displayed a speculation almost bordering on Manicheism. This work bears witness to his struggle with Hegel's phenomenology and logic, but Hegel finally prevailed. Daub was a man of old German simplicity, great moral energy, and warm faith; yet, with a great talent for teaching, he was too abstract in his literary productions to influence a large circle. This is especially the case with his last work, *Die dogmatische Theologie jetziger Zeit* (Heidelb. 1833). He was associated with Creuzer in publishing a periodical entitled *Studien* (Heidelb. 1805–10, 6 vols.). His works have been published by Marheineke and Dittenberger (Berl. 1838–44, 7 vols.).—Pierer, *Univ. Lexikon*, s. v.; Kahnis, *German Protestantism* (Edinb. 1856, 12mo, p. 243); Rosenkranz, *Erinnerungen an Carl Daub* (Berl. 1837); Strauss, *Charakteristiken u. Kritiken;* Herzog, *Real-Encyklop.* xix, 391.

Daubeny, CHARLES, a divine of the Church of England, was born in Bristol 1744, and was educated at Winchester School and at New College, Oxford. He became vicar of North Bradley 1778; obtained a prebend in Salisbury Cathedral in 1784; was appointed archdeacon of Sarum in 1804; and died in 1827. Besides numerous sermons and charges, he is the author of *A Guide to the Church* (Lond., royal 8vo, 1830); *Vindiciæ Ecclesiæ Anglicanæ* (Lond. 1803, 8vo); *Remarks on the Unitarian Method of interpreting the Scriptures*; *Discourses* (3 vols. 8vo, Lond. 1802–16); and of minor works. At North Bradley he built alms-houses for twelve poor persons, an asylum, and a school-room; and the church at Rode was erected partly at his expense.—*Christian Journal and Lit. Register*, xii, 177.

Daubuz, CHARLES, a French Protestant divine, was born in 1670, came to England on the revocation of the Edict of Nantes, and became vicar of Brotherton, Cheshire. He died in 1740. His *Commentary on the Book of Revelation* (Lond. 1720, folio) is a most elaborate work, to which later writers have been much indebted, and which is one of the most learned books written on the Apocalypse. The abridgment by Lancaster (Lond. 1730, 4to) forms a good analysis of its contents. Both works are rare. He also wrote *Pro testimonio Flavii Josephi de Jesu Christo*, libri duo, cum præfatione J. E. Grave (London, 1706, 8vo).—Darling, *Cyclopædia Bibliographica*, s. v.; Rose, *Biog. Dict.* vii, 26; Elliott, *Horæ Apocalypticæ*, iv, 457; Horne, *Introduction*, v, 388, 9th ed.

Daughter (בַּת, *bath*, for בִּנְיָת, fem. of בֵּן, *son*; θυγατήρ), a word used in Scripture in a variety of senses, some of which are unknown to our own language, or have only become known through familiarity with scriptural forms of speech. See BEN-. Besides its usual and proper sense of (1.) a daughter, born or adopted, we find it used to designate (2.) a uterine sister, niece, or *any* female descendant (Gen. xx, 12; xxiv, 48; xxviii, 6; xxxvi, 2; Num. xxv, 1; Deut. xxiii, 17). (3.) Women, as natives, residents, or professing the religion of certain places, as "the daughter of Zion" (Isa. iii, 16); "daughters of the Philistines" (2 Sam. i, 20); "daughter of a strange god" (Mal. ii, 11); "daughters of men," i. e. carnal women (Gen. vi, 2), etc. (4.) Metaphorically small towns are called daughters of neighboring large cities—metropoles, or mother cities—to which they belonged or from which they were derived, as "Heshbon and all the daughters [Auth. Vers. *villages*] thereof" (Num. xxi, 25); so Tyre is called the daughter of Sidon (Isa. xxii, 12), as having been originally a colony from thence; and hence also the town of Abel is called "a mother in Israel" (2 Sam. xx, 19); and Gath is in one place (comp. 2 Sam. vii, 1; 1 Chron. xviii, 1) called Gath-Ammah, or Gath the *mother* town, *metropolis*, to distinguish it from its own dependencies, or from another place called Gath. See VILLAGE. Comp. other instances in Num. xxi, 32; Judg. xi, 26; Josh. xv, 45, etc. (5.) The people collectively of any place, the name of which is given, as "the daughter (i. e. the people) of Jerusalem hath shaken her head at thee" (Isa. xxxvii, 22; see also Psa. xlv, 13; cxxxvii, 8; Isa. x, 30; Jer. xlvi, 19; Lam. iv, 22; Zech. ix, 9). This metaphor is illustrated by the almost universal custom of representing towns under the figure of a woman. (6.) The word "daughter," followed by a numeral, indicates a woman of the age indicated by the numeral, as when Sarah (in the original) is called "the daughter of ninety years" (Gen. xvii, 17). (7.) The word "daughter" is also applied to the *produce* of animals, trees, or plants. Thus, "daughter of the she-ostrich," (supposed) for "female ostrich" (Lev. xi, 16); Joseph is called "a fruitful bough whose daughters (branches) run over the wall" (Gen. xlix, 22). See further in Gesenius and Fürst, s. v. בַּת.

The condition of daughters, that is, of young women, in the East, their employments, duties, etc., may be gathered from various parts of Scripture, and seems to have borne but little resemblance to that of young women of respectable parentage among ourselves. Rebekah drew and fetched water; Rachel kept sheep, as did the daughters of Jethro, though he was a priest, or a prince, of Midian. They superintended and performed domestic services for the family; Tamar, though a king's daughter, baked bread; and the same of others. We have the same occupations for the daughters of princes in the ancient poets, of which Homer is an unquestionable evidence. See CHILD; EDUCATION; WOMAN; MARRIAGE.

The original terms rendered "daughter-in-law" are in the Heb. כַּלָּה, *kallah'*; Sept. and New Test. νύμφη, both literally meaning a *bride* (as elsewhere rendered), and applied to a *son's wife*.

Davenant, JOHN, D.D., bishop of Salisbury, was born in London about 1570, and was educated at Queen's College, Cambridge. In 1594 a fellowship was offered him, which he accepted after his father's death in 1597. In 1609 he was elected Lady Margaret professor of divinity. In 1614 he was chosen master of his college, and in 1618 was one of the four divines sent to the Synod of Dort by James I. See DORT. He returned to England in May, 1619, after having visited the most eminent cities in the Netherlands. In 1621 he was appointed to the see of Salisbury; but in 1630–31 he incurred the displeasure of the court by a sermon on predestination, "all curious search into which" the king, in his declaration prefixed to the Thirty-nine Articles in 1628, had strictly enjoined "to be laid aside." The bishop died of consumption in 1641. He was a man of great learning. He published *Expositio Epist. D. Pauli ad Colossenses* (Cambridge, 1630, 2d edition, fol.; translated by Allport, London, 1831, 2 vols. 8vo), *Prælectiones de duobus in theologia cont. capitibus* (Cantab. 1631, fol.); *Determinationes quæstionum theologicarum* (Cantab. 2d edition, 1639, fol.); *Dissert. II de Morte Christi et de Predestinatione* (Camb. 1630). A translation of one of the *Prælectiones* appeared under the title *A Treatise on Justification, etc., translated from the original Latin* (Lond. 1844–46, 2 vols. 8vo). After bishop Davenant's return from the Synod of Dort, he published an earnest appeal for fraternal union among the Reformed churches, under the title *Ad fraternam communionem inter Evangelicas Ecclesias restaurandam adhortatio* (Camb. 1640; transl. into English, 1641, 8vo).—*Biographia Britannica*, iv, 629.

Davenport, Christopher, an English Romanist divine, was born at Coventry about 1598, and was sent to Merton College, Oxford, at 15, but was persuaded at 17 by a priest to go to the Romanist college at Douai, France, and thence to Ypres. Here he became a Romanist and a Franciscan. Under the name of Franciscus a Sancta Clara he came as a missionary to England, and was made chaplain to Henrietta Maria, consort of Charles I. Davenport was a man of learning and of good address, and he labored zealously and successfully for the cause of Rome. On the death of Charles I he went abroad, and only appeared in England in disguise until the restoration of Charles II, when he became chaplain of queen Catharine and provincial of the English Franciscans. He died May 31, 1680. Among his writings are, *Paraphrastica Expositio Articulorum Conf. Anglicanæ* (1635; new transl., Lond. 1865); *Deus, Natura, Gratia* (1635); both works aiming to show that the English Articles are not really hostile to Rome.—*New Gen. Biog. Dict.* iv, 324.

Davenport, John (elder brother of Christopher), an eminent Congregational minister, was born at Coventry, England, 1597. He was sent to Merton College, Oxford, 1613, and, after passing B.A., he entered the ministry at nineteen. Having served a short time

at Hilton Castle as chaplain, he became rector of St. Stephen's Church, London. After an interview with Mr. John Cotton he became a Nonconformist, and, to escape bishop Laud, he fled to Holland in 1633. In 1635 he returned to London, and sailed for Boston, Mass., where he arrived June 26, 1637. With a number of others he sailed on March 30, 1638, for Quinipiac, now New Haven. In 1639 a Church was formed, and on August 22 Mr. Davenport was installed pastor. He was ordained, with Mr. James Allen as colleague, pastor of the First Church, Boston, Dec. 9, 1668, and died March 15, 1670. He published *Instructions to the Elders of the English Church* (1634); *Report of some Proceedings against John Paget* (1634); *Allegations of Scripture against the Baptizing of some kind of Infants* (1634); *Catechism concerning the chief Heads of the Christian Religion* (Lond. 1659); and a number of occasional sermons.—Sprague, *Annals*, i, 94; *New Gen. Biog. Dict.* iv, 325.

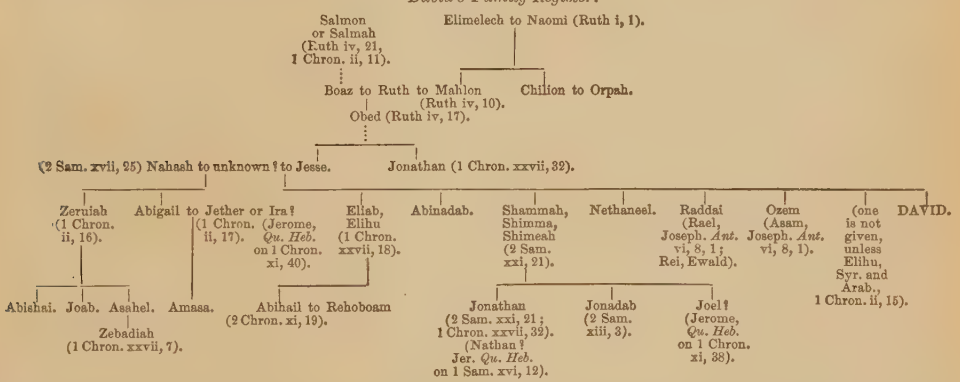
Da'vid (Heb. *David'*, דָּוִד [in the full form, דָּוִיד, in 1 Kings iii, 14, and in Chron., Ezra, Neh., Cant., Hos., Amos, Ezek. xxxiv, 23, and Zech.], *affectionate* or *beloved;* Arab. in common use *Dáoud;* Sept. Δαυίδ, N. T. Δαβίδ, older MSS. Δαυεὶδ; Joseph. Δαυίδης), the second but most prominent of the line of Jewish kings. The prominence of this personage in the Old-Testament history as well as in the Christian economy requires a full treatment of the subject here.

A. *Personal Biography.*—The authorities for the life of David may be divided into the following classes: (I.) The original Hebrew authorities: (1.) The narrative of 1 Sam. xvi, to 1 Kings ii, 10; with the supplementary notices contained in 1 Chron. xi, 1 to xxix, 30. (2.) The "Chronicles" or State-papers of David (1 Chron. xxvii, 24), and the original biographies of David by Samuel, Gad, and Nathan (1 Chron. xxix, 29). These are lost, but portions of them no doubt are preserved in the foregoing. (3.) The Davidic portion of the Psalms, including such fragments as are preserved to us from other sources, viz., 2 Sam. i, 19–27; iii, 33, 34; xxii, 1–51; xxiii, 1–7. See PSALMS. (II.) The two slight notices in the heathen historians, Nicolaus of Damascus in his *Universal History* (Josephus, *Ant.* vii, 5, 2), and Eupolemus in his *History of the Kings of Judah* (Euseb. *Præp. Ev.* lx, 30). (III.) David's apocryphal writings, contained in Fabricius, *Codex Apocryphus V. Test.* p. 906–1006. (1.) Psa. cli, on his victory over Goliath. (2.) Colloquies with God, on madness, on his temptation, and on the building of the Temple. (3.) A charm against fire. Of these the first alone deserves any attention. (IV.) The Jewish traditions, which may be divided into three classes: (1.) The additions to the Biblical narrative contained in Josephus, *Ant.* vi, 8–vii, 15. (2.) The Hebrew traditions preserved in Jerome's *Quæstiones Hebraicæ in Libros Regum et Paralipomenon* (vol. iii, Venice edit.). (3.) The Rabbinical traditions reported in Basnage, *Hist. des Juifs*, lib. v, c. 2; Calmet's *Dictionary*, s. v. David. (V.) The Mussulman traditions, chiefly remarkable for their extravagance, are contained in the Koran, ii, 250–252; xxxviii, 20–24; xxi, 79–82; xxii, 15, and explained in Lane's *Selections from the Koran*, p. 228–242; or amplified in Weil's *Legends*, Eng. tr. p. 152–170. (VI.) In modern times his life has been often treated, both in separate treatises and in histories of Israel. Many of the monographs on almost every point in his life will be found referred to below. In English, the best known are, Delany's *Hist. Account* (Lond. 1741–2, 3 vols.), Chandler's *Life* (Lond. 1766, 2 vols.; new edit. Lond. 1853), and Blaikie, *David King of Israel* (London, 1856); in French, De Choisi's, and that in Bayle's *Dictionary*. One of the most recent, and, in some respects, the best treatment, is that in Ewald's *Geschichte des Volkes Israel*, iii, 71–257. See also Kitto, *Daily Bible Illustrations*, vol. ii. Other treatises on his life as a whole, or on the several incidents of it, are referred to in Darling's *Cyclopædia*, iii, 290 sq.

David's life may be divided into the three following portions, more or less corresponding to the three old lost biographies by Samuel, Gad, and Nathan: I. His youth before his introduction to the court of Saul. II. His relations with Saul. III. His reign.

I. *The early life of David* contains in many important respects the antecedents of his after history. 1. His family are mostly well known to us by name, and are not without bearing on his subsequent career. For an extended view of David's lineage, see GENEALOGY OF CHRIST.

David's Family Register.



Salmon or Salmah (Ruth iv, 21, 1 Chron. ii, 11).
Elimelech to Naomi (Ruth i, 1).
Boaz to Ruth to Mahlon (Ruth iv, 10).
Chilion to Orpah.
Obed (Ruth iv, 17).
(2 Sam. xvii, 25) Nahash to unknown ? to Jesse.
Jonathan (1 Chron. xxvii, 32).
Zeruiah (1 Chron. ii, 16).
Abigail to Jether or Ira ? (1 Chron. ii, 17). (Jerome, Qu. Heb. on 1 Chron. xi, 40).
Eliab, Elihu (1 Chron. xxvii, 18).
Abinadab.
Shammah, Shimma, Shimeah (2 Sam. xxi, 21).
Nethaneel.
Raddai (Rael, Joseph. Ant. vi, 8, 1; Rei, Ewald).
Ozem (Asam, Joseph. Ant. vi, 8, 1).
(one is not given, unless Elihu, Syr. and Arab., 1 Chron. ii, 15).
DAVID.
Abishai. Joab. Asahel.
Amasa.
Abihail to Rehoboam (2 Chron. xi, 19).
Zebadiah (1 Chron. xxvii, 7).
Jonathan (2 Sam. xxi, 21; 1 Chron. xxvii, 32). (Nathan ? Jer. Qu. Heb. on 1 Sam. xvi, 12).
Jonadab (2 Sam. xiii, 3).
Joel ? (Jerome, Qu. Heb. on 1 Chron. xi, 38).

It thus appears that David (born B.C. 1083) was the youngest son, probably the youngest child, of a family of ten. His mother's name is unknown. See NAHASH. We can only conjecture her character from one or two brief allusions to her in the poetry of her son, from which we may gather that she was a godly woman, whose devotion to God's service her son commemorates as at once a token of God's favor to himself, and a stimulus to him to consecrate himself to God's service (Psa. lxxxvi, 16; and perhaps cxvi, 16). His father, Jesse, was of a great age when David was still young (1 Sam. xvii, 12). His parents both lived till after his final rupture with Saul (1 Sam. xxii, 3). Certain points with regard to his birth and lineage deserve special mention.

(*a*) His connection with Moab through his ancestress Ruth. This he kept up when he escaped to Moab and intrusted his aged parents to the care of the king (1 Sam. xxii, 3). This connection possibly gave greater breadth to his views, and even to his history, than if he had been of purely Jewish descent. Such is probably the significance of the express mention of Ruth in the genealogy in Matt. i, 5.

(*b*) His birthplace, Bethlehem (q. v.). His recol-

lection of the well of Bethlehem is one of the most touching incidents of his later life (1 Chron. xi, 17). From the territory of Bethlehem, as from his own patrimony, he gave a piece of property as a reward to Chimham, son of Barzillai (2 Sam. xix, 37, 38; Jer. xli, 17). It is this connection of David with Bethlehem that gave importance to the place again in later times, when Joseph went up to Bethlehem, "because he was of the house and lineage of David" (Luke ii, 4).

(*c*) His general connection with the tribe of Judah, in which the tribal feeling appears to have been stronger than in any of the others. This connection must be borne in mind throughout the story both of David's security among the hills of Judah during his flight from Saul, and of the early period of his reign at Hebron, as well as of the jealousy of the tribe at having lost their exclusive possession of him, which broke out in the revolt of Absalom.

(*d*) His relations to Zeruiah and Abigail. Though called in 1 Chron. ii, 16, sisters of David, they are not expressly called the daughters of Jesse; and Abigail, in 2 Sam. xvii, 25, is called the daughter of Nahash. Is it too much to suppose that David's mother had been the wife or concubine of Nahash, and then married by Jesse? This would agree with the difference of age between David and his sisters, and also (if Nahash was the same as the king of Ammon) with the kindnesses which David received first from Nahash (2 Sam. x, 2), and then from Shobi, son of Nahash (xvii, 27).

2. As the youngest of the family, he may possibly have received from his parents the name, which first appears in him, of *David*, the *darling*. But, perhaps for this same reason, he was never intimate with his brethren. The eldest brother, who alone is mentioned in connection with him, and who was afterwards made by him head of the tribe of Judah (1 Chron. xxvii, 18), treated him scornfully and imperiously (1 Sam. xvii, 28), as the eldest brothers of large families are apt to act; his command was regarded in the family as law (xx, 29); and the father looked upon the youngest son as hardly one of the family at all (xvi, 11), and as a mere attendant on the rest (xvii, 17). The familiarity which he lost with his brothers, he gained with his nephews. The three sons of his sister Zeruiah, and the one son of his sister Abigail, seemingly from the fact that their mothers were the eldest of the whole family, were probably of the same age as David himself, and they accordingly were to him—especially the three sons of Zeruiah—throughout life in the relation usually occupied by brothers and cousins. In them we see the rougher qualities of the family, which David shared with them, while he was distinguished from them by qualities peculiar to himself. The two sons of his brother Shimeah are both connected with his after history, and both seem to have been endowed with the sagacity in which David himself excelled. One was Jonadab, the friend and adviser of his eldest son Amnon (2 Sam. xiii, 3); the other was Jonathan (2 Sam. xxi, 21), who afterwards became the counsellor of David himself (1 Chron. xxvii, 32). It is a conjecture or tradition of the Jews preserved by Jerome (*Qu. Heb.* on 1 Sam. xvii, 12) that this was no other than *Nathan* the prophet, who, being adopted into Jesse's family, makes up the eighth son, not named in 1 Chron. ii, 13–15. But this is hardly probable.

The first record of David's appearance in history at once admits us to the whole family circle. B.C. 1068. There was a practice once a year at Bethlehem, probably at the first new moon of the year, of holding a sacrificial feast, at which Jesse, as the chief proprietor of the place, would preside (1 Sam. xx, 6), with the elders of the town. At this or such like feast (xvi, 1) suddenly appeared the great prophet Samuel, driving a heifer before him, and having in his hand a horn of the consecrated oil of the Tabernacle. The elders of the little town were terrified at this apparition, but were reassured by the august visitor, and invited by him to the ceremony of sacrificing the heifer. The heifer was killed. The party were waiting to begin the feast. Samuel stood with his horn to pour forth the oil, as if for an invitation to begin (comp. ix, 22). He was restrained by divine intimation as son after son passed by. Eliab, the eldest, by "his height" and "his countenance," seemed the natural counterpart of Saul, whose rival, unknown to them, the prophet came to select. But the day had gone by when kings were chosen because they were head and shoulders taller than the rest. "Samuel said unto Jesse, Are these all thy children? And he said, There yet remaineth the youngest, and behold he keepeth the sheep." The boy was brought in. We are enabled to fix his appearance at once in our minds. He was of short stature, thus contrasting with his tall brother Eliab, with his rival Saul, and with his gigantic enemy of Gath. He had red or auburn hair, as is occasional in the East; or at least a rufous complexion and sanguineous temperament. See RUDDY. Later he wore a beard. His bright eyes are especially mentioned (xvi, 12), and generally he was remarkable for the grace of his figure and countenance ("fair of eyes," "comely," "goodly," xvi, 12, 18; xvii, 42), well made, and of great strength and agility. His swiftness and activity made him (like his nephew Asahel) like a wild gazelle, his feet like harts' feet, and his arms strong enough to break a bow of steel (Psa. xviii, 33, 34). He was pursuing the occupation allotted in Eastern countries usually to the slaves, the females, or the despised of the family (comp. the case of Moses, of Jacob, of Zipporah, and of Rachel, and in later times of Mohammed; Sprenger, p. 8). The pastures of Bethlehem are famous throughout the sacred history. The Tower of Shepherds (Gen. xxxv, 21) was there; and there too the shepherds abode with their flocks by night (Luke ii). He usually carried a switch or wand in his hand (1 Sam. xvii, 40), such as would be used for his dogs (xvii, 43), and a scrip or wallet round his neck, to carry anything that was needed for his shepherd's life (xvii, 40). Such was the outer life of David when (as the later Psalmists described his call) he was "taken from the sheepfolds, from following the ewes great with young, to feed Israel according to the integrity of his heart, and to guide them by the skilfulness of his hands" (Psa. lxxviii, 70–72). The recollection of the sudden and great elevation from this humble station is deeply impressed on his after life. "The man who was raised up on high" (2 Sam. xxiii, 1)—"I have exalted one chosen out of the people" (Psa. lxxxix, 19)—"I took thee from the sheepcote" (2 Sam. vii, 8). The event itself prepared him to do that in which Saul had so eminently failed, viz. to reconcile his own military government with a filial respect for the prophets and an honorable patronage of the priesthood. Besides this, he became knit into a bond of brotherhood with his heroic comrades, to whom he was eminently endeared by his personal self-denial and liberality (1 Sam. xxx, 21–31; 1 Chron. xi, 18).

3. But there was another preparation still more needed for his office, which probably had made him already known to Samuel, and which, at any rate, is his next introduction to the history. When the bodyguard of Saul were discussing with their master where the best minstrel could be found to chase away his madness by music, one of the young men in the guard suggested David. Saul, with the absolute control inherent in the idea of an Oriental king, instantly sent for him, and in the successful effort of David's harp we have the first glimpse into that genius for music and poetry which was afterwards consecrated in the Psalms. It is impossible not to connect the early display of this gift with the schools of the prophets, who exercised their vocation with tabret, psaltery, pipe, and harp (1 Sam. x, 5), in the pastures (*Naioth*; comp. Psa. xxiii, 2), to which he afterwards returned as to

his natural home (1 Sam. xix, 18). Whether any of the existing Psalms can be referred to this epoch of David's life is uncertain. The 23d, from its subject of the shepherd, and from its extreme simplicity (though placed by Ewald somewhat later), may well have been suggested by this time. The 8th, 19th, and 29th, which are universally recognised as David's, describe the phenomena of nature, and, as such (at least the two former), may more naturally be referred to this tranquil period of his life than to any other. The imagery of danger from wild beasts, lions, wild bulls, etc. (Psa. vii, 2; xxii, 20, 21), may be reminiscences of this time. And now, at any rate, he must have first acquired the art which gave him one of his chief claims to mention in after times—"the sweet singer of Israel" (2 Sam. xxiii, 1), "the inventor of instruments of music" (Amos vi, 5); "with his whole heart he sung songs and loved him that made him" (Ecclus. xlvii, 8).

4. One incident alone of his solitary shepherd life has come down to us—his conflict with the lion and the bear in defence of his father's flocks (1 Sam. xvii, 34, 35). But it did not stand alone. He was already known to Saul's guards for his martial exploits, probably against the Philistines (xvi, 18), and when he suddenly appeared in the camp his elder brother immediately guessed that he had left the sheep in his ardor to see the battle (xvii, 28). To this new aspect of his character we are next introduced. B.C. 1063.

The scene of the battle is at Ephes-dammim (q. v.), in the frontier hills of Judah, called probably from this or similar encounters "the bound of blood." Saul's army is encamped on one side of the ravine, the Philistines on the other; the watercourse of Elah, or "the Terebinth," runs between them. A Philistine of gigantic stature, and clothed in complete armor, insults the comparatively defenceless Israelites, among whom the king alone appears to be well armed (xvii, 38; comp. xiii, 20). No one can be found to take up the challenge. At this juncture David appears in the camp, sent by his father with ten loaves and ten slices of cheese to his three eldest brothers, fresh from the sheepfolds. Just as he comes to the circle of wagons which formed, as in Arab settlements, a rude fortification round the Israelite camp (xvii, 20), he hears the well-known shout of the Israelite war-cry (comp. Num. xxiii, 21). The martial spirit of the boy is stirred at the sound; he leaves his provisions with the baggage-master, and darts to join his brothers (like one of the royal messengers) into the midst of the lines. Then he hears the challenge, now made for the fortieth time —sees the dismay of his countrymen—hears of the reward proposed by the king—goes with the impetuosity of youth from soldier to soldier talking of the event, in spite of his brother's rebuke—he is introduced to Saul —undertakes the combat. His victory over the gigantic Philistine is rendered more conspicuous by his own diminutive stature, and by the simple weapons with which it was accomplished—not the armor of Saul, which he naturally found too large, but the shepherd's sling, which he always carried about with him, and the five polished pebbles which he picked up as he went from the watercourse of the valley, and put in his shepherd's wallet. Two trophies long remained of the battle—one, the huge sword of the Philistine, which was hung up behind the ephod in the Tabernacle at Nob (1 Sam. xxi, 9); the other the head, which he bore away himself, and which was either laid up at Nob, or subsequently at Jerusalem. See NOB. Psalm cxliv, though by its contents of a much later date, is by the title in the Sept. "against Goliath." But there is also a psalm, preserved in the Sept. at the end of the Psalter, and which, though probably a mere adaptation from the history, well sums up this early period of his life:

"This is the psalm of David's own writing (?) (ἰδιόγραφος εἰς Δαυίδ), and outside the number, when he fought the single combat with Goliath." "I was small amongst my brethren, and the youngest in my father's house. I was feeding my father's sheep. My hands made a harp, and my fingers fitted a psaltery. And who shall tell it to my Lord? He is the Lord, he heareth. He sent his messenger (angel?), and took me from my father's flocks, and anointed me with the oil of his anointing. My brethren were beautiful and tall, but the Lord was not well pleased with them. I went out to meet the Philistine, and he cursed me by his idols. But I drew his own sword and beheaded him, and took away the reproach from the children of Israel."

David's susceptible temperament, joined to his devotional tendencies, must, at a very early age, have made him a favorite pupil of the prophets, whose peculiar mark was the harp and the psalm (1 Sam. x, 1–12, and xix, 20–24; see also 2 Kings iii, 15).

There is no small difficulty in reconciling the recommendation of David to Saul as a skilful player and warrior in 1 Sam. xvi, 14–23, with the account in the following chapter of David's appearance in the camp of Saul, and his introduction to that monarch in consequence of his victory over Goliath. Both narratives apparently give the account of David's *first* introduction to Saul, and yet it is not possible to combine them into one. Some would transpose the latter part of the 16th chap. so as to make it follow after xviii, 9 (Horsley, *Bib. Crit.* i, 332); but it is not easy to see what is gained by this; for if David was known to Saul, and accepted into Saul's service as there narrated, how could Saul send for him to his father's house, and receive him as a perfect stranger, as narrated in xvi, 14–20? On the other hand, if David came before the notice of Saul under the circumstances mentioned in this 16th chapter, and was received into his favor and service as there narrated (21–23), how could the facts recorded in the 17th chapter, especially those in verses 31–37, and 55–58, have occurred? The Vatican MS. of the Sept. rejects xvii, 12–31, 55–58, and xviii, 1–5, as spurious; and this Kennicott approves as the true solution of the difficulty (see his discussion of the question, *Dissert. on the Hebrew Text*, p. 418–432, 554–558). What gives some plausibility to this is, that ver. 32 naturally connects with ver. 11, and all between has very much the aspect of an interpolation. At the same time, it can hardly be permitted on such grounds to reject a portion of Scripture which has all other evidence, external and internal, in its favor. The old solution of the difficulty, that as David, after his first introduction to Saul, did not abide constantly with him, but went and came between Saul and his father's house (xvii, 15), he may have been at home when the war with the Philistines broke out; and as Saul's distemper was of the nature of mania, he very probably retained no recollection of David's visits to him while under it, but at each new interview regarded and spoke of him as a stranger—still leaves unexplained the fact of Abner's ignorance of David's person, which appears to have been as complete as that of the king, and the fact of David's professing ignorance of warlike weapons, though he had been for some time Saul's armor-bearer. This last difficulty may be alleviated by the consideration that the statement in xvi, 21 may be proleptical; or David, though Saul's armor-bearer, may have had so little practice in the use of armor as to prefer, in such a crisis, trusting to the weapons with which he was familiar. The best adjustment of these passages, however, is to transpose the account in xvi, 14–23, so as to bring it in between xviii, 4 and 5, and to regard the statement in xviii, 2, of David's permanent residence at court after Goliath's slaughter as referring merely to an attachment to the royal person as a general thing and for the present. On the breaking out of Saul's hypochondria, David may naturally have returned home.

II. *David's History in connection with Saul.*—The victory over Goliath had been a turning-point of his career. Saul inquired his parentage, and took him finally to his court. Jonathan was inspired by the romantic friendship which bound the two youths together to

the end of their lives. The triumphant songs of the Israelitish women announced that they felt that in him Israel had now found a deliverer mightier even than Saul; and in those songs, and in the fame which David thus acquired, was laid the foundation of that unhappy jealousy of Saul towards him which, mingling with the king's constitutional malady, poisoned his whole later relations to David. Three new qualities now began to develop themselves in David's character. The first was his prudence. It had already been glanced at on the first mention of him to Saul (1 Sam. xvi, 18), as "prudent in matters;" but it was the marked feature of the beginning of his public career. Thrice over it is emphatically said, "he behaved himself wisely," and evidently with the meaning that it was the wisdom called forth by the necessities of his delicate and difficult situation. It was that peculiar Jewish caution which has been compared to the sagacity of a hunted animal, such as is remarked in Jacob, and afterwards in the persecuted Israelites of the Middle Ages. One instance of it appears immediately, in his answer to the trap laid for him by Saul's servants, "Seemeth it to you a light thing to be the king's son-in-law, seeing that I am a poor man and lightly esteemed?" (xviii, 23). Secondly, we now see his magnanimous forbearance called forth, in the first instance, towards Saul, but displaying itself (with a few painful exceptions) in the rest of his life. He is the first example of the virtue of chivalry. Thirdly, his hairbreadth escapes, continued through so many years, impressed upon him a sense of dependence on the Divine help, clearly derived from this epoch. His usual oath or asseveration in later times was, "As the Lord liveth who hath redeemed my soul out of adversity" (2 Sam. iv, 9; 1 Kings i, 29); and the Psalms are filled with imagery taken even literally from shelter against pursuers, slipping down precipices (Psa. xviii, 36), hiding-places in rocks and caves, leafy coverts (xxxi, 20), strong fastnesses (xviii, 2). This part of David's life may be subdivided into four portions:

1. *His Life at the Court of Saul till his final Escape* (1 Sam. xviii, 2–xix, 18).—His office is not exactly defined. But it would seem that, having been first armor-bearer (xvi, 21; xviii, 2), then made captain over a thousand—the subdivision of a tribe—(xviii, 13), he finally, on his marriage with Michal, the king's second daughter, was raised to the high office of captain of the king's body-guard, second only, if not equal, to Abner, the captain of the host, and Jonathan, the heir apparent. These three formed the usual companions of the king at his meals (xx, 25). David was now chiefly known for his successful exploits against the Philistines, by one of which he won his wife, and drove back the Philistine power with a blow from which it only rallied at the disastrous close of Saul's reign. He also still performed from time to time the office of minstrel. But the successive snares laid by Saul to entrap him, and the open violence into which the king's madness twice broke out, at last convinced him that his life was no longer safe. He had two faithful allies, however, in the court—the son of Saul, his friend Jonathan — the daughter of Saul, his wife Michal. Warned by the one and assisted by the other, he escaped by night, and was from that time forward a fugitive. B.C. 1062. Jonathan he never saw again except by stealth. Michal was given in marriage to another (Phaltiel), and he saw her no more till long after her father's death. See MICHAL. To this escape the traditional title assigns Psa. lix. Internal evidence (according to Ewald) gives Psa. vi and vii to this period. In the former he is first beginning to contemplate the necessity of flight; in the latter he is moved by the plots of a person not named in the history (perhaps those alluded to in 1 Chron. xii, 17)—according to the title of the psalm, Cush, a Benjamite, and therefore of Saul's tribe. See CUSH, 2.

2. *His Escape* (1 Sam. xix, 18–xxi, 15).—He first fled to Naioth (or the pastures) of Ramah, to Samuel. This is the first recorded occasion of his meeting with Samuel since the original interview during his boyhood at Bethlehem. It might almost seem as if he had intended to devote himself with his musical and poetical gifts to the prophetical office, and give up the cares and dangers of public life. But he had a higher destiny still. Up to this time both the king and himself had thought that a reunion was possible (see xx, 5, 26). But the madness of Saul now became more settled and ferocious in character, and David's danger proportionately greater. The secret interview with Jonathan, of which the recollection was probably handed down through Jonathan's descendants when they came to David's court, confirmed the alarm already excited by Saul's endeavor to seize him at Ramah, and he now determined to leave his country, and take refuge, like Coriolanus, or Themistocles in like circumstances, in the court of his enemy. Before this last resolve he visited Nob (q. v.), the seat of the tabernacle (1 Sam. xxi), partly to obtain a final interview with the high-priest Ahimelech (1 Sam. xxii, 9, 15), partly to procure food and weapons. On the pretext of a secret mission from Saul, he obtained from Ahimelech some of the sacred loaves of shew-bread (q. v.) and the consecrated sword of Goliath, of which he said, "There is none like that; give it me." The incident was of double importance in David's career. First, it established a connection between him and the only survivor of the massacre in which David's visit involved the house of Ahimelech. Secondly, from Ahimelech's surrender of the sacred bread to David's hunger (see Osiander, *De Davide panes propositionis recipiente*, Tubing. 1751) our Lord drew the inference of the superiority of the moral to the ceremonial law, which is the only allusion made to David's life in the N. T. (Matt. xii, 3; Mark ii, 25; Luke vi, 3, 4). It is also commemorated by the traditional title of Psa. lii. His hospitable reception, when in distress, by Ahimelech the priest, and the atrocious massacre innocently brought by him on Nob, the city of the priests (1 Sam. xxi and xxii, 9–19), must have deeply affected his generous nature, and laid the foundation of his cordial affection for the whole priestly order, whose ministrations he himself helped to elevate by his devotional melodies. See AHIMELECH, 1.

His stay at the court of Achish (q. v.) was short. Discovered possibly by "the sword of Goliath," his presence revived the national enmity of the Philistines against their former conqueror; and he only escaped by feigning madness, by violent gestures, playing on the gates of the city, or on a drum or cymbal, letting his beard grow, and foaming at the mouth (1 Sam. xxi, 13, Sept.). (See Ortlob, *De Davidis delirio*, Lips. 1706; Hebenstreit, *De Dav. furorem simulante*, Vit. 1711; Krafft, *De Dav. in aula Getheorum*, Erlang. 1768.) The 56th and 34th Psalms are both referred by their titles to this event, and the titles state (what does not appear in the narrative) that he had been seized as a prisoner by the Philistines, and that he was, in consequence of this stratagem, set free by Achish, or (as he is twice called) Abimelech. See ACHISH, 1.

3. *His Life as an independent Outlaw* (xxii, 1–xxvi, 25).—(1.) His first retreat was the cave of Adullam, probably the large cavern (the only very large one in Palestine), not far from Bethlehem, now called Khureitûn (see Bonar's *Land of Promise*, p. 244). From its vicinity to Bethlehem, he was joined there by his whole family, now feeling themselves in danger from Saul's fury (xxii, 1). This was probably the foundation of his intimate connection with his nephews, the sons of Zeruiah. B.C. 1061. Of these, Abishai, with two other companions, was among the earliest (1 Chron. xi, 15, 20; 1 Sam. xxvi, 6; 2 Sam. xxiii, 13, 18). Besides these were outlaws and debtors from every part, including, doubtless, some of the original

Canaanites, of whom the name of one, at least, has been preserved, Ahimelech the Hittite (1 Sam. xxvi, 6). See ADULLAM.

(2.) His next move was to a stronghold, either the mountain afterwards called Herodium, close to Adullam, or the fastness called by Josephus (*War*, vii, 8, 3) Masada, the Græcised form of the Hebrew word *Metsadah* (1 Sam. xxii, 4, 5; 1 Chron. xii, 16), in the neighborhood of En-gedi. While there, he had deposited his aged parents, for the sake of greater security, beyond the Jordan, with their ancestral kinsman of Moab (ib. 3). The neighboring king, Nahash of Ammon, also treated him kindly (2 Sam. x, 2). Here another companion appears for the first time, a schoolfellow, if we may use the word, from the schools of Samuel, the prophet Gad, his subsequent biographer (1 Sam. xxii, 5); and while he was there occurred the chivalrous exploit of the three heroes just mentioned to procure water from the well of Bethlehem, and David's chivalrous answer, like that of Alexander in the desert of Gedrosia (1 Chron. xi, 16–19; 2 Sam. xxiii, 14–17). He was joined here by two separate bands: one a little body of eleven fierce Gadite mountaineers, who swam the Jordan in flood-time to reach him (1 Chron. xii, 8); the other, a detachment of men from Judah and Benjamin, under his nephew Amasai, who henceforth attached himself to David's fortunes (1 Chron. xii, 16–18).

(3.) At the warning of Gad, he fled next to the forest of Hareth (somewhere in the hills of Judah), and then again fell in with the Philistines, and again, apparently advised by Gad (xxiii, 4), made a descent on their foraging parties, and relieved Keilah (q. v.), in which he took up his abode. While there, now for the first time in a fortified town of his own (xxiii, 7), he was joined by a new and most important ally—Abiathar, the last survivor of the house of Ithamar, who came with the high-priest's ephod, and henceforth gave the oracles, which David had hitherto received from Gad (xxiii, 6, 9; xxii, 23). By this time the 400 who had joined him at Adullam (xxii, 2) had swelled to 600 (xxiii, 13).

(4.) The situation of David was now changed by the appearance of Saul himself on the scene. Apparently the danger was too great for the little army to keep together. They escaped from Keilah, and dispersed, "whithersoever they could go," among the fastnesses of Judah. Henceforth it becomes difficult to follow his movements with exactness, partly from ignorance of the localities, partly because the same event seems to be twice narrated (1 Sam. xxiii, 19–24; xxvi, 1–4, and perhaps 1 Sam. xxiv, 1–22; xxvi, 5–25). But thus much we discern. He is in the wilderness of Ziph. Once (or twice) the Ziphites betray his movements to Saul, who literally hunts him like a partridge; the treacherous Ziphites beating the bushes before him, and 3000 men being stationed by Saul to catch even the print of his footsteps on the hills (1 Sam. xxiii, 14, 22 [Heb.], 24 [Sept.]; xxiv, 11; xxvi, 2, 20). David finds himself driven to the extreme south of Judah, in the wilderness of Maon. On two, if not three occasions, the pursuer and pursued catch sight of each other. Of the first of these escapes, the memory was long preserved in the name of the "Cliff of Divisions," given to the cliff down one side of which David climbed, while Saul was surrounding the hill on the other side (xxiii, 25–29), when he was suddenly called away by the cry of a Philistine invasion. On another occasion David took refuge in a cave "by the spring of the wild goats" (En-gedi), immediately above the Dead Sea (1 Sam. xxiv, 1, 2). The rocks were covered with the pursuers. Saul entered, as is the custom in Oriental countries, for a natural necessity. The followers of David, seated in the dark recesses of the cave, seeing, yet not seen, suggest to him the chance thus thrown in their way. David, with a characteristic mixture of humor and generosity, descends and silently cuts off the skirt of the long robe spread, as is usual in the East on such occasions, before and behind the person so occupied—and then ensued the pathetic scene of remonstrance and forgiveness (xxiv, 8–22). The third was in the wilderness further south. There was a regular camp, formed with its usual fortification of wagon and baggage. Into this inclosure David penetrated by night, and carried off the cruse of water, and the well-known royal spear of Saul, which twice had so nearly transfixed him to the wall in former days (xxvi, 7, 11, 22). The same scene is repeated as at En-gedi—and this is the last interview between Saul and David (xxvi, 25). B.C. 1055. David had already parted with Jonathan in the forest of Ziph (xxiii, 18).

To this period are annexed by their traditional titles Psalm liv ("When the Ziphim came and said, Doth not David hide himself with us?"); lvii ("When he fled from Saul in the cave," though this may refer also to Adullam); lxiii, "When he was in the wilderness of Judah" (or Idumæa, Sept.); cxlii ("A prayer when he was in the cave").

While he was in the wilderness of Maon occurred David's adventure with Nabal (q. v.), instructive as showing his mode of carrying on the freebooter's life, and his marriage with Abigail. His marriage with Ahinoam from Jezreel, also in the same neighborhood (Josh. xv, 56), seems to have taken place a short time before (1 Sam. xxv, 43; xxvii, 3; 2 Sam. iii, 2).

4. *His Service under Achish* (1 Sam. xxvii, 1; 2 Sam. i, 27).—Wearied with his wandering life, he at last crosses the Philistine frontier, not, as before, as a fugitive, but the chief of a powerful band—his 600 men now grown into an organized force, with their wives and families around them (xxvii, 3–4). After the manner of Eastern potentates, Achish gave him for his support a city — Ziklag, on the frontier of Philistia—and it was long remembered that to this curious arrangement the kings of Judah owed this part of their possessions (xxvii, 6). Here we meet with the first note of time in David's life. He *was settled* there *for a year and four months* (xxvii, 7), and his increasing importance is indicated by the fact that a body of Benjamite archers and slingers, twenty-two of whom are specially named, joined him from the very tribe of his rival (1 Chron. xii, 1–7). Possibly during this stay he may have acquired the knowledge of military organization and weapons of war (1 Sam. xiii, 19–23), in which the Philistines surpassed the Israelites, and in which he surpassed all the preceding rulers of Israel. During his outlawry, David had also become acquainted in turn not only with all the wild country in the land, but with the strongholds of the enemy all around. The celebrity acquired in successful guerilla warfare, even in modern days, turns many eyes on a chieftain; and in an age which regarded personal heroism as the first qualification of a general (1 Chron. xi, 6) and of a king, to triumph over the persecutions of Saul gave David the fairest prospects of a kingdom. That he was able to escape the malice of his enemy was due in part to the direct help given him by the nations around, who were glad to keep a thorn rankling in Saul's side; in part also to the indirect results of their invasions (1 Sam. xxiii, 27).

He deceived Achish into confidence by attacking the old nomadic inhabitants of the desert frontier, and representing the plunder to be of portions of the southern tribes or the nomadic allied tribes of Israel. But this confidence was not shared by the Philistine nobles, and accordingly David was sent back by Achish from the last victorious campaign against Saul. In this manner David escaped the difficulty of being present at the battle of Gilboa, but found that during his absence the Bedouin Amalekites, whom he had plundered during the previous year, had made a descent upon Ziklag, burnt it to the ground, and carried off

the wives and children of the new settlement. A wild scene of frantic grief and recrimination ensued between David and his followers. It was calmed by an oracle of assurance from Abiathar. It happened that an important accession had just been made to David's force. On his march with the Philistines northward to Gilboa, he had been joined by some chiefs of the Manassites, through whose territory he was passing. Urgent as must have been the need for them at home, yet David's fascination carried them off, and they now assisted him against the plunderers (1 Chron. xii, 19–21). They overtook the invaders in the desert, and recovered the spoil. These were the gifts with which David was now able for the first time to requite the friendly inhabitants of the scene of his wanderings (1 Sam. xxx, 26–31). A more lasting memorial was the law which traced its origin to the arrangement made by him, formerly in the attack on Nabal, but now again, more completely, for the equal division of the plunder among the two thirds who followed to the field, and the one third who remained to guard the baggage (1 Sam. xxx, 25; xxv, 13). Two days after this victory a Bedouin arrived from the north with the fatal news of the defeat of Gilboa. The reception of the tidings of the death of his rival and of his friend, the solemn mourning, the vent of his indignation against the bearer of the message, the pathetic lamentation that followed, well close the second period of David's life (2 Sam. i, 1–27). B.C. 1053.

III. *David's Reign.*—(I.) *As King of Judah at Hebron*, 7½ years (2 Sam. ii, 1–v, 5).—Hebron was selected, doubtless, because it was the ancient sacred city of the tribe of Judah, the burial-place of the patriarchs and the inheritance of Caleb. Here David was first formally anointed king—by whom it is not stated; but the expression seems to limit the inauguration to the tribe of Judah, and therefore to exclude any intervention of Abiathar (2 Sam. ii, 4). To Judah his dominion was nominally confined. But probably for the first five years of the time the dominion of the house of Saul, whose seat was now at Mahanaim, did not extend to the west of the Jordan, and consequently David would be the only Israelite potentate among the western tribes. He then strengthened himself by a marriage with Maacah, daughter of Talmai, king of Geshur (2 Sam. iii, 3), a petty monarch whose dominions were near the sources of the Jordan, and whose influence at the opposite end of the land must have added a great weight into David's scale. From Abigail, widow of the churlish Nabal, David seems to have received a large private fortune. Concerning his other wives we know nothing in particular, only it is mentioned that he had six sons by six different mothers in Hebron. The chief jealousy was between the two tribes of Benjamin and Judah, as Saul had belonged to the former; and a tournament was turned by mutual ill-will into a battle, in which Abner unwillingly slew young Asahel, brother of Joab. "Long war," after this, was carried on between "the house of Saul and the house of David." We may infer that the rest of Israel took little part in the contest; and although the nominal possession of the kingdom enabled the little tribe of Benjamin to struggle for some time against Judah, the skill and age of Abner could not prevail against the vigor and popular fame of David. Gradually David's power increased, and during the two years which followed the elevation of Ishbosheth, a series of skirmishes took place between the two kingdoms. First came a successful inroad into the territory of Ishbosheth (2 Sam. ii, 28). Next occurred the defection of Abner (2 Sam. iii, 12). A quarrel between Abner and Ishbosheth decided the former to bring the kingdom over to David (see Ortlob, *De pacto Davidis et Abneri*, Lips. 1709). The latter refused to treat unless, as a preliminary proof of Abner's sincerity, Michal, daughter of Saul, was restored to David. The possession of such a wife was valuable to one who was aspiring to the kingdom; and although David had now other wives, he appears not to have lost his affection for this his earliest bride. She, too, seems to have acquiesced in his claim as being greater than that of the man on whom her father had arbitrarily bestowed her, and the sincere kindness of her new husband had probably not effaced her former attachment to David, although we afterwards find her betrayed into an unworthy act by her pride of position. After giving her back, Abner proceeded to win the elders of Israel over to David; but Joab discerned that if this should be so brought about, Abner of necessity would displace him from his post of chief captain. He therefore seized the opportunity of murdering him when he had come on a peaceful embassy, and covered the atrocity by pleading the duty of revenging his brother's blood. This deed was perhaps David's first taste of the miseries of royal power. He dared not proceed actively against his ruthless nephew, but he vented his abhorrence in a solemn curse on Joab and his posterity, and followed Abner to the grave with weeping. See ABNER. Anxious to purge himself of the guilt, he ordered a public wearing of sackcloth, and refused to touch food all the day. His sincere expressions of grief won the heart of all Israel. The feeble Ishbosheth (q. v.), left alone, was unequal to the government, and shortly suffered the same fate of assassination. David, following the universal policy of sovereigns (Tacit. *Hist.* i, 44), and his own profound sense of the sacredness of royalty, took vengeance on the murderers, and buried Ishbosheth in Abner's tomb at Hebron. During this period, it is not stated against what people his marauding excursions were directed. It is distinctly alleged (2 Sam. iii, 22) that his men brought in a great spoil at the very time at which he had a truce with Abner; possibly it may have been won from his old enemies the Amalekites (1 Sam. xxx). The throne, so long waiting for him, was now vacant, and the united voice of the whole people at once called him to occupy it. B.C. 1046. A solemn league was made between him and his people (2 Sam. v, 3). For the third time David was anointed king, and a festival of three days celebrated the joyful event (1 Chron. xii, 39). His little band had now swelled into "a great host, like the host of God" (1 Chron. xii, 22). The command of it, which had formerly rested on David alone, he now devolved on his nephew Joab (2 Sam. ii, 28). It was formed by contingents from every tribe of Israel. Two are specially mentioned as bringing a weight of authority above the others. The sons of Issachar had "understanding of the times to know what Israel ought to do," and with the adjacent tribes contributed to the common feast the peculiar products of their rich territory (1 Chron. xii, 32, 40). The Levitical tribe, formerly represented in David's being followed only by the solitary fugitive Abiathar, now came in strength, represented by the head of the rival branch of Eleazar, the high-priest, the aged Jehoiada and his youthful and warlike kinsman Zadok (1 Chron. xii, 27, 28; xxvii, 5). The kingdom was not at first a despotic, but a constitutional one; for it is stated, "David made *a league* with the elders of Israel in Hebron before Jehovah; and they anointed David king over Israel" (2 Sam. v, 3). This is marked out as the era which determined the Philistines to hostility (ver. 17), and may confirm our idea that their policy was to hinder Israel from becoming united under a single king.

Underneath this show of outward prosperity, two cankers, incident to the royal state which David now assumed, had first made themselves apparent at Hebron, and affected all the rest of his career. The first was the formation of a harem, according to the usage of Oriental kings. To the two wives of his wandering life he had now added four, and including Michal, five (2 Sam. ii, 2; iii, 2–5, 15). The second was the increasing power of his kinsmen and chief officers, which the king strove to restrain within the limits

of right; and thus, of all the incidents of this part of his career, the most plaintive and characteristic is his lamentation over his powerlessness to prevent the murder of Abner (2 Sam. iii, 31-36).

(II.) *Reign over all Israel*, 33 years (2 Sam. v, 5, to 1 Kings ii, 11).—The reign of David is the great critical era in the history of the Hebrews. It decided that they were to have for nearly five centuries a national monarchy, a fixed line of priesthood, and a solemn religious worship by music and psalms of exquisite beauty; it finally separated Israel from the surrounding heathen, and gave room for producing those noble monuments of sacred writ, to the influence of which over the whole world no end can be seen. His predecessor, Saul, had many successes against the Philistines, but it is clear that he made little impression on their real power; for he died fighting against them, not on their own border, but at the opposite side of his kingdom, in Mount Gilboa. As for all the other "enemies on every side"—Moabites, Ammonites, Edomites, and the kings of Zobah—however much he may have "vexed them" (1 Sam. xiv, 47), they, as well as the Amalekites, remained unsubdued, if weakened. The real work of establishing Israel as lord over the whole soil of Canaan was left for David.

1. *The Foundation of Jerusalem.*—It must have been with no ordinary interest that the surrounding nations watched for the prey on which the Lion of Judah, now about to issue from his native lair, and establish himself in a new home, would make his first spring. One fastness alone in the centre of the land had hitherto defied the arms of Israel. On this, with a singular prescience, perceiving that so southerly a position as Hebron was no longer suitable, David fixed as his future capital. By one sudden assault Jebus was taken, and became henceforth known by the names (whether borne by it before or not we cannot tell) of Jerusalem and Zion. B.C. 1044. See JERUSALEM. Of all the cities of Palestine great in former ages, Jerusalem alone has vindicated by its long permanence the choice of its founder. The importance of the capture was marked at the time. The reward bestowed on the successful scaler of the precipice was the highest place in the army. Joab henceforward became captain of the host (1 Chron. xi, 6). The royal residence was instantly fixed there, fortifications were added by the king and by Joab, and it was known by the special name of the "city of David" (1 Chron. xi, 7; 2 Sam. v, 9).

In the account of this siege, some have imagined the Chronicles to contradict the book of Samuel, but there is no real incompatibility in the two narratives. Joab was, it is true, *already* David's chief captain; but David was heartily disgusted with him, and may have sought a pretence for superseding him by offering the post to the man who should first scale the wall. Joab would be animated by the desire to retain his office, at least as keenly as others by the desire to get it; and it is credible that he may actually have been the successful hero of that siege also. If this was the case, it will further explain why David, even in the fulness of power, made no further effort to expel him until he had slaughtered Absalom.

The neighboring nations were partly enraged and partly awestruck. The Philistines had already made two ineffectual attacks on the new king (2 Sam. v, 17-20), both near the valley of Rephaim; and these were probably the first battles fought by David after becoming king of all Israel. A retribution on their former victories now took place by the capture and conflagration of their own idols (1 Chron. xiv, 12). Tyre, now for the first time appearing in the sacred history, allied herself with Israel; and Hiram sent cedarwood for the buildings of the new capital (2 Sam. v, 11), especially for the palace of David himself (2 Sam. vii, 2). That the mechanical arts should have been in a very low state among the Israelites was to be expected, since, before the reign of Saul, even smiths' forges were not allowed among them by the Philistines. Nothing, however, could be more profitable for the Phœnicians than the security of cultivation enjoyed by the Israelites in the reigns of David and Solomon. The trade between Tyre and Israel became at once extremely lucrative to both, and the league between the two states was quickly very intimate. Unhallowed and profane as Jebus had been before, it was at once elevated to a sanctity which it has never lost, above any of the ancient sanctuaries of the land. The ark was now removed from its obscurity at Kirjath-jearim with marked solemnity, B.C. 1043. A temporary halt (owing to the death of Uzzah) detained it at Obed-edom's house, after which it again moved forward with great state to Jerusalem. An assembly of the nation was convened, and (according to 1 Chron. xiii, 2; xv, 2-27) especially of the Levites. The musical arts, in which David himself excelled, were now developed on a great scale (1 Chron. xv, 16-22; 2 Sam. vi, 5). Zadok and Abiathar, the representatives of the two Aaronic families, were both present (1 Chron. xv, 11). Chenaniah presided over the music (1 Chron. xv, 22, 27). Obed-edom followed his sacred charge (1 Chron. xiii, 18, 21, 24). The prophet Nathan appears for the first time as the controlling adviser of the future (2 Sam. vii, 3). A sacrifice was offered as soon as a successful start was made (1 Chron. xv, 26; 2 Sam. vi, 13). David himself was dressed in the white linen dress of the priestly order, without his royal robes, and played on stringed instruments (1 Chron. xv, 27; 2 Sam. vi, 14, 20). As in the prophetic schools where he had himself been brought up (1 Sam. x, 5), and as still in the impressive ceremonial of some Eastern dervishes, and of Seville cathedral (probably derived from the East), a wild dance was part of the religious solemnity. Into this David threw himself with unreserved enthusiasm, and thus conveyed the symbol of the presence of Jehovah into the ancient heathen fortress (see J. E. Müller, *De Davide ante arcam saltante*, in Ugolini *Thes.* xxxii). See DANCE. In the same spirit of uniting the sacerdotal with the royal functions, he offered sacrifices on a large scale, and himself gave the benediction to the people (2 Sam. vi, 17, 18; 1 Chron. xvi, 2). The scene of this inauguration was on the hill which, from David's habitation, was specially known as the "City of David." As if to mark the new era, he had not brought the ancient tabernacle from Gibeon, but had erected a new tent or tabernacle (1 Chron. xv, 1) for the reception of the ark. It was the first beginning of the great design, of which we will speak presently, afterwards carried out by his son, of erecting a permanent temple or palace for the ark, corresponding to the state in which he himself was to dwell. It was the greatest day of David's life. One incident only tarnished its splendor—the reproach of Michal, his wife, as he was finally entering his own palace, to carry to his own household the benediction which he had already pronounced on his people. See MICHAL. His act of severity towards her was an additional mark of the stress which he himself laid on the solemnity (2 Sam. vi, 20-23; 1 Chron. xv, 29).

A large number of psalms, either in their traditional titles, or in the irresistible evidence of their contents, bear traces of this great festival, besides those which may be referred either to this occasion, or to the dedication of Solomon's Temple, or even to the restoration of the sacred services on the return from Babylon. The 15th, 101st, and 118th, by their contents, express the feelings of David on his occupation of his new home. The 68th, at least in part, and the 24th, seem to have been actually composed for the entrance of the ark into the ancient gates of the heathen fortress—and the last words of the second of these two psalms may be regarded as the inauguration of the new name by which God henceforth is called, The Lord of hosts.

"Who is this king of glory?" "The Lord of hosts, he is the king of glory" (Psa. xxiv, 10; comp. 2 Sam. vi, 2). Fragments of poetry worked up into psalms (xcvi, 2-13; cv; cvi, 1, 47, 48) occur in 1 Chron. xvi, 8-36, as having been delivered by David "into the hands of Asaph and his brother" after the close of the festival. See PSALMS.

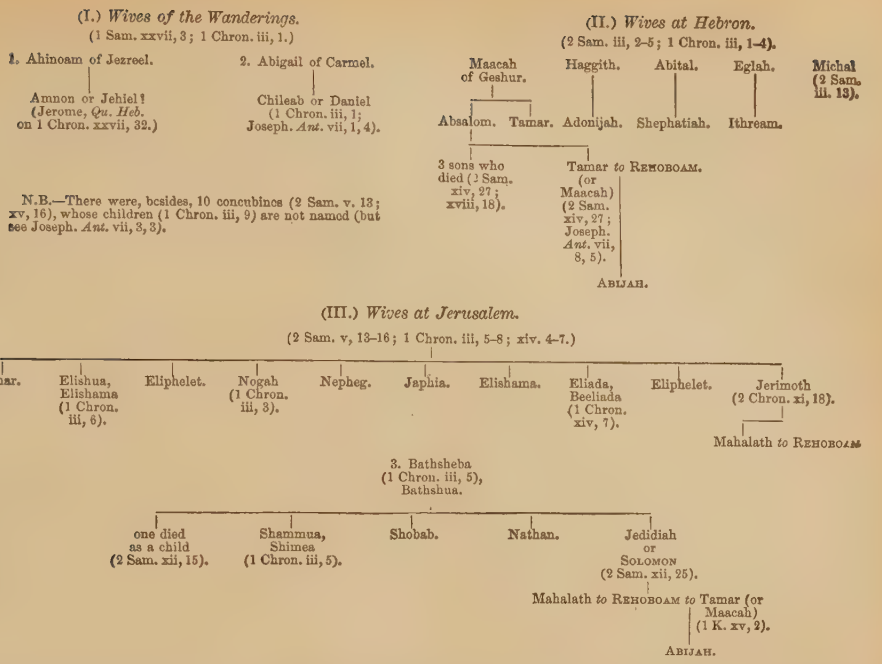
The priests or Aaronites must, for a long time, have had little occupation in their sacred office; for the ark was at Kirjath-jearim, under the care of a private family. Indeed, during the reign of Saul, we find shewbread to have been set forth at Nob (1 Sam. xxi, 4-6) by Ahimelech the priest; and it is possible that many other ceremonies were performed by them, in spite of the absence of the ark. But after the dreadful massacre perpetrated on the priestly order by Saul, few Aaronites are likely to have felt at ease in their vocation. To wear an ephod—the mark of a priest who is asking counsel of Jehovah—had almost become a crime; and even after the death of Saul, it is possible that the Aaronites, like the other Israelites, remained organized as bands of soldiers. At least Jehoiada (who, according to 1 Chron. xxvii, 5, was high-priest at this time, and joined David at Hebron with 3700 Aaronites) was father of the celebrated warrior Benaiah, afterwards captain of David's body-guard—a man whose qualities were anything but priest-like; and Zadok, afterwards high-priest, who joined David "with twenty-two captains of his father's house" at the same time as Jehoiada, is described as "a young man mighty of valor" (1 Chron. xii, 27, 28). How long Jehoiada retained the place of high-priest is uncertain. It is probable that no definite conception then existed of the need of having *one* high-priest; and it is certain that David's affection for Abiathar, because of his father's fate, maintained him in chief place through the greater part of his reign. Not until a later time, it would seem, was Zadok elevated to a co-ordinate position. See ABIATHAR. Any further remarks concerning the orders and courses of the priests will be better reserved for the article on that subject. It is enough here to add that the cruel slaughter ordered by Saul of the Aaronites of the line of Ithamar, whom Abiathar now represented, naturally gave a great preponderance of numbers and power to the line of Eleazar, to which Zadok belonged. We must also refer to the article LEVITES for further information concerning them. The bringing of the ark from Kirjath-jearim to Jerusalem established the line of high-priests in direct service before it; and from this time we may presume that the ceremonies of the great day of atonement began to be observed. Previously, it would appear, the connection between the priesthood and the tabernacle had been very loose. The priests fixed their abode at Nob, when the ark was at Kirjath-jearim, a very short distance; yet there is nothing to denote that they at all interfered with Abinadab in his exclusive care of the sacred deposit.

After this event, the king, contrasting his cedar palace with the curtains of the tabernacle, was desirous of building a temple for the ark; such a step, moreover, was likely to prevent any future change of its abode. This design, when imparted to the prophet Nathan, was received by him with warm encouragement. He had to learn, however, that the seemingly obvious fitness of a public measure did not excuse a prophet from the obligation of consulting the Lord before he ventured to utter an authoritative opinion; for the next day he had to return to the king with an intimation that he must abandon the intention of executing this great undertaking. The design is indeed commended; yet as he had been a warrior from his youth, and had shed much human blood, he was pronounced unfit for this sacred work, which was therefore to be reserved for the peaceful reign of his successor. Encouraged by the divine approbation, and by the high promises which were on this occasion given to him, David henceforth made it one of the great objects of his reign to gather means and materials for this important undertaking, the credit of which he is fairly entitled to divide with his son, by whom it was actually executed. See SOLOMON.

Great as might appear the advantage of establishing the same city as the religious and civil metropolis, the effect was, in one respect, most unfortunate; it offended the powerful and central tribe of Ephraim. They had been accustomed to regard Shiloh as the rightful abode of the ark. Against Kirjath-jearim no envy was felt, especially while the ark and its priests were in obscurity; but when so much honor attended it; when it became a peculiar glory to Judah and Benjamin—tribes already too much favored; when a magnificent edifice was erected to receive it, the seeds were sown of that disaffection which ended in a rending of the tribes apart. Nor was the argument unreasonable that a more central spot was needed for Israel to assemble at year by year.

2. *Foundation of the Court and Empire of Israel* (2 Sam. viii to xii).—The erection of the new capital at Jerusalem introduces us to a new era in David's life and in the history of the monarchy. Up to this time he had been a king, such as Saul had been before him, or as the kings of the neighboring tribes, each ruling over his territory, unconcerned with any foreign relations except so far as was necessary to defend his own nation. But David, and through him the Israelitish monarchy, now took a wider range. He became a king on the scale of the great Oriental sovereigns of Egypt and Persia, with a regular administration and organization of court and camp; and he also founded an imperial dominion which for the first time realized the prophetic description of the bounds of the chosen people (Gen. xv, 18-21). The internal organization now established lasted till the final overthrow of the monarchy. The empire was of much shorter duration, continuing only through the reigns of David and his successor Solomon. But, for the period of its existence, it lent a peculiar character to the sacred history. For once, the kings of Israel were on a level with the great potentates of the world. David was an imperial conqueror, if not of the same magnitude, yet of the same kind as Rameses or Cyrus. "I have made thee a great name like unto the name of the great men that are in the earth" (2 Sam. vii, 9). "Thou hast shed blood abundantly, and hast made great wars" (1 Chron. xxii, 8). And as, on the one hand, the external relations of life, and the great incidents of war and conquest receive an elevation by their contact with the religious history, so the religious history swells into larger and broader dimensions from its contact with the course of the outer world. The enlargement of territory, the amplification of power and state, leads to a corresponding enlargement and amplification of ideas, of imagery, of sympathies, and thus (humanly speaking) the magnificent foreshadowings of a wider dispensation in the prophetic writings first became possible through the court and empire of David.

a. In the internal organization of the kingdom the first new element that has to be considered is the royal family, the dynasty, of which David was the founder, a position which entitled him to the name of "Patriarch" (Acts ii, 29) and (ultimately) of the ancestor of the Messiah. Once settled in Jerusalem, David proceeded to increase the number of his wives, perhaps in part from the same political motive that actuates other Oriental monarchs, viz. in order to take *hostages* from the chieftains round in the least offensive mode. This explanation will not apply to the concubines. We know nothing further concerning David's family relations than the names of eleven sons born in Jerusalem (2 Sam. v, 14, 15), of whom four were children of Bathsheba (1 Chron. iii, 5), and therefore much younger than the elder sons.



(I.) Wives of the Wanderings.
(1 Sam. xxvii, 3; 1 Chron. iii, 1.)
1. Ahinoam of Jezreel.
Amnon or Jehiel?
(Jerome, Qu. Heb. on 1 Chron. xxvii, 32.)
2. Abigail of Carmel.
Chileab or Daniel
(1 Chron. iii, 1; Joseph. Ant. vii, 1, 4).
N.B.—There were, besides, 10 concubines (2 Sam. v. 13; xv, 16), whose children (1 Chron. iii, 9) are not named (but see Joseph. Ant. vii, 3, 3).
(II.) Wives at Hebron.
(2 Sam. iii, 2–5; 1 Chron. iii, 1–4).
Maacah of Geshur.
Haggith.
Abital.
Eglah.
Michal (2 Sam. iii. 13).
Absalom.
Tamar.
Adonijah.
Shephatiah.
Ithream.
3 sons who died (2 Sam. xiv, 27; xviii, 18).
Tamar to Rehoboam. (or Maacah) (2 Sam. xiv, 27; Joseph. Ant. vii, 8, 5).
Abijah.
(III.) Wives at Jerusalem.
(2 Sam. v, 13–16; 1 Chron. iii, 5–8; xiv. 4–7.)
Ibhar.
Elishua, Elishama (1 Chron. iii, 6).
Eliphelet.
Nogah (1 Chron. iii, 8).
Nepheg.
Japhia.
Elishama.
Eliada, Beelinda (1 Chron. xiv, 7).
Eliphelet.
Jerimoth (2 Chron. xi, 18).
Mahalath to Rehoboam
3. Bathsheba (1 Chron. iii, 5), Bathshua.
one died as a child (2 Sam. xii, 15).
Shammua, Shimea (1 Chron. iii, 5).
Shobab.
Nathan.
Jedidiah or Solomon (2 Sam. xii, 25).
Mahalath to Rehoboam to Tamar (or Maacah) (1 K. xv, 2).
Abijah.

Of these, Absalom and Adonijah both inherited their father's beauty (2 Sam. xiv, 25; 1 Kings i, 6), but Solomon alone possessed any of his higher qualities. It was from a union of the children of Solomon and Absalom that the royal line was carried on (1 Kings xv, 2). The princes were under the charge of Jehiel (1 Chron. xxvii, 32), perhaps the Levite (1 Chron. xv, 21; 2 Chron. xx, 14), with the exception of Solomon, who (according at least to one rendering) was under the charge of Nathan (2 Sam. xii, 25). David's strong parental affection for all of them is very remarkable (2 Sam. xiii, 31, 33, 36; xiv, 33; xviii, 5, 33; xix, 4; 1 Kings i, 6).

b. The military organization, which was, in fact, inherited from Saul, but greatly developed by David, was as follows:

(1.) "The Host," i. e. the whole available military force of Israel, consisting of all males capable of bearing arms, and summoned only for war. This had always existed from the time of the first settlement in Canaan, and had been commanded by the chief or the judge who presided over Israel for the time. Under Saul we first find the recognised post of a captain or commander-in-chief in the person of Abner; and under David this post was given as a reward for the assault on Jerusalem to his nephew Joab (1 Chron. xi, 6; xxvii, 34), who conducted the army to battle in the absence of the king (2 Sam. xii, 26). There were 12 divisions of 24,000 each, who were held to be in duty month by month, and over each of them presided an officer selected for this purpose from the other military bodies formed by David (1 Chron. xxvii, 1–15). Besides this host, the register proceeds to recount twelve princes over the tribes of Israel, who may perhaps be compared to the governors of our own states in their military capacity. The enumeration of these great officers is remarkable, being as follows: 1, Of the Reubenites; 2, of the Simeonites; 3, of the Levites; 4, of the Aaronites; 5, of Judah; 6, of Issachar; 7, of Zebulon; 8, of Naphthali; 9, of Ephraim; 10, of Manasseh; 11, of Manasseh beyond the Jordan; 12, of Benjamin; 13, of Dan. Here the names of Gad and Asher are omitted without explanation. On the other hand, the Levites and Aaronites are recounted, as though they were tribes co-ordinate with the rest, and Zadok is named as prince of the Aaronites. It is not to be supposed that the Levites or Aaronites were wholly shut out from civil and military duties. It has already been remarked that Zadok (here chief of the Aaronites) was described in the beginning of David's reign as "a mighty man of valor" (1 Chron. xii, 28), and the same appellation is given to the sons of Shemaiah, a Levite (xxvi, 6). Benaiah also, now captain of David's body-guard, was son of the late high-priest Jehoiada (xxvii, 5, and xii, 27). The army was still distinguished from those of surrounding nations by its primitive aspect of a force of infantry without cavalry. The only innovations as yet allowed were the introduction of a very limited number of chariots (2 Sam. viii, 4), and of mules for the princes and officers instead of asses (2 Sam. xiii, 29; xviii, 9). According to a Mussulman tradition (*Koran*, xxi, 80), David invented chain armor. The usual weapons were still spears and shields, as appears from the Psalms. For the general question of the numbers and equipment of the army, see Arms and Army.

(2.) The Body-guard. This also had existed in the court of Saul, and David himself had probably been its commanding officer (1 Sam. xxii, 14; Ewald). But it now assumed a peculiar organization. They were, at least in name, foreigners, as having been drawn from the Philistines, probably during David's residence at the court of Gath. They are usually called from this circumstance "Cherethites and Pelethites" (q. v.), but had also a body especially from Gath among them, of whom the name of one, Ittai, is preserved as a faithful servant of David (2 Sam. xv, 19). The captain of the force was, however, not only not a foreigner, but an Israelite of the highest distinction and purest descent, who first appears in this capacity, but who outlived David, and became the chief support of the throne of his son, namely, Benaiah, son of the chief priest Jehoiada, representative of the eldest branch of Aaron's house (2 Sam. viii, 18; xv, 18; xx, 23; 1 Kings i, 38, 44).

(3.) The most peculiar military institution in David's army was that which arose out of the peculiar circumstances of his early life. The nucleus of what afterwards became the only standing army in David's forces was the band of 600 men who had gathered

round him in his wanderings. The number of 600 was still preserved, with the name of *Gibborim*, "heroes" or "mighty men." It became yet further subdivided into three large bands of 200 each, and small bands of 20 each. The small bands were commanded by thirty officers, one for each band, who together formed "the thirty," and the three large bands by three officers, who together formed "the three," and the whole by one chief, "the captain of the mighty men" (2 Sam. xxiii, 8-39; 1 Chron. xi, 9-47). There seems to have been a second or alternate set to "the three," and in this grade, as well as among the subaltern "thirty," one is apparently named as outranking his colleagues. There is considerable difficulty in adjusting their relative position, and two or three names appear to have been omitted. The sixteen additional names given in 1 Chron. xi may be those of alternates to "the thirty." Of "the thirty," some few only are known to fame elsewhere. Asahel, David's nephew (1 Chron. xi, 26; 2 Sam. ii, 18); Elhanan, the victor of at least one Goliath (1 Chron. xi, 26; 2 Sam. xxi, 19); Joel, the brother or son (Sept.) of Nathan (1 Chron. xi, 38); Naharai, the armor-bearer of Joab (1 Chron. xi, 39; 2 Sam. xxiii, 37); Eliam, the son of Ahitophel (2 Sam. xxiii, 34); Ira, one of David's priests (1 Chron. xi, 40; 2 Sam. xxiii, 38; xx, 26); Uriah the Hittite (1 Chron. xi, 41; 2 Sam. xxiii, 39; xi, 3). See Hofmann, *Geschichte der Helden David's* (in his *Exeg. krit. Abhandlungen*, No. vi).

The following is a corrected and classified list of the noted warriors of David's veterans. See each name in its alphabetical place.

No.		2 Sam. xxiii.	1 Chr. xi.	1 Chr. xxvii.
	Chief of all.			
1.	Jashobeam (son of Zabdiel), a descendant of Hachmon	8	11	2
	Principal Three.			
2.	Eleazar (son of Dodo), a descendant of Ahoah	9	12	
3.	Shammah (son of Agee [Shage ?]), of the mountains of Judah	11		
(4.)	Unknown.			
	Secondary Three.			
5.	Abishai (son of Zeruiah), *captain*	18	20	
6.	Benaiah (son of Jehoiada)	20	22	5
(7.)	Unknown.			
	Subordinate Thirty.			
(8.)	Ismaiah of Gibeah, *captain* [1 Chron. xii, 4]			
9.	Asahel (brother of Joab)	24	26	7
10.	Elhanan (son of Dodo) of Bethlehem	"	"	
11.	Shammah of Harod, of the lineage of Zarah [Elika of Harod]	25 "	27	8
12.	Helez of Palon, in Ephraim	26	"	10
13.	Ira (son of Ikkesh) of Tekoa	"	28	9
14.	Abiezer of Anathoth, in Benjamin	27	"	12
15.	Sibbecai, a descendant of Hushah, of the lineage of Zarah	"	29	11
16.	Zalmon, a descendant of Ahoah	28	"	
17.	Maharai of Netophat, of the lineage of Zarah	"	30	13
18.	Heled (son of Baanah, of the lineage of Othniel) of Netophat	29	"	15
19.	Ittai (son of Ribai) of Gibeah, in Benjamin	"	31	
20.	Benaiah of Pirathon, in Ephraim	30	"	14
21.	Hurai, of the valleys of Gaash	"	32	
22.	Abiel of Beth-Arabah	31	"	
23.	Azmaveth (son of Adiel) of Bahurim	"	33	25
24.	Eliahba of Shaalbin	32	"	
25.	Jonathan (son of Shage), of the mountains of Judah, descendants of Jashen of Gizoh	"	34	
26.	Ahiam (son of Sacar), of the mountains of Judah, descendants of Jashen of Gizoh	33	35	
27.	Eliphelet (son of Ahasbai [Ur]) [Hepher] of Maachah	34	36	
28.	Eliam [Ahijah] (son of Ahithophel) of Giloh [Pelon]	"	"	
29.	Hezrai of Carmel	35	37	
30.	Naarai (son of Ezbai) of Arab	"	"	
31.	Joel [Igal] (brother [son] of Nathan) of Zobah	36	38	
32.	Mibhar [Bani], a Hagarene (of the tribe of Gad)	"	"	
33.	Zelek, an Ammonite	37	39	
34.	Naharai (Joab's armor-bearer) of Beeroth	"	"	
35.	Ira, descendants of Jethro	38	40	
36.	Gareb, descendants of Jethro	"	"	
37.	Uriah, a Hittite	39	41	

No.	*Supplementary Sixteen.*	2 Sam. xxiii.	1 Chr. xi.	1 Chr. xxvii.
38.	Zabad (son of Ahlai)		"	
39.	Adina (son of Shiza), of the tribe of Reuben		42	
40.	Hanan (son of Maachah)		43	
41.	Jehoshaphat of Methen		"	
42.	Uzziah of Ashteroth		44	
43.	Shama, (sons of Hothan) of Aroer		"	
44.	Jehiel, (sons of Hothan) of Aroer		"	
45.	Jediael, (sons of Shimri) of Tizah		45	
46.	Joha, (sons of Shimri) of Tizah		"	
47.	Eliel of Mahavah		46	
48.	Jeribai, (sons of Elnaan)		"	
49.	Joshavah, (sons of Elnaan)		"	
50.	Ithmah, a Moabite		"	
51.	Eliel		47	
52.	Obed		"	
53.	Jasiel of Mesobaiah		"	

c. Side by side with this military organization were established social and moral institutions. Some were entirely for pastoral, agricultural, and financial purposes (1 Chron. xxvii, 25-31), others for judicial (1 Chron. xxvi, 29-32). Some few are named as constituting what would now be called the court or council of the king; the councillors, Ahithophel of Giloh and Jonathan the king's nephew (1 Chron. xxvii, 32, 33); the companion or "friend" Hushai (1 Chron. xxvii, 33; 2 Sam. xv, 37; xvi, 19); the scribe Sheva, or Seraiah, and at one time Jonathan (2 Sam. xx, 25; 1 Chron. xxvii, 32); Jehoshaphat, the recorder or historian (2 Sam. xx, 24); and Adoram the tax collector, both of whom survived him (2 Sam, xx, 24; 1 Kings xii, 18; iv, 3, 6). The *cabinet* of David (if we may use a modern name) is thus given (1 Chron. xxvii, 32-34) with reference to a time which preceded Absalom's revolt: 1, Jonathan, David's uncle, a counsellor, wise man, and scribe; 2, Jehiel, son of Hachmoni, tutor (?) to the king's sons; 3, Ahithophel, the king's counsellor; 4, Hushai, the king's companion; 5, after Ahithophel, *Jehoiada, the son of Benaiah;* 6, Abiathar the priest. It is added, "and the general of the king's army was Joab."

Each tribe had its own head (1 Chron. xxvii, 16-22). Of these, the most remarkable were Elihu, David's brother (probably Eliab), prince of Judah (ver. 18), and Jaasiel, the son of Abner, of Benjamin (ver. 21). Twelve royal bailiffs are recited as a part of David's establishment (1 Chron. xxvii, 25, 31), having the following departments under their charge: 1, The treasures of gold, silver, etc.; 2, the magazines; 3, the tillage (wheat, etc. ?); 4, the vineyards; 5, the wine-cellars; 6, the olive and sycamore trees; 7, the oil-cellars; 8, the herds in Sharon; 9, the herds in the valleys; 10, the camels; 11, the asses; 12, the flocks. The eminently prosperous state in which David left his kingdom to Solomon appears to prove that he was on the whole faithfully served, and that his own excellent intentions, patriotic spirit, and devout piety (measured, as it must be, by the standard of those ages), really made his reign beneficial to his subjects.

d. But the more peculiar of David's institutions were those directly bearing on religion. Two prophets appear as the king's constant advisers. Of these, Gad, who seems to have been the elder, had been David's companion in exile, and, from his being called "the seer," belongs probably to the earliest form of the prophetic schools. Nathan, who appears for the first time after the establishment of the kingdom at Jerusalem (2 Sam. vii, 2), is distinguished both by his title of "prophet," and by the nature of the prophecies which he utters (2 Sam. vii, 5-17; xii, 1-14), as of the purest type of prophetic dispensation, and as the hope of the new generation, which he supports in the person of Solomon (1 Kings i). Two high-priests—representatives of the two rival houses of Aaron (1 Chron. xxvi, 3)—here again, as in the case of the two prophets, also appear: one, Abiathar, who attended him at Jerusalem, companion of his exile, and connected with the old time of the judges (1 Chron. xxvii, 34), joining him after the death of Saul, and becoming afterwards

the support of his son; the other Zadok, who minister-ed at Gibeon (1 Chron. xvi, 39), and who was made the head of the Aaronic family (xxvii, 17). Besides these four great religious functionaries, there were two classes of subordinates — prophets, specially instructed in singing and music, under Asaph, Heman, the grandson of Samuel, and Jeduthun (1 Chron. xxv, 1–31); Levites, or attendants on the sanctuary, who again were subdivided into the guardians of the gates and guardians of the treasures (1 Chron. xxvi; i, 28) which had been accumulated, since the re-establishment of the nation, by Samuel, Saul, Abner, Joab, and David himself (1 Chron. xxvi, 26–28).

The collection of those various ministers and representatives of worship round the capital must have given a new aspect to the history in David's time, such as it had not borne under the disconnected period of the judges. But the main peculiarity of the whole must have been that it so well harmonized with the character of him who was its centre. As his early martial life still placed him at the head of the military organization which had sprung up around him, so his early education and his natural disposition placed him at the head of his own religious institutions. Himself a prophet, a psalmist, he was one in heart with those whose advice he sought and whose arts he fostered. What was still more remarkable, though not himself a priest, he yet assumed almost all the functions usually ascribed to the priestly office. He wore, as we have seen, the priestly dress, offered the sacrifices, gave the priestly benediction (2 Sam. vi, 14, 17, 18); and, as if to include his whole court within the same sacerdotal sanctity, Benaiah, the captain of his guard, was a priest by descent (1 Chron. xxvii, 5), and joined in the sacred music (1 Chron. xvi, 6); David himself and "the captains of the host" arranged the prophetical duties (1 Chron. xxv, 1); and his sons are actually called "priests" (2 Sam. viii, 18; 1 Chron. xviii, 17, translated "chief," and *αὐλάρχαι*, "chief rulers"), as well as Ira, of Manasseh (2 Sam. xx, 26, translated "chief ruler," but *ἱερεύς*). Such a union was never seen before or since in the Jewish history. Even Solomon fell below it in some important points.

e. From the internal state of David's kingdom we pass to its external relations. David's further victories are narrated in the following order—Philistines, Moab, Zobah, Edom, Northern League stirred up by the Ammonites, Ammon (see Hase, *De regni David. et Salom. descriptio geogr. hist.*, Norimb. 1739, 1754). 1. The short and dry notice concerning the Philistines just gives us to understand that this is the era of their decisive, though not final subjugation. Their towns were despoiled of their wealth (2 Sam. viii, xii), and doubtless all their arms and munitions of war passed over into the service of the conqueror. 2. The Moabites were a pastoral people, whose general relations with Israel appear to have been peaceful. The slight notice of Saul's hostilities with them (1 Sam. xiv, 47) is the only breach recorded since the time of Eglon and Ehud. In the book of Ruth we see them as friendly neighbors, and much more recently (1 Sam. xxii, 3, 4) David committed his parents to the care of the king of Moab. We know no cause, except David's strength, which now drew his arms upon them. A people long accustomed to peace, in conflict with a veteran army, was struck down at once, but the fierceness of his triumph may surprise us. Two thirds of the population (if we rightly interpret the words, 2 Sam. viii, 2) were put to the sword; the rest became tributary. 3. Who are meant by the Syrians of Zobah is still a problem. See Zobah. We here follow the belief that it was a power of northern Syria, then aiming at extensive empire, which had not only defeated and humbled the king of Hamath, but had obtained homage beyond the Euphrates. The trans-Jordanic tribes in the time of Saul had founded a little empire for themselves by conquering their eastern neighbors, the Hagarenes, and, perhaps, occasionally overran the district on the side of the Euphrates, which Hadadezer, king of Zobah, considered as his own. His efforts "to recover his border at the river Euphrates" first brought him into collision with David, perhaps by an attack which he made on the roaming Eastern tribes. David defeated not merely his army, but that of Damascus too, which came too late with succor, and put Israelitish garrisons into the towns of the Damascenes (see Michaelis, *Hist. bellorum Dav. c. rege Nesibeno*, in his *Commentatt. Soc. Gott.* 1763, ii, 71 sq.). In this career of success, we see, for the first time in history, the uniform superiority over raw troops of a power which is always fighting; whose standing army is ever gaining experience and mutual confidence. 4. Another victory, gained "in the valley of salt," ought, perhaps, to be read, as in 1 Chron. xviii, 12, and in the superscription of Psa. lx, "over the *Edomites*," not "over the *Syrians*." The difference of the Hebrew textual letters is very slight, ארם and אדם. The verse which follows (2 Sam. viii, 14) seems to tell the result of this victory, viz. the complete subjugation and garrisoning of Edom, which, like Moab, was incorporated with David's empire. Immediately before this last conquest, as would appear, he wrote the 60th Psalm; and as that Psalm gives no hint of his achievements against the king of Zobah and the Damascenes, this is a strong ground for believing that those successes were not gained till somewhat later in time. 5. After David had become master of all Israel, of the Philistine towns, of Edom, and of Moab, while the Eastern tribes, having conquered the Hagarenes, threatened the Ammonites on the north, as did Moab on the south, the Ammonites were naturally alarmed, and called in the powers of Syria to their help against a foe who was growing dangerous even to them, and whom they had provoked by a gross insult (see Lakemacher, *De barba legatis Dav. abrasa*, in his *Observatt. Philol.* x, 145 sq.). The coalition against David is described as consisting of the Syrians of Bethrehob and of Maacah, of Zobah, and of Tob. The last country appears to have been in the district of Trachonitis, the first two immediately on the north of Israel. In this war we may believe that David enjoyed the important alliance of Toi, king of Hamath, who, having suffered from Hadadezer's hostility, courted the friendship of the Israelitish monarch (2 Sam. viii, 9, 10). We are barely informed that one division of the Israelites under Abishai was posted against the Ammonites; a second, under Joab, met the confederates from the north, 30,000 strong, and prevented their junction with the Ammonites. In both places the enemy was repelled, though, it would seem, with no decisive result. A second campaign, however, took place. The king of Zobah brought in an army of Mesopotamians, in addition to his former troops, and David found it necessary to make a levy of all Israel to meet the pressing danger. A pitched battle on a great scale was then fought at Helam—far beyond the limits of the twelve tribes—in which David was victorious. He is said to have slain, according to 2 Sam. x, 18, the men of 700 chariots, and 40,000 horsemen; or, according to 1 Chron. xix, 18, the men of 7000 chariots, and 40,000 footmen. If we had access to the court-records of Hamath, we should probably find that Toi had assembled his whole cavalry to assist David, and that to him was due the important service of disabling or destroying the enemy's horse. Such foreign aid may explain the general result, without our obtruding a miracle, for which the narrative gives us not the least warrant. The Syrians henceforth left the Ammonites to their fate, and the petty chiefs who had been in allegiance to Hadadezer hastened to do homage to David. 6. Early in the next season Joab was sent to take vengeance on the Ammonites in their own home by attacking their chief city, or Rabbah of Ammon. The

natural strength of their border could not keep out veteran troops and an experienced leader; and though the siege of the city occupied many months (if, indeed, it was not prolonged into the next year), it was at last taken. It is characteristic of Oriental despotism that Joab, when the city was nearly reduced, sent to invite David to command the final assault in person. David gathered a large force, easily captured the royal town, and despoiled it of all its wealth. His vengeance was as much more dreadful on the unfortunate inhabitants than formerly on the Moabites, as the danger in which the Ammonites had involved Israel had been more imminent. The persons captured in the city were put to death by torture; some of them being sawed in pieces, others chopped up with axes or mangled with harrows, while some were smothered in brick-kilns (2 Sam. xii, 31; 1 Chron. xx, 3). This severity was perhaps effectual in quelling future movements of revolt or war; for, until insurrections in Israel embolden them, foreign foes after this remain quiet. Others, however, understand that these prisoners of war were merely put to hard labor with the various instruments named. (See Danz, *De mitigata Davidis in Ammonitas crudelitate*, Jen. 1710; Nimptsch, *De Ammonitis a Dav. absque crudelitate sub jugum missis*, Lips. 1731). The royal crown, or "crown of Milcom," was placed on David's head (2 Sam. xii, 30), and, according to Josephus (*Ant.* vii, 5), was always worn by him afterwards. The Hebrew tradition (Jerome, *Qu. Heb. ad* 1 Chron. xx, 2) represents it as having been the diadem of the Ammonite god Milcom, or Moloch; and that Ittai the Gittite (doing what no Israelite could have done, for fear of pollution) tore it from the idol's head and brought it to David. The general peace which followed was commemorated in the name of "the Peaceful" (Solomon), given to the son born to him at this crisis.

To these wars in general may be ascribed psalms ix and x. To the Edomitish war, both by its title and contents, must be ascribed psalm lx, 6–12 (cviii, 7–13), describing the assault on Petra. Psalm xviii (repeated in 2 Sam. xxii) is ascribed by its title, and appears from some expressions to belong to the day "when the Lord had delivered him out of the hand of all his enemies," as well as "out of the hand of Saul" (2 Sam. xxii, 1; Psa. xviii, 1). That "day" may be either at this time or at the end of his life. Psalms xx and xxi relate to the general union of religious and of military excellencies displayed at this time of his career. (Psalm xxi, 3, "Thou settest a crown of pure gold upon his head," not improbably refers to the golden crown of Ammon, 2 Sam. xii, 30.)

3. *David's subsequent History.*—Three great calamities may be selected as marking the beginning, middle, and close of David's otherwise prosperous reign, which appear to be intimated in the question of Gad (2 Sam. xxiv, 13), "a three years' famine, a three months' flight, or a three days' pestilence."

a. Of these, the first (the three years' famine) introduces us to the last notices of David's relations with the house of Saul. There has often arisen a painful suspicion in later times, as there seems to have been at the time (xvi, 7), that the oracle which gave as the cause of the famine Saul's massacre of the Gibeonites may have been connected with the desire to extinguish the last remains of the fallen dynasty. But such an explanation is not needed. The massacre was probably the most recent national crime that had left any deep impression; and the whole tenor of David's conduct towards Saul's family is of an opposite kind. It was then that he took the opportunity of removing the bodies of Saul and Jonathan to their own ancestral sepulchre at Zelah (2 Sam. xxi, 14); and it was then, or shortly before, that he gave a permanent home and restored all the property of the family to Mephibosheth, the only surviving son of Jonathan (2 Sam. ix, 1–13; xxi, 7). The seven who perished were two sons of Saul by Rizpah, and five grandsons —sons of Michal and Adriel (2 Sam. xxi, 8), as stated in the common Hebrew and Greek text, and in our received version; and Josephus imagines that they were born of her after a second divorce from David. But it is certain, from 1 Sam. xviii, 19, that *Michal* is here a mistake for *Merab*, which name De Wette has introduced into his version. The description of the other bereaved mother, Rizpah, the daughter of Aiah, who took her station upon the rock, and watched the bodies of her sons day and night, lest they should be devoured by beasts of prey or torn by the birds of the air, is deeply affecting. It touched the heart of David when he heard of it. He would not allow public decency to be any further offended to satisfy the resentment of the Gibeonites, but directed the bodies to be taken down and honorably deposited in the family sepulchre.

b. The second group of incidents contains the tragedy of David's life, which grew in all its parts out of the polygamy, with its evil consequences, into which he had plunged on becoming king. (1.) Underneath the splendor of his last glorious campaign against the Ammonites was a dark story, known probably at that time only to a very few, and even in later times kept as much as possible out of the view of the people, but now recognised as one of the most instructive portions of his career—the double crime of adultery with Bathsheba, and of the virtual murder of Uriah. B.C. 1035. The crimes are undoubtedly those of a common Oriental despot. But the rebuke of Nathan, the sudden revival of the king's conscience, his grief for the sickness of the child, the gathering of his uncles and elder brothers around him, his return of hope and peace, are characteristic of David, and of David only. If we add to these the two psalms, the 32d and the 51st, of which the first by its acknowledged internal evidence, the second by its title, also claim to belong to this crisis of David's life, we shall feel that the instruction drawn from the sin has more than compensated to us at least for the scandal occasioned by it. (See Bebel, *David peccans et pœnitens*, Argent. 1703.) But, though the "free spirit" and "clean heart" of David returned, and although the birth of Solomon was as auspicious as if nothing had occurred to trouble the victorious festival which succeeded it, the clouds from this time gathered over David's fortunes, and henceforward "the sword never departed from his house" (2 Sam. xii, 10). The outrage on his daughter Tamar, the murder of his eldest son Amnon, and then the revolt of his best beloved Absalom, brought on the crisis which once more sent him forth a wanderer, as in the days when he fled from Saul; and this, the heaviest trial of his life, was aggravated by the impetuosity of Joab, now, perhaps from his complicity in David's crime, more unmanageable than ever.

(2.) Of all his sons, Absalom had naturally the greatest pretensions, being, by his mother's side, grandson of Talmai, king of Geshur; while, through his personal beauty and winning manners, he was high in popular favor. It is evident, moreover, that he was the darling son of his father. When his own sister Tamar had been dishonored by her half-brother Amnon, the eldest son of David, Absalom slew him in vengeance, but, in fear of his father, then fled to his grandfather at Geshur. B.C. 1033. Joab, discerning David's longings for his son, effected his return after three years; but the conflict in the king's mind is strikingly shown by his allowing Absalom to dwell two full years in Jerusalem before he would see his face. See Absalom.

(3.) The insurrection of Absalom against the king was the next important event, in the course of which there was shown the general tendency of men to look favorably on young and untried princes rather than on those whom they know for better and for worse. B.C. 1023. Absalom erected his royal standard at Hebron first, and was fully prepared to slay his father outright, which might probably have been done if the

energetic advice of Ahithophel had been followed. The rebellion was fostered apparently by the growing jealousy of the tribe of Judah at seeing their king absorbed into the whole nation; and if, as appears from 2 Sam. xi, 3; xxiii, 34, Ahithophel was the grandfather of Bathsheba, its main supporter was one whom David had provoked by his own crimes.

It was apparently early on the morning of the day after he had received the news of the rebellion at Hebron that the king left the city of Jerusalem on foot. He was accompanied by a vast concourse, in the midst of which he and his body-guard were conspicuous. They started from a house on the outskirts of the city (2 Sam. xv, 17, Sept.), and every stage of the mournful procession was marked by some incident which called forth a proof of the deep and lasting affection which the king's peculiar character had the power of inspiring in all who knew him. The first distinct halt was by a solitary olive-tree (2 Sam. xv, 18, Sept.) that marked the road to the wilderness of the Jordan. Among his guard of Philistines and his faithful company of 600 he observed Ittai of Gath, and, with the true nobleness of his character, entreated the Philistine chief not to peril his own or his countrymen's lives in the service of a fallen and a stranger sovereign. But Ittai declared his resolution (with a fervor which almost inevitably recalls a like profession made almost on the same spot to the great descendant of David centuries afterwards) to follow him in life and in death. They all passed over the ravine of the Kedron; and here, when it became apparent that the king was really bent on departure, "the whole land wept with a loud voice"—the mountain and the valley resounded with the wail of the people. At this point they were overtaken by the two priests, Zadok and Abiathar, bringing the ark from its place on the sacred hill, to accompany David in his flight—Abiathar, the elder, going forward up the mountain, as the multitude defiled past him. Again, with a spirit worthy of the king, who was prophet as well as priest, David turned them back. He had no superstitious belief in the ark as a charm; he had too much reverence for it to risk it in his personal peril. And now the whole crowd turned up the mountain pathway; all wailing, all with their heads muffled as they went; the king only distinguished from the rest by his unsandalled feet. At the top of the mountain, consecrated by an altar of worship, they were met by Hushai the Archite, "the friend," as he was officially called, of the king. The priestly garment, which he wore after the fashion, as it would seem, of David's chief officers, was torn, and his head was smeared with dust, in the bitterness of his grief. In him David saw his first gleam of hope. A moment before, the tidings had come of the treason of Ahithophel; and, to frustrate his designs, Hushai was sent back, just in time to meet Absalom arriving from Hebron. It was noon when David passed over the mountain top, and now, as Jerusalem was left behind, and the new scene opened before him, two new characters appeared, both in connection with the hostile tribe of Benjamin, whose territory they were entering. One was Ziba, servant of Mephibosheth, taking advantage of the civil war to make his own fortunes. At Bahurim, also evidently on the downward pass, came forth one of its inhabitants, Shimei, in whose furious curses broke out the long-suppressed hatred of the fallen family of Saul, as well perhaps as the popular feeling against the murderer of Uriah. With characteristic replies to both, the king descended to the Jordan valley (2 Sam. xvi, 14; and comp. xvii, 22; Joseph. *Ant.* vii, 9, 4), and there rested after the long and eventful day at the ford or bridge (*Abara*) of the river. At midnight they were aroused by the arrival of the two sons of the high-priests, and by break of day they had reached the opposite side in safety.

To the dawn of that morning is to be ascribed Psa. iii, and (according to Ewald, though this seems less certain) to the previous evening Psa. iv. Psa. cxliii, by its title in the Sept., "When his son was pursuing him," belongs to this time. Also, by long popular belief, the Trans-Jordanic exile of Psa. xlii has been supposed to be David, and the complaints of Psa. lv and lxix to be levelled against Ahithophel (q. v.), who, on finding his advice disregarded, committed suicide in a fit of offended pride and despair (see Schwarz, *De morte Achitophelis*, Wittenb. 1704).

The history of the remaining period of the rebellion is comparatively brief. Mahanaim was the capital of David's exile, as it had been of the exiled house of Saul (2 Sam. xvii, 24; comp. ii, 8, 12). Three great chiefs of that pastoral district are specially mentioned as supporting him: one, of great age, not before named, Barzillai the Gileadite; the two others, bound to him by former ties, Shobi, the son of David's ancient friend Nahash, probably put by David in his brother's place (xii, 30; x, 2), and Machir, the son of Ammiel, the former protector of the child of David's friend Jonathan (2 Sam. xvii, 27; ix, 4). Strengthened by the warlike Eastern tribes, and surrounded by his experienced captains, the king no longer hesitated to meet Absalom in the field. His forces were arranged under the three great military officers who remained faithful to his fortunes—Joab, captain of the host; Abishai, captain of "the mighty men;" and Ittai, who seems to have taken the place of Benaiah (had he wavered in his allegiance, or was he appointed afterwards?), as captain of the guard (2 Sam. xviii, 2). On Absalom's side was David's nephew, Amasa (ib. xvii, 25). The warlike spirit of the old king and of his faithful followers at this extremity of their fortunes is well depicted by Hushai, "chafed in their minds, as a bear robbed of her whelps in the 'field' (or a fierce wild boar in the Jordan valley, Sept.);" the king himself, as of old, "lodging not with the people," but "hid in some pit or some other place" (2 Sam. xvii, 8, 9). The final battle was fought in the "forest of Ephraim," resulting in a decisive victory on the part of David's forces, and terminating in the accident leading to the death of Absalom at the hand of Joab during the retreat. David was waiting the event of the battle in the gateway of Mahanaim. Two messengers, each endeavoring to outstrip the other, were seen running breathless from the field. The first who arrived was Ahimaaz, the son of Zadok, already employed as a messenger on the first day of the king's flight. He had been entreated by Joab not to make himself the bearer of tidings so mournful; and it would seem that when he came to the point his heart failed, and he spoke only of the great confusion in which he had left the army. At this moment the other messenger burst in—a stranger, perhaps an Ethiopian—and abruptly revealed the fatal news (2 Sam. xviii, 19–32). See Cushi. The passionate burst of grief which followed is one of the best proofs of the deep affection of David's character. He wrapped himself up in his sorrow, and even at the very moment of his triumph he could not forget the hand that had slain his son. He made a solemn vow to supersede Joab by Amasa, and in this was laid the lasting breach between himself and his powerful nephew, which neither the one nor the other ever forgave (2 Sam. xix, 13). Perhaps Joab on the former occasion, when he murdered Abner, had blinded the king by pleading revenge for the blood of Asahel, but no such pretence could here avail. The king was now probably brought to his determination partly by his disgust at Joab, partly by his desire to give the insurgents confidence in his amnesty. If Amasa is the same as Amasai, David may likewise have retained a grateful remembrance of the cordial greeting with which he had led a strong band to his assistance at the critical period of his abode in Ziklag (1 Chron. xii, 18); moreover, Amasa, equally with Joab, was David's nephew, their two mothers, Abigail and Zeruiah, being

sisters to David by at least one parent (2 Sam. xvii, 25; 1 Chron. ii, 13, 16). The unscrupulous Joab, however, was not so to be set aside. Before long, catching an opportunity, he assassinated his unsuspecting cousin with his own hand; and David, who had used the instrumentality of Joab to murder Uriah, did not dare to resent the deed (2 Sam. xx, 5–12).

The return was marked at every stage by rejoicing and amnesty—Shimei forgiven, Mephibosheth partially reinstated, Barzallai rewarded by the gifts long remembered, to his son Chimham (2 Sam. xix, 16–40; 1 Kings ii, 7). Judah was first reconciled. The embers of the insurrection still smouldering (2 Sam. xix, 41–43) in David's hereditary enemies of the tribe of Benjamin were trampled out by the mixture of boldness and sagacity in Joab, now, after the murder of Amasa, once more in his old position. David again reigned in undisturbed peace at Jerusalem (2 Sam. xx, 1–22).

(4.) A quarrel, however, which took place between the men of Judah and those of the other tribes in bringing the king back, had encouraged a Benjamite named Sheba to raise a new insurrection, which spread with wonderful rapidity. "Every man of Israel," are the strong words of the text, "went up from after David, and followed Sheba, the son of Bichri," a man of whom nothing besides is known. This strikingly shows that the later unpatriotic features of David's reign had to a great degree exhausted the enthusiasm once kindled by his devotion and chivalry, and that his throne now rested rather on the rotten foundation of mere military superiority. Amasa was collecting troops as David's general at the time when he was treacherously assassinated by his cousin, who then, with his usual energy, pursued Sheba, and blockaded him in Beth-maachah before he could collect his partisans. Sheba's head was cut off and thrown over the wall; and so ended the new rising (2 Sam. xx, 1–22). Yet this was not the end of trouble, for the intestine war seems to have inspired the Philistines with the hope of throwing off the yoke. Four successive battles are recorded (2 Sam. xxi, 15–22), in the first of which the aged David was nigh being slain. His faithful officers kept him away from all future risks, and Philistia was once more, and finally, subdued.

c. The closing period of David's life, with the exception of one great calamity, may be considered as a gradual preparation for the reign of his successor. This calamity was the three days' pestilence which visited Jerusalem at the warning of the prophet Gad (see Blessig, *De censu Dav. pesteque hunc secuta*, Argent. 1788; Becker, *Quare Deus Davidem pestilentia puniverit*, Rost. 1767). The occasion which led to this warning was the census of the people taken by Joab at the king's orders (2 Sam. xxiv. 1–9; 1 Chron. xxi, 1–7, xxvii, 23, 24); an attempt not unnaturally suggested by the increase of his power, but implying a confidence and pride alien to the spirit inculcated on the kings of the chosen people. Joab's repugnance to the measure was such that he refused altogether to number Levi and Benjamin (1 Chron. xxi, 6). The king also scrupled to number those who were under twenty years of age (1 Chron. xxvii, 23), and the final result was never recorded in the "Chronicles of King David" (1 Chron. xxvii, 24). The plague, however, and its cessation were commemorated down to the latest times of the Jewish nation. Probably Psalms xxx and cxxxi have reference to this time. But a more certain memorial was preserved on the exact spot which witnessed the close of the pestilence, or, as it was called, "The Death." Outside the walls of Jerusalem, Araunah or Ornan, a wealthy Jebusite—perhaps even a descendant of the ancient king of Jebus (2 Sam. xxiv, 23)—possessed a threshing-floor; there he and his sons were engaged in threshing the corn gathered in from the harvest (1 Chron. xxi, 20). At this spot an awful vision appeared, such as is described in the later days of Jerusalem, of the Angel of the Lord stretching out a drawn sword between earth and sky over the devoted city. The scene of such an apparition at such a moment was at once marked out for a sanctuary. David demanded, and Araunah willingly granted, the site; the altar was erected on the rock of the threshing-floor; the place was called by the name of "*Moriah*" (2 Chron. iii, 1); and for the first time a holy place, sanctified by a vision of the Divine presence, was recognised in Jerusalem. It was this spot which afterwards became the altar of the Temple, and therefore the centre of the national worship, with but slight interruption, for more than 1000 years, and it is even contended that the same spot is the rock, still regarded with almost idolatrous veneration, in the centre of the Mussulman "Dome of the Rock" (see Prof. Willis in Williams's *Holy City*, ii).

The selection of the site of this altar probably revived the schemes of the king for the building of a permanent edifice to receive the ark, which still remained inside his own palace in its temporary tent. Such schemes, we are told, he had entertained after the capture of Jerusalem, or at the end of his wars. Two reasons were given for their delay: one, that the ancient nomadic form of worship was not yet to be abandoned (2 Sam. vii, 6); the other, that David's wars unfitted him to be the founder of a seat of peaceful worship (1 Chron. xxii, 8). But a solemn assurance was given that his dynasty should continue "for ever" to prosecute the work (2 Sam. vii, 13; 1 Chron. xxii, 9, 10). Such a founder, and the ancestor of such a dynasty, was Solomon to be, and to him, therefore, the stores and the plans of the future Temple (according to 1 Chron. xxii, 2–19; xxviii, 1–xxix, 19) were committed.

d. The last commotion recorded took place when David's end seemed nigh, and Adonijah, one of his elder sons, feared that the influence of Bathsheba might gain the kingdom for her own son Solomon. B.C. 1015. Adonijah's conspiracy was joined by Abiathar, one of the two chief priests, and by the redoubted Joab; upon which David took the decisive measure of raising Solomon at once to the throne. Of two young monarchs, the younger and the less known was easily preferred, when the sanction of the existing government was thrown into his scale; and the cause of Adonijah immediately fell to the ground. Zadok, Nathan, Benaiah, Shimei, and Rei remaining firm, the plot was stifled, and Solomon's inauguration took place under his father's auspices (1 Kings i, 1–53). See ADONIJAH. Amnesty was proclaimed to the conspirators, and was faithfully observed by Solomon till a later violation of its terms. See SOLOMON.

4. By this time David's infirmities had grown upon him. The warmth of his exhausted frame was attempted to be restored by the introduction of a young Shunamite, of the name of Abishag (q. v.), mentioned apparently for the sake of an incident which grew up in connection with her out of the later events (1 Kings i, 1; ii, 17). His last song is preserved (see Pfeiffer, *Erklär. der sogenannten letzten Worte David's*, Altdorf, 1774; De Baer, *In ultima verba Davidis*, in the *Bibl. Hag.* ii, 439–504; Trendelenburg, *In verba novissima Davidis*, Gotting. 1779)—a striking union of the ideal of a just ruler which he had placed before him, and of the difficulties which he had felt in realizing it (2 Sam. xxiii, 1–7). His last words, as recorded, to his successor are general exhortations to his duty, combined with warnings against Joab and Shimei, and charges to remember the children of Barzillai (1 Kings ii, 1–9).

He died B.C. 1013, at the age of seventy (2 Sam. v, 4), and "was buried in the city of David" (1 Kings ii, 10). After the return from the captivity, "the sepulchres of David" were still pointed out "between Siloah and the house of the 'mighty men,'" or "the guard-house" (Neh. iii, 16). His tomb, which became the general sepulchre of the kings of Judah, was point-

ed out in the latest times of the Jewish people. "His sepulchre is with us unto this day," says Peter at Pentecost (Acts ii, 29); and Josephus (*Ant.* vii, 15, 3; xiii, 8, 4; xvi, 7, 1) states that Solomon, having buried a vast treasure in the tomb, one of its chambers was broken open by Hyrcanus, and another by Herod the Great. It is said to have fallen into ruin in the time of Hadrian (Dio Cassius, lxix, 14). In Jerome's time a tomb, so called, was the object of pilgrimage (*Ep. ad. Marcell.* 17, 46), but apparently in the neighborhood of Bethlehem. The edifice shown as such from the Crusades to the present day is on the southern hill of modern Jerusalem, commonly called Mount Zion, under the so-called "Cœnaculum." For the description of it, see Barclay's *City of the Great King*, p. 209. For the traditions concerning it, see Williams's *Holy City*, ii, 509–513. The so-called "tombs of the kings" have of late been claimed as the royal sepulchre by De Saulcy (ii, 162–215), who brought to the Louvre (where it may be seen) what he believed to be the lid of David's sarcophagus. But these tombs are *outside* the walls, and therefore cannot be identified with the tomb of David, which was emphatically *within* the walls (see Robinson, iii, p. 252, note).

The *character* of David has been so naturally brought out in the incidents of his life that it need not be here described in detail (see Niemeyer, *Charakt.* iv, 125 sq.). In the complexity of its elements, passion, tenderness, generosity, fierceness—the soldier, the shepherd, the poet, the statesman, the priest, the prophet, the king—the romantic friend, the chivalrous leader, the devoted father—there is no character of the O. T. at all to be compared to it. Jacob comes nearest in the variety of elements included within it. But David's character stands at a higher point of the sacred history, and represents the Jewish people just at the moment of their transition from the lofty virtues of the older system to the fuller civilization and cultivation of the later. In this manner he becomes naturally, if one may say so, the likeness or portrait of the last and grandest development of the nation and of the monarchy in the person and the period of the Messiah. In a sense more than figurative, he is the type and prophecy of Jesus Christ. Christ is not called the son of Abraham, or of Jacob, or of Moses, but he was truly "the son of David."

To his own people, his was the name most dearly cherished after their first ancestor Abraham. "The city of David," "the house of David," "the throne of David," "the seed of David," "the oath sworn unto David" (the pledge of the continuance of his dynasty), are expressions which pervade the whole of the Old Testament and all the figurative language of the New, and they serve to mark the lasting significance of his appearance in history.

His Psalms (whether those actually written by himself be many or few) have been the source of consolation and instruction beyond any other part of the Hebrew Scriptures. In them appear qualities of mind and religious perceptions not before expressed in the sacred writings, but eminently characteristic of David —the love of nature, the sense of sin, and the tender, ardent trust in, and communion with, God. No other part of the Old Testament comes so near to the spirit of the New. The Psalms are the only expressions of devotion which have been equally used through the whole Christian Church — Abyssinian, Greek, Latin, Puritan, Anglican.

The difficulties that attend his character are valuable as proofs of the impartiality of Scripture in recording them, and as indications of the union of natural power and weakness which his character included. The Rabbis in former times, and critics (like Bayle) in later times, have seized on its dark features and exaggerated them to the utmost. It has often been asked, both by scoffers and the serious, how the man after God's own heart could have murdered Uriah, and seduced Bathsheba, and tortured the Ammonites to death? An extract from one who is not a too-indulgent critic of sacred characters expresses at once the common sense and the religious lesson of the whole matter. "Who is called 'the man after God's own heart?' David, the Hebrew king, had fallen into sins enough—blackest crimes—there was no want of sin. And therefore the unbelievers sneer, and ask, 'Is this your man according to God's heart?' The sneer, I must say, seems to me but a shallow one. What are faults, what are the outward details of a life, if the inner secret of it, the remorse, temptations, the often baffled, never ended struggle of it be forgotten? . . . David's life and history, as written for us in those Psalms of his, I consider to be the truest emblem ever given us of a man's moral progress and warfare here below. All earnest souls will ever discern in it the faithful struggle of an earnest human soul towards what is good and best. Struggle often baffled—sore baffled—driven as into entire wreck; yet a struggle never ended, ever with tears, repentance, true unconquerable purpose begun anew" (Carlyle's *Heroes and Hero-Worship*, p. 72).

Y. 1868). See PSALMS.

B. *In phrases.*—The "House of David" (Isa. vii, 2, 13; Jer. xxi, 12; Zech. xiii, 1) signifies his family, posterity. "In David," that is, in the *Book of David*, the Psalms (Matt. xxii, 42–45; Heb. iv, 7; Psa. xcv, 7). The name "*David*," in Ezek. xxxiv, 23, 24; xxxvii, 24; Hos. iii, 5, denotes the expected Messiah. "The *Son* of David" is often applied to Jesus as a title of the Messiah (Matt. i, 1; ix, 27; xii, 23; xv, 22; xx, 30, 31; Mark x, 47, 48), but not in John's writings. So the "Root of David" is used in the same sense (Rev. v, 5; xxii, 16; Isa. xi, 1, 10). Hence the kingdom or reign of the Messiah is designated by the appellations "the Kingdom of David" (Mark xi, 10); "the Throne of David" (Luke i, 32); "the Tabernacle of David" (Acts xv, 16; Amos ix, 10); "the Key of David" (Rev. iii, 7; Isa. xxii, 22; Matt. xvi, 19).

DAVID, CITY OF. This name is applied in Scripture to two different places.

1. In 2 Sam. v, we read that David, having taken Jerusalem, and stormed the citadel on Mount Zion, "dwelt in the fort, and called it the city of David" (1 Chron. xi, 7). After that time the castle and palace of Zion appear to have been called "the City of David," as contradistinguished alike from Jerusalem generally, and from Moriah and other sections of it (1 Kings viii, 1; iii, 1; 2 Chron. v, 2). In it David and most of his successors on the throne were buried (1 Kings ii, 10; 2 Chron. ix, 31, etc.). Mount Zion, or the City of David, is on the south-west side of Jerusalem, opposite Moriah, or the temple-mount, with which it was connected by a bridge spanning the deep valley of Tyropœon. The tomb of David on Zion is to this day one of the most honored sanctuaries of the Mohammedans; and the square keep, called the Castle of David, on the northern end of Zion, is one of the most ancient and interesting relics in the Holy City. See JERUSALEM.

2. In Luke ii, 4 and 11, Bethlehem is called the City of David. Joseph and Mary went from Nazareth "unto the city of David, which is called Bethlehem."

This was David's birthplace, and the home of his youth. We know not at what time the little mountain village began to be called by his name; but there is no trace of such a designation in the O. T. It appears, however, to have been pretty generally used in the time of our Lord. See BETHLEHEM.

David, or **Dewi**, ST., patron saint of Wales, was, according to tradition, the son of the prince of Ceretica (Cardiganshire), and was born about the end of the 5th or beginning of the 6th century. Having resolved on a religious life, he spent, as was customary in those days, a probationary period in solitude, after which he commenced preaching to his countrymen. He built a chapel at Glastonbury, and founded twelve monasteries, the chief of which was at Menevia, in the vale of Ross. At the synod of Brevy, in Cardiganshire, held in 519, David showed himself a strong opponent of the Pelagian heresy. Subsequently he became archbishop of Caerleon-upon-Usk, but transferred his see to Menevia, now called St. David's, where he died about the year 601. His life was written by Ricemarch, bishop of St. David's, who died about the year 1099. The *Historia S. Davidis*, by Giraldus Cambrensis, written about 1175, and published in Wharton's *Anglia Sacra*, is little more than an abridgment of Ricemarch's work.—Butler, *Lives of Saints*, March 1.

David, CHRISTIAN, one of the founders of Herrnhut, was born Dec. 31, 1690, at Senftleben, Moravia, and was bred a carpenter. In early manhood he became a Protestant. In 1722 he was sent to find a home for the persecuted Moravians, and secured one from Count Zinzendorf, at Bertholdsdorf, Lusatia. See MORAVIANS. When the church was organized at Herrnhut (their new abode), David was elected first of the twelve elders. His subsequent life was entirely devoted to missionary and Christian labors. In 1733 he led the first Moravian mission to Greenland. In 1738 Wesley had several interviews with David at Herrnhut. The after labors of David included two additional visits to Greenland, and eleven to Moravia; with others to Denmark, Holland, Wetteravia, Livonia, and England. In the beginning of 1750 he visited all the congregations in Germany, and almost immediately returned to London. In July he re-embarked for Germany, visited the churches in Wetteravia, and assisted at the synod held at Barby. From that period he resided at the church which his hands had founded. The toils of an honored and useful life were unexpectedly closed by his death, after a short illness, February 3, 1751. See Stevens, *History of Methodism*, i, 97; *Wesleyan Magazine*, March, 1852; Wesley, *Works*, iii, 86; v, 284.

David OF DINANTO (13th century) is said to have been a disciple of Amalrich of Bena (q. v.), who died A.D. 1207. The Council of Paris (A.D. 1209) not only condemned Amalrich, but also David of Dinanto. Thomas Aquinas (*Sent.* ii, Dist. xvii, qu. i, art. i) speaks of certain "modern philosophers" as adherents of David, and attributes to him a doctrine in substance pantheistic: "God is the eternal substance; all things are God, and God is everything." Albertus Magnus speaks of a treatise of his, *De Tomis*. But, in fact, little is really known of David or his writings, except that he was one of the leaders of the pantheistic tendency in the Middle Ages. Neander (*History of Dogmas*, ii, 560, Ryland's translation) gives the chief authorities for what is known of David's doctrines, viz. Concil. Paris, a. 1209, in Martene *Thesaur. Anecdot.* iv, 163; Albertus Magnus, *Summa P. I.* Tract. iv, Quæstio 20, Memb. ii, ed. Lugd. t. xvii, f. 76; Thomas Aquinas, in *Sent.* l. ii, Dist. xvii, qu. i, art. i, ed. Venet. t. x, p. 235. David "described God as the *principium materiale omnium rerum*, and in reference to the three departments of existence distinguished three principles: matter, the first indivisible principle of the corporeal world; in reference to the spiritual world—spirit, the invisible *νοῦς* from which proceeds the soul; and in reference to the ideas of God—the first Indivisible in the eternal substances. Between these three principles no distinction could exist, for otherwise they must be referred back to a higher principle of unity. There are, therefore, three relations of the one divine Being to the corporeal, the spiritual, and the ideal worlds." See Baur, *Vorles. üb. d. Dogmengeschichte*, 1866, vol. ii, p. 328; Gieseler, *Ch. Hist.* vol. ii, § 74; Krœnlein, *de genuina Amalrici a Bena ejusque sectatorum ac Davidis de Dinanto doctrina*, Giess. 1842; Staudenmaier, *Phil. d. Christenthums*, i, 633 sq.; Engelhardt, Amalrich von Bena, in *den kirchenh. Abhandlung*. No. 3; Krœnlein, Amalrich von Bena u. David von Dinanto, in *Stud. u. Krit.* 1847, i, 271 sq.

David (Maronite archbishop, A.D. 1053) OF MOUNT LIBANUS, wrote an *Epistle* to Arsenius concerning the Melchite and Maronite sects; also a *Treatise* on the opinions of the Eastern Christians, part of which was published by Abraham Ecchelensis (a Roman Maronite), *Antiq. Orient.* p. 459 (London, 1682). In the year 1059, at the request of the abbot Joseph, he translated from Syriac into Arabic the *Constitutiones Ecclesiæ Maronitarum*, in seventeen chapters (see Abraham Ecchelensis, *Not. ad Catalog. Hebedjesu*, n. 5).—Clarke, *Succ. of Sacred Literature*, ii, 605. See MARONITES.

David OF AUGSBURG, a Franciscan of the 13th century, was a friend of Berthold of Ratisbon, whom he accompanied on his missionary journeys. He died in Augsburg in 1271. Three tractates of his are given in the *Bibliotheca Patrum*, vol. xiii, viz. *The Novices' Formula for the Reformation of the outer Man*, *A Formula for the inner Man*, and *A Mirror of the seven Steps of a Religious*. These tracts have been erroneously ascribed to Bonaventura. Several of his works were written in the German language, and of this class six have been published by Pfeiffer in his *Deutsche Mystiker des 13ten Jahrhunderts* (Leipzig, 1845).—Oudin, *Comment. de Script. Eccles.* iii, 447.

David George, or **Joris**. See JORIS.

David Nicetas. See NICETAS.

Davidists, followers of David Joris. See JORIS.

David's, ST., an episcopal city in Pembrokeshire, Wales. It has been the seat of a bishopric since about 519, when St. David (q. v.) transferred the archbishop's see to St. David's (before called Mynyw, and by the Romans Menevia) from Caerleon. It was in the Middle Ages a large city—the great resort of pilgrims to St. David's shrine; it is now a small village, with only a few good houses besides those of the clergy. It has a fine cathedral, and splendid remains of religious houses, episcopal palace, and St. Mary's College (founded by John of Gaunt), within a high embattled wall nearly a mile in circuit. The cathedral, founded in 1180, on the site of the monastery of St. David, is cruciform. Its dimensions, in the interior, are as follows: length, 290 feet; breadth, 76; nave, 124; choir, 80; transept, 120; central tower, 127 feet high. Among the former bishops may be named Laud, Bull, South, and Horsley. The present incumbent (1868) of the see is Connop Thirlwall, the historian of Greece. The cathedral establishment includes a bishop, a dean, four canons, five vicars choral, and other officers residentiary, with four archdeacons, and 12 prebendaries, or honorary canons, non-resident.

Davidson, ROBERT, D.D., an eminent Presbyterian divine and scholar, was born at Elkton, Md., 1750, and graduated at the University of Pennsylvania 1771. In 1773 he was ordained by the Second Presbytery of Philadelphia, and became associate pastor of the First Church and professor of history in the University. During the Revolution he was a zealous

Whig, and when the British occupied Philadelphia he retired to Delaware. In 1784 he was appointed vice-president and professor of belles-lettres in Dickinson College, and was also called to be pastor of the First Presbyterian Church in Carlisle. On leaving Philadelphia, he was made D.D. by the University. The double duties devolving on him at Carlisle were discharged with signal ability, industry, and success. His learning embraced a wide range, including eight languages, theology, and physics. He was especially devoted to astronomy, and invented an ingenious apparatus called a *Cosmosphere*, presenting the earth and firmament to view on the same axis. He was also a man of elegant tastes, skilled in music and drawing. In 1785 he was appointed by the Old Synod of New York and Philadelphia, along with Drs. Alison and Ewing, on a committee to prepare an improved version of the Psalms to take the place of Rouse. In 1796 he was chosen moderator of the General Assembly, and in 1804 he succeeded Dr. Nisbet in the presidency of the college, which he resigned in 1809, in order to devote himself exclusively to his pastoral duties. He died at Carlisle Dec. 13, 1812. His publications are, *A Dialogue, with two Odes set to Music*, 1775; *An Epitome of Geography*, 1784; *A Dialogue, in blank verse; Papers on Astronomy; Funeral Eulogium on Washington*, 1799; *The Christian's A, B, C*, 1811; *New metrical Version of the Psalms*, 1812; *Occasional Sermons*.—See Sprague, *Annals*, iii, 322.

Davies, Samuel, a Presbyterian minister, president of the College of New Jersey, was born near Summit Ridge, Newcastle County, Del., Nov. 3, 1723. He was educated at Fogg's Manor School, where he completed his theological studies also, and was licensed July 30, 1746. He was ordained as an evangelist in 1747, undertook a mission to Hanover County, Va., and on his arrival obtained a license from the General Court to officiate at four different places of worship. In 1748 he accepted a call to Hanover, and, having received an extension of his license, he divided his labors between five counties with great success. He subsequently claimed the privilege of the Act of Toleration for Virginia, and received a letter "under authority" in England confirmatory of his views. In 1753 he went to England in behalf of the College of New Jersey, and returned to Virginia in 1755, when the Presbytery of Hanover was founded, chiefly through his instrumentality. In 1759 he became president of New Jersey College, and removed to Princeton, where he died Feb. 4, 1761. It is deserving of record that in a discourse on the occasion of Braddock's defeat he made the following prophetic remark of Washington: "I may point out to the public that heroic youth, colonel Washington, whom I cannot but hope Providence has hitherto preserved in so signal a manner *for some important service to his country*." "In the pulpit he was at once instructive and persuasive, full of light, and power, and love; and his manner of delivery was worthy of his fine thoughts, splendid diction, and deeply evangelical spirit." His sermons, which are strikingly eloquent, have been often reprinted; the latest editions are those of Albert Barnes, with a life of the author (New York, 1851, 3 vols. 8vo), and that of the Presbyterian Board, with memoir by Dr. Sprague (Phila. 3 vols. 8vo).—Sprague, *Annals*, iii, 140.

Davis, Charles A., a Methodist Episcopal minister, was born Oct. 7, 1802, and was admitted on trial by the Baltimore Conference in 1824. During his itinerant life he filled many important appointments. He was stationed three times in Baltimore. He served also in Philadelphia, Washington, New York, Montgomery Circuit, Md., Alexandria, D. C., Annapolis, Md., and twice in Winchester, Va. In May, 1832, he was one of the secretaries of the General Conference at its session in Philadelphia. For several years he was clerk in one of the departments of the general government in Washington, where he was received into the Virginia Conference of the Methodist Episcopal Church South, and filled an appointment in Richmond, and also in Portsmouth, Va. While in Portsmouth he received the appointment of chaplain in the navy. When the civil war broke out he remained true to his country, and the Virginia Conference of the M. E. Church South expelled him by resolution. He united with the Virginia and North Carolina Conference of the Methodist Episcopal Church. He died in charge of the Norfolk Naval Hospital, Feb. 20, 1867. —Dr. J. S. Mitchell, in *Christ. Advocate and Journal.*

Davis, John, a Methodist Episcopal minister, was born in Northumberland County, Va., Oct. 30, 1787, was converted at 19, entered the itinerancy of the Baltimore Conference in 1810, and died in Hillsborough, Va., Aug. 13, 1853. Mr. Davis was a very important and useful minister for more than forty years. As soon as he was converted he began to exhort and preach publicly, and with great effect, even before he had become a member of the Church, and on a circuit in 1818 about one thousand souls were converted by his preaching. In person he was commanding, and his voice was excellent. His mind was well balanced and robust, and his social qualities fine. As a minister and presiding elder he had few equals, and he was always a leader in the councils of the Church. He was an able agent and trustee of Dickinson College, and a member of every General Conference, save two, from 1816 to the time of his death.—*Minutes of Conferences*, v, 329.

Davis, Noah, a Baptist minister, was born near Salisbury, Worcester County, Mass., July 28, 1802. After receiving a commercial education, he was licensed to preach July 9, 1820. After a brief ministry in Accomac, he became pastor of the Baptist church in Norfolk, Va. Having by his energy succeeded in procuring the formation of the Baptist General Tract Society in Washington, Feb. 25, 1824, he was, upon his removal soon after to Philadelphia, invited to the management of its concerns. This office he accepted, and filled with great usefulness until his death, July 13, 1830.—Sprague, *Annals*, vi, 701.

Davison, John, B.D., fellow of Oriel College, Oxford, was born at Morpeth in 1777, and matriculated at Christ Church, Oxford, in 1794. He became vicar of Sutterton, Lincolnshire, in 1817, and afterwards rector of Washington; then prebendary of Worcester and rector of Upton-upon-Severn in 1826. He died in 1834. His *Discourses on Prophecy* are valuable for their practical tendency as well as critical research. They are contained in his *Remains and Occasional Publications* (Oxf. 1840, 8vo).—Darling, *Cyclopædia Bibliographica*, i, 877.

Dawes, Sir William, D.D., archbishop of York, was born at Lyons, near Braintree, in 1671. He was educated at St. John's College, Oxford, and Catharine Hall, Cambridge; became master of Catharine Hall in 1696, bishop of Chester in 1707, and finally archbishop of York in 1714. He died in 1724. He had a lively imagination, a strong memory, and a sound judgment. He was one of the most popular preachers of his day. Among his writings are *The Anatomy of Atheism* (1693, 4to):—*Duties of the Closet*, etc. (1707, 8vo), etc. A collection of his works was published (Lond. 1733, 3 vols. 8vo), with a preface, giving some account of his life and character.—Darling, *Cyclopœdia Bibliographica*, i, 870; *Biographia Britannica*, v, 15.

Dawn, נֶשֶׁף, *ne'sheph*, the *breathing* or breeze of the cooler part of the day; prop. the *evening* "*twilight*" (as usually rendered), hence the *morning* twilight or "dawning" (Job vii, 4; Psa. cxix, 147; "twilight," 1 Sam. xxx, 17; 2 Kings vii, 5, 7); poet. נַשְׁפָּה,

aphappa'yim, *eye-lids* (as elsewhere rendered) of the morn, i. e. day-break (Job iii, 9); also פָּנָה, to *turn*, spoken of the change of darkness into light (Judg. xix, 26); and עָלָה, to *ascend*, of the lifting of night's shades (Josh. vi, 15). In Greek ἐπιφώσκω, to *grow light* (Matt. xxviii, 1; hence also of the *approaching* Sabbath, Luke xxiii, 54); and διαυγάζω, to *become lustrous*, as through a crevice (2 Pet. i, 19). See DAY.

Day (properly יוֹם, *yôm*, ἡμέρα). The variable length of the natural day ("ab exortu ad occasum solis," Censor. *de Die Nat.* 23) at different seasons led in the very earliest times to the adoption of the civil day (or one revolution of the sun) as a standard of time. The commencement of the civil day varied in different nations: the Babylonians (like the people of Nuremberg) reckoned it from sunrise to sunrise (Isidor. *Orig.* v, 30); the Umbrians from noon to noon; the Romans from midnight to midnight (Plin. ii, 79); the Athenians and others from sunset to sunset (Macrob. *Saturn.* i, 3; Gell. iii, 2). See CHRONOLOGY.

The Hebrews adopted the latter reckoning (Lev. xxiii, 32, "from even to even shall ye celebrate your Sabbath"), which appears even in Gen. i, 5, "the *evening* and the *morning* were [on] the first day" (a passage which the Jews are said to have quoted to Alexander the Great, Gemara, *Tamid*, 66, 1; Reland, *Ant. Hebr.* iv, 15). Some (as in Godwyn's *Moses and Aaron*) argue foolishly, from Matt. xxviii, 1, that they began their civil day in the morning; but the expression ἐπιφωσκούση shows that the *natural* day is there intended. Hence the expression "evening-morning" = day (Dan. viii, 14, Sept. *νυχθήμερον*), the Hindoo *ahoratra* (Von Bohlen on Gen. i, 4), the Greek *νυχθήμερον* (2 Cor. xi, 25). There was a similar custom among the Athenians, Arabians, and ancient Teutons (Tac. *Germ.* xi, "nec dierum numerum ut apud nos, sed *noctium* computant . . . nox ducere diem videtur") and Celtic nations (Cæsar, *Bell. Gall.* vi, 18, "ut noctem dies subsequatur"). This mode of reckoning was widely spread; it is found in the Roman law (Gaius, i, 112), in the Niebelungenlied, in the Salic law (*inter decem noctes*), in our own terms "fort-*night*," "se'n-*night*" (see Orelli, etc. in loc. Tac.), and even among the Siamese ("they reckon by nights," Bowring, i, 137) and New Zealanders (Taylor's *Te-Ika-Maui*, p. 20). No doubt this arose from the general notion "that the first day in Eden was 36 hours long" (Lightfoot's *Works*, ii, 334, ed. Pitman; Hesiod, *Theogon.* 123; Aristoph. *Av.* 693; Wilkinson, *Anc. Eg.* iv, 274). Kalisch plausibly refers it to the use of *lunar* years (*Gen.* p. 67). Sometimes, however, they reckoned from sunrise (*ἡμερονύκτιον*, comp. Psa. i, 2; Lev. vii, 15). The less obvious starting-points of noon and midnight, the former adopted by the Etruscans, etc., the latter by the Roman priests, Egyptians (see, however, Lepsius, *Chronol.* p. 130), and others, were chosen either as the culminating points, as it were, of light and darkness, or for astronomical purposes (Ideler, *Hb. d. Chron.* i, 29, 80, 100 sq.; comp. Tacit. *Germ.* 11; Macrob. *Sat.* xxxiii, etc.). To the Hebrews, the moon had distinctly been pointed out as the regulator of time (Psa. civ, 19). Nevertheless, it has always been a moot point whether the Hebrews, at all times and in all respects, began their calendar or civil day with the night. (See Felseisen, *De civili Judæorum die*, Lpz. 1702; Federreuther, *De diebus Ægyptiacis*, Altd. 1757.) It has been argued that, if this had been the case, the lawgiver could not have designated those very evenings which he wished to belong ritually to the following (15th, 10th) day, as the evenings of the previous (14th, 9th) day (Lev. l. c.). Further, that in common biblical phraseology, the day is frequently mentioned before the night (Psa. i, 2, etc.); and that of the fast days mentioned in Zech. viii, 19, only one begins with the previous evening. Finally—not to mention other objections—it has been alleged that even in ritual points the Bible occasionally reckons the night as following, not as preceding the day (Lev. vii, 15). There seems, in fact, no other way of reconciling these apparent inconsistencies than to assume (comp. Mishnah, *Chulin*, v, 6) that no absolute rule had been laid down with respect to the commencement of the civil day, and that usage varied somewhat with the customs of the people where the Hebrews were for the time sojourning. The prevalent method of computation, however, is evinced by the fact that the Jewish civil day still begins, not with the morning, but the evening—thus the Sabbath commences with the sunset of Friday, and ends with the sunset of Saturday. That this was the case in Judæa in our Saviour's day is evident from the evangelists' account of the Passion. In New England the same mode of reckoning the Sabbath was formerly common. See FESTIVAL.

The Jews are supposed, like the modern Arabs, to have adopted from an early period minute specifications of the parts of the natural day (see *Jour. Sac. Lit.* Jan. 1862, p. 471). Roughly, indeed, they were content to divide it into "morning, evening, and noonday" (Psa. lv, 17); but when they wished for greater accuracy they pointed to six unequal parts, each of which was again subdivided. These are held to have been:

(I.) *Ne'sheph*, נֶשֶׁף (from נָשַׁף, to *blow*), and *shach'ar*, שַׁחַר, or the *dawn*. After their acquaintance with Persia they divided this into (*a*) the time when the eastern and (*b*) when the western horizon was illuminated, like the Greek Leucothea—Matuta—and Aurora; or "the gray dawn" (Milton) and the rosy dawn. Hence we find the *dual* Shaharaim as a proper name (1 Chron. viii, 8). The writers of the Jerus. Talmud divide the dawn into *four* parts, of which there was, 1. *Aijeleth ha-shachar* (q. v.), "the gazelle of the morning," a name by which the Arabians call the sun (comp. "eyelids of the dawn," Job iii, 9; *ἀμέρας βλέφαρον*, Soph. *Antig.* 109). This was the time when Christ arose (Mark xvi, 2; John xx, 1; Rev. xxii, 16; *ἡ ἐπιφωσκούση*, Matt. xxviii, 1). The other three divisions of the dawn were, 2. "when one can distinguish blue from white" (*πρωΐ, σκοτίας ἔτι οὔσης*, John xx, 1; "obscurum adhuc cœptæ lucis," Tacit. *H.* iv, 2). At this time they began to recite the phylacteries. 3. When the east began to grow light (*ὄρθρος βαθύς*, Luke xxiv, 1). 4. Twilight (*λίαν πρωΐ, ἀνατείλαντος τοῦ ἡλίου*, Mark xvi, 2; Lightfoot, *Hor. Hebr.* ad loc.). See DAWN.

(II.) *Bo'ker*, בֹּקֶר, *sunrise*. Some suppose that the Jews, like other Oriental nations, commenced their civil day at this time until the Exodus (Jennings's *Jewish Ant.*). See MORNING.

(III.) *Chom hay-Yôm'*, חֹם הַיּוֹם, "heat of the day" (Sept. *ἕως διεθερμάνθη ἡ ἡμέρα*, 1 Sam. xi, 11; less exactly elsewhere *μεσημβρία*), about 9 o'clock in the forenoon.

(IV.) *Tsohora'yim*, צָהֳרַיִם, "the two noons" (Gen. xliii, 16; Deut. xxviii, 29). See NOON.

(V.) *Ru'ach hay-Yôm'*, רוּחַ הַיּוֹם, "the cool (liter. *wind*) of the day," before sunset (Gen. iii, 8); so called by the Persians to this day (Chardin, *Voy.* iv, 8; Jahn, *Bibl. Arch.* § 29). See AFTERNOON.

(VI.) *E'reb*, עֶרֶב, "*evening*." The phrase "between the two evenings" (Exod. xvi, 12; xxx, 8), being the time marked for slaying the paschal lamb and offering the evening sacrifice (Exod. xii, 6; xxix, 39), led to a dispute between the Karaites and Samaritans on the one hand, and the Pharisees on the other. The former took it to mean between sunset and full darkness (Deut. xvi, 6); the Rabbinists explained it as the time between the beginning (*δείλη πρωΐα*, "little

evening") and end of sunset (δ. ὀψία), or real sunset; Josephus, *War*, vi, 9, 3; Gesenius, s. v.; Jahn, *Bibl. Archæol.* § 101; Bochart, *Hieroz.* i, 558). See EVENING.

(VII.) *Chatsoth'*, חֲצוֹת (from חָצָה, "to divide"), *midnight.* In later Hebrew also *mid-day* (Mishna, *Pesach*, iv, 1, 5, 6). See MIDNIGHT.

Since the Sabbath was reckoned from sunset to sunset (Lev. xxiii, 32), the Sabbatarian Pharisees, in that spirit of scrupulous superstition which so often called forth the rebukes of our Lord, were led to settle the *minutest* rules for distinguishing the actual *instant* when the Sabbath began (ὀψία, Matt. viii, 16=ὅτε ἔδυ ὁ ἥλιος, Mark i, 32). They therefore called it the time between the actual sunset and the appearance of three stars (Maimon. in *Shabb.* c. 5; comp Neh. iv, 21, 22); and the Talmudists decided that "if on the evening of the Sabbath a man did any work after *one* star had appeared, he was forgiven; if after the appearance of *two*, he must offer a sacrifice for a doubtful transgression; if after *three* stars were visible, he must offer a sin-offering;" the order being *reversed* for works done on the evening *after* the actual Sabbath (Lightfoot, *Hor. Hebr.* ad Matt. viii, 16; Otho, *Lex. Rab.* s. v. Sabbathum). See SUNSET.

Before the Captivity the Jews divided the night into three watches (Psa. lxiii, 6; xc. 4), viz. the first watch, lasting till midnight (Lam. ii, 19, A. V. "the beginning of the watches")=ἀρχὴ νυκτός; the "*middle* watch" (which proves the statement), lasting till cock-crow (Judg. vii, 19)=μέσον νυκτῶν; and the morning watch, lasting till sunrise (Exod. xiv, 24)=ἀμφιλύκη νύξ (Homer, *Il.* vii, 433). These divisions were probably connected with the Levitical duties in the Temple service. The Jews, however, say (in spite of their own definition, "a watch is the third part of the night") that they always had *four* night-watches (comp. Neh. ix, 3), but that the fourth was counted as a part of the morning (Buxtorf's *Lex. Talm.* col. 2454; Carpzov, *Appar. Crit.* p. 347; Reland, *Antiq.* pt. iv, § 18). See WATCH.

In the N. T. we have allusions to four watches, a division borrowed from the Greeks (Herod. ix, 51) and Romans (φυλακή· τὸ τέταρτον μέρος τῆς νυκτός, Suid.). These were, 1. ὀψέ, ὀψία, or ὀψία ὥρα, from twilight till 9 o'clock (Mark xi, 11; John xx, 19); 2. μεσονύκτιον, midnight, from 9 till 12 o'clock (Mark xiii, 35); 3. ἀλεκτοροφωνία, till 3 in the morning (Mark xiii, 35; 3 Macc. v, 23); 4. πρωΐ, till daybreak, the same as πρωΐα (ὥρα) (John xviii, 28; Josephus, *Ant.* v, 6, 5; xviii, 9, 6). See NIGHT.

The word held to mean "hour" is first found in Dan. iii, 6, 15, v. 5 (שָׁעָה, *shaah'*, also "a moment," iv, 19). Perhaps the Jews, like the Greeks, learned from the Babylonians the division of the day into twelve parts (Herod. ii, 109). In our Lord's time the division was common (John xi, 9). It is probable that Ahaz introduced the first sun-dial from Babylon (ὡρολόγιον, מַעֲלוֹת, Isa. xxxviii, 8; 2 Kings xx, 11), as Anaximenes did the first σκιάθηρον into Greece (Jahn, *Arch.* § 101). Possibly the Jews at a later period adopted the clepsydra (Joseph. *Ant.* xi, 6). The third, sixth, and ninth hours were devoted to prayer (Dan. vi, 10; Acts ii, 15; iii, 1, etc.). See HOUR.

The days of the week had no proper names among the Hebrews, but were distinguished only by their numeral order from the Sabbath (see Lightfoot's *Works*, ii, 334, ed. Pitman). See WEEK.

The expression ἐπιούσιον, rendered "daily" in Matt. vi, 11, is a ἅπ. λεγ., and has been much disputed. It is unknown to classical Greek (ἔοικε πεπλάσθαι ὑπὸ τῶν Εὐαγγελιστῶν, Origen, *Orat.* 16). The Vulg. has *supersubstantialem*, a rendering recommended by Abelard to the nuns of the Paraclete. Theophyl. explains it as equivalent to *sufficient* (ὁ ἐπὶ τῇ οὐσίᾳ καὶ συστάσει ἡμῶν αὐταρκής), and he is followed by most commentators (compare Chrysost. *Hom. in Or. Domin.*, Suid. and Etym. M. s. v.). Salmasius, Grotius, etc. arguing from the rendering מָחָר in the Nazarene Gospel, translate it as though it were equivalent to *to-morrow's* (τῆς ἐπιούσης ἡμέρας, or εἰς αὔριον, Sixt. Senensis Bibl. Sanct. p. 444 *a*). But see the question examined at length (after Tholuck) in Alford's *Greek Test.* ad loc.; Schleusner, *Lex.* s. v.; Wetstein, *N. T.* i, p. 461, etc. See DAILY.

In Ezek. iv, 4–6, a day is put symbolically for a year. Erroneously supposing this statement to be a precedent, many interpreters of the prophecies have taken it for granted that one day stands for a *year* in the prophetic writings of Daniel and John. Such, however, is not the case; the word day is to be taken in its literal sense, unless the context expressly intimates the contrary. On the prophetic or year-day system (Lev. xxv, 3, 4; Num. xiv, 34), see a treatise in Elliot's *Hor. Apoc.* iii, 154, sq., and Prof. Stuart on "The Designations of Time in the Apocalypse," *Bib. Repository*, v, 33–83. See YEAR.

The ancients superstitiously held that certain days were lucky (*fasti*) and others unlucky (*nefasti*), and the distinction was sometimes indicated by different colors in the calendar ("red-calendar" or *rubric*). See CALENDAR.

The duration of the Mosaic or demiurgic days of Gen. 5–31, has been a matter of considerable dispute. The various opinions on this subject, and the difficulties in which most of them are involved, are stated under the head of CREATION. See also the articles COSMOGONY; SABBATH; MILLENNIUM; the *Methodist Quarterly Review*, April, 1865; *Evangelical Quarterly Review*, January, 1868 (art. Geology).

The word *day* is often used by the sacred writers to denote an indefinite time (Gen. ii, 4; Isa. xxii, 5). The "day of temptation in the wilderness" was forty years (Heb. iii, 8). The "day of the Lord" signifies, generally, a time of calamity and distress (Isa. ii, 12; Joel ii, 11). It is also used of a festal day (Hos. vii, 5), a birthday (Job iii, 1), a day of ruin (Hos. i, 11; Job xviii, 20; comp. *tempus*, *tempora reipublicæ*, Cic., and *dies Cannensis*), the judgment-day (Joel i, 15; 1 Thess. v, 2), the kingdom of Christ (John viii, 56; Rom. xiii, 12), and in other senses which are mostly self-explaining (see Wemyss, *Symbol. Dict.* s. v.). In 1 Cor. iv, 3, ὑπὸ ἀνθρωπίνης ἡμέρας is rendered "by man's *judgment:*" Jerome (*ad Algas. Quæst.* x) considers this a Cilicism (Bochart, *Hieroz.* ii, 471). On Rom. xiii, 12, there are two treatises—Kuinöl, *Explicatio* (Giess. 1808); Rachm, *De nocte et die* (Tubingen, 1764). See TIME.

The phrases "LAST DAY" (or *days*), "THAT DAY," are "the general formula of the prophets for an indefinitely left future opened up in perspective" (Stier, *Words of Jesus*, ii, 361, Am. ed.), designating the Messianic period, with its introductory age, that of the Maccabees (after the return from exile), and its consummation in the millennium. See ESCHATOLOGY. In a more literal and limited sense, the final judgment is designated. See LAST DAY.

DAY OF ATONEMENT. See ATONEMENT, DAY OF.

DAY'S JOURNEY (מַהֲלַךְ יוֹם, דֶּרֶךְ יוֹם, ὁδὸς ἡμερησίη, Herod. iv, 101), a distance such as (in the East) a person might travel in a single day. Comp. SABBATH-DAY'S JOURNEY. According to Jonah iii, 3, the circuit of Nineveh was three days' journey. This mode of describing distances is also found in Greek, Roman, Arabian, and Persian writers (see Strabo, xvii, 835; Pliny, v, 4, 9; vi, 35; Livy, xxv, 15; xxx, 29; Athen. i, 7). It needs scarcely be remarked that in itself (if strictly taken) it would be a very vague and fluctuating measurement, the length of a day's journey depending so much on the peculiar circumstances under which each pedestrian travels

(see Casaubon *ad Strab.* i, 35; Ukert, *Geogr. d. Griech. u. Röm.* I, ii, 58). But the ancient writers seem to have fixed on the average of what was usually performed by foot-travellers (Herod. iii, 9; iv, 9). Herodotus in one place says (iv, 401) a day's journey amounts to 200 stadia (comp. Polyb. iii, 8; Livy, xxi, 15); in another (v, 53) to 150 (comp. Pausanias, x, 33, 2). According to Vegetius (*Mil.* i, 9), twenty Roman miles, that is, 160 stadia, were reckoned for a day's journey. In the Arabian geographers the length of a day's journey is equally variable; yet among them, as in the East at the present day (Tavernier, i, 48), it may be stated generally at about seven leagues, or from eighteen to twenty English miles, which is probably not far from the distance intended by that expression in Scripture, which occurs chiefly in the Pentateuch (Gen. xxx, 36; xxxi, 23; Exod. v, 3; viii, 27; Num. xi, 31; Deut. i, 2), but also elsewhere (1 Kings xix, 4; 2 Kings iii, 9), and even in the Apocrypha (1 Macc. v, 24, 28; vii, 45; Tobit vi, 1), in the New Test. (Luke ii, 44; Acts i, 12), often in Josephus, (*Ant.* xii, 4, 6; *Ap.* ii, 9; *Life*, 52), and in the Talmud (see Otho, *Lex. Rabb.* p. 421). See JOURNEY.

Day, JEREMIAH, D.D., president of Yale College, was born in New Preston, Conn., August 3, 1773, and was educated at Yale College, where he graduated in 1795. After some years spent as tutor at Greenfield School, Williams College, and Yale, he was licensed as a minister of the Congregational Church in 1800, and in 1801 he was elected professor of mathematics and natural philosophy in Yale College. His health failing, he spent a year or two in travel and retirement, and did not begin his labors in college until 1803. He held that office until 1817, publishing meanwhile a series of mathematical text-books well-adapted to the wants of the time, and which had great success. On the 22d of April, 1817, he was chosen president of Yale College, and held that office till 1846, when his sense of the infirmities of age induced him to resign, against the judgment and wishes of his colleagues, as his judgment and governing faculties were yet in abundant vigor. Notwithstanding chronic feebleness of constitution, his careful habits of life, formed after physiological study of his own constitution, enabled him to preserve his intellectual vigor, and a fair degree of bodily health, up to the year of his death, which occurred August 22, 1867. Besides his mathematical works, president Day wrote *An Inquiry respecting the self-determining Power of the Will* (1838; 2d ed. 1849), which was substantially a refutation of Cousin's view of the will as given in his *Psychology:—Examination of Edwards on the Will* (1841, 12mo), which is "an abstract of Edwards, made in a lucid and truth-loving spirit." He also contributed numerous articles to reviews and journals. As a college officer, his moral and intellectual qualities combined to make him a model. See an admirable sketch by president Woolsey, *New Englander*, Oct. 1867, art. v.

Daysman (מוֹכִיחַ, *moki'ach*, an *adjudicator*), "an old English term meaning *umpire* or *arbitrator* (Job ix, 33). It is derived from *day*, in the specific sense of a day *fixed for a trial* (comp. 1 Cor. iv, 3, where *ἀνθρωπίνη ἡμέρα*—lit. *man's day*, and so given in Wycliffe's translation—is rendered 'man's *judgment*' in the A. V.). Similar expressions occur in German (*eine Sache tagen*=to bring a matter before a court of justice) and other Teutonic languages." "The primitive meaning of the verb יָכַח (according to Gesenius, *Thes.* p. 592) is 'to be clear or manifest;' and in Hiphil 'to make manifest;' also 'to convince, to confute, to reprove or rebuke;' by these last two words the word is rendered in nearly every passage of the A. V., including the ten instances of the Hiphil participle מוֹכִיחַ. It is not easy to conjecture why in Job ix, 33 alone the translators resorted to the not then common word *daysman*. The marginal rendering *umpire* seems to convey best the meaning of Job in the passage, 'some one to compose our differences and command silence when either of us exceeds our bounds' (Patrick, in loc.). Fürst's term, *Schiedsmann*, (*Handwörterb.* p. 309), very well expresses this idea of authoritative arbitration. As to the old English noun *daysman*, Johnson's definition, *surety*, is hardly borne out by his solitary quotation from Spenser (*Faerie Queene*, ii, 8); *arbitrator* or *umpire* would better express the sense. In Holland's old translation of *Livius* (p. 137), *Dayesmen* and *Umpiers* are used as synonymes. In the Bible of 1551, 1 Sam. ii, 25 is thus employed." In primitive times such a person appears to have been appointed to prescribe just limits to such as were immoderate in their demands, and interpose his authority with those who exceeded the assigned bounds of their cause. The laying the hand on both may allude to some particular ceremony; but it evidently also refers to the power of coercion which the *daysman* could exercise over both parties. See MEDIATOR.

Day-spring (שַׁחַר, *shach'ar*, Job xxxviii, 12, elsewhere usually "morning;" *ἀνατολή*, Luke i, 78, elsewhere "east"), signifies the first streaks of daylight, the dawn, or day-break; and in the former of the above-cited passages it is used in its literal sense. This portion of time was at a later period, in imitation of the Persians, divided into two parts, the first of which began when the eastern, the second when the western division of the horizon was illuminated. See AIJELETH-SHAHAR. In the latter passage, the birth of John the Baptist is beautifully compared to the early twilight preceding the rising of the great moral sun, the Messiah (comp. Mal. iv, 2; Isa. lx, 1–3; 2 Cor. iv, 6). See DAY.

Day-star (*Φωσφόρος*, *light-bearing*, whence *phosphorus*), *Lucifer*, the morning-star, put (2 Pet. i, 19) as the emblem of the dawn of spiritual light and comfort to the benighted and troubled mind. See LUCIFER.

Deacon, Anglicized from the Gr. *διάκονος*, Lat. *diaconus* (usually derived from *διά* and *κόνις*, q. d. "one *dusty* from running;" but better from an obsolete *διάκω*, or *διήκω*, "to run," or hasten; kindred with *διώκω*, to pursue: hence, strictly, a *runner*, i. e. messenger, Buttmann, *Lexil.* i, 218–221), a *servant* (as often rendered), 1. properly, of those who attend on guests or at a table, a *waiter* (John ii, 5, 9; so Polyb. xxxi, 4, 5; Xenoph. *Mem.* i, 5, 2). Among the Greeks these *διάκονοι* were a higher class than the *δοῦλοι*, or *slaves* (Athen. x, p. 192 b). 2. Generally, and with the name of the master or person served, a *minister* (as it is usually rendered in the N. T.) (Matt. xx, 26; xxiii, 11; Mark ix, 35; x, 43; so Xenoph. *Cyr.* viii, 3, 8). Also an attendant of Christ, a *disciple* (John xii, 26), of a king (Matt. xxii, 13), and hence of God (Rom. xiii, 4). 3. Specially, in relation to the Gospel and the Church, a minister or *teacher*, (*a.*) of the person for whom one ministers (1 Cor. iii, 5; 2 Cor. iii, 6; vi, 4; 1 Thess. iii, 2; 2 Cor. xi, 23; Col. i, 7; Eph. vi, 21; Col. iv, 7; i, 25; and, by antithesis, of Satan, 2 Cor. xi, 15). (*b.*) Technically, an officer of the primitive Church, a *deacon* (Phil. i, 1; 1 Tim. iii, 8, 12; iv, 6; see Acts vi, 1–6).

I. *Deacons in the N. T.*—1. "The office described by this title appears in the N. T. as the correlative of *ἐπίσκοπος*, bishop or presbyter (q. v.). The two are mentioned together in Phil. i, 1; 1 Tim. iii, 2, 8. The union of the two in the Sept. of Isa. lx, 17, may have suggested both as fit titles for the officers of the Christian Church, or have led to the adoption of one after the other had been chosen on independent grounds. The coincidence, at all events, soon attracted notice, and was appealed to by Clement of Rome (1 Cor. xlii) as prophetic. Like most words of similar import, it appears to have been first used in its generic sense,

implying subordinate activity (1 Cor. iii, 5; 2 Cor. vi, 4), and afterwards to have gained a more defined connotation as applied to a distinct body of men in the Christian society."

2. The origin of the office of deacon in the Church is usually supposed to be described in Acts vi, 1–6. The Hellenistic Jews complained that "their widows were neglected in the daily ministrations." This neglect may be ascribed either to "the fact that their widows were not known, being as foreigners of a somewhat backward spirit, or possibly also to some jealousy existing between the proper Hebrews and their kindred from other lands. At first the apostles themselves, who had the charge also of the common fund (Acts iv, 35, 37; v, 2), superintended this service, employing intermediate agents, young men of the congregation probably (Acts v, 6, 10), who had given cause for the complaint now mentioned. In proportion, however, as the Church extended, the more impracticable did it become for them to give themselves to such outward concerns without wrong to their proper spiritual work. 'It is not reason,' said the twelve, 'that we should leave the Word of God and serve tables'—that is, superintend the daily love-feasts and the distribution of alms. In order, therefore, that they might give themselves wholly to prayer and the preaching of the Gospel, and to provide against wrong and dissatisfaction by a fixed regulation, they proposed the election of seven men of good report, full of the Holy Ghost and of prudence, for this particular service, and set them apart to it solemnly, after they had been chosen by the people, with prayer and the imposition of hands. In the Acts, indeed, these officers are styled simply *οἱ ἑπτά*, the seven (xxi, 8), and not deacons—that is, servants or helpers; but that this was their character we know, partly from the terms *διακονία*, *διακονεῖν τραπέζαις*, used of their office (Acts vi, 1, 2), and partly from almost universal exegetical tradition. (The ancient Church even held the sacred number seven in this case of obligatory force; and at Rome, for example, there were still as late as the third century only seven deacons, although the number of presbyters amounted to forty)" (Schaff, *Apostolic Church*, § 134).

Some writers (e. g. Mosheim, *Comm.* cent. i, § 37) maintain that the "seven" were appointed, not to care for all the poor at Jerusalem, but only for the widows and poor of the Greeks or foreigners. This view supposes that similar officers had previously existed to discharge these functions for the general Church (so Conybeare and Howson, *Life of St. Paul*, i, 467; Whately, *Kingdom of Christ;* Hinds, *Early Christianity*). Stanley (*Apostolic Age*, p. 62 sq.) supposes that "the seven" were not deacons such as we find in the later period of the apostolic age, "though they may possibly have borne the name, and though there was in some respects a likeness between their respective duties." (Compare, on the other hand, Schaff, *Apostolic Church*, § 134). Dr. W. L. Alexander, in Kitto's *Cyclopædia* (s. v.), asserts that it is not easy to justify the assumption that the "seven" were deacons in the later sense. "Nothing can be drawn from the meaning of the word *διακονία* as applied to their functions (ver. 1), or the word *διάκονος*, as if this title had been originally derived from such a 'serving of tables' as is here referred to, because these words are used in the N. T. with the utmost latitude of meaning, so as to include every kind of service rendered to the Church or cause of God on earth—the service of presbyters (2 Cor. xi, 23; Ephes. vi, 21; Col. i, 7, etc.), of evangelists (1 Thess. iii, 2), of apostles (Acts xx, 24; xxi, 19; Rom. xi, 13; 2 Cor. vi, 4, etc.), of prophets (1 Peter i, 12), of angels (Heb. i, 14), of Christ himself (Rom. xv, 8), as well as service in temporal matters. Nor can much weight be attached to patristic testimony on this head, because we have no clear declaration in favor of the position assumed earlier than that of the sixth General Council (in Trullo), held A.D. 680; all the earlier witnesses speak of the diaconate in connection with spiritual services or the rites of the Church. If, moreover, this was the institution of a permanent office in the Church, it seems somewhat strange that it should disappear entirely from the history of the Church for many years, and come up again, for the first time, in the form of an incidental notice in an epistle written in the latter half of the first century. Taking the narrative in the Acts in its connection with the history of which it forms a part, the appointment of the seven brethren has all the appearance of a temporary expedient to meet a peculiar emergency."

Some writers maintain that the office of the "seven" corresponded to that of the חַזָּן, *chazzan*, in the Jewish Synagogue, the *ὑπηρέτης*, or "minister," of the N. T. (Luke iv, 20; John vii, 32). This is the opinion of Vitringa (*De Syn. Vet.* p. 895 sq.; Bernard's *Condensed Tr.* p. 87 sq.), whose principle, that the order of the Christian churches was constructed on the model of the synagogues, led him to press the analogy between the two in every possible way. But for this opinion there is no solid support. Vitringa's main principle is itself unsound, for nothing can be more evident than that the apostles proceeded upon no prearranged scheme of Church policy, but instituted offices and appointed usages just as circumstances required; and, as respects the deacon's office, it cannot be shown that one of the duties pertaining to the office of *chazzan* in the synagogue belonged to it. As Hartmann remarks (*Enge Verbind. des A. T. mit d. N.* p. 281), the *chazzan* was a mere servant whose functions resembled those of our sexton or church officer (Kitto, *Cyclopædia*, s. v.; see also Neander, *Planting and Training of the Christian Church*, Ryland's translation, i, 34 sq.). See SYNAGOGUE.

3. But, whatever view may be taken of Acts vi, it appears clear that the later church office (Phil. i; 1 Tim. iii) developed itself from the office designated in Acts vi, and may be traced back to it. The functions of the deacon were primarily secular, but soon rose into spiritual importance. Hence the "moral qualifications described in 1 Tim. iii as necessary for the office of deacon are substantially the same as those of the bishop. The deacons, however, were not required to be 'given to hospitality,' nor to be 'apt to teach.' It was enough for them to 'hold the mystery of the faith in a pure conscience.' They were not to gain their living by disreputable occupations (*μὴ αἰσχροκερδεῖς*). On offering themselves for their work they were to be subject to a strict scrutiny (1 Tim. iii, 10), and, if this ended satisfactorily, were to enter on it. It does not appear to have [necessarily] belonged to the office of a deacon to teach publicly in the church. The possession of any special *χάρισμα* (spiritual endowment) would lead naturally to a higher work and office, but the idea that the diaconate was but a probation through which a man had to pass before he could be an elder or bishop was foreign to the constitution of the Church of the first century. Whatever countenance it may receive from the common patristic interpretation of 1 Tim. iii, 13 (comp. Estius and Hammond, ad loc.), there can be little doubt (as all the higher order of expositors have felt, comp. Wiesinger and Ellicott, ad loc.) that when Paul speaks of the *καλὸς βαθμός*, or 'good degree,' which is gained by those who 'do the office of a deacon well,' he refers to the honor which belongs essentially to the lower work, not to that which they were to find in promotion to a higher." On the other side, Dr. Thomas Scott says (*Comment.* on 1 Tim. iii. 8–13), "The deacons were primarily appointed to dispense the charity of the Church, and to manage its secular concerns. Yet they preached occasionally, or taught in private, or were readers in the public assemblies, and pastors and evangelists were chosen from among them. This interpretation has been contested,

yet it seems to be the apostle's meaning; and, without adverting to modern habits and controversies, it is evident that the due discharge of the primitive office of deacon must tend to qualify men for the ministry."

II. *In the Early Post-Apostolic Church.*—That the duties of the seven deacons were not of an exclusively secular character is clear from the fact that both Philip and Stephen preached, and that one of them also *baptized*. It is strange, therefore, that the 18th Canon of the Council of Constantinople, in "Trullo," should declare, referring to Acts vi, that the seven deacons had *no* spiritual function assigned them. Œcumenius (a celebrated Greek writer of the tenth century) gives his testimony to the same effect (*In Act. Ap.* vi, p. 433). But opposed to this opinion is that of some of the fathers of the Christian Church. Ignatius, a martyr-disciple of St. John, and bishop of Antioch († 115), styles them at once "ministers of the mysteries of Christ;" adding that they are not ministers of meats and drinks, but of the Church of God (Ignat. *Ep. ad Trall.* n. 2). Again he says (*Ep. ad Trall.* n. 3), "Study to do all things in divine concord, under your bishop presiding in the place of God, and the presbyters in the place of the apostolic senate, and the deacons most dear to me, as those to whom is committed the ministry of Jesus Christ." Tertullian († 220) classes them with bishops and presbyters as guides and leaders to the laity. He asks (Tertull. *De Fuga*, c. ii): "Quum ipsi auctores, id est, ipsi Diaconi, Presbyteri, et Episcopi fugiunt, quomodo Laicus intelligere poterit? — Cum Duces fugiunt quis de gregario numero sustinebit?" Cyprian, bishop of Carthage, A.D. 250 (while referring their origin to Acts vi), styles them ministers of episcopacy and of the Church (Cypr. *Ep.* 65, al. 3, *ad Rogat.*); at the same time he asserts that they were called *ad altaris ministerium*—to the ministry of the altar. Though Jerome in one place speaks of them (*Ep. ad Evang. et Com. Ezek.* c. 48) as servants of tables and widows, yet again he ranks them among the guides of the people: still he distinguishes them from the priests of the second order, that is, from the presbyters, by the title of *Servites*. And so, frequently, in the Councils, the names *Sacerdos* and *Levita* are used as the distinguishing titles of presbyter and deacon. The fourth Council of Carthage expressly forbids the deacon to assume any one function peculiar to the priesthood, by declaring, "Diaconus non ad sacerdotium, sed ad ministerium consecratus." (See also 18th Can. Con. Nic.)

His ordination, moreover, differed from that of presbyter both in its form and in the powers which it conferred. For in the ordination of a presbyter, the presbyters who were present were required to join in the imposition of hands with the bishop; but the ordination of a deacon might be performed by the bishop alone, because, as the 4th Canon of the 4th Council of Carthage declares, he was ordained, not to the priesthood, but to the inferior services of the Church. *Duties.*—1. The deacon's more ordinary duty was to assist the bishop and presbyter in the service of the sanctuary; especially was he charged with the care of the utensils and ornaments appertaining to the holy table. 2. In the administration of the Eucharist, that it was the deacon's duty to hand the elements to the people, is evident from Justin Martyr (*Apol.* ii, p. 152), and from Cyprian (*Serm.* v, "De Lapsis"). Not, however, that the deacon had any authority or power to *consecrate* the elements; for the 15th Can. of the Council of Arles, A.D. 312, forbids this. And the 18th Can. of the Council of Nice orders the deacons not even to administer the Eucharist to priests because of their inferiority. 3. Deacons had power to administer the sacrament of baptism (Tertull. *De Bapt.* c. 17; also Hieron. *Dial. contr. Lucif.* c. 4, p. 139). The Council of Eliberis, Can. 77, plainly acknowledges this right, although the author of the *Apost. Constitutions*, and Epiphanius also, would seem to deny it. 4. The office of the deacon was not to preach so much as to instruct and catechise the catechumens. His part was, when the bishop or presbyter did not preach, to read a homily from one of the fathers. St. Ambrose, bishop of Milan, A.D. 380, says expressly that deacons, in his time, did not preach, though he thinks that they were all originally evangelists, as were Philip and Stephen. 5. It was the deacon's business to receive the offerings of the people, and, having presented them to the bishop or presbyter, to give expression in a *loud voice* to the names of the offerers (see Cypr. *Ep.* 10, al. 16, p. 37 (Hieron. *Com. in Ezek.* xviii, p. 537). 6. Deacons were sometimes authorized, as the bishops' special delegates, to give to penitents the solemn imposition of hands, which was the sign of reconciliation (Cypr. *Ep.* 13, al. 18, *ad Eter.*). 7. Deacons had power to suspend the inferior clergy; this, however, was done only when the bishop and presbyter were absent, and the case urgent (*Constit. Apost.* viii, 28). 8. The ordinary duty of deacons with regard to general Councils was to act as scribes and disputants according as they were directed by their bishops. In some instances they voted as proxies for bishops who could not attend in person; but in no instance do we find them voting in a general Council by virtue of their office. But in provincial synods the deacons were sometimes allowed to give their voice, as well as the presbyters, in their own name. 9. The *Apostolical Constitutions* (ii, 57, p. 875) inform us that one of the subordinate duties of the deacon was to provide places in the church for persons as they entered—to rebuke any that might whisper, talk, laugh, etc. during divine service. This was a duty which, however, usually devolved upon the subdeacon. 10. But, besides the above, there were some other offices which the deacon was called upon to fill abroad. One of these was to take care of the necessitous, orphans, widows, martyrs in prison, and all the poor and sick who had any claim upon the public resources of the Church. It was also his especial duty to notice the spiritual, as well as the bodily, wants of the people; and wherever he detected evils which he could not by his own power and authority cure, it was his duty to refer them for redress to the bishop.

In general, the number of deacons varied with the wants of a particular church. Sozomen (vii, 19, p. 100) informs us that the Church of Rome, after the apostolic model, never had more than seven deacons. It was not till the close of the third century that deacons were forbidden to marry. The Council of Ancyra, A.D. 344, in its 10th Can., ordains that if a deacon declared at the time of his ordination that he would marry, he should not be deprived of his function if he did marry; but that if he married without having made such a declaration, "he must fall into the rank of laics."

The *qualifications* required in deacons by the primitive Church were the same that were required in bishops and presbyters; and the characteristics of a deacon, given by St. Paul in his Second Epistle to Timothy, were the rule by which a candidate was judged fit for such an office. The second Council of Carthage, 4th Can., forbids the ordination of a deacon before the age of twenty-five; and both the Civil and Canon Law, as may be seen in Justinian, *Novell.* 123, c. 14, fixed his age to the same period.

The Council of Laodicea, A.D. 381, forbids a deacon to sit in the presence of a presbyter, and the 11th Can. of the first Council of Carthage regulates the number of judges at ecclesiastical trials—three bishops upon a deacon, six upon a presbyter, and twelve upon a bishop. This would mark the rank of each of the parties. Originally the deacons had been the helpers of the presiding elder of a given district. When the two names of the latter title were divided and the bishop presided, whether as *primus inter pares*, or with a more absolute authority over many elders, the deacons appear to have been dependent directly on him and not on the presbyters, and, as being his ministers, the

'eyes and ears of the bishop" (*Const. Apost.* ii, 44), were tempted to set themselves up against the elders. Hence the necessity of laws like those of *Conc. Nic.* c. 18; *Conc. Carth.* iv, c. 37, enjoining greater humility, and hence probably the strong language of Ignatius as to the reverence due to deacons (*Ep. ad Trall.* c. 3; *ad Smyrn.* c. 8).

III. In the *Modern Church* deacons are found as a distinct order of the clergy.

In the *Roman Catholic Church* there are subdeacons as well as deacons, both in orders. The *subdeacon's* duties are "to prepare the altar-linen, the sacred vessels, the bread and wine necessary for the holy sacrifice—to minister water to the priest or bishop at the washing of the hands at mass—to read the epistle—to assist at mass in the capacity of a witness, and see that the priest be not disturbed by any one during its celebration." To the *deacon* "it belongs constantly to accompany the bishop, to attend him when preaching, to assist him and the priest also during the celebration of the holy mysteries, and at the administration of the sacraments, and to read the Gospel at the sacrifice of the mass." . . . . "To the deacon also, as the agent of the bishop, it belongs to inquire and ascertain who within his diocese lead lives of piety and edification, and who do not; who attend the holy sacrifice of the mass and the instructions of their pastors, and who do not—that thus the bishop, made acquainted by him with these matters, may be enabled to admonish each offender privately, or, should he deem it more conducive to their reformation, to rebuke and correct them publicly. He also calls over the names of catechumens, and presents to the bishops those who are to be promoted to orders. In the absence of the bishop and priest, he is also authorized to expound the Gospel to the people, not, however, from an elevated place, to make it understood that this is not one of his ordinary functions" (*Council of Trent*, sess. xxiii, ch. ii). There are eighteen *cardinal-deacons* in Rome, who have the charge of the temporal interests and the revenues of the church. A person, to be consecrated deacon, must be twenty-three years of age (*Council of Trent*, sess. xxiii, c. 17).

In the *Church of England* and in the Episcopal communions in Scotland and North America, a deacon receives ordination by the imposition of hands of a bishop; in consequence of which he can preach, assist in the sacrament of the Lord's Supper, and, generally, may perform any sacred office except consecrating the elements and pronouncing absolution. By the statute 44 George III, c. 43, it is enacted that no person shall be admitted until he shall have attained the age of twenty-three years complete; but this act is declared not to affect the right of granting facilities, exercised by the archbishops of Canterbury and Armagh respectively, viz. to admit at earlier ages; and by 59 George III, c. 60, sec. 1, the two archbishops of the realm, or the bishop of London, or any bishop authorized by any or either of them, may ordain as deacons any persons whom he or they shall deem duly qualified, especially for the purpose of officiating in his majesty's colonies or foreign possessions. But no person so ordained can afterwards hold any living or other benefice in the United Kingdom without the previous consent in writing, under hand and seal of the bishop in whose diocese such benefice, etc. shall be locally situated; nor without like consent of the archbishop or bishop by whose consent he was originally ordained, or of the successor of such archbishop or bishop, in case of his demise or translation; nor without producing a testimony of his good behavior during his residence abroad from the bishop in whose diocese he has officiated, or (if there be not any such bishop) from the governor in council of the colony wherein he may have resided, or from the colonial secretary of state (sec. 2). At the time when the liturgy of the Church of England was composed, it was the deacon's office, "where provision is so made, to search for the sick, poor, and impotent people of the parish, and to intimate their estates, names, and places where they dwell, unto the curate" (that is, to the rector or vicar having the cure or care of souls), "that by his exhortations they may be relieved with the alms of the parishioners or others" (*Rubric in the form of Ordination*). This was the more ancient office of a deacon, and this rule was made in England before the establishment of the poor-laws, in pursuance of which that care has now devolved upon the churchwardens and overseers of the poor, which last office was specially created for that purpose.

In the *Methodist Episcopal Church* the deacons constitute an order in the ministry. They are ordained by the bishop, without the imposition of hands of the elders. According to the ordination service, "it appertaineth to the office of a deacon to assist the elder in divine service. And especially when he ministereth the holy communion, to help him in the distribution thereof, and to read and expound the Holy Scriptures; to instruct the youth, and, in the absence of the elder, to baptize. And furthermore, it is his office to search for the sick, poor, and impotent, that they may be visited and relieved."

In the *Presbyterian Church* of the United States the "Form of Government" states that "the Scriptures clearly point out deacons as distinct officers in the Church, whose business it is to take care of the poor, and to distribute among them the collections which may be raised for their use. To them also may be properly committed the management of the temporal affairs of the Church" (chap. vi). In some Presbyterian congregations, and in the Free Church, there are deacons regularly ordained to have charge of the funds of the Church. In other Presbyterian churches the office is merged in that of ruling elders.

In German Protestant churches the assistant ministers are generally called deacons. If there be two assistants, the first of them is called *archdeacon*. In the German Reformed Church in the United States, the Constitution, ch. iii, art. 2, provides as follows: "The office of the deacons is to collect the alms and other contributions which are designed for the relief of the poor, or the necessities of the congregation; to distribute the alms willingly and conscientiously; and to provide for the support of the ministry of the Gospel." See also the form of ordination in the German Reformed Church.

Among *Congregationalists*, the deacons, besides attending to the temporal concerns of the Church, assist the minister with their advice, take the lead at prayer-meetings when he is absent, etc.

Alterthümer*, i, 498 sq.; Sawyer, *Organic Christianity*, chap. xiii; Dexter, *On Congregationalism*, p. 134 sq.; Hooker, *Eccles. Polity*, bk. v, § 78; Howell, *The Deaconship* (Am. Bapt. Pub. Soc.), Phil. 1846, 18mo; Punchard, *Congregationalism*, 1844, part iii.

Deaconess (ἡ διάκονος; διακόνισσα, *diaconissa*), the title of an office of women in the early Church; an office supposed by some to have originated under the apostles, by others to be of later origin.

I. *Deaconesses in the Apostolical Church.*—The title (usually rendered *minister* or "deacon") is found in Rom. xvi, 1, associated with a female name (Phœbe, οὖσαν διάκονον), and this has led to the conclusion that there existed in the apostolic age, as there undoubtedly did a little later (Pliny, *Ep. ad Traj.*), an order of women bearing that title, and exercising, in relation to their own sex, functions which were analogous to those of the deacons. On this hypothesis it has been inferred that the women mentioned in Rom. xvi, 6, 12, belonged to such an order (Herzog, *Real-*

Encykl. iii, 368). The rules given as to the conduct of women in 1 Tim. iii, 11; Titus ii, 3, have in like manner been referred to them (Chrysostom, Theophylact, Hammond, Wiesinger, ad loc.). Some writers (e. g. Rothe; Schaff, *Apost. Church*, § 135) suppose that the "widows" of 1 Tim. v, 3–10, were deaconesses. Herzog, on the other hand, holds that the passages in Timothy cannot be applied to "deaconesses." Dr. W. L. Alexander, in Kitto's *Cyclopædia* (s. v.), maintains that Rom. xvi, 1, does not show that Phœbe held any official relation to the Church; for all that appears, she may have been simply the doorkeeper or cleaner of the place of worship. Plumptre (in Smith's *Dictionary*, s. v., says that "it seems hardly doubtful that writers have transferred to the earliest age of the Church the organization of a later. It was of course natural that the example recorded in Luke viii, 2, 3, should be followed by others, even when the Lord was no longer with his disciples. The new life which pervaded the whole Christian society (Acts ii, 44, 45; iv, 31, 32) would lead women as well as men to devote themselves to labors of love. The strong feeling that the true *θρησκεία*, or service of Christians, consisted in 'visiting the fatherless and the widow,' would make this the special duty of those who were best fitted to undertake it. The social relations of the sexes in the cities of the empire (comp. Grot. *on Rom.* xvi, 1) would make it fitting that the agency of women should be employed largely in the direct personal application of Christian truth (Titus ii, 3, 4), possibly in the preparation of female catechumens. Even the later organization implies the previous existence of the germs from which it was developed. It may be questioned, however, whether the passages referred to imply a recognised body bearing a distinct name. The 'widows' of 1 Tim. v, 3–10, were clearly, so far as the rule of ver. 9 was acted on, women who were no longer able to discharge the active duties of life, and were therefore maintained by the Church, that they might pass their remaining days in 'prayers night and day.' The conditions of ver. 10 may, however, imply that those only who had been previously active in ministering to the brethren were entitled to such a maintenance." See also Ludlow, *Woman's Work in the Church*, ch. i (Lond. 1866).

II. *Deaconesses in the early Church.*—The Apostolical Constitutions distinguish "deaconesses" from "widows" and "virgins," and prescribe their duties. A form of ordination for deaconesses is also given (bk. viii, c. 19, 20), in which the bishop prays as follows: "Eternal God, Father of our Lord Jesus Christ, Creator of man and of woman; thou who didst fill with thy Spirit Miriam, Deborah, Hannah, and Huldah; thou who didst vouchsafe to a woman the birth of thy only-begotten Son; thou who didst, in the tabernacle and in the Temple, place female keepers of thy holy gates—look down now also upon this thy handmaid, and bestow on her the Holy Ghost, that she may worthily perform the work committed to her, to thy honor, and the glory of Christ" (Chase, *Constitutions of the Apostles*, p. 225 (N. Y. 1848).

In the Eastern Church the notices of deaconesses in the first three centuries are few and slight, although Origen († 253) speaks of the ministry of women in the Church as both existing and necessary.

In the Western Church the notices are fuller and more clear. Pliny the younger (about A.D. 104) appears to refer to deaconesses in his letter to Trajan, in speaking of the question by torture of "two maids who were called ministers" (ex duabus ancillis quæ *ministræ* dicebantur). Tertullian (220) speaks of them often, and prescribes their qualifications (see below). In the fourth and fifth centuries all the leading Eastern fathers refer to deaconesses; e. g. Basil († 379), Gregory of Nyssa († 396), Chrysostom († 407), Theodoret († 457), Sozomen (cir. 439). Theodoret (*Eccles. Hist.* iii, 14, p. 652) calls Publia, who lived at the time of Julian, *ἡ Διάκονος — deaconess.* Sozomen (iv, 14, 59) speaks of a certain deaconess who had been excluded Church fellowship because of having broken her vows.

It was a rule that the deaconesses must be *widows.* Tertullian (*ad Uxorem*, i, 7; *de Virgin. veland.* c. 9) says, "The discipline of the Church and apostolic usage forbid that any widow be elected unless she have married but *one* husband." *Virgins*, it is true, were sometimes admitted, but this was the exception. The widows must have borne children. This rule arose from the belief that no person but a mother can possess those sympathizing affections which ought to animate the deaconess in her duties. The early Church was very strict in enforcing the rule which prohibits the election of any to be deaconesses who had been twice married, though lawfully and successively, to two husbands, one after the other. Tertullian says, "The apostle requires them to be (*universæ*) the wives of one man" (*ad Uxorem*, iv, 7). Others, however, give the words of the apostle another meaning. They suppose him to exclude those widows who, having divorced themselves from their former husbands, had married again (see Suicer, *Thesaurus*, i, 864, 867). It is disputed whether they were ordained by the imposition of hands, but the Apostolical Constitutions (viii, 19) declare that such was the case, and the 15th canon of Chalcedon (sess. xv) forbids the ordination of a deaconess under forty. Still they were not consecrated to any ministerial function; so Tertullian, *De Præscript*, 41, "Let no woman speak in the Church, nor teach, nor baptize, nor offer" (that is, administer the Eucharist), "nor arrogate to herself any manly function, lest two should claim the lot of the priestly office." Their duties were to take care of the sick and poor, and to minister to martyrs and confessors in prison, to whom they could more easily gain access than the deacons; to instruct catechumens, and to assist at the baptism of women; to exercise a general oversight over the female members of the Church, and this not only in public, but in private, making occasional reports to the bishops and presbyters. How long this office continued is uncertain. It was not, however, discontinued everywhere at once. It was first abrogated in France by the Council of Orange, A.D. 441. It continued in the Roman Church for some time after this, and gradually disappeared; but in the Greek Church it did not become extinct till the twelfth century.

III. *In the modern Church.*—It must ever be regarded as a misfortune in the Reformation that this early office was not restored. "Is it not remarkable that the office, which is so well adapted to the matronly character of the female sex, should be wholly excluded from our list of assistants in the Church?" (Robinson's *Calmet*, p. 336.) Its restoration was, however, seriously thought of, and even attempted, in the Reformed Church at an early period of the Reformation, namely, when the Netherland "churches under the Cross" were founded through the synod at Wesel and Emden, 1568 and 1571. Its restoration in the Reformed Church was urged on the synod the more as it already actually existed at the time among the Bohemian Brethren and the strict Anabaptists, at least in the large congregations. The subject came before the synod from the congregation at Wesel through the Classis of Wesel. That congregation had decided to restore it — had, in fact, restored it in its bosom, and now asked the indicatores for approval. The Classis of Wesel, before which the matter first came, decided that the restoration of the office as inaugurated in the congregation at Wesel shall stand till the final decision is had, but deferred final action until their next meeting. In 1580 the same classis decided that "if this office, which had fallen into disuse and decay in the Church of God, is again to be restored, then it shall be established in the same form, and with the

same character belonging to it, as described by the apostle Paul, namely, widows, and not married women, shall be chosen for that purpose." Classis favored the restoration of the office, and referred the matter to the next provincial synod, that by its authority it might also be restored in other localities. Accordingly, by the proper course, it came before the General Synod at Middleburg in 1581, which synod unfortunately decided against it "on account of various inconveniences which might arise out of it; but in times of pestilence, and other sicknesses, when any service is required among sick women which would be indelicate to deacons, they ought to attend to this through their wives, or others, whose services it may be proper to engage" (Max Göbel, *Geschichte des christ. Lebens in der rhein-westphälischen Ev. Kirche*, i, 413, 414). Here this interesting movement seems to have ended, as there is no further historical trace of it.

The Puritans in England in the sixteenth century recognised deaconesses, as appears by the following extract from the "Conclusions" drawn up by Cartwright and Travers, and given by Neal, *History of the Puritans*, vol. i, ch. vi: "Touching deacons of both sorts, viz. men and women, the Church shall be admonished what is required by the apostle, and that they are not to choose men of custom or course for their riches, but for their faith, zeal, and integrity; and that the Church is to pray in the mean time to be so directed that they may choose them that are meet. Let the names of those that are thus chosen be published by the next Lord's day, and after that their duties to the Church, and the Church's duty towards them; then let them be received into their office with the general prayers of the whole Church."

"The advantages resulting to a Christian community from such an order are too obvious to require exposition. It has been a serious misfortune to the Church at large that the office has been allowed to fall into disuse; and the wide-spread institution at the present day in the churches of Great Britain and America of ladies' district-visiting societies, Dorcas societies, etc. satisfactorily shows the necessity of practically supplying, to some extent at least, the want of this primitive office. There is a movement going on at present for the introduction of the order of deaconesses into the Church of England" (Chambers, *Encyclopœdia*, s. v.). Its prospects of success would be greater but for the monastic tendencies of the so-called "sisterhoods" organized by the Puseyites, e. g. Miss Sellon's. This subject has been lately revived in the German Reformed Church in America. On Christmas, 1866, Hon. J. Dixon Roman, of Hagerstown, Md., gave to the congregation of that city $5000, and with it sent a proposition to the Consistory that, according to his wish, "three ladies of the congregation shall be chosen and ordained to the order of deaconesses in this congregation, with absolute control of the income of said fund, for the purposes and duties as practised in the early days of the Church." This, and the action of Lebanon Classis, which in 1867 requests the synod "to take into consideration the propriety of restoring the apostolic office of deaconesses," will bring this plain question before the highest judicatory of the Church.

In the Roman Catholic Church there are various sisterhoods answering in some degree to the ancient order of deaconesses, but without ordination; such as the Beguines, the Gray Sisters, the Sisters of Charity, Sisters of Mercy, etc. (see Ludlow, *Woman's Work in the Church*, ch. iii).

The first modern reorganization of the work of deaconesses on a large scale was begun in 1835 by pastor Fliedner, of Kaiserswerth, Prussia. An infirmary was established, to be served by Christian women, unmarried or widows. He required of all who would become deaconesses that they should be "willing to be servants of Christ alone, to devote their time and faculties entirely and exclusively to him, and not to look forward for pecuniary emoluments or honors of the world, nor yet to merit salvation by their works, but to do the work of charity and self-denial out of gratitude to him who hath redeemed their souls, and merited their salvation. After their probationary period they engage themselves to serve at least five years. But even during this time they are allowed to leave if nearer personal or family duties should make them wish for a change of situation." Many women obeyed the call, the infirmary grew rapidly into importance, and auxiliary societies were formed throughout Prussia. The institution spread into other parts of Europe, and there are now orphan-houses and hospitals under its charge at Berlin, Dresden, Frankfort, Worms, Cologne, Elberfeld, London, and other places. The mother institution has (1) a seminary to train young females as teachers for infant and other schools; (2) an orphan asylum; (3) a training-school of nurses, and for visitors to prisons, etc. The whole expense is borne by voluntary subscriptions. A branch was established at Pittsburg, Pa., in 1849 by pastor Fliedner in person. Mrs. Fry, after a visit to Kaiserswerth, established in Bishopsgate, London, an "Institution for Nursing Sisters," which still exists. A deaconesses' institute was organized at Paris in 1851, and others followed in France and Switzerland (see Ludlow's article in the *Edinburgh Review*, 1848, p. 223). In 1888 the Gen. Conference of the M. E. Church created the order of Deaconesses, who now have "homes" in the larger cities of the U. S. See Howson, *Deaconesses, or the Official Help of Women in Parochial Work* (Lond. 1862); Ludlow, *Woman's Work in the Church*; Jane M. Bancroft, *Deaconesses in Europe and America* (N. Y. 1889); also Bingham, *Orig. Eccles.* bk. ii, ch. xxii; Siegel, *Handbuch der christ. Alterthümer*, i, 491 sq.; Augusti, *Handb. der christl. Archæologie*, vols. i and iii; Ferraris, *Prompta Bibliotheca*, iii, 172; Coleman, *Ancient Christianity*, ch. xxv; Neander, *Ch. Hist.* i, 155; ii, 158 (Torry's transl.); Schaff, *Apostolic History*, § 135; ibid., *History of the Christian Church*, ii, § 52; *Mercersburg Review*, xiv, 190; *Am. Quart. Ch. Review*, July, 1862, art. iii.

Dead (properly some form of מוּת, θνήσκω). See BURIAL. When a Hebrew died in any house or tent, all the persons and furniture in it contracted a pollution which continued seven days (Num. xix, 14–16). All who touched the body of one who died, or was killed in the open fields; all who touched men's bones, or a grave, were unclean seven days. To cleanse this pollution, they took the ashes of the red heifer, sacrificed by the high-priest on the day of solemn expiation (Num. xix, 1–22); on these they poured water in a vessel, and a person who was clean dipped a bunch of hyssop in the water, and sprinkled with it the furniture, the chamber, and the persons, on the third day and on the seventh day. It was required that the polluted person should previously bathe his whole body, and wash his clothes, after which he was clean. Since the destruction of the Temple, the Jews have ceased generally to consider themselves as polluted by a dead body. See CORPSE. On the play upon the two senses of the word in its literal and spiritual application in Matt. v, 22, see the *Dissertatio* of Schicht (Altd. 1770). See DEATH.

The word rendered "dead" in Job xxvi, 5; Psa. lxxxviii, 10; Prov. ii, 18; ix, 18; xxi, 16; Isa. xiv, 9; xxvi, 14, 19, is רְפָאִים, *rephaïm'*; derived from רָפָא; having, according to Gesenius, the sense of *silent*, but, according to Fürst, meaning *dark;* in either case denoting the *shades*, *manes*, or disembodied spirits of the under world. See SHEOL.

DEAD, BAPTISM FOR. See BAPTISM FOR THE DEAD.

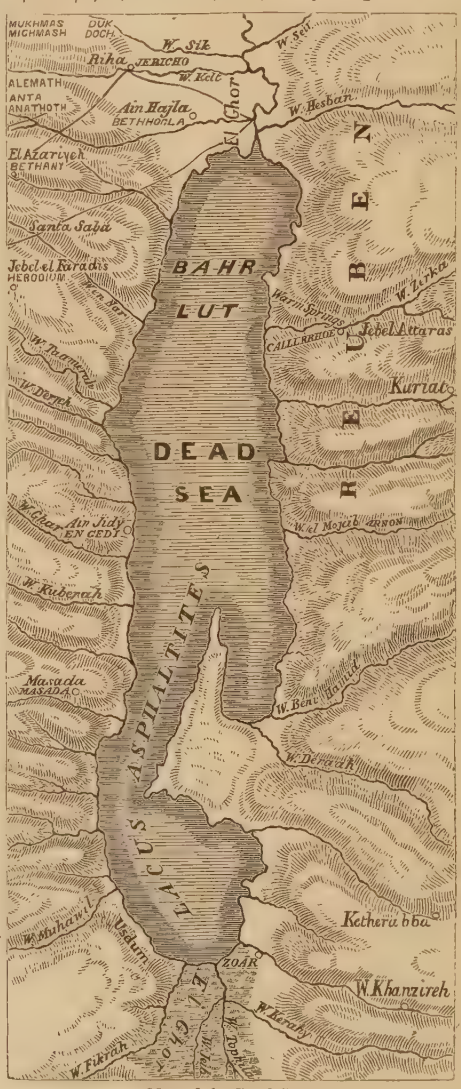
DEAD, BAPTISM OF THE. See BAPTISM.

DEAD, Burial of the. See Burial; Funeral.

DEAD, Prayers for the, a custom that arose in the Church at an early period. Tertullian (220) remarks (*De Corona Milit.* c. iii) that it is the practice for a widow to pray for the soul of her deceased husband. He also speaks (*De Monogam.* c. x) of "oblations" made for the dead on the anniversary of their martyrdom. Origen († 254) speaks of Christians "making mention of saints in their prayers" (lib. ix, in Rom. xii). Arnobius (cir. 300) says that Christians pray for pardon and peace on behalf of the living and the dead (*adv. Gentes*, iv). Cyril of Jerusalem even declares it to be a considerable advantage for the souls of the dead to be prayed for (*Cat. Mystag.* v, 6). The same custom is found in many of the ancient liturgies. Chrysostom († 407) says of the wicked dead, "they are to be succored with prayers, supplications, alms, and oblations." While this was the common practice, it had no reference to the notion of a purgatory. Many of the fathers regarded such prayers as little more than a thanksgiving, a commendation of souls of the deceased to the mercy of God, and a commemoration of their spiritual excellencies. Still there is no doubt that not a few of the fathers believed that the souls of departed believers were not taken at once to heaven, but were in some separate place—Hades or Paradise—out of which the fervent prayers of survivors might help to remove them. So that the idea of purgatory sprang out of such views in no long space of time. Nevertheless, it is not true, as Romanists assert, that prayers for the dead necessarily imply a belief in purgatory. Almost all the English writers on purgatory refute this; e. g. Burnet, *On* 39 *Articles*, art. xxii; Stillingfleet, *Defence of Laud*, p. 643; Jeremy Taylor, *Dissuasive from Popery;* Collier, *Eccles. Hist. of Great Britain*, v, 288 sq.

In the Church of England burial service of 1549, under Edward VI, one prayer was, "We commend into thy hands of mercy, most merciful Father, the soul of this our brother departed . . . that when the judgment shall come, which thou hast committed to thy well-beloved Son, both this our brother and we may be found acceptable in thy sight, and receive thy blessing." "Almighty God, we give thee hearty thanks for this thy servant, whom thou hast delivered from the miseries of this wicked world, from the body of death and all temptation; and, as we trust, hast brought his soul, which he committed into thy holy hands, into sure consolation and rest: Grant, we beseech thee, that at the day of judgment his soul and all the souls of thy elect, departed out of this life, may with us, and we with them, fully receive thy promises, and be made perfect altogether, through the glorious resurrection of thy Son Jesus Christ our Lord." And the next prayer was, "O Lord, with whom do live the spirits of them that be dead, and in whom the souls of them that be elected, after they be delivered from the burden of the flesh, be in joy and felicity, grant unto this thy servant that the sins which he committed in this world be not imputed unto him, but that he, escaping the gates of hell, and pains of eternal darkness, may ever dwell in the region of light, with Abraham, Isaac, and Jacob, in the place where there is no weeping, sorrow, nor heaviness; and when that dreadful day of the general resurrection shall come, make him to rise also with the just and righteous, and receive this body again to glory, then made pure and incorruptible." The prayer was ultimately changed into the thanksgiving form in which it now appears in the Prayer-book: "After the offertory in the Eucharist is said, and the oblations of bread and wine, with the alms for the poor, are placed upon the table, the minister addresses this exhortation to the people: 'Let us pray for the whole state of Christ's Church militant here in earth.' The latter part of this sentence is wanting in Edward's first book. The words 'militant here in earth,' which were designed expressly to exclude prayer for the dead, were inserted in the second book, in which that part of this prayer, which contained intercession for the dead, was expunged. It was the intention of the divines who made this alteration to denote that prayers are not to be offered up for the dead, whose spiritual welfare is already accomplished; but for those only who are yet 'fighting the good fight of faith,' and are consequently in a capacity of needing our prayers" (Shepherd, cited by Hook, *Church Dictionary*, s. v.). Protestants reject prayers for the dead as having no ground either in Scripture or reason.—Bingham, *Orig. Eccles.* bk. xv, ch. iii, § 15; Riddle, *Christian Antiquities*, p. 277 sq.; Coleman, *Ancient Christianity*, ch. xxv; Browne, *On* 39 *Articles*, art. xxii; Palmer, *Orig. Liturgicæ*, ch. iv, § 10; *Theol. Stud. u. Krit.*, 1866, ii, 396. See Synagogue.

Dead Sea (*mare mortuum*, Justin, xxxvi, 3, 6; Θάλασσα ἡ νεκρά, Pausan. v, 7, 3; Galen. *Simpl. Med.* iv, 20), a name applied since the second century to the *Asphaltic Lake* (ἡ Ἀσφαλτῖτις λίμνη, as Josephus, Diodorus Siculus, and Ptolemy, v, 16, 3, call it; or simply ἡ Ἀσφαλτῖτις, *War*, iv, 8, 2; more distinctly λίμνη ἀσφαλτοφόρος, *Ant.* xvii, 6, 5; Pliny's *Asphaltites la-*



Map of the Dead Sea.

cus, or simply *Asphaltites*), from its supposed noxious properties. In the Bible it is called *the* SALT SEA (יָם הַמֶּלַח, Gen. xiv, 3; Numb. xxxiv, 12, etc.), *the Sea of the Plain*, or Arabah (יָם הָעֲרָבָה, Deut. iii, 17; iv, 49, etc.), or *the Front* (Eastern) *Sea* (הַיָּם הַקַּדְמוֹנִי, Ezek, xlvii, 18; comp. ver. 8; Joel ii, 20; Zech. xiv, 8). By the Arabs it is termed *Bahr Lut*, "the Sea of Lot" (Abulfeda, *Tab. Syr.* p. 156). It is the remarkable lake or internal sea formed by the filling up of the old basin of the Vale of Siddim (Gen. xiv, 3), on the south-east border of Palestine (Numb. xxxiv, 3, 12; Deut. iii, 17; comp. Josh. xii, 3), especially in the same quarter of the tribe of Judah (Josh. xv, 2, 5) into which the Jordan empties (iii, 16), 300 stadia from Jerusalem (Joseph. *Ant.* xv, 6, 2). Josephus (*War*, iv, 8, 4) gives its length as 580 stadia, or about 38 miles; its breadth as 150 stadia, or about 15 miles; and its circumference as 6 days' journey (see Setzeen in Zach's *Monatl. Corresp.* xviii, 440; the estimates of Pliny, v, 15, and Diod. Sic. xix, 98, are erroneous). It is long and necked or sickle-form at the southern end, with a peninsula at the eastern side. See BAY. The east and west shores are steep with naked limestone [see ENGEDI], but the southern shore ends in a marsh. On the south-west is a range of salt hills, and on the south-east a considerable plain. See SALT, VALLEY OF. The water, which lies far below the level of the Mediterranean, is clear, but uncommonly salt and bitter, and of great density (Joseph. *War*, iv, 8, 4; Jul. Afric. in Canisii *Lection. Antiq.* ii, 1; Pliny, v, 15). It contains no living creature, neither fish, shells, nor seaplants, and when fishes from the Jordan get into it they die and float upon the surface (Diod. Sic. ii, 48; xix, 98; Jerome *on Ezek.* xlvii, 9; Cotovic. *Itin.* p. 312). The shore is covered with a dark offensive mud, upon which a strong saline incrustation forms, and is occasionally interspersed with lumps of bitumen, broken off from the cliffs or disgorged from the bottom (Burckhardt, ii, 664). A pretty thick fog has been observed, especially in the morning, by travellers (Shaw, p. 297; Volney, i, 240), as enveloping the lake (comp. Wisd. x, 7; Philo, *Opp.* xxi, 143); but, situated as it is in a deep caldron-like spot, the air is usually excessively sultry, and so filled with saline effluvia as to banish vegetation (Philo, *Opp.* ii, 21); and although it is not so detrimental to animal life (Tacit. *Hist.* v, 6) as has sometimes been represented (Maundrell, p. 116), a solemn stillness reigns around, unbroken by wind, wave, or animated cry. The marks of volcanic agency are strewn about (Felsecker, *Palæst.* ii, 353), which, with the warm springs on the shore [see CALLIRRHOË], the asphaltic vapors and floating substances (Strabo xvi, 764), give evidence of the plutonic catastrophe (comp. Gen. xiv, 10) which covered the guilty cities of this plain (Gen. xix); and it is popularly believed that these ruins may still be discerned beneath its waters (Joseph. *War*, iv, 8, 4), though now sunk below their former level (Reland, *Palæst.* p. 254 sq.). See SIDDIM. It was anciently believed that the immense volume of water poured in by the Jordan found an outlet by subterranean canals into the Mediterranean (Diod. Sic. xix, 98); but it is now ascertained that this is impossible, and that evaporation is sufficient to account for the maintenance of the usual height in the lake (Bachiene, I, i, 121). See generally Fabri, *Evagat.* ii, 155 sq.; Oedmann, *Samml.* iii, 125; Hamelsveld, i, 447; Büsching, *Erdbeschr.* V, i, 322 sq.; Wähner, *De Mari Asphalt.* (Helmst. 1712); Michaelis in his *Comment.* 1758–62 *oblat.* (Brem. 1774), p. 61 sq.; Mannert, *Geogr.* VI, i, 332; Ritter, *Erdkunde*, xvi, 331 sq.; Schwarz, *Palest.* p. 41; Thomson, *Land and Book*, ii, 449; Kelly's *Syria*, p. 393; J. Kempe, *De indole Maris Mortui* (Holm. 1751). See SEA.

Deaf (חֵרֵשׁ, *cheresh'*; κωφός, both, especially the latter, implying dumbness also). Moses extended the protection of a special statute to the deaf mute: "Thou shalt not curse the deaf" (Lev. xix, 14). This enactment not only absolutely prohibited the reviling of these unfortunates, but might also be understood figuratively, as if Moses recommended that kindness and instruction should be shown to them (Isa. xxix, 18, 35; Matt. xi, 5; Mark vii, 32). See DUMB.

Deal, a word often employed by our translators in the sense of *part*, with fractional numbers ("tenth deal," Exod. xxix, 40, etc.; like "a great deal"), but having no special equivalent in the original. See NUMBER.

Dealtry, WILLIAM, D.D., F.R.S., was born in Yorkshire in 1775, educated in Catharine Hall and Trinity College, Cambridge, where he was second wrangler in 1796 and fellow in 1798. He afterwards became professor of mathematics in the East India College, rector of Clapham in 1813, chancellor and prebendary of Winchester in 1830, and finally archdeacon of Surrey in 1845. He died in 1848. His principal publications are, *A Discourse on the Duty and Policy of propagating Christianity* (Lond. 1813, 8vo); *Sermons* (Lond. 1828, 8vo); *Obligations of the national Church* (Lond. 1838, 8vo); *The Foundation of the Faith* (Lond. 1846, 8vo).—Darling, *Cyclop. Bibliographica*, i, 882.

Dean (*decanus*, from δέκα, *ten*), an ecclesiastical title which has had several applications. (1.) The oldest use of it was to designate an officer in the ancient monasteries, in which every ten monks were subject to one called the *decanus*, or dean, from his presiding over ten; and every hundred had another officer called *centenarius*, from his presiding over one hundred. The business of the dean was to exact every man's daily task, and to bring it to the *œconomus*, or steward of the house, who himself gave a monthly account to the father of all. The word dean is occasionally used in early writers for archpresbyter. (2.) In the Church of England there are two sorts of deans: 1st, the *dean of a cathedral*, who is an ecclesiastical magistrate, next in degree to the bishop. He is chief of the chapter, and is called a dean (*decanus*) because he formerly presided over ten prebendaries or canons. He is by law a sole corporation—that is, he represents a whole succession, and is capable of taking an estate as dean and conveying it to his successors. 2d, *rural deans*, whose office is of ancient date in the Church of England, long prior to the Reformation, and which many of the bishops are now reviving. Their chief duty is to visit a certain number of parishes, and to report their condition to the bishop. There are two means of creating deans, because there are two foundations of cathedral churches in England, the old and the new. Those of the old foundation are appointed to their dignity much like bishops, the king first issuing his *congé d'elire* to the chapter, the chapter then choosing, and the bishop confirming and giving his mandate to instal them. (3.) The word *dean* is also applied in England to the chief officers of certain peculiar churches or chapels, as the dean of the king's chapel, the dean of the arches, the dean of St. George's Chapel at Windsor, and the dean of Bocking, in Essex. (4.) The *dean and chapter* constitute the governing body of a cathedral. A chapter consists of the dean, with a certain number of canons or prebendaries, heads of the church —*capita ecclesiæ*. They are the council of the bishop, to assist him with their advice in affairs of religion as well as in the temporal concerns of his see. When the rest of the clergy were settled in the several parishes of each diocese, these were reserved for the celebration of divine service in the bishop's own cathedral; and the chief of them, who presided over the rest, obtained the name of *decanus*, or dean, being probably at first appointed to superintend ten canons or prebendaries. The dean and chapter are the nominal electors of a bishop. (5.) The *dean* of a college faculty

is its presiding officer.—Siegel, *Handbuch d. christl. Alterthümer*, i, 485; Hook, *Church Dictionary*, s. v. See CHAPTER.

DEAN OF THE CARDINALS. See CARDINALS.

DEAN OF THE CHAPEL ROYAL (Scotland), an office held by three clergymen of the Established Church, to which they are appointed by the crown. The duties are nominal, being limited to an occasional sermon before her majesty when in Scotland, and attendance at the election of the representative peers. Recent appointments, however, have been conferred in connection with chairs in the University of Edinburgh which are not otherwise endowed. The title of dean is somewhat out of place in the Church of Scotland, where the rule of Presbyterian parity is established. It is a remnant of Episcopacy, which the Church courts have never had occasion to challenge, as the deans do not sit or act in that capacity, and have scarcely any ecclesiastical duties to perform.

Dearth (usually רָעָב, *hunger*; λιμός, *famine*; as both are elsewhere rendered; but in Jer. xiv, 1, בַּצֹּרֶת, *batstso'reth*, *restraint*, sc. of rain, *drought*, as in Jer. xvii, 8), a scarcity of provisions. Although Palestine is a very fruitful land, yet a famine naturally followed a lack of crops, especially when the rain failed (1 Kings xvii; Josephus, *Ant.* xv, 9, 1), or the country was visited, among the not infrequent land-plagues (2 Sam. xxiv, 13; Psa. xxxiii, 19; Ezek. xxxvi, 29; Jer. xiv, 13, 15), with swarms of locusts (q. v.); and we read of dearths in the historical narratives not only in the patriarchal period (Gen. xii, 10; xlvii, 4, 13), and the era of the judges (Ruth i, 1), when the soil was not regularly farmed, but also in the time of the kings (2 Sam. xxi, 1; 1 Kings xviii, 2; 2 Kings iv, 38; Jer. xiv, 1), and, indeed, the destitution sometimes continued more than one year together (2 Sam. xxi, 1). In such cases the inhabitants availed themselves of supplies from the neighboring Egypt (Gen. xii, 10; xlii, 1 sq.; xliii, 1 sq.; Josephus, *Ant.* xv, 9, 2; xx, 2, 6; 5, 2), although this region likewise suffered in like manner whenever the Nile failed to reach its usual overflow (Gen. xli, xliii). Under the Roman rule an extensive famine prevailed (Acts xi, 12) in the time of the emperor Claudius (q. v.), which occurred during several years in different provinces of the empire, and reached Palestine at the end of the fourth year of his reign (Joseph. *Ant.* xx, 2, 6; comp. iii, 15, 3). See AGABUS. Josephus mentions an earlier famine (*Ant.* xv, 9, 1), that took place in the thirteenth year of Herod the Great, which resulted from drought, and was followed by pestilence. See FAMINE.

Death (properly מָוֶת, θάνατος). No logical definition of death has been generally agreed upon. This point was much contested in the 17th century by the Cartesian and other theologians and philosophers. Since death can be regarded in various points of view, the descriptions of it must necessarily vary. If we consider the state of a dead man as it strikes the senses, death is the cessation of natural life. If we consider the cause of death, we may place it in that permanent and entire cessation of the feeling and motion of the body which results from the destruction of the body. Among theologians, death is commonly said to consist in the separation of soul and body, implying that the soul still exists when the body perishes. Among the ecclesiastical fathers, Tertullian (*De Anima*, c. 27) calls it "the disunion of the body and soul." Cicero (*Tusc. Dis.* i) defines death to be "the departure of the mind from the body." The passage Heb. iv, 12, is sometimes cited on this subject, but has nothing to do with it. Death does not consist in this separation, but this separation is the consequence of death. As soon as the body loses feeling and motion, it is henceforth useless to the soul, which is therefore separated from it. See DEAD.

Scriptural representations, names, and modes of speech respecting death.—(1.) One of the most common in the O. T. is *to return to the dust*, or *to the earth*. Hence the phrase *the dust of death*. It is founded on the description in Gen. ii, 7, and iii, 19, and denotes the dissolution and destruction of the *body*. Hence the sentiment in Eccles. xii, 7, "The dust shall return to the earth as it was, the spirit unto God, who gave it."

(2.) A withdrawing, exhalation, or removal of the breath of life (Psa. civ, 29). Hence the common terms to "give up the ghost," etc.

(3.) A removal from the body, a being absent from the body, a departure from it, etc. This description is founded on the comparison of the body to a tent or lodgment in which the soul dwells during this life. Death destroys this tent or house, and commands us to travel on (Job iv, 21; Isa. xxxviii, 12; Psa. liii, 7). Hence Paul says (2 Cor. v, 1), "our earthly house of this tabernacle" will be destroyed; and Peter calls death a "putting off of this tabernacle" (2 Pet. i, 13, 14). Classical writers speak of the soul in the same manner. So Hippocrates and Æschines. Compare 2 Cor. v, 8, 9.

(4.) Paul likewise uses the term ἐκδύεσθαι, to *unclothe one's self*, in reference to death (2 Cor. v, 3, 4), because the body is represented as the garment of the soul, as Plato calls it. The soul, therefore, as long as it is in the body, is clothed, and as soon as it is disembodied is naked.

(5.) The terms which denote *sleep* are applied frequently in the Bible, as everywhere else, to death (Psa. lxxvi, 5; Jer. li, 39; John xi, 13 sq.). Nor is this language used exclusively for the death of the pious, as some pretend, though this is its prevailing use. Homer calls *sleep* and *death* twin brothers (*Il.* xvi, 672). The terms likewise which signify to lie down, to rest, also denote death.

(6.) Death is frequently compared with and named from *a departure*, *a going away*. Hence verbs of that import signify to die (Job x, 21; Psa. xxxix, 4). The case is the same in the New Testament (Matt. xxvi, 24), and even among the classics. In this connection we may mention the terms ἀναλύειν and ἀνάλυσις (Phil. i, 23; 2 Tim. iv, 6), which do not mean *dissolution*, but *discessus* (comp. Luke xii, 36).

Death, when personified, is described as a ruler and tyrant, having vast power and a great kingdom, over which he reigns (Job xviii, 14). But the ancients also represented it under some figures which are not common among us. We represent it as a man with a scythe, or as a skeleton, etc.; but the Jews, before the exile, frequently represented death as a hunter, who lays *snares* for men (Psa. xviii, 5, 6; xci, 3). After the exile they represented him as a man, or sometimes as an angel (the angel of Death), with a cup of poison, which he reaches to men. See DESTROYER. From this representation appears to have arisen the phrase, which occurs in the New Testament, to *taste death* (Matt. xvi, 28; Heb. ii, 9), which, however, in common speech, signifies merely to *die*, without reminding one of the origin of the phrase. The case is the same with the phrase to *see death* (Psa. lxxxix, 48; Luke ii, 26). See Knapp's *Christian Theology*, by Dr. Wood; Walther, *De origine phrasium* "*videre et gustare mortem*" (Giess. 1745).

The "gates of death" (Job xxxviii, 17; Psa. ix, 13; cvii, 18) signify the grave itself; and the "shadow of death" (Jer. ii, 6) denotes the gloomy silence of the tomb. See Wemyss's *Clavis Symbolica*, s. v.; Zeibich, *De vocibus*, צַלְמָוֶת, σκία θανάτου (Vitemb. 1739).

Death may be considered as the effect of sin (Rom. v, 12). In Hebrews ii, 14, Satan is said to have the power of death; not that he can, at his pleasure, inflict death on mankind, but as he was the instrument of

first bringing death into the world (John viii, 44), and as he may be the executioner of God's wrath on impenitent sinners where God permits him. Death is but once (Heb. ix, 27), yet certain (Job xiv, 1, 2), although uncertain as to the time (Prov. xxvii, 1); universal (Gen. iii, 19); necessary, in order that God's justice may be displayed and his mercy manifested; desirable to the righteous (Luke ii, 28–30). The fear of death is a source of anxiety and alarm to many, and to a guilty conscience it may indeed be terrible; but to a good man it should be obviated by the consideration that death is the termination of every trouble; that it puts him beyond the reach of sin and temptation; that God has promised to be with the righteous, even to the end (Heb. xiii, 5); that Jesus Christ has taken away the sting (1 Cor. xv, 55, 56); and that it introduces him to a state of endless felicity (2 Cor. v, 8).

Death, when applied to the animal nature, properly signifies a dissolution or failure of all its powers and functions; so, when applied to the spiritual nature, or souls of men, it denotes a corresponding disorder therein, a being spiritually dead in trespasses and sins (Rom. viii, 6; Eph. ii, 1, 3; Col. ii, 13; Jude 12).

The term death is metaphorically applied to denote an utter failure of customary functions, so that the thing spoken of can no longer act according to its nature. Thus, in Amos ii, 2, "Moab shall die with tumult"—that is, the king and government shall lose their power, and the nation be brought into subjection and slavery. So in Rom. vii, 8, "Without the law, sin was dead"—that is, without the law, sin does not exert its power; and, on the other hand, it is said (ver. 9), "Sin revived and I died"—"Sin got strength to act, and I lost my power to resist. I was not the same man as before; sin destroyed my power."

The "second death" (Rev. ii, 11) is so called in respect to the natural or temporal as coming after it, and implies everlasting punishment (Rev. xxi, 8).

DEATH, THEOLOGICAL ASPECTS OF. On this topic we present some views different from those usually entertained, but which modern science appears to justify and even to demand.

"Death may be defined as the *termination of life*. Beyond question, it had been possible for God, if such had been his pleasure, to have made all creatures under a law of life. Scripture assures us that man at least was at first placed conditionally under this law. There is, however, decisive evidence that, from the beginning, all other terrestrial life was constituted under the law of death. The reproductive and assimilating organs and powers common to all living creatures, and the destructive organs, instincts, and habits of birds and beasts of prey, unmistakably contemplate, as they provide for, a system or constitution of things in which death should reign. It was long and generally held, indeed, that this law in the natural economy supervened upon the introduction of sin. But this idea, which Scripture does nowhere assert or sanction, is hard to be reconciled with the conclusion which physiology and anatomy have deduced from powers and organs of the animal frame, with the same certainty that any final cause is inferred from any of the works of God. And it must be regarded as conclusively refuted by the discoveries of geology, which demonstrate the prevalence of death in ages long anterior to the creation of man, or, so far as is known, to the existence of sin. The earth's strata are now found to be full of the buried remains of extinct life; and it is made evident by the state in which many of these fossils are found, that then, as now, life was sustained by death. Nor can it well be doubted that this state of things obtained even in the days of man's primeval innocence. If we try, we shall find ourselves baffled in the attempt to conceive how even then death could be strange or unknown. Must not the revolving year have been marked by the opening and the fall of the earth's foliage, the ripening consumption and decay of earth's fruits? Could our first parents drink of the rivers of paradise, or tread its verdant surface, or keep and dress its trees and plants, without in every draught, at every step, by every stroke quenching or cutting down myriads of animalcular or insect as well as vegetable life? Although the flesh of animals was not yet given to man for food, is it supposable that the laws of animal life itself were all the while in abeyance—its instincts restrained, its powers unused, its appropriate pleasure withheld or denied? We know that from the day of man's creation he had given to him the idea of death. It was set before him as the just desert and consequence of disobedience. And whence should he have derived his conception of the import of the threatened evil so readily as from death's visible domain over the fowls of the heaven and the beasts of the field?

"With regard to creatures of mere instinct or animal nature, there can be nothing judicial or of the nature of punishment in their ordination to death. It is beyond question that for man's sake a curse had 'been brought upon the ground,' and the 'whole creation groaneth and travaileth in pain together until now.' Still man himself is by this means the greatest sufferer; and so far as it affects the other creatures, it can be only a physical evil, equally without moral cause or penal effect, of which, by their nature, they are unsusceptible. How this appointment is to be reconciled with the benevolence of the Creator is a hard question, which no light yet given to man enables him fully to resolve. So far, however, it may relieve the mystery that, as a general rule, the enjoyments of the inferior creatures greatly exceed their sufferings that death is but little, if at all, the object of their fear, or much even a cause of pain. That 'the sum of animal enjoyment quenched in death is amply compensated by the law of increase and succession, which both perpetuates life and preserves it in the vigor of its powers and the freshness of its joys, is certain;' also (as bearing on the physical and moral condition of man, to whose behalf, as chief in this lower world, all arrangements and disposals affecting the lower forms of life were subordinated), that their subjection to death has enlarged immensely the extent of man's physical resources, and multiplied manifold the means of his moral development and discipline.

"But man himself is involved in the common doom. It is appointed unto all men once to die. The reigning fact, man's death, seems to force upon us the conclusion that death is a physical necessity, or a universal law extending to all material organizations, however otherwise psychologically distinguished or divinely allied. And this opinion has generally obtained among men of pantheistic and materialistic views in philosophy, and of Pelagian and Socinian views in theology. But surely it is impossible, consistently with God's omnipotency, to allege the necessity or the power of this law, as existing in despite of his pleasure and purpose, to constitute our nature under a law of life. It is more than probable that the other orders of creatures who dwell in life immortal in the heavenly places are not all spirit, or without their own mode and form of organized existence. We are assured that the bodies of the risen saints are clothed with incorruption and immortality. We know that, even as now constituted, the life of these frail bodies in antediluvian age was prolonged to the verge of a millennium. And why should it be thought impossible for God, if so it had pleased him, to endue them with the powers, or provide for them the means of repairing the wear and waste of life, so as to preserve their powers and sensibilities in unabated vigor and freshness, 'even to length of days forever and ever?' This, Scripture informs us, was in the beginning provisionally ordained. The threatening of death as the penalty of a breach of the covenant is rightly understood to imply the prom-

ise of deathless and incorruptible life so long as the covenant should stand. And the tree of life in the midst of the garden, if not by its physical virtue the means of perpetual renovation, was certainly the sacramental pledge of God's purpose to preserve life inviolate while man was steadfast to the covenant. Thus runs the tenor of the covenant, or the constitution under which man's life was originally given and held: 'Thou shalt not eat of the tree of knowledge of good and evil, for in the day thou eatest thereof thou shalt surely die.' And, in terms equally explicit to the transgression of the law is the entrance and reign of death over man ascribed: 'By one man sin entered into the world, and death by sin; and so death passed upon all men, for that all have sinned.' Let it be observed that this declares the cause of death as it reigns over all men only. It affirms nothing respecting the cause of death as it reigns over other orders of creatures in the present or in preceding stages of the world's existence. Whether, in any way, they may have been constituted under a law of death by anticipation, and as in keeping with a state of things in which death should reign over man, we do not venture to pronounce. That indirectly, as a consequence of their relation to man as a sinner against God, their sufferings have been increased and their lives shortened, it is impossible to doubt or deny. But if, in this view, sin be the occasion of their death, it cannot be the cause of it. They are incapable of sin, and cannot die judicially for sin. The contrary opinion, which long and generally prevailed, that the creatures were immortal until man sinned, has as little to justify it in Scripture as in science. Death, it is there said, is the law of their being; and the true doctrine of the Scripture is not that they die because man has sinned, but that man, because he has sinned, has forfeited his original and high distinction, and has become like 'the beasts that perish.' It is unnecessary here to multiply Scripture proofs of this awful and humbling truth. Every one is familiar with the frequent and equivalent testimonies that death is 'the fruit,' 'the wages,' the 'end' and consummation of sin; and the circumstances which attend and induce it impressively connect it with sin as its cause. How, if not through guilty forfeiture, should the life of man have been abbreviated in its term so much more than that of many of the inferior creatures, and in so many instances still further shortened by disease and by calamity? To how great extent is it consumed by the fire of evil passion, smitten by the stroke of vengeful violence, taken away by the arm of judicial authority? in all these cases sin visibly working death. And while embittered and burdened by manifold pain and sorrows, how irresistibly does conscience within disquiet and alarm us by the conviction of guilt and the terror of righteous judgment?

"But now what is death, or what does it import as an appointed doom? To answer this question rightly, we require to ascertain the true constitution of our nature. Obviously death must be very different in the view of the materialist, who regards man as only a higher species of animal, whose mental and moral distinctions are the result of a higher physical organization, and in the judgment of those who consider man as the possessor of a soul distinct from the body, the subject and seat of a higher nature. If the body be the whole of man, death is the end of his conscious existence. If he consist of body and spirit, death may prove but his birthday into another and more important state of being. Now this point, which till the present hour has proved too hard for man himself to clear up, Scripture decides conclusively for all who will receive its testimony. Man is both body and spirit, the first placing him in communion with the outward world, the second allying him to God and his spiritual creation. The record of his primeval state exhibits the reality and effect of this complex being. While his earthly paradise yielded its riches and pleasures to every sense and sensibility of his animal nature, his higher life found its appropriate and pre-eminent occupation and delight in the service and communion of the 'Father of his spirit.' These views, as they magnify the life which God gave us, must be felt to complicate the nature and effects of death. How, then, does it affect us? Does it reach the whole man, body and spirit? If so, how are they severally and together affected by it? and in what order, and by what process does it consummate its work?

"1. Death extends to the entire man, and to every part of his nature. Against himself the threatening was directed, 'In the day thou eatest thereof *thou* shalt die.' Beyond doubt the outward man perisheth, and surely the inner man, the subject of that sin of which the body is but the instrument, cannot have escaped the force of the dread sentence. God's word assures us that the soul that sinneth it shall die. Nay, it speaks of man as already dead who yet lives in the body; dead, therefore, spiritually. On the other hand, it speaks of men now alive through grace who shall never die, while yet the graves are ready for them. Men who walk after the course of the world and live in pleasure are pronounced 'dead in sin,' dead while they live. And while whoso loveth his brother has 'passed from death unto life, he that hateth his brother abideth in death.' These Scriptures, while they distinguish between bodily and spiritual death, represent both as included in the sentence, and threatened and executed against the sinner.

"2. To what effect, then, does death exert its power upon the body and the spirit severally and together? It is not unimportant to observe that this is not extinction of existence or annihilation either of the one or the other. For a time the body retains its form, and its substance, however changed, is never lost; much more, may it be presumed, shall the spirit survive. Not, indeed, that spirit more than body is immortal independently of God's will, but that, seeing he preserves our inferior part, he will much more preserve the higher and more kindred product of his creative power. The effects of death upon the body itself are a matter of common observation; it quickly turns its comeliness into corruption, and finally reduces its form and structure into shapeless dust. The effect of bodily death on the spirit of the man whose nature is thus divided it may be more difficult to estimate. This may depend in part on the value of the earthly portion he has lost, and partly on the future portion on which he has entered, but it cannot be indifferent either to the child of sorrow or to the subject of grace, more than to the heir of this world, whom it has stripped of his whole inheritance of good. While we look on the deserted and impassive corpse and say, 'It is all over with him now,' the disembodied spirit must still find itself the subject of a maimed and imperfect nature. Consciousness belongs to its nature, and must endure while it has being. Its proper life lies in the harmony and subjection of its powers and dispositions to the nature and will of God; its death in contrariety and enmity to him. This involves the disruption of a holy and dutiful relation to the Father of spirits, and, by inevitable consequence, a deprivation of the fruits of his love and favor, on which life and blessedness depend. 'Your sins have separated between you and God.'

"3. It may tend further to clear this subject to notice briefly the order and process through which the work of death is consummated. Though incurred instantaneously on the act of transgression, its effects follow by successive stages, and at several more or less distant intervals. As caused by sin, the spiritual man, as the proper subject and source of the evil, first feels its power. Its very touch intercepts all happy intercourse with a holy God. This was felt and seen on the day that Adam sinned. His fear and flight at the

voice of the Lord God in the garden was the unmistakable symptom of a soul already dead in sin, which dared not live with God, while his expulsion from God's presence marked no less clearly that God had ceased to live with him. Thus was executed to the letter the word which God had spoken, '*In the day* thou eatest thou shalt surely die.' But the work of death thus begun does not stop here. The disruption of the creature's relation to God, it may well be conceived, must introduce disorder into all the relations and interests of its being; nor, unless with a view to some ulterior design of signal judgment or of more signal mercy, might its full development and consummation be long delayed. But in subserviency to this end does man live on in the body for a season, though as to God 'he is dead while he liveth.' Yet it is but for a little time. Whatever be the result of this day of forbearance, the work of death goes on; 'the body is dead because of sin'—the mortal crisis which awaits every individual man in his own time. As distinguished from spiritual, it is called temporal death, as superadding exclusion from the things of earth and time to the loss of all happy interest in God. There remains but one further stage ere it reach its complete and final issue, both in the individual and the race. When the designs of the divine administration in our world are finished, the bodies of all who sleep in dust shall be reorganized. There shall be a resurrection of the just and of the unjust. While the just, by faith through grace, shall be raised to life incorruptible and glorious, the unjust, impenitent, and unbelieving shall awake to the resurrection of damnation. The whole man shall go away from the glory and joy of God's presence into everlasting punishment. This is the second death." See also Fletcher, *Works* (N. Y. ed.), i, 158 sq.; Wesley, *Works* (N. York ed.), i, 401; ii, 34, 404; Edwards, *Works* (N. Y. 1848, 4 vols. 8vo), ii, 372, 390 sq.; Watson, *Institutes*, ii, 48, 55; Martensen, *Christian Dogmatics* (Edinb. 1867), § 108–112. See Eschatology.

Death, Brothers of, a name given to the religious of the order of St. Paul, the first hermit, on account of the figure of a death's head which they were always to have with them, in order to keep perpetually before them the thought of death. The order was suppressed by pope Urban VIII.

De'bir (Heb. *Debir'*, דְּבִיר or דְּבִר, a *sanctuary*, often applied to the Tabernacle and Temple), the name of two or three places, and also of a man.

1. (דְּבִר, but in Judg. and Chron. דְּבִיר; Sept. Δαβίρ [Δεβίρ in Josh. xv, 15, 49; xxi, 15; Judg. i, 1, 11] v. r. Δαβείρ; Vulg. *Dabir*), a town in the mountains of Judah (Josh. xv, 49), one of a group of eleven cities to the west of Hebron (Keil, *Comment.* in loc.), in a parched region (Judg. i, 11–15). In the narrative it is mentioned as being the next place which Joshua took after Hebron (x, 38). It was the seat of a Canaanitish king (x, 39; xii, 13), and was one of the towns of the Anakim, and from which they were utterly destroyed by Joshua (xi, 21). The earlier name of Debir was Kirjath-sepher (Josh. xv, 15; Judg. i, 11) and Kirjath-sannah (Josh. xv, 49). (See these names.) The records of its conquest vary, though not very materially. In Josh. xv, 17, and Judg. i, 13, a detailed account is given of its capture by Othniel, son of Kenaz, for love of Achsah, the daughter of Caleb, while in the general history of the conquest it is ascribed to the great commander himself (Josh. x, 38, 39, where the name occurs with ה local affixed, *Debi'rah*, דְּבִרָה, and this even with ל prefixed). It was one of the cities given with their "suburbs" (מִגְרָשׁ) to the priests (Josh. xxi, 15; 1 Chron. vi, 58). Debir does not appear to have been known to Jerome, nor has it been discovered with certainty in modern times. About three miles to the W. of Hebron is a deep and secluded valley called the Wady Nunkûr, enclosed on the north by hills of which one bears a name certainly suggestive of Debir—*Dewîr-bau*. (See the narrative of Rosen in the *Zeitsch. d. Morgenl.* 1857, p. 50–64). The subject, and indeed the whole topography of this district, requires further examination: in the mean time it is perhaps some confirmation of Dr. Rosen's suggestion that a village or site on one of these hills is pointed out as called *Isa*, the Arabic name for Joshua. Schwarz (*Palest.* p. 86) speaks of a *Wady Dibir* in this direction. Van de Velde (*Memoir*, p. 307) finds Debir at *Dilbeh*, six miles S.W. of Hebron, where Stewart (*Tent and Khan*, p. 223, 224) mentions a spring brought down from a high to a low level by an aqueduct (comp. "the *upper* and the *nether* springs" of Judg. i, 14, 15).

2. (דְּבִר; Sept. ἐπὶ τὸ τέτραρτον τῆς φάραγγος Ἀχώρ; Vulg. *Debera*), a place on the north boundary of Judah, "near the "Valley of Achor" (Josh. xv, 7), and therefore somewhere in the complications of hill and ravine behind Jericho. De Saulcy (*Narrat.* ii, 25) attaches the name *Thour ed-Dabour* to the ruined khan on the right of the road from Jerusalem to Jericho, at which travellers usually stop to refresh; but this is not corroborated by any other traveller, unless it be Schwarz (*Palest.* p. 95), and he is disposed to identify this site with this and the foregoing place, nor does the locality agree with the scriptural intimations. The name usually given to it by the Arabs is Khan Hatherûrah. A *Wady Dabor* is marked in Van de Velde's map as lying close to the S. of Neby Mûsa, at the N.W. corner of the Dead Sea (see De Saulcy, *Narrat.* ii, 53, 54), which probably gives a trace of the ancient town as located on the N.E. of this valley. See Tribe.

3. The "border (גְּבוּל) of Debir" (לְדְבִר, *to Debir*; Sept. Δεβίρ v. r. Δαβείρ and Δαιβών; Vulg. *Dabir*) is named as forming part of the boundary of Gad (Josh. xiii, 26), and as apparently not far from Mahanaim. Reland (*Palæst.* p. 734) conjectures that the name may be the same as Lodebar (q. v.), which is written similarly (לוֹדְבָר or לאֹדָבָר), and lay in the same vicinity (2 Sam. ix, 4, 5). Lying in the grazing country on the high downs east of Jordan, the name is doubtless connected with דָּבָר, *dabar*, the same word which is the root of *Midbar*, the wilderness or pasture (see Gesenius, *Thes. Heb.* p. 318).

4. (דְּבִיר; Sept. Δαρίρ v. r. Δαρείρ and Δαβίν; Vulg. *Dabir*), the king of Eglon, in the low country of Judah; one of the five Canaanitish princes who joined the confederacy summoned by Adonizedek of Jerusalem, and who were defeated, confined in a cave, and at length hanged by Joshua (Josh. x, 3, 23). B.C. 1613.

Deb'ora [prop. *Debo'ra*] (Δεββωρά or Δεββώρα, from the Heb. *Deborah*), a woman of Naphtali, mother of Tobiel, the father of Tobit (Tob. i, 8).

Deborah. See Bee.

Deb'orah (Heb. דְּבוֹרָה [or "defectively" דְּבֹרָה, Gen. xxxv, 8; Judg. iv, 14; v, 15], a *bee*, as often [comp. the names Μέλισσα and *Melitilla*]; Sept. Δεβόρρα v. r. [in Judg.] Δεββῶρα; Josephus Δεβώρα, *Ant.* v, 5, 2]), the name of two women. See Debora.

1. The nurse of Rebekah (Gen. xxxv, 8). Nurses held a high and honorable place in ancient times, and especially in the East (2 Kings xi, 2; Homer, *Od.* i, 429; Virgil, *Æn.* vii, 2; "Æneia nutrix;" Ovid, *Met.* xiv, 441), where they were often the principal members of the family (2 Chron. xxii, 11; Jahn, *Bibl. Arch.* § 166). Deborah accompanied Rebekah from the house of Bethuel (Gen. xxiv, 59), B.C. 2023; but she is only mentioned by name on the occasion of her burial, under the oak-tree of Bethel, which was called in her honor Allon-Bachuth (Gen. xxxv, 8). B.C. 1906.

Such spots were usually chosen for the purpose (Gen. xxiii, 17, 18; 1 Sam. xxxi, 13; 2 Kings xxi, 18, etc.). Many have been puzzled at finding her in *Jacob's* family; it is unlikely that she was sent to summon Jacob from Haran (as Jarchi suggests), or that she had returned during the lifetime of Rebekah, and was now coming to visit her (as Abarbanel and others say); but she may very well have returned at Rebekah's death, and that she *was* dead is probable from the omission of her name in Gen. xxxv, 27; and if, according to the Jewish legend, Jacob first heard of his mother's death at this spot, it will be an additional reason for the name of the tree, and may *possibly* be implied in the expression וַיְנַחֵם, comforted, A. V. "blessed" (Gen. xxxv, 9; see, too, Ewald, *Gesch.* i, 390).

2. A prophetess, "wife of Lapidoth," who judged Israel (Judg. iv, v) in connection with Barak (q. v.). B.C. 1409–1369. Her name may imply nothing whatever, being a mere appellative, derived like Rachel (a lamb), Tamar (a palm), etc., from natural objects; although she was (as Corn. a Lapide quaintly puts it) *suis mellea, hostibus aculeata.* Some, however, see in the name an official title, implying her prophetic authority. A bee was an Egyptian symbol of regal power (comp. Callim. *Jov.* 66, and *Et. Mag.* s. v. ἐσσήν); and among the Greeks the term was applied not only to poets (*more apis matinæ*, Horace), and to those peculiarly chaste (as by the Neoplatonists), but especially to the priestesses of Delphi (*χρησμὸς μελίσσας Δελφίδος*, Pind. *P.* iv, 106), Cybele, and Artemis (Creuzer, *Symbolik*, iii, 354, etc.), just as ἐσσήν was to the priests (Liddell and Scott, s. v.). In both these senses the name suits her, since she was essentially a vates or seer, combining the functions of poetry and prophecy (see Stanley, *Jewish Church*, i, 348 sq.).

She lived, probably in a tent, under the palm-tree of Deborah, between Ramah and Bethel in Mount Ephraim (Judg. iv, 5), which, as palm-trees were rare in Palestine, is mentioned as a well-known and solitary landmark, and was probably the same spot as that called (Judg. xx, 33) Baal-Tamar, or the sanctuary of the palm (Stanley, *Palest.* p. 145). Von Bohlen (p. 334) thinks that this tree is identical with Allon-Bachuth (Gen. xxxv, 8), the name and locality being nearly the same (Ewald, *Gesch.* i, 391, 405), although it is unhistorical to say that this "may have suggested a name for the nurse" (Hävernick's *Introd. to Pent.* p. 201; Kalisch, *Gen.* ad loc.). Possibly it is again mentioned as "the oak of Tabor" in 1 Sam. x, 3 (where Thenius would read דְּבֹרָה for תָּבוֹר). At any rate, it was a well-known tree, and she may have chosen it from its previous associations. See Oak.

She was probably a woman of Ephraim, although, from the expression in Judg. v, 15, some suppose her to have belonged to Issachar (Ewald, *Gesch.* ii, 489). The expression אֵשֶׁת לַפִּידוֹת is much disputed; it is generally thought to mean "wife of Lapidoth," as in A. V.; but other versions render it "uxor principis," or "Fœmina Lapidothana" ("that great dame of Lapidoth," Tennyson), or *mulier splendorum*, i. e. one divinely illuminated, since לַפִּידוֹת=lightnings. But the most prosaic notion is that of the Rabbis, who take it to mean that she attended to the tabernacle lamps, from לַפִּיד, *lappîd*, a lamp! The fem. termination is often found in men's names, as in Shelomith (1 Chron. xxiii, 9), Koheleth, etc. Lapidoth, then, was probably her husband, and not Barak, as some say. See Lapidoth.

She was not so much a judge (a title which belongs rather to Barak, Heb. xi, 32) as one gifted with prophetic command (Judg. iv, 6, 14; v, 7), and by virtue of her inspiration "a mother in Israel." Her sex would give her additional weight from the peculiarity of the circumstance, as in the instances of Miriam, Huldah, Anna, Noadiah (2 Kings xxii, 14; Neh. vi, 14). Her official designation probably means that she was the organ of communication between God and his people, and probably, on account of the influence and authority of her character, was accounted in some sort as the head of the nation, to whom questions of doubt and difficulty were referred for decision. See Judge.

From the intimations which the narrative (especially her song) contains, and from other circumstances, the people would appear to have sunk into a state of total discouragement under the oppression of the Canaanites, so that it was difficult to rouse them from their despondency, and to induce them to make any exertion to burst the fetters of their bondage. From the gratitude which Deborah expresses towards the people for the effort which they finally made, we are warranted in drawing the conclusion that she had long endeavored to instigate them to this step in vain. At length she summoned Barak, the son of Abinoam, from Kedesh, a city of Naphtali, on a mountain not far from Hazor, and made known to him the will of God that he should undertake an enterprise for the deliverance of his country. But such was his disheartened state of feeling, and, at the same time, such his confidence in the superior character and authority of Deborah, that he assented to go only on the condition that she would accompany him. Jabin's tyranny was peculiarly felt in the northern tribes, who were near his capital and under her jurisdiction, viz. Zebulon, Naphtali, and Issachar; hence, when she summoned Barak to the deliverance, it was on them that the brunt of the battle fell; but they were joined by the adjacent central tribes, Ephraim, Manasseh, and Benjamin, though not by those of the extreme west, south, and east. Under her direction Barak encamped on "the broad summit of Tabor" (Josephus, *War*, ii, 20, 6). When asked to accompany him, she answered indignantly, "Thou, O Barak, deliverest up meanly the authority which God hath given thee into the hands of a woman; neither do I reject it" (Joseph. *Ant.* v, 5, 2). The Sept. interpolates the words "because I know not the day when the Lord will escort me by his angel" as a sort of excuse for Barak's request (iv, 8; comp. 14; v, 23). When the small band of ill-armed (Judg. v, 8) Israelites saw the dense iron chariots of the enemy, "they were so frightened that they wished to march off at once, had not Deborah detained them, and commanded them to fight the enemy that very day" (Joseph. *l. c.*). They did so, but Deborah's prophecy was fulfilled (Judg. iv, 9), and the enemy's general perished among the "oaks of the wanderers (Zaanaim)," in the tent of the Bedouin Kenite's wife (Judg. iv, 21) in the northern mountains. For the natural phenomena which aided (Judg. v, 20, 21) the victory, and the other details (for which we have ample authority in the twofold narration in prose and poetry), see Barak, where we have also entered on the question of the chronology (Ewald, *Gesch.* ii, 489–494). B.C. 1409. This great victory, which seems to have been followed up, broke the power of the native princes, and secured to the Israelites a repose of forty years' duration (Judg. v, 31). During part of this time Deborah probably continued to exercise her former authority; but nothing more of her history is known. See Thomson, *Land and Book*, ii, 150; Hunter, *Sacred Biog.* iv, 98; Hughes, *Female Char.* i, 296.

Deborah's title of "prophetess" (נְבִיאָה) includes the notion of inspired poetry, as in Exod. xv, 20; and in this sense the glorious triumphal ode (Judg. v) well vindicates her claim to the office. This song, which was composed in consequence of the great victory over Sisera, is said to have been "sung by Deborah and Barak." See Jael. It is usually regarded as the composition of Deborah (see Zeltner, *Deborœ inter prophetissas eruditio*, Alt. 1708), and was probably indited by her to be sung on the return of Barak and his

warriors from the pursuit. It belongs indisputably to the first rank of Hebrew poetry, and is one of its most splendid and difficult specimens. "In the ecstasy and energy of inspiration," says Prof. Robinson (*Bib. Repos.* 1831, p. 569), "the prophetess pours out her whole soul in thanksgiving to God for his divine aid, and in gratitude to the people of Israel for their patriotism in rising spontaneously to throw off the yoke of oppression. Her strains are bold, varied, and sublime; she is everywhere full of abrupt and impassioned appeals and personifications; she bursts away from earth to heaven, and again returns to human things; she touches now upon the present, now dwells upon the past, and closes at length with the grand promise and result of all prophecy, and of all the dealings of God's providence, that the wicked shall be overthrown, while the righteous shall ever triumph in Jehovah's name." This ode has often been explained at length, especially by Hollman, *In carmen Deborœ* (Lips. 1818); Kron, *Sur le chant de Débora* (Strasb. 1833); Kalkar, *De cantico Deb.* (Copenh. 1833); Keminck, *De carm. Deb.* (Utr. 1840); Meier, *Uebers. u. Erklär. des Deborah-Liedes* (Tübingen, 1859); Herder, *Heb. Poesie*, ii, 235; Ewald, *Poet. Bücher*, i, 125 sq.; Gumpach, *Alttest. Stud.* 1–140; Böttger, in Käuffer's *Bibl. Studien*, pt. 1–3; Robinson, *Bibl. Repos.* i, 568 sq. Other treatises are, in Latin, by Schultens (L. B. 1745; also in his *Syll. Dissertt.* No. 12), Lette (L. B. 1759), Lüderwald (Helmst. 1772), Schnurrer (Tüb. 1775; also in his *Dissertt.* p. 36 sq.); comp. Origen (*Opp.* ii, 470), Jerome (*Opp. Spur.* iii, 745), Muis (*Sel. Cant.* i), Cocceius (*Opp.* i, 311); in German, by Teller (Halle, 1766), Wenck (Darmst. 1773), Köhler (in Eichhorn's *Repertor.* vi, 163 sq.), Mendelssohn (in *Sammler*, 1778), Bielcke (Starg. 1750); in English, by Weston (London, 1788), Horsley (*Bib. Crit.* ii, 424, 477); in Italian, by Hintz (ed. Brini, Rom. 1792). See JUDGES (BOOK OF).

Debt (נֶשִׁי, *neshi'*, 2 Kings iv, 7; מַשָּׁאָה, *mashshaah'*, Prov. xxii, 26; נֹשֶׁא, *noshè'*, a *creditor*, 1 Sam. xxii, 2; elsewhere, יָד, *hand*, Neh. x, 31; δάνειον, *loan*, never *debt*, Matt. xviii, 27; ὀφειλή, Matt. xviii, 22, a *due*, as rendered Rom. xiii, 7; ὀφείλημα, *something owed*, Matt. vi, 12; Rom. iv, 4). The Mosaic law very strongly recommended willingness to loan (Deut. xv, 7 sq.; comp. Psa. xxxvii, 26; Matt. v, 42). Interest (נֶשֶׁךְ, "usury"), however, could only be exacted by capitalists from foreigners, not at all from Israelites as co-religionists (in Neh. v, 11, a percentage is mentioned; but it does not appear whether this was in money, Heineccii *Antiq. Rom.* ii, 15, 19, as generally among the Romans, or a yearly rental; comp. Appian, *Civ.* i, 54); also a vendue of loaned natural products (see, however, *Baba Mezia*, v, 1) was forbidden (Exod. xxii, 25; Lev. xxv, 37 sq.; Deut. xxiii, 20). The agrarian regulation of the state secured each one, in the last resort, from the rapacity of the creditor; probably by this very arrangement moneyed men were restrained from depending upon loaned money for a subsistence, and were thus induced to turn their attention to agriculture or other useful occupations. See LAND. In this way, however, wholesale business, which was incompatible with the isolation-system of the Jewish law-giver, was rendered rare, or rather impossible (see Michaelis, *Syntagm. commentt.* ii, 1 sq.; *Mos. Recht*, iii, 87 sq.; Jahn, *Bibl. Archäol.* II, ii, 325 sq.; on the Talmudic prescriptions, see Selden, *Jus. Hebr.* vi, 9). Usury incurred the deepest scorn (Prov. xxviii, 8; Ezek. xviii, 8, 13, 17; xxii, 12; Jer. xv, 10; Psa. xv, 5; cix, 11), but no other civil penalty was annexed to it (according to the Talmud, it involved a forfeiture of redress; on the whole subject, see Marezoll, *De usuraria pravitate*, Lips. 1837). Written notes of obligation (χειρόγραφα, *signatures;* Gesenius, *Thesaurus*, p. 921, finds such evidences of debt in the מַשָּׂא יָד or מַשֵּׂה יד, q. d. *note of hand*, Deut. xv, 2: the Talmudic precepts on such paper are given in the Mishna, *Baba Bathra*, c. 10) were, at least in the post-exilian period, regularly in vogue (Tobit i, 17; Josephus, *Ant.* xvi, 10, 8; *War*, ii, 17, 6; comp. xviii, 6, 3; Luke xvi, 6 sq.). Distraint was allowed, but under certain restrictions (Exod. xxii, 16 sq.; Deut. xxiv, 6, 10 sq.). See PLEDGE. Severity against debtors being regarded as imperious among the Israelites (comp. Job xxii, 6; xxiv, 3), especially in the collection of debts, the law scarcely enjoined anything directly on the treatment of bankrupts; it is merely indicated (Lev. xv, 39) that he who was totally insolvent might be sold into temporary bondage in order to satisfy the debt by his wages. (On the rigor towards this class among the Romans, see Heineccius, *Antiq. jur. Rom.* iii, 30, 2. They were often subjected to the harshest usage as slaves, Livy, ii, 23; vi, 36; Gell. xx, 1, 19; Appul. *Ital.* ix, p. 40, ed. Schweigh. In Athens, *before* Solon's time, the creditor could even lay claim to the person of his debtor, Plutarch, *Vit. Sol.* c. 15; later, there prevailed a summary process of seizure, which the creditor himself was authorized to execute [see Schläger, *De delictore*, etc. Helmstadt, 1741]. Yet certain mitigations, not unlike the Mosaic, existed; see Heffter, *Athen. Gerichtsverf.* p. 455 sq. On the Egyptian legislation, see Diod. Sic. i, 79; Wilkinson, ii, 49 sq.) This rule was often still further exercised in practice with such hardheartedness as to involve wife and children in the poor debtor's fate (2 Kings iv, 1; Neh. v, 5; Isa. l, 1; Matt. xviii, 25); nay, the sureties likewise were exposed to the same mode of reparation (Prov. xx, 16; xxii, 26 sq.; xxvii, 13). Debtors were liable to punishment by imprisonment (Matt. v, 26; xviii, 30), probably a Roman usage. The Talmudic rules concerning debt are mild (*Baba Mezia*, ix, 13). On the Sabbatical year (q. v.) all pecuniary obligations were cancelled (Deut. xv, 1 sq., 9). See LOAN; DEBTOR; USURY; CREDITOR, etc.

Debtor (חוֹב, *chob*, *debt*, Ezek. xviii, 7; χρεωφειλέτης, *ower of money*, Luke vii, 41; xvi, 5; elsewhere simply ὀφειλέτης. See generally the prop. Hebrew words נָשָׁא, לָוָה, Gesenius, *Thes. Heb.* p. 920). The Mosaic laws respecting pecuniary obligations differ in many points from those of modern nations, but this is no proof that they were not suitable to the people for whom they were designed, and it is certain that they are pervaded by a spirit of kindness to the debtor to which no parallel is to be found in the codes of antiquity. See LOAN. Though they at least tacitly allow of the sale of a debtor as a slave (Lev. xxv, 39, 40), they also direct that his treatment shall be that of "an hired servant and a sojourner," while the law of the Twelve Tables authorized putting an insolvent debtor to death, and both Grecian and Roman history abound with instances of the disturbances caused in those states by the severity with which this class was dealt with. The laws of Moses are, however, by no means regardless of the rights of creditors, as we find that persons who had property due to them might, if they chose, secure it either by means of a mortgage, or by a pledge, or by a bondsman or surety. The chief provisions in the Scripture on the subject are the following:

1. The creditor, when about to receive a pledge for a debt, was not allowed to enter the debtor's house and take what he pleased, but was to wait before the door till the debtor should deliver up the pledge with which he could most easily dispense (Deut. xxiv, 10, 11; Job xxii, 6; xxiv, 3, 7, 9).

2. When a mill, or mill-stone, or an upper garment was given as a pledge, it was not to be kept all night. These articles appear to be mentioned as examples for all other things which the debtor could not without great inconvenience dispense with (Exod. xxii, 26, 27; Deut. xxiv, 6, 12).

3. The debt which remained unpaid until the seventh or Sabbatic year (during which the soil was to be left without cultivation, and, consequently, a person was not supposed to be in a condition to make payments) could not be exacted during that period (Deut. xv, 1–11). But at other times, in case the debt was not paid, the creditors might seize, first, the hereditary land of the debtor, and enjoy its produce until the debt was paid, or at least until the year of jubilee; or, secondly, his houses. These might be sold in perpetuity, except those belonging to the Levites (Lev. xxv, 14, 32). Thirdly, in case the house or land was not sufficient to cancel the debt, or if it so happened that the debtor had none, the person of the debtor might be sold, together with his wife and children, if he had any. This is implied in Lev. xxv, 39, and this custom is alluded to in Job xxiv, 9. It existed in the time of Elisha (2 Kings iv, 1), and on the return of the Jews from the Babylonish captivity some rich persons exercised this right over their poor debtors (Neh. v, 1–13). Our Lord alludes to the same custom in Matt. xviii, 25. As the person of the debtor might thus be seized and sold, his cattle and furniture were undoubtedly liable for his debts (Prov. xxii, 27). It does not appear that imprisonment for debt existed in the age of Moses, but it seems to have prevailed in the time of our Saviour (Matt. xviii, 34).

4. If a person had become bondsman or surety for another, he was liable to be called upon for payment in the same way with the original debtor. But this practice does not appear to have obtained before the time of Solomon, when it was attended with serious consequences. It seems that the formality observed was for the person who became surety to give his hand to the debtor, and not to the creditor, to intimate that he became, in a legal sense, one with the debtor; for Solomon cautions his son against giving his hand to a stranger, to a person whose circumstances he did not know; and entreats him to go and urge the person to whom he had given his hand, or for whom he had become surety, to pay his own debt (Prov. xi, 15; xvii, 18; xxii, 26). See DEBT.

Decalogue (Δεκάλογος), the name most usually given by the Greek fathers to the law of the two tables given by God to Moses on Mount Sinai, called in Scripture "the TEN COMMANDMENTS (עֲשֶׂרֶת הַדְּבָרִים, *the ten words;* Sept. *οἱ δέκα λόγοι* and *τὰ δέκα ῥήματα·* Vulg. *decem verba;* Exod. xxxiv, 28; Deut. iv, 13; x, 4); and embracing what is usually termed "*the Moral Law*" (Exod. xx, 3–17; Deut. v, 7–21). The Decalogue was written on two stone slabs (Exod. xxxi, 18), which, having been broken by Moses (xxxii, 19), were renewed by God (xxxiv, 1, etc.). They are said (Deut. ix, 10) to have been written by the finger of God, an expression which always implies an immediate act of the Deity. The Decalogue is five times alluded to in the New Testament, there called *ἐντολαί, commandments,* but only the latter precepts are specifically cited, which refer to our duties to each other (Matt. v, 17, 19, etc.; Mark x, 19; Luke xviii, 20; Rom. xiii, 9; vii, 7, 8; Matt. v; 1 Tim. i, 9, 10). Those which refer to God are supposed by some to be omitted in these enumerations, from the circumstance of their containing precepts for ceremonial observances (Jeremy Taylor's *Life of Christ,* and *Ductor Dubitantium;* Rosenmüller's *Scholia in Exod.*).

The circumstance of these precepts being called *the ten words* has doubtless led to the belief that the two tables contained ten distinct precepts, five in each table; while some have supposed that they were called by this name to denote their perfection, *ten* being considered the most perfect of numbers: so Philo-Judæus (*ἡ δεκὰς παντελεία . . . ἀριθμοῦ τέλειον, De Septen.* c. 9). This distinguished philosopher divides them into two pentads (*De Decalogo*), the first pentad ending with Exod. xx, 12, "Honor thy father and thy mother,' etc. or the *fifth* commandment of the Greek, Reformed, and Anglican churches; while the more general opinion among Christians is that the first table contained our duty to God, ending with the law to keep the Sabbath holy, and the second our duty to our neighbor. As they are not numerically divided in the Scriptures, so that we cannot positively say which is the first, which the second, etc., it may not prove uninteresting to the student in Biblical literature if we here give a brief account of the different modes of dividing them which have prevailed among Jews and Christians. The case cannot be more clearly stated than in the words of St. Augustine: "It is inquired how the ten commandments are to be divided—whether there are four which relate to God, ending with the precept concerning the Sabbath—and the other six, commencing with 'Honor thy father and thy mother,' appertaining to man—or whether the former are *three* only, and the latter *seven?* Those who say that the first table contains *four*, separate the command, 'Thou shalt have no other gods but me' (Exod. xx, 3; Deut. v, 7), so as to make another precept of 'Thou shalt not make to thyself an idol' (Exod. xx, 4; Deut. v, 8), in which images are forbidden to be worshipped. But they wish 'Thou shalt not covet thy neighbor's house' (Exod. xx, 17; Deut. v, 21), and 'Thou shalt not covet thy neighbor's wife' (Exod. xx, 17; Deut. v, 21), and so on to the end, to be one. But those who say that there are only three in the first table, and seven in the second, make one commandment of the precept of the worship of one God, and nothing beside him (Exod. xx, 3; Deut. v, 7), but divide these last into two, so that one of them is 'Thou shalt not covet thy neighbor's wife,' and the other, 'Thou shalt not covet thy neighbor's house.' There is no question among either about the correctness of the number ten, as for this there is the testimony of Scripture" (*Questions on Exodus,* qu. 71, *Works,* iii, 443, Paris, 1679).

1. *The Talmudical Division,* or that contained in the Talmud (*Makkoth,* xxiv, a), which is also that of the modern Jews. According to this division, the first commandment consists of the words "I am the Lord thy God, who brought thee out of the land of Egypt, out of the house of bondage" (Exod. xx, 2; Deut. v, 6); the second (Exod. xx, 3, 4), "Thou shalt have none other gods beside me; thou shalt not make to thyself any graven image," etc. to ver. 6; the third, "Thou shalt not take God's name in vain," etc.; the fourth, "Remember to keep holy the Sabbath day," etc.; the fifth, "Honor thy father and thy mother," etc.; the sixth, "Thou shalt not kill;" the seventh, "Thou shalt not commit adultery;" the eighth, "Thou shalt not steal;" the ninth, "Thou shalt not bear false witness," etc.; and the tenth, "Thou shalt not covet," etc., to the end. This division is also supported by the Targum of the pseudo-Jonathan, a work of the sixth century, by Aben-Ezra, in his *Commentary,* and by Maimonides (*Sepher Hammizvoth*). It has also been maintained by the learned Lutheran, Peter Martyr (*Loci Communes,* Basle, 1580, loc. 14, p. 684). That this was a very early mode of dividing the Decalogue is further evident from a passage in Cyril of Alexandria's treatise against Julian, from whom he quotes the following invective: "That Decalogue, the law of Moses, is a wonderful thing: thou shalt not steal; thou shalt not kill; thou shalt not bear false witness. But let each of the precepts which he asserts to have been given by God himself be written down in the identical words, 'I am the Lord thy God, who brought thee out of the land of Egypt;' the second follows, 'Thou shalt have no strange gods beside me; thou shalt not make to thyself an idol.' He adds the reason, 'for I, the Lord thy God, am a jealous God, visiting the sins of the fathers upon the children.' 'Thou shalt not take the name of the Lord thy God in vain. Remember the Sabbath day. Honor thy father and thy mother. Thou shalt not commit adultery. Thou

shalt not steal. Thou shalt not bear false witness. Thou shalt not covet thy neighbor's goods.' What nation is there, by the gods, if you take away these two, 'Thou shalt not adore other gods,' and 'Remember the Sabbath,' which does not think all the others are to be kept, and which does not punish more or less severely those who violate them?"

2. *The Origenian Division*, or that approved by Origen, which is that in use in the Greek and in all the Reformed churches except the Lutheran. Although Origen was acquainted with the differing opinions which existed in his time in regard to this subject, it is evident from his own words that he knew nothing of that division by which the number *ten* is completed by making the prohibition against coveting either the house or the wife a distinct commandment. In his eighth *Homily on Genesis*, after citing the words, "I am the Lord thy God, who brought thee out of the land of Egypt," he adds, "this is not a part of the commandment." The first commandment is, "Thou shalt have no other gods but me," and then follows, "Thou shalt not make an idol." These together are thought by some to make one commandment; but in this case the number ten will not be complete—where, then, will be the truth of the Decalogue? But if it be divided as we have done in the last sentence, the full number will be evident. The first commandment therefore is, "Thou shalt have no other gods but me," and the second, "Thou shalt not make to thyself an idol, nor a likeness," etc. Origen proceeds to make a distinction between gods, idols, and likenesses. Of gods, he says, "it is written, there are gods many and lords many" (1 Cor. viii, 5); but of idols, "an idol is nothing;" an image, he says, of a quadruped, serpent, or bird, in metal, wood, or stone, set up to be worshipped, is not an *idol*, but a *likeness*. A picture made with the same view comes under the same denomination. But an idol is a representation of what does not exist, such as the figure of a man with two faces, or with the head of a dog, etc. The likeness must be of something existing in heaven, or in earth, or in the water. It is not easy to decide on the meaning of "things in heaven," unless it refers to the sun, moon, or stars. The design of Moses he conceives to have been to forbid Egyptian idolatry, such as that of Hecate, or other fancied demons (*Opera*, ii, 156, De la Rue's ed.).

The pseudo-Athanasius, or the author of the *Synopsis Scripturæ*, who is the oracle of the Greek Church, divides the commandments in the same manner. "This book [Exodus] contains these ten commandments, on two tables: first, I am the Lord thy God. Second, Thou shalt not make to thyself an idol, nor any likeness. . . . Ninth, Thou shalt not bear false witness against thy neighbor. Tenth, Thou shalt not covet thy neighbor's wife, nor any thing that is thy neighbor's" (Athanasii *Opera*, fol. Paris, 1698).

Gregory Nazianzen, in one of his poems, inscribed "The Decalogue of Moses," gives the following division (*Opera*, ed. Caillaud, Paris, 1840):

These ten laws Moses formerly engraved on tables
Of stone; but do thou engrave them on thy heart.
Thou shalt not know another God, since worship belongs to me.
Thou shalt not make a vain statue, a lifeless image.
Thou shalt not call on the great God in vain.
Keep all sabbaths, the sublime and the shadowy.
Happy he who renders to his parents due honor.
Flee the crime of murder, and of a foreign
Bed; evil-minded theft and witness
False, and the desire of another's, the seed of death.

Jerome took the same view with Origen. In his commentary on Ephesians vi, he thus writes: "'Honor thy father and thy mother,' etc. is the *fifth* commandment in the Decalogue. How, then, are we to understand the apostle's meaning in calling it the first, when the first commandment is 'Thou shalt have no gods but me,' where some read thus, 'which is the first commandment with promise,' as if the *four* previous commandments had no promise annexed, etc. . . . . But they do not seem to me to have observed with sufficient accuracy that in the *second* commandment there is also a promise: 'Thou shalt not make to thyself an idol, nor the likeness of any thing in heaven above, or in the earth beneath, or in the water under the earth; thou shalt not adore them, nor sacrifice to them; for I, the Lord thy God, am a jealous God, visiting the sins . . . . but showing mercy unto thousands . . . .' (observe these words of promise—showing mercy unto thousands, etc.)" (Hieronymi *Opera*, vol. iv, Paris, 1693).

The pseudo-Ambrose also writes to the same effect in his *Commentary on Ephesians:* "How is this the first commandment, when the first commandment says, Thou shalt have no other gods but me? Then, Thou shalt not make a likeness of any thing in heaven above, or in the earth beneath, etc. The *third*, Thou shalt not take the name of the Lord thy God in vain; the *fourth*, Keep my sabbaths; the *fifth*, Honor thy father and thy mother. As the first four appertain to God, they are contained in the first table; the others, appertaining to men, are contained in the second, such as that of honoring parents, not committing murder, adultery, theft, false witness, or concupiscence. These six seem to be written in the second table, the first of which is called the first with promise" (Ambrosii *Opera*, vol. ii, Paris edition, Append. p. 248, 249).

To these testimonies from the fathers may be added that of Clemens Alexandrinus (*Stromata*, vi, p. 809); but this writer is so confused and contradictory in reference to the subject, that some have supposed the text to have been corrupted. "The first precept of the Decalogue," he observes, "shows that one God only is to be worshipped, who brought his people out of Egypt . . . . and that men ought to abstain from the idolatry of the creature. The second, that we ought not to transfer his name to creatures; the *third* signifies that the world was made by God, who has given us the seventh day to rest; the *fifth* follows, which commands us to honor our parents; then follows the precept about adultery, after this that concerning theft; but the tenth is concerning coveting."

But the strongest evidence in favor of the Origenian division is that of the learned Jews Philo and Josephus, who speak of it as the received division of the Jewish Church. Philo, after mentioning the division into two pentads already referred to, proceeds: "The first pentad is of a higher character than the second; it treats of the monarchy whereby the whole world is governed, of statues and images (ξοάνων καὶ ἀγαλμάτων), and of all corrupt representations in general (ἀφιδρυμάτων); of not taking the name of God in vain; of the religious observance of the seventh day as a day of holy rest; of honoring both parents. So that one table begins with God the father and ruler of all things, and ends with parents who emulate him in perpetuating the human race. But the other pentad contains those commandments which forbid adultery, murder, theft, false-witness, concupiscence" (*De Decalogo*, lib. i). The *first* precept, he afterwards observes, enjoins the belief and reverent worship of one supreme God, in opposition to those who worship the sun and moon, etc. Then, after condemning the arts of sculpture and painting, as taking off the mind from admiring the natural beauty of the universe, he adds: "As I have said a good deal of the *second* commandment, I shall now proceed to the next, 'Thou shalt not take the name of God in vain.' . . . . . The fourth commandment respects the Sabbath day, to be devoted to rest, the study of wisdom, and the contemplation of nature, with a revision of our lives during the past week, in order to the correction of our transgressions; the fifth speaks of honoring parents. Here ends the first, or more divine pentad. The second pentad begins with the precept respecting adultery; its second precept is against murder; its third against stealing, the next against false-witness, the last against coveting" (lib. ii). This division seems to have been followed by

Irenæus: "In quinque libris, etc.; unaquæque tabula quam accepit a Deo præcepta habet quinque." Josephus is, if possible, still more clear than Philo. "The first commandment teaches us that there is but one God, and that we ought to worship him only; the second commands us not to make the image of any living creature, to worship it; the third, that we must not swear by God in a false matter; the fourth, that we must keep the seventh day, by resting from all sorts of work; the fifth, that we must honor our parents; the sixth, that we must abstain from murder; the seventh, that we must not commit adultery; the eighth, that we must not be guilty of theft; the ninth, that we must not bear false-witness; the tenth, that we must not admit the desire of that which is another's" (*Ant.* iii, 5, 5, Whiston's translation).

This division, which appears to have been forgotten in the Western Church, was revived by Calvin in 1536, and is also received by that section of the Lutherans who followed Bucer, called the Tetrapolitans. It is adopted by Calmet (*Dict. of the Bible*, French ed., art. Loi). It is supported by Zonaras, Nicephorus, and Petrus Mogilæus among the Greeks, and is that followed in the present Russian Church, as well as by the Greeks in general (see the Catechism published by order of Peter the Great, by archbishop Resensky, London, 1753). It is at the same time maintained in this catechism that it is not forbidden to bow before the representations of the saints. This division, which appeared in the Bishops' Book in 1537, was adopted by the Anglican Church at the Reformation (1548), substituting *seventh* for Sabbath-day in her formularies. The same division was published with approbation by Bonner in his *Homilies* in 1555.

3. We shall next proceed to describe the *two Masoretic divisions*. (1.) The first is that in Exodus. We call it the Masoretic division, inasmuch as the commandments in the greater number of manuscripts and printed editions are separated by a ס or ס, which mark the divisions between the smaller sections in the Hebrew. According to this arrangement, the first two commandments (in the Origenian or Greek division), that is, the commandment concerning the worship of one God, and that concerning images, make but one; the second is, "Thou shalt not take the name of the Lord thy God in vain;" and so on until we arrive at the two last, the former of which is, "Thou shalt not covet thy neighbor's house," and the last or tenth, "Thou shalt not covet thy neighbor's wife, nor his servant," etc. to the end. This was the division approved by Luther, and it has been ever since his time received by the Lutheran Church. The correctness of this division has been at all times maintained by the most learned Lutherans, not only from its agreement with the Hebrew Bibles, but from the internal structure of the commandments, especially from the fact of the first two commandments (according to Origen's division) forming but one subject. If these form but one commandment, the necessity of dividing the precept, "thou shalt not covet," etc. into two is obvious. (For a learned defence of this division, see Pfeiffer, *Opera*, vol. i, loc. 96, p. 125). Pfeiffer considers the accentuation also of the Hebrew as equally decisive in favor of this division, notwithstanding the opposite view is taken by many others, including the learned Buxtorf. This division is also followed in the Trent Catechism, and may therefore be called the Roman Catholic division. The churches of this communion have not, however, been consistent in following uniformly the Tridentine division, having revived, as in England, the second Masoretic division, to which we shall presently allude. In the Trent Catechism the first commandment is, "Ego sum Dominus Deus tuus, qui eduxi te de terra Ægypti, de domo servitutis; non habebis Deos alienos coram me. Non facies tibi sculptile," etc. "Ego sum Dominus Deus tuus, fortis, zelotes," etc. to "præcepta mea." The last two commandments (according to the Roman division) are, however, in the same Catechism, combined in one, thus: "Non concupisces domum proximi tui; nec desiderabis uxorem ejus, non servum, non ancillam, non bovem, non asinum, nec omnia quæ illius sunt. In his duobus præceptis," etc. It had appeared in the same form in England in Marshall's and bishop Hilsey's *Primers*, 1534 and 1539.

Those who follow this division have been accustomed to give the Decalogue very generally in an abridged form: thus the first commandment in the Lutheran Shorter Catechism is simply "Thou shalt have no other gods but me;" the second, "Thou shalt not take the name of thy God in vain;" the third, "Thou shalt sanctify the Sabbath-day" (*Feyertag*). A similar practice is followed by the Roman Catholics, although they, as well as the Lutherans, in their Larger Catechisms (as the Douay) give them at full length. This practice has given rise to the charge made against those denominations of leaving out the second commandment, whereas it would have been more correct to say that they had mutilated the first, or at least that the form in which they give it has the effect of concealing a most important part of it from such as only had access to their Shorter Catechisms.

(2.) The last division is the *second Masoretic*, or that of Deuteronomy, sometimes called the Augustinian. This division differs from the former simply in placing the precept "Thou shalt not covet thy neighbor's wife" before "Thou shalt not covet thy neighbor's house," etc.; and for this transposition it has the authority of Deut. v, 21. The authority of the Masorites cannot, however, be of sufficient force to supersede the earlier traditions of Philo and Josephus.

This division was that approved by Augustine, who thus expresses himself on the subject: Following up what he had said (*ut sup.* p. 538), he observes, "But to me it seems more congruous to divide them into three and seven, inasmuch as to those who diligently look into the matter, those which appertain to God seem to insinuate the Trinity. And, indeed, the command, 'Thou shalt have no other gods but me,' is more perfectly explained when images are forbidden to be worshipped. Besides, the sin of coveting another man's wife differs so much from coveting his house, that to the house was joined his field, his servant, his maid, his ox, his ass, his cattle, and all that is his. But it seems to divide the coveting of the house from the coveting of the wife when each begins thus: '*Thou shalt not covet* thy neighbor's wife, *thou shalt not covet* thy neighbor's house,' to which it then begins to add the rest. For when he had said 'Thou shalt not covet thy neighbor's wife,' he did not add the rest to this, saying, nor his house, nor his field, nor his servant, etc. but these seem plainly to be united, which appear to be contained in one precept, and distinct from that wherein the wife is named. But when it is said 'Thou shalt have no other gods but me,' there appears a more diligent following up of this in what is subjoined. For to what pertains, 'Thou shalt not make an idol, nor a likeness; thou shalt not adore nor serve them,' unless to that which had been said, 'Thou shalt have none other gods but me.'" The division of Augustine was followed by Bede and Peter Lombard.

The learned Sonntag has entirely followed Augustine's view of this subject, and has written a dissertation in vindication of this division in the *Theologische Studien und Kritiken* (Hamb. 1836–7), to which there was a reply in the same miscellany from Züllig, in vindication of what he terms the *Calvinistic division*, or that of Origen, which is followed by a rejoinder from Sonntag. Sonntag is so convinced of the necessity of that order of the words, according to which the precept against coveting the wife precedes (as in Deuteronomy) that against coveting the house, etc. that he puts down the order of the words in Exodus as an

oversight. The order in the Septuagint version in Exodus agrees with that in Deuteronomy. The Greek Church follows this order. Sonntag conceives that the Mosaic division of the Decalogue was lost in the period between the exile and the birth of Christ. See Heinze, *De ratione præcepta Decalogi numerandi varia et vera* (Viteb. 1790); Pflücke, *De Decalogo* (Dresden, 1788); Thornton, *Lectures on the Commandments* (Lond. 1842). For a list of expositions, sermons, etc., on the Decalogue, see Darling, *Cyclopædia Bibliographica*, iii, 222 sq. See LAW.

Decap'olis (ἡ Δεκάπολις, Mark v, 20, but without the art. in Matt. iv, 25, Mark vii, 3; i. e. *αἱ δέκα πόλεις, the ten cities*, as in Josephus, *Life*, 65), a district (hence in Pliny, v, 16, 17, *Decapolitana regio*), or rather certain *ten cities* (including their adjacent villages or suburbs, Josephus, *Life*, 9), which resembled each other in being inhabited mostly by Gentiles (Lightfoot, *Opp.* ii, 417), and in their civic institutions and privileges (Josephus, *Life*, 74). They were situated in the neighborhood of the Sea of Gennesareth (Mark vii, 31; comp. Joseph. *War*, iii, 9, 7), near the eastern side of the Jordan, and in what was called the Roman province of Syria (Josephus, *Life*, 65). The name Decapolis does not occur in the Apocrypha, and, according to Mannert, it is only found in writers of the first century; in later times there is scarcely an allusion to it (*Geographie der Griechen und Römer*, VI, i, 244). Immediately after the conquest of Syria by the Romans (B.C. 65), ten cities appear to have been rebuilt, partly colonized, and endowed with peculiar privileges (Josephus, *Ant.* xv, 7, 3; xvii, 11, 4); the country around them was hence called *Decapolis*. The limits of the territory were not very clearly defined, and probably in the course of time other neighboring cities received similar privileges. This may account for the fact that ancient geographers speak so indefinitely of the province, and do not even agree as to the names of the cities themselves. Pliny (*Hist. Nat.* v, 16), while admitting that there was some variation in the list, enumerates them as follows: *Damascus*, *Philadelphia*, *Raphana*, *Scythopolis*, *Gadara*, *Hippos*, *Dion*, *Pella*, *Gelasa* (? Gerasa), and *Canatha;* he adds (v, 18), "The tetrarchies lie *between* and *around* these cities . . . . namely, Trachonitis, Panias, Abila," etc. These cities are scattered over a very wide region. If Raphana be, as many suppose, the same as Raphanæa of Josephus, it lay near Hamath (Joseph. *War*, vii, 5, 1), and from thence to Philadelphia on the south is above 200 miles, and from Scythopolis on the west to Canatha on the east is about 60. Josephus does not enumerate the cities of Decapolis; but it would seem that he excludes Damascus from the number, since he calls Scythopolis the largest of them (*War*, iii, 9, 7). He also incidentally includes most of the other cities named: e. g. Philadelphia (*War*, ii, 18, 1), Gadara and Hippos (*Life*, 65, 74); while Epiphanius (*Hær.* i, 30, 2) names Pella as belonging to this district, and in Stephen of Byzantium Gerasa appears in the same general connection. Cellarius thinks Cæsarea-Philippi and Gergasa ought to be substituted in Pliny's list for Damascus and Raphana (*Notit.* ii, 630). Pliny is undoubtedly the only author who extends Decapolis so far north. Ptolemy appears to include Decapolis in the southern part of Cœle-Syria (*Geogr.* v, 15); he also (v, 17) makes *Capitolias* one of the ten; and an old Palmyrene inscription quoted by Reland (*Palæst.* p. 525) includes *Abila*, a town which, according to Eusebius (*Onom.* s. v. Abila), was 12 Roman miles east of Gadara. Lightfoot (*Hor. Hebr.* p. 563 sq.) enumerates from Talmudical sources (Jerus. Talm. *Demai*, fol. 22, 3), as belonging to Decapolis, besides Scythopolis, Gadara, Hippo, and Pella, the following less-known towns and villages, which, like Scythopolis (q. v.), were generally esteemed as heathen and under Gentile rule: Cephar-*Carnaim* (כפר קרנים), Cephar-*Zemach* (כפר צמח), *Beth-Gurin* (בית גורין), *Arbo* (ערבו), and *Cæsarea-Philippi*. Brocardus, a writer of the 13th century, even describes Decapolis as extending in breadth from the Sea of Galilee to Sidon, and in length from Tiberias to Damascus, including the following ten chief towns: "Tiberias, Sophet, Cedes Nephtalim, Assor, Cæsarea-Philippi, Capernaum, Jonitera, Bethsaida, Corazin, and Bethsan" (*Descr. Terræ Sanctæ*, in Le Clerc's ed. of Euseb. *Onomast.* p. 175). Andronichus gives an account of the extent of the Decapolis substantially the same (*Theatr. Terræ Sanctæ*). But these statements are justly pronounced by Lightfoot (*Opp.* ii, 417 sq.) as pure suppositions. All the cities of Decapolis, with the single exception of Scythopolis, lay on the east of the Jordan; and both Eusebius and Jerome (*Onomast.* s. v. Decapolis) say that the district was situated "beyond the Jordan, around Hippos, Fella, and Gadara"—that is, to the east and south-east of the Sea of Galilee. With this also agrees the statement in Mark v, 20, that the demoniac who was cured at Gadara "began to publish in Decapolis how great things Jesus had done to him." The phraseology in Matt. iv, 25; Mark vii, 31, implying a situation on the west of the Jordan, must therefore be understood in a popular and general sense of a district but vaguely bounded, and one of whose towns was on that side of the river. In the latter passage indeed the entire difficulty vanishes, if, with the latest critics, we read *διὰ Σιδῶνος* instead of *καὶ Σιδῶνος*, and place these words after *ἦλθε*, thus: "And again departing from the coasts of Tyre, *he came through Sidon* unto the Sea of Galilee, through the midst of the coasts of Decapolis." In that case our Lord travelled from Tyre northward to Sidon; then he appears to have crossed Lebanon by the great road to Cæsarea-Philippi; and from thence he descended *through Decapolis* to the eastern shore of the lake, where he fed the multitude (comp. Matt. xv, 29–38; Mark viii, 1–9). It thus appears that "the region of Decapolis" was beyond the Jordan, with the exception of the little territory of Scythopolis close to the western bank, at the southern end of the Sea of Galilee. In addition to Damascus and Scythopolis, whose sites are well known, its chief towns were: Gadara, about six miles south-east of the lake; Pella, on the side of the range of Gilead, opposite Scythopolis; Philadelphia, the ancient Rabboth-Ammon; Gerasa, whose ruins are the most magnificent in all Palestine; and Canatha, the Kenath of the Bible, situated eastward among the mountains of Bashan. Decapolis was not strictly a province, like Galilee, Peræa, or Trachonitis. It was rather an assemblage of little principalities, classed together, not because of their geographical position, but because they enjoyed the same privileges, somewhat after the manner of the Hanse Towns in Germany. This region, once so populous and prosperous, from which multitudes flocked to hear the Saviour, and through which multitudes followed his footsteps, is now almost without an inhabitant. Six out of the ten cities are completely ruined and deserted. Scythopolis, Gadara, and Canatha have still a few families, living, more like wild beasts than human beings, amid the crumbling ruins of palaces, and in the cavernous recesses of old tombs. Damascus alone continues to flourish, like an oasis in a desert. See PERÆA.

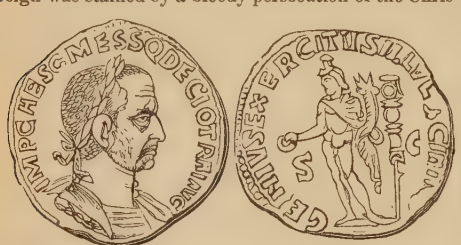
Dechant, JACOB WILLIAM, a minister of the German Reformed Church, was born at Kreutznach, in the Palatinate, Germany, Feb. 18, 1784, and emigrated to America in 1805. Having received a good preparatory training in Europe, he studied theology with Dr. Becker, of Baltimore, Md., and was ordained in 1808. His first pastoral charge consisted of six congregations in Lehigh County, Pa. In 1815 he was sent as a missionary to Ohio, returning after some years to Pennsylvania to take charge of congregations in Berks and Montgomery counties. Here he labored with success

till his death. He died suddenly on his way home from Synod, of cholera, Oct. 5, 1832. Three of his sons are now actively engaged in the work of the ministry in the German Reformed Church. He preached only in the German language. A number of prominent German Reformed ministers received their theological training under him.

Decimæ. See TITHES.

Decision, VALLEY OF (עֵמֶק הֶחָרוּץ, *E'mek, he-Charuts'*, *vale of the sentence*; Sept. ἡ κοιλὰς τῆς δίκης, Vulg. *Vallis concisionis*), a name poetically given to the Valley of JEHOSHAPHAT (q. v.), as being the ideal scene of the signal inflictions by Jehovah upon Zion's enemies at their restoration (Joel iii, 14). In perversion of some such prediction, the Mohammedans still believe that the final judgment will take place on this spot, and have accordingly left a stone in the city wall overhanging the valley, projecting as a seat for their prophet in the capacity of judge.

Decius, C. MESSIUS QUINTUS TRAJANUS, a Roman emperor, was born at Bubalia, in Lower Pannonia, towards the close of the second century. Being sent in 249 by the emperor Philippus to restore to subordination the army of Mœsia, which was in a state of revolt, the troops proclaimed him emperor against his will, and forced him to march upon Italy. Philippus having been defeated and slain, Decius assumed the government of the empire in the end of the year A.D. 249, but his brief reign was one of restless warring with the Goths, fighting against whom he was killed near Abricium, in the close of the year 251. Decius was an emperor of more than ordinary ability, but his reign was stained by a bloody persecution of the Chris-



Coin of Decius Trajanus. British Museum. Actual size. Copper. Weight 303¼ grains.

tians. In point of time this persecution ranks as the seventh, but in point of cruelty it was only equalled by that of Diocletian. See PERSECUTIONS. For about forty years prior to the accession of Decius the Christians had enjoyed peace, which only in some parts of the Roman empire was, for a short time, interrupted by a decree of the emperor Maximin. The effect of this peace upon the religious life of the Church was, in general, not favorable. Cyprian, Origen, and other ecclesiastical writers complain that worldliness, avarice, and other vices had become prevalent, and that marriages of Christians with pagans had become frequent. Soon after his accession to the throne (probably at the beginning of the year 250), Decius issued a severe decree against the Christians. The decree itself is lost, the *Edictum Decii Augusti contra Christianos*, which was published in 1664 at Toulouse by Bernard Medonius from Acts of the Martyrs, being spurious, as has been shown by Tillemont and Mosheim. The contents of the decree are, however, fully noticed by Gregory of Nyssa and other ancient writers. It ordered the civil magistrates to destroy Christianity by threatening Christians with the severest punishments, and by using against them tortures of every kind. It was sent to the governors of all the provinces, and most of them hastened to execute it. They promulgated the decree, and demanded that within a certain time every Christian should appear before the civil magistrate, and publicly declare his renunciation of the Christian faith; in the case of refusal, he was to suffer severe punishment, even death. Dionysius of Alexandria and Cyprian have given detailed descriptions of the persecution in the region of Carthage and Alexandria. Cyprian says that at the first news of the impending persecution a majority of the brethren hastened to renounce the faith, but his account is suspected of exaggeration. That the number of apostates was very large is also reported by Eusebius. Of those who remained faithful, most left the cities and sought refuge in solitude. Among this class were many of the most celebrated bishops, as Cyprian, Dionysius of Alexandria, and Gregory Thaumaturgus. This action was generally approved by the Church. The number of those, however, who neither fled nor apostatized was so great that, as soon as the time appointed for the execution of the decree arrived, the prisons were not sufficient to contain those who were arrested. Decius wished executions to be avoided, but every conceivable torture, if necessary, to be resorted to. Most of the civil magistrates vied with each other in inventing the most cruel tortures; only a few showed a spirit of sympathy and leniency. The number of those who succumbed to the torture (*lapsi*) was very large. Many procured false certificates that they had abjured the faith (*libellatici*). On the other hand, however, the number of those who died or were mutilated for the faith was considerable. In Rome, Antioch, and Jerusalem the several bishops were massacred; Origen, famous among the early fathers, was subjected to the most acute tortures. All the ancient martyrologies abound in names of those who are reported to have suffered martyrdom under Decius, and Tillemont spent much time and labor to sift the genuine reports from the spurious (*Mémoires*, iii. 133-189). Fortunately, the persecution of Decius did not last long. About Easter, 251, Cyprian could return from his concealment. The war which the emperor had to carry on against the Goths, his absence from Rome, the inroads of barbarians into the African provinces, and several insurrections, greatly moderated the persecution at the beginning of the year 251. When Decius, towards the close of the year, fell in a battle against the Goths, the Christians were set at liberty.—Herzog, *Real-Encyklop.* iii, 309; Wetzer und Welte, *Kirchen.-Lex.* iii, 59; Neander, *Church History* (Torrey's transl.), vol. ii.

Deck, i. e. BEDECK (properly עָדָה, *adah'*, to *adorn*, Ezek. xvi, 11, 13; xxiii, 40; Job xl, 10; Jer. iv, 30; Hos. ii, 13). See ORNAMENT.

Declamation, a speech made in the tone and manner of an oration, uniting the expression of action to propriety of pronunciation, in order to give the sentiment its full impression on the mind. The word is used also in a disparaging sense, as when it is said such a speech was mere declamation, it implies that it was deficient in point of reasoning, or had more sound than sense.—Buck, *Theol. Dictionary*, s. v. See HOMILETICS.

Declaratio Thorunensis, a confession of faith of the Reformed churches in Poland, drawn up at Thorn in 1645, for the settlement of disputed questions (*ad liquidationem controversiarum*). It is given in Niemeyer, *Collectio Confessionum*, p. 669 (Lips. 1840).

Decorated Style. See ARCHITECTURE.

De Courcy, RICHARD, a divine of the Church of England, born in Ireland, was educated at Trinity College, Dublin; became curate of Shanbury, Shropshire, in 1770; afterwards vicar of St. Alkmond in 1774, and died in 1803. In his sermons his language is dignified, and his reasoning perspicuous, embellished by apposite allusions, and ornamented by many of the graces of oratory. His principal works are, *Sermons*, to which is prefixed an essay on the nature, etc. of a pure and undefiled religion (Shrewsbury, 1805, 8vo); *Christ*

Crucified, the distinguishing Topic of the Gospel (Lond. 1816, 8vo).—Darling, *Cyclopædia Bibliographica*, s. v.; Jones, *Christian Biography*, p. 125 (Lond. 1829).

Decree (properly דָּת, *dath* [Dan. ii, 9, 13, 15, elsewhere "law"], δόγμα [Luke ii, 1; Acts xvi, 4; xvii, 7, elsewhere "ordinance"], an *edict;* also גְּזַר, *gazar'* [Esth. ii, 1], κρίνω [1 Cor. vii, 37, elsewhere usually "judge"], to *determine;* but represented by several other Heb. words), an official resolution passed by magisterial authority (see Crabbe's *Engl. Synonymes*, s. v.). Among the Orientals the enactments of the kings were proclaimed publicly by criers (Jer. xxxiv, 8, 9; Jonah iii, 5–7), who are designated in Daniel (iii, 4; v, 29) by the term כָּרוֹזָא, *karoza'*, the herald. They were made known in distant provinces, towns, and cities by messengers sent for that purpose (1 Sam. xi, 7; Ezra i, 1; Amos iv, 5). The message thus to be communicated in any town or city was publicly announced when the messenger had arrived in the gate of the city, or in some other public place. At Jerusalem it was announced in the Temple, where there were always a great many persons present. It was for the same reason that the prophets were accustomed to utter their prophecies in the Temple. See PROCLAMATION.

DECREES OF THE COUNCIL OF THE APOSTLES AT JERUSALEM (Acts xv). These related to the following prohibitions, "that they abstain from pollutions of idols, and from fornication, and from things strangled, and from blood" (ver. 20); or, as it is repeated (ver. 29), "that ye abstain from meats offered to idols, and from blood, and from things strangled, and from fornication." These are declared (ver. 28) to be "necessary" prohibitions. This necessity (as the γάρ, "for," of ver. 21 intimates) lay in the fact that wherever the Jews resided the law of Moses was read, and thus the ordinances in question were so deeply impressed upon the people's mind that they could not tolerate the neglect of them by the Gentile Christians. Instead of laying upon the Gentiles the burden of the whole law, and consequently of circumcision, the convention of apostles and elders resolved to enforce upon them only the reception of certain individual precepts of easy observance. The object of this canon was plainly nothing but to meet in some measure the difficulties of the Jewish Christians, and to lead the Gentile Christians to shun whatever might prove offensive to their Jewish brethren, as otherwise, under the existing usages and prejudices of education and caste, it would be impossible for them to associate together in a mixed community and church without scandal. In all this it was clearly indicated that the prohibitions were not absolute; once let the Jewish Christians be more thoroughly freed from the O.-T. forms, and the end for which these regulations were made would no longer exist. Now the ground on which these particular points were brought into view is explained by the circumstance that they were wont to be laid upon the proselytes of the Gate in the so-called "*seven precepts of Noah*" (comp. Buxtorf, *Lex. Rab.* s. v. גֵּר, p. 407 sq.). See PROSELYTE. This, therefore, is the import of the arrangement, that the Gentile Christians should not be obliged to become "proselytes of righteousness" by circumcision, but only to live as "proselytes of the Gate." Those of the seven precepts of Noah (see NOAH, PRECEPTS OF), which are here omitted, viz. the ones regarding blasphemy, murder, robbery, and sedition, was of such a kind that it was self-evident to Christians that the like could have no place among them; in the present instance it was not so much precepts of a purely moral character that required to be brought forward, as precepts that referred simply to the outward life. See APOSTOLICAL COUNCIL.

1. That the "pollutions of idols" (ἀλισγήματα τῶν εἰδώλων) are thus to be understood of an outward act, viz. the eating of the flesh of sacrifices, is quite clear from the analogous expression, "things offered to idols" (εἰδωλόθυτα, *idol-sacrifices*), in the parallel verse. The more particular distinction made by Paul in 1 Cor. x, between such flesh of sacrifices as was bought like any other in the shambles and such as was eaten in the temple at an idol festival, is not entered into by the assembly; they interdict in the widest sense all eating of sacrifices because the Jews took offence at it. See ALISGEMA.

2. The same holds good of the eating of blood, and, which is the same thing, of that which was strangled, in which the blood remained coagulated. The Jews had the utmost abhorrence of blood as food, which was grounded particularly upon Lev. xvii, 10, 11, where it is not merely said that Jehovah would set his face against the perpetrator of this act, but the blood is also represented as the support of the soul (comp. Gen. ix, 4), that is, of the physical life, and it is placed in connection with the propitiation, which can only be made by the shedding of blood (Heb. ix, 22). This law appears to have been strictly observed by the primitive Church (Euseb. *Hist. Eccl.* v, 1), and even in the Middle Ages the injunction was frequently given by the spiritual authorities to avoid the eating of blood (especially in the Greek Church: see canon 67 of the second Council at Trullo in 692; in the Latin Church, Augustine already took the right view, contr. *Faustum*, xxxii, 13). See BLOOD.

3. The mention of *fornication* (πορνεία) appears to be quite foreign to the nature of the other injunctions, and opposed to the above view of these apostolical ordinances. It blends a purely moral precept with enactments that refer only to matters of outward observance. The conjectural emendation (πορκείας, or χοιρείας, for πορνείας, in both passages) that proposes to refer this clause to the eating of swine's flesh is negatived by the fact that no such abstinence is alluded to in the Noachian precepts; and the forced explanation of the term (πορνεία for θυσία πορνική), as alluding to a sacrifice purchased by the hire of a harlot, is sufficiently refuted by the objection that this would refer to a state of matters so grossly sinful as could not be thought of among Christians. Undoubtedly the only proper course is to bring into view the greater freedom of intercourse between the sexes that prevailed among the Greeks and Romans, which was an abomination to the more serious Jews, and appeared to them, in fact, a refined species of harlotry. By the word in question, therefore, which comprehends not only gross violations of the seventh commandment, but also more polished sins of this kind, the assembled brethren enjoin upon the heathen Christians greater care and circumspection in their intercourse with the female sex, that they might give no offence to the Jewish Christians (Olshausen, *Comment.* in loc. iii, 336, Am. ed.). Another reason for the insertion of this rule respecting chastity probably was the shameless violation of purity that every where took place in connection with the pagan festivals, and constituted an additional reason for a total disconnection with all idolatrous rites (Conybeare and Howson, *St. Paul*, i, 217). See Schaff, *Apost. Church*, § 69; and FORNICATION.

Among special treatises on this subject are the following: Bagge, Περὶ ἀλισγημάτων (Jen. 1748); Benzel, *De decreto apostolico* (Lund. 1738); Dannhauer, Διατύπωσις *concilii Hieros.* (Argent. 1648); Deyling, *De πορνείᾳ vetita* (in his *Obss. sacr.* ii, 469 sq.); Döderlein, *De sensu decreti apost.* (Bützov. 1769 sq.); Dorscheus, *De sanguine et suffocato* (Rostock, 1683); Hasaeus, *id.* (Brem. 1703); Moebius, *id.* (Lips. 1688); Hannecken, *De sanguine escario* (Giess. 1673); Heidegger, *In concil. Hieros.* (Tigur. 1678); id. *De sanguine et suffocato* (Amst. 1662); Langguth, *De concil. apost. canone* (Erf. 1681); Leonhard, *De decreto conc. Hieros.* (Jen. 1725); Nitzsch, *De decreto apostolico* (Viteb. 1795; also in Vel-

thusenii *Comment.* vi, 385–418); Nösselt, *De conc. Hieros.* (Lips. 1678); Schöttgen, *De ritibus in synode Hieros. prohibitis* (Starg. 1723); Velthern, *Hist. conc. Hieros.* (Jen. 1693); Wandalin, *Circa sanguinem escarium* (Viteb. 1678); Carpzov, *De controversiis theologicis* (Lips. 1695); Kripner, *De esca idolis immolatorum* (Jen. 1720); Crusius, *De lege Mosaica inter Christianos* (Lips. 1770); Weemse, *The seven Precepts of Noah* (in his *Exposition*, ii, 40); Spencer, *De Legib. Hebr.* i; Barrington, *Works*, ii, 265; Nind, *Sermons*, ii, 27; Wedgewood, *Decrees of the holy Apostles* (Lond. 1851). See COUNCIL OF APOSTLES.

DECREES OF GOD. See PREDESTINATION.

Decretals, letters from the popes of Rome *deciding* points of ecclesiastical law. For the history and collection of the decretals, see CANON LAW; CLEMENTINES. The decretals compose the chief part of the canon law.

DECRETALS, PSEUDO-ISIDORIAN. By this name a collection of spurious letters of popes is designated. They were first brought into use in the 9th century, in connection with the so-called Spanish collection of canons and decrees. See CANONS. The author of this collection placed at its head a spurious preface of Isidore Mercator (according to some manuscripts, *Peccator*), and for this reason they were ascribed, as early as the 9th century, to Isidore of Seville (q. v.). During the Middle Ages they were generally considered genuine, but in the 15th century doubts of their genuineness were expressed by Nicholas de Cusa [see CUSA] and others, and in the 16th the Magdeburg centuriators (q. v.) and other Protestant historians so conclusively established their spuriousness that it is now admitted even by Roman Catholic writers. The birth-place, age, author, and motives of these letters are still controverted questions, and have called forth a large number of thorough investigations, by which several important points have been established with a high degree of probability. There is a large number of manuscripts (more than fifty) of this collection extant, and it is believed that a more careful study and comparison of them will lead to new results. The order of the documents, according to Codex Vaticanus (No. 630), a manuscript of the 12th century, is as follows: The preface is followed by a letter of Aurelius to Damasus, and the answer of the latter, both spurious; the *Ordo de celebrando concilio*, borrowed from the fourth Council of Toledo; a list of councils, and a spurious correspondence between Jerome and Damasus. Then begins Part I, consisting of 50 apostolic canons; 59 spurious letters of the popes, from Clement to Melchiades (in chronological order); a treatise, *De primitiva ecclesia et synodo Nicæna*, and the spurious *Donation* of Constantine. Part II begins with a section of the preface of the genuine Spanish collection of canons, and another section of the collection of Quesnel, and contains the Greek, African, Gallic, and Spanish councils, agreeing in all essential points with the Spanish collection. Part III begins likewise with a section of the preface of the genuine collection, which is followed by the decretals of the popes from Sylvester to Gregory II († 731); among them 35 spurious ones. The total number of spurious decretals in the collection is 94. Whether all of them belonged to the original collection, or whether a part were of later manufacture, is still a controverted point. The sources used by the compiler are the works of Cassiodorus and Rufinus, the *Liber Pontificalis*, the *Vulgata*, the works of the fathers, the theological literature up to the 9th century, the genuine decretals and decrees of councils, the so-called *Capitula Angilrami* (q. v.), and the Roman law collection, especially the Visigothic *Breviarium Alaricianum* (see Knust, *de fontibus et consilio Ps. Isidoriancæ collectionis*, Gottingen, 1832). The opinion of Rosshirt (*Zu den kirchenrechtlichen Quellen des ersten Jahrtausends und zu den pseudo-isidorischen Decretalen*, Heidelberg, 1849) that the compilers used many more sources than are now known, and that most of the papal letters which are now generally considered as spurious were probably taken from other collections, has not met with much approval.

As this collection was used by the popes with great effect to amplify their power over the bishops, it was long a common opinion that the compilers aimed chiefly at confirming and enlarging the papal power; but this opinion is now universally abandoned. Others, especially modern Roman Catholic writers, as Möhler, Walter, and Hefele, attribute to the falsifier the "wish to put an end to the confusion and servitude of the Church, and the uncertainty of law in his times, by introducing a uniform code of ecclesiastical discipline, clothed with the prestige of antiquity." The most common opinion at present is that the compiler wished to free the episcopal power from dependence on the state, and to weaken, for the same purpose, the influence of the metropolitans and provincial synods. With regard to the time of the compilation, it has been established with certainty that it falls between 829 and 857. The author is not yet known. Benedict Levita, Otgar, archbishop of Mainz, and others, have been assumed. The place where it was compiled was most probably the western part of the Frankish empire. The first mention of the collection is made in the proceedings of the Synod of Chiersy, in 857; and a few years later pope Nicholas I used it efficiently in his controversy with Hincmar, archbishop of Rheims. After the end of the 9th century numerous extracts were made, and they were received into all the large collections of canons [see CANONS] made during the Middle Ages. As regards the *influence* of the false decretals, it has been overrated by those who believe that the primacy of the Roman popes is *mainly* due to this vast fraud; and, on the other hand, it is underrated by the Roman Catholic writers, who maintain that the pseudo-decretals produced no change in the discipline of the Church, and were only an expression of the tendencies of those times, which, without them, would have been developed in the same manner. The truth, as has been already intimated, probably is, that the pseudo-decretals were compiled for the purpose of furthering episcopal tendencies, in opposition to the rights of metropolitans and provincial synods, but that they also greatly contributed to the development of the Roman primacy, and were unscrupulously used by the popes for this purpose.

There are two editions of the false decretals, the first in the Collection of Councils by Merlin (tom. i, Paris, 1523), and the second in Migne's *Patrologia Lat.* tom. cxxx (Paris), which is only a reprint of the former. See Ballerini (*Opp. Leon.* tom. iii, p. ccxv, ss.); Theiner, *De pseudoisidoriana canonum collectione* (Bresl. 1826); Wasserschleben, *Beiträge zur Geschichte der falschen Decretalen* (Breslau, 1844); Möhler, *aus und über Pseudoisidor* (in his *Gesammelte Schriften*, Regensb. 1838, vol. i); Gfrörer, *Pseudoisidor* (in *Freiburger Zeitschrift für Theologie*, vol. xvii); Weizsäcker, *Hincmar und Pseudoisidor* (in *Zeitschrift für theologische Literatur*, 1858); and the *Manuals of Ecclesiastical Law* by Richter, Walter, Rosshirt, Phillips, and others.

Decuriōnes, magistrates in the Roman provinces, who formed a body to represent the Roman Senate in free and corporate towns. Each *decurion* consisted of ten persons; and their duty was to watch over the interests of their fellow-citizens, and to increase the revenues of the commonwealth. The early Church was compelled to make laws to prevent the ordination of any man of this class as a presbyter or deacon. Instances had occurred in which presbyters had been compelled, after thirty years' service as ministers of Christ, to resume their *curial* offices. In some cases, after ordination, they were required to serve as *flamens*, and were crowned as heathen priests, while they exhibited the public games and shows to the people.

The law forbidding the ordination of such persons was enacted to prevent this scandal.—Bingham, *Orig. Eccl.* bk. iv, ch. iv, § 4.

De'dan (Heb. *Dedan'*, דְּדָן, according to Gesenius, *Thes. Heb.* p. 322, from the Arab. signifying *sport;* according to Fürst, *Hebr. Handw.* p. 288, by reduplication from דָּן, in the sense of *deep;* in Ezek. xxv, 13, with ה local or paragogic, *Deda'neh*, דְּדָנָה, "they of Dedan"), the name of one or two men or tribal progenitors. See also DODANIM.

1. (Sept. Δαδάν, Δαιδάν.) A son of Raamah, son of Cush (Gen. x, 7; 1 Chron. i, 9, "the sons of Raamah, Sheba, and Dedan"). B.C. considerably post 2513. See CUSH. His descendants are perhaps mentioned by Isaiah (xxi, 13) and Ezekiel (xxvii, 15, Sept. Ῥοδίων v. r. Ἀραδίων; 20, Sept. Δαιδάν v. r. Δεδάν; xxxviii, 13, Sept. Δαιδάν; xxv, 13, Sept. Δεδάν or Δαιδάν v. r. διωκόμενοι). See below.

2. (Sept. Δαιδάν, v. r. in Jer. xlix, 8, Δαιδάμ.) A son of Jokshan (1 Chron. i, 32), son of Keturah (Gen. xxv, 3: "Jokshan begat Sheba and Dedan; and the sons of Dedan were Asshurim, Letushim, and Leummim"). B.C. post 1988. The usual opinion respecting this and the preceding founder of tribes is that the first settled among the sons of Cush, probably on the borders of the Persian Gulf; the second on the Syrian borders, about the territory of Edom (Michaelis, *Spicileg.* i, 201 sq.). But Vater (*Comment.* i, 120, followed by Gesenius, *Thes. Heb.* p. 322) has suggested that the name may apply to one tribe, and this may be adopted as probable on the supposition that the descendants of the Keturahite Dedan intermarried with those of the Cushite Dedan. See ARABIA. The theory of this mixed descent gains weight from the fact that in each case the brother of Dedan is named Sheba. It may be supposed that the Dedanites were among the chief traders traversing the caravan-route from the head of the Persian Gulf to the south of Palestine, bearing merchandise of India, and possibly of Southern Arabia, and hence the mixture of such a tribe with another of different (and Keturahite) descent presents no impossibility. The passages in the Bible in which Dedan is mentioned (besides the genealogies above referred to) are contained in the prophecies of Isaiah, Jeremiah, and Ezekiel, and are in every case obscure. The Edomitish settlers seem to be referred to in Jer. xlix, 8, where Dedan is mentioned in the prophecy against Edom; again in xxv, 23, with Tema and Buz; in Ezek. xxv, 13, with Teman, in the prophecy against Edom; and in Isa. xxi, 13 ("The burden upon Arabia. In the forest in Arabia shall ye lodge, O ye travelling companies of Dedanim"), with Tema and Kedar. This last passage is by some understood to refer to caravans of the Cushite Dedan; and although it may only signify the wandering propensities of a nomad tribe, such as the Edomitish portion of Dedan may have been, the supposition that it means merchant-caravans is strengthened by the remarkable words of Ezekiêl in the lamentation for Tyre. This chapter (xxvii) twice mentions Dedan; first in ver. 15, where, after enumerating among the traffickers with the merchant-city many Asiatic peoples, it is said, "The children of Dedan were thy merchants, many isles (אִיִּים) were the merchandise of thine hand: they brought thee for a present horns of ivory, and ebony." Passing thence to Syria and western and northern peoples, the prophet again (in ver. 20) mentions Dedan in a manner which seems to point to the wide spread and possibly the mixed ancestry of this tribe. Ver. 15 may be presumed to allude especially to the *Cushite* Dedan (comp. ch. xxxviii, 13, where we find Dedan with Sheba and the merchants of Tarshish; apparently, from the context, the Dedan of chap. xxvii, 15); but the passage commencing in v. 20 appears to include the settlers on the borders of Edom (i. e. the Keturahite Dedan). The whole of the passage is as follows: "Dedan [was] thy merchant in precious clothes for chariots. Arabia, and all the princes of Kedar, they occupied with thee in lambs, and rams, and goats: in these [were they] thy merchants. The merchants of *Sheba and Raamah* they [were] thy merchants: they occupied in thy fairs with chief of all spices, and with all precious stones, and gold. Haran, and Canneh, and Eden, the merchants of *Sheba*, Asshur, [and] Chilmad, [were] thy merchants" (Ezek. xxvii, 20–23). We have here a Dedan connected with Arabia (probably the northwestern part of the peninsula) and Kedar, and also with the father and brother of the Cushite Dedan (Raamah and Sheba), and these latter with Asiatic peoples commonly placed in the regions bordering the head of the Persian gulf. This Dedan, moreover, is a merchant, not in pastoral produce, in sheep and goats, but in "precious clothes," in contradistinction to Arabia and Kedar, like the far-off Eastern nations who came with "spices, and precious stones, and gold," "blue clothes and broidered work," and "chests of rich apparel."

The probable inferences from these mentions of Dedan support the argument first stated, namely, 1. That Dedan, son of Raamah, settled on the shores of the Persian gulf, and his descendants became caravan-merchants between that coast and Palestine. 2. That Jokshan, or a son of Jokshan, by intermarriage with the Cushite Dedan, formed a tribe of the same name, which appears to have had its chief settlement in the borders of Idumæa, and perhaps to have led a pastoral life.

All traces of the name of Dedan, whether in Idumæa or on the Persian gulf, are lost in the works of Arab geographers and historians. The Greek and Roman geographers, however, throw some light on the eastern settlement; and a native indication of the name is presumed to exist in the island of *Dádan*, on the borders of the gulf (see Bochart, *Phaleg*, iv, 6; Assemani, *Bibl. Orient.* III, i, 146, 153; ii, 184, 560, 564, 604, 744; Büsching, *Asia*, p. 562; Wahl, *Descr. Asiæ*, p. 639; Niebuhr, *Arabien*, p. 308 sq.; Heeren, *Ideen*, I, ii, 227, 419; Barbosa, *Ramusio raccolte*, i, 288). The identification must be taken in connection with the recovery of the name of Sheba, the other son of Raamah, on the island of Awál, near the Arabian shore of the same gulf. See RAAMAH.

Ded'anim (Heb. *Dedanim'*, דְּדָנִים, a patrial from *Dedan;* Sept. Δαιδάν), the descendants of the Arabian DEDAN (q. v.), spoken of (Isa. xxi, 13) as engaged in commerce. Some, however, following the various rendering of the versions (Michaelis, *Spicileg.* i, 115 sq.), have thought the *Rhodians* to be meant, and others have even conjectured an allusion to the *Dodona*, a famous oracle of Epirus (Strabo, vii, 504–7, ed. Almelon.).

Dedicate (prop. חָנַךְ, *chanak'*, to *initiate*, Deut. xx, 5; 1 Kings viii, 63; 2 Chron. vii, 5; elsewhere חִקְדִּישׁ, *hakdish'*, to *hallow*, and other Heb. terms), a religious ceremony whereby any thing is dedicated or consecrated to the service of God; and it appears to have originated in the desire *to commence*, with peculiar solemnity, the practical use and application of whatever had been set apart to the divine service. Thus Moses dedicated the tabernacle in the wilderness (Exod. xl; Num. vii); Solomon his Temple (1 Kings viii); the returned exiles theirs (Ezra vi, 16, 17); Herod his (Josephus, *Ant.* xv, 11, 6). The Maccabees, having cleansed the Temple from its pollutions under Antiochus Epiphanes, again dedicated the altar (1 Macc. iv, 52–59), and an annual festival was established in commemoration of the event. This feast was celebrated not only at Jerusalem, but everywhere throughout the country, in which respect it differed from the feasts of the Passover, Pentecost, and Tabernacles, which could only be observed at Jerusalem. See below.

Not only were sacred places thus dedicated, but some kind of dedicatory solemnity was observed with respect to cities, walls, gates, and even private houses (Deut. xx, 5; Psa. xxx, title; Neh. xii, 27). We may trace the continuance of these usages in the custom of consecrating or dedicating churches and chapels, and in the ceremonies connected with the "opening" of roads, markets, bridges, etc., and with the launching of ships. See CONSECRATION.

DEDICATION, THE FEAST OF THE (*τὰ ἐγκαίνια, the renewal*, John x, 22 [which the Sept. has in Num. vii, 10]; Vulg. *encænia*), the festival instituted to commemorate the purging of the Temple and the rebuilding of the altar after Judas Maccabæus had driven out the Syrians, B.C. 164 (1 Macc. iv, 52–59, where it is *ὁ ἐγκαινισμὸς τοῦ θυσιαστηρίου, the restoration of the altar*, because the old and profaned altar was then replaced; but in 2 Macc. x, 5, *ὁ καθαρισμὸς τοῦ ναοῦ, the purification of the Temple:* the modern Jews call it simply *chanukah'*, חֲנֻכָּה ["*dedication*," as occurs in Num. vii, 10, 11, 84, 88; 2 Chron. vii, 9; Neh. xii, 27; Psa. xxx, title; Ezra vi, 16, 17; Dan. iii, 2, 3], as in the *Mishna;* but Josephus, *Ant.* xii, 7, 7, styles it *φῶτα, lights*). The following account of it is chiefly from Rabbinical sources. See ANTIOCHUS EPIPHANES.

Mode in which this Festival was and still is celebrated. —It commenced on the 25th of Chisleu (see CALENDAR, JEWISH), and lasted eight days, but it did not require attendance at Jerusalem. (Jesus, however, was present there during this season, *χειμών*, or winter, John x, 20.) It was an occasion of much festivity. The Jews assembled in the Temple or in the synagogues of the places wherein they resided (*Rosh ha-Shana*, xviii, 2), carrying branches of trees and palms in their hands, and sang psalms to the God of their salvation. No fast or mourning on account of any calamity or bereavement was permitted to commence during the festival (Mishna, *Taanith*, ii, 10; *Moed Katon*, iii, 9); the Temple and all private houses were lighted up within and without by lanterns and torches every evening during the eight days in token of this joy (1 Macc. iv, 52-59; 2 Macc. x, 6, etc.; Mishna, *Baba Kama*, v, 6), for which reasons Josephus also calls it *λύχνων ἀνακαύσεις, the Feast of Lamps* (comp. *Ant.* xii, 7, 7, with *Apion.* ii, 39). Maimonides, in discoursing upon this subject, distinctly declares that "the lighting up of the lamps is a commandment from the scribes." "The order is," says he, "that every house should light one light, whether the inmates thereof be many or only one. He, however, who honors the injunction has as many lights as there are inmates in the house—he has a light for every man and woman. And he who respects it still more adds a light for every individual every night, so that if a house wherein are ten inmates began with ten lights, it would end with eighty" (Mishna, *Torah Hilchoth Megillah Ve-Chanukah*, sec. iv, p. 326, *b*). These lamps must be lighted immediately after sunset by the head of the family, who pronounces the three following benedictions: 1. "Blessed art thou, Lord our God, King of the world, who hast sanctified us with thy commandments, and enjoined upon us to light the lamps of the Feast of the Dedication." 2. "Blessed art thou, Lord our God, King of the world, who hast done wonders for our forefathers in those days about this time;" and, 3. "Blessed art thou, Lord our God, King of the world, who hast preserved us in life and health, and hast permitted us to see this day!" The third benediction, however, is only pronounced on the first day of this festival. The practice of illumination in connection with this festival is, as we have seen, of very old date, and was most probably suggested by the fact that "the lamps which were upon the candlestick" were lighted by the people at the restoration of the Temple service (1 Macc. iv, 50, 51), as well as by the natural feeling existing among most nations to have illuminations on occasions of great joy. The Egyptians also had a similar festival (Herod. ii, 62). Midrashim of very great antiquity, however, give another reason for this custom of lighting lamps. They tell us that "when the Maccabees went into the Temple after vanquishing the enemy, and wanted to light the candlestick, they could not find any oil, except one vial, and it was sealed with the ring of the high-priest, which assured them that it was not polluted, but it was just enough to light one day. Whereupon God, whose glory dwelleth in the heavens, blessed it, so that they were able to feed the lamps therewith for eight days. Wherefore the Maccabees and all the people, like one man, have ordained that these eight days should henceforth be days of joy and rejoicing, like the festivals ordained in the law, and that lamps should be lighted on those days, to make known the wondrous works which the God of the heavens hath wrought for them" (*Megillath Antiochus*, p. 145, ed. Jellinek; Talmud, *Sabbath*, 21, *b*). Now, whatever we may think about the embellishments of this story, it is not at all unlikely that a vial of oil was actually discovered in the Temple just at a time when it was most wanted, and that this is one of the reasons why the lighting of lamps has been instituted.

At every morning prayer during the whole of this festival, a portion of the 7th chapter of Numbers is read in the synagogue by the prelector, in accordance with a very old custom (Mishna, *Megilla*, iii, 6); thus, on the first day, Num. vii, 1–17, is read after the regular lesson of the Pentateuch, if it is a Sabbath, and the Haphtorah, or the portion from the Prophets, is Zech. ii; on the second, Num. vii, 18–23, is read, beginning with "On the second day," etc., and the same Haphtorah; on the third day, Num. vii, 24–29, and the same Haphtorah, and so on. In the Temple at Jerusalem, the "Hallel" was sung every day of the feast. Connected with this festival is the celebration of the exploits performed by Judith (q. v.) upon Holofernes, because, as some suppose, she was of the stock of the Maccabees. Hence some of the Midrashim which give the history of Judas Maccabæus mix up with it the history of Judith.

Modern Jews keep the feast of lights very strictly, but servile work is not forbidden to be done. The feast is observed as one of rejoicing for the wonders which God wrought for them. During the eight days, parents and children amuse themselves in different innocent games, particularly the last night, when neighbors and friends meet together to enjoy themselves. The Karaites, however, do not observe this festival, because it is an uninspired ordinance.

There are four other dedications of the Temple recorded:

1. The dedication of the Solomonic Temple (1 Kings viii, 2; 2 Chron. v, 3), which took place in the seventh month, or in the autumn. B.C. 1003. This was coincident with the *Feast of Tabernacles* (q. v.).

2. The dedication at the time of Hezekiah, when the Temple was purified from the abominations which his father Ahaz introduced into it (2 Chron. xxix). B.C. 726. See HEZEKIAH.

3. The dedication of Zerubbabel's Temple, built after the captivity (Ezra vi, 16), which took place in the month Adar, in the spring. B.C. 517.

4. The dedication of Herod's Temple (Josephus, *Ant.* xv, 11, 6). B.C. 22. Some of the fathers have therefore thought that Jesus is said to have gone to the celebration commemorative of the dedication of Solomon's Temple or of Zerubbabel's. The fact, however, that there was *no annual festival to commemorate these dedications*, and that the evangelist John distinctly says that it was *in the winter*, establishes it beyond doubt that our Lord went to the Feast of the Dedication instituted by Judas Maccabæus. See TEMPLE.

Literature.—Maimonides, *Mishna Torah*, or *Yad Ha-Chazaca; Hilchoth Megilla Ve-Chanukah*, sec. 3 and 4;

Megillath Antiochus, printed in Bartolocci, *Bibliotheca Magna*, i, 382, etc.; Midrash, *Le-Chanukah*, and Midrash, *Achar le-Chanukah*, published by Dr. Adolph Jellinek in *Beth ha-Midrash* (Leipzig, 1853), i, 132, etc. This volume also contains (p. 142, etc.) a reprint of *Megillath Antiochus*. See also the volumes quoted in this article, and in Fabricius, *Bibliog. Antiquar.* p. 419 sq. Likewise Otho, *Lex. Rab.* p. 238 sq.; Lightfoot and Wetstein, in loc. Joh.; Wähner, *De festo Encæniorum* (Helmst. 1715); Weber, *De Encæniis* (Lips. 1683); Venne, *De jure circa Encænia* (Erf. 1718); and the treatises *De Encæniis templorum*, by Dannenberger (Lips. 1754), Lincke (Altdorf, 1678), Lund (Upsal. 1706), Reich (Altdorf, 1713). See FESTIVALS.

Dedication of Churches. See CONSECRATION.

De Dieu. See DIEU, DE.

De Dominis. See DOMINIS, DE.

Deep (the representative in the A. V. of several Heb. words, especially תְּהוֹם, *tehom'*, Gen. i, 2, etc. an *abyss*, often rendered "depth;" ἄβυσσος, Luke viii, 31; Rom. x, 7, elsewhere "bottomless pit"). The deep, or the great deep, in its literal sense, signifies, chiefly in Scripture—1. Hell, the place of punishment, the bottomless pit (Luke viii, 31; Rev. ix, 1; xi, 7). 2. The common receptacle of the dead; the grave, the deep or depths of the earth, under which the body is deposited: the state of the soul corresponding thereto, still more unseen, still deeper, still further distant from human inspection, is that remote country, that "bourne from whence no traveller returns" (Rom. x, 7). 3. The deepest parts of the sea (Psa. lxix, 15; cvii, 26). 4. The chaos, which, in the beginning of the world, was unformed and vacant (Gen. i, 2). See ABYSS.

Deer. Although this word occurs in the English Bible only in the connection "FALLOW DEER" (q. v.), it properly represents several terms in the original, which are variously translated, and which denote widely different members of the antelope and cervic families. See CHAMOIS; GOAT; OX; PYGARG; ROE, etc. For the proper *deer* we find the following variations of the same word: *ayyal'* (אַיָּל, an intensive of אַיִל, q. d. a large *ram;* Sept. ἔλαφος), the male, always rendered "hart" (q. v.), occurs Deut. xii, 15, 22; xiv, 5; xv, 22; 1 Kings iv, 23; Psa. xlii, 1; Cant. ii, 9, 17; viii, 14; Isa. xxxv, 6; Lam. i, 6: *ayyalah'* (אַיָּלָה, Gen. xlix, 21; 2 Sam. xxii, 34; Job xxxix, 1; Psa. xviii, 33; xxix, 9; Cant. ii, 7; iii, 5; Hab. iii, 19), or *ayye'leth* (אַיֶּלֶת, Prov. v. 19; Jer. xiv, 5), the female, always rendered "hind" in our version (Sept. στέλεχος). Many recent writers, however, either suppose different species of antelope to be meant, or, with Dr. Shaw, consider the term to be generic for several species of deer taken together. Sir J. G. Wilkinson believes the *ayyal* to be the Ethiopian *oryx*, with nearly straight horns. See ANTELOPE. It should be observed, however, that an Ethiopian species could not well be meant where the clean animals fit for the food of the Hebrews are indicated, nor where allusion is made to suffering from thirst, and to high and rocky places as the refuge of females, or of both, since all the species of oryx inhabit the open plains, and are not remarkable for their desire of drinking; nor can either of these propensities be properly ascribed to the true antelopes, or gazellæ, of Arabia and Syria, all being residents of the plain and the desert; like the oryges, often seen at immense distances from water, and unwilling to venture into forests, where their velocity of flight and delicacy of structure impede and destroy them. Taking the older interpretation, and reviewing all the texts where hart and hind are mentioned, we find none where these objections truly apply. Animals of the stag kind prefer the security of forests, are always most robust in rocky mountain covers, and seek water with considerable anxiety; for of all the light-footed ruminants, they alone protrude the tongue when hard pressed in the chase. Now, comparing these qualities with several texts, we find them perfectly appropriate to the species of these genera alone. *Ayyal* appears to be a mutation of a common name with ἔλαφος; and although no great stress should be laid on names which, more particularly in early times, were used without much attention to specific identity, yet we find the Chaldee *ajal* and Sarmatic *jelen* strictly applied to stag. Hence the difficulty lay in the modern denial that ruminants with branched deciduous horns existed in the south-west of Asia and Egypt; and Cuvier for some time doubted, notwithstanding Virgil's notice, whether they were found in any part of Africa; nevertheless, though not abundant where water is rare, their existence from Morocco to the Nile, and beyond it, cannot be denied; and it is likely that an Asiatic species still appears sometimes in Syria, and, no doubt, was formerly common there (see the *Penny Cyclopædia*, s. v. Deer).

Barbary Deer.

1. The species usually referred to by the above Heb. terms is probably that now known by the name of *Cervus barbarus*, or Barbary stag, in size between the red and fallow deer, distinguished by the want of a bisantler, or second branch on the horns, reckoning from below, and by a spotted livery, which is effaced only in the third or fourth year. This species is figured on Egyptian monuments, is still occasionally seen about the natron lakes west of the Nile, and, it seems, has been observed by travellers in the desert east of the Dead Sea, on the route from Cairo towards Damascus. We take this to be the *igial* or *ajal* of the Arabs, the same which they accuse of eating fish—that is, the ceps, lizards, and snakes, a propensity common to other species, and similarly ascribed to the Virginian and Mexican deer.

2. Another species is the Persian stag, or *maral* of the Tahtar nations, and *gewazen* of Armenia, larger than the stag of Europe, clothed with a heavy mane, and likewise destitute of bisantlers. We believe this species to be the *soëgur* of Asiatic Turkey, and *mara* of the Arabs, and therefore residing on the borders of the mountain forests of Syria and Palestine. One or both of these species were dedicated to the local *bona dea* on Mount Libanus—a presumptive proof that deer were found in the vicinity.

Of the *hind* it is unnecessary to say more than that she is the female of the stag, or hart, and that in the manners of these animals the males are always the last to hurry into cover. See STAG.

Deering. See DERING.

Defence. This word, besides its ordinary and proper use, stands in the English Bible as a mistranslation of two Heb. terms.

1. *Matsor'* (מָצוֹר, in connection with יְאֹרִים, streams,

rendered in 2 Kings xix, 24, "rivers of *besieged places*," Sept. ποταμοὶ συνοχῆς, Vulg. *aquæ clausæ;* in Isa. xix, 6, "brooks of *defence*," Sept. ὀώρυγες τοῦ ποταμοῦ, Vulg. *rivi aggerum;* in Isa. xxxvii, 25, "rivers of the *besieged places*," Sept. ἀναγωγὴ ὕδατος, Vulg. *rivi aggerum*), a proper name for EGYPT, alluding to its *canals*, i. e. the branches of the Nile. The derivation of the term is obscure; perhaps it is only another application of the Heb. word of the same form, elsewhere signifying (literally *straitness*, hence) a *mound* or *fortification*, and applied to Egypt, especially Lower Egypt, as being strongly fortified, both by nature and art. See MAZOR.

2. *Be'tser* (בֶּצֶר), probably something *dug* out of a mine, occurring only in Job, and rendered in chap. xxii, 24, "gold," Sept. πέτρα, Vulg. *silex;* in ver. 25, "defence," Sept. βοηθὸς ἀπὸ ἐχθρῶν, Vulg. *contra hostes;* in chap. xxxvi, 19, "gold," Sept. δυνατὸς ἐν ἀνάγκῃ, Vulg. *tribulatio*), precious *ore*, i. e. of gold or silver, in its native state; an interpretation evidently required by the corresponding terms in the parallel members of the hemistichs where it occurs. See GOLD.

Defence of Christianity. See APOLOGY.

Defender of the Faith (*fidei defensor*), a title belonging to the sovereign of England, as *Catholicus* does to the king of Spain, and *Christianissimus* to the king of France. It was originally conferred by Leo X on Henry VIII for his work against Martin Luther; and the bull for it bears date *quinto idus Octob.* 1521. It was afterwards confirmed by Clement VII. On Henry's suppression of the monasteries, the pope of Rome deprived him of this title, and deposed him from his throne. The English Parliament (35 Henry VIII, ch. 3) confirmed the title, and it has ever since been used by English monarchs.

Defensor matrimonii, an officer of the Roman Church in every diocese, whose duty it is, in cases where a marriage is claimed to be null, to search for and produce the proofs of its validity, and to follow the case into any court to which it may be carried by appeal, with the right of originating such an appeal himself in cases where, through some defect in the proceedings or in the testimony, a verdict of nullification has been granted upon insufficient grounds. The office was instituted by Benedict XIV by his bulls of Aug. 26, 1741, and Nov. 3, 1741 (*Bullar. Magn.* tom. xvi, p. 41, 48).

Defile (denoted by several Heb. and Gr. words, especially טָמֵא, *tamè'*, μαίνω, denoting *filthiness*, but spoken chiefly in a figurative or ceremonial sense). Many were the blemishes of person and conduct which, under the Mosaic law, were esteemed defilements; some were voluntary, others involuntary; some originated with the party, others were received by him; some were inevitable and the effect of nature, others the consequences of personal transgression. Under the Gospel, defilements are those of the heart, of the mind, the temper, and the conduct. Moral defilements are as numerous, and as thoroughly prohibited under the Gospel as ever; but ceremonial defilements are superseded as requiring any religious rites, though many of them claim attention as usages of health, decency, and civility (Matt. xv, 18; Gen. xlix, 4; Rom. i, 24; James iii, 6; Ezek. xliii, 8). See POLLUTION.

Degerando. See GERANDO, DE.

Degradation, in ecclesiastical law, the act of depriving a clergyman of his orders, or the act of deposing an offender from a higher to a lower grade of office. In the case of bishops, this degradation consisted in removal from a larger and more important see to one smaller or less considerable. Presbyters were degraded to the rank of deacons, and deacons to that of subdeacons. This kind of punishment was also inflicted on bishops in Africa by superseding them in their expected succession to the office of archbishop or metropolitan. In later times, *degradation* implied privation of all authority and station. An instance of ecclesiastical degradation in the eighth century at Constantinople is recorded. The patriarch Constantine was made to ascend the *ambo;* he was stripped by the bishops of his pallium, and anathematized; he was then made to walk out of the church backwards. When Cranmer, archbishop of Canterbury, was degraded by order of queen Mary, his persecutors dressed him in episcopal robes made of canvas, put the mitre on his head, and the pastoral staff in his hand; and in this attire showed him to the people. They then stripped him piece by piece. On the Roman forms of degradation, see Elliott, *Delineation of Romanism*, bk. ii, ch. xv (Lond. edition); see also Bingham, *Orig. Eccl.* bk. xvii, ch. i, ii; *Canon* 122 *of Church of England;* Augusti, *Christl. Archæologie*, iii, 401, and the article DEPOSITION.

Degree is the rendering in the A. V. of one Heb. and one Gr. term (besides being employed as an adjunct in the phrases "man of high [or low] degree," where it has no [other] correspondent in the original), מַעֲלָה, *maälah'* (2 Kings xx, 9, 10, 11; Isa. xxxviii, 8, referring to the graduated scale of the dial [q. v.] of Ahaz, and in the titles of the Psalms entitled "Song of Degrees" [see below]; a *step*, as elsewhere generally rendered); βαθμός (only 1 Tim. iii, 13, *graduation* or promotion, etc. of a deacon [q. v.] to a higher office; or perhaps rather a spiritual *stand-point* or condition, see Alford, in loc.), a *step* (as of a staircase or door, Ecclus. vi, 36). See STAIRS.

DEGREES, SONG OF (שִׁיר הַמַּעֲלוֹת, *song of the steps;* Sept. ᾠδὴ τῶν ἀναβαθμῶν, Vulg. *canticum graduum*), a title given to fifteen Psalms, from cxx to cxxxiv inclusive. Four of them are attributed to David, one is ascribed to the pen of Solomon, and the other ten give no indication of their author. Eichhorn supposes them all to be the work of one and the same bard (*Einl. in das A. T.*), on the view adopted by many that the indications of authorship in these titles are not trustworthy, since they appear to have been added by a later hand, and in any case "the very same phraseology would be employed to denote a hymn composed *in honor* of David or of Solomon" (Marks's *Sermons*, i, 208-9). The most generally accredited opinion, however, is that some of these hymns were preserved from a period anterior to the Babylonish captivity; that others were composed in the same spirit by those who returned to Palestine, on the conquest of Babylon by Cyrus, and that a few refer even to a later date, but were all incorporated into one collection, because they had one and the same character. This view is adopted by Rosenmüller, Herder, Mendelssohn, Joel Brill, and others. With respect to the term מַעֲלוֹת, or "degrees," a great diversity of opinion prevails among Biblical critics. 1. According to some, it refers to the melody to which the Psalm was to be chanted. Bellermann (*Metrik der Hebräer*, p. 190 sq.) calls these Psalms "trochaic songs." Luther translates the words "Ein Lied im höhern Chor," thus connecting the Psalm with the manner of its execution; and Michaelis (in Lowth, *De Sacri Poësi*, p. 511) compares מעלה with the Syriac שכלתא (Scala), which would likewise characterize the metre or the melody (Assem. *Bibl.* i, 62); but Gesenius (*Ephemerid.* Hal. 1812, No. 205) denies to the Hebrews any metrical prosody. See POETRY, HEBREW. It is thought that the poetry of the Syrians may hereafter throw some light upon this title, as of the eight species of verse which they distinguish, one is called *gradus, scalæ*, degrees, like these Psalms, and the name appears to refer to a particular kind of metre (see *Ephem. litt.* Hal. 1815, No. 11); but what that metre is, and whether it exists in the Psalms bearing this title, we have not yet the means of determining. 2. On slight

grounds, also, some refer the name *Shir ham-Maaloth* —song of degrees—to the argument of the Psalms, and translate *songs of ascent*, or *odes of ascension*, supposing them to have been sung by the Israelites while returning from exile (Ezra vii, 9), or on their annual journeys to Jerusalem in order to celebrate the festivals: hence some understand *sacred marches*, or *pilgrim songs;* but this would only apply to two of them (Psa. cxxii, cxxvi). Such, however, is the opinion of Herder (*Geiste der hebräischer Poesie*), who interprets the title "Hymns for a journey." This view is advocated at length by Hengstenberg (*Comment. on Psalms*, iii, 406, Edinb. ed.), and has been adopted by several later critics. 3. Aben Ezra quotes an ancient authority (so Kimchi, Saadias, Jarchi, etc. explain), which maintains that the *degrees* allude to the fifteen steps which, in the Temple of Jerusalem, led from the court of the women to that of the men, and on each of which steps one of the fifteen songs of degrees was chanted (comp. Talmud, *Middoth*, ii, 5; *Succa*, v, 4). Adam Clarke (*Comment.* on Psa. cxx) refers to a similar opinion as found in the Apocryphal *Gospel of the birth of Mary:* "Her parents brought her to the Temple, and set her upon one of the steps. Now there are fifteen steps about the Temple, by which they go up to it, according to the fifteen Psalms of degrees." See Temple. 4. The most probable interpretation, however, is that adopted by Gesenius (*Thes. Heb.* p. 1031 sq.), that they are so called from a certain rhythm obvious in several of them, by which the sense, as it were, *ascends* by *degrees* or *steps*, the first or last words of a preceding clause being often repeated at the beginning of the succeeding one (see *Jour. Sac. Lit.* October, 1854, p. 39 sq.). Thus, in Psa. cxxi:

1. I will lift up mine eyes unto the hills,
   From whence cometh *my help.*
2. *My help* cometh from the Lord,
   Who made heaven and earth.
3. He will not suffer thy foot to be moved;
   Thy *keeper* will *not slumber.*
4. Lo, *not slumber* nor sleep will the
   keeper of Israel.
5. Jehovah is thy *keeper*, etc.

Compare also Psa. cxxii, 2–4; cxxiii, 3, 4; cxxiv, 1–5; cxxvi, 2, 3; cxxix, 1, 2. To the same class belongs also the song of Deborah (Judg. v, 3–30). This view is followed by De Wette (*Einl. in das A. T.* p. 289) and others. See Tiling, *Disquisitio de inscriptione*, שִׁיר הַמַּעֲלוֹת (Brem. 1765); Clarisse, *Psalmi quindecim Hammaäloth* (L. B. 1819); Sticht, *De Psalmis Hammaloth* (Altona, 1766). See Psalms.

Degrees (French *degré*, from Lat. *gradus*, a step), titles of rank to which are annexed privileges, conferred upon students in colleges and universities, or upon members thereof, as a testimony of their proficiency in the arts and sciences. The term "Arts," or "Liberal Arts," as technically applied to certain studies, came into use during the Middle Ages, and on the establishment of universities, the term "Faculty of Arts" denoted those who devoted themselves to science and philosophy as distinguished from the faculty of theology, and afterwards of medicine and law. The number of "arts" embraced in the full mediæval course of learning was seven: Grammar, Logic, Rhetoric (constituting the *Trivium*), Music, Arithmetic, Geometry, and Rhetoric (the *Quadrivium*). The terms master and doctor were originally applied synonymously to any person engaged in teaching. In process of time, the one was restricted to the liberal arts, the other to divinity, law, and medicine. When regulations were established to prevent unqualified persons from teaching, and an initiatory stage of discipline was prescribed, these terms became significant of a certain rank, and of the possession of certain powers, and were called *gradus*, "steps" or "degrees." The passing of the initiatory stage, said to have been first instituted by Gregory IX (1227–41), conferred the title of *bachelor* (q. v.), and an additional course of discipline and examination was necessary to obtaining that of *master*. The title of Master of Arts originally implied the right, and even the duty of publicly teaching some of the branches included in the faculty of arts; a custom which is still retained, to some extent, in the German universities, but has fallen into disuse in other countries. The degrees of D.D. (*doctor divinitatis*), S.T.D. (*sacræ theologiæ doctor*), and LL.D. (*doctor utriusque legum*), are conferred, *honoris causâ*, by colleges and universities, upon persons held to be worthy of them, whether members of the said institutions of learning or not. The see of Rome claims a universal academical power, and the Pope confers the doctor's degree at pleasure. See Kirkpatrick, *Historically received Conception of the University;* Newman, *Office and Work of Universities*, p. 241; Tholuck, in Herzog's *Real-Encyklopädie*, xvi, 722; and the article Doctor.

Deha'vites (Chald. *Dehaye'*, דְּהָיֵא, or *Dehave'*, דְּהָוֵא, Sept. Δαναῖοι, Vulg. *Dievi*), one of the Assyrian tribes from which a colony was led out by Asnapper to repopulate Samaria, and who there joined their neighbors in opposing the reconstruction of the Temple at Jerusalem (Ezra iv, 9). These *Dahi* were probably the Δάοι, *Daï* (Herod. i, 125), a nomade Persian tribe east of the Caspian Sea (Ammian. Marc. xx, 8, p. 300, ed. Bip.), in the neighborhood of the Mardians, or Hyrcanians (Strabo, xi, 508, 511; Pliny, vi, 19; xxxvii, 33; Solin. xx), towards Margiana (Ptol. vi, 10), under the rule of Darius (Curt. iv, 126), and later of Alexander (Curt. viii, 14, 5; ix, 2, 24) and his successors (Livy, xxvii, 40). This people appears to have been widely diffused, being found as *Dahæ* (Δάαι) both in the country east of the Caspian (Strab. xi, 8, 2; Arrian, *Exped. Al.* iii, 11, etc.), and in the vicinity of the Sea of Azof (Strab. xi, 9, 3); and again as *Dihi* (Δῖοι, Thucyd. ii, 96), or *Daci* (Δακοί, Strab., D. Cass., etc.), upon the Danube. Their name perhaps survives in the present district *Daghestan*. They were an Arian race, and are regarded by some as having their lineal descendants in the modern *Danes* (see Grimm's *Geschicht. der Deutsch. Sprach.* i, 192–3). The name is derived from the Persian *dah*, "a village;" Dehavites will therefore be equivalent to the Latin "Rustici." Their love of war and plunder induced them to serve as mercenaries under various princes (Arrian, iii, 11; v, 12); and their valor has immortalized them in the pages of Virgil as "indomiti Dahæ" (*Æn.* viii, 728). A band of them had doubtless entered the service of the Persian monarch, followed him to Palestine, and received for their reward grants of land in Samaria (Stephanus Byzant. s. v.; Ritter, *Erdkunde*, vii, 668; Rawlinson's *Herodotus*, i, 338).

Dehon, Theodore, D.D., bishop of the Protestant Episcopal Church in the diocese of South Carolina, was born in Boston, Mass., in Dec., 1776. His early education was obtained in the public school, where, for some years, he stood at the head of his class. In 1791 he entered Harvard University, where he graduated with the highest honors in 1795. He at once commenced his preparation for the ministry, for which, from early childhood, he had evinced a strong inclination. In 1797 he was ordained, and soon became the rector of Trinity Church, Newport, R. I., where he remained until 1810, when he was compelled, by failing health, to seek a milder climate. An invitation to the rectorship of St. Michael's Church, Charleston, S. C., was accepted. In this charge, as at Newport, he was loved and revered by all classes. In 1812 he was elected bishop of the diocese of South Carolina, to which office he was solemnly set apart, in Philadelphia, by the venerable Bishop White. He continued in the rectorship of his church, and performed its duties and those of the bishopric, with eminent zeal, discretion, and success, until he fell a victim to yellow fever in August, 1817. At the request of the vestry of St. Michael's, he was buried beneath its chancel. His

sermons, in two volumes, have passed through two editions in this country, and through three in England. They are models of practical pulpit discourse. See *Memoir by Rev. Dr. Gadsden*, and *Pref. to 2d edit. Sermons*, vol. i; also Sprague, *Annals*, v, 425.

Dei Gratia (Lat. *by the grace of God*) is a formula used by bishops and monarchs. "Felix of Rome (A.D. 356) styled himself *episcopus per Dei gratiam*. Afterwards it came to be appended by archbishops, bishops, abbots, abbesses, deans, monks, and even chaplains, to their titles in letters and other documents, as an expression of dependence. After the middle of the 13th century, when the sanction of the pope began to be considered necessary to ecclesiastical offices, the higher clergy wrote *Dei et Apostolicæ sedis gratiâ*, 'by the favor of God and the apostolic see.' At a later period many of them preferred to write *miseratione divinâ, permissione divinâ*, and the like; but they still continued to be styled by others *Dei gratiâ*. In the British Islands this style was generally dropped about the time of the Reformation, but it was occasionally given to the archbishops of Canterbury and York even after the beginning of the 17th century. Beginning with the times of the Carlovingians, many temporal princes, earls, and barons made use of the formula Dei Gratiâ; and before the 15th century no idea of independence or of divine right seems to have attached to it. But in 1442, king Charles VII of France forbade its use by the Comte d'Armagnac, and in 1449 obliged the duke of Burgundy to declare that he used it without prejudice to the rights of the French crown. These instances show that it had now begun to be regarded as belonging exclusively to sovereigns who owed no allegiance to any other earthly potentate or power. In this way, what was originally a pious expression of humility came to be looked upon as an assertion of the doctrine of the 'divine right' of kings."

Deipāra, mother of God, a title applied to Mary, the mother of Christ, at the Council of Nicæa. See Theotokos.

Deism (from *Deus*, God) properly means the belief in the existence of a supreme intelligent First Cause, in opposition to Atheism. It is now, however, applied to that form of infidelity which professes to believe the existence of a personal God, but denies his revelation. The word Deism is, at bottom, the same as *Theism* (from Θεὸς, God); but a distinction in practical use has arisen between them. Des Prades calls Theism the faith of reason, which precedes all revelation; but, on the other hand, designates by Deism the faith *in* reason which contests revelation. In more modern times, an arbitrary distinction between the two terms mentioned has been adopted by the usage of scientific language in Germany, according to which Deism is the doctrine of God's relation to the world, which represents God as not only different, but also as separated from the world, therefore as only in an external relation to it; on the other hand, Theism would be the doctrine which represents God as holding an internal and real relation to the world. Kant makes the distinction between a deist and a theist as follows: the *deist*, he says, believes in a God, but the *theist* in a living God. "About the middle of the 16th century the title was arrogantly assumed by those who professed to believe in a God, while they refused to acknowledge any revelation of his will. They set up in opposition to Christianity what they are pleased to call 'natural religion,' but never agreed upon the articles of faith which it taught, or the practical duties which it required. Deism, in effect, is a rejection of all known religions, supplying nothing in their place, but leaving the mind to doubt and darkness. But the friends of Christianity have no reason to regret the free and unreserved discussion which their religion has undergone. The cavils and objections of the deists have been fairly heard and fully answered; but for their opposition we should not have had such a vast mass of Christian evidences as has been collected by the pious and learned; evidences which, while they prove the truths of Christianity, so illustrate its doctrines as to be of lasting service to the cause of genuine religion and the best interests of mankind" (Eden). The ground taken by the English deists was substantially the naturalistic, viz. that the Gospel history was the product of an invention imposed upon the world by its authors.

Lord Herbert of Cherbury (born 1581, died 1648) has been regarded as the first deistical writer in England, or at least the first who reduced Deism to a system, affirming the sufficiency of reason and natural religion, and rejecting divine revelation as unnecessary and superfluous. His system, taught in his *De Veritate* and *De Religione Laici*, embraced these five articles: 1, The being of God; 2, that he is to be worshipped; 3, that piety and moral virtue are the chief parts of worship; 4, that God will pardon our faults on repentance; and, 5, that there is a future state of rewards and punishment. See Herbert of Cherbury. Hobbes († 1680), deriving all knowledge from the senses, taught a lower, but more logical form of Deism than Herbert, and one less calculated to do harm, as his system obviously subverts ordinary morality. See Hobbes. Charles Blount († 1693) published a translation of Philostratus's *Life of Apollonius Tyanæus*, with the same purpose as that of Hierocles in the 4th century, viz. to contrast the character and history of Christ disadvantageously with that of Apollonius. After his death appeared his *Oracle of Reason* (1695), explaining the "Deists' Religion." John Toland († 1722), in his *Christianity not Mysterious* (1696), asserted the capacity and supremacy of reason (anticipating the modern Rationalism [q. v.]), and also, in his *Amyntor* (1699), threw doubt upon the Canon. The theory that Christ was an ordinary man, whose followers elevated him to the imaginary dignity of a divine being, had been started by the early opponents of Christianity—Celsus, Porphyry, and Julian. It was revived by Woolston († 1733) (q. v.), in his *Six Discourses on the Miracles* (1727), and by Tyndal (q. v.) in his *Christianity as old as the Creation* (1730). Tyndal was followed by Chubb, *True Gospel of Christ* (1748), and other writings [see Chubb]; and by Morgan, *The Moral Philosopher*, and other works. These views were disseminated among the higher classes in England by Bolingbroke and Shaftesbury, and at a later period, in the form of complete scepticism, by Hume and Gibbon. Among the illiterate, Thomas Paine (q. v.) was the great propagator of Deism. The progress of vulgar Deism among the higher classes was arrested by Butler's immortal *Analogy* [see Butler], and among the lower, to a large extent, by the rise and progress of Methodism.

In France, the English Deism was adopted and diffused by Voltaire and the Encyclopedists (q. v.); but it soon became frivolous, immoral, and, in fact, atheistic. In Germany, the same seed sprang up in the 18th century in the theories which gave rise to the modern Rationalism (q.v.). "The deistical movement, if viewed as a whole, is obsolete. If the same doubts are now repeated, they do not recur in the same form, but are connected with new forms of philosophy, and altered by contact with more recent criticism. In the present day sceptics would believe less than the deists, or believe more, both in philosophy and in criticism. In philosophy, the fact that the same difficulties occur in natural religion as well as in revealed, would now throw them back from Monotheism into Atheism or Pantheism; while the mysteries of revelation, which by a rough criticism were then denied, would be now conceded and explained away as psychological peculiarities of races or individuals. In criticism, the delicate examination of the sacred liter-

ature would now prevent both the revival of the cold, unimaginative want of appreciation of its extreme literary beauty, and the hasty imputation of the charge of literary forgery against the authors of the documents. In the deist controversy, the whole question turned upon the differences and respective degrees of obligation of natural and revealed religion, moral and positive duties; the deist conceding the one, denying the other. The permanent contribution to thought made by the controversy consisted in turning attention from abstract theology to psychological, from metaphysical disquisitions on the nature of God to ethical consideration of the moral scheme of redemption for man. Theology came forth from the conflict, reconsidered from the psychological point of view, and readjusted to meet the doubts which the new form of philosophy—psychology and ethics—might suggest. The attack of revealed religion by reason awoke the defence, and no period in Church history is so remarkable for works on the Christian evidences—grand monuments of mind and industry. The works of defenders are marked by the adoption of the same basis of reason as their opponents, and hence the topics which they illustrate have a permanent philosophical value, though their special utility as arguments be lessened by the alteration in the point of view now assumed by free thought" (Farrar, *Critical History of Free Thought*, lect. iv).

The aim of honest deists has professedly been to maintain the doctrine of a Personal God; and they have asserted and assumed that this doctrine can be better and more surely vindicated apart from what they call the entanglements of Christian faith than in connection with them. But the history of thought, in the last century especially, shows that Deism, or belief in a Personal God apart from Christianity, gives way steadily before the assaults of Pantheism and Positivism. No robust faith has ever sprung out of Deism. The so-called spiritualistic writers of France have contended nobly (e. g. Cousin, Saisset, and others) against Materialism; but their task of upholding Theism in France has devolved now almost wholly upon Christian thinkers.

A succinct account of the English deists and their principles will be found in Van Mildert, *Boyle Lecture*, sermon x; Lechler, *Geschichte d. englisch. Deismus* (1841). See also Leland, *View of deistical Writers* (new ed. by Edmonds, Lond. 1837, 8vo); Noack, *Die Freidenker in der Religion* (Bern. 1853-55, 3 vols.; vol. i treats of the "English Deists," vol. ii of the "French Freethinkers," vol. iii of the "German Enlightenment"); Farrar, *Critical History of Free Thought* (Oxf. 1863, 8vo; repub. Boston, 1863, 12mo); Hurst, *History of Rationalism*, chap. xix; Hagenbach, *Hist. of Doctrines*, § 238; Dorner, *Geschichte d. protest. Theologie* (1867), p. 487; Liddon, *Bampton Lecture*, 1867. Compare the articles INFIDELITY; RATIONALISM. For the writers against Deism, see APOLOGETICS; APOLOGY; EVIDENCES.

Deity, a name of the Supreme Being, from the Latin *Deus*, God. It was originally an abstract term, and thence transferred to signify, in a concrete sense, Him whom we call GOD.

DEITY OF JESUS CHRIST. "In the use of this phrase concerning our Lord we mean to assert that he was 'the very and eternal God.' It is a more proper expression than 'the *divinity* of Christ,' since this latter does not necessarily imply anything more of our Lord's nature than that it was god*like*, or of heavenly origin; whereas the term 'Deity' contains in it the notion of essential Godhead. The other expression, however, has prevailed, on account of the word 'Deity' having come to be so commonly used as the concrete instead of the abstract sense, to denote a divine *Being*."—Eden, *Churchman's Dictionary*, s. v. See CHRISTOLOGY; TRINITY.

De'kar (Heb. *De'ker*, דֶּקֶר, a *thrusting* through), the father of Solomon's purveyor in the second royal district (1 Kings iv, 9), from which passage it appears that his son BEN-DEKER (בֶּן־דֶּקֶר; Sept. *υἱὸς Δακάρ*; Vulg. *Bendecar*) was the royal commissariat officer in the western part of the hill-country of Judah and Benjamin, Shaalbim and Bethshemesh. B.C. ante 1014.

De la Mennais. See LA MENNAIS.

Delaï'ah (Heb. *Delayah'*, דְּלָיָה, *freed by Jehovah*; also in the prolonged form *Delaya'hu*, דְּלָיָהוּ, 1 Chron. xxiv, 18; Jer. xxxvi, 12, 25; comp. *ἀπελεύθερος Κυρίου*, 1 Cor. vii, 22; also the Phœnician name *Δελαιαστάρτος*, quoted from Menander by Josephus, *Ap.* i, 18, and the modern name Godfrey = Gottesfrey), the name of several men.

1. (Sept. *Δαλαΐας* v. r. *Ἀβδαλλαί*.) The head of the twenty-third division of the priestly order in the arrangement by David (1 Chron. xxiv, 18). B.C. 1014.

2. (Sept. *Δαλαΐας, Γοδολίας*.) A son of Shemaiah, and one of the courtiers to whom Jeremiah's first roll of prophecy was read (Jer. xxxvi, 12): he vainly interceded for its preservation from the flames (ver. 25). B.C. 604.

3. (Sept. *Δαλαΐα*.) The progenitor or head of one of the parties of exiles that returned to Jerusalem with Zerubbabel from certain parts of the Assyrian dominions, but who had lost their genealogical records (Ezra ii, 60; Neh. vii, 62). B.C. 536.

4. (Sept. *Δαλαΐα*.) The son of Mehetabeel, and father of the Shemaiah who counselled Nehemiah to escape into the Temple from the threats of Sanballat (Neh. vi, 10). B.C. ante 410.

5. (Sept. *Δελαΐα* v. r. *Δαλααΐα*.) One of the sons of Elioenai, a descendant of the royal line of Judah from Zerubbabel (1 Chron. iii, 24, where, however, the name is Anglicized DALAIAH). He probably belongs to the tenth generation before Christ (see Strong's *Harmony and Expos. of the Gospels*, p. 17). B.C. cir. 300.

Delancey, WILLIAM HEATHCOTE, D.D., bishop of the Protestant Episcopal Church in the diocese of Western New York, was born in Westchester County, N. Y., Oct. 8, 1797; graduated at Yale College in 1817, and was ordained deacon in 1819. His first ministerial labor was given to Grace Church, New York, of which he was in charge during the vacancy of the rectorship which preceded that of the Rev. Dr. Wainwright. He then officiated for a short time in the newly-organized parish of St. Thomas's, Mamaroneck. Having been advanced to the priesthood on March 6, 1822, in Trinity Church, New York, he removed to the city of Philadelphia, where he became an assistant minister of the united churches of Christ Church, St. Peter's, and St. James's, of which bishop White was then rector. In 1828 he was appointed Provost of the University of Pennsylvania. In 1833 he became assistant minister of St. Peter's Church of Philadelphia, and in 1837 rector. When the diocese of New York was divided in 1838, Dr. Delancey was elected the first bishop of the new diocese of Western New York. His consecration took place on May 9, 1839. In 1852 he visited England as a delegate to the English House of Bishops from the Protestant Episcopal Church of America. He died at Geneva, N. Y., April 5, 1865. In all positions, as pastor, university officer, and bishop, Dr. Delancey was diligent, skilful, and successful. He instituted a system of diocesan missions sustained to the present time without incurring debt. In 1840, by his recommendation, a fund for the relief of infirm and aged clergy of the diocese was established.

Delany, PATRICK, an eminent Irish clergyman, was born in the year 1686, and was educated at Trinity College, Dublin. In 1727 lord Carteret raised him to the chancellorship of Christ Church. He distinguished himself by the publication of the first vol-

ume of a work entitled *Revelation examined with Candor* (4th edit. Lond. 1745–63, 3 vols. 8vo). The work is still held in deserved estimation. In 1738 he wrote an ingenious pamphlet, entitled *Reflections on Polygamy*. He also published (1740–42) *An historical Account of the Life and Reign of David* (3d ed. London, 1745, 2 vols. 8vo); in 1745–1763, *Revelation examined with Candor* (2 vols. 8vo); *Twenty Sermons upon social Duties and their opposite Vices* (Lond. 1750, 8vo); *Sixteen Discourses on Doctrines and Duties* (Lond. 1754, 8vo). He died at Bath, May, 1768. "He was a man of ability and learning, disposed occasionally to use his fancy, and to reason confidently on doubtful or disputed premises; his works also greatly lack evangelical sentiment. His sentiments on many doctrines of Christianity were certainly peculiar, but then his mind was original, well-informed, and capacious" (Orme, *Bibliotheca Biblica*). See Kippis, *Biographia Britannica*, v, 75.

De La Rue. See La Rue.

Deleda, or **Theleda** of the *Peutinger Table*, is identified by Ritter (*Erdk.* xvii, 1443) with *Hasya*, a village on the Damascus-Horns road, four hours east of Riblah (Van de Velde, *Memoir*, p. 307).

Delegates, Court of. The great court of appeal in all ecclesiastical causes in England is so called because the commissioners who form the court are *appointed to represent* the king, under his great seal.

Delfau, Dom François, a French theologian, was born at Moulet, in Auvergne, in 1637. He entered the congregation of St. Maur, and became specially known for his edition of the works of St. Augustine. He undertook this work by direction of the general of the congregation, upon whom the need of a new critical edition of the works of the great Church father had been urged by Arnaud. Delfau published in 1670 an announcement in which scholars generally were invited to support him with their advice and with manuscripts. The general of the congregation, by a circular to all the houses of the congregation, issued in the same year, requested each to co-operate with the editor in a work which promised to be of so great use to the Church. A full prospectus was published by Delfau in 1671. Great progress had been made in the preparation of the work, when suddenly Delfau was exiled to Saint Mahé, in Lower Brittany, charged with having published in 1673, under the assumed name of Bois-Franc, a work entitled *L'Abbé commendataire*, directed against the custom of giving ecclesiastical benefices *in commendam*. He perished by shipwreck Oct. 13, 1676. He is also the author of a defence (*Apologie*) of the cardinal de Furstemberg, who was arrested at Cologne by the troops of the emperor, and of an *Epitaph* of king Casimir of Poland.—Hoefer, *Biographie Générale*, xiii, 457.

Deli'lah (Heb. *Delilah'*, דְּלִילָה, prob. *languishing*, sc. with lustful desire; Sept. Δαλιδά, Josephus Δαλιλά), a woman who dwelt in the valley of Sorek, beloved by Samson (Judg. xvi, 4–18). B.C. 1165. Her connection with Samson forms the third and last of those amatory adventures which in his history are so inextricably blended with the craft and prowess of a judge in Israel. She was bribed by the "lords of the Philistines" to win from Samson the secret of his strength, and the means of overcoming it. See Samson. It is not stated, either in Judges or Josephus, whether she was an Israelite or a Philistine. Nor can this question be determined by reference to the geography of Sorek, since, in the time of the judges, the frontier was shifting and indefinite. The following considerations, however, supply presumptive evidence that she was a Philistine:

1. Her *occupation*, which seems to have been that of a courtesan of the higher class, a kind of political Hetæra. This view is still more decided in Josephus (who calls her γυνὴ ἑταιριζομένη, and associates her influence over Samson with πότος and συνουσία, *Ant.* v, 8, 11). He also states more clearly her relation as a political agent to the "lords of the Philistines" (סַרְנֵי, Joseph. οἱ προεστῶτες, οἱ ἄρχοντες Παλαιστίνων; Sept. ἄρχοντες, οἱ τοῦ κοινοῦ; magistrates, political lords, Milton, *Sams. Ag.* 850, 1195), employing under their directions "liers in wait" (אֹרֵב, τὸ ἔνεδρον; comp. Josh. viii, 14). On the other hand, Chrysostom and many of the fathers have maintained that Delilah was married to Samson (so Milton, 227), a natural but uncritical attempt to save the morality of the Jewish champion. See Judg. xvi, 9, 18, as showing an exclusive command of her establishment inconsistent with the idea of matrimonial connection (Patrick, ad loc.). There seems to be little doubt that she was a courtesan; and her employment as a political emissary, together with the large sum which was offered for her services (1100 pieces of silver from each lord = 5500 shekels; comp. Judg. iii, 3), and the tact which is attributed to her in Judges, but more especially in Josephus, indicates a position not likely to be occupied by any Israelitish woman at that period of national depression. See Philistines.

2. The general tendency of the Scripture narrative: the sexual temptation represented as acting upon the Israelites from *without* (Num. xxv, 1, 6; xxxi, 15, 16). See Harlot.

3. The special case of Samson (Judg. xiv, 1; xvi, 1).

In Milton Delilah appears as a Philistine, and justifies herself to Samson on the ground of patriotism (*Sam. Ag.* 850, 980).

Dellius (Δέλλιος), Quintus, a favorite pimp of Antony, whose unprincipled officiousness came near embroiling Herod with Ventidius (Josephus, *Ant.* xiv, 15, 1; xv, 2, 6; *War*, i, xv, 3). He was a Roman knight who was concerned in the civil wars under the triumvirate, and is frequently mentioned in classical history (Smith, *Dict. of Class. Biog.* s. v.).

Delos. See Delus.

Deluge, a term specifically applied in modern times to Noah's flood, as related in Gen. vii, viii. See Flood.

I. *Biblical History of the Flood.*—The sacred historian informs us that in the ninth generation from Adam, when the race of man had greatly multiplied on the face of the earth, wickedness of every kind had fearfully increased, that every imagination of the thoughts of the human heart was only evil continually, that the earth was filled with violence, and that to such a degree of depravity had the whole race come, that "it repented the Lord that he had made man on the earth, and it grieved him at his heart." We are further told, in graphic and impressive language, that the Creator determined to purge the earth from the presence of the creature whom he had made. "I will destroy man whom I have created from the face of the earth; both man and beast, and the creeping thing, and the fowls of the air; for it repenteth me that I have made them." See Anthropomorphism. In the midst of a world of crime and guilt there was, however, one household, that of Noah, in which the fear of God still remained. "Noah was a just man, and perfect in his generations, and walked with God. And Noah found grace in the eyes of the Lord." He was commanded to make an ark of gopher wood, three hundred cubits long, fifty broad, and thirty high. Into this large vessel he was to collect a pair of "every living thing of all flesh," fowls, cattle, and creeping things after their kind, along with a suitable amount of food. He was to enter it himself, taking with him his wife, and his three sons with their wives, but with no other human company. The reason of these preparations was made known in the solemn decree. "Behold I, even I, do bring a flood of waters upon the

earth to destroy all flesh, wherein is the breath of life, from under heaven; and everything that is in the earth shall die." The ark thus commissioned was slowly prepared by Noah. See ARK. At length, in the six hundredth year of his age, the ark was finished, and all its living freight was gathered into it as in a place of safety. Jehovah shut him in, says the chronicler, speaking of Noah. And then there ensued a solemn pause of seven days before the threatened destruction was let loose. At last the flood came; the waters were upon the earth. The narrative is vivid and forcible, though entirely wanting in that sort of description which in a modern historian or poet would have occupied the largest space. We see nothing of the death-struggle; we hear not the cry of despair; we are not called upon to witness the frantic agony of husband and wife, and parent and child, as they fled in terror before the rising waters. Nor is a word said of the sadness of the one righteous man who, safe himself, looked upon the destruction which he could not avert. But one impression is left upon the mind with peculiar vividness, from the very simplicity of the narrative, and it is that of utter desolation. This is heightened by the contrast and repetition of the two ideas. On the one hand we are reminded no less than six times in the narrative in chaps. vi, vii, viii, who the tenants of the ark were (vi, 18–21; vii, 1–3, 7–9, 13–16; viii, 16, 17, 18, 19), the favored and rescued few; and, on the other hand, the total and absolute blotting out of everything else is not less emphatically dwelt upon (vi, 13, 17; vii, 4, 21–23). This evidently designed contrast may especially be traced in chap. vii. First, we read in ver. 6, "And Noah was six hundred years old when the flood came—waters upon the earth." Then follows an account of Noah and his family and the animals entering into the ark. Next verses 10–12 resume the subject of ver. 7: "And it came to pass after seven days that the waters of the flood were upon the earth. In the six hundredth year of Noah's life, in the second month, on the seventeenth day of the month, on the selfsame day were all the fountains of the great deep broken up, and the windows (or floodgates) of heaven were opened. And the rain was upon the earth forty days and forty nights." Again the narrative returns to Noah and his companions, and their safety in the ark (ver. 13–16). And then in ver. 17 the words of ver. 12 are resumed, and from thence to the end of the chapter a very simple but very powerful and impressive description is given of the appalling catastrophe: "And the flood was forty days upon the earth; and the waters increased and bare up the ark, and it was lift up from off the earth. And the waters prevailed and increased exceedingly upon the earth: and the ark went on the face of the waters. And the waters prevailed very exceedingly upon the earth, and all the high mountains which [were] under the whole heaven were covered. Fifteen cubits upwards did the waters prevail, and the mountains were covered. And all flesh died which moveth upon the earth, of fowl, and of cattle, and of wild beasts, and of every creeping thing which creepeth upon the earth, and every man. All in whose nostrils was the breath of life, of all that was in the dry land, died. And every substance which was on the face of the ground was blotted out, as well man as cattle, and creeping thing and fowl of the heaven: they were blotted out from the earth, and Noah only was left, and they that were with him in the ark. And the waters prevailed on the earth a hundred and fifty days." The waters of the Flood increased for a period of 190 days (40+150, comparing vii, 12 and 24). And then "God remembered Noah," and made a wind to pass over the earth, so that the waters were assuaged. The ark rested on the seventeenth day of the seventh month on the mountains of Ararat. After this the waters gradually decreased till the first day of the tenth month, when the tops of the mountains were seen. It was then that Noah sent forth, first, the raven, which flew hither and thither, resting probably on the mountain-tops, but not returning to the ark; and next (? after an interval of seven days; comp. ver. 10), the dove, "to see if the waters were abated from the ground" (i. e. the lower plain country). "But the dove," it is beautifully said, "found no rest for the sole of her foot, and she returned unto him into the ark." After waiting for another seven days he again sent forth the dove, which returned this time with a fresh (עָלֶה) olive-leaf in her mouth, a sign that the waters were still lower. Once more, after another interval of seven days, he sent forth the dove, and she "returned not again unto him any more," having found a home for herself upon the earth. No picture in natural history was ever drawn with more exquisite beauty and fidelity than this: it is admirable alike for its poetry and its truth. Respecting two points, we may here remark (1) that the raven was supposed to foretell changes in the weather both by its flight and its cry (Ælian, *H. A.* vii, 7; Virg. *Georg.* i, 382, 410). According to Jewish tradition, the raven was preserved in the ark in order to be the progenitor of the birds which afterwards fed Elijah by the brook Cherith. (2) The olive-tree is an evergreen, and seems to have the power of living under water, according to Theophrastus (*Hist. Plant.* iv, 8) and Pliny (*H. N.* xiii, 50), who mention olive-trees in the Red Sea. The olive grows in Armenia, but only in the valleys on the south side of Ararat, not on the slopes of the mountain. It will not flourish at an elevation where even the mulberry, walnut, and apricot are found (Ritter, *Erdkunde*, x. 920).

According to a careful adjustment of the chronology of the Hebrew Bible, the Noachian deluge appears to have occurred (begun) in the year from the creation of Adam 1657, and before Christ 2516. It continued twelve lunar months and ten days, or exactly one solar year (Browne, *Ordo Sæclorum*, p. 325 sq.), as the following tabular exhibit of the incidents will show:

Month.	Day.	Interval.	Events.	Genesis.
II (Nov.)	11		Command to enter the ark.	vii, 1–4.
"	17	6 days.	The rain begins.	" 5–16, 17.
III (Dec.)	27	39 "	The rain ceases—the waters prevail.	" 18–24.
VII (Apr.)	17	108 "	The ark grounds on Ararat.	viii, 1–4.
X (July)	1	73 "	Tops of the mountains visible.	" 5.
XI (Aug.)	11	39 "	Raven and dove sent out.	" 6–9.
"	17	6 "	Dove again sent out.	" 10, 11.
"	23	6 "	Dove sent out the third time.	" 12.
I (Oct.)	1	37 "	The ground becomes dry.	" 13.
II (Nov.)	27	56 "	Noah leaves the ark.	" 14–19.
		370 "		

The word specially used to designate the Flood of Noah (הַמַּבּוּל, *ham-mabbul'*) occurs in only one other passage of Scripture (Psa. xxix, 10). The poet there sings of the majesty of God as seen in the storm. It is not improbable that the heavy rain accompanying the thunder and lightning had been such as to swell the torrents, and perhaps cause a partial inundation. This carried back his thoughts to the great flood of which he had often read, and he sang, "Jehovah sat as king at the Flood," and looking up at the clear face of the sky, and on the freshness and glory of nature around him, he added, "and Jehovah remaineth a king forever." In Isa. liv, 9, the Flood is spoken of as "the waters of Noah." God himself appeals to his promise made after the Flood as a pledge of his faithfulness to Israel: "For this is as the waters of Noah unto me; for as I have sworn that the waters of Noah should no more go over the earth, so have I sworn that I would not be wroth with thee nor rebuke thee."

In the N. T. our Lord gives the sanction of his own

authority to the historical truth of the narrative, Matt. xxiv, 37 (comp. Luke xvii, 26), declaring that the state of the world at his second coming shall be such as it was in the days of Noah. Peter speaks of the "long suffering of God," which "waited in the days of Noah while the ark was a preparing, wherein few, that is, eight souls, were saved by water," and sees in the waters of the flood by which the ark was borne up a type of baptism, by which the Church is separated from the world. Again, in his second Epistle (ii, 5), he cites it as an instance of the righteous judgment of God, who spared not the old world, etc.

II. *Traditions.*—The legends of many nations have preserved the memory of a great and destructive flood from which but a small part of mankind escaped. It is not always very clear whether they point back to a common centre, whence they were carried by the different families of men as they wandered east and west, or whether they were of national growth, and embody merely records of catastrophes, such as especially in mountainous countries are of no rare occurrence. In some instances, no doubt, the resemblances between the heathen and the Jewish stories are so striking as to render it morally certain that the former were borrowed from the latter. We find, indeed, a mythological element, the absence of all moral purpose, and a national and local coloring, but, discernible among these, undoubted features of the primitive history.

The account of the Flood in the Koran is apparently drawn partly from Biblical and partly from Persian sources. In the main, no doubt, it follows the narrative in Genesis, but dwells at length on the testimony of Noah to the unbelieving (Sale's *Koran*, chap. xi, p. 181). He is said to have tarried among his people one thousand save fifty years (chap. xxix, p. 327). The people scoffed at and derided him, and "thus were they employed until our sentence was put in execution and the oven poured forth water." Different explanations have been given of this oven, which may be seen in Sale's note. He suggests (after Hyde, *De Rel. Pers.*) that this idea was borrowed from the Persian Magi, who also fancied that the first waters of the Deluge gushed out of the oven of a certain old woman named Zala Cûfa. But the *tannûr* (oven), he observes, may mean only a receptacle in which waters are gathered, or the fissure from which they broke forth. Another peculiarity of this version is, that Noah calls in vain to one of his sons to enter into the ark: he refuses, in the hope of escaping to a mountain, and is drowned before his father's eyes. The ark, moreover, is said to have rested on the mountain Al Jûdi, which Sale supposes should be written Jordi or Giordi, and connects with the Gordyæi, Cardu, etc. or Kurd Mountains on the borders of Armenia and Mesopotamia (ch. xi, p. 181–183, and *notes*). See ARARAT.

1. The traditions which come nearest to the Biblical account are those of the nations of Western Asia. Foremost among these is the Chaldæan. It is preserved in a Fragment of Berosus, and is as follows: "After the death of Ardates, his son Xisuthrus reigned eighteen sari. In his time happened a great Deluge, the history of which is thus described: The Deity Kronos appeared to him in a vision, and warned him that on the 15th day of the month Dæsius there would be a flood by which mankind would be destroyed. He therefore enjoined him to write a history of the beginning, course, and end of all things, and to bury it in the City of the Sun at Sippara; and to build a vessel (σκαφος), and to take with him into it his friends and relatives; and to put on board food and drink, together with different animals, birds, and quadrupeds; and as soon as he had made all arrangements, to commit himself to the deep. Having asked the Deity whither he was to sail, he was answered, 'To the gods, after having offered a prayer for the good of mankind.' Whereupon, not being disobedient (to the heavenly vision), he built a vessel five stadia in length and two in breadth. Into this he put everything which he had prepared, and embarked in it his wife, his children, and his personal friends. After the flood had been upon the earth and was in time abated, Xisuthrus sent out some birds from the vessel, which, not finding any food, nor any place where they could rest, returned thither. After an interval of some days Xisuthrus sent out the birds a second time, and now they returned to the ship with mud on their feet. A third time he repeated the experiment, and then they returned no more; whence Xisuthrus judged that the earth was visible above the waters, and accordingly he made an opening in the vessel (?), and, seeing that it was stranded upon the site of a certain mountain, he quitted it with his wife and daughter and the pilot. Having then paid his adoration to the earth, and having built an altar and offered sacrifices to the gods, he, together with those who had left the vessel with him, disappeared. Those who had remained behind, when they found that Xisuthrus and his companions did not return, in their turn left the vessel and began to look for him, calling him by his name. Him they saw no more, but a voice came to them from heaven, bidding them lead pious lives, and so join him who was gone to live with the gods, and further informing them that his wife, his daughter, and the pilot had shared the same honor. It told them, moreover, that they should return to Babylon, and how it was ordained that they should take up the writings that had been buried in Sippara and impart them to mankind, and that the country where they then were was the land of Armenia. The rest, having heard these words, offered sacrifices to the gods, and, taking a circuit, journeyed to Babylon. The vessel being thus stranded in Armenia, some part of it still remains in the mountains of the Corcyræans (or Cordyæans, i. e. the Kurds or Kurdistan) in Armenia, and the people scrape off the bitumen from the vessel and make use of it by way of charms. Now, when those of whom we have spoken returned to Babylon, they dug up the writings which had been buried at Sippara; they also founded many cities and built temples, and thus the country of Babylon became inhabited again" (Cory's *Ancient Fragments*, p. 26–29). Another version abridged, but substantially the same, is given from Abydenus (*Ibid.* p. 33, 34). The version of Eupolemus (quoted by Eusebius, *Præp. Evang.* x, 9) is curious: "The city of Babylon," he says, "owes its foundation to those who were saved from the Deluge; they were giants, and they built the tower celebrated in history."

Other Western Asiatic notices of a Flood may be found (*a*) in the Phœnician mythology, where the victory of Pontus (the sea) over Demarous (the earth) is mentioned (see the quotation from Sanchoniathon in Cory, as above, p. 13); (*b*) in the Sibylline Oracles, partly borrowed, no doubt, from the Biblical narrative, and partly perhaps from some Babylonian story. In these mention is made of the Deluge, after which Kronos, Titan, and Japetus ruled the world, each taking a separate portion for himself, and remaining at peace till after the death of Noah, when Kronos and Titan engaged in war with one another (*Ib.* p. 52). To these must be added (*c*) the Phrygian story of king Annakos or Nannakos (Enoch) in Iconium, who reached an age of more than 300 years, foretold the Flood, and wept and prayed for his people, seeing the destruction that was coming upon them. Very curious, as showing what deep root this tradition must have taken in the country, is the fact that so late as the time of Septimius Severus a medal was struck at Apamea on which the Flood is commemorated. "The city is known to have been formerly called 'Kibótos,' or 'the Ark;' and it is also known that the coins of cities in that age exhibited some leading point in their mythological history. The medal in question represents a kind of square vessel floating in the water. Through

Coin of Apamea in Phrygia, representing the Deluge.

an opening in it are seen two persons, a man and a woman. Upon the top of this chest or ark is perched a bird, whilst another flies towards it carrying a branch between its feet. Before the vessel are represented the same pair as having just quitted it, and got upon the dry land. Singularly enough, too, on some specimens of this medal, the letters NΩ, or NΩE, have been found on the vessel, as in the annexed cut. (See Eckhel, iii, 132, 133; Wiseman, *Lectures on Science and Revealed Religion*, ii, 128, 129.) This fact is no doubt remarkable, but too much stress must not be laid upon it; for, making full allowance for the local tradition as having occasioned it, we must not forget the influence which the Biblical account would have in modifying the native story. See APAMEA.

As belonging to this cycle of tradition must be reckoned also (1) the Syrian, related by Lucian (*De Deâ Syrâ*, c. 13), and connected with a huge chasm in the earth near Hieropolis, into which the waters of the Flood are supposed to have drained; and (2) the Armenian, quoted by Josephus (*Ant.* i, 3) from Nicolaus Damascenus, who flourished about the age of Augustus. He says: "There is above Minyas, in the land of Armenia, a great mountain, which is called Baris [i. e. a ship], to which it is said that many persons fled at the time of the Deluge, and so were saved; and that one in particular was carried thither upon an ark (ἐπὶ λάρνακος), and was landed upon its summit, and that the remains of the vessel's planks and timbers were long preserved upon the mountain. Perhaps this was the same person of whom Moses, the legislator of the Jews, wrote an account."

2. A second cycle of traditions is that of Eastern Asia. To this belong the Persian, Indian, and Chinese. The Persian is mixed up with its cosmogony, and hence loses everything like a historical aspect. "The world having been corrupted by Ahriman, it was necessary to bring over it a universal flood of water, that all impurity might be washed away. The rain came down in drops as large as the head of a bull; the earth was under water to the height of a man, and the creatures of Ahriman were destroyed."

The Chinese story is, in many respects, singularly like the Biblical, according to the Jesuit M. Martinius, who says that the Chinese computed it to have taken place 4000 years before the Christian era. Fáh-he, the reputed author of Chinese civilization, is said to have escaped from the waters of the Deluge. He reappears as the first man at the production of a renovated world, attended by seven companions—his wife, his three sons, and three daughters, by whose intermarriage the whole circle of the universe is finally completed (Hardwick, *Christ and other Masters*, iii, 16). Dr. Gutzlaff, in a paper "On Buddhism in China," communicated to the Royal Asiatic Society (*Journal*, xvi, 79), says that he saw in one of the Buddhist temples, "in beautiful stucco, the scene where Kwan-yin, the Goddess of Mercy, looks down from heaven upon the lonely Noah in his ark, amidst the raging waves of the deluge, with the dolphins swimming around as his last means of safety, and the dove with an olive-branch in its beak flying towards the vessel. Nothing could have exceeded the beauty of the execution."

The Indian tradition appears in various forms. Of these, the one which most remarkably agrees with the Biblical account is that contained in the Mahábhárata. We are there told that Brahma, having taken the form of a fish, appeared to the pious Manu (Satya, i. e. the righteous, as Noah is also called) on the banks of the river Wirini. Thence, at his request, Manu transferred him when he grew bigger to the Ganges, and finally, when he was too large even for the Ganges, to the ocean. Brahma now announces to Manu the approach of the Deluge, and bids him build a ship and put in it all kinds of seeds, together with the seven Rishis or holy beings. The Flood begins and covers the whole earth. Brahma himself appears in the form of a horned fish, and, the vessel being made fast to him, he draws it for many years, and finally lands on the loftiest summit of Mount Himarat (i. e. the Himalaya). Then, by the command of God, the ship is made fast, and in memory of the event the mountain called Naubandhana (i. e. *ship-binding*). By the favor of Brahma, Manu, after the Flood, creates the new race of mankind, which are hence termed Manudsha, i. e. born of Manu (Bopp, *Die Sündfluth*). The Puránic or popular version is of much later date, and is, "according to its own admission, colored and disguised by allegoricat imagery." Another, and perhaps the most ancienversion of all, is that contained in the Çatapat'ha-Bráhmána. The peculiarity of this is that its locality is manifestly *north* of the Himalaya range, over which Manu is supposed to have crossed into India. Both versions will be found at length in Hardwick's *Christ and other Masters*, ii, 145–152.

3. A third cycle of traditions is to be found among the American nations. These, as might be expected, show occasionally some marks of resemblance to the Asiatic legends. The one in existence among the Cherokees reminds us of the story in the Mahábhárata, except that a dog here renders the same service to his master as the fish there does to Manu. "This dog was very pertinacious in visiting the banks of a river for several days, where he stood gazing at the water and howling piteously. Being sharply spoken to by his master and ordered home, he revealed the coming evil. He concluded his prediction by saying that the escape of his master and family from drowning depended upon their throwing *him* into the water; that, to escape drowning himself, he must take a boat and put in it all he wished to save; that it would then rain hard a long time, and a great overflowing of the land would take place. By obeying this prediction the man and his family were saved, and from them the earth was again peopled" (Schoolcraft, *Notes on the Iroquois*, p. 358, 359).

"Of the different nations that inhabit Mexico," says A. von Humboldt, "the following had paintings resembling the deluge of Coxcox, viz. the Aztecs, the Mixtecs, the Zapotecs, the Tlascaltecs, and the Mechoacans. The Noah, Xisuthrus, or Manu of these nations is termed Coxcox, Teo-Cipactli, or Tezpi. He saved himself, with his wife Xochiquetzatl, in a bark, or, according to other traditions, on a raft. The painting represents Coxcox in the midst of the water waiting for a bark. The mountain, the summit of which rises above the waters, is the peak of Colhuacan, the Ararat of the Mexicans. At the foot of the mountain are the heads of Coxcox and his wife. The latter is known by two tresses in the form of horns, denoting the female sex. The men born after the Deluge were dumb: the dove from the top of a tree distributed among them tongues, represented under the form of small commas." Of the Mechoacan tradition he writes, that "Coxcox, whom they called Tezpi, embarked in a spacious *acalli* with his wife, his children, several animals, and grain. When the Great Spirit ordered the waters to withdraw, Tezpi sent out from his bark a vulture, the zopilote, or *vultur aura*. This bird did not return on account of the carcases with which the earth was strewed. Tezpi sent out other birds, one of which, the humming-bird, alone returned, holding in its beak a branch clad with leaves. Tezpi, seeing that fresh verdure covered the soil, quitted his

bark near the mountain of Colhuacan" (*Vues des Cordillères et Monumens de l'Amérique*, p. 226, 227). A peculiarity of many of these American Indian traditions must be noted, and that is, that the Flood, according to them, usually took place in the time of the First Man, who, together with his family, escape. But Müller (*Americanischen Urreligionen*) goes too far when he draws from this the conclusion that these traditions are consequently cosmogonic, and have no historical value. The fact seems rather to be that all memory of the age between the Creation and the Flood had perished, and that hence these two great events were brought into close juxtaposition. This is the less unlikely when we see how very meagre even the Biblical history of that age is.

It may not be amiss here to mention the legend still preserved among the inhabitants of the Fiji Islands, although not belonging to this group. They say that "after the islands had been peopled by the first man and woman, a great rain took place by which they were finally submerged; but, before the highest places were covered by the waters, two large double canoes made their appearance. In one of these was Rokora, the god of carpenters; in the other, Rokola, his head workman, who picked up some of the people, and kept them on board until the waters had subsided, after which they were again landed on the island. It is reported that in former times canoes were always kept in readiness against another inundation. The persons thus saved, eight in number, were landed at Mbenga, where the highest of their gods is said to have made his first appearance. By virtue of this tradition, the chiefs of Mbenga take rank before all others, and have always acted a conspicuous part among the Fijis. They style themselves *Ngali-duva-ki-Iangi* —subject to Heaven alone" (Wilkes, *Exploring Expedition*).

In the wild Scandinavian Edda the earth is allegorized as the great giant Ymir, whose bones and flesh are represented by the rocks and soil. This giant was killed by the gods, and his blood (the ocean) poured forth in such a flood that it drowned all the lesser giants—his offspring—except one, who saved himself and his wife by escaping in time to his ship.

4. Greece has two versions of a flood, one associated with Ogyges (*Jul. Afric.* as quoted by Euseb. *Præp. Ev.* x, 10), and the other, in a far more elaborate form, with Deucalion. Both, however, are of late origin—they were unknown to Homer and Hesiod. Herodotus, though he mentions Deucalion as one of the first kings of the Hellenes, says not a word about the Flood (i, 56). Pindar is the first writer who mentions it (*Olymp.* ix, 37 sq.). In Apollodorus (*Biblio.* i, 7) and Ovid (*Metam.* i, 260) the story appears in a much more definite shape. Finally, Lucian gives a narrative (*De Deâ Syr.* c. 12, 13), not very different from that of Ovid, except that he makes provision for the safety of the animals, which Ovid does not. He attributes the necessity for the Deluge to the exceeding wickedness of the existing race of men, and declares that the earth opened and sent forth waters to swallow them up, as well as that heavy rain fell upon them. Deucalion, as the one righteous man, escaped with his wives and children, and the animals he had put into the chest (λάρνακα), and landed, after nine days and nine nights, on the top of Parnassus, while the chief part of Hellas was under water, and nearly all men perished, except a few who reached the tops of the highest mountains. Plutarch (*de Sollert. Anim.* § 13) mentions the dove which Deucalion made use of to ascertain whether the flood was abated. Most of these accounts, it must be observed, localize the Flood, and confine it to Greece, or some part of Greece. Aristotle speaks of a local inundation near Dodona only (*Meteorol.* i, 14). It must also be confessed that the later the narrative the more definite the form it assumes, and the more nearly it resembles the Mosaic account.

This old Greek legend of Deucalion and Pyrrha is the best known of all the traditions next to the narrative of the Bible. (See Jackson, "Noah's and Deucalion's Flood," *Works*, i, 103; "The Deluges of Ogyges and Deucalion," *Bibliotheca Sacra*, 1849, p. 75.) According to this version, mankind, for their impiety, were doomed to destruction. The waters accordingly broke from the earth, accompanied by violent rains from heaven. In a short time the world was whelmed in the floods, and every human being perished save Deucalion and his wife, with his sons and their wives. They escaped in a large vessel, in which they had previously placed pairs of every kind of animal. While in the ark Deucalion sent forth a dove, which in a little time returned. On being let free a second time it came not back, or, as another version has it, it alighted again on the ark with mud-stained claws, whence Deucalion inferred that the subsidence of the waters had begun. It may be mentioned, in reference to this tradition, as a very singular coincidence, that just as, according to Ovid, the earth was repeopled by Deucalion and Pyrrha throwing the bones of their mother (i. e. stones) behind their backs, so among the Tamanaki, a Carib tribe on the Orinoko, the story goes that a man and his wife, escaping from the flood to the top of the high mountain Tapanacu, threw over their heads the fruit of the Mauritia-palm, whence sprung a new race of men and women. This curious coincidence between Hellenic and American traditions seems explicable only on the hypothesis of some common centre of tradition.

It seems tolerably certain that the Egyptians had no records of the Deluge, at least if we are to credit Manetho. Nor has any such record been detected on the monuments, or preserved in the mythology of Egypt. They knew, however, of the flood of Deucalion, but seem to have been in doubt whether it was to be regarded as partial or universal, and they supposed it to have been preceded by several others.

On all these and many similar traditions in civilized and savage nations, see the works of Bryant (*Ancient Mythology*, Lond. 1774–6, 3 vols. 4to, vol. iii) and Harcourt (*Doctrine of the Deluge*, Lond. 1838, 2 vols. 8vo), in which, after rejecting what is fanciful, enough remains to attest the wide-spread existence and minute agreement of these traditionary recollections of a flood coextensive with the human race.

III. *Extent of the Flood.*—On this question two opinions have been entertained: one, that it was general over the whole globe; the other, that it was partial, affecting only those regions over which the human race had extended. In all inquiries into this subject, it is well to bear in mind the design to be fulfilled by the "flood of waters." That design was plainly not to destroy and remodel the surface of the earth. Although the inferior animals were involved in a like fate with the human race, it was not for their destruction that the great catastrophe came. The wickedness of man had evoked the divine anger; to sweep him and his crimes, therefore, from the face of the earth, the fountains of the great deep were broken up, and the windows of heaven were opened; hence we may reasonably infer that no greater devastation would be permitted than was unavoidable to secure the destruction of the human family. Against the first opinion there is, accordingly, this preliminary objection, that either it takes for granted that the whole world was peopled in the days of Noah, or it represents as involved in ruin large tracts of land, fair and fertile, though uninhabited by man. For the first alternative there is no evidence in Scripture. Indeed, the whole narrative of the preparation of the ark, and Noah's intercourse with his fellow-men, leads us to infer that the population of the globe at the time was not so extensive but that the warnings of the patriarch could be everywhere heard and known. It would have been

a vain task if his single voice had been required to sound in all lands. The second alternative is equally adverse to the opinion of the universality of the deluge, for it necessitates our belief in the destruction of large portions of the earth's surface where man had never been, and which could not, therefore, have become tainted and defiled by sin—a view that is opposed to the known modes of God's dealings with his creatures. But against the idea of a general flood over the whole globe simultaneously, many arguments of much greater force may be brought forward. These are derived from a consideration of the laws by which the present economy of nature is regulated. If it be objected to these arguments that the deluge was a miracle, and must, accordingly, be judged apart from the operation of law, it is sufficient to reply that, whether a miracle or not, it was brought about by the ordinary agencies of nature: "the fountains of the deep were broken up"—that is, the land was depressed and the sea rolled over it; "the windows of heaven were opened"—in other words, a constant and heavy rain was sent upon the earth; and again, when the waters were to be dried off the land, a wind was made to blow upon them. In short, from the beginning to the end of the narrative in Genesis, we meet with no setting aside of the laws of nature. Everything is done in strict accordance with those laws, as if to teach a truth which is very apt to be forgotten in the present day, that what we call the laws of nature is only the constant mode in which the Creator acts, and that by the operation of these laws, directed as he sees fit, he works out his purposes in creation.

1. The astronomical difficulties in the way of the theory of the absolute universality of the flood over the earth's surface are insuperable. Granting, for an instant, that from some unknown source a vast body of water was introduced on the surface of our planet, we are led to ask what would be the result? It can be shown that there was no general collapse of the earth's crust, and the water must therefore have risen five miles above the sea-level, so as to cover the top of the highest mountain. The effect of this would be to increase the equatorial diameter of the earth by some ten or twelve miles. The orbit round the sun would consequently be altered. The influence of its attraction on the planets would be increased, and thus the element of disorder would reach to the remotest regions of space. But let us suppose that a change of this kind was permitted to extend through the universe, what is the next step in this series of impossible suppositions? After a period of less than a year the waters assuage, and the earth is once more as it used to be. Here, again, another change must have extended through the firmament. The old relations of the heavenly bodies are re-established, and the orbits continue as they were before the flood. Thus we must suppose a serious alteration to have disturbed every celestial body throughout the whole universe, to have lasted while our earth performed some three hundred revolutions on its axis, and then to have ceased by the return of everything to the original condition. And this stupendous system of aberration had for its object the destruction of a race of creatures inhabiting a mere speck among the planetary systems! No one will pretend that this hypothesis has any shadow of probability.

2. The geological objections to a universal deluge are also formidable. Many years have not elapsed since it was believed that the revelations of geology tended in a very marked manner to confirm the commonly received view of the deluge. Over the greater part of Great Britain and Ireland, and throughout Central and Northern Europe as well as North America, there exists immediately under the vegetable soil a deposit of clay, sand, or gravel, often very tumultuously arranged. This deposit, in the infancy of geological science, was set down as the result of some great rush of waters; and, as it was plainly one of the most recent formations of the globe, it came to be regarded as beyond question the result of that old deluge by which the human race had been destroyed. It received, accordingly, the name *diluvium;* and, from its very general occurrence in both hemispheres, it was held to be a confirmation of the Bible narrative of the flood that covered "all the high hills that were under the whole heaven." But the identification proved too hasty. A more careful examination of the diluvium showed that it belonged to many different periods, and had, to a considerable extent, resulted from local causes, acting over limited areas. It was ascertained, however, that one kind of diluvium, having a wide diffusion over the northern parts of Europe and America, must have been produced by one great cause acting in the same geological period. The agency which gave rise to this "drift" was nevertheless shown to be not a rush of water, but *ice* coming from the north, either in the form of a glacier or as icebergs, and bearing with it enormous quantities of sand, mud, and stones. Thus the last hope of sustaining the doctrine of a universal deluge by an appeal to geological facts fell to the ground. Not only does geology afford no evidence in favor of such a doctrine, but it tends to support the opposite view. The notion of a simultaneous and universal desolation of the globe finds no countenance among those stony records in which the primeval history of our planet is graven as with a pen of iron in the rock forever. There are, indeed, many gaps in the chronicle, many passages that have been blotted out in whole or in part, and some pages that seem never to have been inscribed among rocks at all, but these are only local. What is wanting in one place is often made up in another; and, though even at the best the record is full of imperfections, the geologist can confidently affirm that its whole tenor goes to disprove any universal catastrophe, and to show that the extinction of successive races of plants and animals has been imperceptibly effected during immensely protracted periods of time.

Another geological argument has often been adduced as bearing strongly against a general deluge. In Auvergne, and other districts of Central France, there occurs a series of volcanoes which have not been in action within the historical period. From the association of the remains of long extinct animals among the products of these volcanoes, it has been inferred that the era of eruption must be assigned to a time long anterior to the appearance of man. Yet these volcanic cones are in many instances as perfect as when they were first thrown up. Travellers who have climbed their sides and descended into their craters bear testimony to the fact that they consist of dust and cinders still so loosely aggregated that the traveller sometimes sinks over the ankle in volcanic debris. Such light material has assuredly been exposed to the action of no large body of water, which would have swept it at once away, like Graham's Island, which arose in the Mediterranean, July, 1831, to a height of 200 feet and a circumference of three miles, but in a few months was washed down to a mere shoal (*Bibliotheca Sacra*, July, 1867, p. 465). Hence, since these volcanoes belong to a period earlier than that of man, the deluge cannot have extended over Central France.

Formerly, the existence of shells and corals at the top of high mountains was taken to be no less conclusive evidence the other way. They were constantly appealed to as a proof of the literal truth of the Scripture narrative. So troublesome and inconvenient a proof did it seem to Voltaire, that he attempted to account for the existence of fossil shells by arguing that either they were those of fresh-water lakes and rivers evaporated during dry seasons, or of land-snails developed in unusual abundance during wet ones; or that they were shells that had been dropped from the hats of pilgrims on their way from the Holy Land to their

own homes; or, in the case of the ammonites, that they were petrified reptiles. It speaks ill for the state of science that such arguments could be advanced, on the one side for, and on the other against, the universality of the Deluge. This is the more extraordinary —and the fact shows how very slowly, where prejudices stand in the way, the soundest reasoning will be listened to—when we remember that so early as the year 1517 an Italian named Fracastoro had demonstrated the untenableness of the vulgar belief which associated these fossil remains with the Mosaic Deluge. "That inundation," he observed, "was too transient; it consisted principally of fluviatile waters; and, if it had transported shells to great distances, it must have strewed them over the surface, not buried them at vast depths in the interior of mountains. . . . But the clear and philosophical views of Fracastoro were disregarded, and the talent and argumentative powers of the learned were doomed for three centuries to be wasted in the discussion of these two simple and preliminary questions: first, whether fossil remains had ever belonged to living creatures; and, secondly, whether, if this be admitted, all the phenomena could not be explained by the deluge of Noah" (Lyell, *Principles of Geology*, p. 20, 9th edit.). Even within the last thirty years geologists like Cuvier and Buckland (*Reliquiæ Diluvianæ*, Lond. 1823, 4to) have thought that the *superficial deposits* might be referred to the period of the Noachian Flood. Subsequent investigation, however, showed that if the received chronology were even approximately correct, this was out of the question, as these deposits must have taken place thousands of years before the time of Noah, and, indeed, before the creation of man. Hence the geologic diluvium is to be carefully distinguished from the historic. Although, singularly enough, the latest discoveries give some support to the opinion that man may have been in existence during the formation of the drift, yet even then that formation could not have resulted from a mere temporary submersion like that of the Mosaic Deluge, but must have been the effect of causes in operation for ages. So far, then, it is clear, there is no evidence now on the earth's surface in favor of a universal deluge. See GEOLOGY.

3. But perhaps the most startling of all the difficulties in the way of the belief in a universal deluge are presented to us in the researches of the zoologist. From him we learn that, even taking the cubit by which the ark was measured to have been of the longest, the ark was totally inadequate to contain the animals even of a single continent. It would occupy too much space to enter here into the details of this part of the subject. We refer the reader to one of the lectures of Hugh Miller (*Testimony of the Rocks*, p. 267). Sir Walter Raleigh thought he had exhausted the capabilities of the ark when, after calculating the amount of space that would be occupied by the animals known to himself at the time, he concluded that "all these two hundred and eighty beasts might be kept in one story or room of the ark, in their several cabins, their meat in the second, the birds and their provisions in the third, with space to spare for Noah and his family, and all their necessaries" (*History of the World*, p. 57). Since Raleigh's time, however, the known number of terrestrial animals has been enormously increased. Of mammalia alone there are now known between 1600 and 1700 species. To these must be added upwards of 6000 birds, 650 reptiles, and 550,000 insects, all of which would require room and a provision of food in the ark. It is needless to remark that no vessel ever fashioned by man could have accommodated a tithe of these inmates. See NOAH'S ARK.

But over and above the impossibility of constructing a vessel large enough to contain all the species of terrestrial animals that inhabit the globe, it would have been equally impossible in the days of Noah, just as it would be utterly impossible in our own day, to collect all these creatures alive into one corner of the earth. No one needs to be informed that the animal tribes are not all represented in any one country; that certain races are confined to high latitudes, that others roam among the temperate zones, while others are found only between the tropics. Nor is it necessary to do more than allude to the fact that there is a similar grouping on all high land, altitude above the sea being thus representative of recession from the equator, so that the bald head of a lofty mountain may be white with the snows of an eternal winter, its shoulders clad with the spring-like vegetation of the temperate latitudes, while its feet lie rich in the glories of a tropical summer. But besides this arrangement, according to climate and temperature, there is a still further subdivision into *provinces*, and these again into *generic* and *specific centres*. Thus, while each zone of latitude has its peculiar *facies* of animal and vegetable life, it contains so many distinct and independent areas, in which the animals and plants are to a large extent generically or specifically different from those of contiguous areas. The evidence of these localized groups of organisms points in part to old geological changes of sea and land, and possibly to other causes which are still far from being understood. Professor Edward Forbes treated them as *centres of creation*, that is, distinct areas in which groups of plants and animals had been created, and from which, as a common centre, they had gradually radiated, so as to encroach more or less upon the neighboring areas. Hence, to collect specimens of all the species of terrestrial creatures inhabiting the earth, it would be necessary not only to visit each parallel of latitude on both sides of the equator, but to explore the whole extent of each parallel, so as to leave out none of the separate provinces. With all the appliances of modern civilization, and all the labors of explorers in the cause of science throughout every part of the world, the task of ascertaining the extent of the animal kingdom is probably still far from being accomplished. Not a year passes away without witnessing new names added to the lists of the zoologist. Surely no one will pretend that what has not yet been achieved by hundreds of laborers during many centuries could have been performed by one of the patriarchs during a few years. It was of course necessary that the animals should be brought alive. But this, owing to their climatal susceptibilities, was in the case of many species impossible, and even with regard to those which might have survived the journey, the difficulties of their transport must have been altogether insuperable. Noah, moreover, was busy with his great vessel, and continued to be "a preacher of repentance" to his fellow-men—occupations which admitted of no peregrinations to the ends of the earth in search of inmates for the ark. It is indeed beyond our power to follow up the train of impossibilities which such a notion implies. Dr. J. Pye Smith remarks that the idea of a collection of all the terrestrial animals of the globe brought by Noah to the ark cannot be entertained, "without bringing up the idea of miracles more stupendous than any that are recorded in Scripture, even what appear appalling in comparison; the great decisive miracle of Christianity—the resurrection of the Lord Jesus—sinks down before it."

The existence of distinct provinces of plants and animals is a fact full of the deepest interest, and opens out many wide fields of inquiry. Its bearing on the question of the deluge is of course that phase which more especially requires to be noticed here. In addition to what has just been said, it may be remarked further, that these provinces have a geological as well as a zoological significance. Laying aside as utterly impossible the idea of the representation in the ark of every terrestrial species, we may obtain some confirmatory evidence that the existing races of plants and

animals have never been interrupted by a general catastrophe. A careful study of these provinces shows that some are older than others, just as some parts of the earth's surface are geologically older than other parts. In certain cases a province is found to contain within itself the relic of an older province which once occupied the same spot. In the profounder depths of the maritime lochs that indent the western coast of Scotland, there exist little groups of shell-fish which are not now found alive in the shallower parts. Yet they once lived even in the shallower water, and their remains are now found fossil along the shores of the Firth of Clyde and elsewhere. They have become gradually extinct in the upper part of the sea, owing probably to a change of climate, and are now confined to the very deepest zones. These and other facts of the same kind point to slow and gradual changes unbroken by any great cataclysmal event. Among plants, too, similar phenomena abound. It should not be lost sight of, that, had the whole earth been covered for a year by a sheet of water, the greater part of our terrestrial plants must have perished. On the disappearance of the flood there would hence require to be a new creation, or rather re-creation, all over the world—a supposition for which there is no evidence either in Scripture or nature, and which is opposed to all that we know of the method of the divine working. Plants are grouped, like animals, in greater and lesser provinces; and these, too, differ greatly from each other in antiquity. Some assemblages of plants have spread over wide districts, and either extirpated those which had previously occupied the ground or driven them into sheltered corners. In Great Britain and Ireland, for instance, there are five distinct groups of plants which have also corresponding suites of animals. The successive migrations of these groups can still be traced, leading us to a knowledge of certain vast changes which have taken place among the British islands within a comparatively recent geological period. England was still united to the Continent when the oldest group of plants began to flourish. The northern half of the island, with the whole of Scotland, was submerged beneath the sea, and again elevated before the great mass of the British plants crept westward across the plains that united the islands with the Continent. It was after the whole of our present groups of plants and animals had become fixed in their existing habitats that the isthmus was broken through by the waves and Britain became an island. These changes could not have been brought about save during the lapse of a protracted series of ages. They give evidence of no sudden break, no temporary annihilation and subsequent creation, such as the idea of a general flood would require, but, on the contrary, show very clearly that the present races of plants and animals have gone on in unbroken succession from a time that long preceded the advent of man.

There is, however, other evidence conclusive against the hypothesis of a universal deluge, miracle apart. "The first effect of the covering of the whole globe with water would be a complete change in its climate, the general tendency being to lower and equalize the temperature of all parts of its surface. *Pari passu* with this process . . . would ensue the destruction of the great majority of marine animals. This would take place, partly by reason of the entire change in climatal conditions, too sudden and general to be escaped by migration; and, in still greater measure, in consequence of the sudden change in the depth of the water. Great multitudes of marine animals can only live between tide-marks, or at depths less than fifty fathoms; and as by the hypothesis the land had to be depressed many thousands of feet in a few months, and to be raised again with equal celerity, it follows that the animals could not possibly have accommodated themselves to such vast and rapid changes. All the littoral animals, therefore, would have been killed. The race of acorn-shells and periwinkles would have been exterminated, and all the coral-reefs of the Pacific would at once have been converted into dead coral, never to grow again. But, so far is this from being the case, that acorn-shells, periwinkles, and coral still survive, and there is good evidence that they have continued to exist and flourish for many thousands of years. On the other hand, Noah was not directed to take marine animals of any kind into the ark, nor, indeed, is it easy to see how they could have been preserved. Again, had the whole globe been submerged, the sea-water covering the land would at once have destroyed every fresh-water fish, mollusk, and worm; and as none of these were taken into the ark, the several species would have become extinct. Nothing of the kind has occurred. Lastly, such experiments as have been made with regard to the action of sea-water upon terrestrial plants leave very little doubt that submergence in sea-water for ten or eleven months would have effectually destroyed not only the great majority of the plants, but their seeds as well. And yet it is not said that Noah took any stock of plants with him into the ark, or that the animals which issued from it had the slightest difficulty in obtaining pasture. There are, then, it must be confessed, very strong grounds for believing that no universal deluge ever occurred. Suppose the Flood, on the other hand, to have been local; suppose, for instance, the valley of the Euphrates to have been submerged; and then the necessity for preserving all the species of animals disappears. For, in the first place, there was nothing to prevent the birds and many of the large mammals from getting away; and, in the next, the number of species peculiar to that geographical area, and which would be absolutely destroyed by its being flooded, supposing they could not escape, is insignificant."

We are thus compelled to adopt the opinion that the flood of Noah was (like other deluges of which we read) a local event confined to one part of the earth's surface, and that it was "universal" only inasmuch as it effected the destruction of the whole human race, the family of Noah alone excepted. Against this opinion no objections of any weight can be urged. It is borne out by the evidence to be derived from a study of the phenomena of nature; and it is not at variance with any statement in holy Scripture. The universality of the language in which Moses describes the extent of the Deluge—"all the high hills that were under the whole heaven were covered"—has indeed been regarded as a testimony to the universality of the catastrophe. But such general expressions are of frequent occurrence in the sacred writings to denote a tract of country which, though large relatively to its inhabitants, yet formed only a very small portion of the earth's surface. No authentic traces of the action of the flood have yet been detected in the East, where the area of submersion was probably situated, nor indeed is it likely that any such traces will ever be found. They might confirm our faith, but they are by no means necessary, for the fact of the former destruction of the human race is made known to us in the sacred volume, and has been handed down by tradition in almost every nation of the earth, even the most barbarous and the farthest removed from the early cradle of the human race. It is natural to suppose that the writer, when he speaks of "all flesh," "all in whose nostrils was the breath of life," refers only to his own locality. This sort of language is common enough in the Bible when only a small part of the globe is intended. Thus, for instance, it is said that "*all countries* came into Egypt to Joseph to buy corn;" and that "a decree went out from Cæsar Augustus that *all the world* should be taxed." In these and many similar passages the expressions of the writer are obviously not to be taken in an exactly literal sense. Even the apparently very distinct phrase "*all* the high hills that were *under the whole*

heaven were covered" may be matched by another precisely similar, where it is said that God would put the fear and the dread of Israel upon *every nation under heaven*. It requires no effort to see that such language is framed with a kind of poetic breadth. The real difficulty lies in the connecting of this statement with the district in which Noah is supposed to have lived, and the assertion that the waters prevailed fifteen cubits upward. If the Ararat on which the ark rested be the present mountain of the same name, the highest peak of which is more than 17,000 feet above the sea, it would have been quite impossible for this to have been covered, the water reaching fifteen cubits, i. e. twenty-six feet above it, unless the whole earth were submerged. The author of the *Genesis of the Earth*, etc. has endeavored to escape this difficulty by shifting the scene of the catastrophe to the low country on the banks of the Tigris and Euphrates (a miraculous overflow of these rivers being sufficient to account for the Deluge), and supposing that the "fifteen cubits upward" are to be reckoned, not from the top of the mountains, but from the surface of the plain. By "the high hills" he thinks may be meant only slight elevations, called "high" because they were the highest parts overflowed. But fifteen cubits is only a little more than twenty-six feet, and it seems absurd to suppose that such trifling elevations are described as "all the high hills under the whole heaven." At this rate the ark itself must have been twice the height of the highest mountain. The plain meaning of the narrative is that, far as the eye could sweep, not a solitary mountain reared its head above the waste of waters. On the other hand, there is no necessity for assuming that the ark stranded on the high peaks of the mountain now called Ararat, or even that that mountain was visible. A lower mountain range, such as the Zagros range for instance, may be intended. In the absence of all geographical certainty in the matter, it is better to adopt some such explanation of the difficulty. Indeed, it is out of the question to imagine that the ark rested on the top of a mountain which is covered for 4000 feet from the summit with perpetual snow, and the descent from which would have been a very serious matter both to men and other animals. The local tradition, according to which the fragments of the ark are still believed to remain on the summit, can weigh nothing when balanced against so extreme an improbability. Assuming, then, that the Ararat here mentioned is not the mountain of that name in Armenia, we may also assume the inundation to have been partial, and may suppose it to have extended over the whole valley of the Euphrates, and eastward as far as the range of mountains running down to the Persian Gulf, or further. As the inundation is said to have been caused by the breaking up of the fountains of the great deep, as well as by the rain, some great and sudden subsidence of the land may have taken place, accompanied by an inrush of the waters of the Persian Gulf, similar to what occurred in the Runn of Cutch, on the eastern arm of the Indus, in 1819, when the sea flowed in, and in a few hours converted a tract of land 2000 square miles in area into an inland sea, or lagoon (see the account of this subsidence of the Delta of the Indus in Lyell's *Principles of Geology*, p. 460–63). Compare FLOOD.

De'lus (or DELOS, Δῆλος, so called from having appeared, δῆλος, *manifest*, from the sea, at the command of Neptune), mentioned in 1 Macc. xv, 23, as one of the places addressed by Lucius in behalf of the Jews, is the smallest of the islands called Cyclades, in the Ægean Sea (see Smith's *Dict. of Class. Geog.* s. v.), being only about five miles in circumference (Pliny, ii, 89). It was situated between Myconus and Rhenæa. It was one of the chief seats of the worship of Apollo, and was celebrated as the birth-place of this god and of his sister Artemis, or Diana (Spanheim on Callimachus's *Hymn to Del.*). We learn from Josephus (*Ant.* xiv, 10, 8) that Jews resided in this island, which may be accounted for by the fact that, after the fall of Corinth (B.C. 146), it became the centre of an extensive commerce (Cicero, *Manil.* 18; Pliny, iv, 22; xvi, 89; Livy, xli, 25; xliv, 29; Strabo, xiv, p. 688; Pausanius, iii, 23). The sanctity of the spot (Grote, *Greece*, iii, 222) and its consequent security, its festival, which was a kind of fair, the excellence of its harbor, and its convenient situation on the highway from Italy and Greece to Asia, made it a favorite resort of merchants (Strabo, x, p. 486). So extensive was the commerce carried on in the island that 10,000 slaves are said to have changed hands there in one day (Strabo, xiv, p. 668). It was especially celebrated for its bronze (*æs Deliacum*, Pliny, xxxiv, 2, 4; Cicero, *Rosc.* 46; *Verr.* ii, 34). Delus is at present uninhabited except by a few shepherds, but contains extensive ruins (Tournefort, i, 349 sq.). It, together with an adjoining island, is now called *Dhiles*. See Leake, *Northern Greece*, iii, 95 sq.; Ross, *Reisen auf. d. Griech Inseln*, i, 30; ii, 167; Sallier, *Hist. de l'Isle de Delos*, in the *Mém. de l'Acad. des Inscrip.* iii, 376; Schwenk, *Deliacorum*, Part I (Francof. 1825); Schläger, *De Rebus Deli* (Mitav. 1840).

De Lyra. See LYRA.

De Maistre. See MAISTRE.

De'mas (Δημᾶς, probably a contraction from Δημήτριος, or perhaps from Δήμαρχος), a companion of the apostle Paul (called by him his fellow-laborer, σύνεργος, in Philem. 24; see also Col. iv, 14) during his first imprisonment at Rome. B.C. 57. At a later period (2 Tim. iv, 10), we find him mentioned as having deserted the apostle through love of this present world, and gone to Thessalonica. B.C. 64. This departure has been magnified by tradition into an apostasy from Christianity (so Epiphanius, *Hæres.* li, 6), which is by no means implied in the passage (Buddei *Eccl. Apost.* p. 311 sq.).

Demay. See TALMUD.

Deme'trius (Δημήτριος, probably from Δημήτηρ, the Greek name of the goddess Cybele), the name originally of several of Alexander's generals (see Smith's *Dict. of Class. Biog.* s. v.), and borne by several of the Macedonian and Syrian princes, two of whom are often referred to in the Apocrypha, and three in Josephus; also by two men mentioned in the New Test., and by several others in Josephus.

1. DEMETRIUS I, surnamed SOTER (Σωτήρ, "the Saviour," in recognition of his services to the Babylonians), king of Syria, was the son of Seleucus IV Philopator, and grandson of Antiochus the Great. While still a boy he was sent by his father as a hostage to Rome (B.C. 175) in exchange for his uncle, Antiochus Epiphanes (Appian, *Syr.* 45). From his position he was unable to offer any opposition to the usurpation of the Syrian throne by Antiochus IV; but on the death of that monarch (B.C. 164) he claimed his liberty, and the recognition of his claim by the Roman senate in preference to that of his cousin Antiochus V. His petition was refused from selfish policy (Polyb. xxxi, 12), and by the advice and assistance of Polybius, whose friendship he had gained at Rome (Polyb. xxxi, 19; Justin, xxxiv, 3), he left Italy secretly, and landed with a small force at Tripolis, in Phœnicia (2 Macc. xiv, 1; 1 Macc. vii, 1; Josephus, *Ant.* xii, 1). The Syrians soon declared in his favor (B.C. 162), and Antiochus and his protector Lysias were put to death (1 Macc. vii, 2, 3; 2 Macc. xiv, 2).

Having thus gained possession of the kingdom, Demetrius succeeded in securing the favor of the Romans (Polyb. xxxii, 4), and he turned his attention to the internal organization of his dominions. The Græcizing party were still powerful at Jerusalem, and he supported them by arms. In the first campaign his general Bacchides established Alcimus in the high-priesthood (1 Macc. vii, 5–20); but the success was not permanent. Alcimus was forced to take refuge a second time at the court of Demetrius, and Nicanor, who was commissioned to restore him, was defeated in two successive engagements by Judas Maccabæus (1 Macc. vii, 31, 32, 43–45), and fell on the field (see Michaelis on 1 Macc. vii, 32, against Wernsdorf, *De fide Maccab.* p. 124 sq.; also Joseph. *Ant.* xii, 10, 2). Two other campaigns were undertaken against the Jews by Bacchides (B.C. 161–158); but in the mean time Judas had completed a treaty with the Romans shortly before his death (B.C. 161), who forbade Demetrius to oppress the Jews (1 Macc. viii, 31). Not long afterwards Demetrius further incurred the displeasure of the Romans by the expulsion of Ariarathes from Cappadocia (Polyb. xxxi, 20; Justin, xxxv, 1), and he alienated the affection of his own subjects by his private excesses (Justin, l. c.; comp. Polyb. xxxiii, 14). When his power was thus shaken (B.C. 152), Alexander Balas was brought forward, with the consent of the Roman senate, as a claimant to the throne, with the powerful support of Ptolemy Philometor, Attalus, and Ariarathes. Demetrius vainly endeavored to secure the services of Jonathan, who had succeeded his brother Judas as leader of the Jews, and now, from the recollection of his wrongs, warmly favored the cause of Alexander (1 Macc. x, 1–6). The rivals met in a decisive engagement (B.C. 150), and Demetrius, after displaying the greatest personal bravery, was defeated and slain (1 Macc. x, 48–50; Joseph. *Ant.* xiii, 2, 4; Polyb. iii, 5). In addition to the very interesting fragments of Polybius, the following references may be consulted: Justin, xxxiv, 3; xxxv, 1; Appian, *Syr.* 46, 47, 67; Livy, *Epit.* xlvii; Euseb. *Ann. Chron.* p. 165. He left two sons, Demetrius, surnamed Nicator, and Antiochus, called Sidetes, both of whom subsequently ascended the throne. See ANTIOCHUS.

Tetradrachm (Attic Talent) of Demetrius I *Obverse:* Head of Demetrius to the right. *Reverse:* Legend (in Greek), "Of king Demetrius Soter;" in the field, monogram and MI; in exergue, AΞP (161 of Ær. Seleuc.); seated female figure to the left, with sceptre and cornucopia.

2. DEMETRIUS II, surnamed NICĀTOR (Νικάτωρ, "the Victor;" so on coins, Eckhel, iii, 229 sq.; elsewhere NICĀNOR), king of Syria, was the elder son of Demetrius Soter, preceding. He was sent by his father, together with his brother Antiochus, with a large treasure, to Cnidus (Justin, xxxv, 2), when Alexander Balas laid claim to the throne of Syria, and thus escaped falling into the hands of that usurper. When he was grown up, the weakness and vices of Alexander furnished him with an opportunity of recovering his father's dominions. Accompanied by a force of Cretan mercenaries (Justin, l. c.; comp. 1 Macc. x, 67), and aided by Ptolemy Philometor (1 Macc. xi, 19; Diod. Sic. *Ecl.* xxxii, 1), whose daughter Cleopatra was promised to him, he made a descent on Syria (B.C. 148 or 147), and was received with general favor (1 Macc. x, 67 sq.). Jonathan, however, still supported the cause of Alexander, and defeated Apollonius, whom Demetrius had appointed governor of Cœle-Syria (1 Macc. x, 74–82). In spite of these hostilities, Jonathan succeeded in gaining the favor of Demetrius when he was established in the kingdom (1 Macc. xi, 23–27), and obtained from him an advantageous commutation of the royal dues and other concessions (1 Macc. xi, 32–37). In return for these favors the Jews rendered important services to Demetrius when Tryphon first claimed the kingdom for Antiochus VI, the son of Alexander (1 Macc. xi, 42); but afterwards, being offended by his faithless ingratitude (1 Macc. xi, 53), they espoused the cause of the young pretender. In the campaign which followed, Jonathan defeated the forces of Demetrius (B.C. 144; 1 Macc. xii, 28); but the treachery to which Jonathan fell a victim (B.C. 143) again altered the policy of the Jews. Simon, the successor of Jonathan, obtained very favorable terms from Demetrius (B.C. 142); but shortly afterwards Demetrius was himself taken prisoner (B.C. 138) by Arsaces (q. v.) VI (Mithridates), king of Parthia, whose dominions he had invaded (1 Macc. xiv, 1–3; Justin, xxxvi; Joseph. *Ant.* xiii, 5; Livy, *Epit.* lii). Appian and Justin place this captivity of Demetrius before the revolt of Tryphon, but the order of the narrative in the book of Maccabees is most probable (notwithstanding Wernsdorf, *De fide Maccab.* p. 137 sq.). Mithridates treated his captive honorably, and gave him his daughter Rhodoguna in marriage (Appian, *Syr.* 67); and after his death, though Demetrius made several attempts to escape, he still received kind treatment from his successor, Phraates. When Antiochus Sidetes, who had gained possession of the Syrian throne, invaded Parthia, Phraates employed Demetrius to effect a diversion. In this Demetrius succeeded, and when Antiochus fell in battle he again took possession of the Syrian crown (B.C. 128). Not long afterwards a pretender, supported by Ptolemy Physcon, appeared in the field against him, and after suffering a defeat he was assassinated, according to some by his wife Cleopatra (Appian, *Syr.* 68), while attempting to escape by sea (Justin, xxxix, 1; Joseph. *Ant.* xiii, 9, 3). See CLEOPATRA.

Tetradrachm (Attic Talent) of Demetrius II. *Obverse:* Head of Demetrius to the right. *Reverse:* Inscription (in Greek), "Of king Demetrius Theos Philadelphus Nicator;" in exergue, ΞPΘ (169? Ær. Seleuc.). Apollo to the left, seated on cortina, with arrow and bow.

3. DEMETRIUS III, surnamed EUCÆRUS (Εὔκαιρος, i. e. "the Opportune);" on coins THEOS PHILOPATOR and SOTER (Eckhel, iii, 245, 246), king of Syria, was the fourth son of Antiochus Grypus, and grandson of Demetrius II. During the civil wars that followed the death of his father, he was set up as king of Damascus, or Cœle-Syria, by the aid of Ptolemy Lathyrus, king of Cyprus; and after the death of Antiochus Eusebes, he and his brother Philip for a time held the whole of Syria (Josephus, *Ant.* xiii, 13, 4). His assistance was invoked by the Jews against the tyranny of Alexander Jannæus (q. v.); but, though he defeated this prince in battle, he did not follow up the victory, but withdrew to Berœa. War immediately broke out between him and his brother Philip; and Strator, the governor of Berœa, who supported Philip, having obtained assistance from the Arabians and Parthians, blockaded Demetrius in his camp, until he was compelled by famine to surrender at discretion. He was sent as a prisoner to Mithridates (Arsaces IX), king of Parthia, who detained him in an honorable captiv-

ity till his death (Josephus, *Ant.* xiii, 14). His coins bear date from 218 to 224 Ær. Seleucid., i. e. B.C. 94–88. See SYRIA.

Coin of Demetrius III.

4. Surnamed PHALEREUS (ὁ Φαληρεύς, *the Phalerian*), the zealous keeper of the Alexandrian library under Ptolemy Philadelphus, who at his suggestion undertook the Septuagint (q. v.) version, and secured the benefit of the criticism of the resident Jews upon the translation (Josephus, *Ant.* xii, 2, 1, 4, 13). See Ostermann, *De Dem. Phal. vita, rebus gestis et scriptorum reliquiis* (pt. i, Hersfeld, 1847, 4to).

5. A freed-man of Pompey, who rebuilt, at his request, the city of Gadara, of which he was a native (Josephus, *Ant.* xiv, 4, 4).

6. An Alexandrian Jew and alabarch, who married Mariamne (formerly the wife of Archelaus), by whom she had a son Agrippinus (Josephus, *Ant.* xx, 7, 3).

7. A silversmith at Ephesus, who, being alarmed at the progress of the Gospel under the preaching of Paul, assembled his fellow-craftsmen, and excited a tumult by haranguing them on the danger that threatened the worship of the great goddess Diana, and consequently their own craft as silversmiths. A.D. 52. Their employment was to make "silver shrines for Diana" (Acts xix, 24); and it is now generally agreed that these "shrines" (ναοί) were silver models of the temple, or of its adytum or chapel, in which perhaps a little image of the goddess was placed. These, it seems, were purchased by foreigners, who either could not perform their devotions at the temple itself, or who, after having done so, carried them away as memorials, or for purposes of worship, or as charms. The continual resort of foreigners to Ephesus from all parts, on account of the singular veneration in which the image of the goddess was held, must have rendered this manufacture very profitable, and sufficiently explains the anxiety of Demetrius and his fellow-craftsmen. See DIANA.

8. A Christian, mentioned with commendation in 3 John 12. A.D. cir. 90. From the connection of the apostle John with Ephesus at the time the epistle was written, some have supposed that this Demetrius is the same as the preceding, and that he had been converted to Christianity. But this is a mere conjecture, rendered the more uncertain by the commonness of the name.

Demetrius, bishop of Alexandria, is said to have succeeded Julian in that see A.D. 189 (Eusebius, *H. E.* v, 22). He was at first the friend of Origen, and committed the instructions in the school of Alexandria entirely to him (Eusebius vi, 3); but he afterwards, "overcome by human infirmity" (Euseb. vi, 8) seems to have become envious of Origen, and his enemy. When Origen (A.D. 228) was ordained presbyter at Cæsarea, Demetrius excluded him from the Church—an act which was not recognized by the churches generally. Demetrius died about 248.—Mosheim, *Commentaries*, cent. iii, § 30. See ORIGEN.

Demetrius, CYDONIUS, a theologian of the Greek Church, lived in the second half of the 14th century. He was born at Thessalonica or Byzantium, and probably received his surname from the circumstance that he lived at Cydone in Crete. The emperor John Cantacuzenus, who was greatly attached to him, raised him to the highest posts of honor in the state. When this prince thought of embracing monastic life, Demetrius determined to leave the world also, and both entered the same convent in 1355. Subsequently he went to Italy to study the theology of the Latin Church, and while there became a friend of Thomas Aquinas and other prominent Latin theologians. The year of his death is not known; the latest incident in his life is a letter addressed in 1384 to the emperor Manuel Palæologus, on the occasion of the latter ascending the throne. He is the author of a large number of works, and the translator of many Latin works into Greek. Most of his works have never been printed. His work, Περὶ τοῦ καταφρονεῖν τὸν θανατόν (*de contemnenda morte*, on *contemning death*), was published by R. Seiler (Basel, 1553), and by Kuinoel (Leipzic, 1786). A selection of his letters was published by Matthæi (Moscow 1776, and Dresden, 1789). For a list of his writings and their various editions, see Hoffmann, *Bibliographisches Lexikon*, i, 499; Fabricius, *Bibliotheca Græca*, i, 498; see also Hoefer, *Biographie Générale*, xiii, 553.

Demission, the name in Scotch Presbyterian churches for the act by which a minister resigns his charge. He can only resign it into the hands of the presbytery, as they ordained him. The court judges of the grounds of demission, and may refuse or comply. An old form in the Church of Scotland was as follows: "I, Mr. A. B., minister at C., for such causes, demit my ministry at the said parish of C., purely and simply into the hands of the presbytery of D., declaring that, for my part, the said parish shall be held vacant, and that it shall be free to the parish and presbytery, after due intimation hereof, by warrant of the presbytery, to call and plant another minister therein; and consent that this be recorded in the presbytery books, *ad futuram rei memoriam.* In witness whereof I have subscribed these presents at ——, etc." The demission being accepted, the church is declared vacant.

Demiurge (Greek, δημιουργός, from δῆμος, people, and ἔργω, obs. *I work; a worker for the people*; hence, a *workman, craftsman*) was the name given by the Gnostics to the mysterious being by whom God is supposed to have created the universe. The Gnostics believed that the Supreme Being dwelt in a fulness (a pleroma) of inaccessible light; that he had created other beings, called æons, or emanations; that from these other æons were descended; and from these an inferior order of spirits were derived, among whom one called the Demiurge had created the world, and had rebelled against the Supreme Being. He makes out of matter the visible world, and rules over it. He was considered as the God of the Jews. "In the further development of the idea the Gnostic systems differ; the anti-Jewish Gnostics, Marcion and the Ophites, represent the Demiurge as an insolent being, resisting the purposes of God, while the Judaizing Gnostics, Basilides and Valentine, make him a restricted, unconscious instrument of God to prepare the way of redemption."—Schaff, *Hist. of Christian Church*, i, § 71; Mosheim, *Commentaries* (Murdock's translation, i, 45, 461; ii, 331). See GNOSTICISM.

Demme, CHARLES RUDOLPH, D.D., an eminent Lutheran divine, the son of Dr. Herman Demme, was born in Mühlhausen, Thuringia, April 10, 1795. He studied at the Gymnasium at Altenburg, and the universities of Göttingen and Halle. On the uprising of Germany to repel the invasion of Napoleon, he offered his services, and immediately repaired to the scene of conflict. His zeal led him into imminent danger; and at Waterloo he was carried, wounded and bleeding, from the field. He had been designed for the law. He came to this country in 1818, a young man of twenty-three, deeply imbued with the love of liberty, and an ardent admirer of American institutions. He entered the ministry in 1819, and accepted a call to Hummelstown, Pa. He removed to Philadelphia

in 1822, and became associate pastor with Rev. Dr. Schæffer of St. Michael's and Zion's churches, where he continued to labor for thirty-seven years with great fidelity and success. Worn out by great labors, for several years before his death he was unable to perform any active duties in the ministry. He died Sept. 1, 1863. Dr. Demme was a man of enlarged culture, an accomplished scholar, and a prince among preachers. As a pulpit orator he was not surpassed by any of his contemporaries. Illustrating in his life the power and blessedness of the Gospel, he brought to the service piety and learning, and made the ministry of the Word the grand aim of his life, with which no other pursuit was allowed to interfere. In 1839 he was elected to the professorship of the Theological Seminary, Columbus, Ohio, and in 1849 was appointed professor in the seminary at Gettysburg, but both positions he felt it his duty to decline. He was a member of the American Philosophical Society, and was honored with the doctorate of divinity from the University of Pennsylvania. He edited in German the works of Josephus, carefully comparing the translation with the original, and adding a large number of notes.

Demon; Demoniac. See DÆMON; DÆMONIAC.

Dem'ophon (Δημοφῶν), a Syrian general or military governor in Palestine under Antiochus V. Eupator (2 Macc. xii, 2).

Dempster, John, D.D., an eminent Methodist minister and promoter of theological learning in the Church, was born Jan. 2, 1794, in the town of Florida, N. Y. His father, the Rev. James Dempster, was a Scotchman, educated at the University of Edinburgh, and, though bred a Presbyterian, was received by Mr. Wesley as one of his colaborers, and sent by him as a missionary to America. He preached for a season in the city of New York, but for some reason became disconnected from Mr. Wesley's service, and was thereafter a pastor of a Presbyterian church in the town of Florida till his death in 1803. The son was too young to profit intellectually from his father's training, and grew up ignorant almost of books till his conversion at a Methodist camp-meeting in 1812, when he began a course of sedulous and systematic study, which he kept up during his whole life. In 1816 he entered the itinerant ministry of the Methodist Episcopal Church, and his successive appointments, as stated in the Minutes, were as follows: 1816, St. Lawrence, Lower Canada District; 1817, Paris, New York; 1818, Watertown; 1819, Scipio; 1820, superannuted; 1821–22, Watertown; 1823, Homer; 1824, Auburn; 1825–26, Rochester; 1827–28, Cazenovia; 1829–32, Cayuga District, Oneida Conference; 1833–35, Black River District; 1836–41, Missionary to Buenos Ayres; 1842, Vestry Street, New York; 1843–44, Mulberry Street; 1845–54, professor in Biblical Institute, Newbury, Vt., and Concord, N. H.; 1855–63, professor in Garrett Biblical Institute, Evanston, Ill. "His fields of labor were extremely diverse, and yet he occupied every one of them with marked success. From the borders of Canada on the north, to St. Augustine, Fla., on the south, whither he went in 1835, primarily in search of health, and thence to Buenos Ayres, in South America; from New England on the east to Illinois on the west, his name has, during the last half century, been familiar to the good, and associated with active labors for the promotion of the cause of Christ." By incessant labor he made up largely the deficiencies in his early education, acquiring the Latin, Greek, and Hebrew languages, and a fair amount of general culture. His mind, naturally metaphysical, turned especially to questions of philosophical theology, such as the divine nature and government, the will, etc. and on these topics he both spoke and wrote with great success. But the great work of his life was the organization of theological seminaries in the Methodist Episcopal Church. After eighteen years of labor, he saw two of these (Concord and Evanston) in full operation, largely as the fruit of his own industry, energy, and perseverance. He died Nov. 28, 1863, at Chicago. As a preacher he was at once simple, stirring, and profound. He seized with a master hand upon the great cardinal truths of revelation and providence, and wielded them with equal application to the judgment and the conscience. He left many MSS., especially a work on the will; but, thus far, all that has been published in permanent form is his *Lectures and Addresses* (Cincinnati, 1864, 12mo). See *Appendix* to his *Lectures; Minutes of Conferences*, 1864, p. 148; *Methodist Quarterly Review*, July, 1864; Stevens, *History of the Methodist Episcopal Church*, vol. iii.

Dempster, Thomas, a Scotchman of much miscellaneous erudition, was born at Muiresk, Aberdeenshire, about the year 1579. He studied at Cambridge, went to Paris, and obtained a temporary professorship in the College of Beauvais, where he manifested a very quarrelsome temper. He was afterwards professor at Pisa and Bologna, near which city he died, Sept. 6, 1625. Among his writings is a *Historia Ecclesiastica Gentis Scotorum*, "a work in which his desire to magnify the merits of his country often induced him to forge the names of persons and books that never existed, and to unscrupulously claim as Scotchmen writers whose birth-place was doubtful."—*New Gen. Dictionary*, iv, 359.

Den, the rendering in the Auth. Vers. of the following Heb. and Greek words: מְעָרָה, *meärah'* (Isa. xxxii, 14; Jer. vii, 11), a *cave* (as elsewhere rendered); מְאוּרָה, *meürah'*, a *hole* (as of a venomous reptile, Isa. xi, 8); סֹךְ, *sok*, a *booth or thicket* ("pavilion," Psa. xxvii, 5; "tabernacle," Psa. lxxvi, 2), hence a "covert" (Jer. xxv, 38) or *lair* of a wild animal (Psa. x, 9); so מָעוֹן, *maon'* (Jer. ix, 11; x, 22), or מְעוֹנָה, *meönah'* (Job xxxviii, 40; Psa. civ, 22; Cant. iv, 8; Amos iii, 4; Nah. ii, 12), properly a dwelling-place or habitation (as elsewhere rendered); מְנָחָרָה, *minharah'*, a *fissure* in the rocks, used for hiding (Judg. vi, 2); אֹרֶב, *e'reb*, an *ambush* ("lie in wait," Job xxxviii, 40), hence *lair* of a beast of prey (Job xxxvii, 8); σπήλαιον, a *cave* (as rendered John xi, 38), hence a *recess* for secrecy (Heb. xi, 38; Rev. vi, 15), or a resort of thieves (Matt. xxi, 13; Mark xi, 17; Luke xi, 38). See CAVE.

Antique Figure of a Man in a Den of Lions

In Dan. vi, the "*den* (Chald. גֻּב, *gob*, a pit; Sept. λάκκος; Vulg. *lacus*) of lions" is repeatedly named as a peculiar means of punishment for state offenders at Babylon. This usage, although not mentioned by any other ancient authority, has received remarkable confirmation (see "*Truths of Revelation demonstrated by an Appeal to Monuments*," etc., "by a Fellow of seven learned Societies," Lond. 1831) from certain remains discovered in that region by modern travellers (Kitto, *Pict. Bible*, note on Dan. vi, 16), especially one on a block of white marble found near the tomb of Daniel at Susa, and thus described by Sir R. K. Porter in his *Travels in Persia* (ii, 416): "It does not exceed ten inches in width and depth, measures twenty in length, and is hollow within, as if to receive some deposit. Three of its sides are cut in bas-relief, two of them with similar representations of a man apparently naked, except a sash round his waist and a sort of cap on his head. His hands are bound behind him. The corner of the stone forms the neck of the figure, so that its head forms one of its ends. Two lions in sitting posture appear on either side at the top, each having a paw on the head of the man." See LION.

Denarius (δηνάριον), the principal silver coin of the Romans, which took its name from having been originally equal to *ten* times the "as" (Pliny, xxxiii, 12), which was the unit. See FARTHING. It was in later times (after B.C. 217) current also among the Jews, and is the coin which is called "a PENNY" (q. v.) in the Auth. Vers. The denarii were first coined in B.C. 269, or four years after the first Punic War, and the more ancient specimens are much heavier than those of later date (Böckh, *Metrol. Unters.* p. 299, 469). Those coined in the early period of the commonwealth have the average weight of 60 grains, and those coined under the empire of 52.5 grains. With some allowance for alloy, the former would be worth 8.6245 pence, or 17 cents, and the latter 7.5 pence, or 15 cents. It has been supposed, however, that the reduction of weight did not take place till the time of Nero; and, in that case, the denarii mentioned in the Gospels must have been of the former weight and value, although the equivalent of the Greek δραχμή (Pliny, xxi, 109), or about 15 cents, is the usual computation (see Wurm, *De ponder. mensura*, p. 54). A denarius was the day-wages of a laborer in Palestine (Matt. xx, 2, 9, 13; Tobit v, 15); and the daily pay of a Roman soldier was less (Tacitus, *Ann.* i, 17). In the time of Christ the denarius bore the image of the emperor (Matt. xxii, 19; Mark xii, 16), but formerly it was impressed with the symbols of the republic.

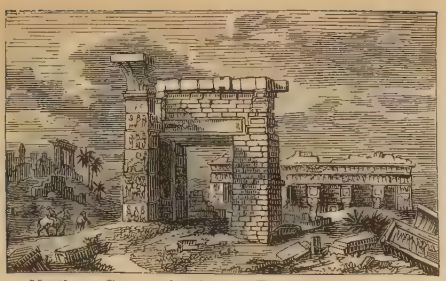
The name of this coin occurs in the Talmud, in the form דִּינָר (see Lightfoot, at Matt. xx, 2). Pliny speaks of a *golden* denarius (*Hist. Nat.* xxxiii, 13; xxxiv, 17; xxxvii, 3; so also the Mishna, *Kiddush.* ii, 2, etc.), which was of the average weight of 120 grains, and was current for 25 of the silver coin. In later times a copper coin was called denarius. It has even its representative in the modern Oriental *dinar*. See Greave, *Roman Foot and Denarius* (Lond. 1647); Rasche, *Lex. Rei Numariæ*, II, i, 138; Pinkerton, *Essay on Medals*, i; Akerman, *Catalogue of Rom. Coins* (Lond. 1834), i, 15–19; and the essays *De denario census*, by Christiern (Upsal. 1732) and Mayer (Gryph. 1702). See MONEY.

Roman Denarii of the time of the Republic, now in the British Museum (actual size; weight of the first, 60.6 grains; of the second, 58.5).

Denck. See DENK.

Denderah (Gr. *Tentyra*; Coptic *Tentore*, probably from *Tĕi-n-Athor*, the abode of Athor), a ruined town of Upper Egypt, situated near the left bank of the Nile, in lat. 26° 13′ N., long. 32° 40′ E. It is celebrated on account of its temple, dating from the period of Cleopatra and the earlier Roman emperors, and one of the finest and best preserved structures of the kind in Egypt. The principal temple measures 220 feet in length by about 50 in breadth, and has a noble portico supported on 24 columns. The walls, columns, etc., are covered with figures and hieroglyphics. Prominent among the former is that of Athor or Aphrodite, to whom the temple was dedicated. On the ceiling of the portico are numerous mythological figures arranged in zodiacal fashion, which

"Zodiac" of Denderah.



Northern Gate and principal Temple of Denderah.

have been regarded as a representation of the zodiac; but certain peculiarities have led some recent archæological travellers to doubt whether the figures were intended to have any reference to astronomy. There are many other sacred buildings at Denderah, including a temple of Isis. The whole, with the exception of one propylon, are surrounded by a sun-dried brick-wall, 1000 feet long on one side, and in some parts 35 feet high.

Denial. See SELF-DENIAL.

DENIAL OF CHRIST (Luke xii, 9). See PETER.

Denis, the French name for Dionysius (q. v.).

Denis or **Denys,** St., 1. the so-called apostle of France and first bishop of Paris, is said to have been sent from Rome about 250 A.D. to preach the Gospel to the Gauls. After delays from persecutions brought on him by his zeal at Arles and other places, he arrived in Paris, where he made many proselytes. Pescennius or Sicinnius Lescennius, who was then the Roman governor of this part of Gaul, ordered Denis to be brought before him, along with other two Christians, Rusticus, a priest, and Eleutherius, a deacon. Finding them firm in their faith in spite of torture, Pescennius caused them to be beheaded, A.D. 272, or, as others say, A.D. 290. Gregory of Tours, Fortunatus, and the Latin martyrologists state that the bodies of the three martyrs were thrown into the Seine, but were recovered by a pious woman, and buried near the place where they lost their lives. Their supposed relics, in silver caskets, were afterwards taken to the abbey of St. Denis (see below). The *Acta* of St. Denis, written about the end of the 7th or beginning of the 8th century, is founded upon popular traditions, and the best historians of France hold that nothing can be certainly known of either the time or the place of the martyrdom, or of the genuineness of the relics of St. Denis. St. Denis was for a long time confounded with Dionysius the Areopagite (q. v.). He is honored as a saint in the Roman Church on the 9th of October. His name was the war-cry of the French soldiers, who charged to the cry *Montjoye St. Denis.*—Hoefer, *Nouv. Biog. Générale*, xiii, 674. See DIONYSIUS THE AREOPAGITE.

2. The ABBEY OF ST. DENIS, near Paris, named from the tradition that Dionysius the Areopagite was buried there. The abbey was founded by Dagobert I, king of France, A.D. 613. The vaults of the church of St. Geneviève, connected with the abbey, contained (before the French Revolution) the bodies of 25 kings, 10 queens, 84 princes and princesses, and those of Bertrand du Guesclin and Turenne. In 1793 a mob, headed by the Jacobins, destroyed the abbey and carried the contents of the vaults to the nearest cemetery. The abbey was restored in 1806, and after the Restoration Louis XVIII caused such of the remains as could be found to be restored. There is still at the abbey of St. Denis a chapter of St. Dionysius Areopagita, composed of the grand almoner (primicier), 10 canons of the first class (archbishops and bishops aged over 60), and 24 canons of the second class.—Pierer, *Universal-Lexikon*, s. v.

Denis, MICHAEL, a German Jesuit, was born at Schärding, on the Inn, Sept. 27, 1729. He entered the order of the Jesuits in 1747, and was ordained priest in 1756. In 1759 he was appointed professor at the Collegium Theresianum at Vienna, and in 1773 librarian of the library of Garelli. After the suppression of the Collegium Theresianum in 1784, the emperor Joseph II appointed him second "custos" and aulic councillor. He died Sept. 29, 1800. Denis was in friendly relations with Klopstock and other prominent scholars of Protestant Germany, and was esteemed for his amiable character and for his efforts in behalf of German literature. He became especially known by his attempt to imitate the poetry of the ancient bards; but his poems were more admired for their noble sentiments than their poetical value. He also wrote several bibliographical works, and a Latin elegy on the downfall of his order (*Fatum Jesuitarum*). A posthumous autobiography of Denis was published, together with other posthumous writings, by Retzer (*Literarischer Nachlass*, Vienna, 1801–1802).—*Allgem. Real-Encyklop.* iv, 285.

Denk, JOHANN, an Anabaptist of the 16th century. Nothing is known of his early years. In 1521 he was in Basle, and in 1523 at Nürnberg, as rector of the school of St. Sebaldus. He rejected infant baptism, and promulgated anti-trinitarians ideas. He was brought before the council of Nürnberg, and, being unable to defend himself, was expelled from the city for life. We next find him in Augsburg in the year 1525, where he wrote and edited his book *vom Gesetze Gottes.* In 1526 he came to Strasburg, where he seems first to have become acquainted with Louis Hetzer (q. v.). Their connection resulted in the publication of an edition of the Old Testament prophets. It was published in 1527 at Worms, and Luther speaks favorably of the translation as such. Denk's theological errors soon became known, and he was cited to a public disputation by the clergy of Strasburg. Bucer was his principal opponent, and based his charge, that Denk's teaching made sin a mere empty sound, upon the book *vom Gesetze Gottes.* Denk was defeated and driven from the city. After a few months spent in travelling, during which he ventured to revisit Nürnberg, he went to Basle, where he died of the plague in November, 1527. In his doctrines he was Anabaptist and anti-trinitarian, and the following dogmas were peculiar to him. He taught an internal word which, as the power of the Highest, produces knowledge and love in man; that salvation is not connected with the Holy Scriptures; the law, under which he comprehends the entire Scriptures, is opposed to the spirit; the sacraments are of a subordinate and superfluous character to believers; the wicked are finally to be saved, etc. Ranke (*Reformation*, iii, 559, cited by Hardwick, *Ch. Hist.* ii, ch. v) gives the following statement of Denk's views: "The basis of his doctrine is, that God is love, which, he said, flesh and blood could never have understood had it not been embodied in certain human beings, who might be called divine men, or the children of God. But in one of them love was supremely exemplified—in Jesus of Nazareth. He had never stumbled in the path marked out by God; he had never lost his unity with God; he was a Saviour of his people, for he was the forerunner of all those who should be saved. This was the meaning of the words that all should be saved by Christ." His followers were called *Dæmoniaci*, because they named seven evil spirits to their candidates for baptism, which they were supposed to possess, and which must be given up, while seven good spirits were to be received in their stead.—Herzog, *Real-Encyklopädie*, xix, 403; Trechsel, *Protest. Antitrinitarier*, i, 17 sq.; *Theol. Stud. u. Kritiken*, 1851, p. 121, 412.

Denmark, a kingdom in Europe, with an area of 14,731 square miles, and in 1880 (according to the cen-

sus) 1,969,039 inhabitants in Denmark proper, and 127,342 in its dependencies.

I. *Church History.* — Willebrord is said to have been the first Christian missionary in Denmark (8th century), but he was not able to establish any permanent mission. Charlemagne extended the territory of Christianity to the frontier of Denmark, and his son, the emperor Louis, sent archbishop Eddo of Rheims as his ambassador to king Harold Klak, who had requested his aid. Eddo established a missionary school in Holstein. King Harold, who had been deprived of his throne, was baptized in 826, with his family and many of his countrymen, and soon after Ansgar (q. v.) was placed at the head of the Danish mission. Through his labors Christianity got a firm footing, but had still to struggle for about 150 years with paganism, until Canute the Great (1019–35), completed the Christianization of the entire country. The last stronghold of paganism, the island of Bornholm, was converted about 1060. The bishoprics which were established in Denmark were subordinate to the archbishop of Bremen until the 11th century, when a new archiepiscopal see was established for the north at Lund. The first bishops appointed in Denmark were Englishmen, and English influence prevailed until the 12th century, when Denmark allied herself more closely to France. In the following century French influence was supplanted by German. Convents were very numerous, but the enforcing of celibacy cost the pope more trouble in Denmark than in any other country. Until the 12th century the clergymen were generally married. In 1222 a papal legate came to Denmark to carry through the introduction of celibacy. Several hundred priests then appealed from the pope to a general council, but a national synod aided the legate in accomplishing his purpose. On the whole, Denmark was but little affected by the great ecclesiastical movements of the Middle Ages. The Inquisition remained almost unknown. Protestant ministers were called to Denmark as early as 1520, but the bishops, whom

Map of Denmark.

their wealth made almost independent of the king, opposed the Reformation. King Frederick I declared himself in 1526 in favor of Protestantism, yet the Diet of Odensee, in 1527, only gave to the Lutherans equal rights with the Roman Catholics. The Lutheran Church obtained a complete victory under Christian III, who in 1536 deposed the hostile bishops, and called Bugenhagen (q. v.) to Denmark to reorganize the Danish Church on an evangelical basis. Not long after, the whole country joined the Lutheran Church, and for more than a hundred years the exercise of any other religion was forbidden. The Danish Church did not produce any symbolical books of its own, but adopted the Confession of Augsburg of 1530, and the smaller Catechism of Luther, which, with the three confessions of faith of the ancient Church, are regarded as the symbolical books of the Danish Church. The subsequent development of the Danish Church was a reflection of that of Germany, including also the Rationalism of the 18th century. Yet in that very century Denmark was a model for all Europe by its zeal for foreign missions. See EGEDE. A powerful reaction against the predominance of *Rationalism* commenced in 1826, under Dr. Grundtvig and Dr. Rudelbach. Some years after Grundtvig became the leader of a *Low-Church* evangelical party, and Rudelbach of the *High-Church* Lutheran party. The strife between these two parties still divides the Church. The party headed by Grundtvig inclines towards Congregational principles, and has intimated that they may be induced to separate altogether from a connection with the state. Only a very limited toleration was granted to members of dissenting denominations in Denmark until 1848. In a few cities only (Copenhagen, Fridericia, Rendsburg, Gluckstadt, Altona) equal rights were granted to dissenters; but all restrictive laws were repealed in 1848 for Denmark proper, and the number of dissenters has since considerably increased. In 1859, Denmark was visited for the first time since the 16th century by a Roman bishop, who met, on the part of the king, with a friendly reception. According to the new Constitution of 1866, the Lutheran Church is the state church, and the king must belong to it; but otherwise there is an absolute liberty for all religious sects.

II. *Constitution.*—The first constitution of the Protestant Church of Denmark was drawn up by a committee, then revised by Luther and the other theologians of Wittenberg, and published, with some additions of the king, in 1537. The code of 1683 made the king the supreme head of the Church, with almost absolute powers. The king exercises ecclesiastical jurisdiction through the bishops, all of whom are equal in rank, though the bishop of Zealand is considered *primus inter pares*, as he has the most extensive diocese and the prerogative of crowning the king. Every bishop has under him several provosts, who have each the superintendence of a district, which they visit once a year. They are elected by the pastors of the district, and confirmed by the bishop. The pastors have the right to engage chaplains. A great change in the ecclesiastical constitution of Denmark took place in 1848, in consequence of the political revolution of that year. Full religious liberty was granted to all denominations, and the right of self-government was promised to the Established Church. The diets of Denmark have ever since been occupied with the discussion of various drafts of a new Church Constitution, but so great is the divergence of religious parties, that as yet (1868) the reconstruction of the Church on the basis of self-government has not been accomplished. The principle of religious liberty, in the mean while, has worked so beneficially that the clergy and laity of all parties are almost unanimously in favor of maintaining it. When, in 1856, the ministry solicited the opinions of the diocesan synods concerning the abrogation of compulsory baptism, they generally advocated it.

III. *Worship.*—The first liturgy (altar-book) of the Danish Church was elaborated in 1555 by bishop Palladius. By order of king Christian V, a ritual, regulating the entire divine service, was issued in 1685, and soon after, in connection with a new edition of the altar-book, was prescribed for general use. Towards the close of the 18th century, a new liturgy, entirely pervaded by rationalistic views, was drawn up, but its introduction, notwithstanding the prevalence of Rationalism among the clergy, was regarded as dangerous. Yet the ecclesiastical authorities connived at any deviation from the formularies which individual clergymen saw fit to make. A new draft of a liturgy was published in 1839 by bishop Mynster, but general uniformity in external worship has never been restored. A considerable party among the clergy is against the principle of binding the whole Church to one liturgy, and in favor of extensive liberties of individual congregations. In the duchy of Sleswick a rationalistic liturgy was drawn up in 1797 by the superintendent general Adler, and at first generally introduced, yet soon its use was left to the option of the congregations. In Holstein, liturgies which strictly adhere to the Lutheran theology have always been, and are still in use.

IV. *Statistics.*—(1.) The Lutheran Church, or, as it is now (since 1849) officially called, the People's Church, has 9 bishops, viz. 4 for the islands, 4 for Jutland, and 1 for Iceland. Every bishopric is divided into a number of provostries. The number of provosts amounts to 160 for Denmark and 19 for Iceland. A theological faculty is connected with the University of Copenhagen. Among the periodicals, we mention the *Danish Church Gazette*, the organ of the (Low-Church) party of Grundtvig. A Danish missionary society was established at Copenhagen in 1821, and sustains a mission in India. (2.) Other denominations. According to the census of Feb. 1, 1880, there were in that year in Denmark proper 17,526 souls not belonging to the state church in a total population of 1,969,009, viz.: Jews, 3946; Mormons, 1722; Baptists, 3687; Reformed, 1363; Roman Catholics, 2985; Anglicans, 114; 1036 members of the Apostolical Church; 162 of the Free Lutheran Church; and the remainder, in small numbers, is divided among several other sects. The Baptists had in all Denmark in 1889, 21 churches and 2572 members. The Reformed Church has, according to an article of one of the Danish bishops in Herzog's *Real Encyklop.* only 1600 souls (900 in Denmark proper). The Methodist Episcopal Church has a flourishing mission in Copenhagen, under the charge of pastor Willerup, whose labors there (since 1858) have been very successful. An elegant Methodist Episcopal Church has just been erected in that city, and has a large congregation; in 1888 it had 265 members, and had appointments in fourteen other towns; the Methodist Sunday-schools had 2188 children, and the publication of a weekly Sunday-school paper has been commenced. The Roman Catholics have two periodicals (the *Scandinavian Church Gazette* and a political paper) and an establishment of the Sisters of Charity at Copenhagen. There were in 1859 seven congregations of Lutheran seceders, with one periodical (Oersund).—Herzog, *Real-Encyklopädie*, iii, 580 (art. by the Danish bishop, Dr. Engelstoft). See Pontoppidan, *Annales ecclesiæ Dan. diplom.* (Copenh. 1741); Munter, *Kirchengeschichte von Dänemark und Norwegen* (Leips. 1823); Wiggers, *Kirchliche Statistik*, ii, 375 sq.; Schem, *Eccles. Year-book for* 1859, p. 132 and 211, and *Ecclesiastical Almanac for* 1868.

Denominations, The Three, the designation of an association of dissenting ministers residing in London, or the immediate neighborhood, belonging to the Presbyterian, Independent, and Baptist denominations. It is usually known as *The General Body of Protestant Dissenting Ministers of London* and Westmin-

ster. At first its proceedings included loyal addresses to the throne. Dr. Calamy preached in 1731 the first sermon to ministers in Dr. Williams's library, in Redcross Street; and this *concio ad clerum* continued for several years. "Every congregation of Protestant dissenters, Presbyterians, Independents, and Baptists, in and within twelve miles of London, appoints two deputies. Since 1737 the election has regularly taken place, and the committee have unremittingly watched over bills brought into Parliament in any way affecting dissenters, kept alive an interest in behalf of the repeal of the Test and Corporation acts, supported every measure which promised to be beneficial in extending and consolidating religious liberty, and successfully exerted themselves in protecting individual ministers and congregations against those molestations to which they have been exposed on the part of bigoted and persecuting churchmen."

Dens, PETER, a Roman Catholic theologian, was born in 1690 at Boom, in Belgium. "Apparently nothing is known—at least by Protestant writers—regarding the incidents of his life, as his name appears in no encyclopædia or biographical work that we are acquainted with. The scanty information we possess is derived from the epitaph inscribed on his tomb in the chapel of the archiepiscopal college of Malines by the present (1857) rector. From this epitaph it appears that he was reader in theology at Malines for twelve years, *plebanus* or parish parish of St. Rumold's or Rumbold's Church in the same city, and president of the College of Malines for forty years. He also held various honorary church offices. He was canon and penitentiary, synodical examiner and scholastic archpriest of St. Rumold's—the metropolitan church of Belgium. He died February 15, 1775, in the 85th year of his age. The work which has rendered Dens's name familiar, even to the Protestant public, is his *Theologia Moralis et Dogmatica* (new ed. Dublin, 1832, 8 vols. 12mo). It is a systematic exposition and defence—in the form of a catechism—of every point of ethics and doctrine maintained by Roman Catholics, and is extensively adopted as the text-book of theology in their colleges. It appears to owe its popularity more to its being a handy compilation than to any great talent exhibited by its author" (Chambers, *Encyclopædia*, s. v.). A synopsis of the work by Dr. J. F. Berg, with copious notes illustrating the dangerous tendency of the Romanist moral theology, was published in 1840 (Philadelphia), and passed through repeated editions.

Deodatus, POPE. See DEUSDEDIT.

Deontology (*τὸ δέον, what is due or binding;* and *λόγος, discourse*). We take the following citations on the use of this word from Fleming, *Vocabulary of Philosophy* (Phila. 1860), s. v.: "Deontology, or that which is proper, has been chosen as a fitter term than any other which could be found to represent, in the field of morals, the principle of utilitarianism, or that which is useful" (Bentham, *Deontology, or the Science of Morals*). On the other hand, Whewell (*Preface to Mackintosh's Prelim. Dissert.* p. 20) says that "the term deontology expresses moral science, and expresses it well, precisely because it signifies the science of duty, and contains no reference to utility." Deontology involves the being bound or being under obligation, the very idea which utility does not give. "The ancient Pythagoreans defined virtue to be "Εξις τοῦ δέοντος (that is, the habit of duty, or of doing what is binding), the oldest definition of virtue of which we have any account, and one of the most unexceptionable which is yet to be found in any system of philosophy" (Stewart, *Active and Moral Powers*, ii, 446). Sir W. Hamilton observes that ethics are "well denominated deontology" (Reid's *Works*, p. 540, note).

Dependence, FEELING OF, the essence of religion, according to Schleiermacher. See SCHLEIERMACHER.

Deposit (פִּקָּדוֹן, *pikkadon'*, something placed in *trust;* "store," Gen. xli, 36; "delivered," Lev. vi, 2, 4; Sept. *παραθήκη* [so in 2 Tim. 1, 12], or *παρακαταθηκη* [see Grinfield, *N. T. Hellenisticum*, p. 1146]; Vulg. *depositum*). The arrangement by which one man kept at another's request the property of the latter until demanded back (Exod. xxii, 7), was one common to all the nations of antiquity (Sir W. Jones, *Law of Bailments*, in his *Works*, viii, 448); and the dishonest dealing with such trusts is marked by profane writers with extreme reprobation (Herod. vi, 86; Juvenal, xiii, 199, etc.; Joseph. *Ant.* iv, 8, 38; *War*, iv, 8, 5, 7), a view which is likewise taken by Clemens Alex. (*Strom.* vi, 749), Chrysostom (*Orat.* lxiv, p. 640), and others (see Rawlinson, *Herod.* iv, 477, note). Even our Saviour seems (Luke xvi, 12) to allude to conduct in such cases as a test of honesty. In later times, when no banking system was as yet devised, shrines were often used for the custody of treasure (2 Macc. iii, 10, 12, 15; Xenoph. *Anab.* v, 3, 7; Cicero, *Legg.* ii, 16; Plutarch, *Lys.* c. 18). Among an agricultural people, the exigencies of war and other causes of absence must often have rendered a temporary deposit, especially as regards animals, an owner's only course of safety. See TRESPASS. Nor was the custody of such property burdensome, for the use of it was no doubt, so far as that was consistent with its unimpaired restoration, allowed to the depositary, which office also no one was compelled to accept. The articles specified by the Mosaic law are, (1) "money or stuff;" and (2) "an ass, or an ox, or a sheep, or any beast." The first case was viewed as only liable to loss by theft (probably for loss by accidental fire, etc. no compensation could be claimed), and the thief, if found, was to pay double, i. e. probably to compensate the owner's loss, and the unjust suspicion thrown on the depositary (comp. Göschen, *Vorles. üb. Civilrecht*, II, ii, 315). If no theft could be proved, the depositary was to swear before the judges that he had not appropriated the article, and then was quit (comp. Schweppe, *Röm. Privatrecht*, p. 373). In the second, if the beast were to "die, or be hurt, or driven away, no man seeing it"—accidents to which beasts at pasture were easily liable (comp. שְׁבָרָה, 1 Chron. v, 21)—the depositary was to purge himself by a similar oath. (Such oaths are probably alluded to in Heb. vi, 16, as "an end of all strife"). In case, however, the animal were stolen, the depositary was liable to restitution, which probably was necessary to prevent collusive theft (Kalisch, *Exod.* p. 419). See DAMAGES. If it were torn by a wild beast, some proof was easily producible, and, in that case, no restitution was due (Exod. xxii, 7–13). The Jewish commentators make various distinctions on this enactment (see Rosenmüller, in loc.). In case of a false oath so taken, the perjured person, besides making restitution, was to "add the fifth part more thereto," to compensate the one injured, and to "bring a ram for a trespass-offering unto the Lord" (Lev. vi, 5, 6). In the book of Tobit (v, 3) a written acknowledgment of a deposit is mentioned (i, 14 [17]; iv, 20 [21]). This, however, merely facilitated the proof of the fact of the original deposit, leaving the law untouched. The Mishna (*Baba Mezia*, c. iii; *Shebuoth*, v. 1) shows that the law of the oath of purgation in such cases continued in force among the later Jews (Michaelis, *Mos. Recht*, ch. 162). See Smith's *Dict. of Class. Antiq.* s. v. Depositum. The Roman law of deposit is stated in Justinian's *Institutes*, iii, tit. xiv, 3; comp. iv, tit. vi, 17, 23. (See Sandars, p. 429, 540, 543; Vinnius, p. 815, 819.) A deposit, in Athenian law, was likewise called *παρακαταθήκη* (Demosthenes, *pro Phorm. Orator. Attic.* Bekker, Oxon. vi, 1042). Comp. the *Λόγος τραπεζιτικός* of Isocrates (*Or. Attici*, Bekker, Oxon. ii, 515–533). Comp. PLEDGE.

Deposition (1.), in the ecclesiastical law of the Roman Church, is the depriving a priest of the privileges, and forbidding him to perform the duties of his function, but not depriving him of orders. According to the ancient discipline, the deposed person lost not only his office and benefice forever, but he also forfeited the privileges of his rank, and was reduced into the laity. But since the 12th century, this extended meaning of the term has been expressed by the word *degradation* (q. v.); at a later date, distinction was also made between verbal and the more solemn degradation. The latter only was accompanied by the loss of the privileges of clerical rank. In *deposition*, a hope for future reinstatement might be held out, or otherwise. In the former case it was termed *privation*. In the *depositio perpetua*, a simple judgment of the competent authority deprives the guilty party forever of his privileges, his jurisdiction, and his benefice, but he is still regarded as belonging to the clergy. The crimes which were punished in this manner are murder, perjury, incest, adultery, etc. *Deposition*, being an act of jurisdiction, can be inflicted by any diocesan bishop who has been confirmed by the Pope, even though he be not consecrated. At the present day deposition cannot be inflicted, so far as the civil rights of parties are concerned, without the consent of the secular authorities. —Wetzer u. Welte, *Kirchen-Lexikon*, iii, 107.

(2.) In the Church of England, by Canon 122, sentence against a minister, of deposition from the ministry, shall be pronounced by the bishop only, with the assistance of his chancellor and dean (if they may conveniently be had), and some of the prebendaries, if the court be kept near the cathedral church; or of the archdeacon, if he may be had conveniently, and two other at least grave ministers and preachers to be called by the bishop, when the court is kept in other places.

(3.) In Scotland, "the minister of a parish who has been guilty either of immoral and scandalous conduct, or of preaching or otherwise publishing doctrines contrary to the standards of the church to which he has declared his adherence, or of contumaciously setting aside the authority of the Presbyterian church-courts, may be deposed from his holy office by the church-courts. By this means he is deprived not only of his ecclesiastical dignity, but of the temporalities of his benefice (stat. 1592, c. 115), and the benefice becomes vacant just as if he were dead. He may, however, be restored to the exercise of the ministry, and to his position as a minister of the Church, by the General Assembly, but he cannot, of course, be restored to his benefice; and it is considered irregular that he should be so even by a new presentation by the patron, because the stigma attached to his character by his deposition is likely to affect his usefulness. Where sentence of deposition is pronounced by an inferior church-court, the judgment of which is reversed on appeal to the General Assembly, it is held that it had never been pronounced; but if the sentence be affirmed, it takes effect from the date when it was pronounced by the inferior court, and from that date the minister's right to the profits of his benefice ceases. Sentence of deposition cannot be pronounced by a presbytery in the absence of the minister, except by the authority of the General Assembly" (Chambers, *Encyclopædia*, s. v.).

(4.) The grounds of deposition in the Protestant Episcopal Church are stated in the 37th Canon of the Convention of 1832; and Canon 39 provides that, "1. When any minister is degraded from the holy ministry, he is degraded therefrom entirely, and not from a higher to a lower order of the same. Deposition, displacing, and all like expressions, are the same as degradation. No degraded minister shall be restored to the ministry. 2. Whenever a clergyman shall be degraded, the bishop who pronounces sentence shall, without delay, give notice thereof to every minister and vestry in the diocese, and also to all the bishops of this Church, and where there is no bishop, to the standing committee." See DISCIPLINE.

Depravity (Lat. *pravus*), the moral *crookedness* and *corruption* of man's nature. The Scriptures describe moral goodness and obedience as the pursuing of a straight or right line (hence the word "rectitude"). Depravity is the turning aside out of that straight line. "It is the fault and corruption of the nature of every man that naturally is engendered of the offspring of Adam, whereby man is very far gone (*quam longissimè*, as far as possible *to be within reach of a recovery*) from original righteousness," etc. (ixth Art. of Rel. of Church of England; viith of the M. E. Church). On the nature and extent of depravity, see SIN, ORIGINAL.

Deprivation, the act of taking away from an ecclesiastic any benefice or other spiritual preferment which he may hold (see Canon 122 *Church of England*). "In England this may be done either (1) by a sentence declaratory in the proper court, on the ground of attainder or conviction of treason, felony, or any other infamous crime, or of conviction for heresy, infidelity, or gross immorality, or for farming or trading contrary to law, 1 and 2 Vict. c. 106, s. 31; or (2) in pursuance of divers penal statutes, which declare the benefice void for some nonfeasance or neglect, or else some malfeasance or crime, as simony; for maintaining any doctrine in derogation of the king's supremacy, or of the Thirty-nine Articles, or the Book of Common Prayer; for neglecting to read the liturgy and articles in the church, and to declare assent to the same, within two months after induction; for using any other form of prayer than the liturgy of the Church of England; for continued neglect, after order from the bishop, followed by sequestration, to reside on the benefice. In these latter cases the benefice is void without any formal sentence of deprivation (Stephen's *Comment.* iii, 37). A bishop may be deprived of his bishopric, but cannot be deposed, the character of a bishop, like that of a priest, being indelible. The tribunal by which the bishop of Clogher was deprived in 1822 consisted of the archbishop and the other bishops of the province; and this precedent having been established, would probably be adhered to on any future occasion, notwithstanding that the archbishop alone might have full authority to deprive" (Cripps's *Laws of the Church*, p. 100). See DEGRADATION; DEPOSITION.

Deputy stands in our version as a translation of two Heb. and one Greek term.

1. This rendering occurs in 1 Kings xxii, 47, of the נִצָּב, *nitstsab'* (literally *set over*), or *præfect*, apparently constituted a *sheik* by common consent of the Edomitish clans prior to royalty. See DUKE. It is also spoken of the "officers" or chiefs of the commissariat appointed by Solomon (1 Kings iv, 5, etc.) See PURVEYOR.

2. The same rendering occurs in Esther viii, 9; ix, 3, of the פֶּחָה, *pechah'* (*pehhâh*, a Sanscrit term, whence the modern *pasha*), or Persian *præfect* on this side the Euphrates; applied also to the "governors" of inferior rank in the Assyrian, Babylonian, and Median empires, and even to the governor of Jerusalem. See GOVERNOR.

3. *Proconsul* (ἀνθύπατος) was the proper title of the governor of a Roman province when appointed by the senate. See PROVINCE. Several such are mentioned in the Acts, viz. Sergius Paulus in Cyprus (xiii, 7, 8, 12), Gallio in Achaia (xviii, 12), and the chief officer of Achaia, whose court is indefinitely referred to in ch. xix, 38, by the use of the plural (see Smith's *Dict. of Class. Antiq.* s. v. Proconsul). See PROCONSUL.

Der'bè (Δέρβη, Acts xiv, 20, 21; xvi, 1; adject. Δερβαῖος, Acts xx, 4), a small town situated in the

eastern part of the great upland plain of Lycaonia, which stretches from Iconium (q. v.) eastward along the north side of the chain of Taurus (Smith's *Dict. of Class. Geogr.* s. v.). It must have been somewhere near the place where the pass called the Cilician Gates opened a way from the low plain of Cilicia to the tableland of the interior; and probably it was a stage upon the great road which passed this way. It appears that Cicero went through Derbe on his route from Cilicia to Iconium (*ad Fam.* xiii, 73). Such was Paul's route on his second missionary journey (Acts xv, 41; xvi, 1, 2), and probably also on the third (xviii, 23; xix, 1). In his first journey (xiv, 20, 21) he approached from the other side, viz. from Iconium, in consequence of persecution in that place and at Lystra (q. v.). No incidents are recorded as having happened at Derbe. In harmony with this, it is not mentioned in the enumeration of places in 2 Tim. iii, 11. "In the apostolic history Lystra and Derbe are commonly mentioned together: in the quotation from the epistle, Lystra is mentioned and not Derbe. The distinction is accurate, for St. Paul is here enumerating his persecutions" (Paley, *Horæ Paulinæ*, in loc.). It is uncertain whether Lystra or Derbe was the birthplace of Timothy; the former seems to be the more likely from Acts xvi, 1, 2. Derbe was the home of another of Paul's favored companions, Gaius (Acts xx, 4). Strabo places Derbe at the edge of Isauria (*Geogr.* xi, p. 392, ed. Casaubon; comp. Ptolemy, v, 6, 17); but in the *Synecdemus* of Hierocles (Wesseling, p. 675, where the word is Δέρβαι) it is placed, as in the Acts of the Apostles, in Lycaonia. The boundaries of these districts were not very exactly defined. The whole neighborhood, to the sea-coast of Cilicia (q. v), was notorious for robbery and piracy. Antipater, the friend of Cicero (*ad Fam.* xiii, 73) was the bandit chieftain of Lycaonia. Amyntas, king of Galatia (successor of Deiotarus II), murdered Antipater, and incorporated his dominions with his own. Under the Roman provincial government, Derbe was at first placed in a corner of Cappadocia (q. v.); but other changes were subsequently made. See GALATIA. Derbe does not seem to be mentioned in the Byzantine writers. Leake says (*Asia Minor*, p. 102) that its bishop was a suffragan of the metropolitan of Iconium. A full account of the surrounding country is given in Conybeare and Howson's *Life of St. Paul*, i, 211, 296 sq. Consult also Hamilton in the *Journal of the Geog. Society*.

Three sites have been assigned to Derbe. (1.) By Colonel Leake (*Asia Minor*, p. 101) it was supposed to be at *Bin bir-Kilisseh*, at the foot of the Karadagh, a remarkable volcanic mountain which rises from the Lycaonian plain; but this is almost certainly the site of Lystra. (2.) In Kiepert's *Map* Derbe is marked farther to the east, at a spot where there are ruins, and which is in the line of a Roman road. (3.) Hamilton (*Researches in Asia Minor*, ii, 313) and Texier (*Asie Mineure*, ii, 129, 130) are disposed to place it at *Divlé*, a little to the S.W. of the last position, and nearer to the roots of Taurus. In favor of this view there is the important fact that Steph. Byz. says that the place was sometimes called Δελβεία, which in the Lycaonian language (see Acts xiv, 11) meant a "juniper-tree" Moreover, he speaks of a λιμήν (harbor) here, which (as Leake and the French translators of Strabo suggest) ought probably to be λίμνη (lake); and, if this is correct, the requisite condition is satisfied by the proximity of the Lake *Ak Göl*. Wieseler (*Chronol. der apost. Zeitalter*, p. 24) takes the same view, though he makes too much of the possibility that Paul, on his second journey, travelled by a minor pass to the W. of the Cilician Gates. On the other hand, this location seems too far from the ancient road (compare Cellar. *Notit.* ii, 202 sq.). See LYCAONIA.

Dercēto. See ATARGATIS.

Derek. See TALMUD.

Dereser, THADDÄUS ANTON, a Roman Catholic divine, was born March 11, 1757, at Fahr, in Franconia. He studied theology at Heidelberg, where he began his academical career as lecturer. In 1783 he became professor of Oriental literature at Bonn; and in 1791, episcopal vicar and professor of theology at Strasburg; in 1796, professor at Heidelberg; in 1806, professor of dogmatic theology at Freiburg; and in 1815, professor of dogmatics and interpretation at Breslau, in which post he remained until his death, June 16, 1827. Dereser was a very liberal theologian for a Romanist, and his life was not free from annoyances in consequence of his freedom of speech and writing. Besides some devotional books, his chief labor was a continuation of the *Bibel-Werk* of Brentano, of which Dereser did the most of the O. T. (translation and exegesis), Frankfort, 1797–1833.—Aschbach, *Kirchen-Lexikon*, ii, 316.

Derham, WILLIAM, a philosopher and divine, was born at Stoughton, near Worcester, in 1657; was educated at Trinity College, Oxford; in 1685, obtained the livings of Wargrave and Upminster; and, upon the accession of George I, was made king's chaplain, and a canon of Windsor in 1716. In 1730 he received the degree of D.D. He died in 1735. His three principal works are, *Physico-Theology*, the Boyle lectures for 1711–12 (best ed. Lond. 1798, 2 vols. 8vo); *Astro-Theology* (London, 1719, 8vo); and *Christo-Theology*, a demonstration of the Divine authority of the Christian religion (Lond. 1730, 8vo). Of these, the first demonstrates "the being and attributes of God from his works of creation;" the second "from a survey of the heavens."—Kippis, *Biographia Britannica*, v, 116.

Dering, EDWARD, a Puritan divine, born in Kent, was chosen fellow of Christ's College, Cambridge, 1568. In 1571 he secured a prebend in Salisbury. He obtained high reputation both as a preacher and a scholar, and used his abilities and influence to great purpose against the High-Church and Romanizing party. In 1573 the privy council forbade his preaching, and in 1576 he died. The substance of his writings may be found in his *Works, more at large than heretofore printed* (Lond, 1614, 4to).—Strype, *Annals;* Neal, *Hist. of Puritans*, i, 204, 230; Hook, *Eccles. Biography*, iv, 423.

Derodon, DAVID, a Protestant French theologian and philosopher, was born at Die, in the Dauphiné, about 1600. He opposed the Cartesian philosophy, and was one of the ablest dialecticians of his time. He wrote a considerable number of works in favor of the doctrines of the Roman Catholic Church, which had a wide circulation, and were translated into several foreign languages. Among them were *Quatre Raisons pour lesquelles on doit quitter la R. P. R.* (Paris, 1631); *Quatre Raisons qui traitent de l'eucharistie, du purgatoire, du péché originel et de la prédestination* (1662), and *Le Tombeau de la Messe* (Geneva, 1654; English translation, London, 1673). The latter book was on March 6, 1663, burned by the public executioner, the author exiled, and the bookseller sentenced to a fine of 1000 livres, the loss of his license, and ten years exile. Derodon went to Geneva, where he died in 1664. He is also the author of several works on philosophical subjects, and against the atheists. His complete works were collected into two volumes, and published soon after his death (*Derodonis Opera Omnia*, Geneva, 1664 and 1669, 2 vols.; the first volume contains the philosophical, and the second the theological writings).—Hoefer, *Biogr. Génér.* xiii, 716.

Deror. See SWALLOW.

De Rossi. See ROSSI, DE.

Dervishes, Mohammedan monks, corresponding in many respects to the monks of the Roman Church. These may be divided into two classes: those who belong to fraternities or societies for religious exercises,

whose tenets and oaths are kept so secret that the uninitiated can only describe their outward appearance and the ceremonies which are practiced in public; and those recluses who, without belonging to any special sect, profess holiness and abstinence, and wander solitarily through the land. The word *dervish* is Persian, signifying *poor*, corresponding to the Arabic *fakir*, which gives name to the same order in Arabia and India. Oriental tradition traces the order of Hermits back to John the Baptist, and even to Seth. Two centuries before Mohammed, there existed in Arabia the Meschaiouns (Walkers) and the Ischrachiouns (Contemplatives). These, under the influence of Mohammedanism, merged into Mutekelim (metaphysicians) and Sufis, who were essentially pantheists. In the second century of the Hegira (729), sheik Olivan, a Sufi, established the first religious order in Islam. Dervishism doubtless took its proximate rise in Persian Sufism.

The Turkish dervishes claim caliph Ali, one of the immediate successors of Mohammed, as their founder. Ali himself founded no order; but some of his followers formed a society called Safashafei, men devoted to a monastic life. They soon fell into excesses, indulging in the use of drugs (chiefly hashish), intoxicating liquors, and, in fact, anything which would promote trances, ecstasies, and hallucinations, resulting in violent paroxysms and delirium. They formed the practice of cutting themselves, mutilating their limbs, standing for a long time in agonizing positions, and otherwise barbarously abusing their bodies. They, however, managed to reconcile with this external and public self-abuse an almost universal private sensuality. The members of this order were subsequently called dervishes, but at what time the word *dervish* was first used is not definitely known. There are in Turkey thirty-two orders of dervishes, having various names, and differing in their worship and practice. Outside of Turkey there are many more orders, called in the different countries by the local names Fakirs, Sufis, Santons, etc. The chiefs of the different orders are called *sheiks*, or *pirs*, who are privileged to nominate their successors. The dervishes mostly dwell in community, and have monasteries (tekiehs) in various places. Their rules are not very rigid. The declaration of Mohammed, "*No monachism in islam*," had become a strong religious prejudice, and this prejudice they have never been able fully to overcome. Celibacy is not enjoined, though encouraged, and many of them are married. These, however, are not regular members of the monasteries, although they are required to pass the night there previous to any public exhibition. They may withdraw from the order at any time, and are often expelled for misdemeanors.

The mendicant dervishes are mostly foreigners, or those who have been expelled from the various orders, or impostors, who cheat and bewitch the people under the garb of dervishism. These travelling dervishes are mostly jugglers, and their skill in trickery is truly wonderful. They often become wealthy in the practice of their arts. Their power over the common people is very great, while the better-informed are beyond their reach.

The higher orders of dervishes have come to have an extensive influence not only with the masses, but with the government itself. This power was acquired (1) through the wealth which came into their possession. Large legacies were left to them for the benefit of the poor. These legacies were applied to building up dervishism. They soon learned also to impress the people with a strong belief in the efficacy of their prayers. These came to be purchased at high prices, and thus became a fruitful source of revenue. Their power was increased (2) by the popularity of the institution. In taking a stand against the dervishes, the government was virtually opposing a large majority of its own subjects. Sultan Mahmoud II attempted to break their power. On the 10th of July, 1826, he massacred the three chiefs of the Betacki dervishes in Stamboul, razed their tekiehs, and drove the most of them into exile. Ten years from this time they were as powerful as ever. The ulemas have always been their bitter enemies, and have affected to despise and ridicule them, but popular sympathy has been on their side.

In Turkey there are three principal orders, viz.:

I. The Mevlevy (Molowiyeh), or dancing dervishes, who claim as their founder Meolana-Jelaleddin-Hoomy-Muhammed, surnamed Sultan-ul-Ulema, or Sovereign of the Learned. Jelaleddin wrote a book called *Mesnevy*—a poetical composition—much of which has become proverbial in the East. The chiefs of this order exercise the prerogative of nominating the sheiks of the monasteries, and of girding each newly-made sultan with the sword of Osman. The dervishes of this order are humble in demeanor, and keep a fast during the month of Ramazan, in addition to the weekly fast on Thursday. Candidates desiring to be admitted to the order are placed on probation a thousand and one days, and required to perform the most menial services in the kitchens of the monasteries. The worship of this order consists in chanting the poems of their founder, reciting a prayer (*fat-ha*), and performing the dance, *deor* (circle). They have also an orchestra, who sing Persian odes, and play kettle-drums, tambourines, and fifes for the dancers. In these dances

Dancing Dervishes.

about a dozen engage at a time, and after a few minutes they are relieved by others, each set taking their turn three or four times during the service. The master of the dance (*simazenbashy*) watches them closely to keep them in their places. A traveller makes the following computation: "By looking at a stop-watch, I ascertained that on an average they turned sixty-four times in a minute. After spinning round for about five minutes, at a signal from the high-priest, both music and dancers suddenly stopped, but recommenced in a few seconds. The third time they kept it up for nine minutes and three quarters; my brain was swimming too, so much so that I could hardly count their evolutions. The fourth and last time they whirled for five minutes and three quarters, thus making in all 1504 turns in 23½ minutes" (Auldjo, *Journal of a Visit to Constantinople*, Lond. 1835, p. 73).

II. The Bedevy (or Bodawy), or howling dervishes, as travellers call them, have a convent at St. Dimitry, near Constantinople. Their religious exercises consist of prayers (*namoz*), chants, and vociferations of the name of God, accompanied with a rocking motion of their bodies. This motion attempts to imitate the rolling of a ship on the water, and indicates their relation to God—Allah being the ocean and they the ships. They recite the attributes of God in a loud voice, putting a terrible emphasis on the word *Allah* as often as it occurs; and this they keep up with a kind of frenzy until voice and strength are gone, when many of them, covered with perspiration and foam, fall senseless to

the floor. In the midst of their fury they cut themselves with knives and other sharp instruments; but there is method in their madness, and they seldom make deep wounds.

III. The Rufai, who had for their founder Seid-Ahmed-Rufaï. Their exercises are much like those of the Bedevy. Their highest ambition seems to be to make rapid motions and loud noises. Their leader chants the *hamdey-Muhammedy*, or hymns in honor of Mohammed, while the rest join in the chorus *Ya Allah! Ya Hu!* and this chorus increases in violence until it becomes a roar. At the height of the excitement they seize red-hot irons prepared for the purpose, and hold them in their teeth until the glow disappears. They also hack their flesh with swords and knives. These wounds the sheik blows upon and anoints with his saliva, which, it is said, effects a cure in a few hours. The excited state of their bodies produces a profusion of blood from very slight wounds, and their trickery deceives the people into the belief that wonderful miracles are wrought in the healing of these wounds.

There are many orders besides these, having a greater or less importance: the *Kaderijeh*, founded by Abdel-Kader-el-Gilani, known by their white banners and turbans; the *Said-Ibrahim*, founded by Sidi-Ibrahim-el-Dahuki, whose turbans and banners are green; the *Rushenis;* the *Shemsirs;* the *Jemalis;* the *Nacsh-bendies*, who are itinerating dervishes, and make pilgrimages to all parts of the Mohammedan realm. From the better orders the imans, or Mohammedan priests, are chosen, and many of them also exercise civil functions.

A special work on dervishes has been published by John P. Brown, secretary and dragoman of the legation of the United States of America at Constantinople (*The Dervishes, or Oriental Spiritualism*, Phila. 1868). According to this author, the spiritualism of the dervishes has its roots in religious conceptions prevalent in the East anterior to the rise of Islamism, and ascetic practices like those common among them have been found equally widely spread, and are traceable to a very high antiquity. None of the dervishes, he says, separate themselves from the doctrines or precepts of the Koran, the contents of which they seek rather to spiritualize. They divide, moreover, the Koran and other books of religion into three portions —the historical, the biographical, and the purely spiritual. "The historical and biographical portions of these books may even comprise errors, omissions, exaggerations, and even may have been more or less changed from time to time by copyists; while that which is purely spiritual and essential to the soul of man, commenced with his creation, has always existed unchanged, and will so continue to the end of time" (p. 106). According to their best writers, it is held that there are four creations: "1. The creation of Adam from the clay, or mud, of which the earth is composed. 2. The creation of Eve from a rib or part of Adam. 3. The creation of the human species, that is, the children of Adam, by natural propagation. 4. The creation of Jesus Christ by a special breath of God, conveyed to a virgin—Mary—by the angel Gabriel" (p. 107). And as the spirit of man is capable of communing directly with this spirit of God, a holy person will regard all ordinary pleasures and pursuits of life as indifferent objects; and the more he is destitute of worldly goods, the less will he be liable to be drawn from that contemplation of God which leads to union with the divine spirit. Hence all orders of dervishes are tacitly or openly mendicants. But degrees are well recognised in saintly attainment. Adam was a holy man whom the angels were bidden to worship; Abraham was the "friend of God," and "Jesus Christ owes his existence as a saint to the special breath of his divine Creator, but is not, nevertheless, considered as being God. He is held to be only a divine emanation of the most sublime character" (p. 109).

De Sales. See SALES, DE.

Des Cartes, RÉNÉ (DU PERRON)—in its Latin form Renatus Cartesius—one of the earliest in time, and the first in genius and reputation, of the modern philosophers of France, was born at La Haye, in Touraine, on the 30th of March, 1596, and died at Stockholm on the 11th of February, 1650. He assumed the name of Du Perron from a small estate inherited from his mother. He divides with Bacon the glory of founding the modern philosophy of Europe, and communicated a more potent impulse than Bacon to the general philosophy of mind. These two great names, as Cousin observes, inaugurate and constitute the philosophy of the sixteenth century. They have been compared and contrasted with each other under the blinding influence of national prejudice and national rivalry, and the palm has been conceded to the one or to the other according as the critic was French or English. The profound and widely-diffused influence of Des Cartes is evinced by the names and theories of his opponents, as well as by the names and writings of those who adopted or modified his doctrines. Among the antagonists of Cartesianism within the seventeenth century may be specified Gassendi, Hobbes, Arnauld, Huet, Sir Isaac Newton, John Locke, and Samuel Clarke; among its more or less acquiescent followers may be enumerated Rohault, Clerselier, Spinoza, Bayle, Malebranche, and Leibnitz. It is not too much to say that the whole domain of metaphysics and a large part of physics still bear the impress of the genius and labors of Des Cartes.

Life of Des Cartes.—The constitution of Des Cartes was always feeble. To this may be ascribed his studious habits, his quick impressibility, his inclination to reverie and solitary meditation, his habitual love of seclusion, and the timidity which restrained and retarded the enunciation of his dogmas. At eight years of age he was sent to the Jesuit college of La Flèche, where he remained eight years. His keen observation and curious inquiries had led his father to designate him, even in early childhood, as "the philosopher." His weak health occasioned the relaxation in his behalf of the ordinary routine of academic discipline. He was allowed to lie late in bed in the morning. During these morning vigils, which were observed through life, he meditated and revolved the whole scheme of his philosophy. Des Cartes prosecuted his college studies with diligence and success, but became dissatisfied with their supposed vanity and superficiality. His complaints on this subject, uttered a quarter of a century afterwards, are a strange anticipation of the opening monologue of Goethe's Faust. After leaving La Flèche he went to Paris, and plunged into dissipation; but from this course he soon withdrew into studious seclusion, concealing himself from his acquaintances for a year. When discovered he retired to Holland, and took service under prince Maurice of Nassau, 1617–19. Here he composed his treatise *De Musica*, and developed his remarkable mathematical capacity and attainments. In 1619 he volunteered under Maximilian of Bavaria, and participated in the opening campaign of the Thirty Years' War. His winter quarters, 1619–20, were at Neuburg on the Danube, where he devoted himself for months to solitary

meditation, and determined the rude outline of his subsequent philosophy. His isolation and intense concentration of thought affected his brain so far that he fancied himself assured by celestial visitations of the truth of his philosophic principles and method. Some suspicion of the possibility of delusion led him to vow a pilgrimage to Loretto if his speculations should prove true. This vow he discharged four years afterwards. His solicitude to attain more certain knowledge than was acquired in the schools tempted him to seek a connection with the mysterious society of the Rosicrucians, who were reputed to possess strange learning and a miraculous acquaintance with the secrets of nature. He finally renounced all belief in the existence of the Brotherhood of the Rosy Cross.

From the Bavarian army he passed into the Imperial, and attended its early operations in Hungary against Bethlem Gabor; but, after seeing his general, Bucquoy, slain before Neusohl, he resigned a military career. He had taken up arms for the sake of studying men, manners, and countries. He prosecuted these researches by returning circuitously to Holland through Moravia, Silesia, Pomerania, Brandenburg, and Holstein, thus visiting regions deemed wholly barbarous in Western Europe. His unsuspected knowledge of the Dutch tongue and his resolute demeanor saved him from murder on the voyage between Embden and the coasts of Friesland. He returned to the Hague after an absence of three years; passed through the Spanish Netherlands, arrived at Paris five years after he had deserted it, and reached his father's house at Rennes, in Brittany, in March, 1622. He thence proceeded to Poitou to take possession of his share of his mother's estate, designing to sell it and purchase "some place of quick revenue." We are here reminded of the oft-recurring projects of Bacon. He failed in his plans at this time, returned to Rennes, became oppressed with the want of occupation in his father's house, and reappeared in Paris, where he was suspected to be a Rosicrucian emissary. He was still harassed by uncertainties and indecision in regard to the choice of a vocation. Finding his studies interrupted in the capital of France, he visited Rennes and Poitou again, and sold the greater part of his inheritance.

Now commenced a second series of journeys. He went first to Switzerland, thence to the Valteline and the Tyrol, and thence to Venice. He now made his pilgrimage to Loretto, whence it may be inferred that he was by this time satisfied of the truth and solidity of his philosophical tenets. He was in Rome during the Jubilee of Urban VIII (1624). He visited Florence on his homeward route.

He returned to Paris by way of Florence, Turin, and Lyons, and resided for more than three years in the French metropolis, engaged in prosecuting his researches and meditations, in polishing lenses and mirrors, and in determining mathematically and experimentally the best form of curvature to be given to them. His conclusions on this point were afterwards embodied in his *Dioptrics*. He again withdrew from nearly all his acquaintances, but his retreat was betrayed by the indiscretion of a servant. Finding it impossible to secure the desired seclusion in Paris, he sought a retreat in Holland in 1629. He now resolved to devote himself entirely to a speculative life. This was the end of five years of military service, of eight years of travel, and of fifteen years of hesitation. It is probably the lesson of his own experience which is enforced in his *Ethics* in the earnest censure of all irresolution. The indecision which is thus forcibly condemned was characteristic of Des Cartes, and may have been unconsciously connected with the adoption of doubt as the basis of his Method.

He was not stationary in any single abode; but his home, if home he had anywhere, was in the northern part of the country, at the remote town of Egmont. He used every artifice to conceal his retreat. He communicated his hiding-place to none of his countrymen except his Franciscan friend Mersenne, through whom he conducted nearly all his correspondence with the learned world. In 1631 he visited England on the invitation of Charles I; in 1634 he went to Denmark. Spain, Portugal, Russia, and Turkey were the only European states not reached in his wanderings. He thrice visited France after his Dutch settlement—in 1644, 1647, and 1648. On one of these occasions he was tempted to Paris by the promise of an honorable provision from the crown, but he found that he had been drawn from his retreat solely to gratify the curiosity of sight-seers and courtiers.

Des Cartes ascribes the determination of the fundamental principles of his philosophy to his twenty-third year, and to his winter-quarters on the Danube. His mathematical discoveries were still earlier. In 1633, after three years of elaboration, he had prepared a sketch of his views of the constitution of the universe, but the condemnation of Galileo caused him to withhold it from the press. At length, in 1637, being then forty-one years of age, he yielded to the solicitations of his friends, and promulgated the general principles of his reform in the celebrated *Discours de la Méthode*, to which were appended three other treatises—on *Meteors*, *Geometry*, and *Dioptrics*.

Soon after the publication of the Method and accompanying essays, the *Philosophical Meditations* were prepared for the press. Des Cartes sent them to his friend Mersenne in Paris with the request that they should be submitted to the most acute and learned of his acquaintances for the benefit of their suggestions and observations. Searching criticisms were in consequence received from Caterus, Hobbes, Arnauld, Gassendi, Bourdin, S. J., and others. To these objections replies by the author were appended, and the whole were published together at Paris in 1641, with a dedication to the theological faculty of the University of Paris, in order to place his doctrines under the protection of the Church.

Des Cartes continued the exposition of his philosophy by publishing in Latin in 1644 his *Principia Philosophiæ*. This work contains the elaborate and systematic deduction of his whole scheme of the intellectual and material universe. It commences as characteristically as the *Novum Organon* of Bacon, with the fundamental principle of his speculation, that "once in life we should endeavor to doubt of all things." It arrives at length at the declaration that "none of the phenomena of nature have been omitted in the treatise, but that nothing is to be included in natural phenomena except what is detected by sense." The last sentence of these Principles is equally characteristic of the philosopher and the philosophy. "Mindful of my weaknesses, I affirm nothing; but I submit all these things first to the authority of the Catholic Church, next to the judgment of the prudent; and I desire nothing to be believed by any one which is not approved by manifest and irrefragable reasons." The work is preceded by a complete and methodical index, stating the substance of each section, and thus affording a clear and concise summary of its contents. The whole of Cartesianism is thus compressed into one picture and into a few pages.

During his long residence in Holland, the tranquillity of Des Cartes was disturbed by controversies due to the imprudence of his admirers. His annoyances and hazards increased with the lapse of time. His initial doubt seemed to sanction scepticism and to encourage infidelity. His views of matter and mind appeared to one party to favor transubstantiation; to another, to lead to fatalism. His explanation of the connection of body and spirit apparently reduced all material action to mere mechanism, or to direct divine action. Hence arose the truculent attacks of Voët, one of the most prominent Dutch theologians, and rector of the University of Utrecht. Des Cartes at length

broke his customary silence, and addressed a long and acrimonious reply to Voët.

These dissensions, so peculiarly irritating and alarming to a cautious and timid nature like Des Cartes's, inclined him to cast about for a more tranquil retreat than that which he had so long cherished. He accordingly consented, after much habitual hesitation, to receive a shelter from queen Christina of Sweden, who had been delighted with his treatise on the Passions, originally composed for the princess palatine Elizabeth. A Swedish admiral, with a royal vessel, was sent to convey Des Cartes to Stockholm, where he was welcomed with honor and favor. The queen was charmed with his conversation and sought his advice, which he gave with modesty and prudence. She availed herself systematically of his instructions, employing the early hours for this purpose, to avoid interference with other studies, with state affairs, and the royal pleasures. Des Cartes was required to forego his life-long habits, and to attend her majesty regularly at five o'clock in the cold mornings of a Swedish winter. This great change, and the severity of the climate, proved fatal to him. He was attacked with fever on Feb. 2, 1650, and died on the 11th of the month. The queen was deeply affected by the announcement of his death. She desired to place his body among the royal sepulchres, and to honor it with a splendid tomb; but as he died in the bosom of the Roman Catholic Church, his remains were deposited in the Roman Catholic cemetery. Sixteen years after his death his remains were removed to France, and placed with imposing ceremonies in the church of Ste. Genevieve. The funeral oration designed for the occasion was prohibited by order of the court; but the like honor was rendered a century later, 1765, by the eulogy of M. Thomas, which was crowned by the French Academy.

The Philosophy of Des Cartes.—The Cartesian philosophy is to be ascertained from the Method, the Meditations, and the Principia. The remaining works are either subsidiary or accessory; either developments and expositions which confuse rather than elucidate, or special treatises on particular branches of science, such as geometry, dioptrics, meteorology, anatomy, physiology, logic, etc. To one solicitous of appreciating the whole intellectual habit of the philosopher, the large collection of his letters is as indispensable as the letters themselves are often charming. To one desirous of obtaining a minute acquaintance with all the perplexities, ambiguities, and vacillations of the Cartesian system, these letters, together with the objections and replies appended to his Meditations, are invaluable. All the smaller works should, of course, be studied by those who would determine the exact position of Des Cartes in the history of speculation, and the precise services rendered by him in the promotion of science.

The first principle of Cartesianism is to make the mind a perfect blank, a *tabula rasa*, and then to reconstruct the whole fabric of conviction and opinion. The same recommendation is given, in a different spirit, by Bacon in the preface to the *Novum Organon*. As Des Cartes recognised the uncertainty and incoherence of contemporary speculation, he proposed to commence the resuscitation of knowledge by doubting all things.

Having rendered his mind a blank by universal doubt, he next sought a foundation for an indubitable body of doctrine. This he dectected in the consciousness of thought, including sensation, perception, reflection, and emotion under this term. Hence proceeds the celebrated inauguration of his whole philosophy with the maxim *Cogito, ergo sum*—I think, therefore I am. This is probably an original position with Des Cartes; but thought is, nevertheless, explicitly alleged by Aristotle as an evidence of existence (*Eth. Nicomach.* IX, ix, § 7, 9, ed. Didot). The argument is much more legitimately employed by Aristotle than by Des Cartes as an evidence of particular existences, not of existence in general. It has often been indicated that the Cartesian enthymeme is invalid from the tacit assumption of the major premise. The reasoning really proceeds in a circle. The acceptance of the dogma assured him of his own existence, but furnished no evidence of the existence of anything else, nor did it explain the origin or the preservation of his own existence. The finite existence recognised must repose upon something more stable and immutable than the fleeting, fitful life of which his consciousness assured him. He concludes, therefore, that his own and all other existence must depend for its beginning and maintenance upon a more perfect, absolute, and illimitable Being—upon some great "I am." He discovers in his own mind the notion of such a Being—of God. It could not have been invented by himself, for it transcends his finite capacities. It must have been implanted by God himself; and thus the presence of the notion attests the existence which it represents. This is a concise statement of the Cartesian argument *à priori* for the Being of God. Like its predecessor, it is not original. It is found fully developed in the *Proslogium* of St. Anselm. It was assailed by Gaunilo, a contemporary, in the *Liber de Insipiente*, and refuted a century and a half later by St. Thomas Aquinas in his *Summa Theologiæ*. This argument proceeds upon the actual or virtual admission of innate ideas, and is accompanied by the reception of another postulate, that innate ideas are necessarily true, because, as they are implanted by God, they partake of the divine veracity, and God can neither deceive nor be deceived. Both innate ideas and the impossibility of divine deception have been denied. Innate ideas, in their Cartesian form, were exploded by Locke; and the impossibility of divine misguidance had been questioned three centuries earlier by Gregory Arminiensis, general of the Augustinians, and was acknowledged by Des Cartes to be liable to many exceptions. But, as Bayle remarks, a universal maxim obnoxious to exceptions furnishes no foundation for certainty, and confirms rather than eradicates scepticism.

Another argument for the being of God is used at times by Des Cartes, and appears much more cogent and tenable. It proceeds from the admission of a First Cause (Des Cartes rejects final causes), using, however, the corrections and modifications of St. Thomas Aquinas, who deduces the argument, not from primordial causation, but from the continuous support of creation. The Argument from a First Cause simply is consistent with either Stoic Fatalism or Epicurean Chance. The argument from perpetual preservation asserts an abiding Providence and a sustaining Creator. The one leads easily to Pantheism, the other to the acceptance of Revelation.

Having established his own existence, the existence of God, and the verity of innate ideas, how were such ideas to be recognised and distinguished? Here comes in the Cartesian criterion of truth, which extends much further than simply to the determination of innate ideas. Ideas (the term is as much misapplied by Des Cartes as by Locke) which are clear and distinct may be received as *ipso facto* true; and if they are also simple, they may be regarded as innate. The criterion is evidently arbitrary and delusive. What seems clear, distinct, and simple to one mind, may be obscure, intricate, and complex to another. Under this criterion, any strong conviction, any engrossing hallucination, may present the credentials of truth. It is, therefore, not surprising that so many vagaries should be embodied in the dogmatic exposition of the Cartesian philosophy. But the acceptance of this principle of clearness, distinctness, and simplicity had a potent and felicitous influence upon the literature of France. Des Cartes was himself a model of grace and lucidity of expression, and his criterion of truth, promulgated at

the dawn of the age of Louis XIV, and illustrated in composition by himself and by Pascal, contributed largely to produce the characteristic excellences of the French classic style.

Such as they are, these are the constituent principles of the philosophy of Des Cartes. They are neither valid nor original. Both Bayle and Leibnitz sanction the enrolment of this philosopher among the number of those who pretend to invent what they borrow—"gloriamque adeptos, tamquam repererint quæ acceperant." It is impossible to proceed far in either the metaphysics or the physics of Des Cartes without meeting the dreams of Leucippus, Democritus, Epicurus, and other philosophers of Greece, and being continually reminded of the sonorous verses and luminous expositions of Lucretius.

A definition of existences was suggested to Des Cartes by his demonstration of existence. Mind, or spiritual existence, is thinking substance; body, or material existence, is substance without thought. But as some positive characteristic is required for the discrimination of matter, extension, which is its most familiar property, was assumed as its specific difference, and matter was defined to be extended substance. This necessitated the identification of space and matter, or the negation of space as a separate entity. Hence arose the doctrine of the *plenum*, and the maxim that Nature abhors a void. The thesis of Lucretius, "est in rebus inane," and his argumentation on the thesis, evince that there was no real novelty in these doctrines. But in Des Cartes the two forms of existence are presented as opposite, irreconcilable, and reciprocally incommunicable. In consequence, beasts can possess no capacity of reason. They are purely mechanical—mere machines. This is one of the boldest, most paradoxical, and most dangerous of the Cartesian tenets; but it appears to be a necessity of his philosophy, though he is accused of having taken it—a worthless appropriation—from the Antoniana Margarita of Gomez Pereira, 1554. Certain it is that the acceptance of the Cartesian definitions of mind and matter must result in the declaration that beasts are mere machines. But, if they are such, how are they set in motion, and how do they perform actions apparently voluntary and deliberate? Moreover, if beasts are machines, man must also be a machine, so far as his body is concerned, for mind and matter cannot operate upon one another. An attempt was made to solve these enigmas by the peculiar Cartesian doctrine of Assistancy, or of divine co-operation in determining all the material actions of animate bodies. In Malebranche this doctrine unfolded itself into the scheme of Occasional Causes; in Leibnitz, into the splendid fantasy of the Pre-established Harmony; in Spinoza, into the most abstract, complete, and systematic Pantheism.

This theory in regard to the mechanical complexion of vital movements affected the ethics of Des Cartes. The chief details of his treatise on the Passions were derived from Aristotle, but his own views of mind and matter, and his own studies and experiments in anatomy and kindred sciences, modified his explanation of the peripatetic doctrines. He made his Moral Philosophy in great measure an exposition of the physical phenomena which accompany emotion; he employed largely the device of vital spirits, which reappear so habitually in Locke; he regards them very much as if they were fluids in a hydraulic engine; and thus he becomes the legitimate precursor of Condillac and Cabanis, of Bain, Moleschott, and Herbert Spencer. The positions of Des Cartes, whether they be sober or fantastical, furnish suggestion or stimulation, and often direction, to the most various branches and types of subsequent speculation.

Des Cartes has left behind him a treatise on Man, to which a singular contrast is offered by the nearly contemporaneous essay of Hobbes, *De Homine*. Man is the union of the intellectual and material universe—the point where both meet—the synthesis of opposites—the microcosm—the complex organism, whose explanation demands the theory of mind and of matter alike. He thus furnishes a passage from metaphysical to physical inquiries, and *vice versa*.

If the metaphysics of Des Cartes be founded upon the observation of the supposed facts of consciousness, his physical theory of the universe is purely fanciful—a romance, as it was designated by himself. In developing the grand conception of a complete exposition of the order of creation, for which due credit should be given to Des Cartes, it was necessary to explain the phenomena of continual movement on principles exclusively material, without admitting distinct space, or permitting any unoccupied interstices between the constituent particles of the mighty whole. In order that there might be an unlimited tenuity of matter, to allow the free circulation of bodies of diverse density, the atoms of the Ionic school must be rejected, and the infinite divisibility of matter maintained. These prerequisites were secured by the hypothesis of an endless circulatory volubility of matter, which might explain at the same time the motions of the planetary bodies. Another advantage was attained by this fancy. The Copernican system, which had been apparently repudiated by the papacy in the recent condemnation of Galileo, was not asserted, and other theological objections were anticipated by obscuring the distinction between absolute and relative motion. The very statement of his system of the universe as an hypothesis was a concession made by the timidity of Des Cartes to the pretensions of ecclesiastical dogmatism; and it was in response to this and subordinate Cartesian hypotheses that Newton uttered his celebrated maxim, "hypotheses non fingo."

The Cartesian theory of the world turns on the celebrated doctrine of the Vortices. Matter originally exists, if such be the will of God, in a state of incalculable divisibility and of unimaginable attenuation. In this condition of instability motion commences, because there can be no equilibrium between dissimilar and disconnected particles. This motion becomes circular, or irregularly spiral, from the greater or less violent tendency of the particles pressing against each other towards the line of an undetermined axis. As the process advances the revolution becomes more decided, the axis of revolution more definite, and a determinate vortex is established. By the continuance of these gyrations, the more compact particles of matter are forced inwards, and are further condensed, while the more rarefied are thrown off towards the extremities of the ring. But the more solid portions are still interpenetrated by the thinner and more fluid, and the whole vertiginous movement endures, and carries along both the sensible and impalpable materials of the universe. Different centres and different axes of revolution constitute themselves, and thus multitudinous systems of planetary bodies, each in its own vortex, spring into existence. New vortices may originate in the bosom of larger vortices, or vortices may come in contact with each other, and coalesce in a joint action, in which none lose their primitive movement; or larger vortices may seize, encompass, and hurry along with them the weaker spirals which they enclose. All the heavenly movements are provided for by this complex scheme, but, though simple in principle and consistent in development, it is more complicated in action and in exposition than the "cycles on epicycles rolled" of the Ptolemaic mechanism of the heavens. These are the Cartesian Physics which were exploded by Sir Isaac Newton, and which have lain so dead and dormant since the Newtonian Principia that they are scarcely mentioned except as the objects of scientific scorn.

But some apology may be made for this splendid hallucination. It is not for the present generation of

men of science to sneer at the Cartesian Vortices. Founded as they were upon the magnetical researches of Gilbert, they furnish a prelude for the cosmical magnetism of the present day, for the whole nebular hypothesis, for the system of evolution of Spencer. As a part of his exposition, Des Cartes asserts the correlation and conservation of forces, and the indestructibility of matter, which have so startling and modern an air in the speculations of Mayer, Helmholtz, Grove, Faraday, etc. If the theory of Des Cartes is intrinsically absurd, its absurdity is strangely analogous to the most recent generalizations of science.

Like the rest of his dogmas, the dream of the vortices was not original with Des Cartes. Leibnitz speaks of them as "vorticum a veteribus cœptorum." Speissius charged Des Cartes with having borrowed them from Giordano Bruno and Kepler; and even his own enthusiastic biographer, Baillet, ascribes to Kepler three of the principal Cartesian speculations: 1. Vortices; 2. Gravitation; 3. Optics. He was largely indebted to Bacon, Gassendi, Fermat, Gilbert, among his contemporaries, and to multitudes of near and distant predecessors. But he was too greedy of pre-eminence to acknowledge his obligations.

The Vortices constitute only a small part of the Physical Philosophy of Des Cartes, but they are the most characteristic portion, and affect nearly all its developments. He has presented reflections, observations, and experiments in regard to most of the principal phenomena of nature, animate and inanimate, material and immaterial. He has studied the wind, the rain, and the hail, the play of light and of colors, the formation of minerals, the growth of plants, comets and earthquakes, the motions of the planets, the mysteries of the stars, the anatomy and the physiology of man, as well as the constitution of the mind and the metaphysics of creation. It was a magnificent and all-embracing survey which he undertook, and of which he left only a sketch, carefully elaborated in some parts and barely indicated in others. His philosophy, as a system, never possessed much intrinsic value, though its vastness of conception and audacity of execution excited lively and lasting enthusiasm. The influence exerted by it can scarcely be overrated, and should not be undervalued. It provoked investigation in all departments of knowledge; it directed inquiry to the most promising fields of study; it commended, by an illustrious example, diligence in observation and patient accuracy of experiment; while the author presented in his own person an admirable type of an earnest, exclusive, simple, and devoted philosophic career.

The Cartesian Philosophy has passed away after a brief and splendid, but not unclouded reign; but to Des Cartes will be due the homage of all ages for the stimulation to more accurate research which he supplied. He has also a more special title to fame on the score of his mathematical discoveries—his invention of Co-ordinate Geometry and Indeterminate Co-efficients. These can be only mentioned in passing, as they affected neither religious opinion nor the developments of theology; and in this work the diverse forms of secular speculation must be regarded mainly in the light of their action upon Christian thought. The names of Malebranche, Spinoza, Bayle, and Leibnitz furnish ample evidence of the powerful but diverse stimulation communicated to theological investigations by the writings of Des Cartes, and demonstrate the justice of that still prevailing feeling which recognises in him one of the fathers of modern philosophy, notwithstanding the rejection of nearly all his distinctive opinions.

Literature.—Des Cartes and his philosophy occupy so large a space in the records of modern philosophy that it would be equally impracticable and nugatory to attempt a full enumeration of the sources of information. All the historians of philosophy, from Brucker downwards, devote an adequate share of attention to Des Cartes. Brucker's account of Cartesianism is one of the most satisfactory parts of his laborious work, though it is by no means partial to Des Cartes. The scattered observations of Bayle and Leibnitz should never be overlooked, nor should the favorable criticisms of Victor Cousin be disregarded. The life of Des Cartes must still be sought in the volumes of his early biographer, Baillet, though much interesting matter may be derived from the *éloges* of Thomas and later prize essayists. Many interesting autobiographical notices are found in the *Discours de la Méthode*, and in the letters of Des Cartes. Other materials inviting consultation for a due estimate of his philosophy, and of its relations to previous and subsequent speculation, are Cousin, *Cours de Philosophie*, and *Fragmens de Philosophie Cartésienne* (Paris, 1845); *Mémoires sur la Persécution du Cartésianisme* (1838); Gruyer, *Essais Philosophiques* (Paris, 1832); Bouillet, *Hist. et Critique de la Révolution Cartésienne* (Paris, 1842); Dumoulin, *Le Cartésianisme* (Paris, 1843); and Damiron, *Hist. Philosophie du XVIII^e Siècle* (Par. 1846); also his *Essai sur la Philosophie en France au XVII^e Siècle*, 2 vols. 8vo (Paris, 1857). There is an admirable article on the genius and writings of Des Cartes in the *Edinburgh Review*, Jan. 1852. But the indispensable and only sufficient text for the real student is contained in the works of Des Cartes, of which the best editions are *Opera Omnia* (Amstelodami, 1692–1701, 8 vols. 4to), and *Œuvres Complètes de Des Cartes*, ed. Victor Cousin (Paris, 1824–26, 11 vols. 8vo). There is a convenient selection of his purely philosophical treatises by Simon (Paris, 1844). On the relations of Cartesianism to theology, see Gass, *Geschichte d. prot. Dogmatik* (Berlin, 1854–62, 3 vols.); Dorner, *Geschichte d. protest. Theologie*, München, 1867, p. 461 sq.; Farrer, *Critical History of Free Thought*, Lecture III; Hagenbach, *History of Doctrines*, § 225, 238; Tholuck, *Academisches Leben des 17ten Jahrhunderts* (1854, part ii); Morell, *History of Modern Philosophy* (N. Y. edition), p. 115, 194.

Descent (Christ's) into Hell. See Hell, Descent into; Creed, Apostles'.

Desert (Gr. ἔρημος; see Rechenberg, *De voce ἔρημος*, Lips. 1680), a word which is sparingly employed in the A. V. to translate four Hebrew terms, and even in the rendering of these is not employed uniformly. The same term is sometimes translated "wilderness," sometimes "desert," and once "south." In one place we find a Hebrew term treated as a proper name, and in another translated as an appellative. This gives rise to considerable indefiniteness in many passages of Scripture, and creates confusion in attempts at interpretation. But, besides all this, the ordinary meaning attached to the English word "desert" is not that which can be legitimately attached to any of the Hebrew words it is employed to represent. We usually apply it to "a sterile sandy plain, without inhabitants, without water, and without vegetation"—such, for example, as the desert of Sahara, or that which is overlooked by the Pyramids, and with which many travellers are familiar. No such region was known to the sacred writers, nor is any such once referred to in Scripture. It will consequently be necessary to explain in this article the several words which our translators have rendered "desert," and to show that, as used in the historical books, they denote definite localities. See Topographical Terms.

1. Midbar', מִדְבָּר (Sept. ἔρημος, and ἄνυδρος γῆ), is of very frequent occurrence, and is usually rendered "wilderness" (Gen. xiv, 6, etc.), though in some places "desert" (Exod. iii, 1; v, 1, etc.), and in Psa. lxxv, 6, "south." It properly designates *pasture-ground*, being derived from דָּבַר, *dabar'*, "to drive," significant of the pastoral custom of driving the flocks out to feed in the morning, and home again at night; and it means a wide, open tract used for pasturage, q.

d. a "*common;* thus, in Joel ii, 22, "The pastures of the *desert* shall flourish." It is the name most commonly applied to the country lying between Palestine and Egypt, including the peninsula of Sinai, through which the Israelites wandered (Gen. xxi, 14, 21; Exod. iv, 27; xix, 2; Josh. i, 6, etc.). Now the peninsula of Sinai is a mountainous region; in early spring its scanty soil produces grass and green herbs, and, with the exception of one little plain on the north side of the great mountain-chain, there is no sand whatever. This small plain is expressly distinguished from the rest by the name *Debbet er-Ramleh*, "plain of sand" (Robinson, *Bib. Res.* i, 77; Porter, *Handbook for Syria and Pal.* p. 2 sq.). On the other hand, in this whole region streams of water are not found except in winter and after heavy rain; fountains are very rare, and there are no *settled* inhabitants. Stanley, accordingly, has shown that "sand is the exception and not the rule of the Arabian Desert" of the peninsula of Sinai (*Palest.* p. 8, 9, 64). As to the other features of a desert, certainly the peninsula of Sinai is no plain, but a region extremely variable in height, and diversified even at this day by oases and valleys of verdure and vegetation, and by frequent wells, which were all probably far more abundant in those earlier times than they now are. With regard to the Wilderness of the Wanderings—for which Midbar, or *grazing-tract* (almost our "prairie"), is almost invariably used—this term is therefore most appropriate; for we must never forget that the Israelites had flocks and herds with them during the whole of their passage to the Promised Land. They had them when they left Egypt (Exod. x, 26; xii, 38); they had them at Hazeroth, the middle point of the wanderings (Num. xi, 22), and some of the tribes possessed them in large numbers immediately before the transit of the Jordan (Num. xxxii, 1). In speaking of the Wilderness of the Wanderings the word "desert" occurs as the rendering of *Midbar*, in Exod. iii, 1; v, 3; xix, 2; Num. xxxiii, 15, 16; and in more than one of these it is evidently employed for the sake of euphony merely. See Exode.

Midbar is also used to denote the *wilderness of Arabia;* but generally with the article הַמִּדְבָּר, "the desert" (1 Kings ix, 18). The wilderness of Arabia is not sandy; it is a vast undulating plain, parched and barren during summer and autumn, but in winter and early spring yielding good pasture to the flocks of the Bedawin that roam over it. Hence the propriety of the expression *pastures of the wilderness* (Psa. lxv, 13; Joel i, 19; compare Luke xv, 4). Thus it is that the Arabian tribes retreat into their deserts on the approach of the autumnal rains, and when spring has ended and the droughts commence, return to the lands of rivers and mountains, in search of the pastures which the deserts no longer afford. It may also be observed that even deserts in the summer time are interspersed with fertile spots and clumps of herbage (Hacket's *Illustration of Scripture*, p. 25). The *Midbar of Judah* is the bleak mountainous region lying along the western shore of the Dead Sea, where David fed his father's flocks, and hid from Saul (1 Sam. xvii, 28; xxvi, 2 sq.). The meaning of *Midbar* in both these instances is thus likewise a district without settled inhabitants, without streams of water, but adapted for pasturage. It is the country of nomads, as distinguished from that of the agricultural and settled people (Isa. xxxv, 1; l, 2; Jer. iv, 11). The Greek equivalents in the New Test. are ἔρημος and ἐρημία. John preached in the "wilderness," i. e. the open, unpopulated country, and our Lord fed the multitudes in the "wilderness" or wild region east of the Dead Sea (Matt. iii, 3; xv, 33; Luke xv, 4). See Wilderness.

Midbar is most frequently used for those tracts of waste land which lie beyond the cultivated ground in the immediate neighborhood of the towns and villages of Palestine, and which are a very familiar feature to the traveller in that country. In spring these tracts are covered with a rich green verdure of turf, and small shrubs, and herbs of various kinds. But at the end of summer the herbage withers, the turf dries up and is powdered thick with the dust of the chalky soil, and the whole has certainly a most dreary aspect. An example of this is furnished by the hills through which the path from Bethany to Jericho pursues its winding descent. In the spring, so abundant is the pasturage of these hills that they are the resort of the flocks from Jerusalem on the one hand and Jericho on the other, and even from the Arabs on the other side of Jordan. Even in the month of September, though the turf is only visible on close inspection, large flocks of goats and sheep may be seen browsing, scattered over the slopes, or stretched out in a long, even line like a regiment of soldiers. A striking example of the same thing, and of the manner in which this waste pasture-land gradually melts into the uncultivated fields, is seen in making one's way up through the mountains of Benjamin, due west, from Jericho to Mukhmas or Jeba. These *Midbars* seem to have borne the name of the town to which they were most contiguous, for example, Bethaven (in the region last referred to); Ziph, Maon, and Paran, in the south of Judah; Gibeon, Jeruel, etc., etc. See Village.

In the poetical books "desert" is found as the translation of *Midbar* in Deut. xxxii, 10; Job xxiv, 5; Isa. xxi, 1; Jer. xxv, 24. See Midbar.

2. Arabah′ (עֲרָבָה, Sept. Ἀραβα and ἀυσμή), from עָרַב, *arab′*, to *dry* up (Gesenius, *Thes.* p. 1060), i. e. *parched* ("desert" in Isa. xxxv, 1, 6; xl, 3; xli, 19; li, 3; Jer. ii, 6; xvii, 6; l, 12; Ezek. xlvii, 8; elsewhere usually "plain"), which is either applied to any arid tracts in general, or specially to the *Arabah* (as it is still called), or lone desert tract or plain of the Jordan and Dead Sea, shut in by mountains, and extending from the lake of Tiberias to the Elanitic Gulf; called by the Greeks Αἰλών (Euseb. *Onomast.*). The more extended application of the name by the Hebrews is successfully traced by professor Robinson from Gesenius: "In connection with the Red Sea and Elath" (Deut. i, 1; ii, 8). "As extending to the lake of Tiberias" (Josh. xii, 3; 2 Sam. iv, 7; 2 Kings xxv, 4). "Sea of the Arabah, the Salt Sea" (Josh. iii, 16; xii, 3; Deut. iv, 49). "The *arboth* (plains) of Jericho" (Josh. v, 10; 2 Kings xxv, 5). "Plains (*arboth*) of Moab," i. e. opposite Jericho, probably pastured by the Moabites, though not within their proper territory (Deut. xxiv, 1, 8; Num. xxii, 1). In the East, wide, extended plains are usually liable to drought, and consequently to barrenness. Hence the Hebrew language describes *a plain, a desert*, and *an unfruitful waste* by this same word. Occasionally, indeed, this term is employed to denote any dry or sterile region, as in Job xxiv, 5, and Isa. xl, 3. It is thus used, however, only in poetry, and is equivalent to *Midbar*, to which it is the poetic parallel in Isa. xxxv, 1: "The *wilderness* (Midbar) shall be glad for them, and *the desert* (Arabah) shall rejoice, etc.;" also in xli, 19. *Midbar* may be regarked as describing a region in relation to its use by man—a pastoral region; *Arabah*, in relation to its physical qualities—a wilderness (Stanley, *Palest.* p. 481). But in the vast majority of cases in which it occurs in the Bible, *Arabah* is the specific name given either to the whole, or a part of the deep valley extending from Tiberias to the Gulf of Akabah. With the article הָעֲרָבָה, it denotes, in the historical portions of Scripture, the whole of the valley, or at least that part of it included in the territory of the Israelites (Deut. i, 7; iii, 17; Josh. xii, 1; etc.); when the word is applied to other districts, or to distinct sections of the valley, the article is omitted, and the plural number is used. Thus we find "*the plains* of Moab"

(עֲרָבוֹת, Num. xxii, 1, etc.); "*the plains* of Jericho" (Josh. iv, 13); "*the plains* of the wilderness" (2 Sam. xvii, 16). The southern section of this sterile valley still retains its ancient name, *el-Arabah* (Robinson, *Bib. Res.* i, 169; ii, 186; Stanley, *Palest.* p. 84). It appears, therefore, that this term, when used, as it invariably is in the topographical records of the Bible, with the definite article, means that very depressed and enclosed region—the deepest and the hottest chasm in the world—the sunken valley north and south of the Dead Sea, but more particularly the former. True, in the present depopulated and neglected state of Palestine, the Jordan Valley is as arid and desolate a region as can be met with, but it was not always so. On the contrary, we have direct testimony to the fact that when the Israelites were flourishing, and later in the Roman times, the case was emphatically the reverse. Jericho (q. v.), "the city of palm-trees," at the lower end of the valley, Bethshean (q. v.) at the upper, and Phasaelis in the centre, were famed both in Jewish and profane history for the luxuriance of their vegetation (Joseph. *Ant.* xviii, 2, 2; xvi, 5, 2). When the abundant water-resources of the valley were properly husbanded and distributed, the tropical heat caused not barrenness, but tropical fertility, and here grew the balsam, the sugar-cane, and other plants requiring great heat, but also rich soil, for their culture. *Arabah*, in the sense of the Jordan Valley, is translated by the word "desert" only in Ezek. xlvii, 8. In a more general sense of waste, deserted country—a meaning easily suggested by the idea of excessive heat contained in the root—"desert," as the rendering of *Arabah*, occurs in the prophets and poetical books; as Isa. xxxv, 1, 6; xl, 3; xli, 19; li, 3; Jer. ii, 6; v, 6; xvii, 6; l, 12; but this general sense is never found in the historical books. In these, to repeat once more, *Arabah* always denotes the Jordan Valley, the *Ghôr* of the modern Arabs. See ARABAH.

3. YESHIMON', יְשִׁימוֹן (Sept. *ἄνυδρος* and *ἔρημος*), from יָשַׁם, to *lie waste* ("wilderness," Deut. xxxii, 10; Psa. lxviii, 7; "solitary," Psa. cvii, 4), in the historical books is used with the definite article, apparently to denote the waste tracts on both sides of the Dead Sea. In all these cases it is treated as a proper name in the A. V.: thus in Num. xxi, 20, "The top of Pisgah, which looketh towards *Jeshimon*." See also BETH-JESIMOTH. Without the article it occurs in a few passages of poetry, in the following of which it is rendered "desert:" Psa. lxxviii, 40; cvi, 14; Isa. xliii, 19, 20. This term expresses a *greater extent* of uncultivated country than the others (1 Sam. xxiii, 19, 24; Isa. xliii, 19, 20). It is especially applied to that desert of peninsular Arabia in which the Israelites sojourned under Moses (Num. xxi, 20; xxiii, 28). This was the most terrible of the deserts with which the Israelites were acquainted, and the only *real* desert in their immediate neighborhood. It is described under ARABIA, as is also that Eastern desert extending from the eastern border of the country beyond Judæa to the Euphrates. It is emphatically called "the Desert," without any proper name, in Exod. xxiii, 31; Deut. xi, 24. To this latter the term is equally applicable in the following poetical passages: Deut. xxxii, 10; Psa. lxviii, 7; lxxviii, 40; cvi, 14. It would appear from the reference in Deuteronomy—"waste, howling wilderness," that this word was intended to be more expressive of utter wasteness than any of the others. In 1 Sam. xxiii, 19, and xxvi, 1, it evidently means the wilderness of Judah. See JESHIMON.

4. CHORBAH', חָרְבָּה (Sept. *ἔρημος*, etc.; A.V. usually "waste," "desolate," etc.), from חָרַב, to be *dried* up, and hence desolate, is a more general term denoting a *dry place* (Isa. xlviii, 21), and hence *desolation* (Psa. ix, 6), or concretely *desolate* (Lev. xxvi, 31, 33; Isa. xlix, 14; lxiv, 10; Jer. vii, 34; xxii, 5; xxv, 9, 11, 18; xxvii, 12; xliv, 2, 6, 22; Ezek. v, 14; xxv, 13; xxix, 9, 10; xxv, 4; xxviii, 8), or *ruins* (Ezek. xxxvi, 10, 33; xxxviii, 12; Mal. i, 4; Isa. lviii, 12; lxi, 4). It is generally applied to what has been rendered desolate by man or neglect (Ezra ix, 9; Psa. cix, 10; Isa. xliv, 26; li, 3; lii, 9; Jer. xlix, 13; Ezek. xxvi, 20; xxiii, 24, 27; xxxvi, 4; Dan. ix, 2). It is employed in Job iii, 14, to denote buildings that speedily fall to ruin (comp. Isa. v, 17, the ruined houses of the rich). The only passage where it expresses a natural waste or "wilderness" is Isa. xlviii, 21, where it refers to that of Sinai. It does not occur in any historical passage, and is rendered "desert" only in Psa. cii, 6; Isa. xlviii, 21; Ezek. xiii, 4.

5. The several deserts or wildernesses mentioned in Scripture (besides the above) are the following, which will be found under their respective names: (1.) The *Desert of Shur* or *Etham* (Num. xxxiii, 8; Exod. xiii, 17; xv, 22); (2.) the *Desert of Paran* (Num. x, 12; xiii, 3); (3.) the *Desert of Sinai* (Exod. xix); (4.) the *Desert of Sin* (Exod. xvi, 6); (5.) the *Desert of Zin* (Num. xx, 1)—these are probably only different parts of the great *Arabian Desert*, distinguished by separate proper names; (6.) the *Desert of Judah*, or *Judæa* (Psa. lxiii, in the title; Luke i, 80); (7.) the *Desert of Ziph* (1 Sam. xxiii, 14, 15); (8.) the *Desert of Engedi* (Josh. xv, 62); (9.) the *Desert of Carmel* (Josh. xv, 55); (10.) the *Desert of Maon* (1 Sam. xxiii, 24); (11.) the *Desert of Tekoa* (2 Chron. xx, 20)—these are probably only parts of the *Desert of Judah;* (12.) the *Desert of Jericho*, separating the Mount of Olives from the city of Jericho (Jer. lii, 8); (13.) the *Desert of Beth-Aven* seems to be a part of Mount Ephraim (Josh. xviii, 12); (14.) the *Desert of Damascus* (1 Kings xix, 15) is the same as the Desert Syria, where Tadmor was built (1 Kings ix, 18).

6. "*Desert*" or "wilderness" is also the symbol in Scripture of temptation, solitude, and persecution (Isa. xxvii, 10; xxxiii, 9). The figure is sometimes emblematical of spiritual things, as in Isaiah xli, 19; also in chap. xxxii, 15, where it refers to nations in which there was no knowledge of God or of divine truth, that they should be enlightened and made to produce fruit unto holiness. A desert is mentioned as the symbol of the Jewish Church and people, when they had forsaken their God (Isa. xl, 3); it is also spoken of with reference to the conversion of the Gentiles (Isa. xxxv, 1). The solitude of the desert is a subject often noticed (Job xxxviii, 26; Jer. ix, 2). The desert was considered the abode of evil spirits, or at least their occasional resort (Matt. xii, 43; Luke xi, 24), an opinion held also by the heathen (Virg. *Æn.* vi, 27).

Desire. See CONCUPISCENCE; SIN.

Desire (Eccl. xii, 5). See CAPER-PLANT.

DESIRE OF ALL NATIONS (חֶמְדַּת כָּל־הַגּוֹיִם, the *delight of all the nations;* Sept. *τὰ ἐκλεκτὰ πάντων τῶν ἐθνῶν;* Vulg. *desideratus cunctis gentibus*) is an expression (Hag. ii, 7) usually referred as a title to the Messiah (see in Henderson, *Comment.* in loc.), but denoting rather the choicest treasures of the Gentiles (comp. Isa. lx, 3–7), which are figuratively represented as an oblation to the Messianic dispensation (see Moore, *Comment.* in loc.; Sartorius, *De venturo gentium Desiderio*, Tüb. 1756).

Desk, in the Church of England, a raised seat, otherwise called a "reading-pew" (see rubric before "Commination"), set up in the body of the church, from which, since the beginning of the reign of James I, it has been appointed that the daily morning and evening service should be read, the chancel having been used for that purpose before the above period. In the Protestant Episcopal Church of the United States there is no rubric on the subject.

Desmares, Toussaint Gui Joseph, a celebrated French preacher and controversial writer, was born at Vire in 1599. He entered at an early age the new Congregation of the Oratory, where Father (subsequently cardinal) Berulle became his spiritual adviser, and, later, his friend. As a preacher, from 1638 to 1648, he met with marked success. A profound study of the works of St. Augustine made him an adherent of the Jansenists, whose doctrines he defended with a zeal which made him many enemies. He was forbidden the pulpit, and a *lettre de cachet* was obtained against him, but he had time to escape. By another *lettre* he was exiled to Quimper, whence he was in 1653 permitted to return. He then went to Rome to plead the cause of the Jansenists, and delivered in the presence of the pope a remarkable speech, which was published in the *Journal de St. Amour*. On his return to France he had to conceal himself until 1668, when the archbishop of Paris appointed him to preach during Advent in the church of St. Roch. But soon he was again obliged to flee, but he found a powerful protector, first in the duke of Luynes, and subsequently in the duke of Liancourt. He died at Liancourt on Jan. 19, 1669. All his works that are published are of a controversial character; some others, e. g. *Traité de l'Église*, still remain unpublished.—Hoefer, *Biog. Générale*, xiii, 842.

Desmarets. See Maresius.

Desolation, Abomination of (*βδέλυγμα τῆς ἐρημώσεως*, Matt. xxiv, 15; Mark xiii, 14, as a translation of שִׁקּוּץ מְשֹׁמֵם), especially in Dan. ix, 27, "and for the overspreading (כָּנָף, *wing*) of *abominations he shall make it desolate*" (so the A. V. vaguely and inaccurately renders). Here an especial difficulty in the interpretation of the phrase is created by the ambiguity of the term כָּנָף, which is usually regarded as equivalent to the *πτερύγιον*, or *winglet* ("pinnacle") of the Temple (Matt. iv, 5; iv, 9). See Pinnacle. "We believe," says Hävernick, "that of all the meanings of כָּנָף that are sufficiently supported, none so commends itself as that of *border*, properly of a garment, e. g. 1 Sam. xv, 27; Num. xv, 36; Ezra v, 3; Zech. viii, 23; Hag. ii, 12; then secondarily of places, regions of the earth, hence כַּנְפוֹת הָאָרֶץ, the ends, limits, uttermost parts of the earth, Job xxxvii, 3; xxxviii, 13; Isa. xi, 12; Ezek. vii, 2. (Sept. *πτέρυγες τῆς γῆς*, the extremity of the earth.) . . . . According to this, כָּנָף would denote here *extremitas regionis*, the utmost point or part of a district or of a place, and עַל־כְּנַף שִׁקּוּצִים, on the utmost height of abomination, i. e. on the highest place where abomination could be committed. But the highest point in Jerusalem was the Temple, and it must be this which is thus designated here. We admit that this meaning would be obscure before the fulfilment of the prediction; but this we hold to be only a characteristic feature of such predictions. . . . . As respects the form מְשֹׁמֵם, most interpreters take it as *nomen participiale* for 'destruction;' but this is against the usage of the form elsewhere in Daniel (xi, 31), and the meaning is brought out much more vividly and poetically by our construction. 'On the summit of abomination is a destroyer,' probably collectively for 'destroyers' in general. . . . . According to this explanation, there can be no doubt that the Sept. has already rightly given the meaning of the passage when it translates *καὶ ἐπὶ τὸ ἱερὸν βδέλυγμα τῶν ἐρημώσεων ἔσται*, and so the Syr. Ambros. Somewhat different from this is Theodotion, *καὶ ἐπὶ τούτοις* (these two words are wanting in the Vatican Codex) *ἐπὶ τὸ ἱερὸν βδέλυγμα τῆς ἐρημώσεως* (Cod. Vat. *τῶν ἐρημώσεων*), and so Jacob of Edessa (ap. Bugati, p. 151), except that he seems to have read *καὶ ἐρήμωσις*. The Peshito gives 'on the wings of abhorrence,' and this Ephraem refers to the Roman eagles. The Vulg., *Et erit in templo abominatio desolationis:* Ven. Gr., *καπὶ πτέρυγος βδελύγματα ἐρημοῦν*" (*Commentar üb. Daniel* in loc.). Some codices read ובהיכל יהיה שיקוץ, *and in the temple of Jehovah an abomination* (see Kennicott, *Bib. Heb.* in loc.; De Rossi, *Var. Lectt.* iv, 147). This agrees with the reading of the Sept. and Jerome, as also of the Memphitic and Sahidic versions, and with the citation of the evangelists. It may be a mere correction, but there is a curious fact urged by Michaelis which seems to give it some weight. Josephus, in recording the destruction of the Arx Antonia, says that the Jews thus made the Temple building a square, not considering that it was written in the prophecies that the city and Temple should be taken when the Temple was made four-square (*War*, vi, 5, 4). To what prediction the historian here refers has always appeared obscure, and his whole statement has been perplexing. But Michaelis argues that if the reading of Dan. ix, 27 was in his day that given above, the difficulty is solved; for we have only to suppose he read the last word שְׁקָקוּץ, *she-yakots'*, in which case the meaning would be "and in the Temple shall he who cuts off (from קצץ) be a desolator" (*Orient. u. exeget. Bibliothek*, ii, 194). If we may take Josephus as a representative of the common opinions of his countrymen, they must have regarded these predictions as finding their fulfilment not merely in the acts of Antiochus Epiphanes, but also in the destruction of Jerusalem by the Romans (*Ant.* x, 7). As against the opinion that שִׁקּוּץ is to be understood of idolatrous objects carried by heathens into the Temple, it has been objected that this word designates idols only as adopted by the Jews. But this is wholly unfounded, as 1 Kings xi, 5; 2 Kings xxiii, 13, and other passages abundantly show. Indeed, the word is always used objectively, to designate that which is an abomination, not *in*, but *to* the parties spoken of. See Abomination.

Desperāti, a name of reproach by which the early Christians, in times of persecution, were stigmatized. Lactantius says, "Those who set a value on their faith, and will not deny their God, they first torment and butcher with all their might, and then call them *desperati*, because they will not spare their own bodies; as if anything could be more desperate than to torture and tear in pieces those whom you cannot but know to be innocent."—Bingham, *Orig. Eccl.* bk. i, ch. ii, § 9.

Des'saü (Δεσσαού v. r. Λεσσαού, perh. for Chald. דִּרְשׁוּ, i. e. Heb. דִּרְשׁוּת, *trituration;* Vulg. *Dessau*), a village (*κώμη, castellum*) at which Nicanor's army was once encamped during his campaign with Judas (2 Macc. xiv, 16). There is no mention of it by this name in the account of these transactions in 1 Macc. or in Josephus, but Ewald conjectures (*Gesch. Isr.* iv, 368 note) that it may have been the Adasa (q. v.) in the same region (1 Macc. vii, 40, 45; Joseph. *War*, iii, 6).

Destroyer (מַשְׁחִית, *mashchith'*, Exod. xii, 23; *ὀλοθρευτής*, 1 Cor. x, 10), an exterminator (see Brömel, *De angelo exterminatore*, Jen. 1685; also in the *Thesaur. theol. philolog. V. T.* i, 301 sq.). See Death. The Hebrews were accustomed by a figure to speak of any superhuman agency as that of an angel (see Bush, *Note* on Exod. iii, 2); and whenever this had a providential aspect it was attributed to a divine messenger (2 Kings xix, 35; 2 Sam. xxiv, 15, 16; Psa. lxxviii, 49; Acts xii, 23). See Angel. Even Satan's malignity is represented as thus employed (Job ii, 6, 7). See Abaddon.

Desservants, a name given in the Church of France to such of the Roman Catholic clergy as have charge of churches or chapels subordinate to the parish church. The old French law distinguishes between parish churches (*parochiales ecclesiæ*) and auxiliary churches (*succursales ecclesiæ*), and the clergymen supplying the latter were under the orders of the

parish priest (Du Cange, *Gloss*, s. v.) When Bonaparte restored the Roman Catholic Church in France, he provided for the stipend of the pastors (*curés*) out of the government funds; it became therefore desirable to reduce their number as much as possible. It was settled that there should be one for every district subject to a justice of the peace, and that the subordinate churches (*succursales*) should be supplied with what priest they required on condition that these priests should be chosen among those who had pensions, by means of which, together with what their congregations would give them, they could support themselves. Two decrees, dated May 31, 1804, and Dec. 26, 1804, granted to the *desservants* a stipend of 500 francs. The *desservants* firmly established themselves in their respective fields of labor, and came, in fact, to differ only from the curates or pastors in having a smaller salary, and being more under the control of the bishops. This control they tried to escape, but their efforts met with but little success. Pope Gregory XVI decided in favor of the existing order of things. The bishops never remove a desservant from his parish except for grave reasons. The *desservants* form the greater part of the Roman Catholic clergy of France, Belgium, and Rhenish Prussia. See Sibour, *Institutions diocésaines par Mgr. l'évêque de Digne* (Paris, 1845; Digne, 1848), etc.; Jacobson, in Herzog, *Real-Encyklopädie*, iii, 330.

Destruction, City of (Isa. xix, 18). See On.

Destruction of BEL AND THE DRAGON, The History of the, one of the apocryphal books of the Old Testament, found only in the Greek. See Apocrypha.

I. *Title and Position.*—This apocryphal piece, which is called by Theodotion, or in our editions of the Sept., Βὴλ καὶ Δράκων, *Bel and the Dragon*, and in the Vulg. *The History of Bel and the Great Serpent*, has in the Sept. the inscription ἐκ προφητείας Ἀμβακοὺμ υἱοῦ Ἰησοῦ ἐκ τῆς φυλῆς Λευΐ, *A Part of the Prophecy of Habakkuk, the Son of Jesus, of the Tribe of Levi*, and is placed at the end of Daniel as a supplemental chapter, forming in the Vulg. the 14th chapter of that prophet. In the English Authorized Version it is entitled in full as above, where it is placed between the History of Susanna and the Prayer of Manasses. See Bel and the Dragon.

II. *Contents.*—The plan of the writer is both ingenious and attractive. Cyrus, who was a devout worshipper of Bel, urged Daniel to serve his idol, and referred to the marvellous fact that it devoured daily the enormous sacrifice of twelve great measures of fine flour, forty sheep, and six vessels of wine (ver. 1–6); but Daniel, knowing the deception connected therewith, smiled at it (ver. 7); thereupon the king summoned the priests of Bel, and demanded an explanation from them (ver. 8–10); they, to satisfy him that the idol does consume the sacrifice, told the monarch that he should place it before Bel himself (ver. 11–13). Daniel, however, had ashes strewed on the pavement of the temple, and convinced Cyrus, by the impress of the footsteps upon the ashes, that the sumptuous feast prepared for Bel was consumed in the night by the priests, their wives, and their children, who came into the temple through secret doors, and the king slew the crafty priests (ver. 11–22). As for the Dragon, who, unlike the dumb Bel, was, as Cyrus urged, a living being (ver. 23, 24), Daniel poisoned it, and then exclaimed, "These are the gods you worship!" (ver. 25–27). The Babylonians, however, greatly enraged at the destroyer of their god, demanded of Cyrus to surrender Daniel, whom they cast into a den wherein were seven lions (ver. 28–32). But the angel of the Lord commanded the prophet Habakkuk, in Judæa, to go to Babylon to furnish Daniel with food, and when he pleaded ignorance of the locality, the angel carried him by the hair of his head through the air to the lions' den, where he fed and comforted Daniel (ver. 36–39). After seven days Cyrus went to the den to bewail Daniel, "and, behold, Daniel was sitting!" The king then commanded that he should be taken out, and all his persecutors be thrown in to be instantly devoured, and the great Cyrus openly acknowledged the greatness of the God of Israel (ver. 40–42). This story is read in the Roman Church on Ash-Wednesday, and in the Anglican Church on the 23d of November. See Daniel, Apocryphal Additions to.

III. *Character of the Book.*—The object of the Jewish author of the history of the destruction of *Bel and the Dragon* was, according to Jahn, "to warn against the sin of idolatry some of his brethren who had embraced Egyptian superstitions. The book was therefore well adapted to the time, and shows that philosophy was not sufficient to keep men from apostatizing into the most absurd and degrading superstitions." The time of the writing Jahn ascribes to the age of the Ptolemies, when serpents were still worshipped at Thebes.

Among the difficulties attending this as a portion of the book of Daniel, Jahn enumerates the denominating Daniel a priest (xiv, 1), which he conceives to be a confounding of Daniel the prophet with Daniel the priest (Ezra viii, 2; Neh. x, 7); the order of the king to destroy the idol of Bel, and the assertion that serpents were worshipped at Babylon; but he conceives all these difficulties to be removed by regarding the whole as a parable, pointing out the vanity of idols, and the impostures of the priests. We are informed by Herodotus that the temple of Bel was destroyed by Xerxes. By Protestants, of course, these apologies for the canonicity of this and the other apocryphal additions to Daniel are regarded as wholly insufficient. See Deutero-Canonical.

IV. *Source and original Language.*—The basis of this story is evidently derived from Dan. vi and Ezek. viii, 3, ingeniously elaborated and embellished to effect the desired end. It is not in the nature of such sacred legends to submit to the trammels of fact, or to endeavor to avoid anachronisms. That Daniel, who was of the tribe of Judah, should here be represented as a priest of the tribe of Levi; that he should here be said to have destroyed the temple of Belus which was pulled down by Xerxes, and that the Babylonians should be described as worshippers of living animals, which they never were, are therefore quite in harmony with the character of these legends. Their object is effect, and not fact. The Greek of our editions of the Sept. is the language in which this national story has been worked out by the Alexandrine embellisher to exalt the God of Abraham before the idolatrous Greeks. Various fragments of it in Aramæan and Hebrew are given in the Midrash (*Bereshith Rabba*, c. 68), Josippon ben-Gorion (p. 34–37, ed. Breithaupt), and in Delitzsch's work, *De Habacuci vitâ et ætate*, which will show the Babylonian and Palestinian shape of these popular traditions. See Bel.

Destructionists. See Annihilationists.

Determinism, the general name for all those theories according to which man, in his religious and moral action, is absolutely determined by external or internal motives not belonging to him, and which either deny his freedom or explain it as a mere semblance. In opposition to determinism, the word indeterminism has been used of a will which is absolutely undetermined from abroad, but wholly determines itself. Such an absolute indeterminism can only be predicated of the absolute being. Absolute determinism, on the other hand, can only be attributed to objects whose activity is altogether dependent upon external impulses, as is the case with the objects of nature. Applying the term to man, every branch of the Christian Church holds to some kind of determinism, inasmuch as he is dependent upon the absolute being, and that his actions are influenced by impulses not his own

But it is common to understand by determinism those views of man's dependence upon external influences which destroy his moral responsibility. In this sense various kinds of determinism are distinguished. It is *fatalistic* or *predeterministic* if it places an irresistible fatality above even the divine being or economy, as was done by the Greeks in the doctrine of fate, and is still done by the Mohammedans. It is *pantheistic* if it deduces necessity from the unalterable connection of things, making the individual acts of man, as it were, a sport of the world-soul with itself, as was the case in the cosmic theories of the Indians, in the ethics of the Stoics, in the system of Spinoza, and in certain modern systems. The *astrological* determinism is a transition from the first to the second kind. Determinism is *materialistic* if the want of human freedom is explained by the life of the human soul being determined by an evil or hostile *materia*, as was done by the Parsees, the Gnostics, and the Manichæans. Different from these ancient materialists are the modern representatives of a materialistic determinism, like La Mettrie, who reduce all human actions to an absolute compulsion by sensuous motives. A subdivision of this determinism is the phrenological determinism which in modern times has found some champions. A subtle form of determinism is found in some rationalistic writers, who explain the self-determination of man as a coercion by inner representations (Priestly) or by adequate reasons (Leibnitz). Other writers on this subject have divided determinism into mechanical, rational, and metaphysical determinism.—Herzog, *Real-Encyklop.* iii, 331. See WILL; PREDESTINATION.

Detraction (Lat. *detractio*, from *detrahere*) means primarily taking off from a thing; and in morals it is the act of depreciating another's reputation. Barrow observes (*Works*, N. Y. edition, i, 203 sq.) that it differs from *slander*, which involves an imputation of falsehood; from *reviling*, which includes bitter and foul language; and from *censuring*, which is of a more general purport, extending indifferently to all kinds of persons, qualities, and actions; but detraction especially respects worthy persons, good qualities, and laudable actions, the reputation of which it aimeth to destroy. It is a fault opposed to *candor*. "Nothing can be more incongruous with the spirit of the Gospel, the example of Christ, the command of God, and the love of mankind, than a spirit of *detraction;* and yet there are many who never seem happy but when they are employed in this work; they feed and live upon the supposed infirmities of others; they allow excellence to none; they depreciate every thing that is praiseworthy; and, possessed of no *good* themselves, they think all others are like them. 'O! my soul, come thou not into their secret; unto their assembly, mine honour, be not thou united'" (Buck, *Theolog. Dict.* s. v.). "When we consider the motives in which detraction originates, we shall find that most of them spring from, or centre in, malevolence. In some persons there is a lust of distinction, which cannot endure an equal, and burns with a desire to level the pre-eminence of every superior. In whatever degree this disposition may prevail, it is combined with a desire to eclipse the worth, or to deduct from the excellence of those above, or those on a level of ability or merit with itself. Hence, if we would eradicate every propensity to detraction, it is essentially requisite that we cultivate a humble spirit, and that, impressed with a consciousness of our own unworthiness, we learn to think and to speak of others more justly as well as more charitably. Some persons of mean talents, slender capacity, grovelling desires, or little industry, who are too timid to undertake any thing good or great, or too feeble or too indolent to execute it, are continually endeavoring to screen themselves from contempt, or to hide their own individual insignificance by depreciating the worth, railing at the audacity, or ridiculing the exertions of those who have more ability, more enterprise, more intellect, and more activity than themselves. There is no integrity, however pure, no worth, however genuine, which is not exposed to invidious obscuration, to unjust surmises, and wily misrepresentation; and designing and interested men, who abound in the wisdom of this world, well know how to convert these practices to their own advantage, and to the injury of their neighbor. If detraction be found in a greater degree, or of a more mischievous kind, in a court than in a village, it is only because in the former there is a stronger incitement to its exercise, and more ample space for its operations. Detraction tends to reduce the best men to a level with the worst, and thus to bring worth itself into disrepute. It tends to chill the ardor of doing good, and to produce a general belief that all the virtue which exists among men is imaginary and counterfeit. It involves in itself a high degree of depravity, and is connected with the violation of every moral tie. Is it not adverse to justice? Is it not incompatible with charity? Is it not a plain dereliction of our duty to God? For is it not principally occupied in lessening the estimation of the good and wise, who are more especially the objects of his favor, and the excellence of his rational creation? Must not the practice, therefore, bring us under the divine displeasure? Is there not in the habit so large a mixture of malevolence as necessarily implies that we are strangers to the love of God; and, if we will persist in so hateful a practice, can we hope to escape that place of torment in which there are weeping and gnashing of teeth? (*Fellowes's Body of Theology*, ii, 352, 367; *Warner's System of Divinity and Morality*, ii, 90)."

Deü'el (Heb. *Deüel'*, דְּעוּאֵל, according to Gesenius, *invocation of God;* according to Fürst, *acquainted with God;* Sept. Ῥαγουήλ; Vulg. *Dehuel*), father of Eliasaph, the "captain" (נָשִׂיא) of the tribe of Gad at the time of the numbering of the people at Sinai (Num. i, 14; vii, 42, 47; x, 20). B.C. ante 1657. The same man is mentioned again in ii, 14, but here the name appears as REUEL (q. v.), owing to an interchange of the two very similar Hebrew letters ד and ר. In this latter passage the Samaritan, Arabic, and Vulg. retain the D; the Sept., as in other places, has R. The greater weight of evidence is therefore in favor of the reading "Deuel" in both passages. Fürst ingeniously suggests (*Heb. Handw.* p. 304) that the name may have been originally *Daruel* (דַּרְיוּאֵל), which would explain the various reading.

Deurhoff, WILLEM, was born at Amsterdam in 1650. He did not follow any particular course of study, received no regular education, and followed the business of basket-making during his whole life, yet made himself a name by the originality and vigor of his reasoning faculties. He died in 1717. While following his daily vocations, he studied philosophy and theology, yet without any system or method. Among the philosophers he followed more especially Spinoza and Des Cartes, particularly the latter; yet he thought he could improve on Des Cartes's system. The peculiar philosophico-theological system which he thus originated is presented explained in his various writings, which, however, are now become scarce, and contain, besides, many heterodox principles. See Buckeri *Historia Philosophiæ* (tom. iv, pt. ii, Lpz. 1744, p. 291, 704, 720); Herzog, *Real-Encyklop.* iii, 333.

Deusdĕdit, or **Deodātus**, POPE, succeeded Boniface IV, 615, and died 618. His reign is marked by quite wonderful miracles, and by false decretals. His name is among the *saints* (Nov. 9).

Deus misereātur (*God have mercy*), the Latin name of the sixty-seventh psalm, derived from its first words, which, in the Church of England, may be used in the evening prayer, after the second lesson, instead of the *nunc dimittis*, except on the twelfth day of the

month, on which it occurs among the psalms for the day.

Deusing, HERMAN, son of Anthony Deusing, a distinguished physician, mathematician, and professor, was born in Groningen, March 14, 1654. He was bred to the profession of law, but, taking a dislike to it, he relinquished it, and devoted himself exclusively to theological studies. In 1690 he published his *Historia allegorica Veteris et Novi Testamenti, juncta revelatione mysterii s. s. triados.* By this work he made himself known as a typical and mystical theologian. The typical interpretation of the Scriptures was pushed to its extreme limits. The doctrine of the Trinity was allegorically explained. The result was, that he was accused of heresy, and debarred from the Lord's Supper. He wrote two works in his own defence, one in Dutch and the other in Latin. In 1700 appeared his *Commentarius mysticus in decalogum et explicatio mystica tum historiæ de muliere hæmorrhoisa et filia Jairi, tum parabolæ de Epulone divite et Lazaro mendico.* In 1712 he gave to the world his *Mysterium s. s. triados,* in which he fully developed his allegorical views of this doctrine. He also contributed several exegetical articles to the *Bibliotheca Bremensis.* He gradually receded from his extreme views. The Groningen Consistory repealed the sentence of suspension that they had passed against him. He now connected himself with the Walloon Church. He was permitted to spend the remainder of his days in peace, and he died January 3, 1722, in the city of his birth.

Deutero-Canonical BOOKS OF THE OLD TESTAMENT, a term applied in modern times to denote those sacred books which, originally denominated *ecclesiastical* and *apocryphal*, were not in the Jewish or Hebrew Canon, but, as being contained in the old Greek versions, were publicly read in the early Christian Church. See APOCRYPHA. For the suspected books of the *New Testament*, see ANTILEGOMENA.

1. It is acknowledged by all that these books never had a place in the Jewish Canon. The Roman Catholic professor Alber, of Pesth (who considers them as of equal authority with the received books of the Hebrew Canon), observes: "The Deutero-canonical books are those which the Jews had not in their Canon, but are, notwithstanding, received by the Christian Church, concerning which, on this very account of their not having been in the Jewish Canon, there has existed some doubt even in the Church" (*Institut. Hermeneut.* vol. i, ch. viii, ix). Josephus, a contemporary of the apostles, after describing the Jewish Canon (*Apion*, i, 8), which he says consists of twenty-two books, remarks: "But from the reign of Artaxerxes to within our memory there have been several things committed to writing which, however, *have not acquired the same degree of credit and authority* as the former books, inasmuch as the tradition and succession of the prophets were less certain." It has been shown by Hornemann (*Observat. ad illust. doctr. de Canon. V. T. ex Philone*) that, although Philo was acquainted with the books in question, he has not cited any of them, at least with the view of establishing any proposition.

2. Among the early Christian writers, Jerome, in his Prefaces, gives us the most complete information that we possess regarding the authority of these books in his time. After enumerating the twenty-two books of the Hebrew Canon, consisting of the Law, the Prophets, and the Hagiographa, he adds: "This prologue I write as a preface to the books to be translated by us from the Hebrew into Latin, that we may know that all the books which are not of this number are *apocryphal;* therefore Wisdom, which is commonly ascribed to Solomon as its author, and the book of Jesus the son of Sirach, Judith, Tobit, and the Shepherd, *are not in the Canon.*" Again, in the preface to his translation of the books of Solomon from the Hebrew, he observes: "These three books (Proverbs, Ecclesiastes, and Canticles) only are Solomon's. There is also the *Book of Jesus the son of Sirach*, and another pseud-epigraphal book, called the *Wisdom of Solomon;* the former of which I have seen in Hebrew, called not Ecclesiasticus, as among the Latins, but the Parables; with which likewise have been joined Ecclesiastes and the Song of Songs, that the collection might the better resemble the books of Solomon both in matter and design. The second is not to be found at all among the Hebrews, and the style plainly evinces its Greek original: some ancient writers say it is a work of Philo the Jew. As, therefore, the Church reads Judith and Tobit, and the books of Maccabees, but does not receive them among the Canonical Scriptures, so likewise it may read these two books for the edification of the people, but not as of authority for proving any doctrines of religion (*ad ædificationem plebis, non ad auctoritatem ecclesiasticorum dogmatum confirmandam*)." Of Baruch he says that he does "not translate it because it was not in Hebrew, nor received by the Jews." He never translated Wisdom, Ecclesiasticus, or either of the books of Maccabees, and observes that "such books as are not of the twenty-four letters are to be utterly rejected" (*Præf. ad Ezram*). In his *Preface to Judith* he says, in like manner, "Among the Hebrews this book is read among the *hagiographa* (or, according to some manuscripts, *apocrypha*), whose authority is not judged sufficient to support disputed matters." He adds, at the same time, that "the Council of Nice is said to have included it in the catalogue of the holy Scriptures." We have, however, no authority for supposing that the Council of Nice ever formed such a catalogue. There is no account of the matter in any of its acts which have reached us. There is, indeed, a catalogue, as is observed by Mr. Jones, attributed by Pappus, in his *Synodicon*, to this council, with this relation: "That the bishops there assembled were, by a very extraordinary miracle, convinced which were inspired and which were apocryphal books, after this manner: Having put all the books that laid claim to inspiration under the communion-table (τῇ θείᾳ τραπέζῃ) in a church, they prayed to God that those which were of divine inspiration might be found above or upon the table, and those which were apocryphal might be found under; and, accordingly, as they prayed, it came to pass." This is universally acknowledged to be a fable, and cardinal Bellarmine (*De Verbo Dei*) admits that there could have been no canon determined on by the Nicene Council, as in that case none would have ventured to reject it; but he supposes that Jerome may have found in some of its acts, now lost, some citation from the book of Judith. Bellarmine further admits that in Jerome's time the ecclesiastical books, although read in the churches, were neither in the *Jewish nor Christian Canon*, inasmuch as no general council had yet determined anything concerning them.

Rufinus made the same distinction with regard to the books of Scripture that Jerome did. After enumerating the books of the Old and New Testaments exactly according to the Jewish Canon, saying, "These are the volumes which the fathers have included in the Canon, and out of which they would have us prove the doctrines of our faith," he adds, "however, it ought to be observed that there are also other books which are not *canonical*, but have been called by our forefathers *ecclesiastical*, as the Wisdom of Solomon, and another called the Wisdom of the Son of Sirach, which among the Latins is called by the general name of Ecclesiasticus, by which title is denoted not the author of the book, but the quality of the writing. Of the same order is the book of Tobit, Judith, and the books of the Maccabees. In the New Testament is the book of the Shepherd of Hermas, which is called 'Two Ways, or the Judgment of Peter;' all which they would have to be read in the churches, but not alleged by way of

authority for proving articles of faith. Other Scriptures they call *apocryphal*, which they would not have to be read in churches" (*In Symb. Apost.*).

There have thus been three divisions made by the ancients, viz. the Canonical Scriptures, the Ecclesiastical, and the Apocryphal; or, otherwise, the Canonical and the Apocryphal, of which latter there are two kinds, viz. those which, having nothing contrary to the faith, may be profitably read, although not authentic, and those which are injurious and contrary to the faith. It is, however, maintained by professor Alber that, when Jerome and Rufinus said the ecclesiastical books were read for edification, but not for confirming articles of faith, they only meant that they were not to be employed in controversies with the Jews, who did not acknowledge their authority. These fathers, however, certainly put them into the same rank with the Shepherd of Hermas.

The earliest catalogue which we possess of the books of Scripture is that of Melito, bishop of Sardis, preserved by Eusebius. From his statement, written in the year 170, it seems evident that there had then been no catalogue authorized by the Church or any public body. He enumerates the books of the Jewish Canon only, from which, however, he omits the book of Esther (q. v.).

The first catalogue of the Holy Scriptures, *drawn up by any public body in the Christian Church*, which has come down to us, is that of the Council of Laodicea, in Phrygia, supposed to be held about the year 365. In the last two canons of this council, as we now have them, there is an enumeration of the books of Scripture nearly conformable, in the Old Testament, to the Jewish Canon. The canons are in these words:

"That private Psalms ought not to be said in the church, nor any books not canonical, but only the canonical books of the Old and New Testament. The books of the Old Testament which ought to be read are these: 1. Genesis; 2. Exodus; 3. Leviticus; 4. Numbers; 5. Deuteronomy; 6. Joshua, son of Nun; 7. Judges, with Ruth; 8. Esther; 9. 1 and 2 Kingdoms; 10. 3 and 4 Kingdoms; 11. 1 and 2 Remains; 12. 1 and 2 Esdras; 13. the book of 150 Psalms; 14. Proverbs; 15. Ecclesiastes; 16. Canticles; 17. Job; 18. the Twelve Prophets; 19. Isaiah; 20. Jeremiah and *Baruch*, the Lamentations and the Epistles; 21. Ezekiel; 22. Daniel."

This catalogue is not, however, universally acknowledged to be genuine. "Possibly learned men," says Lardner, "according to the different notions of the party they have been engaged in, have been led to disregard the last canon; some because of its omitting the apocryphal books of the Old Testament, and others because it has not the book of Revelation." Basnage, in his *History of the Church*, observes that "Protestants and Catholics have equally disparaged this synod." "It is said," remarks Lardner, "that the canons of this council were received and adopted by some General Councils in after times; nevertheless perhaps it would be difficult to show that those General Councils received the last canon, and exactly approved the catalogue of said books therein contained, without any addition or diminution, as we now have it" (see Mansi's *Concilia*, ii, 574).

But, besides the Hebrew canon, the reader will have observed that there were certain other books publicly read in the primitive Church, and treated with a high degree of respect, although not considered by the Hebrews, from whom they were derived (see the passage above cited from Josephus), as of equal authority with the former. These books seem to have been included in the copies of the Septuagint, which was generally made use of by the sacred writers of the New Testament. It does not appear whether the apostles gave any cautions against the reading of these books, and it has even been supposed that they have referred to them. Others, however, have maintained that the principal passages to which they have referred (for it is not pretended that they have cited them) are from the canonical books. The following are the passages here alluded to:

Rom. xi, 24, comp. with Wisdom ix, 13, see Isa. xl, 13.		
Heb. i, 13,	"	" vii, 26.
" xi, 5,	"	" iv, 10, see Gen. v, 24.
Rom. xiii, 1,	"	" vi, 3, see Prov. viii, 15, 16.
" ii, 11		
Gal. ii, 6		
Eph. vi, 9	"	" vi, 7, see Deut. x, 17.
Col. iii, 23		
1 Pet. i, 24		
James i, 10	"	Ecclus. xiv, 17, see Isa. xl, 6.
1 Cor. x, 10,	"	Judith viii, 25, (Lat.) Num. xiv, 15.
James ii, 23,	"	" v, 22.
Luke x, 41,	"	Tobit iv, 7.
1 Thess. iv, 3,	"	" iv, 17.
Matt. vii, 12,	"	" iv, 15.
1 Cor. x, 20,	"	Baruch iv, 7.
John x, 22,	"	1 Macc. iv, 59.
Heb. xi, 35,	"	2 Macc. vi, 7, see Ecclus. xiv, 15.
Matt. ix, 13,	"	Prayer of Manasses.
2 Cor. xiii, 6,	"	3 Esdras iii, 12.

Some of the uncanonical books, however, had not been extant more than a hundred and thirty years at most at the Christian era, and could only have obtained a place in the Greek Scriptures a short time before this period; but the only copies of the Scriptures in existence for the first three hundred years after Christ, either among the Jews or Christians of Greece, Italy, or Africa, contained these books without any mark of distinction that we know of. The Hebrew Bible and language were quite unknown to them during this period, and the most learned were, probably, but ill informed on the subject, at least before Jerome's translation of the Scriptures from the original Hebrew. The Latin versions before his time were all made from the Septuagint. We do not, indeed, find any catalogue of these writings before the Council of Hippo, but only individual notices of separate books. Thus Clement of Alexandria (*Stromata*, A.D. 211) cites the Wisdom of Solomon and Ecclesiasticus, and Origen refers to several of these books, treating them with a high degree of veneration. "There is," says Eusebius, "an epistle of Africanus, addressed to Origen, in which he intimates his doubt on the history of Susannah in Daniel, as if it were a spurious and fictitious composition; to which Origen wrote a very full answer." These epistles are both extant. Origen, at great length, vindicates these parts of the Greek version—for he acknowledges that they were not in the Hebrew—from the objections of Africanus, asserting that they were true and genuine, and made use of in Greek among all the churches of the Gentiles, and that we should not attend to the fraudulent comments of the Jews, but take that only for true in the holy Scriptures which the seventy had translated, for that this only was confirmed by apostolic authority. In the same letter he cites the book of Tobit, and in his second book, *De Principiis*, he even speaks of the Shepherd of Hermas as divinely inspired. Origen, however, uses very different language in regard to the book of Enoch, the Testament of the Twelve Patriarchs, and the Assumption of Moses.

The local Council of Hippo, held in the year of Christ 393, at which Augustine, afterwards bishop of Hippo, was present, formed a catalogue of the sacred books of the Old and New Testament, in which the *ecclesiastical books* were all included. They are inserted in the following order in its 36th Canon, viz.:

"That nothing be read in the church besides the Canonical Scriptures. Under the name of Canonical Scriptures are reckoned Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth, 4 books of Kings, Remains, Job, Psalms of David, 5 books of Solomon, 12 books of the Prophets, Isaiah, Jeremiah, Daniel, Ezekiel, Tobit, Judith, Hesther, Esdras, 2 books, Maccabees, 2 books." [For the books of the New Testament, see ANTILEGOMENA.] "But for the confirmation of this canon the churches beyond the seas are to be consulted." The Passions of the Martyrs were also permitted to be read on their anniversaries.

The third Council of Carthage, generally believed to have been held in 397, at which Aurelius, bishop of Carthage, presided, and at which Augustine was present, consisting in all of forty-four bishops, adopted the same catalogue, which was confirmed at the fourth

Council of Carthage, held in the year 419. The reference said to have been made from the *third* Council of Carthage, held in 397, to pope Boniface, is a manifest anachronism in the copies of the acts of this council (see L'Abbe's *Concilia*), as the pontificate of Boniface did not commence before 417. It has therefore been conjectured that this reference belongs to the fourth council.

As St. Augustine had great influence at these Councils, it must be of importance to ascertain his private sentiments on this subject. This eminent man, who was born in 354, consecrated bishop of Hippo (the present Bona) in 395, and died in 430, in the seventy-sixth year of his age, writes as follows in the year 397:

"The entire Canon of Scripture is comprised in these books. There are 5 of Moses, viz. Genesis, Exodus, Leviticus, Numbers, Deuteronomy; 1 of Joshua, 1 of Judges, 1 small book called Ruth, which seems rather to belong to the beginning of the Kingdoms, the 4 books of the Kingdoms, and 2 of the Remains, not following one another, but parallel to each other These are historical books which contain a succession of times in the order of events. There are others which do not observe the order of time, and are unconnected together, as Job, Tobit, Esther, and Judith, the 2 books of Maccabees, and the 2 books of Ezra, which last do more observe the order of a regular succession of events, after that contained in the Kingdoms and Remains. Next are the Prophets, among which is 1 book of the Psalms of David, and 3 of Solomon, viz. Proverbs, Canticles, and Ecclesiastes; for these 2 books, Wisdom and Ecclesiasticus, are called Solomon's for no other reason than because they have a resemblance to his writings: for it is a very general opinion that they were written by Jesus the son of Sirach; which books, however, since they are admitted into authority, are to be reckoned among prophetical books. The rest are the books of those who are properly called prophets, as the several books of the 12 Prophets, which being found together, and never separated, are reckoned 1 book. The names of which prophets are these: Hosea, Joel, Amos, Obadiah, Jonah, Micah, Nahum, Habakkuk, Zephaniah, Haggai, Zechariah, Malachi. After these the four Prophets of large volumes, Isaiah, Jeremiah, Daniel, Ezekiel. In these 44 books is comprised all the authority of the Old Testament" (*De Doctr. Christ.*). [For the New, see ANTILEGOMENA; they are the same with those now received.]

It has, indeed, been maintained that Augustine altered his opinion on the subject of the deutero-canonical books in his Retractions (see Henderson *On Inspiration*, p. 495); but the only passage in this work bearing on the subject, which we can discover, is that wherein he confesses his mistake in terming Ecclesiasticus a *prophetical* book. Augustine has also been supposed to have testified to the inferior authority of these books, from his saying that one of them was read from the *reader's* place. "The sentiment of the book of Wisdom is not to be rejected, which has deserved to be recited for such a long course of years from the *step of the readers* of the Church of Christ, and to be heard with the veneration of divine authority from the bishop to the humblest of the laics, faithful, penitents, and catechumens."

What the result of the reference from Africa to the "churches beyond the seas" may have been, we can only judge from the letter which is said to have been written on the subject by Innocent I, bishop of Rome, to St. Exupere, bishop of Toulouse, in the year 405. In this letter, which, although disputed, is most probably genuine, Innocent gives the same catalogue of the books of the Old and New Testaments as those of the councils of Hippo and Carthage, omitting only the book of Esther.

The next catalogue is that of the Roman Council, drawn up by pope Gelasius and seventy bishops. The genuineness of the acts of this council has been questioned by Pearson, Cave, and the two Basnages, but vindicated by Pagi and Jeremiah Jones. The catalogue is identical with the preceding, except in the order of the books.

Some of the most important manuscripts of the Holy Scriptures which have descended to us were written soon after this period. The very ancient Alexandrian MS. now in the British Museum contains the following books in the order which we here give them, together with the annexed catalogue: "Genesis, Exodus, Leviticus, Numbers, Deuteronomy, Joshua, Judges, Ruth—8 books. Kingdoms, 4; Remains, 2—6 books. Sixteen Prophets, viz. Hosea, 1; Amos, 2; Micah, 3; Joel, 4; Obadiah, 5; Jonah, 6; Nahum, 7; Ambacum, 8; Zephaniah, 9; Haggai, 10; Zechariah, 11; Malachi, 12; Isaiah, 13; Jeremiah, 14; Ezekiel. 15; Daniel, 16; Esther; Tobit; Judith; Ezra, 2; Maccabees, 4; Psalter and Hymns; Job; Proverbs; Ecclesiastes; Canticles; Wisdom; Wisdom of Jesus Sirach; 4 Gospels; Acts, 1; 7 Catholic Epistles; 14 Epistles of Paul; Revelation; 2 Epistles of Clement; together . . . . books; Psalms of Solomon." These books are equally incorporated in all the manuscripts of the Latin Vulgate (which was originally translated from the Septuagint). Those which Jerome did not translate from the Hebrew or Greek, as Wisdom and Ecclesiasticus, were adopted from the older Latin version.

Although the Canon of Scripture seemed now to be so far settled by the decrees of these councils, all did not conceive themselves bound by them; and it is observed by Jahn (*Introd.*) that they were not otherwise to be understood than "that the ecclesiastical books enumerated in this catalogue were to be held as useful for the edification of the people, but not to be applied to the confirmation of doctrines of faith." Such appears at least to have been the sentiment of many eminent divines between this period and the 16th century.

3. Bishop Cosin, in his excellent *Scholastic History of the Canon*, furnishes to this effect a host of quotations from writers of the Middle Ages, including Ven. Bede, John of Damascus, Alcuin, Peter Mauritius, Hugh de St. Victor, cardinal Hugo de St. Cher, the author of the ordinary *Gloss*, and Nicholas Lyranus. Of these, some call the deutero-canonical books "excellent and useful, but not in the Canon;" others speak of them as "apocryphal, that is, doubtful Scriptures," as not having been "written in the time of the prophets, but in that of the priests, under Ptolemy," etc. as not "equalling the sublime dignity of the other books, yet deserving reception for their laudable instruction," classing them with the writings of Jerome, Augustine, Ambrose, and Bede, and making a marked distinction not only between the Jewish and Christian Canons, but even between parts of the deutero-canonical writings. Dr. Archibald Alexander also (*Canon of the Old and New Testament ascertained*) cites several of the same authorities; he has, however, in one instance, evidently mistaken Peter Lombard for Peter Comestor, the author of *Scholastic History*. At the era of the Reformation we find Faber, Stapulensis, and cardinal Cajetan expressing themselves to the same effect, and the learned Sanctes Pagnini, in his translation of the Bible from the original languages, published at Lyons in 1528 (the first Bible that contained the division into verses with the present figures), dedicated to pope Clement VII, distinguished the ecclesiastical books, which he says were not in the Canon, by the term *Hagiographa*. For a description of this rare work, see *Christian Remembrancer*, iv, 419, in a treatise *On the division of verses in the Bible*, by Rev. W. Wright, LL.D.

4. We now arrive at the period of the Reformation when the question of the Canon of Scripture was warmly discussed. Long before this period (viz. in 1380), Wickliffe had published his translation of the Bible, in which he substituted another prologue for Jerome's; wherein, after enumerating the "twenty-five" books of the Hebrew Canon, he adds: "Whatever book is in the Old Testament, besides these twenty-five, shall be set among the Apocrypha, that is, without authority of belief." He also, in order to distinguish the Hebrew text from the Greek interpolations, inserted Jerome's notes, *rubricated*, into the body of the text.

Although Martin Luther commenced the publication of his translation of the Bible in 1523, yet, as it was

published in parts, he had not yet made any distinction between the two classes of books, when Lonicer published his edition of the Greek Septuagint at Strasburg in 1526, in which he separated the Deutero-canonical, or Apocryphal, books from those of the Jewish Canon, for which he was severely castigated by Morinus (see Masch's edition of Le Long's *Bibliotheca Biblica*, ii, 268). Arias Montanus went still further, and rejected them altogether. In 1534 the complete edition of Luther's Bible appeared, wherein those books which Jerome had placed *inter apocrypha* were separated, and placed by themselves between the Old and New Testament, under the title "Apocrypha; that is, Books which are not to be considered as equal to holy Scripture, and yet are useful and good to read."

A few years after, the divines of the Council of Trent assembled, and among the earliest subjects of their deliberation was the Canon of Scripture. "The Canon of Augustine," says bishop Marsh, "continued to be the canon of the ruling party. But as there were not wanting persons, especially among the learned, who from time to time recommended the Canon of Jerome, it was necessary for the Council of Trent to decide between the contending parties (*Comparative View*, p. 97). The Tridentine fathers had consequently a nice and difficult question to determine. On the 8th of April, 1546, all who were present at the fourth session of the Council of Trent adopted the Canon of Augustine, declaring, "He also is to be anathema who does not receive these entire books, with all their parts, as they have been accustomed to be read in the Catholic Church, and are found in the ancient editions of the Latin Vulgate, as sacred and canonical, and who knowingly and wilfully despises the aforesaid traditions . . . ." We are informed by Jahn (*Introduction*) that this decree did not affect the distinction which the learned had always made between the canonical and deutero-canonical books, in proof of which he refers to the various opinions which still prevail in his church on the subject, Bernard Lamy (*Apparatus Biblicus*, ii, 5) denying, and Du Pin (*Prolegomena*) asserting, that the books of the second canon are of equal authority with those of the first. Those who desire further information will find it in the two accounts of the controversies which took place at the council on this subject—one from the pen of cardinal Pallavicini, the other by father Paul Sarpi, the two eminent historians of the council. Professor Alber, to whom we have already referred, having denied that any such distinction as that maintained by his brother professor, Jahn, can lawfully exist among Roman Catholic divines, insists that both canons possess one and the same authority. The words of Bernard Lamy, however, cited by Jahn, are—"The books of the *second* canon, although united with the *first*, are not, however, of the same authority" (*Apparat. Bibl.* ii, 5, p. 333). Alber endeavors to explain this as meaning only that these books had not the same authority before the Canon of the Council of Trent, and cites a passage from Pallavicini to prove that the anathema was "directed against those *Catholics* who adopted the views of cardinal Cajetan" (ii, 105). But, however this may be, among other opinions of Luther condemned by the council was the following: "That no books should be admitted into the Canon of the Old Testament but those received by the Jews; and that from the New should be excluded the Epistle to the Hebrews, those of James, 2 Peter, 2 and 3 John, Jude, and the Apocalypse." The whole of the books in debate, with the exception of 3d and 4th Esdras, and the Prayer of Manasses, are considered as canonical by the Council of Trent. But it must be recollected that the decision of the Council of Trent is one by no means peculiar to this council. The third Council of Carthage had considered the same books canonical. "The Council of Trent," says bishop Marsh, "declared no other books to be sacred and canonical than such as had existed from the earliest ages of Christianity, not only in the Latin version of the Old Testament, but even in the ancient Greek version, which is known by the name of the Septuagint. . . . In the manuscripts of the Sept. there is the same intermixture of canonical and apocryphal books as in the manuscripts of the Latin version" [although there are in different manuscripts variations in the particular arrangement of single books]. "The Hebrew was inaccessible to the Latin translators in Europe and Africa during the first three centuries." The ecclesiastical books were generally written within a period which could not have extended to more than two centuries before the birth of Christ. In the choice of the places which were assigned them by the Greek Jews resident in Alexandria and other parts of Egypt, who probably added these books to the Sept. version according as they became gradually approved of, they were directed "partly by the subjects, partly by their relation to other writings, and partly by the periods in which the recorded transactions are supposed to have happened." Their insertion shows how highly they were esteemed by the Greek Jews of Egypt; but whether even the Egyptian Jews ascribed to them canonical and divine authority it would not be easy to prove (Marsh's *Comparative View*).

The following were the proceedings of the Anglican Church in reference to this subject: In Coverdale's English translation of the Bible, printed in 1535, the deutero-canonical books were divided from the others and printed separately, with the exception of the book of Baruch, which was not separated from the others in this version until the edition of 1550. They had, however, been separated in Matthew's Bible in 1537, prefaced with the words, "the volume of the book called *Hagiographa*." This Bible contained Olivetan's preface, in which these books were spoken of in somewhat disparaging terms. In Cranmer's Bible, published in 1539, the same words and preface were continued; but in the edition of 1549 the word *Hagiographa* was changed into *Apocrypha*, which passed through the succeeding editions into King James's Bible. Olivetan's preface was omitted in the Bishop's Bible in 1568, after the framing of the canon in the Thirty-nine Articles in 1562. In the Geneva Bible, which was the popular English translation before the present authorized version, and which was published in 1559, these books are printed separately with a preface, in which, although not considered of themselves as sufficient to prove any point of Christian doctrine, they are yet treated with a high degree of veneration. In the parallel passages in the margin of this translation, references are made to the deutero-canonical books. In the first edition of the Articles of the Church of England, 1552, no catalogue of the "Holy Scripture" had yet appeared, but in the Articles of 1562 the Canon of St. Jerome was finally adopted in the following order: 5 books of Moses, Joshua, Judges, Ruth, 1 and 2 Samuel; 1 and 2 Kings, 1 and 2 Chronicles, 1 and 2 Esdras, Esther, Job, Psalms, Proverbs, Ecclesiastes, Cantica, four Prophets the Greater, twelve Prophets the Less. In the 6th Article it is declared that "in the name of the Holy Scripture we do understand those canonical books of the Old and New Testament, of whose authority was never any doubt in the Church," and that "the other books (as Jerome saith) the Church doth read for example of life and instruction of manners, but yet it doth not apply them to establish any doctrine." The books which the article then enumerates are 1 and 2 [3 and 4] Esdras, Tobias, Judith, the rest of the book of Esther, Wisdom, Jesus the son of Sirach, Baruch the Prophet, the Song of the Children, the Story of Susanna, Bel and the Dragon, the Prayer of Manasses, and 1 and 2 Maccabees. It is not, however, altogether correct, in point of fact, in including in the number of books thus referred to by Jerome as read by the Church for edification the third and fourth

books of Esdras. These books were equally rejected by the Church of Rome and by Luther, who did not translate them. The Church of England further declares that "all the books of the New Testament, *as they are commonly received*, we do receive and account them canonical." The Church of England has herein followed the Councils of Hippo and Carthage. The phrase "of whose authority was never any doubt in the Church," refers therefore more strictly to the books of the Old Testament than the New, for we have already seen that doubts *did* exist respecting the ANTILEGOMENA of the New Testament. In the first book of Homilies, published in 1547, and the second in 1560, both confirmed by the Thirty-fifth Article of 1562, the deutero-canonical books are cited as "Scripture," and treated with the same reverence as the other books in the Bible, and in the preface to the book of Common Prayer they are alluded to as being "agreeable to" the Holy Scriptures.

The Helvetic Confession, dated 1st of March, 1566, has the following expression respecting the apocryphal books: "We do not deny that certain books of the Old Testament were named by the ancients apocryphal, by others ecclesiastical, as being read in the churches, but not adduced for authority in matters of belief; as Augustine, in the 18th book of the *City of God*, ch. xxxviii, relates that the names and books of certain prophets were adduced in the books of Kings, but adds that these were not in the Canon, and that those we have were sufficient for piety." The Confession of the Dutch churches (dated the same year) is more full. After recounting the canonical books, "respecting which no controversy existed," it adds, "We make a distinction between these and such as are called apocryphal, which may indeed be read in the Church, and proofs adduced from them, so far as they agree with the canonical books; but their authority and force are by no means such that any article of faith may be certainly declared from their testimony alone, still less that they can impugn or detract from the authority of the others." They add, as their reason for receiving the canonical books, that "it is not so much because the Church receives them, as that the Holy Spirit testifies to our consciences that they have come from God; and chiefly on this account, because they of themselves bear testimony to their own authority and sanctity, so that even the blind may see the fulfilment of all things predicted in them, as it were with the senses."

The Westminster Confession proceeded on the same principle, but treated the books of the second canon with less ceremony. After enumerating the canonical books (ascribing thirteen epistles only to Paul), they proceed to say that "books called Apocrypha, not being of divine confirmation, are no part of the Canon of Scripture, and therefore of no authority in the Church of God, nor to be any otherwise approved or made use of than other human writings." And again: "The authority of Holy Scripture, for which it ought to be believed and obeyed, depended not on the testimony of any man or Church, but wholly upon God, the author thereof, and therefore it is to be received because it is the Word of God. We may be moved and induced by the Church to a high and reverent esteem of the Holy Scriptures; and the heavenliness of the matter, the efficacy of the doctrine, the majesty of the style, etc., are arguments whereby it doth abundantly evidence itself to be the Word of God; yet, notwithstanding, our full persuasion and assurance of the infallible truth and divine authority thereof is from the inward work of the Holy Spirit, being witness by and with the Word in our hearts."

Luther (on 1 Cor. iii, 9, 10) had declared that the *touchstone* by which certain Scriptures should be acknowledged as divine or not was the following: "Do they preach Jesus Christ or not?" And, among the moderns, Dr. Twesten (*Vorlesungen über die Dogmatik*, 1829, i, 421 sq.) has maintained a somewhat similar principle (see Gaussen's *Theopneustia*). The Confession of Augsburg, dated in 1531, contains no article whatever on the Canon of Scripture; nor do the Lutherans appear to have any other canon than Luther's Bible. For the sentiments of the Greek Church, see ESDRAS; ESTHER; MACCABEES.

5. We shall add a few words on the grounds and authorities adopted by different parties for deciding whether a work is canonical or not. Mr. Jeremiah Jones furnishes us with three different views on this subject. "The first," he says, "is the opinion of the Papists, who have generally affirmed, in their controversies with the Protestants, that the authority of the Scriptures depends upon, or is derived from, the power of their Church. By the authority of the Church, those authors plainly mean a power lodged in the Church of Rome and her synods, of determination, what books are the word of God, than which nothing can be more absurd or contrary to common sense; for, if so, it is possible, nay, it is easy for them to make a book which is not divine to be so." And he maintains that "it is possible, on this principle, that Æsop's fables, or the infidel books of Celsus, Julian, and Porphyry, might become a part of the New Testament." But the fact must not be lost sight of that the Church has never pretended to exercise a power of this description. Bishop Marsh, referring to this subject, observes: "That the Council of Trent assumed the privilege of raising to the rank of canonical authority what was generally acknowledged to have no such authority, is a charge which cannot be made without injustice; the power of declaring canonical a book which has never laid claim to that title is a power not exercised even by the Church of Rome. In this respect it acts like other churches; it sits in judgment on existing claims, and determines whether they are valid or not." From certain expressions of divines, who have asserted that the Scriptures would have no authority whatever without the testimony of the Church, it has been supposed that they ascribed to the Church an arbitrary power over these divine books; Bellarmine, therefore, has drawn a distinction between the objective and subjective authority of the Scriptures, their authority in themselves, and that which they have in respect to us. Thus Augustine said that he would not believe the Gospel but for the authority of the Church, adding, however, that the invitation of the Church was but the first step to his complete illumination by the Spirit of God (*Confessions*, ii, 8).

Another principle was that adopted by all the reformed communions (except the Anglican Church), viz., to use Mr. Jones's words, that "*there are inward or innate evidences in the Scriptures, which, applied by the illumination or testimony of the Holy Spirit, are the only true proofs of their being the Word of God;* or, to use the words of the French reformed communion in its Confession, which harmonize with the methods adopted by the Scotch and Belgian communions, that upon the internal persuasion of the Spirit *they knew the Canonical from Ecclesiastical*, i. e. *Apocryphal books*. This method Mr. Jones thinks to be of a very extraordinary nature. "Can it be supposed," he asks, "that out of ten thousand books, private Christians, or even our most learned reformers, should by any internal evidence agree precisely on the number of twenty-seven, which are now esteemed canonical, induced thereto by some characters those books contain, of their being written by the inspiration of the Holy Ghost?" This he conceives to be folly and madness, and an assumption of "immediate inspiration." "It first supposes the books to be inspired, and then proves that they are so because they are so." This is only an argument, says bishop Burnet, to him that feels it, if it be one at all. "For my part," said the celebrated Richard Baxter, "I confess I could never boast of any such testimony or light of the Spirit, nor reason nei-

ther, which, without human testimony, would have made me believe that the book of Canticles is canonical and written by Solomon, and the book of Wisdom apocryphal and written by Philo. Nor could I have known any historical books, such as Joshua, Judges, Ruth, Samuel, Kings, Chronicles, Ezra, Nehemiah, etc. to be written by divine inspiration, but by tradition, etc.

The third method is that approved of by Mr. Jones, viz. that tradition, or the testimony of the ancient Christians, preserved in their writings, is the best method of determining this subject. "This," adds Mr. Jones, "is the method the first Christians constantly made use of to prove, against the heretics, the truth of the sacred books, viz. by appealing to that certain and undoubted tradition which assured them they were the writings of the persons whose names they bear. Thus we knew that Ovid, Virgil, or Livy wrote the books under their names." To this, we think, might have been added internal evidence and the application of critical skill. The chief objection which has been urged against this method is, that it leaves the canonicity of each book to the decision of every private individual, which is inconsistent with the idea of a *canon*. Certain it is that the ancient Church, in deciding on the present Canon, exhibited a wonderful theological tact, as the books which it has handed down as canonical, and these alone, are generally the same which, after having undergone the strictest ordeal that the learning and acumen of modern times have been enabled to apply to them, are acknowledged by the best critics to be authentic. In fact, the Church has adopted the same methods for this purpose which Mr. Jones has considered to be the only ones satisfactory to private individuals. Christians are thus in possession of the highest degree of satisfaction. Mr. Gaussen (*Theopneustia*, p. 340) admits that the principle laid down by the reformed churches is untenable, and he substitutes for it "for the Old Testament, the Testimony of the Jews, and for the New, the Testimony of the Catholic Church; by which he understands, the general consent, in regard to the former, of all Jews, Egyptians and Syrians, Asiatics and Europeans, ancient and modern, good and bad;" and by the testimony of the Catholic Church he understands "the universal consent of ancient and modern churches, Asiatic and European, good and bad: that is, not only the sections which have adhered to the Reformation, but the Greek section, the Armenian section, the Syrian section, the Roman section, and the Unitarian section." And in p. 342, 345, he ascribes entire infallibility to both Jewish and Christian churches in respect to the Canons of Scripture. "The Jews *could not* introduce a human book into the Old Testament, and neither the Council of Trent, nor even the most corrupt and idolatrous churches, *could* add a single apocryphal book to the New. . . . . It was *not in their power* not to transmit them intact and complete. In *spite of themselves* it was so ordered," etc.

The question, however, in dispute is not so much with regard to the Jewish Canon, regarding which no controversy exists, as whether there is or is not sufficient testimony to the fact how far our Saviour and his apostles gave the stamp of their authority to any books not contained in this Canon. We have no certain evidence as to the authority on which, or the time when, the Jewish Canon was collected (see EZRA), or of the cause of its closing, and our best evidence in favor of the canonicity of the Hebrew Scriptures rests on the authority of Christ as contained in the Scriptures of the New Testament. (Comp. in addition to the works already cited, Vicenzi's *Introductio in Script. Deutero-canon.* Rome, 1842; Keerl, *Die Apokryphenfrage aufs Neue beleuchtet*, Lips. 1855; Stier, *Letztes Wort über die Apokryphen*, Lpz. 1855; Stowe, in the *Biblioth. Sacra*, April, 1854. Wahl has published an excellent *Clavis Librorum V. T. Apoc. philologica*, Lips. 1853). See CANON.

Deuteronomy (in Heb. the title is taken, like most of the other books, from the initial words, אֵלֶּה הַדְּבָרִים, "*These* are *the words*," or simply דְּבָרִים, "Words;" in the Sept. Δευτερονόμιον, *second law*, as being a repetition of the Law; Vulg. *Deuteronium:* called also by the later Jews מִשְׁנֵה הַתּוֹרָה, *duplicate of the Law*, and סֵפֶר תּוֹכָחוֹת, *book of admonitions*), the fifth book of Moses, or the last of the Pentateuch. It gives an account of the sublime and dignified manner in which Moses terminated that work, the accomplishment of which was his peculiar mission, and intersperses several additional items of history in the recapitulation of his public career. It forms a sacred legacy which he here bequeathed to his people, and very different from those laws which he had announced to them at Sinai. The tone of the *law* falls here considerably in the background, and the *subjectivity* (individuality) of the *Lawgiver*, and his peculiar relation to his people, stand out more prominently. A thoroughly sublime and prophetic spirit pervades all its speeches from beginning to end. The thoughts of the man of God are entirely taken up with the inward concerns of his people, their relations, future fate, and eventful vicissitudes. The Lawgiver here stands amid Israel, warning and consoling, commanding and exhorting, surveying and proclaiming the future with marvellous discernment.

I. *Contents.*—The book consists chiefly of three discourses delivered by Moses shortly before his death. They were spoken to all Israel in the plains of Moab, on the eastern side of the Jordan (i, 1), in the eleventh month of the last year of their wanderings, the fortieth year after their exodus from Egypt (i, 3). Subjoined to these discourses are the Song of Moses, the Blessing of Moses, and the story of his death.

1. *The first Discourse* (i, 1–iv, 40).—After a brief historical introduction (i, 1–5), the speaker recapitulates the chief events of the past forty years in the wilderness, and especially those events which had the most immediate bearing on the entry of the people into the promised land. He enumerates the contests in which they had been engaged with the various tribes who came in their way, and in which their success had always depended upon their obedience; and reminds them of the exclusion from the promised land, first of the former generation because they had been disobedient in the matter of the spies, and next of himself, with whom the Lord was wroth for their sakes (iii, 26). On the appeal to the witness of this past history is then based an earnest and powerful exhortation to obedience; and especially a warning against idolatry as that which had brought God's judgment upon them in times past (iv, 3), and would yet bring sorer punishment in the future (iv, 26–28). To this discourse is appended a brief notice of the severing of the three cities of refuge on the east side of the Jordan (iv, 41–43).

2. *The second Discourse* is introduced, like the first, by an explanation of the circumstances under which it was delivered (iv, 44–49). It extends from ch. v, 1, to xxvi, 19, and contains a recapitulation, with some modifications and additions, of the Law already given on Mount Sinai. Yet it is no bare recapitulation or naked enactment, but every word shows the heart of the lawgiver full at once of zeal for God and of the most fervent desire for the welfare of his nation. It is the father no less than the legislator who speaks; and while obedience and life are throughout bound up together, it is the obedience of a loving heart, not a service of formal constraint which is the burden of his exhortations. The following are the principal heads of discourse:

a. He begins with that which formed the basis of the whole Mosaic code—the Ten Commandments—and impressively repeats the circumstances under which they were given (v, 1–vi, 3).

5. Then follows an exposition of the spirit of the First Table. The love of Jehovah who has done so great things for them (vi), and the utter uprooting of all idol-worship (vii), are the points chiefly insisted upon. But they are also reminded that if idolatry be a snare on the one hand, so is self-righteousness on the other (viii, 10 sq.), and therefore, lest they should be lifted up, the speaker enters at length on the history of their past rebellions (ix, 7, 22–24), and especially of their sin in the matter of the golden calf (ix, 9–21). The true nature of obedience is again emphatically urged (x, 12–xi, 32), and the great motives to obedience set forth in God's love and mercy to them as a people (x, 15, 21, 22), as also his signal punishment of the rebellious (xi, 3–6). The blessing and the curse (xi, 26–32) are further detailed.

c. From the general *spirit* in which the law should be observed, Moses passes on to the several enactments. Even these are introduced by a solemn charge to the people to destroy all objects of idolatrous worship in the land (xii, 1–3). They are, upon the whole, arranged systematically. We have first the laws touching religion; then those which are to regulate the conduct of the government and the executive; and, lastly, those which concern the private and social life of the people. The whole are framed with express reference to the future occupation of the land of Canaan.

(1.) *Religious Statutes* (xii–xvi, 17).—There is to be but one sanctuary where all offerings are to be offered. Flesh may be eaten anywhere, but sacrifices may only be slain in "the place which the Lord thy God shall choose" (xii, 5–32). All idol prophets, all enticers to idolatry from among themselves, even whole cities if idolatrous, are to be cut off (xiii), and all idolatrous practices to be eschewed (xiv, 1, 2). Next come regulations respecting clean and unclean animals, tithe, the year of release, and the three feasts of the Passover, of Weeks, and of Tabernacles (xiv, 3–xvi, 17).

(2.) *Governmental and Executive Functions* (xvi, 18–xxi, 23).—The laws affecting public personages and defining the authority of the judges (xvi, 18–20) and the priests (xvii, 8–13), the way of proceeding in courts of justice (xvii, 1–13); the law of the king (xvii, 14–20), of the priests, and Levites, and prophets (xviii); of the cities of refuge and of witnesses (xix). The order is not very exact, but, on the whole, the section xvi, 18–xix, 21, is *judicial* in its character. The passage xvi, 21–xvii, 1, seems strangely out of place. Baumgarten (*Comm.* in loc.) tries to account for it on the ground of the close connection which must subsist between the true worship of God and righteous rule and judgment. But who does not feel that this is said with more ingenuity than truth?

Next come the laws of war (xx), both as waged (a) generally with other nations, and (b) especially with the inhabitants of Canaan (ver. 17).

(3.) *Private and Social Injunctions*, or laws touching domestic life and the relation of man to man (xxi, 15–xxvi, 19). So Ewald divides, assigning the former part of chap. xxi to the previous section. Hävernick, on the other hand, includes it in the present. The fact is that ver. 10–14 belong to the laws of war, which are treated of in chap. xx, whereas 1–9 seem more naturally to come under the matters discussed in this section. It begins with the relations of the family, passes on to those of the friend and neighbor, and then touches on the general principles of justice and charity by which men should be actuated (xxiv, 16–22). It concludes with the following confession, which every Israelite is to make when he offers the first-fruits, and which reminds him of what he is as a member of the theocracy, as one in covenant with Jehovah, and greatly blessed by Jehovah.

Finally, this whole long discourse is wound up by a brief but powerful appeal (xxvi, 16–19), which reminds us of the words with which it opened. It will be observed that no pains are taken here, or indeed generally in the Mosaic legislation, to keep the several portions of the law, considered as moral, ritual, and ceremonial, apart from each other by any clearly-marked line. But there is in this discourse a very manifest gradual descent from the higher ground to the lower. The speaker begins by setting forth Jehovah himself as the great object of love and worship; thence he passes [1.] to the Religious, [2.] to the Political, and [3.] to the Social economy of his people..

3. In the *third Discourse* (xxvii, 1–xxx, 20), the elders of Israel are associated with Moses. The people are commanded to set up stones upon Mount Ebal, and on them to write "all the words of this law." Then follow the several curses to be pronounced by the Levites on Ebal (xxvii, 14–26), and the blessings on Gerizim (xxviii, 1–14). How terrible will be the punishment of any neglect of this law is further portrayed in the vivid words of a prophecy but too fearfully verified in the subsequent history of the people. The subject of this discourse is briefly "The Blessing and the Curse." The prophetic speeches visibly and gradually increase in energy and enthusiasm, until the perspective of the remotest future of the people of God lies open to the eye of the inspired lawgiver in all its checkered details, when his words resolve themselves into a flight of poetical ecstasy, into the strains of a splendid triumphal song, in which the tone of grief and lamentation is as heart-rending as the announcement of divine salvation therein is jubilant (ch. xxvii, xxviii).

4. The delivery of the Law as written by Moses (for its still further preservation) to the custody of the Levites, and a charge to the people to hear it read once every seven years (xxxi); the Song of Moses spoken in the ears of the people (xxxi, 30–xxxii, 44); and the blessing of the twelve tribes (xxxiii).

5. The book closes (xxxiv) with an account of the death of Moses, which is first announced to him in xxxii, 48–52. On the authorship of the last chapter, see below.

II. *Relation of Deuteronomy to the preceding books.*—It has been an opinion very generally entertained by the more modern critics, as well as by the earlier, that the book of Deuteronomy forms a complete whole in itself, and that it was appended to the other books as a later addition. Only chapters xxxii, xxxiii, xxxiv have been in whole or in part called in question by De Wette, Ewald, and Von Lengerke. De Wette thinks that xxxii and xxxiii have been borrowed from other sources, and that xxxiv is the work of the Elohist (q. v.). Ewald also supposes xxxii to have been borrowed from another writer, who lived, however (in accordance with his theory, which we shall notice lower down), after Solomon. On the other hand, he considers xxxiii to be later, whilst Bleek (*Repert.* i, 25) and Tuch (*Gen.* p. 556) decide that it is Elohistic. Some of these critics imagine that these chapters originally formed the conclusion of the book of Numbers, and that the Deuteronomist tore them away from their proper position in order the better to incorporate his own work with the rest of the Pentateuch, and to give it a fitting conclusion. Gesenius and his followers are of opinion that the whole book, as it stands at present, is by the same hand. But it is a question of some interest and importance whether the book of Deuteronomy should be assigned to the author, or one of the authors, of the former portions of the Pentateuch, or whether it is a distinct and independent work. The more conservative critics of the school of Hengstenberg contend that Deuteronomy forms an integral part of the Pentateuch, which is throughout to be ascribed to Moses. Others, as Stähelin and Delitzsch, have given reasons for believing that it was written by the Jehovist; whilst others again, as Ewald and De Wette, are in favor of a different author.

The chief grounds on which the last opinion rests

are the many variations and additions to be found in Deuteronomy, both in the historical and legal portions, as well as the observable difference of style and phraseology. It is necessary, therefore, before we come to consider more directly the question of authorship, to take into account these alleged peculiarities; and it may be well to enumerate the principal discrepancies, additions, etc, as given by De Wette in the last edition of his *Einleitung* (many of his former objections he afterwards abandoned), and to subjoin the replies and explanations which they have called forth.

(I.) *Discrepancies.*—The most important discrepancies alleged to exist between the historical portions of Deuteronomy and the earlier books are the following:

(1.) The appointment of judges (i, 6–18) is at variance with the account in Exod. xviii. It is referred to a different time, being placed after the departure of the people from Horeb (ver. 6), whereas in Exodus it is said to have occurred during their encampment before the mount (Exod. xviii, 5). The circumstances are different, and apparently it is mixed up with the choosing of the seventy elders (Num. xi, 11–17). To this it has been answered, that although Deut. i, 6 mentions the departure from Sinai, yet Deut. i, 9–17 evidently refers to what took place *during* the abode there, as is shown by comparing the expression "at that time," ver. 9, with the same expression in ver. 18. The speaker, as is not unnatural in animated discourse, checks himself and goes back to take notice of an important circumstance prior to one which he has already mentioned. This is manifest, because ver. 19 is so clearly resumptive of ver. 6. Again, there is no force in the objection that Jethro's counsel is here passed over in silence. When making allusion to a well-known historical fact, it is unnecessary for the speaker to enter into details. This at most is an omission, not a contradiction. Lastly, the story in Exodus is perfectly distinct from that in Num. xi., and there is no confusion of the two here. Nothing is said of the institution of the seventy in Deut., probably because the office was only temporary, and if it did not cease before the death of Moses, was not intended to be perpetuated in the promised land. (So in substance Ranke, Lengerke, Hengstenberg, Hävernick, Stähelin.)

(2.) Chap. i, 22 is thought to be at variance with Num. xiii, 2, because here Moses is said to have sent the spies into Canaan at the suggestion of the *people*, whereas there *God* is said to have commanded the measure. The explanation is obvious. The people make the request; Moses refers it to God, who then gives to it *His* sanction. In the historical book of Numbers the divine command only is mentioned. Here, where the lawgiver deals so largely with the feelings and conduct of the people themselves, he reminds them both that the request originated with themselves, and also of the circumstances out of which that request sprang (ver. 20, 21). These are not mentioned in the history. The objection, it may be remarked, is precisely of the same kind as that which in the N. T. is urged against the reconciliation of Gal. ii, 2 with Acts xv, 2, 3. Both admit of a similar explanation.

(3.) Chap. i, 44, "And the *Amorites* which dwelt in that mountain," etc, whereas in the story of the same event, Num. xiv, 43–45, *Amalekites* are mentioned. Answer: in this latter passage not only Amalekites, but Canaanites, are said to have come down against the Israelites. The Amorites stand here not for "Amalekites," but for "Canaanites," as being the most powerful of all the Canaanitish tribes (comp. Gen. xv, 16; Deut. i, 7); and the Amalekites are not named, but hinted at, when it is said, "they destroyed you *in Seir*," where, according to 1 Chron. iv, 42, they dwelt (so Hengst. iii, 421).

(4.) Chap. ii, 2–8, confused and at variance with Num. xx, 14–21, and xxi, 4. In the former we read (ver. 4), "Ye are to pass through the coast of your brethren, the children of Esau." In the latter (ver. 20), "And he said, Thou shalt not go through. And Edom came out against him," etc. But, according to Deuteronomy, that part of the Edomitish territory only was traversed which lay about Elath and Ezion-geber. In this exposed part of their territory any attempt to prevent the passage of the Israelites would have been useless, whereas at Kadesh, where, according to Numbers, the opposition was offered, the rocky nature of the country was in favor of the Edomites. (So Hengst. iii, 283 sq.). To this we may add, that in Deut. ii, 8, when it is said "we *passed by from* our brethren the children of Esau . . . through the way of the plain from Elath," the failure of an attempt to pass elsewhere is implied. Again, according to Deut., the Israelites purchased food and water of the Edomites and Moabites (ver. 6, 28), which, it is said, contradicts the story in Num. xx, 19, 20. But in both accounts the Israelites offer to pay for what they have (comp. Deut. ii, 6 with Num. xx, 19). And if in Deut. xxiii, 4 there seems to be a contradiction to Deut. ii, 29 with regard to the conduct of the Moabites, it may be removed by observing (with Hengst. iii, 286) that the unfriendliness of the Moabites in not coming out to meet the Israelites with bread and water was the very reason why the latter were obliged to buy provisions.

(5.) There is a difference in the account of the encampments of the Israelites as given Deut. x, 6, 7, compared with Num. xx, 23; xxxiii, 30 and 37. In Deut. it is said that the order of encampment was, 1. Bene-jaakan; 2. Mosera (where Aaron dies); 3. Gudgodah; 4. Jotbath. In Numbers it is, 1. Moseroth; 2. Bene-jaakan; 3. Hor-hagidgad; 4. Jotbath. Then follow the stations Ebronah, Ezion-geber, Kadesh, and Mount Hor, and it is at this last that Aaron dies. (It is remarkable here that no account is given of the stations between Ezion-geber and Kadesh on the return route.) Various attempts have been made to reconcile these accounts. The explanation given by Kurtz (*Atlas zur Gesch. d. A. B.* 20) is, on the whole, the most satisfactory. He says: "In the first month of the fortieth year the whole congregation comes a second time to the wilderness of Zin, which is Kadesh (Num. xxxiii, 36). On the down-route to Ezion-geber they had encamped at the several stations Moseroth (or Moserah), Bene-jaakan, Chor-hagidgad, and Jotbath. But now, again departing from Kadesh, they go to Mount Hor, 'in the edge of the land of Edom' (ver. 37, 38), or to Moserah (Deut. x, 6, 7), this last being in the desert at the foot of the mountain. Bene-jaakan, Gudgodah, and Jotbath were also visited about this time, i. e. a *second* time, after the second halt at Kadesh." See EXODE.

(6.) But this is not so much a discrepancy as a peculiarity of the writer: in Deut. the usual name for the mountain on which the law was given is Horeb, only once (xxxiii, 2) Sinai; whereas in the other books Sinai is far more common than Horeb. The answer given is that Horeb was the general name of the whole mountain range, Sinai the particular mountain on which the law was delivered; and that Horeb, the more general and well-known name, was employed in accordance with the rhetorical style of this book, in order to bring out the contrast between the Sinaitic giving of the law, and the giving of the law in the land of Moab (Deut. i, 5; xxix, 1). So Keil. See HOREB.

(II.) *Additions.*—1. *In the History.* (*a*) The command of God to leave Horeb, Deut. i, 6, 7, not mentioned in Num. x, 11. The repentance of the Israelites, Deut. i, 45, omitted in Num. xiv, 45. The intercession of Moses in behalf of Aaron, Deut. ix, 20, of which nothing is said in Exod. xxxii, xxxiii. These are so slight, however, that, as Keil suggests, they might have been passed over very naturally in the earlier books, supposing both accounts to be by the same hand. But of more note are: (*b*) The command not

to fight with the Moabites and Ammonites, Deut. ii, 9, 19, or with the Edomites, but to buy of them food and water, ii, 4–8; the valuable historical notices which are given respecting the earlier inhabitants of the countries of Moab, and Ammon, and of Mount Seir, ii, 10–12, 20–23; the sixty fortified cities of Bashan, iii, 4; the king of the country who was "of the remnant of giants," iii, 11; the different names of Hermon, iii, 9; the wilderness of Kedemoth, ii, 26; and the more detailed account of the attack of the Amalekites, xxv, 17, 18, compared with Exod. xvii, 8.

2. *In the Law.* The appointment of the cities of refuge, Deut. xix, 7–9, as compared with Num. xxxv, 14 and Deut. iv, 41; of *one* particular place for the solemn worship of God, where all offerings, tithes, etc. are to be brought, Deut. xii, 5, etc., whilst the restriction with regard to the slaying of animals only at the door of the tabernacle of the congregation (Lev. xvii, 3, 4) is done away, 15, 20, 21; the regulations respecting tithes to be brought with the sacrifices and burnt-offerings to the appointed place, Deut. xii, 6, 11, 17; xiv, 22, etc.; xxvi, 12; concerning false prophets and seducers to idolatry and those that hearken unto them, xiii; concerning the king and the manner of the kingdom, xvii, 14, etc.; the prophets, xviii, 15, etc.; war and military service, xx; the expiation of secret murder; the law of female captives; of first-born sons by a double marriage; of disobedient sons; of those who suffer death by hanging, xxi; the laws in xxii, 5–8, 13–21; of divorce, xxiv, 1, and various lesser enactments, xxiii and xxv; the form of thanksgiving in offering the first-fruits, xxvi; the command to write the law upon stones, xxvii, and to read it before all Israel at the Feast of Tabernacles, xxxi, 10–13.

Many others are rather extensions or modifications of, than additions to, existing laws, as, for instance, the law of the Hebrew slave, Deut. xv, 12, etc. compared with Exod. xxi, 2, etc. See also the fuller directions in Deut. xv, 19–23; xxvi, 1–11, as compared with the briefer notices, Exod. xiii, 12; xxiii, 19.

All these, however, afford no real difficulty in identifying the author with that of the preceding books, on the supposition that it was Moses himself, who, as the propounder of the law and the director of the history, was competent to expand and illustrate both, and, indeed, could hardly fail to do so, were he other than a mechanical copyist.

III. *Date of Composition.* — Was the book really written, as its language certainly implies, before the entry of Israel into the Promised Land? Not only does the writer assert that the discourses contained in the book were delivered in the plains of Moab, in the last month of the 40 years' wandering, and when the people were just about to enter Canaan (i, 1–5), but he tells us with still further exactness that all the words of this Law were written at the same time in the book (xxxi, 9). Moreover, the fact that the goodly land lay even now before their eyes seems everywhere to be uppermost in the thoughts of the legislator, and to lend a peculiar solemnity to his words. Hence we continually meet with such expressions as "when Jehovah thy God bringeth thee into the land which He hath sworn to thy fathers to give thee," or "whither thou goest in to possess it." This phraseology is so constant, and seems to fall in so naturally with the general tone and character of the book, that to suppose it was written long after the settlement of the Israelites in Canaan, in the reign of Solomon (De Wette, Lengerke, and others), or in that of Manasseh (Ewald, as above), is not only to make the book a historical romance, but to attribute very considerable inventive skill to the author (as Ewald in fact does).

De Wette argues, indeed, that the character of the laws is such as of itself to presuppose a long residence in the land of Canaan. He instances the allusion to the temple (xii, and xvi, 1–7), the provision for the right discharge of the kingly and prophetical offices, the rules for civil and military organization and the state of the Levites, who are represented as living without cities (though such are granted to them in Num. xxxv) and without tithes (allotted to them in Num. xviii, 20, etc.). But in the passages cited the Temple is not named, much less is it spoken of as already existing: on the contrary, the phrase employed is "The place which the Lord your God shall choose." Again, to suppose that Moses was incapable of providing for the future and very different position of his people as settled in the land of Canaan, is to deny him even ordinary sagacity. Without raising the question about his divine commission, surely it is not too much to assume that so wise and great a legislator would foresee the growth of a polity, and would be anxious to regulate its due administration in the fear of God. Hence he would guard against false prophets and seducers to idolatry. As regards the Levites, Moses might have expected or even desired that, though possessing certain cities (which, however, were inhabited by others as well as themselves), they should not be confined to those cities, but scattered over the face of the country. This must have been the case at first, owing to the very gradual occupation of the new territory. The mere fact that, in giving them certain rights in Deut., nothing is said of an earlier provision in Num., does not by any means prove that this earlier provision was unknown or had ceased to be in force.

Other reasons for a later date, such as the mention of the worship of the sun and moon (iv, 19; xvii, 3); the punishment of stoning (xvii, 5; xxii, 21, etc.); the name *Feast of Tabernacles*; and the motive for keeping the Sabbath, are of little force. In Amos v, 26, Saturn is said to have been worshipped in the wilderness; the punishment of stoning is found also in the older documents; the Feast of Tabernacles agrees with Lev. xxiii, 34; and the motive alleged for the observance of the Sabbath, at least, does not exclude other motives.

IV. *Author.*—1. It is generally agreed that by far the greater portion of the book is the work of one author. The only parts which have been questioned as possible interpolations are, according to De Wette, iv, 41–3; x, 6–9; xxxii and xxxiii. Internal evidence, indeed, is strongly decisive that this book of the Pentateuch was not the work of a compiler.

2. It cannot be denied that the style of Deuteronomy is very different from that of the other four books of the Pentateuch. It is more flowing, more rhetorical, more sustained. The rhythm is grand, and the diction more akin to the sublimer passages of the prophets than to the sober prose of the historians.

3. Who, then, was the author? This question, of course, is intimately connected with the preceding discussion. We will consider, first, the views of those who deny its authorship by Moses. On this point the following principal hypotheses have been maintained:

a. The opinion of Stähelin (and, as it would seem, of Bleek), that the author is the same as the writer of the Jehovistic portions of the other books. He thinks that both the historical and legislative portions plainly show the hand of the supplementist (*Krit. Unters.* p. 76). Hence he attaches but little weight to the alleged discrepancies, as he considers them all to be the work of the reviser, going over, correcting, and adding to the older materials of the Elohistic document already in his hands.

b. The opinion of De Wette, Gesenius, and others, that the Deuteronomist is a distinct writer from the Jehovist. De Wette's arguments are based (1) on the difference in style; (2) on the contradictions already referred to as existing in matters of history, as well as in the legislation, when compared with that in Exodus; (3) on the peculiarity noticeable in this book, that God does not speak by Moses, but that Moses himself speaks to the people, and that there is no mention

of the angel of Jehovah (comp. i, 30; vii, 20-23; xi, 13-17, with Exod. xxiii, 20-33); and (4) lastly, on the fact that the Deuteronomist ascribes his whole work to Moses, while the Jehovist assigns him only certain portions.

c. From the fact that certain phases occurring in Deut. are found also in the prophecy of Jeremiah, it has been too hastily concluded by some critics that both books were the work of the prophet. So Von Bohlen, Gesenius (*Gesch. d. Hebr. Spr.* p. 32), and Hartmann (*Hist. Krit. Forsch.* p. 660). König, on the other hand (*Alttest. Stud.* ii, 12 sq.), has shown not only that this idiomatic resemblance has been made too much of (see also Keil, *Einl.* p. 117), but that there is the greatest possible difference of style between the two books. De Wette expresses himself similarly (*Einl.* p. 191).

d. Ewald is of opinion that it was written by a Jew living in Egypt during the latter half of the reign of Manasseh (*Gesch. des V. I.* i, 171). He thinks that a pious Jew of that age, gifted with prophetic power, and fully alive to all the evils of his time, sought thus to revive and to impress more powerfully upon the minds of his countrymen the great lessons of that law which he saw they were in danger of forgetting. He avails himself, therefore, of the groundwork of the earlier history, and also of the Mosaic mode of expression. But as his object is to rouse a corrupt nation, he only makes use of historical notices for the purpose of introducing his warnings and exhortations with the more effect. This he does with great skill and as a master of his subject, while at the same time he gives fresh vigor and life to the old law by means of those new prophetic truths which had so lately become the heritage of his people. Ewald further considers that there are passages in Deuteronomy borrowed from the books of Job and Isaiah (iv, 32, from Job viii, 8; and xxviii, 29, 30, 35, from Job v, 14; xxxi, 10; ii, 7; and xxviii, 49, etc. from Isa. v, 26 sq.; xxxiii, 19), and much of it akin to Jeremiah (*Gesch.* i, 171, note). The song of Moses (xxxii) is, according to him, not by the Deuteronomist, but is nevertheless later than the time of Solomon.

e. The old traditional view that this book, like the other books of the Pentateuch, is the work of Moses himself. Of the later critics, Hengstenberg, Hävernick, Ranke, and others, have maintained this view. Moses Stuart writes: "Deuteronomy appears to my mind, as it did to that of Eichhorn and Herder, as the earnest outpourings and admonitions of a heart which felt the deepest interest in the welfare of the Jewish nation, and which realized that it must soon bid farewell to them . . . Instead of bearing upon its face, as is alleged by some, evidences of another authorship than that of Moses, I must regard this book as being so deeply fraught with holy and patriotic feeling as to convince any unprejudiced reader who is competent to judge of its style, that it cannot, with any tolerable degree of probability, be attributed to any *pretender* to legislation, or to any mere *imitator* of the great legislator. Such a glow as runs through all this book it is in vain to seek for in any artificial or supposititious composition" (*Hist. of the O. T. Canon*, § 3).

In support of this opinion, it is said: 1. That, supposing the whole Pentateuch to have been written by Moses, the change in style is easily accounted for when we remember that the last book is hortatory in its character, that it consists chiefly of orations, and that these were delivered under very peculiar circumstances. 2. That the *usus loquendi* is not only generally in accordance with that of the earlier books, and that as well in their Elohistic as in their Jehovistic portions, but that there are certain peculiar forms of expression common only to these five books. 3. That the alleged variations in matters of fact between this and the earlier books may all be reconciled (see above), and that the amplifications and corrections in the legislation are only such as would necessarily be made when the people were just about to enter the promised land. Thus Bertheau observes: "It is hazardous to conclude from contradictions in the laws that they are to be ascribed to a different age . . . He who made additions must have known what it was he was making additions to, and would either have avoided all contradiction, or would have altered the earlier laws to make them agree with the later" (*Die Sieben Gruppen Mos. Gesetze*, p. 19, note). 4. That the book bears witness to its own authorship (xxxi, 19), and is expressly cited in the N. T. as the work of Moses (Matt. xix, 7, 8; Mark x, 3; Acts iii, 22; vii, 37).

The book contains, in addition, not a small number of plain, though indirect traces, indicative of its Mosaic origin (see *Jour. Sac. Lit.* Jan. 1858, p. 313 sq.). We thus find in it: 1. Numerous notices concerning nations with whom the Israelites had then come in contact, but who, after the Mosaic period, entirely disappeared from the pages of history: such are the accounts of the residences of the kings of Bashan (i, 4). 2. The appellation of "mountain of the Amorites," used throughout the whole book (i, 7, 19, 20, 44), while even in the book Joshua, soon after the conquest of the land, the name is already exchanged for "mountains of Judah" (Josh. xi, 16, 21). 3. The observation (ii, 10) that the *Emim* had formerly dwelt in the plain of Moab: they were a great people, equal to the *Anakim*. This observation quite accords with Gen. xiv, 5. 4. A detailed account (ii, 11) concerning the Horim and their relations to the Edomites. 5. An account of the Zamzummim (ii, 20, 21), one of the earliest races of Canaan, though mentioned nowhere else. 6. A very circumstantial account of the Rephaim (iii, 3 sq.), with whose concerns the author seems to have been well acquainted.

The standing-point also of the author of Deuteronomy is altogether in the Mosaic time, and, had it been assumed and fictitious, there must necessarily have been moments when the spurious author would have been off his guard, and unmindful of the part he had to play. But no discrepancies of this kind can be traced; and this is in itself an evidence of the genuineness of the book.

A great number of other passages force us likewise to the conclusion that the whole of Deuteronomy originated in the time of Moses. Such are the passages where: 1. A comparison is drawn between Canaan and Egypt (xi, 10 sq.), with the latter of which the author seems thoroughly acquainted. 2. Detailed descriptions are given of the fertility and productions of Egypt (viii, 7 sq.). 3. Regulations are given relating to the conquest of Canaan (xii, 1 sq.; xx, 1 sq.), which cannot be understood otherwise than by assuming that they had been framed in the Mosaic time, since they could be of no use after that period.

Besides, whole pieces and chapters in Deuteronomy, such as xxxii, xxxiii, betray in form, language, and tenor, a very early period in Hebrew literature. Nor are the laws and regulations in Deuteronomy less decisive of the authenticity of the book. We are struck with the most remarkable phenomenon that many laws from the previous books are here partly repeated and impressed with more energy, partly modified, and partly altogether abolished, according to the contingencies of the time, or as the new aspect of circumstances among the Jews rendered such steps necessary (comp. e. g. Deut. xv, 17, with Exod. xxi, 7; Deut. xii with Lev. xvii). Such pretensions to raise, or even to oppose his own private opinions to the authority of divine law, are found in no author of the subsequent periods, since the whole of the sacred literature of the later times is, on the contrary, rather the echo than otherwise of the Pentateuch, and is altogether founded on it. Add to this the fact that the law itself forbids most impressively to add to, or take anything from it, a prohibition which is repeated even in Deu-

teronomy (comp. iv, 2; xiii, 1); so that on the theory that this book contains nothing more than a gradual development of the law, it clashes too often with its own principles, and thus pronounces its own sentence of condemnation.

The part of Deuteronomy (xxxiv) respecting the death of Moses requires a particular explanation. That the whole of this section is to be regarded as a piece altogether apart from what precedes it, or as a supplement by another writer, is a ready solution maintained by the older theologians (comp. e. g. Carpzov, *Introd. in libr. V. T.* i, 137); and this opinion is confirmed not only by the contents of the chapter, but also by the express declaration of the book itself on that event and its relations; for chapter xxxi contains the conclusion of the work, where Moses describes himself as the author of the previous contents, as also of the Song (ch. xxxii), and the blessings (ch. xxxiii) belonging to it. All that follows is, consequently, not from Moses, the work being completed and concluded with chapter xxxiii. There is another circumstance which favors this opinion, namely, the close connection that exists between the last section of Deuteronomy and the beginning of Joshua (comp. Deut. xxxiv, 9 with Josh. i, 1, where also the connective force of the term וַיְהִי, "*and* it came to pass," in the latter passage, must not be overlooked), plainly showing that ch. xxxiv of Deuteronomy is intended to serve as a *point of transition* to the book of Joshua, and that it was written by the same author as the latter. The correct view of this chapter, therefore, is to consider it as a *real supplement*, but by no means as an *interpolation* (such as some critics erroneously suppose to exist in the Pentateuch in general). To apply to it the term interpolation would be as wrong as to give that appellation, e. g., to the 8th book of Cæsar's work *De Bello Gallico*, simply because it was written by an unknown author, for the very purpose of serving as a *supplement* to the previous books. See PENTATEUCH.

V. Separate *commentaries* upon the book of Deuteronomy are not numerous; the most important are designated by an asterisk (*) prefixed: Origen, *Selecta in Deut.* (in *Opp.* ii, 386); Ephraem Syrus, *Explanatio in Deut.* (in *Opp.* iv, 269); Theodoret, *Quæstiones in Deut.* (in *Opp.* i, pt. i); Isidorus Hispalensis, *Commentaria in Deut.* (in *Opera*); Bede, *In Deut. Explanatio* (in *Opp.* iv); id. *Quæstiones super. Deut.* (*ib.* viii); Victor Hugo, *Annotatiunculæ in Deut.* (in *Opp.* i); Rupertus Tuitiensis, *In Deut.* (in *Opp.* i, 288); Luther, *Deuteronomion castigatum* (Viteb. 1524, 8vo; also in *Opp.* iii, 76; *Exeg. Opp.* xiii); Bugenhagen, *Commentarius in Deut.* (Basil. 1524, Viteb. 1525, 8vo); Macchabæus, *Enarratio in Deut.* (London, 1563, 8vo); Chytræus, *Enarrationes in Deut.* (Viteb. 1575, 1590, 8vo); Calvin, *Sermons upon Deut.* (from the French by Golding, Lond. 1583, fol.); Brent, *Comment. in Deut.* (in *Opp.* i); Bp. Babington, *Notes upon Deut.* (in *Works*, p. 149); Lorinus, *Commentarii in Deut.* (Lugd. 1625, 1629, 2 vols. fol.); Masius, *Annotationes in cap. xviii et seq.* (in the *Critici Sacri*, i, pt. ii); Franze, *Disputationes per Deut.* (Viteb. 1608, 4to); *Gerhard, *Commentarius super Deut.* (Jen. 1657, 4to); Cocceius, *Notæ in Deut.* (in *Opp.* i, 186); id. *De ult. Deut. capita* (*ib.* i, 201); Alting, *Commentarius in cap. i–xix* (in *Opp.* i, 121, Amst. 1687); Duquet, *Explicatio de c. xxix–xxxiii* (Par. 1734, 12mo); Vitringa, *Comm. in cant. Mosis* (Harl. 1734, 4to); Holt, *Deuteron. illustratum* (Lugd. 1768, 4to); Marck, *Comment. in cap. xxix–xxxiii* (in *Partes Pentat.*); Hagemann, *Betrachtungen üb. d. f. B. Mosis* (Brunsw. 1744, 4to); Homberg, בְּאוּר לְסֵ֫פֶר דְּבָרִים (in Mendelssohn's Pentateuch, Berlin, 1783, etc.); *Rosenmüller, *Scholia* (in *Schol.* pt. ii); *Horsley, *Notes on Deut.* (in *Bib. Criticism*, i); Riehm, *Moses im lande Moab* (Lpz. 1854, 8vo); Cumming, *Readings on Deut.* (London, 1856, 12mo); *Graff, *Der Segen Mosis erklärt* (Lpz. 1857, 8vo); Howard, *Deut. from the Sept.* (Lond. 1857, 8vo); *Schultz, *Das Deuteron. erklärt* (Berl. 1859, 8vo); *Knobel, *Erklärung* (in the *Exeg. Handb.* part xiv);* Schröder, *Bearbeitung* (in Lange's *Bibelwerk*, O. T. iii, Bielefeld, 1866, 8vo). See OLD TESTAMENT.

Dévay, MATYAS BIRÓ, the most prominent among the Reformers of Hungary in the 16th century, was born towards the close of the 15th or the beginning of the 16th century, in Deva, a hamlet in the comitat (county) of Hunyad. It is not certain, as some Hungarian writers think, that he studied at Ofen with the celebrated Grynæus, the first promoter of the Reformation in Hungary. In 1523 his name is mentioned among the students of the University of Cracow. After his return from this university, at which he studied for two years, he became a priest and a monk. In this position he still was in 1527, but soon after he adopted the principles of the Reformation, and in 1529 went to Wittenberg, to study the new theology. While in Wittenberg he lived in the house of Luther. In 1531 he was minister of a Protestant congregation in Ofen, and distinguished for his reformatory zeal. About this time he wrote a small work against the invocation of the saints (*De sanctorum dormitione*), and fifty-two propositions explaining the fundamental principles of the Reformation. Still, in the course of the year 1531, he was called as preacher to Kaschau by the council of that town. On Nov. 6, 1531, he was arrested by order of Thomas Szalaházy, bishop of Erlau and councillor of king Ferdinand, and kept a prisoner first at Likava, subsequently at Pressburg, from whence he was taken to Vienna. In Vienna, bishop Faber, one of the leading opponents of the Reformation, conducted the trial; but Dévay was soon discharged, and returned to Ofen. As he, however, at once resumed his reformatory activity, he was rearrested in 1532, and held in prison at Ofen until 1534. After his liberation from this captivity, Dévay placed himself under the protection of count Nádasdy, a Hungarian magnate who had openly espoused the cause of the Reformation. He devoted his time chiefly to a refutation of two works which Gregory Szegedy, the provincial of the Franciscan order in Hungary, and a member of the Sorbonne, had written against the Reformation. This work (together with the defence of Dévay before bishop Faber) appeared in 1537 at Basel, under the title *Disputatio de Statu in quo sint beatorum animæ post hanc vitam ante ultimi judicii diem.* At the close of the year 1537 he returned, together with his friend Johann Sylvester, who likewise distinguished himself as a reformer of Hungary, to count Nádasdy, bringing with him a letter of recommendation from Melancthon. For several years, Nádasdy, Dévay, and Sylvester displayed great activity for the propagation of the Reformation. Dévay wrote an outline of the Hungarian grammar for elementary schools (*Orthographia Hungarica*), the first book printed in the Hungarian language. This little book contained, besides the grammatical matter, a statement of the fundamental principles of the Reformation, and children's prayers taken from the smaller catechism of Luther. The civil war in Hungary, in which a Turkish army supported the claims of the son of Zápolya, the rival of king Ferdinand, to the Hungarian crown, and in which Nádasdy, Dévay, and Sylvester were on the side of Ferdinand, interrupted the labors of the reformers, and destroyed the Protestant school and printing-press at Uj-Sziget. Dévay had to leave Hungary, and was recommended by Melancthon to Margrave George, a zealous patron of the Reformation, who owned large possessions in Hungary. Dévay on this occasion paid another visit to Switzerland, and there adopted the views of the Helvetic Reformers on the doctrine of the Lord's Supper. On his return to Hungary he zealously preached his new views. The Lutheran ministers of the district of Sárvár, where Nádasdy lived, complained of this change of views to

Luther, who in his reply (dated April 31, 1544) finds it difficult to believe in the change, but says that, at all events, Dévay has not received this doctrine from him, and that he (Luther) would continue to fight that "abomination" publicly and privately. After his return to Hungary, Dévay labored as preacher and "senior" (elder) in the town of Debreczin, where the Reformation had a powerful patron in count Valentin Török of Enying, a near relative of count Nádasdy. While at Debreczin, Dévay wrote, in the Hungarian language, his exposition of the Ten Commandments, the Articles of Faith, the Lord's Prayer, and the Seal of Faith. This book was probably printed at Cracow. The year and place of the death of Dévay are not known, but it is probable that in the year 1547 he was no longer alive. Besides the works already mentioned, Dévay is the author of a hymn containing the principal articles of the Reformed Faith, and which was received into the hymn-book of the Reformed Church of the Helvetic Confession in Hungary.—Herzog, *Real-Encyklop.* xix, 406, Wetzer und Welte, *Kirchen-Lex.* iii, 123; Craig (transl.), *History of the Protestant Church in Hungary* (Lond. 1854), p. 50 sq.; Schröckh, *Kirchengeschichte seit der Reformation*, ii. 730.

Development, a word denoting primarily *unfolding, unwrapping;* hence, secondarily, a process of growth or expansion. It has recently come into extensive use both in philosophy and in theology. In philosophy, it is part of the Pantheistic doctrine not simply that all existing forms of life have been *developed* from simpler forms, but also that the Infinite, as well as the finite, passes from one stage of life to another by unending development. "The whole fabric of ancient and modern Pantheism rests upon the *petitio principii* that the doctrine of evolution has the same legitimate application within the sphere of the Infinite and Eternal that it has within that of the finite and temporal, a postulate that annihilates the distinction between the two. The idea of undeveloped being has no rational meaning except in reference to the created and the conditional" (Shedd, *History of Christian Doctrine*, i, 13).

1. As applied to history, the doctrine of development, as stated by its ablest advocates, is that all created existences obey a law of evolution from the potential germ given by the Creator; and that this law applies to the race of man as well as to individuals of the race. As a tree is developed from its seed, so the human body, the human mind, the human race, grow, according to the law of their organic life. Under this view, "history is no longer viewed as a mere inorganic mass of names, dates, and facts, but as *spirit* and *life*, and therefore as process, motion, development, passing through various stages, ever rising to some higher state, yet identical with itself, so that its end is but the full unfolding of its beginning. This makes Church history, then, appear as an organism, starting from the person of Christ, the creator and progenitor of a new race; perpetually spreading both outwardly and inwardly; maintaining a steady conflict with sin and error without and within; continually beset with difficulties and obstructions; yet, under the unfailing guidance of Providence, infallibly working an appointed end. This idea of organic development combines what was true in the notion of something permanent and unchangeable in Church history, as held by both the Catholic and the Old-Protestant orthodoxy, with the element of truth in the Rationalistic conception of motion and flow; and on such ground alone is it possible to understand fully and clearly the temporal life of Christianity. A permanent principle, without motion, stiffens into stagnation; motion, without a principle of permanence, is a process of dissolution. In neither case can there properly be any living history. The conception of such history is, that while it incessantly changes its form, never for a moment standing still, yet through all its changes it remains true to its own essence; never outrages itself; incorporates into each succeeding stage of growth the results of the preceding, and thus never loses anything which was ever of real value" (Schaff, *Apostolic Church*, § 34). Certain guards are necessary to prevent the Christian theory of development from passing into the Pantheistic view. They are stated by Dr. Shedd (*History of Christian Doctrine*, § 3, 4) substantially as follows: 1. The pantheists substitute development for creation. Development supposes existing materials; creation, on the other hand, is from nothing, and presupposes no materials. All germs, according to Christian theism, are created by God. Mere development (which is simply the *unfolding* of something previously *folded up*) cannot account for the origin of anything. "The significant fact in natural history, not yet invalidated by the most torturing experiments of baffled theorists, that one species never expands into another, proves that though a process of development can be accounted for out of the latent potentiality at the base, the latter can be accounted for only by recurring to the creative power of God. The expansion of a vegetable seed, even if carried on through all the cycles upon cycles of the geological system, never transmutes it into the egg of animal life; and this only verifies the self-evident proposition that nothing can come forth that has never been put in" (Shedd, *Hist. of Christian Doctrine*, § 3). The second caution is always to discriminate the idea of a development from that of an *improvement*. It depends upon the nature of the germ whether the evolution shall be from good to better, or from bad to worse. By the abuse of free-will in the spiritual sphere the normal development may be displaced; but original righteousness was not *developed* into original sin. Man, endowed with free-will, *created* sin, so to speak, under the permission of God. Abstractly, then, development may be synonymous with corruption and decline, as well as with improvement.

But, even with all these guards and cautions, the doctrine of development, when applied within the sphere of moral action, is a perilous one. Any theory of the history of man which leaves out of the case his free agency, must end either in Fatalism or in Pantheism. Dr. T. H. Skinner, Jr., in the *Baptist Quarterly Review* for January, 1868, while vindicating Dr. Shedd's theory of development from the charge of Pantheism, endeavors to show that it runs into Fatalism. "Dr. Shedd does not discriminate development from necessity. From the scheme of realistic development, neither a true and just human responsibility, nor a true divine moral government of free agents, can be educed." If it be true, as Dr. Shedd says, that the same law of organic sequence prevails in the sphere of mind and of freedom that works in the kingdom of matter and necessity, then necessity rules the one sphere as it does the other, and rules under the same law.

2. As applied to *doctrine*, the Christian view of development is that there has been a gradual progression in the manifestation of the divine plan to man, both in revelation and in history. This doctrine is well set forth and illustrated, so far as the N. T. is concerned, in Bernard's *Progress of Doctrine in the New Testament* (Bampton Lecture for 1866; Boston, Gould & Lincoln, 1867). The Bible, beginning with Genesis, gives the exposition, not of a revelation completed, but of a revelation in progress, and expanding into greater fulness and clearness from the beginning until its final completion in the Apocalypse, at the close of the Canon. After this, the Church has never held to any advance in *divine teaching;* all growth, subsequent to the apostolical age, has been growth in man's apprehension of divine truth, not in God's revelation of it. The Holy Spirit is still a divine guide to all seekers after truth; not in the way of new revelation, however, but of "reminding" men of the truth once given, and of il-

luminating the truly believing inquirer in his search into the meaning of revelation. The body of Christian truth, both fact and doctrine, is revealed and recorded, once for all, in the Scriptures of the Old and New Testament; and these Scriptures constitute, in every age, the norm of doctrine, and the criterion by which all new exhibitions of doctrine are to be tested. No *new* truth can be developed any more than a new man can be created. But it is very clear that there may be, and has been, development of Christian doctrine in the sense of clearer apprehension of it on the part of the Church. The science of theology implies the application of human reason to the given facts and doctrines of Christianity; first, the application of reason to Scripture (exegesis), to find out what its doctrines are; and, secondly, the use of reason in co-ordinating these doctrines into scientific form (system). It will be observed that the "development of doctrine," as thus stated, is very different from the theory that the Bible gives only the "germs" of doctrine, out of which, by a necessary organic law, the doctrines themselves are "developed." This image of a "germ" is very apt to mislead. Even if a doctrine were a living thing such as a germ is, "it is to be remembered that even a germ is developed by attracting and assimilating to itself many foreign elements which are around it. It is by additions from without, and different from itself, that it grows" (Donaldson, *History of Christian Literature*, i, 5).

In doctrine, however, as in history, development is not always synonymous with improvement. Human apprehension of divine truth is sometimes wrong, as well as sometimes right; and the history of doctrines, while implying development in its very idea, yet includes variations of rise and fall in human statements of the one divine truth. A right theory "of the development of Christian theology by no means implies that each later age must necessarily have a fuller and deeper knowledge of divine things than its predecessors, either as spread abroad through the body of the Church, or as centred in its chief teachers. Were this a consequence of this theory, this alone would be fatal to it, the very reverse having notoriously been often the case. But even in science, which is so much less dependent on moral influences, and with which the varieties of character and feeling have so little to do, the progress has never been uniform and uninterrupted; while in poetry, in the arts, in philosophy, where the understanding is greatly swayed by moral affections, and derives a main part of its sustenance and energy from them, man's course has been so irregular that nothing like a law of it has been ascertained. So, too, must it needs be in theology, where the subject matter is divine truth, which cannot be received intellectually unless it be also received morally, to the pure reception of which all corrupt feelings of our nature are opposed, and which they are perpetually attempting to sophisticate and distort. Thus it has often come to pass that the inheritance left us by one age has been squandered, or wasted, or forfeited by its successor, so that it by no means follows from the theory of the development of Christian truth that even the later system of theology must be the better. For the world is always wrestling to draw men away from the truth, and will often prevail, as Jacob did over the angel; and when faith is at a low ebb, when the visible, and the immediate, and material predominate in men's hearts and minds over the invisible, the ideal, and the spiritual, theology must needs dwindle and decay. But when there is a revival of faith, if this revival coincides with, or is succeeded by a period of energetic thought, a deeper or clearer insight will be gained in certain portions of truth, especially appropriate to the circumstances and exigencies of the age, and which have not yet been set forth in their fulness. Thus, to cite the two most memorable examples, the true doctrine of the Trinity was brought out more distinctly in the fourth century, that of justification by faith in the sixteenth, the prevalence of error acting in both instances as a motive and spur to the clearer demarcation and exposition of the truth. At the same time, through man's aptness to overleap himself, and to exaggerate the importance of whatever may be engaging him at the moment, an age which has been allowed to behold a fresh truth may too easily depreciate and let slip the truths which its ancestors have bequeathed to it, which proneness has ever been a main source of heresy. Thus, on all sides, we are continually reminded of our inherent weakness, and how that weakness is ever the most mischievous when we are beguiled into fancying ourselves strong; and while we are hereby exhorted to be diligent in studying the whole history of the Church, and the writings of her chief teachers in every age, lest we drop and lose any portion of the precious riches which they have been allowed to win for mankind, we are still more strongly admonished to compare every proposition, and every scheme of propositions—every proposition, both as it stands by itself, and in its relation to the other parts of Christian truth—with the only canon of truth, the written Word of God" (Hare, *Mission of the Comforter*, note G).

In what has been called the *extreme subjective* school of German theology, there is a false doctrine of development, which is stated as follows in Chambers's *Encyclopædia* (s. v. Development): "According to this school, Christian doctrine is nothing else than the expression of the Christian consciousness at any time. Scripture maintains no permanent or authoritative relation to it. It is all progress—a continued flux, without any normal standard or expression. Scripture may be its primary expression, but it may leave its fountain-head, and in the course of time issue in developments not necessarily bound to Scripture. But, according to the view above set forth, Scripture remains the absolute and complete revelation of Christian doctrine, which is continually unfolded, but never exhausted by inquiry—beyond which right reason and truth never travel. The Christian revelation not only admits of, but demands constant criticism, as the means of unfolding more comprehensively and perfectly its contents, but it remains in itself the consummate expression of all spiritual truth; and it is this very peculiarity of the Christian revelation that makes its contents capable of continual and ever fresh development. It is just because its substance is divine that its doctrinal expressions never cease to interest and to answer to the necessities of successive times. Other religions, while capable of development, reach a point where they cease to have any further living meaning, and pass on the one hand into mere popular mythology, or into an esoteric priestly tradition. They become transmuted into poetry or some ordinary product of philosophical speculation. Civilization overtakes and supplants them. But it is of the distinguishing divine character of Christianity that its doctrines possess a vital ever-renewing power, capable of adaptation to the highest forms of human civilization, and full of enlightenment and guidance to the most advanced intelligence. The development of Christian doctrine, therefore, is not merely a subject of curious and important study in the past, but of great and significant influence for the present and the future."

3. Certain Romanist writers have recently made use of the doctrine of development to vindicate the theology of that Church. They hold that the Scriptures do not contain the entire revelation of God to man, but that revelation is receiving additions, and gradually becoming complete, by the successive decisions of the Church. This view has been set forth by Möhler, and with special skill by J. H. Newman (*Essay on the Development of Christian Doctrine* [N. Y. 1853, 8vo]). Its ground is that the revelation given in the Bible was intentionally incomplete, and forms an inchoate

and imperfect system of truth, needing for its completion a gradual development under infallible guidance, and that the present system of doctrine in the Roman Catholic Church is the ripened result of this development, so far as made. See also Döllinger, *Christenthum und Kirche*, 1860, p. 162. The doctrine has not met with general favor in the Roman Catholic Church, as it is in conflict with the established reliance of that Church upon tradition, and upon what is called "Catholic consent." One of the ablest of modern Romanist writers, Brownson, has written powerfully against the development theory (in his *Quart. Review*). Extremes meet; the Rationalistic theory agrees with the Romanist (in Mr. Newman's view of it) in representing the system of Christianity delivered in the New Testament as defective and imperfect. The Council of Trent declared (*sess.* iv) as follows: "The sacred and holy, œcumenical and general Council of Trent, keeping always in view the removal of errors and the preservation in the Church of the purity of the Gospel, which Gospel, before promised through the prophets in the Holy Scriptures, was first orally published by our Lord Jesus Christ, the Son of God, and then commanded to be preached by his apostles to every creature, as the fountain both of every saving truth and discipline of morals; and perceiving that this truth and discipline are contained in the written books, and the unwritten traditions which, received by the apostles from the mouth of Christ himself, or from the apostles themselves, the Holy Ghost dictating, have come down even unto us, transmitted as it were from hand to hand; [the council] following the examples of the orthodox fathers, receives and venerates with equal affection of piety and reverence all the books both of the Old and of the New Testament, seeing that one God is the author of both, as also the said traditions, as well those appertaining to faith as to morals, as having been dictated either by Christ's own word of mouth or by the Holy Ghost, and preserved by a continuous succession in the Catholic Church." Mr. Newman's book was ably answered by W. Archer Butler, *Letters on Romanism* (Cambridge, 1854, 8vo). The following remarks of Julius Charles Hare (*Mission of the Comforter*, note G) are in point: "Some of the German apologists for Romanism, having perceived, as could not but happen in a country where learning and criticism have found a home, that the old plea of a positive, unwritten tradition in the Church was utterly untenable as a ground for the doctrinal and practical innovations of later times, have fancied that they might render their Church a service by taking up the popular and modern theory of the development of mankind—a theory which has been carried into the most outrageous extravagances in the contemporary schools of philosophy, as it has also been in France by the St. Simonians. This theory has been used by others to show that Christianity itself is a transient religion, belonging to a by-gone period and almost obsolete; they have tried to employ it in defence of the Church of Rome. Herein, however, it was impossible for them to succeed. That Church, whose constant effort, since the time when it cut itself off from the living body of Christ, has been to check, to repress, to cramp, to fetter the mind, could not find support in a theory which implies the freedom of the mind; nor can any Church, unless it recognises, both doctrinally and practically, that the property of truth is to set the mind free."

4. The following section was prepared for this Cyclopædia by the late Dr. Harbaugh just before his death. We print it as he left it, though it involves a little repetition of what has been given above.

Development.—This word, related primarily to the sphere of organic life in the natural world, has also come to perform important service in science, especially in psychology, philosophy, theology, and history. In the earlier stages of science generally, the data and phenomena were classified and arranged according to the outward peculiarities which they presented. In time, however, and especially under the influence of Christianity, as the key to the deepest life of the world, scientific thinking felt itself urged to a deeper apprehension of all kinds of phenomena. The mechanical and outward in systematizing accordingly had to give way to the determining power of mere inward principles.

Thus it has come to pass that while science, so far as it has been apprehended and advanced by non-Christian thinking, has been, for the most part, satisfied with the word *progress*, science grounded in the distinctively Christian principle has found the word development indispensable. The word, as thus used, presupposes a distinctive theory of the essence of Christianity, and so also of the Church, its history and its dogmas, as well as of affiliated sciences, such as psychology and philosophy. It finds inadequate the view of the essence of Christianity which resolves it into the idea of *doctrine*, as in Supranaturalism; so also the view which makes it only an ethical force, law, or *rule of life*, as set forth in the school of Kant and by Rationalism; and so, moreover, the conception that it is, in its essential character, a mere power of redemption operative in the *sphere of religious feeling*, according to Schleiermacher and the Mystics. Admitting and appreciating all these as secondary and dependent, it holds that Christianity is primarily and essentially a *life*—the divine-human life of its founder, Jesus Christ—which becomes the deepest life of renewed humanity, of history, and of science (see Ullman, *Distinctive Character and Essence of Christianity*). Life being essentially *organic*, it must have the word development to indicate that unfolding from a germ-like inward principle which is the distinctive characteristic of organic life. To the genetic processes involved in the activities of life it applies the word development. "This idea of an organic, steadily improving development of humanity, according to a wise, unalterable plan of Providence, is properly as old as Christianity, meets us in many passages of the New Testament (Matt. xiii, 31, 32; Ephes. iv, 12–16; Coloss. ii, 19; 2 Pet. iii, 18), and in occasional remarks of the early fathers, such as Tertullian and Augustine; and was brought out in the 18th century with peculiar emphasis and freshness by the genial *Herder*, in his 'Ideas on the Philosophy of the History of Humanity' (784), so highly valued by the gifted historian of Switzerland, John von Müller" (see Herder's *Sämmtliche Werke, zur Phil. und Gesch.* Theil iii, § 74 sq.). "The more mature and philosophical conception of it, however, and the impulse which it gave to a deeper and a livelier study of history, are due especially to the philosophy of *Schelling*, and, still more, of *Hegel*. With Hegel, all life and thought is properly development, or a process of organic growth, which he calls Aufhebung—that is, in the threefold sense of this philosophical term so much uesd by him, (1.) an abolition of the previous imperfect form (an *aufheben*, in the sense of *tollere*); (2.) a preservation of the essence (*conservare*); and (3.) an elevation of it to a higher stage of *existence* (*elevare*)" (Dr. Schaff's *History of the Apost. Church*, p. 90, 91).

The conception of development has, however, also been carried out of its proper Christian sense, and perverted to the service of anti-Christian systems of thought. Thus Pantheism, laying hold upon some insufficiently guarded point in the Hegelian theory, has employed it in its scheme. The one school of Hegel, denying with him the existence of a personal God, as the creator of all principles of created life, proposes to account for all animated existence by a theory of development starting in matter, ideas, or thought (all of which, however, it leaves vague and floating), holding that nature through successive upward gradations ultimately reaches self-consciousness in the human spir-

it, and thus also God himself comes to exist in the form of the general human consciousness, the world-idea, the self-manifestation of the idea of God, "who is at once the manifestation and the moment of the process of the development and actualization of his substance as the absolute spirit" (Herzog, *Real-Encyklop.* v, 629). Nor has Rationalism failed to seize upon and pervert the Christian conception of development for its use. Leaving out of view and ignoring the nature of Christianity as a life, it acknowledges no life-principle in Christianity; consequently breaks with all genetic, traditionary, or historical processes, and proposes a progress of moral enlightenment which shall advance beyond Christ, the Church, and Revelation. Its processes and progress, which it calls development, starting in revolution, can present only a history of deterioration and corruption. The Christian idea of development, properly used, leaves no room for such-like revolution and negative progress. Substantially into this snare Prof. Bush has fallen, in the otherwise just and valuable discussion by which he introduces his work on the Resurrection (*Anastasis, the Introduction*, p. 13–29). The Roman Catholic convert, *John Henry Newman*, has also a theory of development, which, however, seems to be rather a development in the sphere of ideas than of facts—of life; hence it is rather mechanical and philosophical than organic and Christian. It moves more in the region of subjective mental processes than in the objective essential life of Christianity. It is consequently of little actual account either as a polemic against the Protestant idea of development, or as fixing on a firmer and more consistent basis the dogmas of the Roman faith, over into which he passed while his work (which actually marked his transition) was going through the press (*Essay on the Development of Christian Doctrine*). The Roman theory can conceive of no development except in the way of progress that needs as such to be outwardly measured by referring itself to an outward infallible authority in the pope. But "such development requires no 'infallible earthly head' for its direction and conduct, just as little as a living oak needs to be built up by line and compass. An authority of this sort, supposed to supersede the free working of the intelligence and will of the Church itself, would be the source of petrifaction and stagnation only, not of development. This implies freedom, ethical activity, life poised upon itself as a principle and centre. It is just the stability system which in every shape turns into mechanism and leads to popery" (Nevin, *Mercersburg Review*, i, 513, 514).

Y. 1860), p. 226 sq.; Schaff, *What is Church History* (Philadel. 1846, 12mo); *English Review*, various articles in vols. iv, vi, ix, xi; Cunningham, *Historical Theology*, i, 210 sq.; *American Presb. and Theol. Review*, Oct. 1867, art. iv; Donaldson, *Critical History of the first three Centuries*.

Devil (ὁ Διάβολος, of which the English term is but a variation). This term signifies one who travesties another's character for the purpose of injuring it, a *slanderer*, and is sometimes applied to any calumniator, e. g. a gossip-monger (1 Tim. iii, 11; 2 Tim. iii, 3; Titus ii, 3); but it is spoken especially, by way of eminence, of the arch enemy of man's spiritual interest, whom the Jews represented as continually impugning the character of saints before God (comp. Job i, 6; Rev. xii, 10; Zech. iii, 1). See Accuser. In 1 Pet. v, 8, he is expressly called "the accuser (ἀντίδικος) of the brethren," with a reference to forensic usages. See Advocate. The word is found in the plural number and adjective sense in 1 Tim. iii, 11; 2 Tim. iii, 3; and Tit. ii, 3. In all other cases it is used with the article as a descriptive name of Satan, except that in John vi, 70, it is applied to Judas (as "Satan" to Peter in Matt. xvi, 23), because they—the one permanently, and the other for the moment—were doing Satan's work. (On John xi, 31, see Engelhard's *Commentatio*, Erf. 1794; Hane, *Schriftlerkl.* p. 51–75; on Heb. ii, 14, Anon. *De Diabolo*, Gött. 1784; Oestmann, *De loco* 1 *Pet. v*, 8, Gryph. 1816). The name describes him as slandering God to man, and man to God. See Diabolus. *a*. The former work is, of course, a part of the great work of temptation to evil; and is not only exemplified, but illustrated, as to its general nature and tendency, by the narrative of Gen. iii. We find there that its essential characteristic is the representation of God as an arbitrary and selfish ruler, seeking his own good, and not that of his creatures. The effect is to stir up in man the spirit of freedom to seek a fancied independence; and it is but a slight step further to impute falsehood or cruelty to God. The success of the devil's slander is seen, not only in the scriptural narrative of the Fall, but in the corruptions of most mythologies, and especially in the horrible notion of the divine φθόνος, or envy, which ran through so many (see, e. g. Herod. i, 32; vii, 46). The same slander is implied rather than expressed in the temptation of our Lord, and is overcome by the faith which trusts in God's love even where its signs may be hidden from the eye (comp. the unmasking of a similar slander by Peter in Acts v, 4). *b*. The other work, the slandering or accusing of man before God, is, as it must naturally be, unintelligible to us. The All-seeing Judge can *need* no accuser, and the All-Pure could, it might seem, have no intercourse with the Evil One. But, in truth, the question touches on two mysteries, the relation of the Infinite to the finite spirit, and the permission of the existence of evil under the government of him who is "the Good." As a part of these it must be viewed—to the latter especially it belongs; and this latter, while it is the great mystery of all, is also one in which the facts are proved to us by incontrovertible evidence. See Satan.

The word "devil" also often stands, but improperly, in our version as a rendering of δαίμων, an impure spirit from the other world acting upon a human being. See Dæmon.

In Lev. xvii, 7, the word translated "devil" is שָׂעִיר (*saïr'*, *hairy*), ordinarily a "*goat*," but rendered "satyr" in Isa. xiii, 21; xxxiv, 14; probably alluding to the *wood-dæmons*, resembling he-goats, supposed to live in deserts, and which were an object of idolatrous and beastly worship among the heathen. See Satyr.

The term rendered "devil" in Deut. xxxii, 17; Psa. cvi, 37, is שֵׁד (*shed*, properly *lord*, Sept. and Vulg. *dæmon*), an *idol*, since the Jews regarded idols as dæmons that caused themselves to be worshipped by men. See Idolatry.

The belief of the Hebrews down to the Babylonian exile seems but dimly to have recognised either Satan or dæmons, at least as a dogmatic tenet, nor had it any occasion for them, since it treated moral evil as a properly human act (comp. Gen. iii), and always as subjective and concrete, but regarded misfortune, according to teleological axioms, as a punishment deserved on account of sin at the hands of a righteous God, who inflicted it especially by the agency of one of his angels (2 Sam. xxiv, 16; comp. 2 Kings xix, 35), and was accordingly looked upon as the proper author of every afflictive dispensation (Amos iii, 6). Apparitions were part of the popular creed: there were beings inimical to mankind inhabiting solitudes, but not yet adopted in the association of religious ideas. See Spectre. The Azazel (q. v.) is thought by many to have been held to be such a dæmon; yet, if we grant even this, it still remains but an isolated being, one might almost say, a mere liturgical idea. Neverthe-

less, it cannot be denied that these representations were fitted to serve as introductory to dogmatic dæmonology, when the belief was eventually carried out to its full conclusion. The period of the exile is the time of this development; and when also the Medo-Persian tenets of Ahriman and his emanations came into direct contact with the Israelitish faith, they exerted so powerful an influence in drawing out the national conceptions that the Amshaspands of the Zend-Avesta (q. v.) are strongly reflected in the Jewish angelology. Earlier, indeed, a Satan, so called by way of eminence, occasionally appears as the malicious author of human misfortune, but only under the divine superintendence: e. g. he incites David to a sinful act (1 Chron. xxi, 1); casts suspicions upon Job's piety (Job i, 6 sq.), and, with Jehovah's permission, inflicts upon him a lot gradually more severe to the utmost point of endurance; appears as the mendacious impeacher (ὁ κατήγωρ, Rev. xii, 10) of the high-priest Joshua before the Angel of God, but draws upon himself the divine malediction (Zech. iii, 1 sq.). Yet in all this he is as little like the Ahriman of the Zend-Avesta (Rhode, *Heil. Sage*, p. 182 sq.; Matthäi, *Religionsglaube d. Apostel*, II, i, 171 sq.; Creuzer, *Symbol.* i, 705) as an indifferent prosecuting attorney-general or judicial superintendent commissioned by Jehovah: ill-will actuates him, and desire for the misery of the pious. Dæmons are not mentioned in the canonical books of the Old Test., unless (with many interpreters) we understand "the host of the high ones" in Isa. xxiv, 21 (צְבָא הַמָּרוֹם, *army of the lofty*, comp. Dan. viii, 10), of the evil angels (comp. Isa. xiv, 12), and interpret the whole passage as referring to their punishment. See LUCIFER. In the Apocrypha, the old Hebrew notion of Jehovah's angels who allot disaster occurs but partially, and in case mishap overtakes the enemies of the pious, the angels are alluded to as auxiliaries and friends of the latter (2 Macc. xv, 23 sq.), although we may search in vain such passages for a single mention of dæmons. On the other hand, the books of Tobias and Baruch are full of representations concerning them (δαιμόνια), while they never refer to Satan. These beings dwell in waste places (Bar. iv, 35; Tob. viii, 3; comp. Sept. at Isa. xiii, 21; xxxiv, 14); also ruins (Gemara, *Berachoth*, p. 16, Rabe's trans.; they are the heathen gods, Bar. iv, 7; comp. Sept. at Psa. xcv, 5; 1 Cor. x, 20); but mingle among men, take their abode in them as tormenting spirits (Tob. vi, 9), and can only be expelled by mystical means (Tob. vi, 20). One of them, Asmodæus (q. v.), is licentious (on the lust of dæmons as being signified in Gen. vi, 2, see the book of Enoch, ch. vii, and the *Testam. Reuben*, c. 5, in Fabricii *Pseudepigr. V. T.* i, 530), falls in love with a beautiful maiden, and through jealousy kills her seven successive bridegrooms on the wedding night (Tob. iii, 8; comp. vi, 15). In the book of Wisdom (ii, 24), the devil (ὁ διάβολος) comes plainly forward as an interpretation of the serpent that seduced Eve (Gen. iii; the *Targum* of Jonathan actually names, at Gen. iii, 6, *Sammael* as the "angel of death," מַלְאַךְ מִיתָא: see Gerlach, *De angelo mortis*, Hal. 1734), and here the Zend-avestic parallel becomes more evident (the serpent was a symbol of Ahriman, Creuzer, *Symbol.* i, 724). Josephus knows nothing of Satan, but dæmons (δαίμονες or δαιμόνια), souls of dead men (*War*, vii, 6, 3), are with him tormenting spirits, which take possession of men (*ib.*), and inflict upon them severe, incurable diseases, particularly of a psychical character (*Ant.* vi, 8, 2; 11, 3, in explanation of 1 Sam. xvi, 14). Their expulsion can be effected (see Gemara, *Berachoth*, p. 28, Rabe's tr.) by magical formulæ (*Ant.* viii, 2, 5) and mystical means (*War*, vii, 6, 3). Such dæmoniacs (δαιμονιζόμενοι) are, as is well known, mentioned in the gospels, and Jesus restored many of them by a simple word. See POSSESSED (WITH A DEVIL). But perhaps the dæmonology of the New Test. is exhibited in a more strictly dogmatic light than any other. The dæmons have Satan as their chief (ἄρχων, Matt. xii, 24), dwell in men as "unclean spirits" (πνεύματα ἀκάθαρτα or πονηρά, Matt. xii, 43; Luke viii, 2; x, 20; xi, 24; Eph. vi, 12; one inferior to the other, Luke xi, 26), and induce maladies as "spirits of infirmities" (πνεύματα ἀσθενειῶν, Luke viii, 2; xiii, 11; comp. 1 Cor. v, 5; 1 Tim. i, 20). They appear in association with Satan in the Apocalypse (Rev. xii, 7, 9; xvi, 13 sq.). Satan himself (ὁ Σατανᾶς, ὁ Διάβολος, ὁ πονηρός, Βεελζεβούλ [see BEELZEBUB], Βελίαλ [בְּלִיַּעַל] or Βελίαρ, 2 Cor. vi, 15 [see BELIAL]), is the originator of all wickedness and mischief (Luke x, 19; xiii, 16; xxii, 31; Acts v, 3; 2 Cor. xi, 3; Eph. ii, 2), therefore the opponent (ὁ ἐχθρός) of the kingdom of God (Matt. xiii, 39; Luke x, 18; xxii, 3 sq.; for whose subjugation Christ came, John xii, 31; xiv, 30; xvi, 11), and the tempter (ὁ πειράζων) of the faithful (1 Cor. vii, 5; 1 Thess. iii, 5; 1 Pet. v, 8 sq.), as Jesus himself was tempted by him in the beginning of his ministry (Matt. iv). Satan's first act towards mankind was the leading of Eve into sin (2 Cor. xi, 3; comp. Rev. xii, 9; John viii, 44), and so he became the originator and king of death (1 Cor. xv, 26; Heb. ii, 14; the *Sammaël'*, סַמָּאֵל, of the later Jews, see Buxtorf, *Lex. Chald.* col. 1495). He and his angels (Rev. xii, 9; comp. 2 Cor. xii, 7), i. e. apparently the dæmons, were originally created good (inasmuch as from the hand of God only good can come, but against him, the Creator of the universe, no opposing being could originally exist); but through their own fault they fell (John viii, 44 [?]; 2 Pet. ii, 4; Jude 6); yet they rule in the kingdom of darkness (Eph. vi, 12; comp. Col. i, 13; roving about in the atmosphere, Eph. ii, 2), as well as over all mankind alienate from God (ὁ κόσμος, as κοσμοκράτορες, Eph. vi, 12; but Satan as ἄρχων τοῦ κόσμου τούτου or θεὸς τοῦ αἰῶνος τούτου, John xii, 31; xiv, 30; xvi, 11; 2 Cor. iv, 4; Eph. ii, 2), although destined to a future fearful sentence (2 Pet. ii, 4; Jude 6), when Christ shall appear to overthrow the kingdom of Satan (1 John ii, 8); indeed, Satan has already through him received his condemnation (John xii, 31; xvi, 11; comp. Heb. ii, 14). The later speculations of the Jews on the subject of Satan and dæmons may be seen in Eisenmenger (*Entdeckt. Judenth.* ii, c. 8, p. 408 sq.). The Targums often introduce Satan into the O. T. text; in fact, whenever an opportunity presents itself (e. g. Jonath. on Exod. xxxii, 19; Lev. ix, 2). On this subject, see especially Mayer, *Historia Diaboli* (2d ed. Tub. 1780); Ode, *De angelis* (Traj. ad Rh. 1739), sect. 4, p. 463 sq.; Schmidt, in his *Biblioth. für Krit. u. Exegese*, i, 525 sq. ("Comparison of the New.-Test. dæmonology with the Zendic books"); Winzer, *De dæmonologia in N. T. proposita* (Viteb. 1812, Lips. 121, incomplete); Matthäi, *Religionsglaube der Apostel*, II, i, 98 sq.; Cölln, *Bibl. Theol.* i, 423 sq.; ii, 69 sq.; 229 sq.; M. Stuart, in the *Bibliotheca Sacra* (1843), i, 120 sq. See ANGEL; EXORCISM; SATAN.

Devil-worshippers. See YEZIDEES.

Devoted thing. See ANATHEMA.

Devotee, "in the primary sense of the word, means a person wholly given up to acts of piety and devotion; but it is usually understood, in a bad sense, to denote a bigot or superstitious person—one addicted to excessive and self-imposed religious exercises."—Buck, *Theol. Dictionary*, s. v.

Devotion (Lat. *devoveo*, to give up one's self wholly to any object). "It is employed to mean either, 1, that religious *habit* of the mind which is otherwise called devoutness; or, and more commonly, 2, the *expression* of such a state of mind in particular acts and instances of a religious nature. A spirit of devotion is one of the greatest blessings, and the want of it one

of the greatest misfortunes, which a Christian can experience. When it is present, it gives life to every act of worship we perform; it renders every such act interesting and comfortable to ourselves. It is experienced in our most retired moments; in our beds, in our closets, our rides, and our walks. It is felt within us when we are assembled with our children and servants in family prayer. It leads us to church, to the congregation of our fellow-Christians there assembled. In an especial manner it accompanies us in our joint offices of religion, and it returns us to our homes holier, happier, and better. But that which greatly enhances its value to every anxious Christian is that it affords to himself a proof that his heart is right towards God. When it is followed by an abstinence from sin and endeavors after virtue, by avoiding evil and doing good, the proof and the satisfaction to be drawn from it are complete. Wherever the vital and unadulterated spirit of Christian devotion prevails, its immediate objects will be to adore the perfections of God; to entertain with reverence and complacence the various intimations of his pleasure, especially those contained in holy writ; to acknowledge our absolute dependence on and infinite obligations to him; to confess and lament the disorders of our nature and the transgressions of our lives; to implore his grace and mercy through Jesus Christ; to intercede for our brethren of mankind; to pray for the propagation and establishment of truth, righteousness, and peace on earth; in fine, to long for a more entire conformity to the will of God, and to breathe after the everlasting enjoyment of his friendship. The effects of such a spirit, habitually cherished and feelingly expressed before him, must surely be important and happy. Among these may be reckoned a profound humility in the sight of God, a high veneration for his presence and attributes, an ardent zeal for his worship and honor, a constant imitation of our Saviour's divine example, a diffusive charity for men of all denominations, a generous and unwearied self-denial, a total resignation to Providence, an increasing esteem for the Gospel, with clearer and firmer hopes of that immortal life which it has brought to light" (Paley, *Sermons*, Ser. vi).

Dew (טַל, *tal*, gentle *moisture*; Gr. δρόσος) is mentioned as falling in the East (Maundrell, p. 77; Robinson, iii, 479), e. g. in Babylon (Dan. iv, 12, 22), likewise in Palestine during the summer nights (Baruch, ii, 25), so heavy as to wet like a mode ate rain (Cant. v, 2; Judg. vi, 38), the absence of which it somewhat supplies (Ecclus. xviii, 16; xliii, 22), greatly cooling the earth heated by day (comp. Curt. vii, 5, 5), and refreshing vegetation (Hasselquist, p. 264; Volney, i, 51; Rosenmüller, *Morgenl.* i, 122). Thus it is coupled in the divine blessing with rain, or mentioned as a prime source of fertility (Gen. xxvii, 28; Deut. xxxiii, 13; Zech. viii, 12), and its withdrawal is attributed to a curse (2 Sam. i, 21; 1 Kings xvii, 1; Hag. i, 10). See Irrigation.

The value of this blessing cannot be adequately appreciated by the Western reader; but in Palestine, and indeed throughout Western Asia, rain rarely if ever falls from April to September, and the heat of the sun being at the same time very strong, all vegetation would be parched and dried up were it not for the copious dews which fall during the night and completely moisten the ground, keeping in a fertile condition lands which would otherwise be sterile and desolate. But all this moisture evaporates with astonishing rapidity as soon as the sun has risen. It seems that the advantage of these abundant dews is not generally enjoyed except in regions more or less hilly or elevated, or in confined valleys. In extensive open plains and deserts, it does not seem that any copious dews fall in summer. But in such tracts no men can inhabit except the wandering tribes, and towns and villages are only found on the banks of natural or artificial streams; nor, unless in the same situations, is any cultivation attempted where there are no night dews in summer to compensate for the want of rain (Kitto, *Pict. Bible*, note on Gen. xxvii, 28). See Fleece. The various passages of Scripture in which dew is mentioned, as well as the statements of travellers, might, however, unless carefully considered, convey the impression that in Palestine the dews fall copiously at night during the height of summer, and supply in some degree the lack of rain. But we find that those who mention dews travelled in spring and autumn, while those who travelled in summer make no mention of them. In fact, scarcely any dew does fall during the summer months—from the middle of May to the middle of August; but as it continues to fall for some time after the rains of spring have ceased, and begins to fall before the rains of autumn commence, we may from this gather the sense in which the scriptural references to dew are to be understood. Without the dews continuing to fall after the rains have ceased, and commencing before the rains return, the season of actual drought, and the parched appearance of the country, would be of much longer duration than they really are. See Drought. The partial refreshment thus afforded to the ground at the end of a summer without dews or rains, is of great value in Western Asia, and would alone explain all the Oriental references to the effects of dew. This explanation is of further interest as indicating the times of the year to which the scriptural notices of dew refer; for as it does not, in any perceptible degree, fall in summer, and as few would think of mentioning it in the season of rain, we may take all such notices to refer to the months of April, May, part of August, and September (Kitto, *Phys. Hist. of Palest.* p. ccci). See Seasons.

Dew, as consisting of innumerable drops, is put as the symbol of multitude (2 Sam. xvii, 12); thus, in Psa. cx, 3, *from the womb of the morning* shall be *to thee* the *dew of thy youths*, i. e. the youth of thy people, numerous and fresh as the drops of the morning dew, shall go forth to fight thy battles (comp. Mic. v, 6). It becomes a leading object in prophetic imagery by reason of its penetrating moisture without the apparent effort of rain (Deut. xxxii, 2; Job xxix, 19; Psa. cxxxiii, 3; Prov. xix, 12; Isa. xxvi, 19; Hos. xiv, 5; Mic. v, 7). It is mentioned as a token of exposure in the night (Cant. v, 2; Dan. iv, 15, 23, 25–33; v, 21). Also the morning dew is the symbol of something evanescent (Hos. vi, 4; xiii, 3). From its noiseless descent and refreshing influence, dew is sometimes made an emblem of brotherly love and harmony (Psa. cxxxiii, 3). See Rain.

De Wette. See Wette, De.

De Witt, John, D.D.; born at Kingston, N. Y., Dec. 15, 1788; the son of a worthy farmer; graduated at Nassau Hall, Princeton, N. J. 1809; began the study of the law, but, after his conversion, studied theology with Rev. Dr. Porter, of Catskill; was licensed in 1811 in the ministry of the Presbyterian Church; was first settled at Lanesboro, Mass., and in 1813 became a pastor in the Reformed Dutch Church, Albany, N. Y. After a very successful career as pastor, he was in 1823 elected professor of Biblical Criticism, Ecclesiastical History, and Pastoral Theology in the Theological Seminary of the Reformed Protestant Dutch Church at New Brunswick, N. J. This chair he filled with great acceptance until his death, which occurred Oct. 11, 1823, in the 42d year of his age. Dr. De Witt was a man of fine personal appearance, of a generous nature, of tender sympathy, of deep piety and religious earnestness. He was an eloquent and powerful preacher, a learned and successful professor. His manuscript sermons were of a high order. Of his productions in print we know only of a sermon in memory of the Rev. Dr. John H. Livingston, and one on

Regeneration. His early death blighted many hopes which his genius and eminent abilties had inspired.

Dexiolăbus. See Spearman.

Deyling, Salomon, a German theologian, was born Sept. 14, 1677, at Weida, in Voigtland. He struggled amid poverty to gain his elementary education, and completed his studies at the University of Wittenberg, where he became master in 1699. In 1703 he became adjunct in the faculty of philosophy, and in 1710 doctor in theology. In 1716 he was made general superintendent at Eisleben, in 1720 pastor in the Nicolaikirche at Leipsig, and during the rest of his life was professor of theology there. He died August 5, 1755. He wrote *Dissert. de corrupto Ecclesiæ Romanæ statu ante Lutherum*, etc. (Wittenberg, 1734, 4to); *Observationes Sacræ* (Leips. 1735–39, 3d edit. 5 vols. 4to), containing illustrations and critical remarks upon difficult parts of Scripture; also *Observationes Miscellaneæ* (Leips. 1736, 4to), on questions of exegesis and Church history; *Observationum Sacrarum pars v* (Leips. 1748, 4to). For a list of his writings (39 in number), see Doering, *Die gelehrten Theologen Deutschlands*, i, 322.

D'Holbach. See Holbach.

Diabŏlus, the Lat. form of the Gr. διάβολος, Engl. "devil," i. e. properly *an accuser, a calumniator*. We rarely meet with this word in versions of the Old Testament. Sometimes it answers to the Hebrew *Belial*, sometimes to *Satan*. The *Eblis* of the Mohammedans is the same with our *Lucifer;* and the name is similar to that of Diabolus. The Mussulmans call him likewise *Azazel*, which is the Scripture name for the scape-goat, and is probably the Azazel of the *Book of Enoch* (q. v.). They maintain that Eblis was called by this name, signifying *perdition*, or *refractory*, which is nearly the meaning of *Belial*, because, having received orders to prostrate himself before Adam, he would not comply, under pretence that, being of the superior nature of fire, he ought not to bend the knee to Adam, who was formed only of earth. Diabolus sometimes signifies the devil, as Wisd. ii, 24; sometimes an accuser, an adversary who prosecutes before the judges, as Psa. cix, 6; Eccles. xxi, 27. See Devil.

Diaconate, the office or order of a *deacon* (q. v.).

Diaconĭcum (*Gr.* and *Lat.*). This word has different significations in ecclesiastical authors. Sometimes it is taken for that part of the ancient church in which the deacons used to sit during the performance of divine service, namely, at the rails of the altar; sometimes for a building adjoining to the church, in which the sacred vessels and habits were laid up; sometimes for that part of the public prayers which the deacons pronounced. Lastly, it denotes an ecclesiastical book, in which are contained all things relating to the duty and office of a deacon, according to the rites of the Greek Church.

Diadem is the rendering of several Heb. words in the Auth. Vers. of the Bible: מִצְנֶפֶת (*mitsne'pheth*, something *wrapped around* the head), spoken of the tiara of a king ("diadem," Ezek. xxi, 26), elsewhere of the turban of the high-priest ("mitre"); צָנִיף (*tsaniph'*, something *wound about* the head), spoken of the turban of men ("diadem," Job xxix, 14), of women ("hood," Isa. iii, 23), of the high-priest ("mitre," Zech. iii, 5), and the tiara of a king ("diadem," Isa. lxii, 3, where the text reads צָנוֹף, *tsanuph'*), and צְפִירָה (*tsephirah'*, a *circlet*), spoken of a royal tiara ("diadem," Isa. xxviii, 5). See Head-dress. All these terms occur in poetical passages, in which neither the Hebrew nor the English words appear to be used with any special force, except the first. See Mitre. But in Greek the distinction between διάδημα (only Rev. xii, 3; xiii, 1; xix, 12), or *diadem*, as the badge of royalty, and στέφανος, or *crown*, as a conventional mark of distinction in private life, is carefully observed (see Trench, *Synonymes of the New Testament*, p. 112 sq.). See Turban.

Tetradrachm of Tigranes, king of Syria, with the Oriental *tiara* instead of the simple diadem of the earlier kings or Seleucidæ.

What the "diadem" of the Jews was we know not. That of other nations of antiquity was a fillet of silk, two inches broad, bound round the head and tied behind, the invention of which is attributed to Liber (Plin. *Hist. Nat.* vii, 56, 57). Its color was generally white (Tacitus, *Ann.* vi, 37; Sil. Ital. xvi, 241); sometimes, however, it was of blue, like that of Darius, *cærulea fascia albo distincta* (Q. Curt. iii, 3; vi, 20; Xenoph. *Cyr.* viii, 3, 13), and it was sown with pearls or other gems (Zech. ix, 16; Gibbon, i, 392), and enriched with gold (Rev. ix, 7, where, however, the text has στέφανος). It was peculiarly the mark of Oriental sovereigns (1 Macc. xiii, 32, τὸ διάδημα τῆς Ἀσίας), and hence the deep offence caused by the attempt of Cæsar to substitute it for the laurel crown appropriated to Roman emperors (Cicero, *Phil.* ii, 34); when some one crowned his statue with a laurel-wreath (*candida fascia prætigatam*), the tribunes instantly ordered the *fillet* or diadem to be removed and the man to be thrown into prison (Sueton. *Cæs.* 79). Caligula's wish to use it was considered an act of insanity (Sueton. *Cal.* 22). Heliogabalus only wore it in private. Antony assumed it in Egypt (Flor. iv, 11), but Diocletian (or, according to Aurel. Victor, Aurelian) first assumed it as a *badge* of the empire. Representations of it may be seen on the coins of any of the later emperors (Tillemont, *Hist. Imp.* iii, 531). A crown was used by the kings of Israel even in battle (2 Sam. i, 10; similarly it is represented on coins of Theodosius as *encircling* his helmet); but in all probability this was not the state crown (2 Sam. xii, 30), although used in the coronation of Joash (2 Kings xi, 12). Kitto supposes that the state crown may have been in the possession of Athaliah; but perhaps we ought not to lay any great stress on the word נֵזֶר in this place, especially as it is very likely that the state crown was kept in the Temple. In Esth. i, 11; ii, 17, we have כֶּתֶר (Sept. κίταρις, κίδαρις) for the turban (στολὴ βυσσίνη, vi, 8) worn by the Persian king, queen, or other eminent persons to whom it was conceded as a special favor (viii, 15, διάδημα βύσσινον πορφυροῦν). The diadem of the Persian king differed from that of others in having an *erect* triangular peak (κυρβασία, Aristoph. *Av.* 487; Suid.

Ancient Diadems.

1. Egyptian (Wilkinson's *Anc. Egypt.*); 2. Of Sardanapalus III (Assyrian Sculptures, Brit. Museum); 3. Persepolitan (Sir R. K. Porter's *Travels*); 4. Parthian (Coin of one of the Arsacidæ): 5. Jewelled, of Constantine (Coin in Brit. Mus.)

s. v. *τιάρα*; and Hesych.). Possibly the כְּרְבֹּלָא of Dan. iii, 21 is a tiara (as in Sept., where, however, Drusius and others *invert* the words *καὶ τιάραις καὶ περικνημῖσι*), A. V. "hat." Some render it by *tibiale* or *calceamentum*. Schleusner suggests that *κρώβυλος* may be derived from it. The tiara generally had pendent flaps falling on the shoulders. (See Paschalius, *de Corona*, p. 573; Brissonius, *de Regn. Pers.* etc.; Layard, ii, 320; Scacchus, *Myrothec.* iii, 38; Fabricius, *Bibl. Ant.* xiv, 13). The words סָרוּחֵי טְבוּלִים, "*exceeding in dyed attire* upon their heads," in Ezek. xxiii, 15, mean long and flowing turbans of gorgeous colors (Sept. *παράβαπτα*, where a better reading is *τιάραι βαπταί*). See CROWN.

DIADEM. See NIMBUS.

Diadŏchus, MARCUS, a Greek theologian, who probably lived in the 4th century. Nothing is known of him except that he was the author of a small work against the Arians, entitled Τοῦ μακαρίου τοῦ Διαδόχου κατὰ Ἀρειανῶν λόγος (*Beati Marci Diadochi Sermo contra Arianos*), and published by J. K. Wetstein as an appendix to his edition of Origen's *De Oratione* (Basel, 1694, 4to; reprinted, with a new Latin translation, in the *Bibliotheca Patrum* of Galland, vol. v). Some writers suppose that Diadochus was one of two Egyptian bishops by the name of Mark who were banished by the Arians during the patriarchate of George of Cappadocia, restored during the reign of Julian, and mentioned in a letter of Athanasius to the Antiochians as being present at the synod held at Alexandria in 362. According to the conjecture of Galland, Mark Diadochus was one of two bishops named Mark who were ordained priests by Alexander, the predecessor of Athanasius, and exiled by the Arians; the one to the great oasis (Upper Egypt), the other to the oasis of Ammon. It may be that these two Marks were the same as the two preceding ones.—Hoefer, *Biographie Générale*, xiv, 21.

Dial (מַעֲלוֹת, *maaloth'*; the plur. of an *ascent*, as it is sometimes rendered; Sept. *ἀναβαθμοί*, Vulg. *horologium*), a method of measuring time employed by Ahaz (2 Kings xx, 11; Isa. xxxviii, 8). The word is the same as that rendered "steps" in Exod. xx, 26; 1 Kings x, 19, and "degrees" in 2 Kings xx, 9, 10, 11; Isa. xxxviii, 8, where, to give a consistent rendering, we should read with the margin the "degrees" rather than the "dial" of Ahaz. In the absence of any materials for determining the shape and structure of the solar instrument, which certainly appears intended, most interpreters follow the most strictly natural meaning of the words, and consider, with Cyril of Alexandria and Jerome (*Comm. on Isa.* xxxviii, 8), that the *maaloth* were really stairs, and that the shadow (perhaps of some column or obelisk on the top) fell on a greater or smaller number of them according as the sun was low or high. The terrace of a palace might easily be thus ornamented. Dr. Adam Clarke, in his *Commentary* on 2 Kings xx, 10, 11, however, gives some ingenious illustrations, accompanied by a diagram, and others may be seen in Calmet's *Dictionary*, s. v. See DEGREE.

The invention of the sun-dial belongs most probably to the Babylonians. Herodotus affirms that the Greeks derived from them the pole (*πόλος*, supposed to mean the dial-plate), the gnomon, and the division of day into twelve parts (ii, 109). Vitruvius also ascribes the most ancient form of the dial, called hemicycle, to Berosus the Chaldæan (ix, 9), though he probably means no more than that he *introduced* it into *Greece*. Certainly those *Greeks* to whom Vitruvius ascribes inventions or improvements in dialling can all be proved to have had communication, more or less remote, with the Chaldæans. The first mention in Scripture of the "hour" is made by Daniel, at Babylon (ch. iii, 6), although it is possible that Psa. cii, 11, and cix, 23, may contain allusion to the progress of a shadow as measuring diurnal time. The Greeks used the dial before the Romans; and with regard to the Egyptians, "there are no indications in the sculptures to prove the epoch when the dial was first known in Egypt" (Wilkinson, *Anc. Egyptians*, iii, 342). It has been suggested that the חַמָּנִים, "*images*," of Isa. xvii, 8; xxvii, 9; Ezek. vi, 4, 6, rendered in the margin "sun-images," were gnomons to measure time (Jahn, *Archäol.* I, i, 539), but there seems no adequate ground for this theory. On the mode of regulating time among the Greeks and Romans, see Smith's *Dict. of Class. Ant.* s. v. Horologium. See TIME.

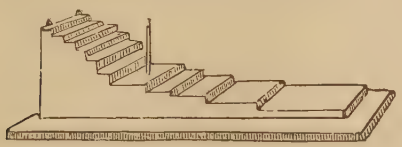
The circumstances connected with the dial of Ahaz (2 Kings xx, 11; Isa. xxxviii, 8), which is perhaps the earliest of which we have any clear mention, entirely concur with the derivation of gnomonics from the Babylonians. Ahaz had formed an alliance with Tiglathpileser, king of Assyria (2 Kings xvi, 7, 9); he was a man of taste, and was ready to adopt foreign improvements, as appears from his admiration of the altar at Damascus, and his introduction of a copy of it into Jerusalem (2 Kings xvi, 10). "The princes of Babylon sent unto him to inquire of the wonder that was done in the land" (2 Chron. xxxii, 31). Hence the dial also, which was called after his name, was probably an importation from Babylon. Different conjectures have been formed respecting the construction of this instrument. Grotius follows the Rabbins in describing it as "a concave hemisphere, with a globe in the midst, the shadow of which fell on the different lines engraven in the concavity of the hemisphere, these lines being twenty-eight in number." Mr. Taylor (in Calmet's *Dict.*) discovered some representations of ancient dials, one of which was found at Herculaneum, and was probably originally from Egypt, which he conceives to answer, in many respects, to the circumstances of the sacred narrative (see also Kitto, *Pict. Bible*, note on 2 Kings xx, 11). The subjoined figures seem to apply to the description of the dial of Berosus given by Vitruvius (ix, 9), "a half circle hol-

Ancient portable Sun-dials.

lowed into the stone, and the stone cut down to an angle." This kind of sun-dial was portable, and did not require to be constructed on or for a particular spot, to which it was subsequently confined, and, therefore, one ready-made might easily be brought on a camel from Babylon to Ahaz. If the instrument used in this instance were brought from Babylon, we see the reason why the king of Babylon was so peculiarly interested in the event (2 Kings xx, 12). See AHAZ.

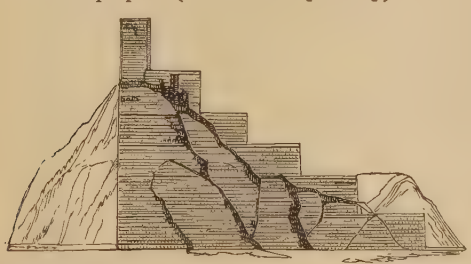
The chief difficulty in the case of the dial of Ahaz is to understand what is meant by the peculiar terms in which it is expressed, מַעֲלוֹת אָחָז, the *degrees* or *steps of Ahaz*. They *may* mean lines or figures on a dial-plate, or on a pavement, or the steps to the palace of Ahaz, or some steps or staircase he had erected else-

where (see Carpzov, *Apparat. Historic. Crit.* Lips. 1748, p. 352, etc.). The Sept. in Isaiah reads *ἀναβαθμοὺς τοῦ οἴκου τοῦ πατρός σου*, "the steps or stairs of the house of thy father." Josephus also says "steps or degrees in his house" (*Ant.* x, 2, 1). The Chaldee renders the passage in Kings, אֶבֶן שָׁעֲנָא, "hour-stone," and gives the same meaning to "the *stairs*" (2 Kings ix, 13), and renders Isa. xxxviii, 8, by בְּצוּרַת אֶבֶן שָׁעֲנָא, "on the shadow of the stone of hours." Symmachus most certainly understood a sun-dial; *στρέψω τὴν σκιὰν τῶν γραμμῶν ἡ κατέβη ἐν ὡρολογίῳ* Αχαζ, "I will cause to return the shadow of the degrees which (shadow) is gone down on the dial of Ahaz:" and so Jerome renders it *Horologium*. M. von Gumpach's opinion (*Zeitrechnung der Babylonier*, Heidelb. 1852, p. 25) is that it was an accurate and scientific apparatus, indicating the half hours by the coincidence of the shadow of the upright pole or gnomon with the edge of the several "degrees" or steps, somewhat in the manner of the subjoined figure. Mr.



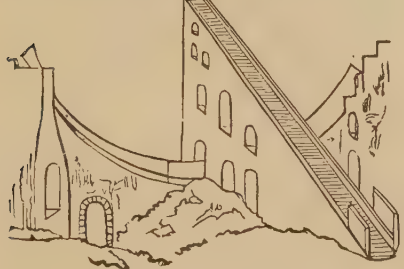
Supposed Form of the Dial of Ahaz.

Layard is favorable to the conjecture of Von Gumpach that it was a present to Ahaz from Tiglath-pileser; and he compares it with the presumed form of the tower of Belus, which may have been constructed in part for astronomical purposes (*Nin. and Bab.* p. 424 sq.). On the



Eastern Face of the Birs Nimroud, with proposed Restoration.

whole, however, the dial of Ahaz seems to have been a distinct contrivance rather than any part of a house. It would also seem probable, from the circumstances, that it was of such a size, and so placed, that Hezekiah, now convalescent (Isa. xxxviii, 21, 22), but not perfectly recovered, could witness the miracle from his chamber or pavilion. May it not have been situate "in the middle court" mentioned 2 Kings xx, 4? The cut given below presents a dial discovered in Hin-



Indian Sun-dial.

dostan, near Delhi, the ancient capital of the Mogul empire, whose construction would well suit the circumstances recorded of the dial of Ahaz. It seems to have answered the double purpose of an observatory and a dial—a rectangled hexangle, whose hypothenuse is a staircase, apparently parallel to the axis of the earth, and bisects a zone or coping of a wall, which wall connects the two terminating towers right and left. The coping itself is of a circular form, and accurately graduated to mark, by the shadow of the gnomon above, the sun's progress before and after noon; for when the sun is in the zenith, he shines directly on the staircase, and the shadow falls beyond the coping. A *flat surface on the top of the staircase*, and a gnomon, fitted the building for the purpose of an observatory. According to *the known laws of refraction*, a cloud or body of air of different density from the common atmosphere, interposed between the gnomon and the coping of the dial-plate below, would, if the cloud were denser than the atmosphere, cause the shadow to recede from the perpendicular height of the staircase, and, of course, to reascend the steps on the coping, by which it had before noon gone down; and if the cloud were rarer, a contrary effect would take place (see bishop Stock's *Transl. of Isaiah*, Bath, 1803, p. 109). Such a building might also be called "a house." It agrees also with Adam Clarke's supposition that "the *stairs*" were really "*a dial*," and probably this very dial, on which, as being in the most public place, or rather on the *platform* on the top of which they set Jehu, while they proclaimed him king by sound of trumpet" (*Commentary* at 2 Kings ix, 13). Bishop Stock's speculation that the retrogression of the shadow *might* be effected by refraction is supported by a natural phenomenon of the kind on record. On the 27th of March, 1703, P. Romauld, prior of the cloister of Metz, made the observation that, owing to such a refraction of the solar rays in the higher regions of the atmosphere, in connection with the appearance of a cloud, the shadow on his dial deviated an hour and a half (Rosenmüller). The phenomenon on the dial of Ahaz, however, was doubtless of a miraculous nature, even should such a *medium* of the miracle be admitted: nothing less than a divine communication could have enabled Isaiah to predict its occurrence at that time and place; besides, he gave the king his own choice whether the shadow should advance or retire ten degrees. There seems, however, to be no necessity for seeking *any* medium for this miracle, and certainly no necessity for supposing any actual interference with the revolution of the earth, or the position of the sun. In the more distinct and ample account of it in 2 Kings, it is simply said that the Lord, at the prayer of Isaiah, brought the *shadow* ten degrees backward. Adopting the present state of the text in the parallel passage, Isa. xxxviii, 8, it is observable that what is called the sun in one part of the verse is called the shadow in the other. It is certainly as philosophical to speak of the sun returning, as it is of his setting and rising. Thus the miracle, from all the accounts of it, might consist only of the retrogression of the shadow ten degrees, by a simple act of Almighty power, without any medium, or, at most, by that of refracting those rays only which fell upon the dial. It is not said that any time was lost to the inhabitants of the world at large; it was not even observed by the astronomers of Babylon, for the deputation came to inquire concerning the wonder that was done in the *land*. It was temporary, local, and confined to the observation of Hezekiah and his court, being designed chiefly for the satisfaction of that monarch. It is remarkable that no instrument for keeping time is mentioned in the Scripture before the dial of Ahaz (about B.C. 700); nor does it appear that the Jews generally, even after this period, divided their day into hours. The dial of Ahaz was probably an object only of curious recreation, or served at most to regulate the occupations of the palace. Mr. Bosanquet, in a curious paper read before the Asiatic Society, endeavors to make out a synchronism between the reigns of Hezekiah and the Assyrian kings by means of the astronomical event in question. He

shows that upon such steps as appear to have been used for exhibiting the sun's meridional altitude, any very large partial eclipse on the northern limb of the sun, occurring about ten days from the winter solstice, near the hour of noon, would produce the effect described in the instance under consideration; and he calculates that such an eclipse actually took place Jan. 11, B.C. 689, which he accordingly fixes upon as the date of the Scriptural incident (*Jour. Sac. Lit.* Oct. 1854, p. 217, 218). This, however, does not tally with the Hebrew chronology, nor is it sufficiently confirmed by other savans to be entitled to reception. See CHRONOLOGY.

Diamond occurs in the Auth. Vers. as the translation of two Heb. words. See GEM.

1. יַהֲלֹם (*yahalom'*, so called from *beating*, with allusion to its hardness), a precious gem, placed sixth in the breastplate of the high-priest, with the name of Naphtali carved on it (Exod. xxviii, 18; xxxix, 11), and mentioned by Ezekiel (xxviii, 13) among the precious stones of the king of Tyre. The Sept. and Vulg. understand by it the *jasper;* several of the ancient versions render it by *onyx*, which is not improbable; still others by *adamant*, which is less likely. There is much reason to doubt whether the diamond was known in the time of Moses (see below). Our translation "diamond" is derived from Aben Ezra, and is defended by Braun (*Vest. Sacerd.* ii, 13). Kalisch (on *Exod.* p. 536) says "perhaps emerald." See ONYX.

2. שָׁמִיר (*shamir'*, a sharp *point;* hence often a *brier*), a precious stone, named in Jer. xvii, 1; Ezek. iii, 9; Zech. vii, 12. The Sept. in Jeremiah, and the Vulg. in all the passages, take it for the *diamond*. The signification of the word (from שָׁמַר, to *pierce*) countenances this interpretation, the diamond being, for its hardness, used in perforating and cutting other minerals. Indeed, this use of the *shamir* is distinctly alluded to in the passage in Jeremiah, where the *stylus* pointed with it is distinguished from one of iron (comp. Pliny, *Hist. Nat.* xxxvii, 15). The two other passages also favor this view by using it figuratively to express the hardness and obduracy of the Israelites. Our version has "diamond" in Jer. xvii, 1, and "adamant" in the other texts. Bochart, however (*Hieroz.* iii, 843 sq.), rejects the usual explanation, and, comparing the word *shamir* with the Greek σμῖρις or σμύρις, conceives it to mean "*emery*." This is a calcined iron mixed with siliceous earth, occurring in livid scales of such hardness that in ancient times, as at present, it was used for polishing and engraving precious stones, diamonds excepted (Hoffmann, *Mineral.* i, 561 sq.). Bohlen suggests an Indian origin of the word, and compares *asmira, stone which eats*, spoken of gems, iron, etc. from their hardness. Rosenmüller is in favor of the diamond in his *Scholia*, but in his *Alterthumskunde* he takes up Bochart's notion, and urges that if the Hebrews had been acquainted with the diamond, and the manner of working it, we should doubtless have found it among the stones of the high-priest's breastplate; and that, as the *shamir* was not one of the stones thus employed, therefore it was not the diamond. But to this it may be replied that it was perhaps not used because it could not be engraved on, or was possibly not introduced until a later period. The argument drawn from the rarity of the word in the Old Testament is of little weight, and there is no necessity for seeking an Oriental origin of the word σμύρις, or ground for considering it identical with *shamir*, as it may easily be traced from the Greek itself (see Passow, s. v.; Eichhorn, *De Gemmis Sculpt. Hebr.*). For an account of the diamond of the ancients, see Moore's *Ancient Mineralogy*, p. 143–145. See ADAMANT.

The diamond is the hardest and most valuable of the precious stones, and for many ages was considered indestructible by fire or any other means; modern chemistry, however, has proved that at a heat rather below that required to melt silver it is gradually dissipated or burned. It is, in fact, nothing but pure *carbon*, but in a more highly crystallized state than coal. In former times, all the diamonds that were known were brought from different parts of India, particularly from the famous mine of Golconda, near Hyderabad, the present capital of the Deccan, in Hindostan; the islands of Molucca and Borneo have also produced many valuable stones. The diamond mines of Golconda are now so far exhausted as to be considered not worth the expense of working, and the diamonds which are brought to Europe come chiefly from Brazil. They are always found in an alluvial soil, generally gravel, resting on granite, and not imbedded in any other substance, but appear like small pebbles, with the surface flattened in many parts.

Dian'a. The *Artemis* of the Greeks (Ἄρτεμις, Acts xix, 24), and Diana of the Romans, is a goddess known under various modifications and with almost incompatible attributes. According to the Homeric accounts and Hesiod, she was the daughter of Jupiter and Latona, born at the same time with Apollo at Delos. As the tutelary divinity of Ephesus, in which character alone she concerns us here, she was undoubtedly a representative of the same power presiding over conception and birth which was adored in Palestine under the name of ASHTORETH. She is therefore related to all the cognate deities of that Asiatic Juno-Venus, and partakes, at least, of their connection with the *moon*. Creuzer has combined a number of testimonies in order to show how her worship was introduced into Ephesus from the coasts of the Black Sea, and endeavors to point out the several Medo-Persian, Egyptian, Libyan, Scythian, and Cretan elements of which she is compounded (*Symbolik*, ii, 115 sq.). The Arabic version of the Acts renders Artemis, in the chapter cited, by *Az-Zuharat*, which is the Arabic name for the planet Venus. From certain Ephesian coins which represent her seated upon her favorite deer, and in other rustic positions, it appears that she was identical with the virgin huntress of the earlier mythology, the grosser feature of her worship being apparently borrowed from association with the

Ephesian Medals of Diana.

voluptuous religions of the East. Guhl, indeed (*Ephesiaca*, p. 78–86), endeavors in almost all points to identify her with the true Greek goddess. In some respects there was doubtless a fusion of the two. Diana was the goddess of rivers, of pools, and of harbors, and these conditions are satisfied by the situation of the sanctuary at Ephesus. Coressus, one of the hills on which the city stood, is connected by Stephanus Byzantius with κόρη, "maid." We may also refer to the popular notion that, when the temple was burnt on the night of Alexander's birth, the calamity occurred because the goddess was absent in the character of Lucina. But the true Ephesian Diana is represent-

ed in a form entirely alien from Greek art (see Jerome, *Præfat. ad Ephes.* p. 539, ed. Ver.). Guhl indeed supposes this mode of representation to have reference simply to the fountains over which the goddess presided, conceiving the multiplication of breasts to be similar to the multiplication of eyes in Argus or of heads in Typhœus. But the correct view is undoubtedly that which treats this peculiar form as a symbol of the productive and nutritive powers of nature. This is the form under which the Ephesian Diana, so called for distinction, was always represented, wherever worshipped; and the worship extended to many places, such as Samos, Mitylene, Perga, Hierapolis, and Gortyna, to mention those only which occur in the N. T. or the Apocrypha. Josephus mentions a very rich fane of hers at Elymais in Persia (*Ant.* xii, 9, 1). Her most noted temple was at Ephesus. Here also, as in the temple of Apollo at Daphne, were the privileges of asylum. This is indicated on some of the coins of Ephesus (Akerman, in *Trans. of the Numismatic Soc.* 1841); and we find an interesting proof of the continuance of these privileges in imperial times in Tacit. *Ann.* iii, 61 (Srabo, xiv, 641; Pausan. vii, 2; Cicero, *Verr.* ii, 33). The temple had a large revenue from endowments of various kinds. It was also the public treasury of the city, and was regarded as the safest bank for private individuals. See Ephesus.

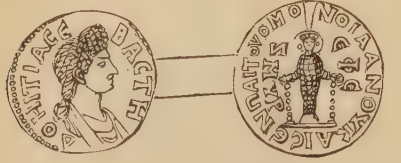
Her temple at Ephesus was one of the wonders of the world, but its great glory was the *διοπετὲς ἄγαλμα*, "the image which fell down from Jupiter" (Acts xix, 35). Images claiming so lofty an origin were to be found in other cities besides Ephesus. There was a similar one at the temple of the Tauric Diana, and another of Minerva, called the Palladium, at Troy. At Rome, too, was the sacred ancile or shield of Mars, which Numa pretended had fallen from heaven, and it was jealously guarded in consequence. The early images of Diana are supposed to have been simply black conical stones, and afford another reason for the semi-conical figure of the Ephesian Diana. They may have been *aerolites*, similar to the one which existed in the temple of the Sun at Baalbec, or the famous *black stone* in the Kaaba at Mecca. Her original Ephesian image, said to have fallen from heaven, was probably very rude, and, to judge from its representation on ancient coins, little more than a head with a shapeless trunk, supported by a staff on each side. There is some dispute as to the material of which her image was made. Most authorities say it was of ebony, the black color being, as Creuzer thinks, symbolical. Pliny relates that Mucianus, who had seen it, affirms that it was of the wood of the vine, and that it was so old that it had survived seven restorations of the temple (*Hist. Nat.* xvi, 79). According to Xenophon, it was of gold (*Anab.* v, 3). The later image with the full development of attributes, of which we give a representation below, is, as Creuzer says, a Pantheon of Asiatic and Egyptian deities. Even in it, however, we see how little influence Greek art had in modifying its antique rudeness. It still is more like a mummy than a Greek statue. Some of the most significant attributes in this figure are—the turreted head, like that of Cybele; the nimbus behind it representing the moon; the zodiacal signs of the bull, the twins, and the crab on her bosom; below them two garlands, one of flowers and the other of acorns; the numerous breasts; the lions, stags, and cows in various parts; the bees and flowers on the sides; and others described in Millin's *Galerie Mythol.* i, 26. See Shrine.

Ephesian Coin with Diana's Temple.

Image of the Ephesian Diana.

Of this heaven-descended image the great city Ephesus was a "worshipper," *νεωκόρος*, literally a "temple-sweeper," a title which was assumed by many cities as a mark of high distinction. There were, however, a class of men particularly called *νεωκόροι* (Xenoph. *Anab.* v, 3, 6), who were persons of rank and consideration, and to whom was assigned the duty of offering sacrifices on behalf of the emperor. Her priests were called Megabyzi, and were eunuchs (Strabo, xiv, 641). They were restricted to a severe diet, and prohibited from entering any private house; they must have been a wealthy body, for they sent a statue of gold to Artemidorus, who pleaded their cause at Rome, and rescued their property out of the hands of the farmers of the public revenues, who had seized upon them. Once in the year was there a public festival held in honor of the goddess in the city of Ephesus, and to this festival all the Ionians who could do so made a point of repairing with their wives and children, bringing with them not only costly offerings to Diana, but also rich presents for the priests. No arms were allowed to be worn in the precincts of her temple. No bloody sacrifices were offered. The symbol of this divinity was a bee (Aristoph. *Ran.* 1273), and her high-priest bore the name of king (*ἐσσήν*). Her worship was said to have been established at Ephesus by the Amazons (Pausan. ii, 7, 4; viii, 12, 1). See

Smith's *Dictionary of Classical Mythol.* s. v. Artemis; Diana.



Greek imperial Copper Coin of Ephesus and Smyrna allied, bearing on one side the title "Domitia," with the name of the proconsul, and on the other the figure and titles of Diana.

The cry of the mob (Acts xix, 28), "Great is Diana of the Ephesians!" and the strong expression in ver. 27, "whom all Asia and the world worshippeth," may be abundantly illustrated from a variety of sources. The term *μεγάλη, great*, was evidently a title of honor recognised as belonging to the Ephesian goddess. We find it in inscriptions (as in Boeckh, *Corp. Insc.* 2963, c.), and in Xenophon's *Ephesiaca*, i, 11. The name *Αρτεμις* itself, according to Clemens Alex. (*Stromata*, i, 384, ed. Pott.), is of Phrygian origin, and it may be connected with the Persic *Arte*, "excellent." As to the enthusiasm with which "all Asia" regarded this worship, independently of the fact that Ephesus was the capital of the province, we may refer to such passages as the following: *ὁ τῆς Ἀσίας ναός*, *Corp. Insc.* l. c.; "communiter a civitatibus Asiæ factum," Livy, i, 45; "tota Asia extruente," Pliny, xvi, 79; "factum a tota Asia," ib. xxxvi, 21. As to the notoriety of the worship throughout "the world," Pausanius tells us (iv, 31) that the Ephesian Diana was more honored privately than any other deity, which accounts for the large manufacture and wide-spread sale of the "silver shrines" mentioned by Luke (ver. 24), and not by him only. This specific worship was publicly adopted also, as we have seen, in various and distant places; nor ought we to omit the games celebrated at Ephesus in connection with it, or the treaties made with other cities on this half religious, half political basis. See the treatises *De Diana Ephesia*, by Aspach (Hafn. 1694), Nessel (Aboæ, 1708), Polcke (Lips. 1718), Schulin (Viteb. 1687); also Wilisch, *De vaïδιοις veterum* (Lips. 1717); Siber, *De voce διοπετής* (Viteb. 1686); Syling, *De νεωκόροις* (Rost. 1702). For the magical arts practised there (Acts xix, 19), see Sorcery.

Dias, Manoel, a Portuguese missionary, was born at Alpalham in 1559. He entered the order of the Jesuits in 1576, and was, in 1585, sent as missionary to India. The vessel in which he sailed was wrecked in the Mozambique Channel, and only two, Dias and Pierre Martins, bishop of Japan, escaped. They reached, after many dangers, the coast of Sofala, where they were enslaved for the term of one year. After their liberation they reached Goa. Dias labored as a missionary first in that city, subsequently at Tana, Chaul, and in China. In the latter country he traversed for three years, as "visitor" of his order, most of the provinces. He was then for some time at the head of the seminary of Macao, which he left in order to take charge of the mission of Nankin. In the latter years of his life he was visitor-general of China and Japan. He died at Macao July 10, 1639. He published a *Carta escrita de Pekim em* 1602, and *Litteræ Annuæ* for each of the years from 1618 to 1625 (Rome, 1629).—Hoefer, *Biog. Générale*, xiv, 45.

Dias, Manoel, a second Portuguese missionary and Jesuit of this name, a nephew of the preceding one, was born in 1590 at Alpalham. He entered the order of Jesuits at Evora in 1608, and in 1614 set out for Malabar as a missionary. After being for some time rector of the seminary of St. Thomas, Dias, together with father Joao Cabral, penetrated into Thibet, a country which was at that time almost entirely unknown. Dias died on the journey, exhausted by fatigues, Nov. 13, 1630.—Hoefer, *Biographie Générale*, xiv, 46.

Dias, Manoel, a third Portuguese missionary of the name, was born at Castello-Branco in 1574. He entered the order of the Jesuits in 1592, and was sent as missionary to China in 1601. He was in succession professor of theology at Macao, vice-provincial, and visitor-general of the Jesuit missions in China and Japan. He traversed nearly the whole of the Chinese empire, and died March 7, 1659, at the age of 85 years, of which 58 had been spent in China. Dias wrote a number of works in the Chinese language, the most important of which is a collection of sermons, in twelve volumes.—Hoefer, *Biographie Générale*, xiv, 47.

Diaspora, the title of the governing body in the Moravian brothers' Church. See Moravian.

DIASPORA. See Dispersed (Jews).

Diataxeis (*διατάξεις*), a word anciently used for liturgies, or forms of prayer. Gregory Nazianzen calls the liturgy of St. Basil, composed by the direction of his bishop while he was presbyter of Cesarea, *εὐχῶν διατάξεις, the order of prayers;* and those forms and orders of divine worship collected by the author of the Apostolical Constitutions were styled *διατάξεις*. —Bingham, *Orig. Eccles.* bk. xiii, ch. i, § 9.

Diatessaron, in Biblical literature, a harmony of the four Gospels. See Harmony; Tatian.

Diaz, Francisco, a Spanish missionary, was born at S. Cebrian de Mayuelas, in old Castile. After entering the Dominican order, he was, in 1632, sent as a missionary to the Philippine Islands. In 1635 he went to China, where he labored as a missionary in several provinces. In consequence of his zeal he had often to suffer from persecution, and finally was killed by the throwing of a stone, Nov. 4, 1646. He wrote a number of works in the Chinese language, the most celebrated of which is a catechism (*Ky-Mung*, published in 1650, and in many subsequent editions). He is also the author of a Chinese-Spanish dictionary, which contains 7160 Chinese characters.—Hoefer, *Biographie Générale*, xiv, 56.

Diaz, Pedro, a Spanish missionary, was born at Lupiona, near Toledo, in 1546. He entered the order of the Jesuits in 1566, and was, in 1572, one of the first Roman Catholic missionaries who were sent to Mexico. He twice went to Rome as a delegate of his order, and died as prefect of the Jesuits for the province of Mexico, in the city of Mexico, Jan. 12, 1633. He wrote *Littera de Missionibus per Indiam occidentalem ab Jesuitis* (from 1591 to 1610), and *Epistolæ de* 52 *Jesuitis interfectis in Brasilia* (Antwerp, 1605, 8vo).—Hoefer, *Biographie Générale*, xiv, 55.

Dibdin, Thomas F., D.D., a noted bibliographer, was born at Calcutta in 1776. He was educated at St. John's College, Cambridge, and studied law, but afterwards changed his views, and was ordained in 1804. He then became preacher of Tenison's chapel, London; also of Brompton chapel, and Quebec and Fitzroy chapel. In 1823 he became vicar of Exning, and rector of St. Mary's, Bryanstone Square, in 1824. He died in 1848. His principal works are, *An Introduction to the Knowledge of rare and valuable Editions of the Greek and Latin Classics, together with an Account of Polyglot Bibles, Polyglot Psalters, Hebrew Bibles, Greek Bibles and Greek Testaments, the Greek Fathers and the Latin Fathers* (Lond. 1827, 4th ed. 2 vols. 8vo); *Bibliomania, or Book-madness* (Lond. 1842, royal 8vo); *The Library Companion* (Lond. 1824, 8vo); *Sermons, doctrinal and practical* (Lond. 1820, 8vo); etc.—Darling, *Cyclopædia Bibliographica*, s. v.; *English Cyclopædia*, s. v.

Diblah. See Diblath.

Dib'laïm (Hebrew, *Dibla'yim*, דִּבְלַיִם, *two* round

cakes, e. g. of dried figs pressed together into a mass, as in **1** Sam. xxv, 18; but according to Fürst, *Heb. Handw.* s. v., *double coition;* Sept. Δεβηλαείμ v. r. Δεβηλαΐμ), the name of the father of Hosea's meretricious wife (Hos. i, 3). B.C. ante 725.

Dib'lath (Hebrew, with ה directive, *Dibla'thah*, דִּבְלָתָה, "towards Diblath," or rather *towards Diblah;* Sept. Δεβλαθά; Vulg. *Deblatha*), a place mentioned as contiguous to a desert of the kingdom of Israel (Ezek. vi, 14), where, instead of דִּבְלָה, i. e. *Diblah*, the text ought probably (see DIBLATHAIM) to read רִבְלָה, RIBLAH (q. v.).

Diblatha'im (Heb. *Diblatha'yim*, דִּבְלָתַיִם, *two cakes* [see DIBLAIM], probably so called from the shape of the city, on two low knolls), a place mentioned in the combined names ALMON-DIBLATHAIM (Num. xxxiii, 46) and BETH-DIBLATHAIM (Jer. xlviii, 22), which probably refer to the same city of Moab. Eusebius and Jerome (*Onomast.* s. v. Ἰεσσά, Jassa), in speaking of Jahaza, say, "it is still shown between Medaba and *Deblatai* (Δηβούς)." The name suggests an identity with the DIBLATH, or rather *Diblah*, of Ezek. vi, 14, the location of which the context does not altogether forbid, were it certain that this is the correct reading in that passage. As that place is spoken of as situated at the other extremity of the land from a "wilderness" or *midbar*, a term frequently used for the nomad country on the south and south-east of Palestine, it is natural to infer that Diblah was in the north. To this position Beth-diblathaim or Almon-diblathaim, in Moab, on the east of the Dead Sea, are obviously unsuitable; and, indeed, a place which, like Diblathaim, was on the extreme east border of Moab, and never included even in the allotments of Reuben or Gad, could hardly be chosen as a landmark of the boundary of Israel. The only name in the north at all like it is RIBLAH (q. v.), and the letters D (ד) and R (ר) are so much alike, and so frequently interchanged, owing to the carelessness of copyists, that there is a strong probability that Riblah is the right reading. The conjecture is due to Jerome (*Comm. in loc.*), but it has been endorsed by Michaelis, Gesenius (*Thesaur.* p. 312), and other scholars (see Davidson, *Heb. Text*, Ezek. vi, 14). Riblah, though an old town, is not heard of during the early and middle course of Jewish history, but shortly before the date of Ezekiel's prophecy it had started into a terrible prominence from its being the scene of the cruelties inflicted on the last king of Judah, and of the massacres of the priests and chief men of Jerusalem perpetrated there by order of the king of Babylon.

Di'bon (Heb. *Dibon'*, דִּיבֹן, a *pining*, Gesen.; or *river-place*, Fürst; Sept. Δεβών, but Δαιβών in Num. xxi, 30, Neh. and Jer.; Διβών in Josh., Δηβών in Isa.), the name of two cities.

1. A city, originally of the Moabites, on the northern bank of the Arnon, at the point where the Israelites crossed that river on their journey to the Jordan, and where their first encampment was made after having passed it (Num. xxi, 30; xxxii, 3). It is called also DIBON-GAD (Num. xxxiii, 45), probably from its having been rebuilt by the tribe of that name (Num. xxxii, 34), although it was afterwards assigned to the tribe of Reuben (Josh. xiii, 9, 17). In later times we find it, with other towns in this quarter, in the hands of the Moabites (Jer. xlviii, 18, 22). Eusebius and Jerome erroneously distinguish the Dibon of Moab from that where the Israelites encamped, and they describe the former as still a very large village near the Arnon (*Onomast.* s. v. Δαβών, Debon). The site has been recognised by Seetzen, Burckhardt (*Syria*, p. 372), and Irby and Mangles (*Trav.* p. 642), at a place which bears the name of *Dibân*, in a low tract of the district called the Koura, about three miles north of the Arnon (Mojeb). The ruins are here extensive, but offer nothing of interest. By an interchange of kindred letters, it is once called DIMON (Isa. xv, 9), and is there spoken of as occupying an elevated situation (ver. 2).

2. A city in the tribe of Judah, inhabited after the captivity (Neh. xi, 25). It is apparently the same called DIMONAH (q. v.) in Josh. xv, 22. Schwarz says it is "the village of *Dir-Dibon*, 5 Eng. miles N. of Bet-Jibrin" (*Palest.* p. 116), meaning *Deir-Dubban* (Robinson, *Res.* ii, 353, 421); but this position does not agree with the associated localities. The site is probably (Knobel, in loc. Jos.) the modern *Ed-Dheib*, a place on the south side of a shallow wady by the same name, a short distance north-east of Tell-Arad (Van de Velde, *Memoir*, p. 252), marked by "rude foundations and walls" (Robinson, *Researches*, ii, 473).

Di'bon-gad (Heb. *Dibon'-Gad*, דִּיבֹן גָּד, *Dibon of Gad;* Sept. Δεβών [v. r. Δαιβών] Γάδ, Vulg. *Dibongad*), one of the halting-places of the Israelites on their way to Canaan, between Ije-abarim and Almon-diblathaim (Num. xxxiii, 45, 46); probably the same with the DIBON (q. v.) of Num. xxi, 30.

Dibrell, ANTHONY, a minister of the Methodist Episcopal Church South. Dates of his early life are wanting. He spent some time at the University of North Carolina, where he studied law, but after his conversion his mind was turned to the ministry, and he joined the Virginia Conference in 1830. Having labored with much success on several circuits and stations, he was made presiding elder, and was successively a member of the Louisville Convention, and of the General Conferences at Petersburg, Va., St. Louis, and Columbus, Ga. His last appointment was to Norfolk, Va., where he signalized his piety and love by his courageous devotion to his calling and flock during the fearful ravages of the yellow fever, to which he fell a victim, Sept. 1, 1855. As a preacher he excelled. His sermons were well prepared, exhibited compass and grasp of thought, and were delivered in a most impressive and commanding style.—*Annals of Southern Methodism*, 1855, p. 341.

Dib'ri (Heb. *Dibri'*, דִּבְרִי; perhaps *eloquent;* but according to Fürst, *rustic;* Sept. Δαβρί, Vulg. *Dabri*), a Danite, father of Shelomith and grandfather of the blasphemer who was put to death by Moses (Lev. xxiv, 11). B.C. considerably ante 1619.

Dick, John, D.D., a Scotch preacher and theologian of eminence, was born at Aberdeen Oct. 10, 1764, and was educated at King's College, where he passed A.M. in 1781. In 1788 he became minister of the Secession church in Slateford, but was transferred to Glasgow in 1801. In 1820 he was appointed professor of theology in the United Secession Church, but still retained his pastoral office. He died Jan. 25, 1833. His principal writings are *Lectures on Theology* (Edinb. 1838, 4th ed. 4 vols. 8vo):—*Essay on Inspiration* (Glasgow, 1813, 3d ed. 8vo):—*Lectures on Acts* (Glasgow, 1848, 3d ed. 8vo; N. York, Carters, 8vo). See Jamieson, *Cyclopædia of Biography*, p. 158.

Dick, Thomas, LL.D., was born in 1772 or 1774, near Dundee, Scotland, and was educated at the University of Edinburgh with a view to the ministry in connection with the Secession Church. After a brief pastoral charge at Stirling he devoted himself to literature; but, although his productions obtained a great popularity both in England and America, they brought him very little pecuniary return. Towards the close of his life a small pension was granted him in consideration of his literary services. He died at Broughty Ferry, near Dundee, July 29, 1857. His principal works are *The Christian Philosopher* (1823):—*The Philosophy of Religion* (1825):—*The Philosophy of a Future State* (1828):—*Celestial Scenery* (1838):—*The Sidereal Heavens* (1840), and *The Practical Astronomer* (1845).

Several of his writings have been translated into other languages; one even into Chinese. In a scientific point of view, his writings are of no great value.

Dickey, John McElroy, a Presbyterian minister, was born in York District, S. C., Dec. 16, 1789. After overcoming many difficulties, he completed his theological studies, was licensed in 1814, and became minister of White River church, near Washington, Davis County, Ind. When ordained in 1817 he joined the Salem Presbytery, and devoted much time as a voluntary missionary to destitute places. In 1819 he removed to Lexington, Scott County, supplied the church of Graham, and was installed over Pisgah and Lexington. He subsequently visited the valley of the Wabash and the central part of Indiana, where he organized three churches. From 1835 his labors were confined, with little exception, to the Pisgah church, which his health obliged him to resign in 1847, when he became an agent for the American Tract Society. He died Nov. 21, 1849. He published *A History of the Presbyterian Church, Indiana* (1828), and *A Series of Letters* addressed to his friends.—Sprague, *Annals*, iv, 514.

Dickey, William, a Presbyterian minister, was born Dec. 6, 1774, in York County, S. C. His parents soon after removed to Kentucky, where he grew to manhood. He obtained an education with much self-denial, and in 1802 was licensed to preach. He labored fourteen years with the churches of Salem and Bethany, Ky., and then removed to Washington, Lafayette County, Ohio, and soon after to Bloomingburg, Ohio, where he remained forty years. He died in December, 1857.—Wilson, *Presbyterian Hist. Almanac*, 1864, p. 112.

Dickins, John, a distinguished preacher of the Methodist Episcopal Church, was born in London 1746. He studied at Eton College; emigrated to America before the Revolution; became a Methodist in 1774; preached extensively in Virginia and North Carolina from 1777 till 1782, when he located, but continued his ministerial labors diligently in Virginia. Bishop Asbury met him there in 1780, when Dickins framed a subscription paper for a seminary, on the plan of Wesley's Kingswood School, the first project of a literary institution among American Methodists. It resulted in Cokesbury College. At the close of the war Asbury induced him to go to New York, where he took charge of John-street Church, the first married preacher who occupied its parsonage. His labors were successful in gathering together the fragments of the Church, seriously broken by the recent war. Dickins was here the first American preacher to receive bishop Coke, and approve Wesley's scheme of the organization of the denomination. He had an important agency in that work. In 1785 he travelled Bertie Circuit, Va. He was reappointed to New York in 1786, '87, '88. In 1789 he was stationed in Philadelphia, and there began one of the greatest institutions of American Methodism, its "Book Concern;" there also he died in the memorable outbreak of the yellow fever Sept. 27, 1798. He was one of the soundest minds and ablest preachers of early Methodism; a good scholar in English, Latin, Greek, Hebrew, and mathematics; an influential counsellor, and a mighty preacher.—Stevens's *Hist. of the Meth. Episc. Church*, vol. ii, iii, and iv, passim; *Minutes of Conferences*, i, 179.

Dickinson, Austin, a Congregational minister, was born at Amherst, Mass., Feb. 15, 1791. He graduated at Dartmouth 1813; studied theology at Princeton; was admitted to the ministry Feb. 2, 1819, and travelled south for his health. He came North in 1822, and became agent for Amherst College, and was very efficient and successful. "Besides being largely successful in raising the charity fund of $50,000, which has been a source of permanent prosperity to the college, and $30,000 for general purposes, he exerted as much influence as any other man in obtaining a charter for the college" (Sprague). In 1826 he started the "National Preacher" in New York, and was its editor until 1838. In 1844 he began writing religious articles for the secular press, and continued at this useful task until the end of his life, Aug. 14, 1849.—Sprague, *Annals*, ii, 674.

Dickinson, Jonathan, D.D., a Presbyterian minister and President of Princeton College, was born at Hatfield, Mass., April 22, 1688, and graduated at Yale 1706. After being engaged for some time in the study of theology, he was licensed and ordained in 1709. His field of labor embraced Elizabethtown, Rahway, Westfield, Connecticut Farms, Springfield, and Chatham, N. J. In 1717 he joined the Philadelphia Presbytery, where he continued to exercise his ministry for nearly forty years. In the great Whitefieldian revival he stood up firmly in defence of the genuineness of the work, and on one occasion at least Whitefield is known to have preached in his parish to an immense congregation. Still he had no sympathy with the prevailing fanatical tendencies of the time, and manifested the utmost caution in discriminating between a true and false religious experience. He published a tract bearing on this subject, written with great vigor and discrimination. After the division of the Presbyterian Church in 1741 into the Synods of New York and Philadelphia, each synod was intent on making provision to train up young men for the ministry. Dickinson was the acknowledged leader of the Synod of New York, as he had been of the old Synod of Philadelphia before the separation, and he is supposed to have had a primary influence in originating the College of New Jersey. A charter for a college having been obtained from the acting governor of the colony, the institution, which took the name of Nassau Hall, went into operation, with Jonathan Dickinson as its president, though, in taking upon himself this new office, he did not relinquish any of his duties as a pastor. It did not commence its operations till 1746, and his death occurred on the 7th of October, 1747. His publications include *A Defence of Presbyterian Ordination* (1724); *Four Sermons on the Reasonableness of Christianity* (1732); *Five Discourses on Points of Christian Faith*, etc. (1741); *A Display of God's special Grace* (1742); *Reflections on Regeneration, with a Vindication of the received Doctrine* (1745); *A Vindication of God's sovereign free Grace* (1746); *A second Vindication*, etc. (1748); and several detached sermons.—Sprague, *Annals*, iii, 14.

Dickinson, Peard, an English Wesleyan minister, was born at Topsham, Devonshire, Nov. 16, 1758. He received a careful training from a well-educated father, and in 1775 went to Bristol, where he soon joined a Methodist society. He entered Oxford as commoner of St. Edmund Hall in 1779, passed A.B. in 1782, and A.M. in 1785. In 1783 he was ordained in the Church of England, and became curate to Perronet (q. v.) at Shoreham. In 1786 he went to London as pastor of one of Mr. Wesley's societies, and continued to reside there in charge of various societies during the rest of his life. He died May 15, 1802. He was a man of great learning, and especially an excellent linguist. His researches in the early writings of Christianity were very thorough. He was a useful and beloved pastor, an intimate friend of the Wesleys, and a sort of intermediate link between the Church of England and Wesleyan Methodism.—Smith, *History of Wesleyan Methodism*, i, 574; Jackson, *Christian Biography;* Stevens, *History of Methodism*, ii, 315.

Dickson, David, an eminent Scotch divine, was born at Glasgow in 1583, and educated at the University of Edinburgh, in which he afterwards became professor of Philosophy. Having been appointed minister of Irvine in 1618, he became a very popular preacher. In 1643 he became professor of Divinity in the

University of Glasgow, and afterwards in that of Edinburgh. He was ejected at the Restoration in 1662, and died the same year. He was considered one of the ablest and most useful men of his time, and his works continue to be esteemed, particularly his commentaries, which, though brief, have much point and condensation. Dickson's name will ever be remembered for his version of the hymn *O Mother dear Jerusalem* (see HYMNOLOGY). His principal works are, *A brief Exposition of the Gospel according to Matthew* (Lond. 1651, 12mo); *A short Explanation of the Epistle to the Hebrews* (Aber. 1635, sm. 8vo; Lond. 1839, royal 8vo); *Expositio analytica omnium apostolicarum epistolarum* (Glasgow, 1645, 4to; *A brief Explication of the Psalms* (Lond. 1655, 3 vols. 8vo; Glasg. 1834, 2 vols. 12mo); *Therapeutica sacra* (Edin. 1656, 8vo); *Therapeutica sacra, translated by the Author* (2d edit. Edinb. 1697, 8vo); *Truth's Victory over Error* (Glasg. 1772, 12mo).—Hetherington, *Ch. of Scotland*, vol. i; M'Crie, *Sketches of Ch. Hist.* i, 196; ii, 61.

Dictates of Pope Gregory (*Dictatus papæ, Dictatus Gregorii VII, Dictatus Hildebrandini*), a title given to twenty-seven theses, in which Gregory VII (Hildebrand) is said to have set forth the grounds and principles of the supremacy and power of the pope in relation to the Church and to secular governments. They are contained in lib. ii of his letters, between the 55th and the 56th epistles, and also in Harduin, *Concil.* tom. vi, p. i, p. 1304 sq. "Baronius, ann. 1076, no. 31, and Christ. Lupus, in *Notis et Dissertt.*, consider these genuine; the French writers, Jo. Launoius, *Epistol.* lib. vi, ep. 13, Anton. Pagi, *crit. in Baron.* l. c., and especially Natalis Alexander, *Hist. Eccl.* sæc. xi et xii, dissert. iii, set them down, not indeed as spurious, but as really inconsistent with Gregory's principles. The more modern authorities, following Mosheim, suppose them to express Gregory's principles, though written by some one else. They seem to have been an Index Capitulorum of some synod held under Gregory's influence" (Gieseler, *Ch. Hist.* div. iii, § 47). The dictates themselves are as follows: 1. The Roman Church was founded by the Lord alone. 2. The bishop of Rome only is properly termed the universal bishop. 3. He only can appoint or depose a bishop. 4. The papal legate has the right to preside in all Church assemblies, even though he is not the equal in rank of the bishops, and he may pronounce sentence of deposition upon them. 5. The pope may deprive absent bishops also of their rank. 6. No person is permitted to occupy the same house with a person excommunicated by the pope. 7. The pope only is qualified to issue new laws whenever circumstances demand it, to organize new congregations, to change a cathedral into an abbey, to divide a rich see, or to contract several impoverished sees into one. 8. He only has power to make use of the imperial insignia. 9. Princes must kiss the feet of the pope only. 10. Only his name is to be recited in the churches. 11. The name and title of pope apply to one person only. 12. He is empowered to depose the emperor. 13. He may translate bishops from one see to another. 14. He can ordain the clergymen of all churches. 15. A clergyman that has been ordained by him may serve with other churches, but no other bishop has the right to appoint him to a superior position. 16. The pope only has power to pronounce a council œcumenical. 17. No chapter nor book of the holy Scriptures may be declared canonical without his sanction. 18. No person can overthrow his decisions; but he, on the other hand, may subvert the judgments of all men. 19. No person can judge him. 20. None may dare to condemn him who appeals to the apostolical chair. 21. All matters of consequence in any church must be reported to him. 22. The Romish Church has never erred, and, according to the testimony of the holy Scriptures, will not err to all eternity. 23. If the pope was canonically elected (i. e. according to the rules of the Church), he infallibly becomes a holy man, through the merits of St. Peter. 24. Inferiors (subjects) may complain of their superiors with the permission of the pope. 25. The pope may depose a bishop, and reappoint him, without convoking a synod. 26. One who is not agreed with the Romish Church does not belong to the Catholic (orthodox) Church. 27. The pope may release subjects from their fealty to wicked rulers. (The original Latin is given in Gieseler, *Church History*, div. iii, § 47).

Dictionaries, BIBLICAL. The term *dictionary* is the most general one for designating an alphabetical arrangement of words with copious explanations attached, whereas *vocabulary* (Latin *vocabulum*) denotes a simple list of words with brief definitions; while a *lexicon*, on the one hand, is an etymological and grammatical exhibit of the words of a (usually foreign) language, and *Encyclopædia* (ἐν κύκλῳ παιδεία, *instruction in a* complete *circle*) is properly a series (whether alphabetical or otherwise) of treatises embracing the whole range of a science by topics (*Crabbe's English Synonymes*). This last word is used by English authors specially as a title of works covering the entire compass of human knowledge, arranged alphabetically under leading heads, and has thence been sometimes applied, in a more limited sense, to similar works on one or more branches of science. The term *Cyclopædia*, however, is now generally recognised as more distinctively applicable to books of this class (see *History of Cyclopædias*, in the *Lond. Quart. Rev.* April, 1863). In order to entitle it justly to the rank of either of these latter appellations, a work should contain the *literature* of the subjects of which it treats. Finally, a *glossary* is an elucidation of obscure or obsolete words occurring in a particular author or class of writers; *thesaurus* is applied to a collection of learned dissertations, and also to an extensive lexicon, both being usually written in Latin; *bibliotheca* is applied to bibliographical works, and also to collective editions, e. g. *Bibliotheca Patrum*.

The first production of this kind, relating to the Bible, of which we have any definite knowledge, aside from those purely lexical, was the *Onomasticon* of Eusebius, edited and translated by Jerome, which, however, was merely geographical, and embraced Palestine only. It has been of great service, nevertheless, to all writers since on Biblical topography. Jerome likewise prepared a treatise of less value on the Hebrew proper names occurring in the Scriptures (*De Nominibus Hebraicis*, in vol. iii of his works, No. 15) chiefly from materials previously afforded by Philo Judæus and Origen; likewise the biographies of eminent early Christians (*De Viris Illustribus*, vol. ii, pt. ii of his works). After this, however, no work worthy of note belonging to the class we are considering appeared till the renewal of Biblical learning after the Reformation. The following are those of leading importance and celebrity.

(1.) Aug. Calmet (q. v.), *Dictionnaire Historique, Critique, Chronologique, Géographique, et Littérale de la Bible* (Paris, 1722, 2 vols., and [most complete] 1730, 4 vols. fol.). "This work was composed in a great degree out of the materials already used by the author in the notes, dissertations, and prefaces of his great work, the *Commentaire Littérale*. The first translation of it appeared in 1732, in three large and costly folio volumes, executed by two clergymen, Samuel d'Oyley and John Colson, the former of whom translated to the letter M, and the other to the end of the book. This translation formed the great treasury from which were drawn the materials of the large number of lesser dictionaries of the Bible which subsequently appeared. These exhibited little more diversity from each other than such as naturally arises where persons of different habits of mind form different abridgments of the same work, the original or new matter being chiefly constituted by the interspersion of doctrinal articles in support of the particular views which the com-

piler entertained. At length a new edition of Calmet was undertaken by Mr. Charles Taylor, and appeared in 1795 in four, and in later editions in five, quarto volumes. This was a very eccentric performance, composed thus: two volumes consisted of *an abridgment* of Calmet, one volume of engravings, and two volumes of 'Fragments.' These fragments contained a sprinkling of useful matter drawn from histories and travels; but three fourths of the whole consist of singularly wild and fanciful speculations respecting mythology, ethnology, natural history, antiquities, and sundry other matters, and are replete with unsound learning, outrageous etymologies, and the vagaries of an undisciplined intellect. Calmet, thus transformed, and containing as much of the editor as of the original author, has in its turn formed the basis of nearly all the Biblical dictionaries which have since appeared, including a very painstaking digest of the more useful parts of Taylor's matter incorporated with the dictionary under one alphabet, the whole abridged into one volume royal 8vo, which appeared in 1832. This work was in the same year reproduced in Boston, under the supervision of Dr. E. Robinson, who made some few but valuable additions to particular articles" (Kitto). Calmet's own dictionary is still a standard work with Roman Catholics, and a modified edition of it is incorporated into the extensive series of *Dictionaires Chrétiennes* lately published by the Abbé Migne at Paris. It never was a profound work, however, and has now so far fallen behind the progress of Biblical science as to be of little use to the student beyond mere textual purposes.

(2.) Although the work of Calmet was the most learned and practically useful of all similar productions that had hitherto appeared, yet the partial standpoint of the author rendered it unsuited to the enlarged demands of the present age, which, with the superficiality and want of plan in later works, had brought performances of this kind into some disrepute; and it was reserved for Dr. G. B. Winer (q. v.), a learned theologian of Leipsic, to restore them to their former credit by his *Biblisches Real-wörterbuch* (Leipz. 1820, 2 vols. 8vo), of which a second and improved edition was published in 1833–38, and a third, still further enlarged, in 1848. This is a wholly original work, executed in the most careful and scholarly manner, and nearly exhaustive, although in a very condensed form, of the classical and earlier modern illustrations of Biblical topics. It is a masterly performance of its kind, and has been of very great service in the compilation of the present Cyclopædia. "The sphere of Winer's work is, however, narrowly drawn, being designed altogether for students. The critical treatment in it is of a very unequal character, and many of the subjects examined in its pages, especially in the department of natural history, have little relation to the Bible." Similar publications by various other writers have been produced on the Continent of Europe, but they cannot be regarded as exhibiting equal claims to scientific criticism or well-considered arrangement. Several of these will be noticed below.

(3.) A great advance on all predecessors, constituting, it may be said, a new era in the history of the subject, is marked by the appearance (Edinb. 1845, 2 vols. 8vo) of the *Cyclopædia of Biblical Literature*, edited by John Kitto, D.D. (q. v.), chiefly from the contributions of original articles by forty writers, including many of the most eminent theologians and Biblical scholars of Protestantism in Great Britain, Germany, and America; a duplicate edition was also issued in this country (N. Y. 1852). This work not only covers a larger range of topics connected with the Bible, in its archæology and introduction, but also handles each subject with a freshness and ability previously unattempted. In the biography of Biblical characters, a department mostly occupied by the editor himself, the narratives are invested with an interest like modern history. The geography and history of the Bible are fundamentally investigated anew. The details of Biblical criticism are given with clearness, accuracy, and considerable copiousness. For the first (and we may almost say the only) time, the difficulties of the natural history of the Bible are here vigorously grappled with by persons (Dr. Royle in the department of Oriental botany, and Col. C. Hamilton Smith in that of Biblical zoology) competent in modern science to throw light upon them. Oriental customs are diligently and carefully explored, and old errors scrupulously weeded out. A tolerably complete view of the literature of each subject is also usually given. In short, an earnest, liberal, and judicious scholarship is brought to bear upon every topic (with but few exceptions) that are appropriate to the scope of such a work. It has been the basis of a large number of important Biblical articles in this Cyclopædia. The only serious drawback upon its general value is a tendency to prolixity, and in some cases to a speculative vein, together with the almost inevitable consequences of a multiplicity of authors, leading to omissions in some cases and discrepancies in others. The edition of 1856, although professing to be "carefully revised" by Dr. Burgess, altogether failed to remedy these defects, being printed from the same stereotype plates, with the change of a few pages and an unimportant sentence here and there, very many of the most palpable errors being left uncorrected. A really new and greatly augmented edition has now (Edinb. 1862–5, 3 vols. royal 8vo) been carried through the press by Dr. J. L. Alexander, with the aid of a number of scholars, which, while substantially a reprint of many of the old articles, has large additions of new ones, especially the *biographies* of eminent Biblical writers, thus more fully realizing the special title of the work. The articles on Biblical geography and criticism are also brought down to the present state of investigation.

(4.) The only remaining work which for originality and research deserves to be mentioned in comparison with the foregoing is the *Dictionary of the Bible* (Lond. 1860–4, 3 vols. 8vo), edited by Wm. Smith, LL.D., of the University of London, and consisting, like the preceding, of articles prepared afresh by fifty-three eminent English and American scholars, although the names appended to the several articles are not always those of persons so well known to be proficients in the topics assigned them. The work is of a very elaborate and learned character, and has been peculiarly available in the preparation of the present Cyclopædia from the fact that it seems to avoid as much as possible the line of treatment pursued by Kitto's. It has the advantage of the latter in a more copious vocabulary, especially in the less important Biblical names, and in bringing down the investigations to a later date, but is far from excelling it in point of clearness and coherence of style, while it is rather the inferior in opulence of matter and in comprehensiveness. The topographical details are particularly well treated; those relating to natural science are by no means so satisfactory. The articles are, with a very few exceptions, terse and compact, with a tendency, however, to expansion as the work advances. It contains an immense body of very valuable information, to a large degree new, and for the most part well digested, and admirably supplements the stock accumulated by previous efforts in the same line. Like the preceding, it is characterized by a liberal tone of theological sentiment.

(5.) The *Imperial Bible Dictionary* by Rev. P. Fairbairn, D.D., with numerous coadjutors (Edinb. 1865 sq., 2 vols. imperial 8vo), is of a more popular character, and not so extensive in its general range as those named above. It is, however, entirely evangelical in sentiment. Its cuts, a number of which have been borrowed in this *Cyclopædia*, are particularly fine. It

adds, moreover, some new items to the investigations of its predecessors.

(6.) A new *Bibel-Lexikon* is announced in Germany, to be edited by Dr. Daniel Schenkel, with the co-operation of Drs. Bruch, Diestel, Dillmann, Fritzsche, Gass, Hausrath, Hitzig, Holzmann, Keim, Lipsius, Merx, Reuss, Roskoff, Schwarz, Schweizer, and other eminent Biblical scholars. These names give promise of thorough and original research, but of Rationalistic views. The work is to be comprised in 4 vols. 8vo. What has thus far appeared (Leipzig, 1868) does not afford much new material or literature.

Other Biblical dictionaries entitled to special notice as containing much original and useful matter are: P. Ravanel, *Bibliotheca Sacra* (Genev. 1660, fol.); J. H. Otho, *Lex. Rabbinico-philologicum* (Gen. 1675, 12mo; with additions by J. F. Zachariä, Kiel, 1757, 8vo); A. Rechenbergii *Hierolexicon reale collectum* (Lips. et Francf. 1714, 2 vols.); the *Dictionnaire Universel, Dogmatique, Canonique, Historique, et Chronologique des Sciences Ecclésiastiques, et avec des Sermons abrégés des plus célebres Orateurs Chrétiens*, par le P. R. Richard, et autres Religieux Dominicains, etc. (Paris, 1760–64, 5 vols.); J. Brown (of Haddington), *Dictionary of the Holy Bible* (London, 1769, 2 vols. 8vo, and often since; also N. Y. 8vo); W. F. Hezel, *Biblisches Real-Lexikon* (Leipsic, 1783–85, 3 vols. 4to); F. G. Leun, *Bibl. Encyklopädie* (Gotha, 1793–98, 4 vols. 4to); C. G. Haupt, *Bibl. Real. u. Verbal-Encyklopädie* (Quedlinb. 1820–7, 3 vols. 8vo); W. Goodhue and W. C. Taylor, *Pictorial Dictionary of the Holy Bible* (London, 1843, 2 vols. sm. fol.); J. A. Bastow, *Biblical Dictionary* (Lond. 1848, 3 vols. 12mo; condensed edition, Lond. 1859, 12mo); H. Zeller, *Biblisches Wörterbuch* (Stuttg. 1855–8, 2 vols. large 8vo); Krehl, *New-Test. Handwörterbuch* (Gött. 1857, 8vo). Of less importance in this respect are the following: T. Wilson, *Complete Christian Dictionary* (Lond. 1661, fol.); J. C. Beck, *Vollständ. bibl. Wörterbuch* (Basel, 1770, 2 vols. fol.); J. A. Dalmasius, *Dictionarium manuale Biblicum* (Aug. Vind. 1776, 2 vols. 8vo); A. Macbean, *Dictionary of the Bible* (Lond. 1779, 8vo); P. Oliver, *Scripture Lexicon* (Birmingham, 1784, 8vo; London, 1843, 18mo); G. L. Gebhardt, *Biblisches Wörterb.* (Lemgo, 1793–6, 3 vols. 8vo); M. C. F. Schneider, *Wörterb. üb. d. Bibel* (Lpz. 1795–1817, 4 vols. 8vo); J. Robinson, *Theolog., Biblical, and Eccles. Dictionary* (Lond. 1815, 8vo; also 1835); J. C. Vollbeding, *Bibl. Wörterb.* (Berl. 1800–5, 3 vols. 8vo); C. A. Wahl, *Bibl. Handwörterb.* (Lpz. 1828, 2 vols. 8vo); W. Jones, *Biblical Cyclopædia* (Lond. 1831, 2 vols. 8vo); R. Watson, *Biblical and Theol. Dictionary* (Lond. 1831, royal 8vo; N. Y. also Nashville, 8vo); C. L. Walbrecht, *Biblisch. Wörterbuch* (Gött. 1837, 8vo); S. Green, *Biblical and Theol. Dictionary* (London, 1840, 1860, 12mo); J. Gardner, *Christian Cyclopædia* (Edinb. n. d. 8vo); A. C. Hoffmann, *Allgem. Volks-Bibellexikon* (Lpz. 1842 sq., 4to); J. Eadie, *Biblical Cyclopædia* (2d ed. 1849, 8vo); J. P. Lawson, *Bible Cyclopædia* (London, 1849, 3 vols. royal 8vo); F. C. Oetinger, *Biblisches Wörterb.* (Stuttg. 1849, 8vo); J. Farrar, *Biblical and Theolog. Dictionary* (Lond. 1852, 12mo); H. Malcom, *Dictionary of the Bible* (London, 1854, 18mo); J. A. Bost, *Dictionaire de la Bible* (Paris, 1865, 8vo); J. Ayre, *Treasury of Bible Knowledge* (London, 1866, small 8vo); H. Besser, *Bibl. Wörterbuch* (Gotha, 1866, 8vo); J. Hamburger, *Biblisch-talmudisches Wörterbuch* (Strelitz, 1866 sq., 8vo); with many others of still less extent or importance in this country as well as in Europe. The strictly Biblical articles contained in the general Cyclopædias, as a class, are usually too meagre to deserve particular attention in this comparison.

DICTIONARIES, Ecclesiastical and Theological. Several of the works enumerated in the above article include ecclesiastical and theological topics, as well as Biblical; e. g. Richard, *Dictionnaire Universel*; Robinson, *Theological, Biblical, and Ecclesiastical Dictionary*; Watson, *Biblical and Theological Dictionary*, etc. We add here a list of the most important general theological dictionaries.

Broughton (Thomas), *Bibliotheca Historica Sacra, or an Historical Library of the principal matters relating to Religion* (London, 1737, 2 vols. fol.); a work admirably done, on the whole, for that time. It has been largely used by succeeding editors of cyclopædic works.

Ferraris (F. Lucius), *Prompta Bibliotheca, canonica, juridica, moralis, theologica, necnon ascetica, polemica, rubricistica, historica* (Madrid, 1795, 10 vols. in 5, fol.; revised by the monks of Monte Cassino, Rome, 1844–5, 2 vols. 4to; new ed. by Migne, Paris, 8 vols. imp. 8vo, 1856–58), is a vast compendium of Roman Catholic theology, canon law, and of the other topics enumerated in the title. The abbé Migne's edition is the most useful, and the cheapest.

Buck, *Theological Dictionary, containing Definitions of all religious and ecclesiastical Terms*, etc. (London, 1802, 2 vols. 8vo; many English and American editions; the best by E. Henderson, Lond. 1833 to 1854). This manual has been very widely circulated, and has well deserved its good repute, though superseded now by later and larger works.

Brown (J. Newton), *Encyclopædia of Religious Knowledge, or Dictionary of the Bible, Theology, Religious Biography, all Religions, Ecclesiastical History, and Missions; containing Definitions of all religious Terms, and impartial Accounts of the principal Christian Denominations that have existed in the World from the Birth of Christ to the present Day* (Brattleborough, 1835, royal 8vo; and in many editions since). This useful work has had perhaps a wider sale than any book of its class has ever reached. It has not the scientific character of more recent books, but at the time of its issue it was up to the wants of general readers, as well as of ministers in actual work. It has a *Missionary Gazetteer* at the end, prepared by the Rev. B. B. Edwards, and very full and accurate at the time of publication.

Aschbach (Roman Catholic), *Allgemeines Kirchen-Lexikon, oder alphabetisch geordnete Darstellung des Wissenswürdigsten aus der gesammten Theologie und ihren Hülfswissenschaften* (Frankfurt a. M., and Mainz, 1846–1850, 4 vols. 8vo). As the title states, this book aims at *selections* from the whole field of theological knowledge. It is very fair, on the whole; learned, generally accurate, and great skill in condensation is shown throughout the work.

Wetzer und Welte (Roman Catholic), *Kirchen-Lexikon, oder Encyklopädie der katholischen Theologie und ihrer Hilfswissenschaften* (Freiburg, 1848–56, 12 large vols. 8vo), is the most scientific and complete book of its class in Roman Catholic literature. The German Romanist theologians are, in general, far more learned and also more liberal than those of other countries, and this work is a valuable fruit of their industry and erudition. It covers, for Roman Catholic theology, the same field as that treated by Herzog for Protestant theology; and its editors excel in the cyclopædic faculty, so that the length of its articles is better proportioned to their importance than is the case with its great Protestant compeer. Nevertheless, the work is still far behind Herzog in learning and completeness.

Farrar (John), *An Ecclesiastical Dictionary, explanatory of the History, Antiquities, Heresies, Sects, and Religious Denominations of the Christian Church* (Lond. 1853, 12mo, p. 560), is a compact manual, chiefly abridged from Bingham, Coleman, Riddle, and other writers on antiquities, with descriptions also of modern sects, denominations, and usages. It is very well prepared, and forms a useful hand-book, especially for general readers; the absence of references to authorities makes it less valuable for students.

Eadie (John), *Ecclesiastical Cyclopædia, or Dictionary of Christian Antiquities and Sects* (London, 1862, 12mo, 2d ed.). This work covers Theology, Patris-

tics, Church History, Archæology, etc. but, of course, in a brief and summary way. It draws largely from the *Encyclopædia Metropolitana* (which belongs to the same publishers), but a great deal of valuable and recent matter has been added by Dr. Eadie.

Hook, W. F., *A Church Dictionary* (sixth edition, London, 1852, 8vo; American edition, Philadelphia, 1854, 8vo). This is a compilation intended especially to set forth, for members of the Church of England, the "more important doctrines of the Church, and the fundamental verities of our religion." As an original authority it is of little value. Dr. Hook adopted (and acknowledged the adoption of) the title of Dr. Staunton's *Church Dictionary*, but he also "adopted," without acknowledgment of any kind, more than fifty pages of the matter of that excellent work.

Staunton, *Dictionary of the Church* (N. Y. 1839, 12mo), and, in enlarged form, *An Ecclesiastical Dictionary* (New York, 1864, 8vo), treats of the history, ritual, worship, discipline, ceremonies, and usages of the Church, from the point of view of the Protestant Episcopal Church. This work is careful, scholarly, and reliable within its sphere. It was largely used by Hook (see above).

Eden (Robert), *The Churchman's Theological Dictionary* (3d edition, Lond. 1859), aims to give a "plain and simple explanation of theological and ecclesiastical terms, without entering into controversy;" and it accomplishes its aim admirably. In terseness and clearness of statement this little book is almost without a rival among brief dictionaries. It is written for the Church of England, but its point of view is that of the so-called moderate Episcopalians.

Herzog, *Real-Encyklopädie für protestantische Theologie und Kirche, in Verbindung mit vielen protestantischen Theologen und Gelehrten herausgegeben* von Dr. Herzog, ord. Prof. d. Theologie in Erlangen (Gotha, 1854–66, 18 vols. and 3 supplementary vols., with Index volume additional). This great work professes to treat of all important subjects in the entire range of Protestant theological science in one alphabet. In scientific structure, as well as in extent of learning, this Cyclopædia far surpasses all others in the same field. Its greatest fault is want of careful editorial supervision; each writer seems to have been allowed to treat his subject as he pleased, and to fill one page or ten, without sufficient reference to the comparative importance of the subjects discussed. Its deficiencies in English and American topics are very marked; but, with all drawbacks, the *Real-Encyklopädie* is a great treasury of theological and historical science, and must hold its place for many years as such. A condensed translation of the work was commenced in 1856 by the Rev. J. H. A. Bomberger, D.D., assisted by distinguished theologians of various denominations. Unfortunately, the publication was suspended at the 12th number (article Josiah).

A brief Theological and Biblical Dictionary, which is to embrace in 2 vols. the whole field of theology, was began in Germany at the beginning of 1868 (*Theologisches Univ.-Lex.* Elberfeld, 1868). The names of the editor and contributors are not given. In its tendency it promises to be entirely objective.

In France, a compendious "Universal Dictionary of Ecclesiastical Science" (*Dictionnaire Universel des Sciences Ecclésiastiques*, Tours, 1868), in 2 vols., has been published by abbé Glaire, well known by a number of exegetical works.

Besides the above, there are numerous hand-books, on special topics, arranged in alphabetical order, such as Fuhrmann, *Handwörterbuch der christlichen Religions- und Kirchengeschichte* (Halle, 1826–29, 4 vols. 8vo); Siegel, *Handbuch der christlich-kirchlichen Alterthümer* (1836–38, 4 vols. 8vo); Doering, *Die gelehrten Theologen Deutschlands* (Berlin, 1831–35, 4 vols. 8vo); Doering, *Die deutschen Kanzel-Redner* (Berlin, 1830, 8vo); Bergier, *Dictionnaire de Théologie* (ed. by Gousset, Paris, 1854, 6 vols. 8vo); Newcomb, *Cyclopædia of Missions* (New York, 1854, 8vo); Jones, *Christian Biography* (Lond. 1829, 12mo); Jamieson, *Cyclopædia of Religious Biography* (Lond. 1853, 12mo); Hook, *Ecclesiastical Biography* (Lond. 1846–1852, 8 vols. 12mo); *Cyclopædia of Religious Denominations* (Glasgow, 1852, 8vo); Martigny, *Dictionnaire des Antiquités Chrétiennes* (Paris, 1865, large 8vo). The abbé Migne has published three series of the *Encyclopédie Théologique*, containing 165 volumes, and professing to treat of all subjects within the range of theological literature. Few of them are of scientific value, and the whole series is, perhaps, the least important and useful of Migne's great undertakings.

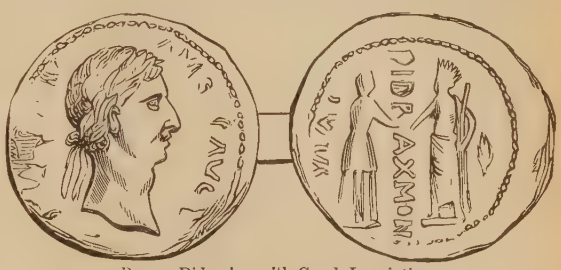
Diderot, Denys, a French writer and infidel philosopher, was born Oct. 5, 1713, at Langres, in Champagne, where his father was a cutler. He was educated for the Church at the Jesuits' College of Langres; but, declining to take orders, he studied law, soon abandoned that pursuit, and devoted himself to literature. "After ten years of obscure drudgery, he became one of the most famous among those literary and scientific men whose attacks on the established order of things, religious and ecclesiastical as well as political, acted so powerfully in precipitating the French Revolution. Diderot projected the *Encyclopédie, ou Dictionnaire Raisonné des Sciences, des Arts et des Métiers*, which was designed not merely to supersede the imperfect dictionaries of Chambers and others then in use, but to teach, on every occasion which could admit the teaching, the social and infidel doctrines which were held by the writers. In the course of it, and afterwards, Diderot wrote several didactic treatises, indecent and irreligious novels, and two sentimental comedies; and his published correspondence, especially with Voltaire and Grimm, throws much light on the gloomy picture which French society and morals then presented." He died at Paris July 30, 1784. "The great peculiarity of Diderot was his encyclopædic knowledge, and his versatility in comprehending a variety of subjects. Less critical than Voltaire, and less philosophical than Rousseau, he exceeded both as a practical teacher. But in unbelief he unhappily advanced farther than either; his temper lacked moral earnestness, and in later life he was an atheist. A growth of unbelief may be traced in him: at first he was a doubter, next he became a deist, lastly an atheist. In the first stage he only translated English works, and even condemned some of the English deists. His views seem gradually to have altered, probably under the influence of Voltaire's writings, and of the infidel books smuggled into France; and he thenceforth assumed a tone bolder and marked by positive disbelief. In 1746 he wrote his *Pensées Philosophiques*, intended to be placed in opposition to the *Pensées* of Pascal. Pascal, by a series of sceptical propositions, had hoped to establish the necessity of revelation. Diderot tried by the same method to show that this revelation must be untrue. The first portion of the propositions bore upon philosophy and natural religion, but at length he came to weaken the proofs for the truth of Christianity, and controverted miracles, and the truth of any system which reposes on miracles; yet even in this work he did not evince the atheism which he subsequently avowed. It was soon after the imprisonment in which he was involved by this book that he projected the plan of the magnificent work, the *Encyclopédie*, or universal dictionary of human knowledge. Its object, however, was not only literary, but also theological; for it was designed to circulate among all classes new modes of thinking, which should be opposed to all that was traditionary. Voltaire's unbelief was merely destructive; this was reconstructive and systematic. The religion of this great work was deism; the philosophy of it was sensationalist and almost materialist, seeming hardly to allow the existence of anything but mechanical be-

ings. Soul was absorbed in body; the inner world in the outer—a tendency fostered by physics. It was the view of things taken by the scientific mind, and lacks the poetical and feeling elements of nature—a true type of the cold and mechanical age which produced it. Diderot's atheism is a still further development of his unbelief. It is expressed in few of his writings, and presents no subject of interest to us, save that it seeks to invalidate the arguments for the being of a God, drawn from final causes. It has been well observed that the lesson to be derived from him is that the mechanical view of the world is essentially atheistic; that whosoever will admit no means of discovering God but common logic, cannot find him. Diderot's unbelief may be considered to embody that which resulted from the abuse at once of erudition, physical science, and the sensational theory in metaphysics" (Farrar, *Critical History of Free Thought*, lect. v). A collection of his principal works was published by his disciple Naigeon, in 15 vols. 8vo, 1798, and reprinted since in 22 vols. 8vo, Paris, 1821, with a life of the author by Naigeon himself, which, however, is rather a dissertation on Diderot's writings and opinions than a real biography. Supplementary to the above edition of Diderot's works are *Correspondance philos. et critique de Grimm et Diderot* (Paris, 1829, in 15 vols.), and the *Mémoires, Correspondance, et Ouvrages inédits de Diderot* (Paris, 1830, 4 vols). See also Rosenkranz, *Diderot's Leben und Werke* (1866, 2 vols.); Carlyle, *Miscel. Works*, vol. iv; Rich, *Dictionary of Biography; Engl. Cyclopædia;* Vinet, *French Literature;* Hoefer, *Nouv. Biog. Générale*, xiv, 80 sq.

Didier, or **Géry** (in Latin Desiderius), bishop of Cahors, was born at Albi in 595. He was of a noble family in Aquitania, and was educated at the court of king Clotaire II, who appointed him treasurer of the crown. Dagobert, the son and successor of Clotaire, gave to Didier, in addition to his office of treasurer, that of governor of Marseilles. In 629, when his brother Rusticus, bishop of Cahors, was assassinated, Didier was chosen his successor. As bishop he became very rich, and made himself popular by a judicious use of his wealth. Didier is a popular saint in Southern France under the name of Géry. His works have been lost; only sixteen *epistles*, addressed to prominent persons of his time, as the kings Dagobert and Sigebert III, are still extant. These epistles have been published by Canisius (*Antiquæ Lectiones*, tom. v), in Migne, *Patrologia Lat.* vol. lxxxvii, and by Bouquet, *Collection des Historiens de France*, tom. iv.—Hoefer, *Biog. Générale*, xiv, 102.

Didier, St., archbishop of Vienne, was born at Autun, and became bishop of Vienne in 596. As he gave instruction in belles-lettres and ancient literature, he was denounced to Gregory the Great as teaching his pupils pagan literature. Didier found it easy to justify himself; but, having reproved queen Brunehild for her conduct, this princess convoked a synod at Chalons sur Saone and in 603 Didier was deposed and exiled to an island in the river Rhone. Four years after he was restored to his see, but as he did not cease to censure the queen, and as he endeavored to withdraw the young king Thierry from the influence of his grandmother, Brunehild had him waylaid and assassinated in a village called Prisciniacum, on the bank of the Chalarone (subsequently called St. Didier de Chalarone), on May 23, 608. On Feb. 11, 1620, the body of Didier was transferred to St. Peter and Paul's church at Vienne. Several other churches claim to possess some relics of Didier, who is commemorated by the Church of Rome as a saint on Feb. 11 and May 23. Lives of Didier have been published by Mombrice and Chifflet.—Hoefer, *Biog. Générale*, xiv, 101.

Didrachm (Greek *δίδραχμον*, Lat. *didrachma*—a *double drachma*, "tribute," Matt. xvii, 24), a silver coin equal to two Attic drachmæ, and also to the Jewish half shekel (Joseph. *Ant.* iii, 8, 2). It was therefore equivalent to about 1*s.* 4*d.* sterling, or 30 cents. See Dram; Stater. By the law every Jew was required to pay half a shekel to the Temple (Exod. xxx, 13 sq.), and this amount is represented by the didrachma in Matt. xvii, 24, where it is used for the "tribute-money" demanded of Christ (compare Josephus, *Ant.* xviii, 9, 1). The Septuagint everywhere renders the "shekel" of the Old Testament by *didrachma;* but as



Roman Didrachm with Greek Inscription.

the Attic drachma was equal to only half a shekel, it seems from this probable that the drachma of Alexandria was equal to two Attic drachmæ, or one of Ægina. See Frentz, *De didrachmis a Christo solutis* (Viteb. 1737); Schmidt, *id.* (Argent. 1701; Lips. 1757; also in his *Dispp.* p. 796–863); Leisner, *Illustratio* loci Matt. (Fridericopol. 1794); Paulus, *Erwerbungsmittel des Stater* (in his *Theol. Journ.* 1795, p. 859–73, 931–45). See Tribute.

Did'ymus (*Δίδυμος*, the *Twin*), a surname (John xi, 16) of the apostle Thomas (q. v.).

Didymus of Alexandria (called *the Blind*) was born at Alexandria about A.D. 311, and unfortunately lost his sight in the fourth or fifth year of his age; yet he arrived at great proficiency, it is said, in philosophy, rhetoric, mathematics, music, and divinity (Socrates, *Eccl. Hist.* iv, 25). He became master of the catechetical school of Alexandria, where his fame drew to him "numbers from distant parts to see him only;" and among his disciples were St. Jerome, Rufinus, Palladius, Evagrius, and Isidore. Anthony, the chief of the Recluses, visited him; and seeing him blind, said, "Let it nothing move you, O Didymus, that your bodily eyes are lost, for you are deprived only of the same kind of eyes as serve the basest insects for vision; but rather rejoice that you possess those with which angels are seen, and God himself is discerned." He died at Alexandria A.D. 395. He opposed the Arian doctrine, but seems to have embraced certain of the views of Origen, which caused him to be condemned at the fifth General Council of Constantinople. He was a voluminous writer, but most of his works are lost; there is a list of them in Jerome, *De Vir. Illust.* and in Fabricius, *Bibliotheca Græca*, ix, 269 sq. (ed. Harles). Those that are preserved are (1.) *De spiritu Sancto* (of the Holy Spirit), of which Jerome made a Latin version, which is preserved among his works. The Greek original is lost. It is given in Gallandii *Bibliotheca Patrum*, vol. vi; in Migne, *Patrologia Græca*, xxxix; and in separate editions, Cologne, 1531, 8vo; and (better) Helmstadt, 1614, 8vo. The book teaches that the Holy Spirit is not a mere name or property, but a real existence "in union with the Father and the Son, and different from all created things;" that it is the cause of wisdom, knowledge, and sanctification; and (Luke xi, 13) "that it is the fulness of the gifts of God; and all divine benefits subsist through it, since whatever gift God's grace bestows flows down from this fountain;" that it is *unbounded*, therefore no creature (Mark xiii, 11); that it is not of the nature

of angels, for they are not *essentially* holy; that it is not a creature, for men's spirits are said to be filled with it, and no mind can be filled with a creature; nor is it a quality, for the working of an agent is attributed to it; that it exists with and as God, and is so called Acts v, 3, 4; and that it, with the Father and the Son, forms one essential Godhead in a Trinity of persons, each capable of distinct action in the same time and place; and that the Holy Spirit is of the *same nature* with the Father and the Son, because they have the same operation, etc. (2.) *Breves enarrationes in Epistolas Canonicas* (Exposition of the Catholic Epistles), given in Migne, *Patr. Gr.* vol. xxxix, and in other collections:—(3.) *Liber adversus Manichæos*, of which the original Greek is given in Canisii *Lect. Antiq.* i, 204 (compare Basnage's notes in his ed. of Canisius); also in Combefis, *Auctarium Noviss.* vol. ii, and in Migne, *Patr. Gr.* xxxix:—(4.) *De Trinitate*, Libri tres (περὶ Τριάδος), which was long lost, but was found by Joh. Aloys. Mingarelli, and published by him at Bologna, 1769, fol. It is given (Greek and Latin) in Migne, vol. xxxix, where also are several fragments of the Commentaries of Didymus on various parts of Scripture. See the notices in Migne, *Patrol. Græc.* xxxix, 140 sq.; Fabricius, *Bibliotheca Græca*, ix, 269 sq.; Cave, *Historia Literaria*, anno 370; Ceillier, *Auteurs Sacrés*, vol. v, ch. xix (Paris, 1865); Schröckh, *Kirchengeschichte*, vii, 71 sq.; Guericke, *De Schola Alexandrina;* Schaff, *History of the Christian Church*, iii, § 167; Lardner, *Works*, iv, 300; Dupin, *Ecclesiastical Writers*, ii, 103; Clarke, *Succession of Sacred Literature*, i, 397; Lücke, *Questiones Didymianæ* (Gött. 1829); Alzog, *Patrologie*, § 52 (Freiburg, 1866, 8vo).

Didymus (Zwilling), **Gabriel**, a friend and coworker of Luther, was born at Joachimsthal, in Bohemia, in 1487. He studied at Prague and Wittenberg, joined the Augustinians in 1502, and became priest in 1513. He was among the first to embrace the principles of the Reformation, and in 1521 caused private masses to be abolished in the Augustinian convent of Wittenberg, as well as the practice of begging, and substituted in their stead that of preaching on texts taken from Scripture. He afterwards severed his connection with the convents, and engaged in Carlstadt's crusade against learning, but subsequently acknowledged his error on this point. He left Wittenberg, however, and went as pastor to Düben and Torgau. He was deposed in 1549 by Moritz of Saxony for his opposition to the Leipzig Interim (q. v.), and died in retirement in 1558. See Seckendorf, *Commentarius de Lutheranismo;* Terne, *Nachricht von des G. Didymus fatalem Leben* (Leipsic, 1737, 4to); Herzog, *Real-Encyklopädie*, iii, 384; Planck, *Geschichte d. prot. Theologie*, iv, 243 sq.

Dieffenbacher, Jacob Follmer, a minister of the German Reformed Church, was born near Milton, Northumberland County, Pa., December 18, 1802. He spent his youth on a farm, and in a saw-mill and cloth factory. He pursued his preparatory studies in the Milton Academy, and studied theology in the Theological Seminary of the German Reformed Church then at Carlisle, Pa. He was licensed and ordained in 1828, and was pastor successively in Sharpsburg charge, Md., Mercersburg, Pa., Woodstock, Va., and Harmony, Butler County, Pa. In this last charge he devoted part of his time to teaching. He died Feb. 4, 1842. While at Woodstock he published a small work entitled *The Scripture Doctrine of Water Baptism, of Infant Baptism, and Baptism by Pouring or Sprinkling.* At Woodstock, Va., he was compelled to stand a trial in court for an alleged violation of law in expressing certain sentiments on the subject of slavery in an address on colonization. He was, however, acquitted, but soon after left the state. He preached in German and English, and was a warm-hearted and zealous minister.

Diepenbrock, Melchior Baron of, was born at Bocholt, in Westphalia, January 6th, 1798. In 1814 he entered the Prussian militia, and after 1818 studied theology at Landshut, Mayence, and Munster. He was consecrated priest in 1823, but remained with bishop Sailer (q. v.) as secretary at Regensburg. In 1830 he was made dean, and in 1835 prebendary of the cathedral. He afterwards acted as episcopal vicar general from 1842 to 1844, was created baron in 1845, and elected prince bishop of Breslau. In 1848 he was sent to the Parliament at Frankfort. In the conflict between the Prussian government and the Legislature, which refused to the former the right of levying taxes, Diepenbrock vigorously supported the government, and issued a pastoral, which, by order of the government, was published in all the official papers. He was made cardinal in 1850, and died Jan. 20, 1853, at Johannisberg, in Austrian Silesia. In 1850 he founded the Melchior fund of 10,000 florins for the support of poor chaplains in the Austrian part of the diocese of Breslau. He was a moderate Papist, and, like most of the school of Sailer, earnest in piety and Church reforms. See Sailer. His principal works are, *Geistlicher Blumenstrauss* (Regensburg, 1826; 2d ed. Sulzb. 1852):—*Erinnerungen an d. jungen Grafen v. Stolberg;* *Leben Heinrich Suso's* (Regensb. 2d ed. 1837):—*Vlämisches Stillleben nach Conscience*, and several sermons. A biography of Diepenbrock was published by his successor in the see of Breslau, bishop Foerster, in 1859. —Pierer, *Universal-Lexikon*, s. v.

Dies Absolutiōnis. One of the names of Good Friday. The title originated with the custom of absolving penitents from ecclesiastical penalties on that day.—Ambrosius, *Epist.* 33; Siegel, *Handbuch d. Alterthümer*, i, 376.

Dies Cinĕrum, the Latin name for Ash-Wednesday (q. v.).

Dies Cœnæ Dominicæ or **Eucharistiæ**, one of the designations of Maundy Thursday (q. v.). It was distinguished by the celebration of the Lord's Supper. See Maundy Thursday.

Dies Dominicus (ἡ κυριακή), the ancient name of the Lord's Day, which was also called Sunday, *dies solis*, especially when, in addressing the heathen, it was necessary to distinguish the day. During the early ages it was never called the Sabbath, that word being confined to the seventh day of the week, which continued to be observed by the Jews, and in part also, for a short time, by some of the converts to Christianity.—Bingham, *Orig. Eccles.* bk. xx, ch. ii, § 1; Coleman, *Ancient Christianity*, ch. xxiii, § 2.

Dies Iræ, the famous Latin judgment hymn of the 13th or 14th century, which, in its received form reads as follows:

1. Dies iræ, dies illa,
Solvet sæclum in favilla,
Teste David cum Sibylla.

2. Quantus tremor est futurus,
Quando judex est venturus,
Cuncta stricte discussurus?

3. Tuba, mirum spargens sonum
Per sepulcra regionum,
Coget omnes ante thronum.

4. Mors stupebit et natura,
Quum resurget creatura,
Judicanti responsura.

5. Liber scriptus proferetur,
In quo totum continetur,
Unde mundus judicetur.

6. Judex ergo quum sedebit,
Quidquid latet, apparebit,
Nil inultum remanebit.

7. Quid sum miser tunc dicturus,
Quem patronum rogaturus,
Quum vix justus sit securus?

8. Rex tremendæ majestatis,
Qui salvandos salvas gratis,
Salva me, fons pietatis.

9. Recordare, Jesu pie,
Quod sum causa tuæ viæ,
Ne me perdas illa die.

10. Quærens me sedisti lassus,
Redemisti cruce passus:
Tantus labor non sit cassus.

11. Juste judex ultionis,
Donum fac remissionis
Ante diem rationis.

12. Ingemisco tanquam reus,
Culpâ rubet vultus meus:
Supplicanti parce, Deus.

13. Qui Mariam absolvisti,
Et latronem exaudisti,
Mihi quoque spem dedisti.

14. Preces meæ non sunt dignæ,
Sed tu, bone, fac benigne,
Ne perenni cremer igne.

15. Inter oves locum præsta,
Et ab hœdis me sequestra,
Statuens in parte dextra.

16. Confutatis maledictis,
Flammis acribus addictis,
Voca me cum benedictis.

17. Oro supplex et acclinis,
Cor contritum quasi cinis,
Gere curam mei finis.

18. [Lacrimosa dies illa,
Qua resurget ex favilla
Judicandus homo reus;
Huic ergo parce, Deus.
Pie Jesu Domine
Dona eis requiem. Amen.]

This is the text of the Roman Missal. The last six lines we consider as an addition by another hand from older hymns in public use. Daniel (*Thesaurus hymnol.* ii, 103) gives two other forms; one considerably longer, from a marble slab in the Franciscan church at Mantua (first published by Mohnike, who, without good reason, considers it the original form), and commencing,

Cogita (Quæso) anima fidelis
Ad quid respondere velis
Christo venturo de cœlis.

I. *Contents.*—The hymn is variously called *Prosa de mortuis, De die judicii, In commemoratione defunctorum*, and is used in the Latin Church on the day of All Souls (Nov. 2), in masses for the dead, and on funeral solemnities. It is a judgment hymn, based upon the prophetic description of the great day of the Lord in Zeph. i, 15, according to the translation of the Vulgate: "DIES IRÆ, DIES ILLA, *dies tribulationis et angustiæ, dies calamitatis et miseriæ, dies tenebrarum et caliginis, dies nebulæ et turbinis, dies tubæ et clangoris super civitates munitas et super angelos excelsos.*" The first words of this passage furnished the beginning and the theme of the poem. The other Scripture passages which the author had in view are Psa. cii, 26; xcvi, 13; xcvii, 3, etc. (hence *David* is introduced in the third line of the first stanza as the Scripture prophet of that day); 2 Pet. iii, 7–11 ("The day of the Lord will come as a thief in the night," etc.—hence in some versions *Peter* is substituted for *David*), and the descriptions which Christ himself gives of the general judgment (Matt. xxiv and xxv). But the Sibyl is also mentioned, as the representative of the unconscious prophecies of heathenism, with allusion to the Sibylline oracle of the destruction of the world, commencing "*Væ quas illa dies deprendit.*" This apocryphal feature, though somewhat repugnant to Protestant taste, and hence omitted or altered in many Protestant versions of the poem, is in perfect keeping with the patristic and scholastic use of the Sibylline oracles, the 4th Eclogue of Virgil, and other heathen testimonies of the same kind, for apologetic purposes. It is intended to give the idea of the judgment of the world a universal character, founded in the expectations of Gentiles, Jews, and Christians, and indicated by the light of reason as well as the voice of revelation. The mediæval painters likewise place the Sibyl alongside of the prophets of Israel. The poem first describes the judgment as a certain fact, with its accompanying terrors; then gives expression to the sense of guilt and dismay, and ends with a prayer for mercy, which prompted Christ to die for poor sinners, and to forgive the penitent thief.

II. *Character and Value.*—The *Dies Iræ* is universally acknowledged to be the sublimest production of sacred Latin poetry, and the grandest judgment hymn of all times and tongues. Daniel (*Thes. hymnol.* ii, p. 112) justly styles it "*uno omnium consensu sacræ poëseos summum decus et ecclesiæ Latinæ κειμήλιον pretiosissimum.*" "It would be difficult," says Coles, "to find, in the whole range of literature, a production to which a profounder interest attaches than to that magnificent canticle of the Middle Ages, the *Dies Iræ*. . . . Of Latin hymns it is the best known, and the acknowledged masterpiece." The Germans call it the hymn of giants (*Gigantenhymnus*). In simplicity and faith it fully equals an older anonymous Latin judgment hymn of the seventh or eighth century, commencing *Apparebit repentina magna dies Domini*, while in lyric fervor and effect, as well as in majesty and terror, it far surpasses it and all the numerous imitations of later times. It stands solitary and alone in its glory, and will probably never be surpassed. It is truly "a thing of beauty that is a joy forever." Among poetic gems it is the diamond. It breathes, indeed, the mediæval spirit of legalistic rather than of joyous evangelical piety, but otherwise it is quite free from every objectionable feature of Romanism, which cannot be said of the two famous *Stabat Maters* (the *Mater dolorosa*, and the recently discovered *Mater speciosa*), tinctured as these are with Mariolatry. It represents salvation as an act of the free grace of Christ, *qui salvandos salvat gratis.* Hence it is as much admired by Protestants as by Roman Catholics. The secret of its beauty and power lies first in the intensity of Christian feeling with which its great theme is handled. The poet feels, as an awful and overpowering reality, the coming judgment of the quick and the dead; he hears the trumpet of the archangel sounding through the open sepulchres; he sees the tumult and terror, the devouring flames and final wreck of the universe, the Judge seated in terrific majesty on the throne, with the open book of the deeds of ages, dividing the good from the bad, and pronouncing the irrevocable sentence of eternal weal and woe; and with the spirit of an humble penitent he pleads for mercy, mercy, mercy, at the hands of Him who pardoned the penitent thief in his dying hour. The poem is in the highest degree pathetic, a cry from the depth of personal experience, and irresistibly draws every reader into sympathetic excitement. That man is indeed to be pitied who can read it without shaking and quivering with emotion. It is pregnant with life, and brings us face to face with the awful scenes of the judgment day. "It is electrically charged, and contact is instantly followed by a shock and shuddering." The second element of its power lies in the inimitable form, which commands the admiration of every man of taste. Whatever there is of dignity, majesty, and melody in the old Roman tongue is here brought out and concentrated as in no other poem, heathen or Christian, and made subservient to the one grand idea of the poem. It is onomatopoetic, and echoes, as well as human language can do, the storm, and wrath, and wailing of the judgment day. Every word sounds like the solemn peal of an organ, or like the trumpet of the archangel summoning the dead to everlasting bliss or to everlasting woe. The stately metre, the triple rhyme, the selection of the vowels in striking adaptation to the sense and feeling, heighten and complete the effect upon the ear and the heart of the hearer. The music of the vowel assonances and consonances, e. g. the double u in the 2d and 7th stanzas (*futurus, venturus, discussurus; dicturus, rogaturus, securus*); the o and u in the 3d stanza (*sonum, regionum, thronum*);

and the i and e in the 9th stanza, defy the skill of the best translators in any language. We quote the judgments of eminent writers. "*Quot sunt verba tot pondera, immo tonitrua,*" says Daniel. "Combining somewhat of the rhythm of classical Latin with the rhymes of the mediæval Latin, treating of a theme full of awful sublimity, and grouping together the most startling imagery of Scripture as to the last judgment, and throwing this into yet stronger relief by the barbaric simplicity of the style in which it is set, and adding to all these its full and trumpet-like cadences, and uniting with the impassioned feelings of the south, whence it emanated, the gravity of the north, whose severer style it adopted, it is well fitted to arouse the hearer" (Dr. W. R. Williams). "The metre so grandly devised, of which I remember no other example, fitted though it has here shown itself for bringing out some of the noblest powers of the Latin language—the solemn effect of the triple rhyme, which has been likened to blow following blow of the hammer on the anvil—the confidence of the poet in the universal interest of his theme, a confidence which has made him set out his matter with so majestic and unadorned a plainness as at once to be intelligible to all—these merits, with many more, have combined to give the *Dies Iræ* a high place, indeed one of the highest, among the masterpieces of sacred song" (Archbishop Trench). (Dr. Trench is mistaken when he says that there is no other example of this metre. There are some verses of striking resemblance attributed by some to St. Bernard, but probably of much later date:

"Cum recordor moriturus
Quid post mortem sim futurus,
Terror terret me venturus,
Quem expecto non securus.
Terret dies me terroris,
Dies iræ ac furoris,
Dies luctus ac mœroris,
Dies ultrix peccatoris,
Dies iræ, dies illa.")
